ROUTES IN RUSSIAN CENTRAL ASIA.

MAIN ROUTE NO. I.

UCH USHAK TO NUKUS.

179.8 miles. 12 stages.

Authorities.—Kostenko, 1880; Russian Route Map 1893.

Epitome.

A road fit for wheeled traffic as far as Petro-Alexandrovska and possibly beyond. It follows the Right bank of the Amu Darya. Water, forage and fuel everywhere.

MAIN ROUTE NO. II

FORT KAZALINSKI to KHOKAND via CHIMKENT, TASHKENT, KHOJENT.

845.7 miles. 59 stages.

Authorities. Kostenko, 1880; Russian Route Map, 1893; Turkistan Guide, 1903.

Epitome.

This is part of the post road from Orenburg to Tashkent. Telegraph line from Orenburg follows the road throughout. Across the Kizil Kum Desert the road is for the most part only a track marked by mounds of earth. It is, however, fit for the passage of troops, wheeled transport and guns throughout.

Main Route No. II.—contd.

45 KHISH-KUPRUK 10 m. At Ak Jar cross the 615.2 m. (Kaplan-Beg). Keles R. by ferry.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

46 TASHKENT ... 12 m. The capital of Turkestan and the chief town of Syr Darya. 627.2 m.

Situated in the valley of the river Chirchik on the canals Boss-Su, Chauli, Salar. The town is divided into Russian and native quarters. The latter is surrounded by a high mud wall in which there were formerly 12 gates and is divided into 4 sections in each of which different trades are carried on. The Russian quarter is laid out in villas and straight streets very much on the pattern of towns in European Russia.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

47 CHIRCHIK ... 8.7 m. From Tashkent onwards a good road fit for wheeled traffic. The Chirchik River is bridged. 635.9 m.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

48 KARA-SU ... 9.3 m. 645.2 m.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

MAIN ROUTE NO. III.

KULDJA to KABULSAI.

800 miles. 51 stages.

Authority—Major Jardyne 1911.

Epitome.

There is practically no metalling and in spring and early autumn the road is covered with at least two feet of mud which in summer becomes dust. Water generally is scarce and the difficulty of procuring it increases the further one gets from the hills. The winter is the best time for travelling when the temperature goes down to 30 or 40 degrees F. below zero. Travelling is done by tarantass with ponies harnessed three abreast. The post houses are 10 to 20 miles apart and are often the only accommodation available. The road is suitable for all arms. Horse and bullock carts are in great abundance. Camels are also used for draught. In case of mobilisation the Russians would probably be able to lay their hands on 6,000 to 8,000 wagons between Aulie Ata and Tokmak. From Kuldja a telegraph line (single wire) goes to Vyerni. From Vyerni a single wire runs to Tashkent and Semipalatinsk. From New Suidan a Chinese telegraph line goes to Urumchi.

<tr>
<td></td>
<td>SUI TING ... 30 m. Kuldja is a straggling unfortified town similar to those of Kashgaria, divided more or less racially into several quarters. Russian quarter N.-W. edge of town about 2 m. N. of the river with several Russian shops and a very good but small bazar. Highest point of the town is occupied by Roman Catholic Mission (Belgian). Country to the North is bare and slightly rising. There is a Russian Post and Telegraph Office. To Sui Ting the road is very bad through fields and hamlets crossing many irrigation channels by very rotten log culverts and the larger ones by muddy fords. Mud or dust according to the weather is phenomenal. At 7 m. pass the end of the</td>
</tr>
</tbody>
</table>
Main Route No. III.—contd.

Kuldja Oasis, bare steppe, patches of long reeds and grass and scrub. At 10 m. a range of low barren hills is seen 1 m. to the N. The Ili River and occasional ruined villages and patches of cultivation are seen some 5 m. to the S. The road is rough and runs over small spurs, dongas, etc. At 19 m. mountains are seen 10—15 m. N. At 20 m. pass a large fortified village and oasis. At 24 m. Kura, a Chinese military station is seen 3 m. to the S. At 30 m. reach Sui Ting a considerable town with a bazaar and surrounded by cultivation.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

2 KHARGOS ... 33 m. Road is very rough; general direction N. of W. Country flat and bare. The Ili River becomes invisible; patches of cultivation, several fortified villages and a number of ruined sites are passed. At 13 m. an uninhabited mud fort is passed. At 27 m. reach Chimpanza (village and bazaar). The Chinese garrison lives in a weak mud fort. At 29 m. is a Chinese Customs House and a small village surrounded by grass and scrub. From the Customs House descend into the very rough stony bed of a river flowing S. The water is 20 feet wide and 6 inches deep. At 33 m. Khargos on the Russian frontier. Here there is a customs house on the high river bank. There is a little cultivation, poplar groves and a church.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

3 AKENTA ... 15 m. General direction W.; road better than in Chinese territory but dust or mud very bad. Country, flat steppe. At Akenta there is a post station in the village where a few Russian colonists live.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—
Main Route No. III.—contd.

2 JARKENT ... 8 m. Direction country and road as in previous stage. At 3.5 m. there is a small village of Russian colonists and the cultivation becomes more extensive. At 8 m. reach Jarkent, a wide well laid out cantonment on flat plain; square blocks with wide clean avenues; bazaar and general air of prosperity; Post and Telegraph offices. The garrison of Jarkent moves into camp in the hills to the North in summer.

5 BOROKHUDSIR ... 10 m. Outside Jarkent cross a small river flowing South. There is a wooden pile bridge 150 yards long but this is not in use except during the floods. From here the road leads over good pasture land on low lying plain dotted with woods of poplar and willow and scrub. From 4 m. a flat bare steppe leads to Borokhudsiir a large old Russian village. The village is laid out in large blocks, is plentifully supplied with poplar trees and the inhabitants (Nogais, Sarts and Kirghiz) own large herds of cattle, but the country is parched and the cattle very thin.

Camping ground.—
Water.—
Fuel.—Plentiful.
Fodder.—
Supplies.—

6 KHOIBIN ... 17 m. Road hard and good over bare grassy steppe. At 13 m. ascend some low foot hills, pass a small divide and descend to Khoibin, a lonely station in a fold of the hills.

Camping ground.—
Water.—From a small stream.
Fuel.—
Fodder.—
Supplies.—Nil.

7 KONOR-ULENSKI ... 17 m. A good hard track over some hard rolling steppe gradually rising. Spring pasture is said to be good.
Main Route No. III.—contd.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Nil.

8 AINA BULAK ... 14 m. Road and country as in previous stage. A number of Kirgiz tombs and auls (tents) are passed. The herds of cattle are smaller than E. of Kuldja and there are fewer horses. Aina Bulak is a solitary post on the steppe.

Camping ground.—
Water.—Scarc.
Fuel.—
Fodder.—
Supplies.—Nil.

9 BASHENSKAIA ... 17 m. Road hard, country very deserted. Bashenskaia is a lonely station. There are only 2 or 3 native homesteads.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

10 ALTYN-EMELSKI ... 18 m. General direction N.-W. Road leads towards the rough northern range which is here much lower and curves S.-W. Large herds of sheep and goats and numerous nomads are passed. At 5 m. the road leads into the range by a small ravine which, twisting round corners leads to an easy kotal 800 feet above the southern plain. The peaks are 500 feet above. Here there is goodish grass and a little water. The slopes are not difficult and the whole range is not a serious military obstacle as it appears to be accessible everywhere. Road is roughly made through the range; 18' wide easy gradient; surface hard gravel. At 8 m. an easy descent to the northern plain which drains N.-W. The general direction becomes more westerly and the road is good over the plain to Altyn-Emelski which is a tiny hamlet with a blacksmith and Post and Telegraph Office. It is situated on a small stream and one or two Russian settlers cultivate a little steppe.
Main Route No. III.—cont’d.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Nil.

11 KUZAI-KUZSKAIA ... 19 m. General direction of road a little south of west; rolling steppe falling from the southern range into the Balkash Desert. In mid October little grass was visible but stubble and small irrigation channel show that some corn is grown. Along this stage there are many camels, large herds of stock and a few native dwellings, Kuzai-Kuzskáia is a small bleak hamlet in a hollow, on a small stream coming from the low range S.-E.

Camping ground.—
Water.—
Fuel.—
Fodder.—Fodder for a few horses always obtainable.
Supplies.—Nil.

12 KARASHEKA ... 20 m. Road passes over hard rolling steppe slightly falling to the N. Road mostly hard.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

13 SHINGILDINSKAIA ... 23 m. Country smoother at first, slightly falling to the N. sandy and rather heavy going in latter half. At Shingildinskaia there are only 2 or 3 Nogai farms.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Nil.

14 ILINSK ... 16 m. General direction S. of W.; country sandy, road heavy going—desert to the N.

At 6 m. the wide depression of the Ili River becomes visible
and the track gradually descends from the stony upland to the heavy sand of its flood plain where there is tamarisk and other scrub, reeds and good pasture. Kazak nomad camps are passed. At 10½ m. the going becomes heavy through sand along the river bank. The water in the river is here from 200 to 400 yards wide. The depth of the water which flows at 4 m. p. h. is apparently considerable. The banks are low and in the stream are a number of long sand banks. The breadth of the bed is 400 to 600 yards and the breadth of the flood plain appears to be 2 m. At 13 m. the scrub increases to Poplar woods. Track now descends a sandy bluff 50 to 100 feet high against the base of which the river washes, the road runs through very deep sand and pace cannot exceed a slow walk. At 14 m. Ilinsk is seen on the opposite bank. At 15 m. cross the river by a wooden lattice girder bridge resting on large crib piers of heavy timbers. The bridge is 400' long, 30' broad, 40' above the stream and consists of 11 spans. It is a very solid structure fit for heavy traffic. Up stream some rocks break the current which flows against the rocky hard bluffs of the N. bank. Ilinsk is a hamlet of some 40 homesteads. Its cultivation is on the N. bank upstream. Stubbles were also seen about 2 m. S. on the steppe.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

15 NIKOLAEIVSKAIA ... 16 m. General direction S.-S.-W.
Road heavy
sandy desert sloping slightly up from the river whose course lies S.-W. At 5½ m. it is only 1½ m. from the road. It is confined in a narrow channel with small irrigable areas and then curves N.-W. into low desert uplands. At 5½ m. cross a small swampy stream. Thence rise slightly to level steppe which now begins to improve. At 8 m. grass appears and to the east distant clumps betoken settlements but the road is still heavy and sandy. At 10 m. irrigation channels begin and gradually increase until at 13 m. small salt farms appear merging at last into a new section of the large colony of Nikolaeivskaia. The colonists appear to have very little stock, wagons or implements. After this there is a better section where young poplars and willows are planted. The last ½ m. is through an old and thriving settlement with good homesteads barns and large stacks of fodder. The Post Station is at the S. end of the settlement.
Main Route No. III.—contd.

Camping ground.—
Water.—
Fuel.—
Fodder.—Plentiful.

Supplies.—Obtainable.

16  KARA SU ... 15 m. General direction S. Road good over flat steppe cultivation. Post station good at old village.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

17  VYERNI ... 16 m. Road at first S. and then a little W. towards the steep range of the Ala Tau which is snow covered to about 10,000 feet. Pine belts appear scanty and the range appears narrow. At 7 m. the country improves and groves and hamlets increase to the S. on the rich foot slopes. At 10 m. Native and Russian traffic increases. The traffic of peasants bringing in supplies has caused the road to become very rough and cut up. The road is now confined between groves, fields, farmsteads and poplar groves. It is 40 to 60 yards wide soft and unmade. Streams crossed are now very well bridged. Passing well to do farms, orchards and gardens the road enters the broad laid out avenues of the town at 15 m. The Post station is in the N. and newest part of the town.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

18  KISHKILIU-LIOVOBIJSKI ... 19 m. Direction parallel to the Ala Tau whose steep spurs rise some 4 m. to the S. One or two valley mouths are passed but the streams issuing are not large. The pine belt is scanty. On the lowest slopes Cornlands, vineyards, numerous villages and groves are seen. Near the road are larger villages and evidence of increasing population. Native farms and nomad tents on the dryer and lower zone
northward; very rich pasture with large second growth hay-stacks on large lowlying areas. There is much local traffic and also a considerable through traffic of camels, telegas and strong two wheeled European carts drawn by one horse. Convoys of 50 to 100 such carts are to be seen. At 3 m. the road is very bad. Up to 2 1/2 m. it follows an embankment above swampy pastures. Up to 5 m. the road is full of deep ruts and crosses numerous irrigation channels and badly bridged mountain streams. At 11 m. the road switchbacks over small ridges. The road is deep in dust and very rough. At 17 m. the ridges end and the road is good over a plain. At 18 m. enter good pasture land and enter the village of Liovobinsk which is about 1 m. long. The Posting Station is at the W. end of the village.

_Camping ground._
_Water._
_Fuel._
_Fodder._
_Supplies._

19 KAZANSKI-BOGORODSKI ... 18 m. Road very bad, switchbacks over ridges and furrow foothills of the Ala Tau with descends and ascents of 50 to 80 feet. At 15 m. the cultivation and traffic becomes much less and the road reaches the summit of this foothill system from whence it presently emerges on to the smooth grass veldt sloping very slightly to a stream at 18 m. beyond which is the prosperous village of Bogorodski. It lies under the edge of two long low foothills on one of which is a monument to a Russian General. A road from Bogorodski runs to Kastlek which is considered the hill station of Vyerni.

_Camping ground._
_Water._
_Fuel._
_Fodder._
_Supplies._

20 SAMSINSKAIA ... 15 m. Road turns N.-W. to avoid ridges thrown out from Southern range which now decidedly increases in height and the pine belt diminishes. Road on the whole is better. There is less cultivation and fewer hamlets.
MAIN ROUTE NO. III.—cont’d.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

---
21 TARGAPSKAIA ... 13 m. Road is more Westerly and on the whole is harder and better, but still rather up and down.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

---
369 m.
22 OTARSKAIA ... 23 m. Road similar but sandy in places. Country wide, barren sandy ridges slowly rising to a small divide from which descend at 17 m. to Otarskaia, a lonely station consisting of one Russian farm and 3 or 4 Sart dwellings in a bare plain 3 miles N. of the last Ala Tau ridge 3,000 feet above. The higher main range is 10 m. further S.-E.

Camping ground.—
Water.—From wells.
Fuel.—
Fodder.—
Supplies.—Nil.

---
392 m.
23 KURDAI ... 25 m. Road N.-W. very good over smooth hard plain gradually approaching the foot of the above mentioned 3,000 ft. range which gradually dies westwards into long low barren ridges. At 20 m. a little cultivation is met and a native farm. At 23 m. the road gradually ascends to rougher ground at the end of the plain and drops to a narrow valley with a small stream flowing northwards. Here there is a very small and poverty stricken hamlet where there are one or two Russian colonists.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Nil.
Main Route No. III.—contd.

24 SIULAMINSKI ... 20 m. Road turns S. and ascends a narrow ravine; hills on either side; some grass. At 3 m. is a kotal. Here the road is roughly made above the little stream and is 4 to 8 yds. wide. In some places two carts cannot pass. Across the kotal is a long bleak steppe slightly falling westwards at 15 m. from the ends of the 3,000 ft. range of stage 22 to a hollow ravine. The descent is steep for .6 m. Road very rough but not dangerous. At 18 m. is Siulaminski which is a settlement with several farms and a stream flowing west.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

25 KONSTANTINOVKA ... 16 m. Direction S. 453 m. S. W. Road good over hard level steppe gradually sinking to marshy levels, reed beds and water with farms and groves to the E. at 12 m. under the higher lands. At 14 m. is a large new settlement built on the nucleus of an older settlement, groves and an irrigation canal. Cross the Chu-Su built of strong timber to the station and native hamlet.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

26 PISHPEK ... 12 m. Road good over hard flood plain until it gradually ascends over improving steppe. Country similar to that near Vyerni but less rich and the hamlets and traffic are less. Pishpek is at the N. foot of the Alexander range. The range is alpine and snowy to the E. but less alpine as it stretches W. At 8 m. the town of Pishpek begins. As far as the town the road is indifferent. The town is comparatively large and is increasing in size. The bazaars are large and in 1911 were well stocked.
MAIN ROUTE No. III.—contd.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

27 NOVO-TROPSKAIA ... 15 m. Direction W.
480 m.
The exit from Pishpek is very bad over stony ground; several small hill streams are crossed by very rough crossings. Road very bad throughout being much cut up by local traffic.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

28 VIELO-BODSKAIA ... 11 m. Road very rough.
491 m.
irrigation cuts, dongas, small hill streams badly bridged with stony approaches.

Camping ground.—
Water.—
Fuel.—

Supplies.—

30 SHALDOVARA ... 20 m. Same as stage 28.
524 m.

very rough.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—
MERKE ... 17 m. Same as stage 28. Road very bad; much traffic. Merke is a large Sart township with a bazaar and Russian township.

32 MOONKE ... 11 m. Road still very bad. Villages passed are chiefly Sart.

LOGOBOI ... 12 m. Country gradually gets barren though there are still Sart farms at intervals. By the end of the stage the country is ordinary rolling steppe, falling slightly from the southern mountains which are merely a long bare ridge. Station at a small Russian colony.

PODGORNOI ... 16 m. Country still rolling steppe slightly barren. A few Sart dwellings and a few nomads are passed; local traffic becomes less.
Main Route No. III.—contd.

35 MAIDABAI ... 12 m.
592 m.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

36 AKIRTUI ... 9 m. Road gets better and harder.
601 m.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

37 AKSULAK ... 11 m. Road good over hard undulating steppe falling slightly from
612 m.
the last long ridge of the Alexander Mountains to the south.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

38 UCH BULAK ... 11 m. Country as in previous stage; southern range now merely a smooth grassy ridge; a large number of dongas are passed. Country to the N. is flat red desert steppe. Uch Bulak is a large station of pucca brick in a bleak situation. From here westwards most of the post houses are well built of solid brick with high brick walls round large courtyards capable of defence against irregulars.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Nil.

39 AULIE-ATA ... 16 m. Road fair (some dongas) across story monotonous steppe which presently begins to sink towards wide shallow north and south.
639 m.
valley with Sart hamlets and cultivation and groves to the N.-W. At 13 m. reach the edge of cultivation where there is an irrigation canal 10 feet x 2 feet. A number of well to do Sart farms are passed. At 15 m. a rocky ridge crosses the road the descent from the rock to a bridge over the Talas River at 16 m. is rough. The bridge is strongly built of iron and wood and is partly suspension. The river constitutes a considerable obstacle, its bed is rocky and the current swift. At 16 m. the town is reached which is watered by a branch of the river. The town is well to do and has a good bazaar.

_Camping ground._
_Water._
_Fuel._
_Fodder._
_Supplies._

40 MAIMAK ... 16 m. Passing through a good bazaar the road turns left; general direction S.-W. It soon leaves the oasis and goes over rolling grassy country, uncultivated, to a low irregular ridge; hence slightly downwards to Maimak—a solitary station. Country to the west is broke, and barren but with one or two hamlets in a valley.

_Camping ground._
_Water._
_Fuel._
_Fodder._
_Supplies._

41 GROJHAKOI ... 13 m. General direction the same gradually approaching a range to the S. 3,000 feet high. Road good slowly rising to a minor watershed whence descent to a large and very prosperous Russian village at 10 m. which is 1,000 yards long. A good post house at 13 m.

_Camping ground._
_Water._
_Fuel._
_Fodder._
_Supplies._
MAIN ROUTE NO. III.—contd.

42 KUL-CHASTAU ... 17 m. Direction more westerly; road good, first over grass veldt well watered by several springs, then slowly ascends over smooth rolling swells towards the mountains till station is reached on black minor watershed of the range.

Camping ground.—
Water.—
Fodder.—
Supplies.—

43 VUSKAIA ... 16 m. Road West over a high plateau, many small dongas, then turns more S. and gradually descends towards a long valley beyond which low broken ridges trend N. and N.-W. At 12 m. reach a bare glen containing the headwaters of the Aris River flowing W. At 17 m. are some bleak native farms and some cultivation. The Post House is situated at the end of a long prosperous village.

Camping ground.—
Water.—
Fodder.—
Supplies.—

44 IVANORSKI ... 11 m. Road west through village and along a stream, then turns S. across steppe to a gap between two rounded ranges 1,500 feet elevation. At 10 m. enter a large well to do Sart village very much of the Kashgar type. At 11 m. enter Ivanorski a prosperous Russian village.

Camping ground.—
Water.—
Fodder.—
Supplies.—

45 KORNILOVKA ... 10 m. Road similar to previous stage.

Camping ground.—
Water.—
Fodder.—
Supplies.—
Main Route No. III.—contd.

46 ANTONOVSKI ... 13 m. At 4 m. the road ascends a cobbled roadway and at 9 m. descends from a plateau into the open Vielo Boda a large well to do Sart oasis of old standing.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

47 CAMP ... 10 m.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

48 CHIMKENT ... 13 m. Road easy and flat, some cultivation and villages.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

49 SASON-SAI ... 7 m. Road through well kept streets for 6 m. passing crumbling mud citadel of which one bastion is used as a saluting battery; pass through part of the bazaar crosses a 30 yard tributary of the Aris flowing in a small shallow glen, good meadows, large poplar groves, good wooden bridge. At 3 m. a well graded cobbled road commences. The road then emerges on barren rolling steppe with undulating ridges falling W. Station is at a small native hamlet.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Nil.

50 UZON BULAK ... 15 m. Same rolling barren steppe almost desert. A few Kirgiz tents are seen.
Main Route No. III.—concl.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

51 KABUL-SAI ... 20 m. Flatter longer rolls over which road is good except in sandy hollows. At 9 m. is a broad depression in which is the only water on the stage. At 13 m. the railway is seen stretching across the veldt ahead. Country becomes more sandy and desert. Kabul-sai is a small station; one goods shed, one 400 yards siding; one loading platform.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

Main Route No. IV.

AULIE ATA TO KHOKAND.

301.75 miles. 15 stages.

Authorities.—Kostenko, 1880; Elliot, 1891; Turkestan Guide, 1903.

Epitome.

Good road fit for wheeled traffic as far as Bish Tash. Thence onwards fit for pack transport. Supplies and water obtainable en route. Good camping grounds.

<table>

<tbody>
<tr>
<td>1 BISH TASH ... 76.25 m. (Details of the stages to Bish Tash not known).</td>
<td></td>
</tr>
</tbody>
</table>

The affluents of the Talas River at Aulie Ata are:—

(a) Kalba Su along which there is a road across the Chichkan-Bel and to Bei Bel Passes to Katmantapa and Uzan Ahmed respectively.
Main Route No. IV._—contd.

(b) Bish Tash along which there is a road to Uzun Ahmed.

c) Uyun Moral along which there is a road to Tabulguta Pass and thence to the Chaktal defile and Uzun Ahmed.

(d) Kara Su along which there is a road to Namangan through the Kara Tapa Gorge.

In the valley of the Tapas itself is a cart road from Aulie Ata.

The road to Bish Tash is good and fit for wheeled traffic.

_Camping ground.—_
_Water.—_
_Fuel.—_
_Fodder.—_
_Supplies.—_

2 Mouth of the TIRAK River ... 16 m. The road crosses the Bish Tash by a deep ford and enters a rocky and narrow defile. On leaving the defile it follows a broad valley intersected by some ravines and finally again crossing the river by a ford follows it on the left bank to the camping ground.

_Camping ground.—_
_Water.—_
_Fuel.—_
_Fodder.—_
_Supplies.—_

3 Mouth of the TIRAK ... 8 m. The road bifurcates. One branch runs up the Bish Tash to the pass of the same name on Katman Tapa; the other follows the Tirak Su to the pass of that name. The ascent is steep near the summit of the pass. The descent is very steep.

_Camping ground.—Good._
_Water.—_
_Fuel.—_
_Fodder.—_
_Supplies.—_

4 Junction of KURGHAN SU ... 10.5 m. The road runs through woods, at first in
Main Route No. IV.—cont’d.

narrow defile of the river south of the Tirak Su and then down the course of the Uzun Ahmed, after which it rises on the high bank of the river and runs along a sinuous narrow cornice to the camping ground.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

5 Mouth of the AYAK TIK... 14 m. The road runs along the left bank of the Uzun Ahmed by dangerous cornices. From the point where the Kara Kungez falls into the Uzun Ahmed the road soon enters a broad valley grown over with reeds and bushes.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

6 KATMAN TAPA ... 18.5 m. The road runs down the broad valley of the Uzun Ahmed and after 8 miles comes out in the valley of the Katman Tapa, where it crosses the Chitchkan Su by a stony shallow ford.

MAIN ROUTE NO. VI.

MARGHILAN TO YASIN via DARAUT KURGHAN, SOMA TASH, BAROGIL PASS.

29 stages.

Authorities—Kostenko, 1880; Lieut. Davison, 1891; Dunmore, 1892; Curzon, 1894; Pamir Boundary Commission, 1895.

Epitome.

To stage 6 the road is good but after that is difficult in places and unsuitable for laden mules. Fuel, water and grass—generally obtainable throughout. Distances stages 8 to 24 both inclusive are taken from the map.

<table>
<thead>
<tr>
<th>No. of stage and total distance</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 UCH KURGHAN ...19.9 m. Direction S. W.</td>
<td>The road has a smooth surface and is almost straight. It is quite fit for a carriage provided some small repairs are made to the bridges and holes are filled up. For the first 5.5 m. it runs through steppe and then through cultivated fields. The following Tajik villages are passed en route:—Ak Teppe, Tai Gildi, Kadi-Siyon—Avval-Uzbek, Lyogon and Kara Teppe. Water is procurable along the road from canals. At Uch Kurghan all the requirements of a fair sized force can be obtained. Camping ground.— Water.—Excellent from the mountains. Fuel.—Procurable everywhere. Fodder.—Grazing good; small stores of corn and clover. Supplies.—Procurable. (Note.—See also Minor Route 7 stage 1).</td>
</tr>
<tr>
<td>2 KARAUL ... 17.7 m.</td>
<td>For the first two miles the road runs past the walls of houses and gardens of a village. Surface of the road is firm and rocky. The road follows the valley of the Isfairan-Sai. At 2.75 m. is the village of Kosh-Terek and at 4 m. on the right of etc.</td>
</tr>
</tbody>
</table>
Main Route No. VI.—contd.

Road is the large one of Dangi. Up to 8 m. a carriage or araba can easily use the road, but thence it becomes more difficult and would have to be repaired or widened for wheels. At 14.3 m. is the winter settlement of Auspan.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

3 LANGAR ... 19.9 m. The valley soon assumes the appearance of a gorge and the villages cease. The road is fit for pack transport and runs from one bank to the other of the river crossing by little wooden bridges of which there are 10 in all as far as Langar. The road is a difficult one carried on cornices. It is advisable to make a day’s halt at Langar.

Camping ground.—
Water.—Excellent.
Fuel.—Obtainable.
Fodder.—Obtainable.
Supplies.—Obtainable.

4 KOK SAI ... 12.6 m. After Langar the valley becomes a gorge and both it and the road bend sharply to the W.

Camping ground.—Good.
Water.—Excellent.
Fuel.—Abundant.
Fodder.—Grass is to be found only in small patches.
Supplies.—

5 DARAUT KURGHAN ... 12 m. The road runs S.-E. over soft ground.

At 6 m. it inclines to the left and begins a sharp ascent to a pass the top of which is a small bow shaped plateau. Descent is at first steep but becomes more gradual. At 6th mile from the pass, the road is difficult and rocky.

Camping ground.—
Water.—Obtainable everywhere.
Fuel.—Obtainable everywhere.
Fodder.—Grass at upper end of valley.
Supplies.—
Main Route No. VI.—contd.

6. Altyn Mazaar ... 27 m. Cross the Altyn Pass (12,000 feet).
       Descent easy.

Altyn Mazaar is a Kirghiz encampment on the R. bank of the Muk-Su. According to native statement the road along the valley is very difficult and impracticable for laden animals. Elevation of Altyn Mazaar 9,600 feet.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

7. N. foot of Kaindi Pass ... 10 m. At 2 m. the Sukdara and Bilunkiik rivers join.

From here the road goes up the Kaindi River.

Camping ground.—

25 ZARTIGHAR ... 6 m. At 1 m. the Wakhan Darya is left. This is a broad shallow river. The village of Pirkhar is passed at 3.25 m. The road goes up the Ab-i-Baroghil valley.

Camping ground.—  
Water.—  
Fuel.— Must be brought from a little distance.  
Fodder.—  
Supplies.— Obtainable in limited quantities from Sarhad.
MAIN ROUTE NO. VI.—contd.

KACHIL CAMP ... 12.5 m. The road ascends from the Baroghil Valley to the Sarkin Kotal which is reached at 3.5 m. At 5.5 m. Shawitakh Ailak is passed. The road goes up the valley to Showar Shur. From here up stream the road leads eventually to Mastuj Chitral and thence into the Jelalabad Valley via Asmar. A road goes down stream along the R. bank to Sokhta Rabat at the foot of the southern slopes of the Khora Bohrt. At 10.25 m. the Yarkhun river is forded passable all the year round. From the Yarkhun Valley the road goes up the left bank of the Kachil nullah to Kachil Camp.

Camping ground.—Good.
Water.—Good and plentiful.
Fuel.—Brushwood.
Fodder.—Grazing good in July.
Supplies.—

27 RAWAT ... 12.25 m. Vide Routes in Chitral, Gilgit and Kohistan.

28 HANDUR ... 15.5 m. Vide Routes in Chitral, Gilgit and Kohistan.

29 YASIN ... 12 m. Vide Routes in Chitral, Gilgit and Kohistan.

MAIN ROUTE NO. VII.

ANDIJAN to GILGIT.

578.7 miles. 53 stages.

Authorities.—Ivanoff, Yarkand Mission, 1874; Khushwant Khan, 1890; Littledale, 1890; Stewart, 1891; Pamir Boundary Commission, 1895; Turkistan Calendar, 1904; Geir, 1908; Shuttleworth, 1910.

Epitome.

As far as Pamirski Post the road can be traversed in 5-8 days in summer and is fit for all arms and mountain artillery. On the road to Pamirski Post the Taldik Pass is closed by the middle of December and the Alai Range has to be crossed by a difficult sheep track a little to the east of the pass. The Alai itself is covered with snow, in some-
Main Route No. VII.—contd.

Places to a depth of 7 feet. The Kizil Art and Ak Baital Passes are also closed. The latter is quite impassable after the middle of January and postal communication is carried by another road across the Kizil Jik Pass to Rang Kul, which is 27 miles longer. The Ak Baital is not open again until the end of April. To reach Pamirski Post in winter from Osh takes from 20-25 days.

<table>
<thead>
<tr>
<th>No. of stage and total distance</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 OSH ... 31 m. Vide Route IX.</td>
<td></td>
</tr>
<tr>
<td>31 m.</td>
<td></td>
</tr>
<tr>
<td>2 LANGAR ... 20 m. There are no good positions between Osh and Langar but the open country in the last 7 miles from Langar admits of the free manoeuvring of large bodies of troops. The gradients from Osh to Langar are easy but the road must be heavy in wet weather. From Osh the road runs across sandy downs and comes to a stream. After this the road runs in the bed of the stream which is about 60 yards wide. There are no bridges between Osh and Langar and a few shallow streams have to be forded. Langar is 5,880 feet and Osh 4,030 feet above sea level.</td>
<td></td>
</tr>
<tr>
<td>51 m.</td>
<td></td>
</tr>
<tr>
<td>3 GULCHA ... 30 m. There is no cultivation on the Langar-Gulcha Road. From Langar to Gulcha there is a single telegraph line. There are about 5 bridges to be crossed which would have to be strengthened for Field Artillery. Gulcha is 4,850 feet above sea level.</td>
<td></td>
</tr>
<tr>
<td>81 m.</td>

</tr>
<tr>
<td>4 SUFI-KURGHAN ... 26 m. Between Gulcha and Sufi Kurghan the hills enclosing the road vary from 400 to 1,500 feet. There is no cultivation and</td>
<td></td>
</tr>
</tbody>
</table>
only a very few scattered inhabitants. The soil is either rocky, stony or gravelly. The steepest gradients do not exceed 100 yards in length while their slope is about 1 in 12. The first bridge is between the 3rd and 4th verst posts and crosses a nullah. Between the 6th and 7th verst posts is a rickety old wooden bridge across the stream on the old caravan road. The second bridge is met with between 7th and 8th verst posts and crosses a nullah. The third bridge is at the 11th verst post. The fourth between the 11th and 12th posts and the fifth between the 18th and 19th. There are four more bridges before Sufi Kurghan is reached.

Camping ground.—
Water.—Abundant and good.
Fuel.—Scarce.
Fodder.—
Supplies.—Practically Nil. Occasionally sheep are procurable.

5 Fort KIZIL JAR ... 14.7 m.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

6 KOIJOL DAVAN PASS ... 10.5 m. At Kizil Jar branch leads to the Archat Pass, the distance to which is 7 miles; the other turns W. and goes via Forts Ucha Tapa and Bosaga to two passes which lie 1.3 m. distance from each other. The more eastern of these is the Koijol Davan; the other is the Taldik.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

7 Valley of ALAI ... 9 m. Cross the low Katin Pass at 5 m. Further on a track leads down to the

Alai Valley.
Camping ground.—
Water.—Abundant.
Fuel.—
Fodder.—Good grazing.
Supplies.—
8 KIZIL ART DEFILE ... 11.3 m.

152.5 m.
Camping ground.—
Water.—Abundant.
Fuel.—
Fodder.—Good grazing.
Supplies.—

9 KIZIL ART PASS ... 16.5 m. The road becomes stony and good forage becomes unobtainable.

169 m.
The road is practicable for pack animals.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

10 KICHKINE-KIZIL ART PASS ... 20 m.

189 m.
Camping ground.—

Alternative Main Route No. VII (iv).

BORDOBA to PAMIRSKI POST.

118.2 miles. 7 stages.

Authority.—Second Captain Zaemkin, 4th Turkestan Rifles.

Epitome.

Fit for wheeled traffic except ascent to Kizil Art Pass. Troops using this route can obtain supplies from Rang Kul District to the extent of 2,000 sheep, 250 camels, 2,000 yaks. The Kirgiz can supply brushwood and illuminating oil. About 30 yurts (tents) are to be found at each stage. No grass hay or flour obtainable. At each camping ground there is grazing and water.

Along the route there is water only in the small streams running down from the hills. The only fuel is "Tereskiian" of which an unlimited supply is available.

<tr>
<td>MARKAN SU ... 17.2 m. Bordoba is situated on the Kizil Art stream which runs into the Kizil Su. There is a labourers' barrack and a customs post-room for one company and 30 horses. Road is 5 to 6 feet wide. Country off the road is passable for infantry and</td>
<td></td>
</tr>
</tbody>
</table>
ALTERNATIVE MAIN ROUTE NO. VII (iv).—contd.
cavalry. The track crosses many small streams but the crossings are easy and the streams always fordable. At 1.2 m. there is a defensive position for 1 Bn. Infantry and 1 Btty. Artillery on the high ridge of the Kizil Art Valley facing N. At 5.3 m. the track drops into the bed of the Kizil Art stream and crosses many small streams. At 6.6 m. the direction changes to S. E. and ascends to the Kizil Art up the valley of that name. The road ascends gently for 6.6 m. but is cut up by streams which have nearly washed it away. Hence it is passable for pack only. 100 labourers would be required for 3 weeks to repair this road. Picks and shovels would be required. This section is cut up in many places by the river which is 5 feet wide, 2 feet deep and flows at the rate of 6 feet per second. The largest side stream is the Kizil Agin 5 feet wide and 8 inches deep. The remainder are dry except when the snow melts. Between the Pass and the Kara Jilga River the track descends in zigzags and is again passable for wheels. The pass itself is easy going. There is a position for 1 Bn. Infantry and 2 sections Artillery on the summit facing N. W. The streams crossed on this side of the pass are no obstacle at any time. The easy descent is 4 m. in length to Markan Su where there is a bivouac on the river which is never dry. The Pamir Reliefs used to halt here.

Camping ground.—
Water.—
Fuel.—

</tbody>
</table>
MAIN ROUTE NO. IX.—contd.

Clumps of tamarisk and thorn. Four miles from Ulug Chat the stream is forded by an easy ford and on the left bank near the ford is the small Khirghiz settlement of Ming Tur. The path follows up the left bank of the Kizil Su and 2 m. from the ford it runs over a sharp spur with a very sharp ascent and a steeper descent. From this spur the path drops into the valley of the Kara Terek stream. The junction of this stream with the Kizil Su is 300 yards to the S. On the opposite or R. bank of the Kizil Su is a little spur on which are the ruins of an old stone fort named Sakal Kurgan. This locality is also known as Nogra. Near the junction of the two streams there are two paths which lead to Irkishtam one via Yeghin and the other up the Kizil Su Valley. The former is the longer of the two but has to be used during the summer months when the Kizil Su is in flood. By the latter the path crosses and re-crosses the Kizil Su by many deepish fords and several Khirghiz settlement are passed. The valley is very narrow in some places and the sides of it are wooded. Tamarisk and thorn clumps are frequent in the bed of the stream. The valley widens 7 miles from Nogra and the path then turns along the R. bank of the Kizil Su over high and undulating grass covered ground. The Ulug-Chat-Yeghin-Irkishtam path can be seen on high ground over the left bank of the Kizil Su 3 m. to the N. Irkishtam is suddenly reached; a small ridge is ascended and Irkishtam lies below on the L. bank of a small stream which flows into the Kizil Su at right angles. The path is very steep down this ridge. A small notice board along side the path marks the boundary between Russian and Chinese territory. The Customs House and Customs Officials house are on low ground alongside the R. bank of the little stream. Immediately below the fort there is a small bazaar along the L. bank of the stream and a small stone bridge over the stream. The fort which is situated above the L. bank of the stream is rectangular and the Officer's quarters, barracks and telegraph office are inside. The fort is of stone and is plastered and painted white. The roofs of the houses are deep red and it looks at a little distance like an English Coast Guard station. The outside walls are 9' high. The fort has no military significance and would be untenable against modern artillery. The telegraph line from Andijan. Gulcha and the Taldik Pass comes in from the W. Irkishtam is the terminus of the line.

Camping ground.—
Water.—Good and plentiful.
Fuel.—Plentiful 2 m. S. W. from the pine forests.
Fodder.—Good grazing.
Supplies.—Nil.
Main Route No. IX.—contd.

KATA KUNUSH ... 18 m. Leaving Irkishtam the path immediately crosses the Kizil Su by a rather deep ford 300 yards N. of the fort. The Kizil Su is a serious obstacle here in the hot weather when it is in spate. Crossing the river the path runs N. by N. W. along a broad ravine which winds considerably. At 4 m. the first of the Ekezeh Passes is reached. The ascent is steep but pack animals would not experience much difficulty. The descent is very steep. After the pass is crossed the Ekezeh stream is followed down for about 3 m. to a point where another stream joins it from the N. E. The path then turns N. E. by N. and runs up the valley till the second Ekezeh Pass is reached. The ascent is very steep but the descent is much steeper and is strewn with boulders. The descent of this pass would give trouble to pack animals heavily laden. It could be improved by a little blasting (1/2 Coy. Sappers and Miners 2 hourse). The path runs along a deep ravine after the pass has been crossed, and then the Kok Su Valley is entered 3½ m. from the top of the pass. At this point is a Russian rest house on the left bank of the Kok Su and alongside the stream. There is a Russian caretaker and tea, bread, milk, butter and eggs can be obtained but no other supplies. The Kok Su flows in a deep ravine. The path turns N. up the Kok Su Valley near the Rest house and leads for 2 m. up the left bank of the stream and then crosses to the R. bank by an easy ford. Just below the ford the Terek stream joins the Kok Su but this stream cannot be followed as it flows in a deep gorge for about 400 yards just before joining the Kok Su. The path after crossing the Kok Su ascends up a spur between the Terek and Kok Su streams which is known as the Kopka Pass and then drops suddenly into the Terek Defile at a point 300 yards N. of the gorge mentioned. The Terek Defile is very narrow with precipitous sides and it is this defile which prevents this route being used during the summer months. In summer the longer route over the Taldik Pass has to be used. The melting snows in summer make the waters of the Terek stream rise and the rush of water through this defile presents an unsurmountable obstacle. The sides of the defile are too steep and the country on both sides is too mountainous to make a detour to avoid it. The Terek Defile is about 2 m. long and then the valley broadens out and the Terek stream is followed for about 12 m. The path is rough as the valley is strewn with boulders and is hard on the feet of pack mules. At a point 25 m. from Irkishtam on the L. bank of the Terek stream on a high bank is the rest house of Kata Kunush. It is important as all the caravans halt near it.
Main Route No. IX.—contd.

and it is a regular stage. The rest house contains beds and is looked after by a Khirghiz caretaker.

Camping ground.—

Water.—Plentiful.

Fuel.—Obtainable in small quantities.

Poddar.—

Supplies.—Milk and eggs only.

(Note.—See also Route XIII).

7 SUPHI KURGHAN ... 22 m. Leaving Kata Kunash, the path leads up the Terek stream and crosses a small side stream which flows into the Terek stream from the W. It then zigzags up the Terek Davan Pass till the summit which is a knife edge is reached. The ascent is steep for the last 300 yards and the descent is very steep. When the pass is under snow which is its normal condition the descent is slippery and dangerous. Pack animals have to have their loads carried over by hand very often and be led down. The path zigzags down for about 2 miles when the little stone rest house of Tash Robat is reached. It is built on a terraced ledge about a sixth of the way down the pass. Leaving the rest house, the path descends sharply from terrace to terrace the terminal moraines of an old glacier, until the head of a ravine 3.5 m. from the rest house of Tash Robat is reached. The path enters this ravine and the descent is very steep and rough. The sides of the ravine which widens out into a valley in which there is a stream are steep and high and covered with juniper. The path leads down the valley and 9 m. from the top of the Terek Pass the little Khirghiz settlement of serai Kichik is reached. 1 m. N. W. of serai Kichik the valley turns W. and narrows to a gorge known as Darwaza. Both sides of the gorge are very precipitous and form a serious obstacle during the flood. After passing through the gorge which is about 400 yards long the valley opens and both sides are covered with trees, mountain ash, birch and juniper. The stream is crossed and re-crossed many times by easy fords. As the valley widens the sides become barer and covered with grass. A long straggling Khirghiz settlement named Kizil Kurghan is passed. It is situated on the R. bank of the stream on a red sandstone ridge. Two miles W. of Kizil Kurghan the path finally crosses the stream by a shallow ford to the right bank. Half a mile W. of this ford the stream joins the Khush Ab River. Near the junction of the stream with the Khush Ab 200 yards N. E. of R. bank of stream and 300 yards E. of Khush Ab is a rest house. It is known as Suphi Kurghan. There are no native houses near it nor is there a village of Suphi Kurghan. The telegraph-
Main Route No. IX.—*contd.*

line from Andijan, Osh, and Gulcha which goes over the Taldik Pass on the Alai to Irkishtam runs just along sides the rest house but there is no telegraph station nor are there any instruments in the house for tapping the line.

_Camping ground._

_Water._—Good from the Khush Ab.

_Fuel._—Plentiful.

_Fodder._—Good grazing.

_Supplies._—Nil.

8 GULCHA ... 25.75 m. From Suphi Kurghan to Andijan, via Gulcha, Chigirchik Pass, Langar and Osh there is a cart road. Leaving Suphi Kurghan the road runs due W. and the Khush Ab is forded by a deep ford. The road then turns sharply N. and runs up the valley of the Khush Ab. The river is forded again by an easy ford a little higher up. This is the last ford as the river is crossed and re-crossed afterwards by a series of wooden cantilever bridges. There are four of these bridges; the first at 6 m. from Suphi Kurghan; the second at 7 m. the third at 9 m.; the fourth at 11 m. These bridges would not be strong enough to bear field artillery. They are in bad repair and seem very old. The wooden roadways of some of them are full of holes and these holes have been filled up with large stones. The cart road is neglected and no attempt seems to be made to maintain repairs. In some places the road is strewn with rocks which have fallen from the mountain side. There are verst posts along the road but by no means at every verst. They are frequent at first after leaving Suphi Kurghan but become rarer as one gets nearer to Gulcha, the last verst post being at 13 verst from Gulcha. The posts are painted white with a black spiral band with red edges. At 3.5 m. from Suphi Kurghan the valley narrows very much and there is a small Khirgiz settlement on the left of the road. 11 m. from Suphi Kurghan the valley opens out and the road passes over an alluvial fan along the R. bank of the Khush Ab. The length of this open space is about one mile and the breadth 3 m. There are ruins of an old mud fort and walls 200 yards to the East of the road. This spot is known as Yangi Arik and would encamp a divisions. 14 m. from Suphi Kurghan the Khirgiz village of Kizil Kurghan is reached. It consists of a small bazaar and many serais and there is a Russian Customs shed. There are patches of cultivated ground. 19 m. from Suphi Kurghan the valley opens out considerably and the sides of it are covered with grass and much eroded by water. The road running along the L. bank of the Khush Ab on high ground crosses a spur about 25 m. from Suphi Kurghan and from
Main Route No. IX.—contd.

the top of the spur the first view of Gulcha is obtained. It lies in a hollow about 5 m. long by 2.5 m. broad surrounded by hills. The road makes a sharp bend to the W. so that Gulcha is seen lying about 2 m. due W. of the road.

The road leads down the spur and runs across a level stretch of ground towards the fort. Before reaching the fort the summer barrack of the infantry are passed on the right hand side of the road and the rifle range is seen further away to the E. In winter the infantry are quartered in the fort. There is a large house close to the right hand side of the road and under the walls of the fort. This is used as a telegraph office. The fort is about 700 yards square with low walls. The walls appear to be in bad repair. There is only one entrance to the fort and that is to the N. W. There are tall poplars in the fort. The winter quarters are also within the fort walls and are of stone painted white with tin roofs painted red. Near the entrance to the fort and on the left hand side of the road is a small Customs House. Beyond the Customs House are the barracks of the Cossack detachment. The ponies have no stables but are picketed outside. The bazaar is 300 yards to the N. W. of the fort and consists of one street 200 yards long with native shops on both sides.

Camping ground.—

Water.—

Fuel.—Abundant.

Fodder.—

Supplies.—Sheep abundants.

(Note.—See also Route XIV).

9 LANGAR ... 22.5 m. From Gulcha to Langar there are two roads. The cart road runs S. W. and then W. over the Khush Ab by a ford and over the Chigirchik Pass. Crossing that pass it runs N. N. W. to Langar. The telegraph line runs along this road. It is fit for wheels but the gradients of the Chigirchik Pass are steep. It is kept in better repair than the portion between Suphi Kurghan and Gulcha. The shortest road is over the Shillinilli and Tockha Passes and it lies to the E. of the cart road. It is not fit for wheels as the gradients of the two passes are very steep. Capt. Shuttleworth travelled by this latter road which is the one now described. Leaving the bazaar the path runs N. W. over a piece of flat ground through some scrub on the R. bank of the Khush Ab which is crossed by a deepish ford. The path then runs for about 1.5 m. along the L. bank of the river and then turns to the W. near a small Kirghiz settlement of mud huts on the roofs of which the fodder for the winter is piled. A small
Main Route No. IX.—contd.

... and a steep ascent brings one to the top of the Shillibilli Pass. The descent from the pass is not very steep. A fertile valley is then reached. The path leads down this valley for about 7 m. and near the road are several Khirghiz settlements. There used to be a lake on the left of the road but it is now nothing more than a swamp. 8 m. from the top of the Shillibilli Pass the path crosses a small stream in the centre of the valley by a wooden bridge not strong enough to bear field artillery and then crosses an alluvial fan strew with boulders for about 2 m. The foot of the Tockha Pass is then reached. The path leads up the pass by a narrow ravine and on each side of it are high sandstone cliffs. The top of the pass is undulating and is about 4 m. long and consists of a ridge along which the path winds. It then drops into a broad grassy valley in which is a small stream. The valley is dotted with Khirghiz settlements and runs nearly E. and W. The path runs practically due W. down the valley until the cart road is met at right angles at the junction of the stream with the Langar stream. There is a small shrine painted blue and white on the left hand side of the road 2 m. before the cart road is met. The path turns then on to the cart road which runs north and the Langar stream is crossed by an easy ford. Near the ford and on the R. bank of the stream is a little Khirghiz mill, built of stone. On the L. bank of the stream 300 yards N. W. of the ford and alongside the cart road is a Russian rest house with a small farm near by. There is a telegraph house at Langar.

Camping ground.—
Water.—Plentiful and good from the stream.
Fuel.—Scarce.
Fodder.—Good grazing.
Supplies.—Nil.

10 OSH .. 21 m. Leaving Langar the road follows the Langar stream. The stream flows in a broad valley with bare sides. The hills to the W. are higher than those to the E. The road is very bad for about 8 m. from Langar as it is partly in the bed of a stream and is very rough being strewn with stones. It is fit for wheels but during a flood much difficulty would be experienced. At 8.5 m. from Langar the little village of Kadir Kul is reached. The country is cultivated and fertile beyond this spot. The valley opens out into the plains of the Syr Darya basin. The road turns N. W. and becomes very good. At 16 m. from Langar the village of Madi is reached. The country is undulating and intersected by irrigation channels and by streams. Patches
of wood consisting of willows and poplars occur and also large clumps of grass. Much of the country is under cotton, millet and Indian corn. Osh is a large straggling town built on both banks of the Ak Bura stream the waters of which are all diverted for irrigation purposes 10 or 12 m. N. of the town and thus never reach the Syr Darya. The Russian quarter and the cantonments are to the S. of the town. There are many good Russian shops in the Russian quarter. Several bridges connect the two parts of the town. The bazaars are large and busy. The native shops are stocked with Russian made piece goods, china and ironware. The town is lighted with gas. Osh is really the terminus of the trade route as goods brought from Kashgar on pack animals are transported onwards by cart.

**Fuel.—**

**Fodder.—**

**Supplies.—**

11 ANDIJAN ... 31 m. Leaving Osh the road runs due N. for about a mile and then turns N. W. The road is kept in good repair and is fit for wheels throughout. The country through which it passes is well cultivated and irrigated. Acacias are planted on both sides of the road. At Kouan-Mourat a small village 12 m. from Osh there is a small rest house where light refreshments can be obtained. Two miles beyond Kouan-Mourat a river is crossed by a bridge—piers of stone, roadway on iron girders. The remains of an older bridge can be seen 600 yards to the E. Three miles from the bridge the village of Hojavat is reached. It is a large village with a big bazaar. 2 m. beyond Hojavat the road rises over high ground and leads over a col between bare hills. From this col the first view of Andijan is obtained lying to the N. W. The road is soft and heavy at this point. After the col has been crossed the road descends into a fertile and highly cultivated country much intersected by small streams and irrigation channels. 3.5 m. beyond the top of the col is Khojabad a small village with bazaar lying in a hollow. Andijan is a large town lying in a hollow: the road descends rather steeply to it. There is a large tannery on the left hand side of the road just before entering the town. The Russian quarter and cantonments are to the S. of the native town and the Railway terminus is situated in this quarter. The streets in the Russian quarter are very fine and broad planted with a double row of trees on both sides. The public buildings and the houses of the Russians are built of stone and are mostly

3 Chadir Tash ... 18 m. At 4'6 m. cross the narrow Mamazahir valley. From here the road enters Ken Jilga and then follows the Yangi Dawan Valley. At this point cavalry and wheeled transport may experience some difficulty. The ascent from Ken Jilga to Neza Tash Pass is passable for all arms. The branch track over the Sari Tash to Istik Valley is not passable for wheels. 2.6 m. further on the main road turns into the Gurumdi Valley, first crossing the Yangi Davan. At this point the road is a made track 6' to 10' wide. On the summit of the Neza Tash Pass is a strong position for infantry and artillery which can face either E. or W. A circuitous road avoids the Neza Tash Pass and is used in winter when the pass is blocked with snow. Into the next valley also called Yangi Davan is a descent 2.6 m. long at 12 degrees. Then reach Urus Bulak where there is a spring, a good bivouac and grass for 2-3 squadrons. 2.6 m. further on cross Yangi Su. Thence road follows the L. bank of the river. Here in the Alichur Valley is a very strong position for infantry and artillery on some small hills facing E. 6 m. further on reach one hut called Chadir Tash.

Camp ground.—Good.
Water.—
Fuel.—
Fodder.—Grazing for 6-7 squadrons
Supplies.—
MAIN ROUTE NO. X.—contd.

4 KUEI ... 11.2 m. A good cart road along Alichur River. At 2 m. is a stone called Chadir Tash. At 2.6 m. pass Kara Dong Valley. 3.2 m. further on is the Bash Kumbez River a tributary of the Alichur—crossings easy, bed hard and pebbly—2 channels. 6 m. apart. From near the grave of Abdullah Khan a track leads up to Bash Kumbez Pass and thence to Zor Kul—passable for carts. From grave main road leads 2.6 m. on to Kuei.

Camping ground.—Good.

Water.—

Fuel.—

Fodder.—Grass for 4-5 squadrons.

Supplies.—

5 SASIK KUL ... 14 m. Mountains on each side of Alichur get smaller. Cross the valley of Kurumdi (Kumdi) at 2.6 m. Thence a track branches off to Abdu Karim passable for cavalry. At Abdu Karim is a Khirghiz encampment and a hot stream. .6 m. further on recross Kurumdi Valley. In the valley of the Alich, .6 m. further on is a pack track leading to a robat. A few miles further on the main road turns S. W. and passes Abkh. Just before reaching Abkh 2 roads branch off; one to Tamdai Valley; one to Yeshil Kul. Main road level and easy for all arms 1.2 m. beyond Abkh a track leads E. to Great Pamir. 2.4 m. on another track leads to grave of Buz Ullah. 6 m. further on is a track to Kumdi Pass difficult for cavalry. This track also leads to Great Pamir. It is passable for pack. 4.6 m. from Buz Ullah another track leads to Zor Kumdi and at 5.2 m. another to Sasik Kul. Here the country changes. At Sasik Kul there is a robat and a pucca barrack for one company.

Camping ground.—Good.

Water.—Good from a number of springs. The water from the lake is salt an undrinkable.

Fuel.—

Fodder.—

Supplies.—

6 KHAWAJA NAZAR ... 15.2 m. Follow the S. edge of the lake along a stony track. At 1.3 m. enter Tagarkarti hills, the edge of the Pamirs. At 2 m. a track leads to Tuz Kul Valley. At 3.2 m. cross Bozai Gir. A track here leads to Khargosh Valley, Pamir Darya, and Langar Post. This is fit for wheeled artillery. 2 m. further on another small track fit for pack leads to Kantoi. 2 m. further on cross dry bed of Kuruk Tugar
MAIN ROUTE No. X.—concl.

Kati. To the S. is the Chukur Kul Valley joining the Khargosh road. 1.2 m. further on is a steep climb to Kara Darra Pass. After crossing the Tagar River ascent is not so steep and leads to a pass of that name. Track is easy for wheels. On the top of the pass is a position facing either E. or W. 2.6 m. further on is an easy crossing of the river Suluk Tagarkati. A small path follows the river to Yeshil Kul. For 3.2 m. follow Karta Buza Valley and cross Koi Tezek stream to the grave of Khwaja Nazar and Kurk Shahid.

Camping ground.—Good.
Water.—
Fuel.—
Fodder.—Grass for 3-4 squadrons.
Supplies.

7 KOI TEZEK ... 7.2 m. Road crosses valley of Yul Mazar. A pack track leads to the Pamir River. Thence the road climbs to a flat terrace or plateau, follows the Koi Tezek River and after 2.6 m. passes Kara Dumer Lake. From here the road climbs easily to Koi Tezek Pass. There are defensive positions facing E. and W.

<td></td>
</tr>
</tbody>
</table>
Main Route No. XIV.—contd.

Up the S. side of the pass is good and the gradients are easy and it is fit for wheeled transport. On the top of the pass there is a pile of stones to mark the frontier between Russian and Chinese Turkistan. The descent on the N. side is gradual, over undulating grassy ground riddled with marmot holes. There is a small Kirghiz encampment 2.5 m. N. of the pass known as Turgat Camp.

Camping ground.—
Water.—Good.
Fuel.—
Fodder.—Good grazing.
Supplies.—Sheep plentiful.

7 Kara Su ... 25 m. The road which is good and 135.5 m. (Chermask). The road which is good and fit for wheeled transport runs N. along the E. shore of the Chadir Kul lake. The lake is long and narrow and lies at the foot of the snow capped Ak Basni Tau Range and to the S. of it. Kara Su or Chermask is a large Kirghiz encampment. The Kirghiz of these parts are very rich. There is also a small Russian Customs House.

Camping ground.—
Water.—Plentiful and good.
Fuel.—
Fodder.—Excellent grazing.
Supplies.—Sheep and cattle plentiful.

8 Ak Bait ... 15 m. The road is fit for wheeled traffic, traverses a grassy plain in a wide valley covered with excellent grazing. The valley is dotted with Kirghiz encampments. Ak Bait is an insignificant Kirghiz encampment.

Camping ground.—
Water.—Good.
Fuel.—
Fodder.—Excellent grazing.
Supplies.—Sheep and cattle plentiful.

9 Kara Ghulak ... 22 m. The road which has 172.5 m. a good descent the whole way is good. It is over a grassy valley. Kara Ghulak is a medium sized encampment.

Camping ground.—
Water.—Good.
Fuel.—
Fodder.—Excellent grazing.
Supplies.—Sheep and cattle plentiful.
Main Route No. XIV.—contd.

10 AK BASHI ... 20.5 m. The road runs N.-E. along the R. bank of the Kara Kam River but keeps about 1 m. E. of it. The valley is open and undulating and the grazing is good. At Bashi can be seen for many miles before it is reached. It is fordable and the approaches are easy, but during the summer months when there is much water, the crossing is not without danger. At Bashi is a small tartar village. A few of the houses are built in the Russian style.

Camping ground.—
Water.—Good
Fuel.—
Fodder.—Plentiful.
Supplies.—Limited.

11 NARIN ... 26.5 m. The road from At Bashi to Narin has been built for a long time and presents no difficulties at all for wheeled transport. Tarantasses are procurable at At Bashi. Two small passes have to be negotiated and some of the gradients are steep. 10.5 m. S. of Narin the last pass is crossed and the road runs down a deep ravine with almost precipitous sides, Narin, a Russian town containing hospital, barracks and Russian shops.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Plentiful of all kinds.

12 KARAN KURTA ... 34 m. The road onwards from Narin to Chimkent is the ordinary trade and post route via Tokmak and Pispek and is fit for wheeled traffic throughout. The usual conveyance is the tarantass and changes of horses are procurable at the various post houses. The road runs N.-N.W. after leaving Narin through mountainous country and is very undulating. An Archa is reached at 22 m. The road beyond An Archa runs up the Dolan Valley both sides of which are covered with pine forests. The Dolan is a mountain torrent. The post house of Kara Kurta is kept by a mujik settler and consists of a log cabin at the foot of the pines.

Camping ground.—
Water.—Good.
Fuel.—
Fodder.—
Supplies.—Nil.
Main Route No. XIV.—contd.

13 Kumbelata ... 33 m. The road crosses the Dolan Pass shortly after leaving the last stage. The road is rough and steep and winds up a narrow valley until the top of the pass is reached. It is well made and the gradients are not excessive. The road after crossing the pass descends rapidly and then runs along the L. bank of the River Tugai. The Kos Hur has to be forded 28 m. N. of the Dolan Pass. Approaches easy, river fordable at any time of the year. Kumbelata is the Russian Post House.

Camping ground.—
Water.—Nil.
Fuel.—
Fodder.—
Supplies.—A few eggs and chickens only.

14 Kutemaldi ... 37 m. The road runs N.-E. and presents no difficulties. Kutemaldi is on the W. extremity of Issyk Kul Lake. It is a small village of a few houses with a telegraph office. There is a small post station with 4 rooms.

Camping ground.—
Water.—Good.
Fuel.—
Fodder.—
Supplies.—

15 Jilarik ... 31 m. The road turns sharp N.-W. from Kutemaldi. It is very undulating and the gradients are steep in parts. After passing Kok Mainak it turns down the steep Baum Defile, a wild gorge with the Chu river rushing through it at a great pace. Jilarik is a small post station near where the Baum Defile debouches into the Chu Plain.

Camping ground.—
Water.—Good and plentiful.
Fuel.—
Fodder.—
Supplies.—

(Note.—See also Route XII).

16 Tokmak ... 35 m. The road descends sharply after leaving Jilarik and traverses a stony plain. It is very rough. Tokmak is more like a large native bazaar than a Russian town.
The road runs W. from Tokmak across the steppe, and through villages of Mujik settlers. These villages consist of thatched cottages. The cattle of the district are very fine and plentiful. Shukulak a small post station.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Plentiful.

SHUKULAK ... 55 m. The road runs W. from Tokmak across the steppe, and through villages of Mujik settlers. These villages consist of thatched cottages. The cattle of the district are very fine and plentiful. Shukulak a small post station.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

CHIMKENT ... 267 m. See Route III, stages 29 to 48.

MAIN ROUTE NO. XV.

TOKMAK TO KASHGAR.

300.25 miles.
21 stages.

Authorities.—Kostenko, 1880; Macartney, 1908; Shuttleworth, 1909.

Epitome.

Suitable for pack transport as far as stage 4. Thence onwards a good cart road.

<table>
<thead>
<tr>
<th>No. of stage and total distance</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 SHAMSHI DEFILE ... 13.25 m.</td>
<td>The road runs in a broad valley along the banks of the Northern Shamshi.</td>
</tr>
</tbody>
</table>

Camping ground.—Good.
Water.—
Fuel.—Brushwood.
Fodder.—
Supplies.—
Main Route No. XV.—contd.

2 SHAMSHI DEFILE ... 10.73 m. Good road for pack animals.

Camping ground.—
Water.—
Fuel.—Pine wood.
Fodder.—
Supplies.—

3 Defile of S. SHAMSHI ... 11.25 m. Road generally indifferent as it runs over debris, slopes, etc. The ascent to the pass begins at about 2 m. 5½ ft. and is very steep and stony. The descent is more gentle.

Camping ground.—Good.
Water.—
Fuel.—
Fodder.—
Supplies.—

4 Valley of the KIZART ... 18 m. The road runs over a perfectly smooth and sloping valley of the S. Shamshi and having crossed the Kochkur Valley enters that of the Kizart. The fords are easy.

Camping ground.—Good.
Water.—
Fuel.—
Fodder.—
Supplies.—

5 Northern KIZART ... 13.25 m. The road runs up the even valley of the Kizart to the pass of the same name. Before reaching it, there is a good camping ground at the foot of the Chahar Archa Pass.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

6 R. JUMGAL ... 16.5 m. The road runs over the Kizart Pass almost the best in the Narin district. It is almost imperceptible. Road good.
Main Route No. XV.—contd.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

7 River KARA KICH ... 16.5 m. The road runs over the Shilbili Pass, which does not present great difficulties. Road generally feasible. The Son Kul is 13 m. long and 12.5 m. broad; height above sea level 9,000 feet. Roads from the level of the lake lead to:

(a) Tash, Tapa, a road over the Mulda-Ashu Pass.
(b) Boz-Aigir, over the Narin.
(c) a whole group of streams along which lead nomad tracks to Jumgal.
(d) Tuzashnu, a road across the pass of the same name and leading to the Taluk Pass. The stream Kojerti issues from the lake. Along the gorge which it cuts for itself is a road to Narin.
(e) Sari Bulak.
(f) Sari Tash, a road to Kilem Chek.

The depression of the Son Kul is greater than the lake itself so that on its shores there are flat places, the widest of which covers 3.5 m. and skirts W. shore. On the E. and W. halves of the S. shore also are stretches of level ground which likewise have a width of about 3.5 m. Spurs of the mountains border the S.-W. and N.-W. angles of the lake. The level of the Son Kul is subject to considerable inundations. Almost the whole of its basin is covered with thick grass. Its shores are marshy and water fowl are to be found. The water is fresh.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

8 River TASH TAPA ... 11.25 m. The road runs in the broad valley of the Son Kol.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—
Main Route No. XV.—contd.

9 Junction of the MULDA ... 11.25 m. The road ASHU and KARA-KAIN crosses the Mulda- and KARA-KAIN Rivers. Ashu pass (9,500') which is not difficult and then runs in the defile of the river of the same name by a very narrow steep and stony descent. It soon however enters a flat broad valley.

**Camping ground.**
- Water.
- Fuel.
- Fodder.
- Supplies.

10 KURTKA ... 9.25 m. The road crosses the Narin near the ruins of a Sart settlement. Here there is a ford over 6 branches of the river. The fords are dangerous and impracticable at full water. (See Minor Route 8).

**Camping ground.**—Spacious.
- Water.
- Fuel.
- Fodder.
- Supplies.

11 River BAIBICHE ... 17.25 m. Good road.

148.5 m.

**Camping ground.**
- Water.
- Fuel.
- Fodder.
- Supplies.

12 Junction of the CHALKODU ... 14.5 m. After 163 m. and a second river without passing the name. River Raibiche, the road leads to the pass of the same name. The ascent is somewhat steep. From the pass the road enters the Chalkodu Valley.

**Camping ground.**
- Water.
- Fuel.
- Fodder.
- Supplies.

13 River TASH RABAT ... 13.25 m. The road runs to the second Baibiche pass in the Kalkaghar-Tagh Mountains from which it descends by the gently sloping Tuz Ashu ravine to the desert valley of the Kara Kain. The road intersects this and rises by the
defile of the Tash Rabat on its R. bank to the camping ground. The position of the camping ground is undetermined but the higher up the pass it is selected the better as it diminishes the next difficult march over the Tash Rabat.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

14 LAKE CHADIR KUL... 13.25 m. The road crosses the Tash Rabat by an inconvenient ford and afterwards runs in a narrow and stony defile in part on cornices. The ascent to the pass is steep as is also the descent but only for 6 m. The road then runs in the smooth ravine of the Tash Rabat to its issue in the valley of the Chadir Kul. The lake is 14.5 m. wide. The road here joins Route XIV to Kashgar (q. v.)

15 to 21 KASHGAR ... Vide Route XIV.

189.75 m.
SECTION NO. 2.
MINOR ROUTES.
MINOR ROUTE NO. 1.

FORT KAZALINSK TO PETRO-ALEXANDROVSK.

330.8 miles. 16 stages.

Authorities.—Kostenko, 1880; Russian Route Map 1893.

Epitome.

The road is fit throughout for wheeled transport.

| 1 LAKE JAMAN KUL ... 9.6 m. 2 m. from Kazalinsk the Syr Darya | crossed at Kara Tube and beyond the road is over sand as far as Lake Jaman Kul. 

*Camping ground.*

*Water.*—From wells; not of good quality but fit for use.

*Fuel.*—Nil.

*Fodder.*—Nil—all available fodder is consumed by nomad Kirghiz.

*Supplies.*—

| 2 KUVAN DARIA WELL ... 26 m. Road traverses undulating country devoid of vegetation. |
|--------------------------------|---------|
| 3 DARIA BAI WELL ... 28 m. For the first third of the march the road runs through insignificant sand hills very scantily covered with shrubs. Beyond this it passes over undulating country with hard soil almost destitute of vegetation. |

36.6 m.

63.6 m.
MINOR ROUTE NO. 1.—contd.

Camping ground.—
Water.—Abundant from wells in a ravine.
Fuel.—
Fodder.—
Supplies.—

4 DON-KAZGAN ... 36 m. Soil at first sandy, then quite hard and covered with occasional bushes. Through small sand hills for last 9 or 10 miles.

Camping ground.—
Water.—Good and abundant from wells in a ravine.
Fuel.—
Fodder.—
Supplies.—

5 MIRZALI WELL ... 40 m. Hard ground except for an interval of .6 m. where crumbling sand has to be crossed. Latterly sandy country with occasional saxaul. Throughout the whole march there is fuel in the form of thin brushwood.

Camping ground.—
Water.—From well—salty.
Fuel.—Close by in abundance.
Fodder.—Nil.
Supplies.—

6 KOS KUDUK WELL ... 11.2 m. Hard soil till a high hill is reached when road passes through a narrow stratum of sand thec again on to hard hillocky country for 2 m. 51 f. and from here to end of stage, sand again.

Camping ground.—
Water.—Good from 3 wells situated amongst crumbling sand.
Fuel.—Nil.
Fodder.—Can be obtained for camels from close by. Nil for horses.
Supplies.—
MINOR ROUTE No. 1.—concl.d.

11 KARA-BATIR Well ... 31·4 m. Road at first among sand hills which are very difficult to pass. The sand is in places covered with saxaul, tamarisk, jusan, and occasionally feather grass. Towards the end of the stage the soil is hard.

Camping ground.—
Water.—Very scarce. The wells of Kara-Batir have been abandoned in consequence of the bad quality of the water which even camels will not drink.

Fuel.—
Fodder.—
Supplies.—
MINOR ROUTE NO. 1.—contd.

12 TAJI-KAZGAN Well ... 8 m. Hard clay for the first half of the march, then deep sands.

Camping ground.—
Water.—Good but sufficient for a small detachment only. It is obtained from a single well. Sand storms here are so violent that they sometimes fill up the well in the space of 24 hours.
Fuel.—
Fodder.—
Supplies.—

13 KOKCHA WELL ... 14.6 m. Route lies through sand hills very poor in vegetation.

Camping ground.—
Water.—Plentiful but slightly saltish.
Fuel.—
Fodder.—Scarce.
Supplies.—

14 BAZAR KALA ... 17.2 m.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

15 KALTA-MINAR ... 17.2 m. The first 4.5 m. of the road is through deep sand and high sand hills.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

16 PETRO-ALEXANDROVSK ... 9.6 m. Road runs through cultivation, crossing irrigation channels. Sand is met with in places. The last mile is over sand hills. Petro-Alexandrovsk is on the R. bank of the Amu Darya from which it is separated by a wheel road 4 or 5 m. long. There is a ferry on the L. bank to Khanki. The road here joins Main Route No. 1 (q. v.)
### Alternative Minor Route No. 1(i).

**FORT KAZALINSKI TO PETRO-ALEXANDROVSK.**

400.8 miles. 24 stages.

render it somewhat difficult for artillery and carts. At 7 m. 2½ f. the road cuts through sand hills. Beyond this up to 13 m. 2 f. (i.e., to the heights of Kara-Gir-Tau) the road rises slightly, in parts sandy, in parts firm. From Kara-Gir-Tau to the salt marsh (2 m. 2½ f.) there are sand hillocks rising to 28 feet in height.

Camping ground.

Water.—One well 56 feet deep; water salt and sulphurous to the taste. Sufficient for 500 men and 50 horses.

Fuel.—Obtainable 6 m. from well.

Fodder.—Obtainable 700 yards N. W. of well

Supplies.—

2 SARI-BULAK ... 15·2 m. After rising up a slope of 30 degrees and crossing a salt marsh, the road ascends a mountain for 4 m. 5 f. It runs in sand (depth 2·5") with frequent passes. From 4 m. 5 f. to the Kara Tau Mountains passes are met with up to 70 feet in height. Here the sands are still deeper. After descending from the Kara Tau (the descent for 700 yards is at an angle of 20 degrees) the road runs through a small pass, descends to salt soil and beyond as far as Sari Bulak Well runs over level saltish soil.

Camping ground.

Water.—Saltish at Sari Bulak. 2 m. from Sari Bulak at Muzarkam there is a spring of good fresh water. It is sufficient for 1,000 men and 200 horses. Horses can also be watered at the two wells of Sari Bulak.

Fuel.—Ample 56 m. from the spring.

Fodder.—Ample 56 m. from the spring.

Supplies.—

3 BUGETLI WELL ... 11·2 m. After crossing sand for about 1 m. an incline which, although insignificant is covered with deep sand hills for 1 m. 2½ f. After this the sand becomes less and firm ground is crossed. Soon, however, difficult sand hills again commence continuing to 9 m. 7½ f. after which the road descends through small sand hills to the Bugetli Well

Camping ground.

Water.—4 wells with brackish water unfit for men to drink. Horses will drink it but unwillingly.

Fuel.—

Fodder.—

Supplies.—
MINOR ROUTE NO. 3.—contd.

4 KHATANTAI-KAZGAN ... 22·6 m. From Bugetli to the salt marsh the road runs through sand, but is not difficult. From the salt marsh it is up a slight incline on hard ground for about 1 m. 2½ f. Beyond, for 2 m. it rises on a hill through sand 2½" deep with frequent small passes. When within 1 m. of the well at camping ground the road runs over hard, undulating ground.

Camping ground.—
Water.—Scarc.
Fuel.—Plentiful.
Fodder.—For 100 horses 3 m. N. W. of well.
Supplies.—

5 BUZAUBAI WELL ... 22 m. For 8 m. the road runs over undulating sandy ground. After this the soil becomes firmer and shallower sand is met with. On this part of the route movement is not difficult even for wheeled artillery.

Camping ground.—
Water.—8 wells but 5 are blocked up—fit for use. Near Buzaubai Wells are the 3 wells of Musret with saltish water but fit for use. Sufficient for 600 men and 200 horses.
Fuel.—Obtainable 6 m. from wells.
Fodder.—Obtainable 6 m. from wells.
Supplies.—

6 KARAKALPAK-KAZGAN ... 10.6 m. For 3 m. 2½ f. the road is not difficult even for wheeled artillery, but beyond, up to 6 m. 5 f. it runs through crumbling but not deep sand. From 6 m. 5 f. to end of stage, road is level and tolerably firm.

Camping ground.—
Water.—2 wells, one of which is blocked; water saltish and tainted; sufficient for 500 men and 100 horses.
Fuel.—Plentiful 6 m. from wells.
Fodder.—Plentiful 6 m. from wells.
Supplies.—

7 BISEKTI SPRINGS ... 14.6 m. The road runs over undulating sandy ground which does not particularly impede movement.

Camping ground.—
Water.—2 wells, in one water is good; in the other saltish; sufficient for 1,000 men and 200 horses.
MINOR ROUTE NO. 3.—cont’d.

8 MIN BULAK SPRINGS ... 13·2 m. The road, although traversing mountains may be said to be suitable even for wheeled artillery as the ascent is by terraces of no great steepness or height and the descents are gentle. Sand is met with in places.

Camping ground.—
Water.—Good; sufficient for 600 men and 150 horses.
Fuel.—
Fodder.—Scarcce.
Supplies.—

9 BASKARA WELL ... 13·2 m. At the commence-ment of the march movement is rendered difficult by lofty sand hills.

Camping ground.—
Water.—Wells in a depression, descent into which is very steep; water good.

Fuel.—
Fodder.—
Supplies.—

10 YANI KAZGAN ... 20 m.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

11 YUZ-KUDUK WELL ... 8 m. There are no traces of a road, but the country is easy and practicable. At 7 m. is the ravine of Aksai with excessively steep banks.

Camping ground.—
Water.—Good and plentiful.

Fuel.—
Fodder.—
Supplies.—

12 KOK PITAS ... 15·2 m. The road is even and sometimes intersected by beds of streams which in spring flow down from the Altin Tau Mountains, extending parallel to the road.
MINOR ROUTE No. 3.—contd.

Camping ground.—
Water.—Salt; even horses will not drink it.
Fuel.—
Fodder.—
Supplies.—

13 YANI KAZGAN
... 25.2 m.

207.6 m.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

14 BISH BULAK WELL
... 6 m. The road is over even ground.

213.6 m.
Camping ground.—
Water.—5 shallow wells—water of poor quality.
Fuel.—Scarc e.
Fodder.—
Supplies.—

15 ADAM BAI
... 14.6 m.

228.2 m.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

16 TAMDI
... 8.6 m. At first the road is sandy, rendering movement difficult, but it improves and towards the end of the stage passes over even firm ground.

Camping ground.—
Water.—A number of springs of good water.
Fodder.—
Fuel.—
Supplies.—

17 KIDERI WELL
... 24.6 m. For first 7 miles the road is in a defile through the Tamdi Tau mountains and the last 17 miles the road is level.

Camping ground.—
Water.—Good and plentiful.
Fuel.—Plentiful.
Fodder.—Plentiful.
Supplies.—
MII'OR ROUTE NO. 3.—contd.

18 RU WELL ... 9·2 m. The road is extremely sandy. There is no water on the march.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

19 AYAK KUDUK WELL ... 18 m. Up to the wells of Yani Kazgan (8 m.) the road runs over level country. Beyond it becomes sandy. There is little water in the Yani-Kazgan Wells.

Camping ground.—
Water.—2 wells of good water; sufficient for a large detachment.
Fuel.—
Fodder.—
Supplies.—

20 MASCHI WELL ... 10 m. The road passes through an undulating hard locality cut up by low eminences bearing the name of Jaman Tau. There is no water on the march.

Camping ground.—
Water.—6 wells; the water of 3 can be drunk by men; that of the other 3 by cattle only.
Fuel.—Jusan and assafoetida in abundance.
Supplies.—
Fuel.—

21 BAIMAN TAPTI WELL ... 14 m. The road is at first firm and smooth, but afterwards runs through a sandy track. There is no water along the road.

Water.—Sufficient from a well for 400 men.
Fuel.—
Fodder.—Obtainable 2 m. from well.
Supplies.—

22 KOSH BAIGI WELL ... 19·2 m. For the first 2 m. sand hills are met with which render movement difficult. Afterwards the road runs over a completely level and practicable country.
Camping ground.—
Water.—Sufficient from a well for 400 men plus transport. Close by are 3 wells (Sulli) with water fit for cattle.
Fuel.—Jusun.
Fodder.—
Supplies.—

23 BALTA-CHAUDIR WELL ... 20 m. At 12 m. are the Chakmak Wells with good water. For the first 18 m. the road is easy and fairly good but beyond it is over sand which renders movement of baggage difficult.

Camping ground.—
Water.—2 deep wells fit for use and sufficient for 200 men and 100 horses for 24 hours.
Fuel.—Jusun and brushwood.
Fodder.—
Supplies.—

24 SAP (village) ... 16 m. The road passes through stony and sometimes very steep hills. Mountain streams and canals cross it in places. Wheel traffic is almost impossible. At 6.75 m. there are hamlets on both sides of the road. At 12 m. a large ravine and the river of Katti Sai. At 15 m. the hamlet of Sap is seen.

Camping ground.—
Water.—
Fuel.—
Fodder.—Corn, etc., can be bought in the village of Sin Tab.
Supplies.—

25 FARISH (village) ... 16 m. The road runs over the spurs of the Nur Ata Mountains moderately level but rugged and unfit for wheeled traffic. At 3 m. on the right the hamlet of Merxerum is visible in the hills.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—
MINOR ROUTE NO. 3.—concl.

26 USHMA (village) ... 11.2 m. Road is of same character as on former march. Hamlets are seen on both sides of the road. At half way is an excellent spring.

_Camping ground._
_Water._—Plentiful.
_Fuel._—
_Fodder._—
_Supplies._—

27 OSMAN SAI ... 16 m.

_Camping ground._
_Water._—
_Fuel._—
_Fodder._—
_Supplies._—

28 CHIRCHIK ... 10 m. The road is over mountain spurs and is rugged. In the mountains near the road is the hamlet of Yani. The road here crosses the river Iliyanchi. At 10 m. the river Sadik-Ab-Sakal is crossed and at 14 m. a nameless stream.

_Camping ground._
_Water._—Plentiful.
_Fuel._—
_Fodder._—Nil.
_Supplies._—

29 CHANGARLI ... 18.3 m. The road is hard level and stony.

_Camping ground._
_Water._—From river Killi.
_Fuel._—
_Fodder._—Nil.
_Supplies._—

30 JIZAK ... 11 m. Road is level, smooth and firm, occasionally intersected by canals; country is open.

_Camping ground._
_Water._—From ponds—guinea worm prevalent.
_Fuel._—Obtainable but expensive.
_Fodder._—Obtainable but expensive.
_Supplies._—
MINOR ROUTE NO. 4.
TASHKENT to MARGHILAN (SKOBELF).

182 miles. 12 stages.

Authority.—Kostenko, 1880.

Epitome.
Wheel road to Taliau. Thence to Khokand a caravan route practicable for baggage animals. From Stage 10 to Marghilan by post road.

<tbody>
<tr>
<td>1 UCH KURGHAN ... 20 m.</td>
<td>On leaving Marghilan cross a maidan about 8 m. long and arrive at village of Awal containing about 600 houses. At 14 m.</td>
</tr>
</tbody>
</table>
MINOR ROUTE NO. 7.—contd.

another village is reached. Then cross a maidan 4 m. long. The road is now about 15 feet wide and goes through cultivation for about 2 m. when Uch Kurghan is reached. Here a river is crossed. Uch Kurghan has 3 serais, a bazaar and about 1,200 to 1,500 houses.

_Camping ground._
_Water._—Excellent from mountains.
_Fuel._—Procurable everywhere.
_Fodder._—Grazing good. Small stores of corn and clover.
_Supplies._—Procurable.
_(Note._—See also Main Route VI, stage 1.)

2 MAIDAN ... 12 m. The road runs along the R. bank through cultivation for about 3 miles and is broad and easy. Cross the Ishfargan river by a bridge, here the valley broadens. From the bridge the road runs along the L. bank of the Ishfargan River for 9 m. Maidan consists of about 20 houses.

_Camping ground._
_Water._
_Fuel._
_Fodder._
_Supplies._

3 LANGAR ... 10 m. On leaving Maidan proceed along the L. bank for about 2 m. Cross a strong wooden bridge and proceed along the R. bank for about 8 m. The road gradually ascends the valley. Langar has no cultivation.

_Camping ground._
_Water._—Excellent.
_Fuel._—Obtainable.
_Fodder._—Obtainable.
_Supplies._

4 KIZIL ALAI PASS ... 20 m. The road follows the R. bank of the Ishfargan River for 2 m. From the 2nd and 3rd m. the traveller crosses and re-crosses the stream about a dozen times. Up to the 15th m. the road gradually ascends. Both sides of the valley consist of high cliffs and peaks. The Russians have made a road through some rocky precipitous cliffs. The ascent is steep and difficult for laden animals. Proceed along a narrow valley for 5 m. from which the road ascends to the top of the pass.
Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

5 Camp at foot of KIZIL ... 12 m. The pass is easy and is a good grazing ground.

74 m. ALAI PASS

The road ascends gradually through a narrow valley for about 9 m.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

6 KOK SU ... 18 m. Cross the stream from the Kara Kazik Pass by a ford easy for laden animals.

92 m.

Go down the R. bank for 3 m. Come to the Kizil River Valley. Proceed along the R. bank of the Kizil River 8-9 miles and cross the Kok Su Nullah. Kok Su consists of about 15 houses and is situated on the R. bank of the Kizil River in a narrow valley crowned with lofty peaks.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

7 ACHGHOLMA ... 18 m. On leaving Kok Su the road crosses a maidan 10-12 m. long. Arrive at a nullah with a wooden bridge astride it and go over a “pari” about 6 m. long over which a road 8 feet wide has been made. It is practicable for laden animals. The road goes over easy ground now for 2 m. and comes to Achgholma. To Achgholma there are 2 routes; one down the main Kizil Valley along the R. bank of the river; the other towards a pass called Kicklick—Kara—Mugh. Follow the former.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

8 DAMBARUK ... 20 m. Proceed for 9 m. over level ground and 4 m. across a maidan. 4 m.

130 m. (DAMBUROCHI) further on the road comes to a bridge. The village of
MINOR ROUTE NO. 7.—contd.

Dambaruk is on the R. bank of the Kizil River and consists of 20-30 houses. 2 m. further on another bridge is reached. The road between the two bridges is about 8' wide and quite level. Cross the bridge to the R. bank and come to camping ground.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

9 ZANKU ... 15 m. At 1.5 m. come to a hamlet of 15-20 houses. The road crosses a maidan 3 m. long. From the river bank ascend for a mile by a pass called Kushaba. Continue along the river bank for a mile after which there is a steep ascent difficult for laden animals and an easy descent. Ascend again for a mile. Here the road turns S. to a hillock called Kushaba. Arrive at a village called Yar Mazar. At 12 m. nullah is crossed by a wooden bridge. The road goes over level ground for 3 m. and come to Zanku a village of 50 houses.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—Scarce.

10 YARKICH ... 15 m. The road goes over a maidan (HISSARAK) for 5 m. and for 4 over a cliff which is soft and slippery and needs constant repair. Continue along the R. bank of the Kizil River for 4 m. At 13 m. the river bank is left. Arrive at Kala-Khoit village (200 houses). One mile through cultivation and Yarkich is reached. Yarkich consists of about 150 houses and is situated on the L. bank of the Terak stream. Just opposite Yarkich is a precipitous hill which commands both directions (i.e., towards Yarkich and Turpi).

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

11 TURPI ... 10 m. Leaving Yarkich the road ascends gradually for 5 m. through cultivation and hamlets. Cross a stream from the Terak Pass. The road turns N. for about 2 m. towards the Turpi Pass. Descent
MINOR ROUTE No. 7.—concl.
easy for laden animals. The road now turns S. towards the
Kizil River over zigzags and soft ground. The village of
Turpi consists of 50-60 houses.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

185 m.

12 GARM ... 15 m. At 1 m. cross a “pari” wide
even for laden animals. The
road for 6 m. now goes over
a maidan and for 4 m. over stony ground. Go along the
R. bank of the Kizil River for 4 m. To Garm the road is
about 9' broad and goes over a plain through cultivation.
Garm consists of about 120 houses, a bazaar and a fort which
used to be occupied by a Mir appointed by the Amir of
Bokhara.

Camping ground.—Spacious and open.

8 KURTKA ... 19 m. From Ala Buga the road
116 m.
turns in a N. E. direction for about 8 m. and descends
to the Ala Buga River which it crosses by a strong bridge
built of wooden beams and iron wires. At 8 m. salt mines
are reached. There are 3 streams without bridges on the
road between the salt mines and Kurtka. From the salt
mines to Kurtka the road is in good condition 18-19 feet wide
and quite level. Kurka is surrounded by hills and consists
of about 500 kirghiz families living in tents.

Camping ground.—Spacious.
Water.—
Fuel.—
Fodder.—
Supplies.—Plentiful.

9 KULNAK ... 19 m. The road runs along the L.
135 m.
bank of the Narin River and is level as far as
Kulnak. Three nullahs between Kurtka and Kulnak are
crossed. The water is so little in them that they can be
forded even in summer.

Camping ground.—Spacious.
Water.—
Fuel.—
Fodder.—
Supplies.—

10 NARIN... 19 m. 4 m. from Kulnak the road
154 m.
crosses the Ak Bashi River by a wooden bridge called Shaitan
Koprak. From the bridge the road runs on the level for
12 m. and then descends gradually for 2 m. to Narin Village.
MAIN ROUTE No. 8.—concl.

Narin is situated on the L. bank of the Narin River. The Russians have built a small fort consisting of a low walled enclosure in which are quarters for soldiers and one bungalow. A ditch surrounds the fort whose garrison used to consist of about 100 Cossacks. In addition to the fort, there is a village called Narin built in the Russian style with broad streets. Narin lies in a narrow valley and consists of about 400 houses inhabited chiefly by traders.

2 ISKANDER ... 14 m. 2 m. beyond the centre of 32.6 m. Troitsky is the large Sart village of Niaz. Beg. At 12 m. is Torbus where the road crosses a canal by a bridge 40' long 13' wide. Further on is another 40' bridge and at 14 m. is a 50' bridge over a dry nullah 10' deep with very steep banks at the entrance to the village of Iskander. a large village mostly inhabited by Sarts with a few Russians. At the N. end of the village is a ruined wooden tower which would make a signalling station.
From Isan the road crosses a canal by a 44' bridge and at 4.6 m. is a large wooden bridge over the Chirchik 240' long (in disrepair in 1919). When in order the road crosses this and goes to Khojakent (a shorter route than that described). Leaving the bridge the road continues up the R. bank of the river and at 6 m. is the Sart village of Chimbalik in which there is a bridge 34' long over a dry nullah 10' deep. At 14 m. the road crosses the Chirchik by a fine new iron bridge in 2 spans of 40 and 48 feet on to an island in the stream and enters the large Sart village of Khojakent (14.6 m.). The road and river here pass through a gorge. At 18.6 m. are some Khirghiz houses and the meteorological station of Charvak 2,926 feet above sea level. At 20.6 m. the road crosses the Chirchik or Chatkal River by a 120' bridge over a deep gorge and at 21.3 m. is Brich Mulla a large Tajik village. From here the mountain paths lead to Ferghana via the Kok Su and Chatkal Valleys. S. of the village and between it and the Chatkal is a large open space which would make a good aeroplane ground.

**Alternative Route NO. 10 (i).**

**TASHKENT to BRICH MULLA.**

53.2 miles. 2 stages.

**Authority.**—Major R. St. C. Pattine

**Epitome.**

Difficult for carts in summer when parts of the road are marshy. Road is unmetalled. This road might be useful
ALTERNATIVE MINOR ROUTE No. 10 (i).—conclđ.

If the bridges over the Chirchik (4.6 m. N. of Iskander and at Khojakent) on route 10 were broken.

112 m. small plateau avoiding
"paris" by the river
side along which there is a footpath. At 1 m. on the L. bank
is the village of Nassure (5 houses). From here the road goes
to Sarez (40 houses). At 1.5 m. is Yezgelon Nullah leading
to Kurgin Akbar Pass. At 2 m. road leaves river and crosses
side of hill to large plateau called Rasharib (30 houses).
Adjoining Rasharib is the village of Yupchum (10 houses)
by the river bank.

Camping ground.—
Water.—
Fuel.—
Fodder.—Grain of most kinds obtainable.
Supplies.—
LATERAL ROUTE No. VII (A).—contd.

Camp ... 8 m. Road for laden ponies ends at
120 m. Raskarib. Road descends for 3 m. to the Bartang River then
by zigzags across face of precipice to level of river going
dangerous. From the river ascends side of rocky hill to
summit (4 m.) descent to river gradual. Ascend sharply 600
feet across undulating ground, descending to river at 7 m.
Here there is a very bad "pari" which is crossed.

Camping ground.—
Water.—
Fuel.—
Fodder.—Nil.
Supplies.—Nil.

10 BASIT ... 7 m. Road is on the R. bank of the
127 m. Bartang. At 1 m. come to
Indooft Jehr the foot of a
very dangerous precipice. Pony road goes by zigzags up the
face of the cliff; foot road by the river is very bad. At 3
m. ascend to the top of a spur. At 3-5 m. opposite on the
L. bank is the Bardera Nullah which is the summer road
to Shignan. Road descends to Chadud (10 houses). This
village and Basit are under one Aksakal. Ponies here swim
the river to the L. bank; baggage is taken on skin rafts; river
is 100 yards wide. From Chadud a road goes over the tops
of mountains practicable for unladen ponies and descends to
the Bartang river 5 m. the Chadud side of Razouge.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

11 RAZOUGE ... 12 m. At 1 m. footbridge to the
139 m. R. bank. At 1-5 m. is
a difficult "pari". At
6 m. is the village of Adderch (5 houses). At 7-5 m. ponies
swim to R. bank—baggage by raft. At 8.5 m. sharp ascent;
at 10 m. descend to river. Razouge is a large village of 35
houses. River here divides into many channels and is ford-
able.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—
LATERAL ROUTE No. VII (A).—concld.

12 SURPANJ ... 6 m. At 5 m. ponies swim to the L. bank. Road on R. bank crosses a "pari". At 75 m. ponies re-cross to R. bank. Road goes along the river for 4 m. when ponies ascend and cross side of mountain by high path. Foot road along river is very bad. At 5 m. is the village of Roweved (5 houses). Footbridge across the Bartang River. Surpanj is a large village (30 houses). Coolies obtainable.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

13 PYDEROOT ... 8 m. Road to L. bank by footbridge—ponies swim. At 1 m. is the Shahvitch Hoof Nullah—the summer road to Darwaz. At 2 m. on L. bank is Oosow village (6 houses). At 4 m. footbridge to R. bank—ponies swim. At 5 m. Rugmeed Nullah—a large volume of water in nullah. At 7 m. re-cross to R. bank. Road bad.

Camping ground.—
Water.—
Fuel.—Abundant.
Fodder.—Grass abundant.
Supplies.—

14 KILA-I-WAMAR ... 10 m. At 1.5 m. ponies swim to L. bank. At 2.5 m. Rhete Nullah. There are 6 houses in this nullah. Road crosses a succession of galleries and "paris" to Barghoo at 4 m. where supplies are procurable.

The road which is bad now follows the R. bank. At 6 m. is the village of Yamis (20 houses). At 8 m. is Sujand (30 houses). At 9 m. is the junction of Bartang and Dara Panj. The river is 200 yards wide at Kila-i-Wamar and is fordable.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—
LATERAL ROUTE NO. X (A).
NEZA TASH PASS to SARHAD.

143 miles.

9 stages.

Authorities.—Ivanoff, 1883; Littledale, 1890; Yarkand Mission, 1875; Dunmore, 1892; Curzon, 1825; Pamir Boundary Commission, 1895.

Epitome.

A fairly good road throughout; fit for laden animals. Water, grass and fuel generally procurable en route. Length of stages very doubtful.

<tr>
<td>2–4 LITTLE PAMIR LAKE ... 70 m. This distance is taken from the map. Ivanoff describes the Bash Gum Pass as very difficult. Littledale was told that near the entrance to the Bash Gumbaz Valley there is excellent grazing and that the pass was impracticable until the middle of July. The road descends from the pass to the Victoria Lake which it skirts and crosses to the Little Pamir by the Benderski Pass. This route was followed by Littledale in 1890, the Pamir Boundary Commission in 1895 and Dunmore in 1892. The crests of the Benderski and Urta Bel Passes were fixed as the Russian boundary by the commission of 1895. The Benderski is said to be open all the year round. The Urta Bel is open summer and winter; the Kizil Robot is only used in summer.</td>

**Fodder.**—
**Supplies.**—
5  **CHILAB** ... 12 m.

90 m.
*Camping ground.*—
*Water.*—
*Fuel.*—
*Fodder.*—
*Supplies.*—

6  **BOZAI GUMBAZ** ... 12 m. The Chilao Lake drains to the W. and E. and consequently becomes the source of both the Ak Su and the Oxus. It is reached at 5 m. The road to Bozai Gumbaz goes along the foot of the S. slopes of the Nicholas Range which divides the Great and Little Pamirs, in a W. direction.

*Camping ground.*—
*Water.*—
*Fuel.*—
*Fodder.*—
*Supplies.*—

7  **LANGAR** ... 14 m. Cross the Ak Jilda stream. Here there are several good camping sites with good water and grazing but no fuel save wormwood and a few small bushes growing by the Ak Jilda. Ascend and cross a spur, rough going although practicable for laden animals. The road leads along the R. bank of the Wakhan Darya and follows its course though it is not level. The long rich grassy plain of Dasht-i-Mirza Murad is reached, at the E. end of which is found a Russian inscription on a large stone by Colonel Ionoff marking the date August 1st of his reconnaissance here in 1891 with the Holy Cross above it. Descend to the bed of the Waram Stream and crossing it follow for 2.5 m. along the Langar Maidan. Follow the bed of the Wakhan Darya for 5 m. The track ascends abruptly up a series of zigzags for 1,000 feet from the bed of the stream. Follow the road via Marpit to Langar.

*Camping ground.*—
*Water.*—Plentiful in July.
*Fuel.*—Plenty of willow and juniper.
*Fodder.*—No grazing in September.
*Supplies.*—

8  **SHAOR NULLAH** ... 17 m. From Langar the road leads along the northern
LATERAL ROUTE No. X (A).—concld.

Slopes of the Wakhan Darya gradually descending and following the line of the river over boulders. This section of the road is bad. At 8 m. Zankuk Nullah is reached where there is good water, fuel and a little grazing. There is a good level camping ground about 400 yards from the nullah on the Shaor side. At 11:25 m. the junction of the upper and lower road is reached. At 12:5 m. descend a steep path from the Bajgaz plateau. Good grazing and water here. Ford the Dara nullah (3' deep in July). Ascend from Dara Nullah; cross the Shaor stream and camp in the bed of the nullah.

Camping ground.—Rough and cramped.

Water.—
Fuel.—
Fodder.—
Supplies.—

9 SARHAD ... 10 m. A very difficult road on account of the many steep ascents and descents.

From the Shaor Nullah the road ascends 800 feet and descends again for 500'. From the Ishkan Satat Nullah the road ascends for 1,300' to the Daliz Kotal.

Camping ground.—
Water.—
Fuel.—
Fodder.—
Supplies.—

LATERAL ROUTE NO. XIII (A).

BULUN KUL to KOK SAI.

105'5 miles. 8 stages.

Authority—Lieut. Cobbold, 1898.

Epitome.

Fit for pack transport; water, grass and fuel generally obtainable.
