"Of my total outlay for stamps I use an average seven percent for the purchase of philatelic literature - a quota which contains more profit than one would imagine"

PHILIPPE BARON LA RENOTIÈRE DE FERRARI (1858-1917)

The most favourable response to my 'Nepal Philatelic Bibliography' encouraged me to devote a similar booklet to that other fascinating Himalayan land, Tibet.

Apart from various technical improvements, this second bibliography contains one very important innovation, i.e. the addition of a numismatic section, compiled by Dr. Karl Gabrisch, an engaged student and collector of Tibetan coins and paper money. Also included is a chapter on ink and wax seals, a sideline that has always been most popular with philatelists.

The present volume lists over 500 books, articles and catalogues, published throughout the world (in no less than ten different languages!). A critical bibliography of this order should not only be regarded as a complete record of the existing literature, but it should also help in bringing collectors and students into closer contact with the histories of philatelic and numismatic research from the very beginning through to the present days.

Each entry shows full bibliographic details and is followed by a brief comment so as to convey a general idea and summary evaluation of its contents. The dates of the various publications, the subjects treated, the numbers of pages involved as well as a special index are all supplementary indicators that should help the reader in selecting the titles best suited to his individual requirements and interests.

I sincerely wish to thank the following philatelists who have supplied me with numerous articles and/or useful bibliographic information: Derek H. Bates, Richard E. Clever, Peter Collins, Pierre Couvreur, Kurt H. Dahnke, Frederic C.J. de Ridder, Lester A. Michel, James Negus, Lionel R.F. Prescott, John A. Randall, Armand E. Singer, Roger D. Skinner, H.S. Whittaker and the Librarian of the Munich Philatelic Library.

On the numismatic side, Dr. Gabrisch wishes to add his thanks to Nicholas G. Rhodes, Anno A. Remmelts and Bhupendra N. Shrestha.

Our special thanks go to George Alevizos, whose encouragement, full support and keen interest in research has made this publication possible.

2nd ed.: This is a basically unaltered version of the 1st ed., including only minor additions and very few corrections. Unfortunately, it does not cover numerous discoveries made and recorded since 1965.

500 ANON., 'Chinese Rupee and its Divisions for Tibet'  
(The Numismatist, Vol.27, p.542; 1914)  
An article on the history of the minting of the Szechuan rupee.

501 ANON., 'Currencies of Tibet'  
(Salem, Mass.: Essex Institute, 'American Consular Report' No.21188; n.d.)  
The official coin in Tibet is the 'tang-ka', but coins of neighbouring countries are also current along the borders. In Northern and Eastern Tibet Chinese money as well as sycee silver and copper cash are most frequently used. The Tibetans refuse paper notes. Barter is the rule, the trade on a monetary basis being scarce. Tea bricks are widely used as a medium of exchange.

502 ANON., 'Chugoku Kindai Kahei Gaiyo' ('An Introduction to the Chinese Coinage and Paper Money since the 19th Century')  
(Tokyo; 1967)  
Japanese text. Tibet: Hsuan T'ung 2nd year, 7th month, 1st day (5 Aug. 1910), the Office for Tibetan Affairs established a mint. A trial issue of two types of copper coins was made, equivalent to 5 silver Li.

503 ANON., 'Dating Modern Tibetan Coins'  
Dates are invariably found on the reverse of Tibetan coins. On copper coins, the dates are usually stated in numerals, inscribed clockwise in the outer rim legend. On silver pieces, the dates are written in words: a) the word 'year' and the year-figures are usually placed in the centre; b) the word 'cycle' and the cycle-number may be written in the centre or in the outside rim legend. Once the cycle and the year are deciphered, the method of converting the Tibetan date to A.D. or C.E. (Common Era) is simplified by the following formula:  

\[(60 \times \text{cycle}) + \text{year} + 966 = \text{A.D. or C.E.}\]

504 ANON., 'Illustrating the "Illustrated Catalogue of Chinese Coins"'  
(India Asiatic Numismatic Society, Vol.2, No.1, p.77, plates XV, XVI; 1973)

(Thesis, Munich; 1976)  
German text. A translation of the Chinese 'Wei-tsa'ang shih-lüeh' (Record of Tibet) from the 18th century (author 'Sheng-Sheng-Tsu'). P.127: gold and silver are current in Tibet.

508 Bell, Sir Charles, 'Grammar of Colloquial Tibetan'  
An introduction to Tibet's monetary system. The silver coins are: trang-ka, sho-nga, ngü-sang. The copper coins are: kha-kang, kar-ma-nga, chhe-gye. There are no gold coins - in 1918! (p. 136). (Cf. bibliographic entry under 'Primitive Money')

509 Bell, Sir Charles, 'Portrait of the Dalai Lama'  
(London; 1946)
The chief monetary unit is the trang-ka, a silver coin with a large measure of alloy. It is divided into six lesser units, known as ka. Owing to over-coinage of copper coins, large quantities of which were counterfeited in India and smuggled across the border of Tibet, the trang-ka depreciated greatly. Lumps of silver, called 'horseshoes' and varying greatly in size, are used for higher values (p.162). The book contains a photo of 12 Tibetan coins and a silver lump (p.161). (Cf. bibliographic entry under 'Paper Money').

511 BHATTACHARYA, P.K., 'New Light on Sikkim Coinage' (Journal of the Numismatic Society of India, Vol.35, pp.256-259; 1973) The earliest known coin of Sikkim, a 'doli paisa' is described and illustrated. It is of rectangular shape, made of copper, weight 10.567 gms, sized 1.1x1.3 mm (a printing error for 11x13 mm). Thickness 0.5 mm. It was an imitation of the 'doli paisa' of Nepal and minted by the Newar traders of Sikkim between A.D. 1882 and 1885.

512 BONS D'ANTY, P., 'Une ruopie chinoise pour le Thibet' (La Géographie; Bulletin de la Société de Géographie, Vol.8, pp.152-153; n.d.) A description of the Szechuan rupee (Yeom.3); without an illustration.

514 BOWKER, H.F., 'Notes on Asian Numismatics. The Lama Dollar of Tibet' (The Numismatic Scrapbook Magazine, Vol.22, pp.2134-2136; 1956) The author considers the so-called Lama dollar not as a forgery nor fantasy coin as classified by E. Kann in his 'Illustrated Catalog of Chinese Coins' (B-74), but as an authentic coin struck in the early 1900s in the Szechuan Provincial Mint at Chengdu.

The rules of the new mint are detailed in the Regulations of the Board of Revenue, Ch.34, fol.35-36. Two '1 sho' specimens of this coinage are illustrated: Ch'ien-lung pao tsang Y.59 (A.D. 1794) and Tao-kuang pao tsang Y.1 (A.D. 1821).

520 BUSHELL, S.W., 'Additional Coins of the Present Dynasty'
(Journal of the China Branch of the Royal Asiatic Society, Vol.33, pp.30-34; 1889/1890)
The mint in Lhasa is under the superintendence of four officers jointly appointed by the Chinese resident and the Dalai Lama. The coins were directed to be cast from standard sycee silver, unmixed with other materials. The later emperors ordered that one fifth of the issues of the silver coinage of Tibet as well as of the coinage of Ili should still be inscribed with the reign of Ch'ien-lung in memory of the great Emperor's conquest.

530 CHINT'ING, 'Kuo-erh-k'o chi-lüeh' ('The Official Digest of the Records of the Gurkha Campaign')
(China; 1795)
A very rare book containing the official documents of the campaign of 1791-92 in Tibet and Nepal. It contains the only mention of the first coins minted in Tibet: 1763 and 1764 A.D., by the Demo-chutuchta (leaves 11, 12a), and 1785 A.D., with a higher silver content, by the 8th Dalai Lama (leaves 11, 20). These mintages are completely unknown to numismatists. Unfortunately, these issues are neither described nor illustrated - we only know that the Tibetan issues did not differ greatly from their Nepalese prototypes. To the knowledge of the compiler these early Tibetan coins are not confirmed by any other Chinese source.

533 COOLE, A.B., 'Coins in China's History' (Kansas; 4th ed., 1965) Three Tibetan coins are illustrated on pp.115-117: coin YS-S-4, YS-S-10 and YS-C-1. The last two items are considered to be fantasies struck in the 20th century. Regarding YS-S-4 cf. Bowker, 'Notes on Asian Numismatics'.

535 CRESSWELL, O.D., 'Tibetan Coins' (Numismatic International, Dallas, Texas; 1977) In spite of its title, this booklet lists only the coins of autonomous Tibet. The Sino-Tibetan series and the Malla issues on behalf of Tibet are omitted. Useful information for beginners, but, unfortunately, there are some wrong statements and omissions in the listing of the issues.

537 CUNNINGHAM, A., 'Ladakh' (Reprint New Delhi; 1970) The Nepalese coins are of silver, each being worth half a rupee, or two jaos of Ladakh (p.254).

538 CYBIKOV, G.C., 'Buddhist-palomnik i swiatyn Tibeta' ('A Buddhist Pilgrim at the Holy Places of Tibet') (Petrograd; 1919) Russian text. About 1900 the author visited the mint at the Potala of Lhasa and observed the coining by the native blacksmiths under the supervision of special lamas. He frequently met with coins bearing the dates 1872 and 1890 A.D. At that time, an Indian was engaged in the construction of a minting machine but Cybikov did not see any coins produced by it. He saw current coins of Nepalese origin, even of the 17th and 18th century. Some Tibetan coins are illustrated (pp.166-168).

539 DAS, S.C., 'Journey to Lhasa and Central Tibet' (London; 1902. Reprinted New Delhi: Manjusri Publishing House; 1970) On p.64 the author refers to a decree to enforce the circulation of every kind of silver coins, no matter how debased. Presumably, the debased (or counterfeit?) coins referred to are the
so-called Shigatse tangkas (Craig 27). (Cf. bibliographic entry No.240).

540 DROUIN, E., 'Monnaies Tangoutaines ou Si-Hia (Hsi-Hsia)'
A drawing and description of a coin with Tangut characters of Hui Tsung (1068-1087 A.D.) with
the 4th Nien Hao 'Ta An' of this emperor.

541 EASTON, J., 'An Unfrequented Highway'
(London; 1928)
Some remarks on the monetary system. The lower values are of copper and the greater part
of Tibetan trade is carried out in copper values (pp.83-84).

542 FANO, DOMENICO DA, 'Short Description of the Kingdom of Tibet'
(Translation by N.G. Rhodes of the Italian text of 'I missionari italiani nel Tibet e nel Ne-
pal' by L. Petech, 7 vols., Rome; 1952-1956)
In the early 18th century the currency of Tibet consisted of Nepalese coins, 'mandermali'.
Small fractions were silk scarves (K'a-btags) which circulated to the sixth part of a tam-ka,

543 FILCHNER, W., 'Kumbum Dschamba Ling'
(Lipsia; 1933)
German text. The author discusses the monetary conditions in the 1910s. The national unit is
the trangka (called damkha in Lhasa dialect). In Western Tibet the Indian rupee is more wide-
spread, the same holds true for Eastern Tibet where silver ingots are also current. In Northern
Tibet tea-bricks are widely in use. The newly minted copper coins are accepted only in areas
within 100 miles from Lhasa (pp.397-399).

544 FILIPPI, FILIPPO DE, 'An Account of Tibet. The Travels of Ippolito Desideri of Pistoia, S.J.,
1712-1727'
(London; 1937)
Desideri was a contemporary of the second entry of Tibet by the Chinese (autumn 1720). Shortly
afterwards the whole country was flooded with Chinese silver. The Tibetans sent it from Lhasa
to Nepal in order to exchange it for money of the three Kings who ruled Kathmandu Valley (p.
167).

thero unknown type are described. Also mentioned are their prototypes, the earlier coins of
Garhwal without mint-name (three types are illustrated). Photos of 13 coins are included.

548 GABRISCH, K., 'Abriß der Münzgeschichte Tibets'
(C.C.Müller and W.Raunig, 'Der Weg zum Dach der Welt', Innsbruck:Pinguin-Verlag & Frankfurt/M:
Umschau-Verlag; Oct.1982)
German text. A short history of the development of currency in Tibet, especially in connec-
tion with the Transhimalayan trade. The article is illustrated with photos of 19 coins, some
of which unpublished (Jia Qing Y.5 (1), 20-Srang 15-55), and colour photos of 6 bank notes from
the author's collection (pp.220, 233-237). (Cf. bibliographic entry No.44).
GABRISCH, K., 'Notes on the Coinage of Jisnu Gupta of Nepal'
Among others the author mentions a hoard of Licchavi coins which were unearthed in Tibet. Unfortunately, the author could not verify this information.

GABRISCH, K., Beiträge zur tibetischen Numismatik I: Die Sichuan Rupie und ihre Varianten'
(Münstersche Numismatische Zeitschrift, Vol.12, No.4, pp.44-47; 1982)
German text. The history of the Sichuan Rupee and an attempt to classify the main types according to two characteristics on obv. and two characteristics on rev. Based on the author's collection, a total of nine types are listed. Some mintage figures are supplied. The author negates the existence of 'mules' of this denomination. Remarks on the 'dollar-size' pieces (2 1/2 Rp.) with photos of two different types. 19 different types and varieties are pictured.

GABRISCH, K., 'Beiträge zur tibetischen Numismatik II: Die Goldprägung Tibets und deren Fälschungen'
(Münstersche Numismatische Zeitschrift, in print; 1983)
German text. The author rejects E. Känn's theory on a Tibetan gold coin of 1908-11. The first gold coin of Tibet was minted 15-52 (A.D. 1918). In 15-55 (A.D. 1921) the minting was ceased, the last issue being the rarest. The study is based on a collection of 25 gold coins, the results (weight, specific weight, gold content, different measurements) being collected in two tables. The author tries to establish criteria for the genuine Tibetan gold coin. The article contains a classification of the varieties of the Tibetan 20 Srang gold coin. The first counterfeit was a Chinese issue of 15-54, minted at Chengdu, in Sichuan, before 1949. The illustration of this forgery is featured, as a genuine Tibetan issue, in some modern catalogues. In the 1960s, a counterfeit of the 15-53 issue appeared in Nepal. Recently, a forgery of the 15-54 issue, with a higher gold content than the genuine coin, has emerged on the Indian market. All coins described - both genuine and forged - are illustrated.

(Oriental Numismatic Society Newsletter, in print; 1983)
In 1981, a copper piece with a Chinese inscription overstruck on a Tibetan '5-Sho 16-26', appeared on the market at Kathmandu. It seems to be a ratio token and is considered to be genuine. Two different pieces are illustrated.

German text. A survey of the coins and notes relating to the history of the currency in Tibet. Photos of 66 coins and 5 notes are included.

HANS, J., 'Geld und Gold in Asien'  
(Vienna; 1930)  
According to Dr. Filchner, the following foreign denominations were in use: Mongolian Lan-coins, Mexican Dollars called Sining-Taels or Sining-Dollars by the natives. Copper coins were accepted in the area north of Lhasa and in Lhasa itself; in Western Tibet, however, only Tibetan silver tangkas were accepted. Apart from this, sycee silver was in common use.

HOFFMANN, H., 'Tibet. A Handbook'  
(Boomington: Indiana University; n.d.)  
In Tibet's early days, trading was carried on by exchange of commodities. Later, the Tibetans developed their own form of currency. The silver pieces were known as 'ngul' (coin), taking the following forms: ten karma to one sho; ten sho to one srang; fifty srang to one dotse. The Nepalese tāmكا was added to the coinage, being the equivalent of about one and a half sho. In 1792 the Tibetans established their own system of currency with the coins bearing a Tibetan inscription.

(Reprint, Kathmandu; 33pp.; 1963)  
A list of Nepalese coins of the Licchavi, Malla and Shaha periods. The coins are not illustrated, only their inscriptions, both in Devanagari characters and romanized, are given. Of use to the advanced collector familiar with the Newari and Devanagari alphabets.

KALGAN, SHIH, 'Modern Coins of China'  
(Chinese ed., Shanghai; 1949. English translation, Shanghai; 1949)  
The author mentions two gold coins of Tibet, a yellow one and a red one with a lower gold content. Now we know the red coin is actually a Chinese forgery of a genuine Tibetan coin (p.10 of the English translation).
KANN, E., 'The Currencies of China' (Shanghai; 2nd ed., 1927)
An important work on gold, silver and copper currency. The references to Tibet are scattered throughout the work.

KANN, E., 'The Coinage of Gold in China' (Bulletin of the Numismatic Society of China, No.7; 1941)
The author’s reference to a Tibetan gold coin, minted between 1909 and 1911, is incorrect, since no Tibetan gold coins were struck before 1918. The illustrated coin is actually the modern 20 srang gold coin (p.13, with photo p.18, coin No.5).

KANN, E., 'Illustrated Catalogue of Chinese Coins' (Los Angeles; 1954)
Despite of some errors, Kann's work remains the basic catalogue for the Sino-Tibetan series.

KEMPF, F., 'Reading and Dating Tibet Coins' (World Coins, pp.392-394; 1968)
Tibet started using its own money in the late 1700s. At first there was only one denomination, the silver tangka, weighing roughly 5 grams. It was originally a Nepalese coin. In 1909, a decimal monetary system, consisting of skar, sho and srang, was introduced: ten skar equal one sho, ten sho equal one srang. A list of interpretations is added, enabling the collector to decipher the dates and legends on native Tibetan coins, which are fascinating once they are fully understood.

KEMPF, F., 'A Primary Report on Native Tibetan Coins' (Seattle-Washington; mimeograph, 14pp.; 1969)
Very useful information, now partly superseded by new findings.

A description of Sichuan rupees. The coin featuring the Emperor's bust without collar is the earliest issue, the piece with the 'large bust' is the latest item. Two varieties in the shape of the Chinese characters '4' are indicated. The crown size issue is a forgery. With illustrations.

A tangka and three modern issues are illustrated.

Three coins are described in some detail. However, the one that is similar in design to the gold piece is actually a silver trial-strike of a Chinese forgery of the 20 srang gold coin, dated 15-54. The second piece is a '2 tangka' (Yeom.15).

(American Numismatic Society Museum Notes, No.16, pp.185-188, pl.XXXVIII; 1970)
The first survey on the coins of Ladakh.

599 PANISH, C.K., 'Early Coinage of Bhutan'
(American Numismatic Society Museum Notes, No.17, pp.247-255, pl.XLXVII-XLVIII; 1971)
The first attempt to classify the series of coins of Bhutan and their prototypes, the coins of Cooch Behar.
A) NEPAL: The coinage of the Malla Dynasties forms a homogenous complex, spread over a period of about two centuries (1560-1796). With a single exception (a gold coin of Jaya Prakāśa Malla of Kathmandu, dated 1736) the Malla coinage is exclusively of silver. The basic coin was the ‘mohar’, struck for the first time by Mahendra Malla of Kathmandu (c.1550-1570) in imitation of the Moghul coinage. From this coin derives the name ‘mahendramalli’, by which the Nepalese mohar was known until Gurkha conquest. The fractions in common use were the half mohar (suki or suka) and the quarter mohar (sukica).

B) TIBET: According to an agreement between Mahendra Malla and the Tibetan authorities, his mohar became legal tender also in that region, for which a special type was struck. Later on, the privilege was extended to the mint of Bhatgaon, which gradually succeeded in obtaining the monopoly of the supply of coins for Tibet. In spite of the gradual reduction of the silver content in the mohar under the last Mallas, this system continued until the Gurkha conquest of 1769 and even much later. For the first three quarters of the 18th century, the mahendramalli was the only coin circulating in Tibet. When smaller fractions were required, the Nepalese mohar coin was divided into parts or fragments. The Chinese tael was in circulation particularly in the eastern regions.
609 RHODES, N.G., 'The Smallest Coins in the World'  
(Spink's Numismatic Circular, Vol.81, p.100; 1973)  
Report on a Nepalese coin called 'jawa' and weighing between 0.008 and 0.014 grams.

610 RHODES, N.G., 'India: The Coinage of Srinagar in Garhwal 1760-1815 A.D.'  
(Oriental Numismatic Society Info-Sheet, No.4)  
This article deals with the later issues of Garhwal with the mint name Srinagar. These issues also circulated freely in Western Tibet.

611 RHODES, N.G., 'The Coinage of Sikkim'  
(Oriental Numismatic Society Info-Sheet, No.8)  
A short historical introduction and list of three types with many varieties of the Sikkimese paisa. Drawings of four items.

612 RHODES, N.G., 'A Communist Chinese Restrike'  
(Spink's Numismatic Circular, Vol.83, pp.239-240; 1975)  
The Yuan Shih-Kai dollar was restruck by the Chinese Communists in the mid-1950s, primarily for circulation in Tibet. All coins examined were dated in the 3rd year of the Republic. One can distinguish the restrike from the normal coin by the character 'yuan' on the reverse, the top half of which is a closed triangle in the restrikes, whereas in the normal coins this triangle is left open. With illustrations.

613 RHODES, N.G., 'An Assamese-Tibetan Coin'  
A coin, unique in the Assamese series, is illustrated and described for the first time. It is of octagonal shape and bears Chinese characters on both sides, translated 'Tsang pao'. The date, in Bengali numerals, is 1570 Saka era (A.D. 1648). According to the author, this coin seems to be a solitary survivor of an ill-fated attempt at an Assamese-Tibetan coinage.

614 RHODES, N.G., 'An Unpublished Sino-Tibetan Date'  
(Bulletin Numismatics International, Vol.9, No.4, p.101; 1975)  
Drawings of two coins of very different styles, dated Ch'ien Lung Y.61 and recorded for the first time. This date is unexpected because the Chinese Emperor Ch'ien Lung only reigned for 60 years and abdicated on 6th February 1796. These Sino-Tibetan coins must have been struck in the weeks before the news of the abdication of Ch'ien Lung had reached Lhasa.

615 RHODES, N.G., 'The Coinage of Bhutan'  
(Oriental Numismatic Society Info-Sheet, No.16; 1977)  
After a short historical introduction the author divides the coinage in five periods. 44 coins are illustrated (drawings), with many varieties. This part serves as a catalogue.

616 RHODES, N.G., 'A Sino-Tibetan Rupee'  
(Spink's Numismatic Circular, Vol.85, pp.107-108; 1977)  
An extremely rare rupee with legends on both sides poorly written and difficult to interpret. The Chinese characters on the obverse are translated 'Lu Kuan Tsu Yin (?)' (Tachienlu Customs Enough Silver (?)); the Tibetan inscriptions on the reverse read 'nged gsum sho dar' (three sho of Tachienlu, genuine silver). The date of issue lies probably between 1890 and 1903. (On a forgery of this coin, cf. bibliographic entry No.545).

617 RHODES, N.G., 'Further Forgeries'  
(Oriental Numismatic Society Newsletter, No.51; 1977)  
A short note on a forgery of the Tibet '7 1/2 skar 15-43' (A.D. 1909, Yeom.11). It can be distinguished by one letter in the word below the lion which is written in a different way. Apart from this, the forgery is of good workmanship and could easily deceive.

618 RHODES, N.G., 'Sino-Tibetan Countermarks'  
(Oriental Numismatic Society Newsletter, No.53; 1978)
A rectangular countermark on a late Sichuan rupee in one Tibetan and two Chinese characters. The author gives some possible translations but the true meaning of this countermark remains a mystery.

619 RHODES, N.G., 'A Tibetan Forgery'
(Spink's Numismatic Circular, Vol.86, pp.364-365; 1978)
A Chinese forgery of the Tibetan 20 srang gold coin struck at Chengdu before 1949. Examples struck in silver and in copper and, possibly, in brass, also exist. The forgery and a genuine coin are illustrated.

620 RHODES, N.G., 'Tibetan Mints'
(Oriental Numismatic Society Info-Sheet, No.19; 1978)
Personal research enables the author to list ten mints established in Tibet during the last 150 years. These are: Dodpal, Giamda, Tip Arsenal, Dode, Mekyi, Ser-khang, Norbu Tsoki, Takpo, Tpchi and Dogu. Each mint is classed with different types of coins produced there, according to historical sources or statements made by the author. The report is completed with drawings of 15 coins and two maps illustrating the positions of the mints 'outside Lhasa' and 'in and around Lhasa', respectively.

621 RHODES, N.G., 'Copper Coins from Ladakh'
(Oriental Numismatic Society Newsletter, No.56; 1978)
Four types of the copper coins struck by Ranbir Singh for Ladakh are described.

622 RHODES, N.G., 'The Development of Currency in Tibet'
An exhaustive article on the currency, from barter of earliest days to the last coin - a Chinese restrike of the 1950s. With 16 drawings of historically important coins.

623 RHODES, N.G., 'The Gaden Thanka'
This is the best substantiated work on the Gaden tangka to date. The author's comments on the secret marks on the tangkas, probably introduced partly as a method of detecting forgeries and partly to identify the date of issue and the official responsible for the mint, are most interesting.

624 RHODES, N.G., 'The Silver Coinages of Garhwal and Ladakh, 1686-1871'
The Garhwal timashas circulated in Western Tibet during the 17th and 18th centuries. Around 1771, Ladakh introduced its own coin called 'ja'u', primarily struck for circulation in Western Tibet. Few ja'u were struck after 1857, but they remained in circulation well into the 20th century, although their origin was not always understood. Later visitors to Western Tibet erroneously referred to the Ladakh ja'u (or timasha) as a Tibetan coin.

625 RHODES, N.G., 'A Hoard of Ladakhi Ja'u'
(Numismatic Chronicle, Vol.142, pp.164-165, pl.42; 1982)
A hoard of 67 coins, including one previously unknown type, is described.
(Cf. bibliographic entry No.624).

626 RHODES, N.G. and GABRISCH, K., 'Two Sino-Tibetan Coins'
(Spink's Numismatic Circular, Vol.88, No.5, p.172; 1980)
An illustrated article on two interesting Sino-Tibetan coins that have never been fully recorded before: 1) a unique '1/2 Qian' of Qian Long Y.57 (A.D. 1792). The Tibetan inscription
'Bo-kyi Rin-po-che' means 'Tibetan Rimpocbe'. 2) 'J Qian' of Jia Qing Y.6 (A.D. 1801) with Tibetan, Chinese and Manchu inscription, fully translated by the authors.

627 RHODES, N.G. and PANISH, C.K., 'Nicholas Rhodes' System of Classification of the Tibetan Tangka Yeoman-13' (Mimeograph, n.d.)
A first attempt of a classification of the Tibetan tangka, now superseded by N.G. Rhodes' paper previously mentioned.

628 RHODES, N.G. and VALDETTARO, C., 'Coins in Medieval Nepal' (Numismatic Chronicle, 7th Ser., Vol.16, pp.158-166, pl.35; 1976)
For the first time, the authors attribute some silver and gold coins to a King Sivadeva (1098-1126 A.D.), a ruler in medieval Nepal. The coins are illustrated.

After the conquest of Ladakh the Dogra rulers coined also for Ladakh. The Ladakhi coins were current in Western Tibet, too. All coins are illustrated and their legends explained.

633 RONGE, V., 'Das tibetische Handwerkertum vor 1959' (Wiesbaden; 1978)
The authoress provides details of the cost of wages in Tibet. Her listing gives a good idea of the value of local currency within Tibet (p.141).

634 RUDKO, P.J., 'An Introduction to the Dating of the Modern Coinage of Tibet' (India Asiatic Numismatic Society, Vol.2, No.1, p.78; 1973)

636 SCHLOSSER, R., 'Chinas Münzen' (Werl: Franziskus Druckerei; 1935)
German text. Some remarks on Tangut coins (pp.93-94) with drawings of two coins with Tangut characters and a photo (No.119 on pl.19) of the coin T'ien Shen Yuan Pao.

637 SEMANS, S., 'The Gaden Tangka of Tibet' (Cleveland, Info-Sheet No.11; n.d.)
The author gives his personal classification of the Tibetan Gaden tangka.
638 SEMANS, S., 'Some more Forgeries'  
(Oriental Numismatic Society Newsletter, No.50; Aug. 1977)  
A forgery of the Tibetan '1/2 skar' (Y-A19), dated 15-55, is currently coming from India. It is easy to detect, as the figures '1' and '5' of 15 are connected and the tail of the '5' is split. The style of this forgery is generally wrong.

639 SHRESTHA, B.N., 'Varieties of Kong-Par Tangkas'  
(Mimeograph; 3pp.; n.d.)  
A table of 50 varieties is given.

640 SHRESTHA, B.N., 'Coinage of Yoganarendra Malla to Indra Malla of Patan'  
(Journal of the Numismatic Society of India, Vol.33, pp.93-113, pl.1-IV; 1971)  
Description of 41 coins, in part unrecorded, of Yoganarendra Malla, Lokaparaksha Malla and Indra Malla. All coins are illustrated.

641 STRAUCH, F., 'Chinesische Rupien mit dem Bildnis des Kaisers Kwang hsü'  
(Berliner Münzblätter, pp.323-324; 1906)  
German text. A very early record of the issue of the Sichuan rupee and its smaller fractions, with notes on the historical background.

642 SO, T.K., 'Illustrated Catalog of Chinese Coins'  
(Taiwan; 1975)  
Chinese text, with drawings only. Coins relating to Tibet are listed under the following numbers: gold coins, Nos.3-4, 26; silver coins, Nos.274-277, 512-544; copper coins, Nos. 314, 521-535. The coins Nos.539 and 541 are actually Nepalese, not Tibetan. (Cf. bibliographic entry No.562).

643 SWAMI PRANAVANANDA, 'Exploration in Tibet'  
(Calcutta; 1950)  
An interesting remark that a half tanga called jav is also current in Western Tibet (p.130). The 'jav' is actually the ja' u or timasha of Ladakh, presumably minted for the benefit of the wool trade between Western Tibet and Kashmir, via Ladakh.

644 T'ANG YU-K'UN HSI-YUAN of Shanying, 'Chih Ch'ien T'ung k'ao' ('A Study of One Cash Pieces')  
(Privately published in 1852. Reprinted c.1972)  
There is an interesting note on some Sino-Tibetan copper coins. It is not clear whether the illustrations are taken from actual coins or whether they are merely 'artistic impressions' - and hence totally imaginary.

645 THAPA, D.P., 'A Handbook on Coins of Nepal'  
(Kathmandu: Ratna Pustak Bhandar; in print)  
Announced by the publisher.

646 TERRIEN DE LACOUPERIE, A., 'The Silver Coinage of Tibet'  
(Numismatic Chronicle, Ser.3, pp.340-353, pl.XV; 1881)  
One of the classical reports on the early history of currency in Tibet. The author describes the mintage of the Malla kings of Nepal on behalf of Tibet, and the Sino-Tibetan issues. There are some errors, discovered and corrected by later writers in newer publications. Sixteen coins are illustrated.

647 THWING, E.W., 'Tibet, New or Recent Issues'  
(The Numismatist, Vol.45, No.7, p.452; Jul. 1932)  
A short description of a 'e tram-sang' coin. The obverse shows a lion in a circle, the reverse bears the date 15-43 (A.D. 1909). This is actually the 'tam srang gang', called 'sranggor' by the Tibetans, the 1 srang coin classified as Y-12.
TONG-YUAN, LI. 'Hsi-tsang yu pi kao' ('A Study of Tibetan Stamps and Currency')
(Taipei; 228pp.; 1959)
Chinese text. A detailed description of Nepalese and Chinese issues on behalf of Tibet
(mainly based on Kann's catalogue) and coins of autonomous Tibet. The author mentions a unique coin, perhaps a pattern, of Jia Qing, held by the Chinese National Museum at Taipei. It is a Sino-Tibetan issue well defined as a coin for cutting, diam. 34-38 mm, thickness 1 mm
(photo 34 on p.48). Very detailed information on the mintage of the Sichuan rupee and on the rate of exchange, between Chinese and Tibetan money at the Chinese border, in the 1930s. A short chapter on notes includes different Chinese issues with overprints in Tibetan script and bank notes of autonomous Tibet. (Cf. bibliographic entry No.204).

(Cf. bibliographic entry under 'CYBIKOV, G.C. ')

TURK, F.A., 'The Tangut Inscriptions of the Hsi Hsia Coinage'
(Spink's Numismatic Circular, Vol.81. pp.3-5; 1973)
The author discusses certain characteristics of the Tangut script which are particularly difficult to decipher on coins, and illustrates the Tangut inscriptions on seven coins of Hsi Hsia.

VALDETTARO, C., 'A Double-Mohar of Sivasimha Malla of Kathmandu'
This coin is recorded for the first time. It is an early example of Nepalese coins of which only few have been adequately recorded so far. With photo.

VALDETTARO, C., 'A Mohar of Jaya Jitamitra of Bhatgaon'
The author records a silver coin of this ruler dated Samvat 783, Chaitra sudi 9. This coin shows that the ruler's coronation took place in 1662 and not in 1672 as stated by Regmi ('Medieval Nepal', Calcutta, 1966).

VILLARET, E DE and CODRINGTON, O., 'On some Silver Coins of Tibet'
(Spink's Numismatic Circular, Vol.3. pp.1052-1056; 1895)
Drawings of five coins and a reprint of the paper by Terrien de Lacouperie.

WADDELL, L.A., 'Lhasa and its Mysteries'
(London; 1905)
The trade in Tibet is chiefly by exchange and barter, bricks of tea often being used instead of money. Money, however, is also current and is coined by the Tibetans at their mint at Lhasa. Like its Nepalese prototype, the tangka is cut into halves, thirds or quarters, to form coins of smaller denominations.

WAGEL, S.R., 'Chinese Currency and Banking'
(Shanghai; 457pp.; 1915)
1,072,865 Tibetan coins were minted in Chengtu during 1911 (pp-126-127).

WALSH, E.H., 'The Coinage of Tibet'
(Memoirs of the Asiatic Society of Bengal, Vol.2, No.2, pp.11-23, 2pl.; 1907)
The first work on earlier Tibetan currency, unfortunately containing errors which diminish its value for reference purposes. 29 Chinese and Nepalese issues for Tibet are illustrated.

WALSH, E.H., 'The Coinage of Nepal'
The fundamental work on the Nepalese coinage and, therefore, also on the Tibetan coinage for the 18th century. Unfortunately, Walsh's unfamiliarity with the old Newari numbering system led him to commit a considerable number of errors in reading the dates of the coins.
His errors were often copied by later writers.

657 WALSH, E.H., 'The Coinage of Nepal: Supplementary'  
(Journal of the Royal Asiatic Society of Great Britain and Ireland, Vol.40, pp.1132-1136; 1908)  
A supplement to the previous work.

658 WOOD, H., 'Some Remarks on a Series of Coins Issued in China, Based on the British-India Rupee'  
(American Journal of Numismatics, Vol.41, pp.29-31; 1906)  
The three issues are approximately five grains lighter than the Indian Victoria rupees. On the reverse they bear the inscription 'Sze Chuan seng tsao' (minted in the Province of Szechuan). With illustrations.

659 WOOD, H., 'The Coinage of Tibet'  
An excellent article on the monetary history of Tibet. According to Chinese sources, in former times Cowries and knife-shaped coins were current in Tibet. Silver has been known as a medium of exchange since the 12th century. Later, the minting of coins took place in three periods: Nepalese issues on behalf of Tibet, Sino-Tibetan coins and native Tibetan issues. With illustrations.

660 WOOD, H., 'Tibet, New or Recent Issues'  
The Indian rupee minted in dollar-size (as Tibet-Tael) is a fantasy.

(Numismatic Chronicle, 7th Ser., Vol.16, pp.169-200; 1976)  
The first general circulation of the Sichuan rupee was recorded at Chungking in November, 1902. It was not an immediate success. Thereafter, the daily output of the mint averaged about 5,000 dragon coins a day, with the addition of Szechuan rupees, from 1903 (p.191).

662 WRIGHT, R.N.J., 'The Szechuen Rupee'  
(Coins and Medals, pp.35-36; 1976)  
The author gives important details on the Sichuan rupee. There are two main types: 1) Bust of the Emperor Kuang Hsu, without collar (obverse), horizontal rosette (reverse). This issue, produced in 1903 (or late 1902), was regarded in Western China as being the best. 2) Bust with collar; vertical rosette. Mules of the two main types exist, but they are rare. During the republican period, a rupee with a crude 'large head' and inferior silver content, appeared at Tachienlu.

663 WYLIE, A., 'Coins of the Ta-Tsing or Present Dynasty of China'  
(Journal of Shanghai Literary and Scientific Society, No.1, pp.44-102; 1858)  
The mint at Lhasa was established in 1792 (p.71).
B) PAPER MONEY

THE GREAT OFFICIAL SEAL OF THE PANCHEN LAMAS
ANON., 'Tibetan Bank Notes'
(The Numismatist, Vol.55, p.27; 1942)
I have not seen this article.

ANON., 'Lama-Ruled Tibet Issued Exotic Notes'
(World Coins, Vol.4, p.480; Jun. 1967)
A short note on Tibetan paper money. During 1930-36, Central Bank of China notes in yuan denominations were overprinted with a single-line Tibetan inscription meaning 'Tibetan Currency Medium'. The author's statement that Tibet used bank notes from about 1889, is wrong: The first notes were issued by the Tibetan Government in T.E. 1658 (A.D. 1912).

ANON., 'Discovery of the Yuan Dynasty Paper Money'
(Tibetan Autonomous Region; Cultural Relics Supervision Committee; Wen Wu, No.9, pp.32-34; 1975)
Chinese text. This article describes two banknotes of the Yuan dynasty which were found in the Sakya monastery, southwest of Shigatse, Tibet. One note is from the time of Kublai Khan and bears the reign title 'Chung T'ung' (A.D. 1260-1263), and the other is of Shun Ti with the Nien Hao 'Chih Cheng' (A.D. 1341-1367). The Sakya monastery is the centre of the Sakya sect of Lamaism and it is through this sect that the Yuan dynasty managed to control Tibet. This is the possible explanation for Yuan paper money being found in this place. It is doubtful whether it ever circulated as currency in Tibet itself.

BELL, SIR CHARLES, 'Portrait of the Dalai Lama'
(London; 1946)
Treasury notes of five, ten, fifteen, twenty-five and fifty trangkas, respectively, are in use, the issues of these notes having commenced in 1914 (p.162).
(Cf. bibliographic entry under 'Coins').

GABRISCH, K., 'An Unknown Date of the Tibetan 10 Srang Note'
(Spink's Numismatic Circular, Vol.86, p.189; 1978)
The date T.E. 1690 (A.D. 1944) is recorded for the first time.

KLAASESZ, P.F., 'Tibet. Part I - Paper Money'
Description of four notes: 15 tam, 25 tam, 50 tam blue and 50 tam yellow.
In 1923 the following notes were current in Tibet: Indian 10 rupees, Tibetan 10, 15 and 25 trang-ka. 1 Indian rupee equalled 6 trang-kas.

In 1930 false 50 Tam notes were discovered. The mint decided to inspect systematically all notes of this value in circulation. Inspection was certified by the placing of a second seal on the genuine note. The author incorrectly converts the Tibetan Era on the notes by adding 253 years (i.e. T.E. 1677 + 253 = A.D. 1930) instead of 254 years.

Currently the basic work on Tibetan paper money.

According to the writer, the Tibetan Government introduced paper currency in 1890. All notes and coins bore the Government lion seal and date of issue. Government-held reserves backed the currency notes (pp.10-11). The author's statement is not correct, as the first Tibetan notes were issued in 1912.

Chinese issues for Tibet: a) Central Bank of China (with overprints in Tibetan): C500-95, -98, -102, -103, -104. b) Sikang Provincial Bank (with Tibetan inscription): H75-1, -10. c) Mongolian-Tibetan Bank or Great Northwestern Bank (intended for Tibet): M14-1, -3, 10/12. (Cf. bibliographic entry under 'Catalogues').
C) MEDALS

THE SEAL OF THE TIBET FRONTIER COMMISSION, 1903
The military escort of the British Mission to Lhasa consisted of four companies of the Royal Fusiliers and two Maxim crews from the Norfolk regiment and the Royal Irish Rifles.

The full story of the British Mission to Lhasa, 1903-04. The Tibet Medal in silver was to be given to all who took part in the Mission or were with the escort. One bar 'Gyantse' was given to all those who participated in the actions in that area between 3rd May and 6th July, 1904. The medals were named around the edge in neat 'running script'. Bronze medals, with or without the Gyantse bar, were given to native carriers and porters who accompanied the Mission and are usually named 'S. & T.' (Supply and Transport) Corps.

SIGLER, O.P., 'Brick Tea Money'  
(The Numismatic Scrapbook Magazine, Vol.16, No.1, pp.81-85; 1950)  
The author discusses the size of tea bricks, weight, grades of tea used, machinery involved, processes, manufacturers, marketing and costs. The business flourished especially from 1875 to 1900. First in Mongolia, later in Tibet, the bricks assumed a value and were used in trade (at one time five tea bricks were equal to one ounce of silver). In the 1920s Russia became the principal importer though for food rather than as a medium of exchange. Since 1935 the business has noticeably declined.

WITHAM, P.E., 'China Tea and the Trade Routes'  
(Royal Central Asian Society, pp.150-162, 1947)
The author gives important details on the tea trade: 'Today brick tea goes principally to Tibet, Sinkiang and Manchuria; 1901 appears to have been the peak of brick-tea production. There was a big trade between China and Russia, but the Russian Revolution in 1917 killed that trade. It is interesting to note that even to this day brick tea serves as a form of currency in Sinkiang and Mongolia. A caravan can be paid for in brick tea instead of in dollars.'
