A book of offerings and prayers addressed to the various forms of sGrol ma (Skt. Tārā), each form of the goddess protecting against one particular kind of danger.

b) Title: sGar bsangs chen mo yid bzhin dbang rgyal dngos grub char 'bebs zhes bya ba bzhus bs.
Abbreviated title: bSaṅgs.
Manuscript written in the d b u m e d script, only up to folio 35.
This chapter and those which follow have the size 41,5 × 7,5 cms.
A book of prayers invoking various deities worshipped primarily by the group of the “unreformed” sects.

c) A subchapter of the latter text, without a title, 4 folios.

d) Title: gNam chos spom ra'i ..?.. mchod g.yang skyabs bsam 'phel nor bu zhes pa bzhus bs.
Abbreviated title: sPom ra.
Manuscript written in the d b u m e d script, 5 folios.

A book of worship of the mountain-god *rMa chen spom ra* (also known as *rMargsal spom ra*, *sPom chen spom ra*, *'Brog gnas rMargsal spom che* etc.)⁶ the deification of an important mountain-range in northeastern Tibet. This text gives his name several times as *rMagsnyan spom ra*, an appellation also used by the Bön. By addressing him also as a god of richness (*sPom ra nor lha*) this places him in connection with the god of richness and guardian of the North, *rNam thos sras* (Skt. *Vaiśravaṇa*). At the beginning of the tract is given a short description of the appearance of *rMa chen spom ra* which differs somewhat from the mountain-god's most frequent iconographic representation: in this case his body is yellow like gold, he smiles ferociously and his head is covered by a helmet of conch-shells. On his body he wears a cloak of silk, golden armour and a loincloth of tiger skin. His right hand holds a cane stick (*sba lcag*) subjugating the three worlds, the left one carries an ichneumon (*ne'u le*) from whose mouth drops a rain of jewels. He rides a yellow-coloured horse which can fly and which has a saddle lined with a tiger skin, a bridle of gold and a halter of turquoise. Later, several members of the retinue are mentioned: his *sakti rMar rabs byam* (*s* *drag mo rgyal*), a goddess belonging to the group of the twelve *bsTan ma*⁷, his nine sons who are white like a conch-shell (*rma sras dungs mi dkarpodgu*) and who ride horses, the group of his 360 brother-deities (*rma rigs sum brgya drug bcu*), the “forty-five sisters and brothers” (*sring lcambzhibcu rtsalngag*) and the “multitude of country-gods of six rivers and five ridges” (*chu drug sgang lngai yul lha'i tshogs*) who are all depicted as white men riding on white horses, brandishing sharp weapons, armed with a bow-case and a quiver and holding white banners. Finally are mentioned the hundred thousand goddesses of the class called *rma sman*⁸, who are beautiful women dressed in silks and who are decorated with jewels.

e) A tract without a title, written in the *dbu med* script and consisting of 5 folios. In the last folio, however, a short indication of the contents of this tract is given: *Yul lha rnams kyibangs mchod*, “praising and presenting offerings to the country-gods”⁹.

The text contains invocations to the following local deities: *bKa' nyan*.

⁹ On the “country gods” (*yul lha*) see *Nebesky-Wojkowitz: Oracles and Demons*, p. 4 sq.
yul bdag ger mdzo — a god whose body is brilliant like crystal, wearing a cloak of silk and a helmet and armour both made of conch-shell. His right hand holds a lance with a white flag, the left carries a flat bowl filled with jewels. He rides a richly caparisoned white horse. gNy an ldang rdo rje blo gros, “chief of all the guardian deities protecting the great holy place” (gnas chen zo dor¹⁰ yongs kyi gts'o). He has a lustrous white body and is dressed in a silken garment. Around his head is wound a turban of white silk and over his shoulders is thrown a rainbow-coloured cloak consisting of peacock feathers. In his right hand he holds a banner of white silk and in the left a vessel. He rides a white horse. His retinue consists of a hundred thousand lha, klu and gnyan¹¹.

(zo dor) d'Bus che brag dkar — he has a brilliant white body and his head is covered by a turban of silk. His right hand holds a stick made of crystal, the left a vessel and he rides a white horse.

f) A single folio written in the dengu med script and containing invocations to the “king of the horse-gods” (rTa lha'i rgyal po) and other rta lha, the divine protectors of horses worshipped especially by the Tibetan nomads in order that they may avert the various illnesses of horses (rta nad). Except for the colour of his body, which is red, the iconographic details correspond to those which I have previously published¹². The other “horse gods” whom this text invokes are the rTa lha'i rgyal po remanta, dPal ldan mgon po nag po, the mountain-god Gang ba bzang po, rGyal chen mgon po rnam thos sras and Nor lha rta bdag (s)ku be ra. The last mentioned deity is the only rta lha whose iconography I have not yet discussed: a white man wearing a harness of conch-shells, a red turban and who rides on a red horse.

g) A tract of 6 folios written in the dengu med script, without a title and containing a prayer to the mountain-god gNas bdag kha ba dkar po, “master of the sacred locality White Snow”, a local deity of northeastern Tibet. This deity, which is also called the “valley btsan” (rong btsan) Kha ba dkar po and ‘Ja’ yul gzhi bdag, “foundation-master of the ’Ja’ country”, is being depicted as a man with a lustrous white body dressed in white silks and riding a white horse. His head is covered by the kind of hat called “life-hat” (srog zhu) made of jewels. His right hand brandishes a patakā banner (ba dan) of white silk, the left hand holds the jewel granting all wishes. His retinue consists of

his queen, son, minister, the leader of his army, the gate-guards, officers and a great number of deities belonging to the ma mo and ging classes 13.

On fols. 3 b—6 a are invoked the following local deities who apparently stand in close relation to the before-mentioned mountain-god:

Senge nor bu dgra 'dul: — a purple-coloured man with dots of poison on his teeth, with eye-veins of coral and eyebrows of turquoise. His head is covered by a huge helmet of silver around which a turban of white silk is wound. He wears black armour consisting of thunderbolts. The right hand brandishes a stick made of jewels, his left hand holds a lance with a white banner. A quiver and a bow-case are suspended from his girdle. He rides a steed possessing magic qualities. His horse has a saddle and a bridle of gold and a halter of conch-shell. His retinue consists of a multitude of dgra lha and wer ma 14.

"The master of the retinue" (dkor gyi bdag po) Padma bstan srun; no description of this figure is given.

IV. Collection Handel-Mazetti.

In 1922 the Museum of Ethnology acquired from the Austrian botanist Heinrich Handel-Mazetti a collection of ethnographic objects he had gathered in the course of researches in Western China from 1914 to 1918. This collection includes six Tibetan books (recorded under nos. 36 to 41 of the provisional list drawn up in 1922). Unfortunately, no numbers corresponding to this list are found on the books themselves. The books have, therefore, not yet been recorded in the museum catalogue. To all appearance the following six books were acquired from Handel-Mazetti:

A manuscript (written in dbum) on a Chinese type of divination and containing numerous astrological drawings; the title is illegible.
76 folios, which are bound together.
Size 29 × 9 cms.

An astrological calendar of 43 bound folios applicable to the year of the "female water-hare" (chumoyos).

Blockprint, 64 folios.  
Size 49.5 x 8.5 cms.  
Title: Bla ma drag po'i las byang dngos grub kun 'byung zhes bya ba bzhugs so.  
Blockprint, only up to folio 15, with annotations written in red ink in the dbu can script.  
Size 48.5 x 8 cms.  
A book of prayers containing details on the iconography of several high-ranking divinities.  
Title: sLob dpon chen po padma 'byung gnas kyi gsol 'debs le'u bdun pa zhes bya ba bzhugs so.  
Blockprint, 15 folios (numbered 206—202, volume ka).  
Size 45 x 9.5 cms.  
A prayer-book whose authorship is attributed to Padmasambhava.  

The origin of the following two blockprints, which are not recorded in the museum catalogue, is unknown:  
Title: bDud kyi g.yul las rab tu rgyal bar byed pa'i dam can rgya mtsho'i mchod sprin bzhugs so.  
Abbreviated title: Nya ge Kun mkhyen bka' 'bum.  
Blockprint, 17 folios (folio 9 missing).

Size 53.5 × 9 cms.

A work apparently related to the Kāvyadārśa.

According to the relevant colophons the printing blocks of the works nos. 132.273, 132.274, 132.277, 132.279, 132.280, 132.282—132.284, are being kept in the printing establishment of the monastery Gangs can phan bde'i gter mdzod gling in Lhasa, which lies at the foot of the Potala palace (pho brang chen po ta la'i zhol par khang chen mo, or lha zhol par khang).

During the first period of my ethnographic and linguistic research in the Indo-Tibetan borderland (1950—1953) I acquired at Kalimpong (district Darjeeling) the following Tibetan works:

No. 134.463.

Title: Rab gnas kyi mchog khrigs rtsa lhan gnyis gcig tu sdebs pa klangs pas don 'grub bzhugs so.

Manuscript, written in the d b u m e d script, 54 folios.

Size 34 × 8 cms.

A book describing a rite of consecration (r a b g n a s) and containing the relevant prayers.

No. 134.464.

The front-page, which bore the title, is missing.

Manuscript, written in the d b u m e d script, 57 folios.

Size 26 × 9.5 cms.

A pharmacological text somewhat difficult to read on account of its numerous abbreviations. While most of the pharmacological texts which we will

mention later explain primarily the efficacy of each particular medicinal substance, this manuscript deals mainly with the description of composite medicines (s b y o r b a).

No. 134.465.
Title: Padma'i zhal them bcu drug bzhugs so.
Manuscript, written in the dbu med script, 29 folios.
Size 29 \( \times \) 5,5 cms.
A poem which has been composed at bSam yas monastery in honour of Padmasambhava.

No. 134.466.
Title: gNod sbyin bse'i khrab can la mchod gtor 'bul tshul bzhugs so.
Manuscript, written in the dbu can script, 8 folios.
Size 43,5 \( \times \) 9,5 cms.
A book giving instructions for the worship of the yaksa bSe'i khrab can\(^{37}\), the wrathful form of the dharmapāla Tshangs padkar po. The work is supposed to have been composed by the fifth Dalai Lama during his summer retreat at gSang phu.

No. 134.467.
Title: Slob dpon padma mdzad pa'i mdos kyi las byang mchod drug ma bzhugs so.
Manuscript, written in the dbu med script, 10 folios.
Size 20 \( \times \) 9,5 cms.
A text attributed to Padmasambhava and concerning the setting up of a thread-cross (mdos)\(^{38}\) in order to suppress the evils which are caused by the various classes of demons.

No. 134.468.
Title: 'Phags pa brgya bzhi'i cho ga bzhugs so.
Manuscript, written in the dbu med script, 14 folios.
Size 43,5 \( \times \) 7 cms.
Description of the so-called bRgya bzhi\(^{39}\) ceremony carried out in order to counteract various kinds of evil.

No. 134.469.

Title on margin: 'Chams yig.
Blockprint, 40 folios.
Size 54 × 9 cms.
A work describing the performance of a religious dance under the auspices of the Adi-Buddha Samantabhādra (Tib. Kun tu bzang po) and two related deities of the yi dam class, Heruka and Vajrakīla (Tib. rDo rje phur pa). Books of this type — they are called “dance books” ('chams dpe or 'chams yig) —, are extremely rare. To my knowledge only one other 'chams yig has so far reached the West\(^ {41}\).

The book here under discussion has been composed, in its greater part, by the fifth Dalai Lama, Ngag dbang blo bzang rgya mtsho (1617—1682), who, however, left it unfinished. The text was later completed by the incarnate lama Ma chen and by the chief sacrificer (dkon gnyer dpon) Byams pa kun dga' 'byung gnas.

The 'chams yig begins with a short historic introduction and with a few general observations on the way in which a 'chams should be performed. The description of the dance itself is divided into two main sections: in the first the so-called “root dance” or rtsa 'chams is discussed, while the second part treats the so-called brub 'chams, whose main purpose is the “killing of evil” (gdu g pa'i sgr ol ba).

The rtsa 'chams is usually danced by 13, 16, 21 or 23 lamas dressed in the attire of so-called “Black Hat” magicians (zhva nag). The introduction to the rtsa 'chams gives a short description of the attire which the dancers wear and discusses in particular the symbolism of their characteristic hats. The text then describes the various phases of the rtsa 'chams which is essentially the mystic creation of the

\(^{40}\) Regarding the contents of this manuscript see further Nebesky-Wojkowitz: Oracles and Demons, pp. 388, 389.

mandala of Heruka by relevant dance movements. The main figures of this mandala are Heruka and his sakti, ten wrathful deities (kho ro bcu) occupying the nadir, zenith and the main and subsidiary quarters of the world. Further are the ten “servants” (phyag brnyen) and ten witches (phra men), “four ferocious gate-guards” (sgo ma bzhi) who guard the four gates leading into the interior of the mandala and finally the twenty-eight yoginis (rnal 'byor ma) who stand in groups of seven in the four main quarters of the world.

The second part of the 'chams yig consists of two main sections. In the first is discussed a drum-dance (rnga 'chams) under the auspices of Vajrakila and performed by masked dancers who accompany their movements by drum-beats. The special form of brub 'chams described in the second section culminates in the “killing” of a dough effigy (linga) 42.

The basic work of Tibetan medicine called the brGyud bzhi⁴³, "the four roots". The first and second volumes of the brGyud bzhi are devoted to a general introduction to medicine, followed by a survey of anatomy and a general classification of ailments and diseases. The third

volume, which is divided into 92 chapters, contains a detailed discussion of the various illnesses and the ways of curing them. The fourth volume discusses in 27 chapters the fundamental teachings of lamaistic pharmacology.

This is one of the most important works on Tibetan medicine. It has been composed by the sde srid Sangs rgyas rgya mtshe, the regent who ruled Tibet after the death of the fifth Dalai Lama. The lHan thabs, of which also a Mongolian translation exists 44, is a commentary on the third part of the bRgyud bzhi. The book is subdivided into 133 chapters, each being devoted to the treatment of a different illness. The enumeration begins with the discussion of the various dispositions of wind (r lung), blood (khrag) and phlegm (badkhan). Then follow chapters on such important illnesses as dropsy ('or chu, dmu chu), small-pox ('brum pa), and various kinds of plague (gnyan nad) and cholera (nyalag). Twenty chapters are devoted to a description of the illnesses afflicting the various parts or organs of the body, which are enumerated in the following order: head, eyes, nose, ears, mouth, teeth, throat, heart, lungs, liver, spleen, kidneys, stomach, bowels and finally the male and female genitals. The next chapters are devoted to illnesses causing hickcough and loss of appetite and thirst, illnesses caused by worms (sring bu'i nad), dysentery ('khrul), various diseases of the skin, hemorrhoids (gzhang brum) and illnesses caused by supernatural beings, as: the gdon (e.g. a kind of insanity called gdon smoyo), the planetary deities (gza'; e.g. gza' nad, epilepsy), and the klu (e.g. klunad, leprosy). This is followed by a discussion of the treatment of various kinds of wounds (rma). Most of the chapters found in the final part of the book deal with the symptoms and treatments of illnesses caused by "poisons" (dug), among

Thus the book follows the sequence observed in the third part of the \textit{bgyud bzhis}.

As reported by my Tibetan informants, this is a very rare book. The blocks of this work which, according to the colophon, are the property of the monastery \textit{lcags ri rig byed gro phang lings}, the foremost school of lamaistic medicine, are kept under the seal of the Tibetan government. The printing of a new copy of this book may only be undertaken with the permission of the Tibetan authorities. Such permission is very difficult to obtain and involves the payment of a considerable fee. The reason for the close control of the distribution of this book is the fact that the text contains numerous secret medical traditions whose knowledge should remain limited to a small group of selected persons.

The \textit{rgya mdud} is an important supplement to the above-mentioned \textit{han thabs}. It explains in the same sequence observed in the \textit{han thabs}, the cryptic and abbreviated expressions found in the latter work. It gives further information on the iconography of several deities who stand in relation to lamaistic medicine and it also adds some material which had been handed down by oral tradition. Considerable space is devoted to the use which various substances, otherwise applied in Tantric practices, may also find in medicine. Such substances are according to the \textit{rgya mdud}, the heart of a middle-aged person which has been cut out by means of a knife (\textit{dar ma'i giri snying}), the skull and marrow of a person who has committed suicide (\textit{rang shi'i thod pa dang rkang mar}), the uterine blood of a widow (\textit{yugs mo'i mngal khrag} or \textit{yugs sa'i mngal khrag}), the menstrual fluid
of a young woman whose uterus is free from any disease (b u d m e d g z h o n n u m a m n g a l n a d m e d p a ' i z l a m t s h a n), the flesh of a child sprung from an incestuous union (n a l b u ' i s h a), and the flesh of a middle-aged man who has never cohabitated with a woman (m i d a r m a b u d m e d l a m a s p y a d p a ' i s h a c h e n) 46.

A medical book which has been composed by b s T a n ' d z i n p h u n t s h o g s, a lama-physician who lived in the East Tibetan monastery of Derge (s D e d g e) around the beginning of the last century 47. The whole text is written in the form of a poem, each line consisting of nine syllables. In an introductory passage are enumerated the various general propensities of medicinal substances. Then follows the enumeration of 915 different medicines classified in thirteen main groups, which in turn are subdivided into various subgroups. The text, which is sometimes ambiguous on account of abbreviations necessitated by the metre, explains the way in which each medicine (or group of medicinal substances) acts.

1. Precious substances or jewels (r i n p o c h e) which are divided into two main branches:
   a) the most excellent (m c h o g) and
   b) the ordinary ones (p h a l b a) which in turn are subdivided into non-melteble (m i b z h u ' i k h a m s) and melteble (b z h u ' i k h a m s) substances.

2. Medicinal stones (r d o s m a n) of which also two branches exist: melteble and non-melteble stones.

3. Medicinal earths (s a s m a n) of natural origin (or "self sprung", r a n g b y u n g) and artificial ones (b c o s m a).

4. Medicinal juices (r t s i s m a n). This group contains the most important medicinal juices of both vegetable and animal origin, as e.g. the juice of cloves (l i s h i), of betelnut (s u g s m e l), of saffron (g u r k u m), or, on the other hand, musk (g l a r t s i) and the gall of a bear (d o m m k h r i s).

46 Regarding the way in which some of these substances are used in ceremonies of Tibetan "black magic" see N e b e s k y - W o j k o w i t z: Oracles and Demons of Tibet, pp. 481—502.

47 Compare p. XXIV of U n k r i g's introduction to K o r v i n - K r a s i n s k i's Die tibetische Medizinphilosophie.
5. Medicinal trees (shing sma n). The following parts of medicinal trees are treated in special subgroups: fruit (’bras bu), flowers (me tog), leaves (lo ma), the trunk (sdong po), branches (yal ga), bark (pags pa), viscosy fluids (shiba; to this subgroup also belong the gums, thang chu), and roots (rtsaba).

6. Stalked plants (idum bu), of which primarily the following parts are used: roots, leaves, flowers and fruit. The effects of each of these parts are treated in a separate chapter.

7. Herbs (sngo); this section is subdivided into five chapters describing the medicinal effects of the herb’s roots, leaves, flowers, fruit, as well as those of the whole plant.

8. Salts (lan shava).

9. Unguents (byung sma n) prepared from various parts of the bodies of animals and to some extent also from those of men. This section of the book is divided into twenty-nine subchapters dealing with the medicinal qualities of horns (rva), eyes (mig), tongue (lce), teeth. (so), throat (gre ba), heart (snying), lungs (glo ba), liver (mchinp a), gall (mkhri s), spleen (mcher), kidneys (mkhal), stomach (phoba), bowels (rgyma), genitals (mtshan ma), bones (ruspa), marrow (rkang mar), brain (klang pa), fat (shil bu), blood (khrag), flesh (sha), skin (pags pa), hair (spu; this expression refers especially to the hair growing on the body; the chapter, however, also describes the medicinal qualities of ska, the hair growing on the head), feathers (gro), nails (sen mo), the contents of the stomach (slo) and excrements (brun) — substances belonging to the latter two groups are used mainly for medicinal baths —, urine ( dri chu), milk (’oma) and the whole body (bubril). The chapter on milk describes the general as well as the particular effects of milk itself and further the medicinal qualities of curd (zh o) and the general and particular qualities of butter (mar). The last chapter explains for what medicinal purpose e.g. leaches (badpa) and various ants, beetles, crabs and different kinds of eggs can be used.

10. Crops growing on fields (zhings kyes lo tog). This section deals especially with the medicinal qualities of crops such as: millet (khe), various sorts of barley (nas), wheat (gro), buckwheat (bra bo), and it also describes the uses of domestic plants cultivated in gardens. e.g. various sorts of peas (sran ma), radishes (lap hug), gourd (cun g), etc. This chapter also mentions the medicinal qualities of the products of the above-mentioned plants, e. g. wheat-beer (gro chang), wheat-flour (bag phy e), etc.
11. Medicinal waters (s m a n c h u). In this section are first discussed the general effects of rain-water (c h a r c h u), water from a glacier (g a n g s c h u), from a river (c h u k l u n g c h u), from a spring (c h u m i g g i c h u), from a well (k h r o n p a ' i c h u) and water from the ocean (r g y a m t s h o ' i c h u). The second subchapter enumerates the medicinal qualities of water containing mineral substances, especially arsenic and sulphur.

12. Medicinal effects of fire (m e). This section contains two subchapters in which are described the medicinal qualities of
a) the eleven substances used for cauterization, viz. gold, silver, copper, iron, a singed hide, cotton, wool, the tooth of a bull, the crystall called m e s h e l, the shaft of an arrow, and stones.

b) the beneficial effects of substances produced by fire, i.e. ordinary soot, lamp-soot and smoke.

13. Medicinal propensities of substances which
a) have been singed or burned (for example the text mentions singed gold and silver-powder), but also ashes gained by burning a skull taken from a cemetery (d u r t h o d t h a l b a) and ashes obtained by burning the eye of a peacock's feather (r m a b y a ' i g d o n g s t h a l)

b) decocta, especially various kinds of medicinal syrups (k h a n d a).

Title: sKu lnga’i gsol mchod rdo rje'i sgra dbyangs dang rdo rje grags ldan gnod sbyin tsi’u dmar

A book concerning the worship of the so-called “Five Bodies” (sKu lnga)\(^{51}\) and other prominent members of the numerous group of guardian deities supposed to be protecting Tibetan Buddhism. The volume contains the following six works:

a) Title: sKu lnga’i gsol mchod (fols. 1b—10b). Prayers and offerings in honour of the sKu lnga. This text, which is said to be based on an earlier work called Bla ma’i las byang thugs sgrub yang snying ’dus pa, was begun by the second Dalai Lama dGe ’dun rgya mtsho (1475—1542) and was later enlarged and completed by the fifth Dalai Lama.

b) Title: sKu lnga’i gser skyems (fols. 10b—11b). Description of the way in which a “gold-libation” (gsers skyems) should be made to the sKu lnga, and text of the relevant prayers.

c) Title: sNang srīd dregs pa’i sde dpon gnas chung chos skyong rdo rje grags ldan la mchod gtor ’bul ba’i cho ga ’dod dgü’i mchod sbyin zhes bya ba bzhugs so (fols. 11b—16b). A book devoted to the worship of the god rDo rje grags ldan, the deity which takes possession of the State Oracle living in the gNas chung monastery near Lhasa. This text was composed by the dge sλong, Ye shes rgyal mtshan, and was transcribed at the Potala palace.

d) Title: gNod sbyin dgra lha’i rgyal po rtsi’u dmar po gsol mchod bya ba’i rim brdzogs ldan dga’ ston zhes bya ba bzhugs so (fols. 16b—21a). A book of offerings and prayers dedicated to the dharma pāla rTsi’u dmar po, a guardian-god attached to the bSam yas monastery. This work was composed by the third Panchen Lama Blo bzaṅ dpal ldan ye shes (1738—1780).

e) Title: gNod sbyin chen po bse khrab can la mchod gtor sogs ’bul tshul bzhugs so (fols. 21a—23b). A book of worship of the guardian-deity bSe khrab can, the wrathful form of the god Tshangs pa dkar po. Author of this tract is the fifth Dalai Lama.
