OOJ.

OOJAL.—A river of Kattywar, rising in lat. 21° 31', long. 70° 51', and flowing in a circuitous, but generally westerly direction, for 75 miles, falls into the Bheder river, near the town of Nurvee Bunder, in lat. 21° 27', long. 69° 59'.

OOJEANEE, in the British district of Etawah, lieutenant-governorship of the North-West Provinces, a town on the route from Calpee to the cantonment of Etawa, and 172 miles S.E. of the latter. The road in this part of the route is indifferent, the country level and cultivated. Lat. 26° 38', long. 79° 17'.

OOJEIN, in the territory of Gwalior, or possessions of the Scindia family, a city on the right bank of the river Seepra. It is of oblong outline, six miles in circumference, surrounded by a stone wall with round towers. Though there is some waste ground within this inclosure, much the greater part is densely populated. The houses, which are much crowded together, are some of brick, some of wood; but in the construction of the former, a frame-work of wood is first made, and the intervals then filled up with bricks. They are covered either with tiles or lime terraces. The principal bazar is a spacious street, with houses of two stories; the lower of which is built of stone, and occupied by shops; the upper, of brick or wood, furnishes the habitation of the owner and his family. There are four

OOJEIN.

mosques, and a great number of Hindoo temples. The city is well supplied with water both from the river and from two large tanks, one of which is very handsome. The head of the Scindia family has a palace here, spacious and commodious, but with little of exterior magnificence. Near it is an antique gate, said to have originally belonged to a fort built by Vikramaditya, whose reign is placed by chronologists more than half a century prior to the commencement of the Christian era. At the southern extremity of the town is an observatory, constructed by Jai Singh, the scientific rajah of Jaipoor or Amber, and minister of Mahomed Shah, emperor of Delhi, who reigned from 1719 to 1748. "Oojein," says a recent observer; "is surrounded on every side but the south with an almost uninterrupted belt of groves and gardens. Their names, had I room for them, would be a history of the place and of its manners. On one side lies the garden of Dowlut-Rao, on the other that of his carpenter; here is the garden of Rajah Mal, whose name has outlived his history; while near, and in contrast to it, is another, which, but a few days ago, gloried in the name of the Baizi Bai, now publishes, by a change of title, the fickleness of fortune. The Maharaj Bagh (Dowlut-Rao's) was formerly the pride of five proprietors; but the modern Ahab coveted his neighbour's vineyard, out of five small gardens made a large one, and deprived the owners of the inheritance of their fathers. The best of the gardens seem to have been planted by Mussulmans, who, we learn from Baber, introduced the fashion into India." About a mile to the north of the present city are the ruins of the ancient capital of Malwa, which, according to Brahminical tradition, connected with a ridiculous fable, was overwhelmed by a shower of earth poured down upon it as a divinely-inflicted punishment. On the cause of the destruction of the ancient city, different opinions have been advanced. It has been suggested that an inundation of the river might have produced the disastrous effect; and the suggestion is countenanced by the fact, that in modern times the river has been known to overflow a great part of the present town, and cause much damage, notwithstanding the shortness of its course, and its comparatively inconsiderable volume of water. Another conjecture has ascribed the catastrophe to an earthquake; but the alleged
soundness of the walls is presumed to offer an obstacle to the reception of this view. A third hypothesis assigns as the cause, the operation of a violent wind, carrying with it showers of loose earth or sand. To this, however, the nature of the soil seems opposed. The first of these conjectures is embraced by Malcolm, the last by Hunter. Other writers, however, consider that no extraordinary cause is required to account for the state of the ancient city, which, as they believe, presents only the usual appearances of ruined walls throughout Hindostan; the earth, which in some instances is found to cover fragments of masonry, being but the accumulation of the rubbish from other buildings in different stages of decay.

Five miles north of the city, the river separates into two channels, and surrounds an oval-shaped rocky eminence, crowned by a palace never finished, and now in a state of ruin, though, from the excellence of the materials used in its construction, its decay is far less rapid than might be looked for. It is believed to have been erected on the site, and with the materials, of an ancient Hindoo temple. The island was connected with the left bank of the river by two bridges; one of which has been nearly swept away; the other is little, if at all, impaired. Close to this latter bridge are some curious works, by which the stream has been diverted to purposes of pleasure and ornament. The vicinity of these works is adorned by an arcade, and a walled inclosure at a short distance is suspected to have been once a garden.

The principal trade of Oojein is in cotton fabrics, the wares of Europe and China, imported by way of Surat, pearls, diamonds, and especially opium, the growth of the surrounding country.

Oojein is one of the seven sacred cities of the Hindoos, and the first meridian of their geographers. It appears to be mentioned by Ptolemy under the name of Ozoana. Its period of chief grandeur has been supposed to date from the era of Vikramajit; but previously, it is believed to have been

* Those who wish for information in regard to the superstitions connected with the place, may consult the lively paper, by Lieut. Edward Conolly, in the Journal of the Asiatic Society of Bengal, 1837, page 813, already referred to.

† Not Ozene, as it is given by Danville, and copied by Rennell, Hamilton, and others.
OOJHANEE.

populous and wealthy. According to the Mahawanso, a Ceylonese record, Piyadaso, or Asoka, or Dhanmasoko, grandson of the renowned Chandragupta, was in the year B.C. 325 viceroy of Oojein, being sent thither, as into honourable banishment, by his father Bindusaro, king of Patilipura or Patna, who dreaded his sanguinary and turbulent disposition. The same document states, “that B.C. 157 the Buddhist high-priest Dhammarahkito took with him 40,000 disciples from the Dakhninagiri temple at Oojein to Ceylon, to assist in laying the foundation-stone of the great temple at Anuradhapura.” Later, Vikramaditya, or Vikramajit, king of Oojein, was so renowned, that the Samvat era, 57 B.C., universally used throughout Hindostan to this day, dates from the commencement of his reign. His son Chandrasen is represented to have possessed himself of all Hindostan. At the commencement of the eleventh century, when Mahmud of Ghuznee invaded India, Oojein was the seat of an independent rajah ruling Malwa. It appears to have fallen into the hands of the Mussulmans in the year 1310; and after the assumption of independence in 1387 by the Dilawar Ghori, the viceroy of the Patan sovereign of Delhi, the seat of the government of Malwa was transferred first to Dhar, and subsequently to Mandu. In 1561 it was with the rest of Malwa subjugated by Akbar. It fell into the hands of the Mahrattas about the middle of the last century, and was regarded as the capital of Scindia’s possessions, until Doulut Rao, in 1810, fixed his residence at Gwalior. Oojein, with its annexed lands, was assessed at 1,40,000 rupees annually to Scindia’s government; but by a recent arrangement, the town and territory have been assigned to the Baiza Bace, formerly regent of Gwalior, at the same annual rent. Elevation above the sea 1,698 feet. The city is sometimes called Avanti and Visala. Distance S.W. from Goonah 152 miles, from Gwalior 260, S.W. from Allahabad, by Sauger, 598. Lat. 23° 10’, long. 75° 47’.

OOJHANEE, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a town on the

* The diffuse and obscure Puranic lore respecting Vikramaditya, may be consulted in Wilford, As. Res. viii. 268, 269; ix. 117—241; x. 41—209.
route from Budaon to Allyghurh, eight miles W. by S. of the former. Population 6,361.  
OOJKE CHOKEE, in the British district of Mirzapoor, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Benares to that of Allahabad, 42 miles W. of the former, 33 S.E. of the latter. Water can be obtained but from one well; but within a mile of the village is a jhil or pond, where it may always be had. The road in this part of the route is excellent; the country low, level, and partially cultivated. Lat. 26° 19', long. 82° 25'.

OOKEE MUTH, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village having a Hindoo temple, and lying on the route from Srinagar to Kedarnath Temple, 18 miles S. of the latter. It is situated on an eminence of gneiss rock, on the left bank of the Mandakini, here crossed by a jhula or rope bridge. Elevation above the sea, of the temple, 4,339 feet; of the jhula, 3,464. Lat. 30° 31', long. 79° 8'.

OOKLEE.—A town in the British district of Sholapoor, presidency of Bombay, 66 miles S. of Sholapoor. Lat. 16° 42', long. 75° 56'.

OOLAH.—A town in the native state of Hyderabad, or the Nizam's dominions, 129 miles N.N.W. from Hyderabad, and 144 miles S. by E. from Ellichpoor. Lat. 19° 10', long. 78° 9'.

OOLAUL.—A town in the British district of South Canara, presidency of Madras, three miles S. of Mangalore. Lat. 12° 50', long. 74° 54'.

OOLoor.—A town in the native state of Travancore, 55 miles N.W. by W. from Cape Comorin, and five miles N.W. by N. from Trivandrum. Lat. 8° 32', long. 76° 58'.

OOWLTEE, a river of Guzerat, rises in lat. 22° 13', long. 71° 33', and, flowing in an easterly direction through the British district of Ahmedabad for fifty miles, falls into the Gulf of Cambay, in lat. 21° 58', long. 72° 14'.

OOLPAR, in the British district of Surat, presidency of Bombay, a town situate on a small river, which, eight miles farther west, falls into the Gulf of Cambay. Population 3,500. Distance N. from Surat 12 miles. Lat. 21° 17', long. 72° 47'.

OOMDEE.—A town in the British province of Sattara,
presidency of Bombay, 108 miles E. by S. of Sattara. Lat. 17° 14', long. 75° 39'.

OOMERKOTE.—See Omercote.

OOMNEE.—A town in the native state of Oude, 126 miles N. from Lucknow, and 60 miles E. from Pillieebheet. Lat. 28° 40', long. 80° 51'.

OOMRAIR,¹ in the recently lapsed territory of Nagpore, a town on the right bank of the river Amb, a tributary of the Weingunga. Iron-ore² is found in its vicinity. Distance from the city of Nagpore, S.E., 24 miles. Lat. 20° 50', long. 79° 22'.

OOMRAIT.—A town in the recently escheated territory of Nagpore or Berar, situate 72 miles N.N.W. from Nagpore, and 56 miles E.N.E. from Baitool. Lat. 22° 7', long. 78° 45'.

OOMRAWAH, in the British district of Shahjahanpoor, lieutenant-governorship of the North-West Provinces, a village on the route from Futttehgurh to the cantonment of Shahjahanpoor, and 16 miles S.W. of the latter. The road in this part of the route is indifferent; the country level, open, and partially cultivated. Lat. 27° 46', long. 79° 50'.

OOMRAWUTTEE.—A town situate on the route from Nagpore to Aurungabad, and in one of the districts of Hyderabad which has been recently transferred to the British government. It is a place of great commercial importance; several considerable firms are established here, and most of the influential merchants of Upper India, as well as those of Bombay of any note, have either correspondents or branch houses at this place. The subordinates of some of these firms spread themselves over the cotton-growing districts, and make advances to the cultivators, or assist them in paying their kists, on the agreement that the produce shall be at the disposal of their employer. When the crop is ready for picking, the cultivator for the most part has nothing farther to do with it, the speculating capitalists being apprehensive that if the cultivator were permitted to gather it, much would be purloined by him. When picked, it is transferred to Oomrawuttee, where are large warehouses appropriated to its reception, and where it is cleaned and repacked for exportation, either from Bombay or from Calcutta. The capricious and oppressive transit-duties levied in the Nizam's territories, in which Oomrawuttee was situate, formerly rendered the transport to either place both

Garden, Tables of Routes, 177.
oomrawuttee.

expensive and uncertain; and it required very considerable care
and skill in the management of the journey to effect it other-
wise than at a ruinous rate. The duties on the various roads
were let to contractors; and an association of persons at
oomrawuttee, called hoondakurs, annually sent out messengers
to those holding the contracts for the various roads, to ascer-
tain the terms on which merchandise could be passed. This
was not a matter of easy arrangement, the country being
parcellled out into small districts, and the revenue farmed to
various persons. If the terms demanded by one contractor
appeared extravagant, the applicant had recourse to another;
and one consequence was, that, instead of proceeding by the
best and most direct route, the cotton was often carried by a
circuitous one, to the great injury of the article, from protracted
exposure to the weather, and to other deteriorating influences.
But even when the demands of the government claimants were
settled, the arrangement was not completed; for if the com-
modities in transit had to pass through any jaghire villages
(and jaghires are in many parts numerous), duty was to be paid
to the jaghiredar, in addition to the amount levied in the name
of the government. If indeed it were thought desirable to
embarrass the operations of commerce, and discourage the
interchange of commodities, a more effective mode of accompl-
ishing these objects could scarcely be devised than the system
of transit-duties adopted in the territories of the Nizam.
The hoondakurs having at length selected a route, and arranged
the terms of transit with the various claimants of toll thereon,
were in a condition to enter into engagements with the holders
of merchandise for passing it to the required point. The
brinjarries or carriers were bound to take the road prescribed
by the hoondakurs, because the arrangements made in regard
to the transit-duties applied to no other. For this reason
probably, among others, the brinjarries invariably refused to
make any engagement as to time, being compelled to follow
routes which would not have been chosen but for the absurd
and mischievous fiscal arrangements which prevailed. From
this cause, bad roads were often preferred to good ones, and
routes which greatly diverge from the direct course to such as
follow it. The advantages of oomrawuttee as an entrepôt for
cotton, and the facilities of the districts within a moderate dis-
tance for producing that article, may be estimated from the fact that, in the teeth of all the impediments which tended so greatly to check and cripple the operations of the trade, it still flourished. A single merchant, in the season of 1842, despatched 100,000 bullock-loads to Calcutta. Roads have been spoken of as forming the great essential for fully developing the cotton-producing powers of India. To a great extent this view is just; and Oomrawuttee has considerable advantages in this respect, a large portion of the lines both to Calcutta and Bombay being of the best description; but as was observed by a witness before a committee of the House of Commons in 1848, "unless you do away with your transit-duties, your roads are of no use whatever." Happily, as to Oomrawuttee, these mistaken and ruinous imposts no longer intercept the progress of commerce. This place being within one of the districts recently ceded by the Nizam to the British government in satisfaction of arrears of subsidy, it now partakes of all the advantages enjoyed by the dominions of that government in India, and among them, that of freedom from the baleful effects of transit-duties. Distance from Aurungabad, N.E., 170 miles; from Nagpore, W., 90; from Bombay, N.E., 350; from Hyderabad, N., 245. Lat. 20° 50', long. 77° 40'.

1 E.I.C. Ms. Doc.

OOMREE,¹ in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by Rajapoor ferry from the cantonment of Allahabad to Banda, and nine2 miles W. of the former. The road in this part of the route is bad, the country level and well cultivated. Lat. 25° 27', long. 81° 48'.

2 Garden, Tables of Route, 49.

1 E.I.C. Ms. Doc.

OOMREIT.—A town in the British district of Kaira, presidency of Bombay, 32 miles E. by S. of Kaira. Lat. 22° 40', long. 73° 10'.

1 E.I.C. Ms. Doc.

OOMROWREE,¹ in the British district of Futtehpore, lieutenant-governorship of the North-West Provinces, a village on the route from Cawnpore to Futtehpore, and 14 miles2 N.W. of the latter. The road in this part of the route is indifferent, the country level and partially cultivated. Lat. 26° 3', long. 80° 43'.

2 Garden, Tables of Route, 81.

1 E.I.C. Ms. Doc.

OOMUREE,¹ in the British district of Mynpooree, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Etawah, and 283 miles
OOM—OON.

N.W. of the latter. The road in this part of the route is good; the country cultivated, and studded with small villages. Lat. 27° 4', long. 78° 44'.

OOMURGURH, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a small town on the route from the cantonment of Allygurh to that of Etawah, and 44 miles S.E. of the former. It has a market, and is supplied with water from wells. The surrounding country is open, with a clayey soil, well cultivated. Lat. 27° 22', long. 78° 25'.

OOMURKEIR.—A town in the native state of Hyderabad, or the Nizam's dominions, situate on the left bank of the Payne Gunga river, and 161 miles N.N.W. from Hyderabad. Lat. 19° 33', long. 77° 45'.

OONA.—A town in the peninsula of Kattywar, province of Guzerat, situate 102 miles S. from Rajkote, and 96 miles S.E. by E. from Poorbunder. Lat. 20° 50', long. 71° 2'.

OONCHADEH, 1 in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 28 2 miles S.E. of the former. The road in this part of the route is rather good; the country level, well cultivated, and studded with small villages. Lat. 25° 14', long. 82° 12'.

OONCHADEH, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on the route from Allahabad to Palamow, 38 miles S.E. of the former. Lat. 25° 1', long. 82° 17'.

OONCHOD.—A town in the native state of Gwalior, or territory of Scindia's family, situate 52 miles S.E. by E. from Oojeein, and 71 miles S.W. by W. from Bhopal. The united pargunnahs of Sonkach and of Oonchod, yielding 1 an annual revenue of 90,000 rupees, were, by the treaty of Gwalior in 1844, placed under British management, and allocated for the maintenance of the augmented Gwalior contingent. Lat. 22° 44', long. 76° 28'.

OONDA.—A town in the British district of Bancoora, presidency of Bengal, 87 miles N.W. by W. of Calcutta. Lat. 23° 7', long. 87° 14'.

OONDRACONDAH.—A town in the native state of Hyderabad, or the Nizam's dominions, 82 miles E. by S. from
Hyderabad, and 75 miles N.W. from Guntoor. Lat. 17° 5', long. 79° 44'.

OOND SURVEYA, in the peninsula of Kattywar, province of Guzerat, a small prant or district. It is bounded on the west by the prant of Kattywar, and on all other sides by that of Gohilwar; lies between lat. 21° 18'—21° 30', long. 71° 38'—71° 55'; is twenty-six miles in length from north-east to south-west, and thirteen in extreme breadth. No official return has been made of the area, but, according to a probable approximation, it may be stated at 174 square miles. It is a level, low district, extending on each side of the river Setronjee, and on the north side of the Wullak hills, and contains fifty-three villages, and a population of 11,373 persons, and held chiefly by Rajpoots. They pay collectively a tribute of 12,878 rupees annually to the Guicowar.

OONDURGAON.—A town in the British district of Sholapoor, presidency of Bombay, 32 miles N.W. of Sholapoor. Lat. 18° 1', long. 75° 39'.

OONDWA NULLAH, in the British district of Bhagulpoor, presidency of Bengal, a small stream, discharging itself into the Ganges on the right side. It drains an extensive jhil or shallow lake, becoming a morass during the dry season, and in the periodical rains having a great body of water. It gives name to a village with an antique fort, to which, in 1763, the army of Meer Cossim Ali, subahdar of Bengal, then engaged in hostilities with the East-India Company, fled, after being defeated in a general engagement near Sootee. On the intrenchments were mounted about 100 pieces of artillery, and they were manned by a force estimated at 60,000 men. It was, however, taken by the British in September, by a night attack from two different points; one of these movements being intended to divert the attention of the enemy from the other, which, it is stated, was undertaken upon the information of a soldier, who, having deserted from the British army to that of Meer Cossim, had become tired of the latter service, and made his peace with his former employers by affording this assistance. The slaughter of the garrison is represented as great; the surprise having rendered them incapable of defending themselves with effect, though the number of the assailants did not exceed 3,000 men of all arms. Oondwa Nullah is on
the route from Burhampoor to Rajmahal, 70 miles S. of the
former, eight S. of latter, 188 N. of Calcutta, by Burhampoor.
Lat. 24° 58', long. 87° 53'.

OONIARA, in the Rajpoot state of Jeypore, a considerable
town, the principal place of the small raj or state held by a
junior branch of the reigning family of Jeypore. The rajah
resides here, in a fort of masonry. The town is surrounded
by a wall, with ditch. Distant S. of Jeypore 70 miles. Lat.
25° 55', long. 76° 10'.

OONTAREE.—A town in the British district of Palamow,
presidency of Bengal, 45 miles N.W. of Palamow. Lat. 24° 16',
long. 83° 30'.

ONYENEEL, in the British district of Bareilly, division of
Pilleebheet, lieutenant-governorship of the North-West Pro-
vinces, a village on the left bank of the Bhagul river, on the
route from the town of Pilleebheet to Nugeena, and 15 miles
N.W. of the former. Lat. 28° 46', long. 79° 41'.

OOPIN UNGADY.—A town in the British district of
South Canara, presidency of Madras, 80 miles E. of Mangalore.
Lat. 12° 50', long. 75° 20'.

OOPLANA.—A town in the British district of Hydrabad,
in the province of Scinde, presidency of Bombay, 66 miles
S.S.W. of Hydrabad. Lat. 24° 30', long. 68° 5'.

OORAGHUM.—A town in the native state of Cochin, pre-
sidency of Madras, 83 miles N. from Cochin, and nine miles S.
from Trichoor. Lat. 10° 26', long. 76° 17'.

OORALWADA.—A town in the British district of Cud-
dapah, presidency of Madras, 52 miles N. of Cuddapah. Lat.
15° 14', long. 78° 57'.

OORCHA, in Bundelcund, a town, the principal place of a
raj or principality known by the name of Oorcha or Tehree. It
lies three or four miles to the right or south-west of the route
from Agra to Saugor, 142 miles S.E. of the former, 131 N. of
the latter, and on the left or west side of the river Betwa.
Tieffenthaler, writing eighty years ago, describes it as situate
on a rocky eminence; as being about three miles in circuit,
surrounded by a wall of unhewn stones piled one upon the
other without cement, with three lofty gateways. The fortress,

* Urich of Tassin; Orcha of Briggs's Index; Oncha of Rennell; Orcha
of Elphinstone; Orcha or Uchcha of Franklin.
situate within the town, is represented as a fine structure, containing the handsome residence of the rajah, as well as a splendid palace built for the accommodation of the Padshah Jehangir. The communication with the rest of the town the writer states to be by means of a wooden bridge, the fortress during the periodical rains being insulated by a branch of the flooded Betwa. In the town is a temple ornamented\textsuperscript{4} with lofty spires.

The raj of which this town is the capital \textquoteleft\textquoteleft was\textquoteleft\textquoteleft estimated, in 1832, to contain 2,160 square miles, 640 villages, with a population of 192,000 souls; yielding a revenue of 10,00,000 rupees (100,000\textashTARGET{200}.), and maintaining a force of 1,200 cavalry and 4,000 infantry.\textquoteleft\textquoteleft The revenue appears to be on the decline, as in 1837 it was estimated at only 6,00,000 rupees (60,000\textashTARGET{200}.) ; while the military force in 1847 was computed at between 7,000 and 8,000 men, of whom more than 7,000 were infantry. The rajah pays to the Jhansi chief, through the British government, 3,000 rupees per annum, as quit-rent for the jaghrie of Terbowlee.

The rajah of Oorcha is considered the head of the Boondela race, of Rajpoot origin, being descended from a spurious branch\textsuperscript{6} of the Guhurwars. According to a recent authority,\textsuperscript{7} Hurdeo, one of the Gurhwar family, came into the country with a slave-girl, and took up his abode at Gurb Kurar, in the neighbourhood of Oorcha. He was there invited to give his daughter in marriage to the rajah of Oorcha, but refused, on account of objection to his caste or descent. After much importunity, however, he gave his consent, on condition that the rajah should at the marriage feast partake of the prepared viands, and thus lose all distinction of caste. The rajah consented, was poisoned with all his family, and the Gurhwar obtained possession of the country. His son was called Boondela, because he was the offspring of a bandee or slave-girl; and this name has been given to his descendants. This origin of the family is assigned by Elliott\textsuperscript{8} to the beginning of the thirteenth century; but Franklin is of opinion that the event occurred\textsuperscript{9} as late as the close of the fourteenth century. The town\textsuperscript{9} of Oorcha was built in 1531, by Pretap Hrad, the chief of the Bundelas. Madhikar Sah, his grandson, appears to have advanced his raj to considerable prosperity by gaining the
favour of Akbar. Birsing Deo, the son and successor of the last-mentioned rajah, was a notorious freebooter, and thence called Dang, a name equivalent to robber; from which circumstance Bundelcund is also called Dangaya. The desperate character of Birsing Deo pointed him out to Selim, son and declared heir of Akbar, as a proper instrument to cut off the celebrated Abulfazl, his father's favourite and minister, and who was thought unfavourable to the prince's views. Bir sing Deo accordingly laid an ambuscade for Abulfazl, at Berkeh Sarae, as he proceeded towards Gwalior in his return from the Deccan, and, notwithstanding a valorous defence, the obnoxious minister was killed, and his head sent to Selim, by whom the murderer was amply rewarded. Jajhar Singh, son and successor of Bir sing Deo, revolted against the sovereign of Delhi, but was overpowered, driven to take refuge in Gondwana, and his country seized by the conqueror. Pehar Singh, however, his brother, was reinstated, and the Oorcha rajahs continued feudatories of the padshahs of Delhi until the dissolution of the empire. The raj or principality has been, however, much reduced, Dutteea being formed out of it, probably by partition arising out of family arrangements, as its chief is of the same lineage as the rajah of Oorcha. The territory of Jhansee was wrested from Oorcha in 1733, by the Mahrattas; the small raj of Sumpter was also severed from Oorcha, but the time and cause of the event are unascertained. The rajah, though he received assistance from the Peishwa in 1733, at no time acknowledged that potentate as his sovereign; and in the treaty concluded between the East-India Company and him, in 1812, it is set forth, that by him and his ancestors his predecessors have been held during a long course of years, without paying tribute or acknowledging vassalage to any other power. By the terms of this treaty, the rajah professed obedience and attachment to the British government, which * Bir Sinha Deva, called Nursing Deo by Elliott; Nursing Deo by Elphinstone.† Selim, subsequently padshah under the name of Jehangir, acknowledged the murder. Feriahsa merely states, "That learned man was unfortunately attacked and cut off in the district of Nurwur, by banditti, near Orcha." But as this historian was at one time ambassador at the court of Jehangir, he might not deem it advisable to be explicit respecting the share the prince had in the murder of Abulfazl.
OORCHA.

2 D'Cruz, Pol. Relations, 87.

3 Sleeman, Rambles and Recollections, 1, 172.

4 Garden, Tables of Routes, 115, 74, 29, 170.

guaranteed his possessions to him free of tribute, and undertook to protect his territories from foreign aggression; the rajah abstaining from collision with any powers in alliance with the British government, or dependent on it. In 1842 Oorcha assumed such a refractory attitude, that a military demonstration on the part of the British authorities was found necessary.

The rajah for the most part residing at Tehree, one of his towns, forty miles south-east of Oorcha, has of late years generally styled himself rajah of Tehree.* The town of Oorcha is distant 100 miles S.W. of Calpee, 137 W. of Banda, 248 W. of Allahabad, 743 N.W. of Calcutta. Lat. 25° 21', long. 78° 42'.

OORCHA, in Bussahir, a village and halting-place for travellers in Koonawur, is situate on a mountain-side near the right hand of the Taglakhar river, a considerable feeder of the Sutluj. The vicinity is remarkable for the great number of manes, or peculiar structures devoted to the purposes of the Lamaic religion. These are low tumuli or mounds, of lengths varying from ten to 200 feet, two feet broad, and three or four feet high, constructed of loose uncemented stones, and covered at top with numerous pieces of slate of all shapes and sizes, with sentences carved in the Oochen or sacred character, the most common being the mystic exclamation, Oom mane paemee oom. There is always a path on each side of these erections, and the devotees invariably pass them on the right hand, even though this observance should entail the necessity of taking a circuit of a quarter of a mile, as Gerard has sometimes known to be the case. The road and country are dreary in the extreme, presenting nothing but a rugged surface of rock, bare, and formed generally of the jagged edges of slate strata. A few dwarf deodars spring from crevices, and are almost the last trees in the journey eastward from central Koonawur to the Tartarian table-land, the parching and freezing gusts of which check the growth of all trees, except a few scantily-distributed birches. Here, at the end of July, the thermometer rose in a tent to

* An Indian journal of recent date notices the demise of the rajah of Oorcha without issue, and suggests that his territory will consequently lapse to the paramount power; but no intimation upon these points has been yet officially received in this country.
99°, and in the open air to 79°, a high temperature for a spot having an elevation of 11,296 feet above the sea. Lat. 31° 38', long. 78° 37'.

OORCHAN.—A town in one of the recently sequestrated districts of the native state of Hyderabad, or dominions of the Nizam, 35 miles S.E. by S. from Sholapoor, and 155 miles W. from Hyderabad. Lat. 17° 13', long. 76° 14'.

OORJUAH,¹ in the British district of Etawa, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pargunnah of the same name, situate on the route from Allahabad to Etawa, and 39² miles S.E. of the latter. It has a bazar, and is abundantly supplied with water. The road is rather good, but during rain is in many places laid under water, and the soft soil converted into a deep slough. Population 5,645. Lat. 26° 28', long. 79° 35'.

OORMEL, or URMAL,¹ a river rising in Bundelcund,² and in lat. 24° 50', long. 79° 36'. Its course is first northerly, then sweeps round nearly in a semicircle north-easterly, easterly, and south-easterly. Having run sixty miles, it falls into the river Cane on the left bank, in lat. 24° 56', long. 80° 9'.

OORNEE, in Koonawur, a district of Bussahir, is a village near the right bank of the Joola, which about a mile below falls into the Sutluj, on the right side. It is situate in a rugged and barren country, amidst huge masses and precipices of gneiss. Lat. 31° 32', long. 78° 10'.

OOROOLEE.—A town in the British district of Poonah, presidency of Bombay, 20 miles E. of Poonah. Lat. 18° 30', long. 74° 11'.

OORUN.—A town in the British district of Tannah, presidency of Bombay, 10 miles E.S.E. from Bombay. Lat. 18° 53', long. 73° 1'.

OOSAINEE,¹ in the British district of Agra, a village on the route from the city of Agra to Mynpoorie, and 21² miles E. of the former. The road in this part of the route is good, the country cultivated. Lat. 27° 12', long. 78° 24'.

OOSCOTTA.—See HOSKOTE.

OOSEITH, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pargunnah of the same name. Lat. 27° 48', long. 79° 18'.

OOS—OOT.

1 E.I.C. Ms. Doc. OOSSOOR. — A town in the British district of Salem, presidency of Madras, 82 miles N.N.W. of Salem. A stud establishment is maintained at this place by the government, and it appears from an official statement, showing the average cost of horses passed for the service from the breeding department, that the expense at Oossoor contrasts favourably with the cost of horses purchased at Bombay. Lat. 12° 46', long. 77° 51'.

OOTAKAMUND, a town in the British district of Coimbatore, presidency of Madras, and the principal sanitary station on the Neilgherry Hills, has an elevation of 7,300 feet above the level of the sea, and is 1,300 feet higher than the minor stations of Kotageri and Coonoor. It is situated in an open valley almost in the centre of the hills, protected by the Dodabetta range on the north-east and south, but open to the westward. According to the authority already quoted, "the only town on the hills properly so called, is Ootacamund; and even this term can only be applied legitimately to the native portion of the settlement, since the residences of Europeans are too widely dispersed along the slopes of the valley to admit at present of its further extension. So rapidly, however, is the number of houses increasing, that before long the term town will not be inappropriately applied to the whole settlement." The site of Ootakamund was first occupied in 1822. The mean annual temperature is 58°: the rain-fall, on an average of four years, was found to amount to forty-four inches. An elegant church, which has been recently enlarged, is one of the greatest ornaments of the settlement. There are also public gardens, and the site has been selected for one of the meteorological stations of the Madras presidency. Ootakamund is 32 miles N.W. by N. of Coimbatore. Lat. 11° 24', long. 76° 47'.

OOTALOOR.—A town in the native state of Hyderabad, or the territory of the Nizam, situate six miles S.W. from the left bank of the Manjera river, and 60 miles N.W. from Hyderabad. Lat. 18° 2', long. 78°.

OOTAMPOLLAM.—A town in the British district of Madura, presidency of Madras, 54 miles W. by S. of Madura. Lat. 9° 49', long. 77° 28'.

OOTCH, in Bahawulpoor, a city situate four miles from the left bank of the Punjnad river, amidst beautiful groves. It is
OOT.

formed of three distinct towns, a few hundred yards apart, and each surrounded by a ruinous brick wall. The streets are narrow and meanly built, but the bazaars are large, and well supplied with wares, and there is considerable general traffic. These towns are built on mounds, formed by the materials of great cities formerly existing here. In the immediate vicinity are prodigious quantities of ruins, still in such preservation that they could be easily rendered habitable. Ootch is regarded with veneration by Mahometans, in consequence of containing five shrines of deceased pirs or saints, saiyyids, reputed descendants from Mahomet. Lat. 29° 18', long. 71° 9'.

OOTEBARA, in the British district of the Twenty-four Pergunnahs, presidency of Bengal, a town situate on the right bank of the river Hooghly. In this town an income-tax has been imposed upon the inhabitants for the production of funds for municipal purposes. Lat. 22° 35', long. 88° 22'.

OOTGIR, or DEOGRUBH.—A town in the Rajpoot state of Kerowly, situate on the left bank of the Chumbul river, and 28 miles S.S.W. from Kerowly. Lat. 26° 6', long. 77°.

OOTHA,1 in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 30° miles S.E. of the former. The road in this part of the route is rather good; the country level, well cultivated, and studded with small villages. Lat. 25° 13', long. 82° 14'.

OOTRACH, or TUROCH,1 a district in the lower or southern mountains of the Himalayas, is bounded on the north by Bussahir; on the east by Raeen and Bussahir; on the south by Joobul (of which state indeed it now forms part); and on the west by Poondur and Kothkace; and has an area probably of between sixty and seventy square miles. It lies between lat. 30° 56'—31° 6', long. 77° 42'—77° 54'. It consists almost entirely of a portion of the crest and declivities of a lofty range proceeding from Wartoo Mountain in a south-west direction to the river Tons. The general elevation is probably very considerable, as the summit of Tungru Peak, a little above the north-western frontier, is 10,102 feet. The population of Ootrach is estimated by De Cruz2 at 2,500; the annual revenue at 300l.; of which amount, the sum of 28l. was paid by the rannee as tribute to the East-India Company. The
armed followers of the chief were computed at about 100. On the expulsion of the Ghoorkas in 1815, this state was granted to a claimant alleged to be the heir of the rana dispossessed by those invaders. It was, however, subsequently ascertained that the claim was fraudulently made, to the prejudice of an elder brother, and he was compelled to abdicate in favour of his son, a pecuniary allowance being at the same time assigned to his nephew. But the mal-administration of this petty state subsequently rendered it necessary to depose this prince also; and on account of the insignificance of Ootrach, and the small amount of its revenue, it was deemed advisable to incorporate it with Joobul.

OOTRA DROOG.—A town in the native state of Mysore, 47 miles N.E. by N. from Seringapatam, and 32 miles W. from Bangalore. Lat. 12° 58', long. 77° 10'.

OOTUNCURRAY.—A town in the British district of Salem, presidency of Madras, 49 miles N.E. by N. of Salem. Lat. 12° 16', long. 78° 35'.

OOTURHEE,—in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Futtgart to that of Cawnpore, and 282 miles N.W. of the latter. The road in this part of the route is indifferent. Lat. 26° 46', long. 80° 9'.

OPAH.—A town in the British district of Chota Nagpoor, presidency of Bengal, 17 miles E.N.E. of Lohadugga. Lat. 23° 32', long. 85°.

OPERAI,—in Bundelcund, in the territory of Dutteah, a town on the route from Banda to Gwalior, 1602 miles W. of the former. It has a bazar, and water is plentiful. Lat. 25° 46', long. 78° 27'.

OPERBUNDA.—A town in the British district of Behbhoom, presidency of Bengal, 150 miles N.W. of Calcutta. Lat. 24° 10', long. 86° 56'.

ORAI,—in Bundelcund, in the British territory of Jaloun, a small town on the route from Calpee to Jhansee, 22 miles S.W. of the former. It has a bazar, and adequate supply of water. Lat. 25° 59', long. 79° 31'.

ORAYE.—A town in the British district of Balasore, province of Cuttack, presidency of Bengal, 61 miles S.W. by S. of Balasore. Lat. 20° 45', long. 86° 30'.
ORISSA.

ORISSA—An extensive tract of India, comprising the British district of Cuttack, part of the British district of Midnapoor, and the wild and unsettled region lying westward of those, and between them and the territory of Nagpore. It lies between lat. 17° 16'—22° 28', long. 81° 35'—87° 20'. The area, according to official report, is 52,996 square miles. It is bounded on the north by the British district of Mirzapoor; on the north-east by the British districts Palamow, Pachete, Ramgurh, and Midnapoor; on the southeast by the Bay of Bengal and the Northern Circars; on the west by Nagpore or the territory of Berar, and the British districts denominated the Ceded Territory of Saugor and Nerbudda. The maritime part of Orissa, forming the British district of Cuttack, is described under that name in the alphabetical arrangement.

The scanty notices which we have respecting this extensive tract, represent it as consisting of an extensive range of mountains, the continuation of the Eastern Ghauts. Some of the summits of these attain an elevation considerably exceeding 2,000 feet; and one summit has been estimated by an intelligent traveller to have an elevation of 4,000 feet above the level of the sea. Timber abounds in the vast forest, which extends uninterruptedly from the banks of the Godavery to those of the Ganges, a distance of nearly 600 miles. The geological character of the mountains is primary, being granite, gneiss in large quantities, and mica-slate; and throughout the rocks garnets are interspersed in surprising abundance. In many places the gneiss has a strongly-marked porphyritic character, and elsewhere passes by imperceptible transition into sandstone, or is overlaid with laterite. In the northern part there is much primary limestone, intermixed with quartz and mica-slate. Iron-ore is very abundant in many places; and in the midland parts, in the vicinity of the town of Sumbhulpore, diamonds, gold, and rubies are found in the detritus of rocks; and there is reason to conclude that they exist in situ in the neighbouring mountains. It has been stated that promising indications of coal have been observed;  

* Orissa of Brigg's Index; Urijah of Richardson; Urisa of Wilson.  
† Including Sirgoja Jushpore, and other tracts ceded by the rajah of Berar in 1826.
ORISSA.

but it has not yet been found in any part of the district. The climate during the hot season, in the close of spring and early part of summer, is extremely sultry, the thermometer reaching 115° in the shade; and this very high temperature acting on decayed vegetation, saturated with moisture, is productive of deadly malaria, rendering the climate one of the most unhealthy in India. This unfavourable circumstance, more than any other, prevents the settlement and adequate cultivation of a country having a vast extent of well-watered and fertile soil, suited for the successfully raising most of the valuable inter-tropical products. Wild beasts are numerous: there are the wild elephant, the gayal, a huge bovine quadruped, wild buffalo, nylgau (Antilope picta), wild swine, deer of various kinds, the antelope, porcupine, hare, monkey, squirrel, tiger, leopard, bear, wolf, hyena, jackal, fox, and wild dog. The dhanesa (Buceros indica) or rhinoceros-bird is common; but in general the ornithology of the district has been neglected. Enormous snakes infest every jungle and ravine. Motte, a traveller who visited the country in the latter part of the last century, mentions having seen near Sumbhulpore an immense snake, worshipped as a deity, and alleged to be coeval with the world. It was lodged in a cavern at the foot of a rock, and came out once a week to take his food; consisting of a kid and some fowls, offered to him by his votaries, and picketed on a small plain before his den. After the monster had gone back to its den, the traveller examined its traces in the muddy soil, and concluded its diameter to be about two feet. Kittoe, who visited this locality in 1838, or sixty years later than Motte, states that he was informed that this monstrous snake was still living, and able to enjoy the offerings of his votaries. The boa lurks in every jungle, and attains enormous size; venomous snakes are also very numerous, as are scorpions and centipedes. Fish swarm in the numerous streams and tanks, and form a considerable portion of the food of the population.

The general slope of the surface is eastward, except in the extreme southern part, where a few feeders flow southward to the Godavery. At the northern extremity also, some small rivers flow northwards, and discharge themselves into the Son, a large feeder of the Ganges. The rest of the rivers flow eastward, and discharge themselves into the Bay of Bengal.
Of these the Mahanuddee, by far the greatest, passing eastward from the territory of Nagpore or of Berar, touches the western boundary of Orissa in lat. 20° 36', long. 82° 30', and, flowing generally south-eastward by the town of Sumbhulpore for 320 miles, through the unsettled tract of Orissa, crosses the western boundary of the British district of Cuttack, when it separates into numerous branches, by which it flows for about 100 miles into the Bay of Bengal. During the periodical rains, at the close of summer and commencement of autumn, its channel throughout the whole of this distance is navigable for river-craft of considerable burthen. Next in importance is the Brahminy, rising in the northern part of Orissa, about lat. 23° 25', long. 84° 13', and flowing for about 240 miles through it in a south-easterly direction, to lat. 20° 50', long. 86° 1', where it crosses the western frontier of the British district of Cuttack, through which it flows for about 110 miles to the Bay of Bengal. There are a great number of rapid and large torrents, which, during the rainy season, fall either into the greater streams or into the Bay of Bengal.

The population is estimated at 4,534,813. There are four principal divisions of the population:—1. The Urias, Orias, or Odras, being Brahminists, and inhabiting principally the plains and valleys, more especially in the western tracts, towards the British district of Cuttack; 2. the Coles, in the northern part, a race also called Hoss, semibarbarous, yet not sunk in the lowest stage of savage brutality; 3. the Khonds, in the middle part; and 4. the Saurias or Sauras, in the south. These three last races are considered the aborigines of the tracts which they now inhabit, and of others much more extensive, of which they have been dispossessed by the encroachments of the more recent population, generally denominated Hindoo. The Coles are rather favourably delineated by a recent writer, who commends their love of truth, honesty, obliging willingness, and happy, ingenuous disposition, the more striking as contrasted with the trickery and falsehood of the wily Hindoo. He represents them as hospitable to strangers, and ready to relieve the indigent; altogether a lighthearted, kind people.

* Macpherson states the Saurias to inhabit the south; Stirling, perhaps erroneously, rather north.

* Tickell, supra, 305, 307.
but very irascible, and so prone to feel deeply injuries, whether real or imaginary, that they frequently vent their resentment or grief in suicide, to which they are frightfully addicted. In occasional collision with British troops, they have not shown themselves remarkable for courage. These rude people have been won over by proselytizing Brahmins to a certain observance of their rites and festivals, and are besides polytheists, worshipping several imaginary deities, whom they strive to propitiate by sacrifices; they, however, say, that as they have never seen those deities, they cannot assign them shapes. The Khonds, who inhabit the central part of Orissa, are represented as having made some progress in civilization. "Agriculture is practised by them with a degree of skill and energy which is rarely surpassed in India, and which has produced a degree of rural affluence rarely paralleled." The same writer, however, represents the population to be so scanty as to suggest grave doubts of his accuracy, either as to the numbers of the people, or to their alleged proficiency in agriculture. As to physical constitution, the Khonds are of the average stature of the Hindoos, muscular, robust, symmetrical, and active. The skin varies in hue in different individuals, from deep copper-colour to yellowish olive. The face is rather handsome, with high expanded forehead, prominent cheek-bones, nose aquiline in some instances, though not in all, but generally broad at the top; lips full, but not thick; mouth rather large. The whole physiognomy is generally indicative of intelligence and determination, blended with good humour. They fight with bows and arrows, slings, and battle-axes, and are considered to be brave, neither giving nor taking quarter. Their good qualities are stated to be love of independence, bravery, hospitality, and industry; but they are dreadfully vindictive, and addicted to drunkenness. They are polytheists, believing in the existence of various imaginary divinities, and worshipping the earth, the moon, the god of war, and many other objects, beside the Hindoo goddess Kali. The god of the earth is, however, the most revered, and, under the influence of a detestable superstition, his votaries seek to propitiate him by the sacrifice of human victims, generally children, bought for the purpose from those who steal them from neighbouring people. It appears to be a rule, that no
Khond should be sacrificed, and no victim is considered to be acceptable unless bought with a price. This horrible rite is intended to induce the god of earth to favour them with plentiful crops. At the time appointed by their priests, a feast is held, and after it has continued for two days and two nights, a scene of drunken and obscene revelling, the victim is brought out on the third day, and bound to a stake. Its limbs are then broken, and the priest having struck it with an axe, the crowd set upon it, and crying aloud, "We bought you with a price, no sin rests on us," hew the living body into pieces, each carrying away a bloody morsel, which they throw on the earth in some part of their grounds. The number of human beings yearly murdered in this manner was formerly very great. Macpherson states that he found seven victims held in readiness for immediate sacrifice in a valley two miles long, and less than three-quarters of a mile wide. The British government has made strenuous efforts to check the practice, but the Khonds adhere to the sanguinary rite with dreadful pertinacity, and with unflinching ferocity defend their fastnesses, where, for the greater part, malaria would inevitably destroy an invading force. There is reason, however, to hope that ere long the country will be purged from these fearful crimes. By an act of the government of India, passed in September, 1845, the Governor-General is empowered to withdraw the districts where they prevail from the jurisdiction of the ordinary authorities, and to place them under a special officer, called "the agent for the suppression of Meriah sacrifices," who is of course selected with particular regard to vigilance, energy, firmness, and discretion. The Saurias are slaves to the same superstitions as are the Khonds, but are considered much more savage and barbarous. They are represented "as in general a harmless, peaceable race, but so entirely destitute of all moral sense, that they will as readily and unscrupulously deprive a human being of life as any wild beast of the woods, at the orders of a chief, or for the most trifling remuneration." The language of the Urias is a dialect of Sanscrit, closely resembling the Bengalee; and the basis of the alphabet is the Nagari. The Gond language is spoken in some parts towards the western frontier. The Khonds use two distinct dialects, each containing many words of Tamul.
and Teloogoo. Of the dialects of the Coles, we have no information.

Sumbulpoor, the only considerable town in the country, Boad, and Sohnpoor, are described under their respective names in the alphabetical arrangement.

The principal routes are, 1. From north-east to south-west, from Calcutta, through Midnapore, to Sumbulpoor; 2. from east to west, from Cuttack, through Sumbulpoor, to Nagpore and Kamptee.

The decline of the ancient royal house of Orissa dates from the death, in 1524, of Rajah Pertab Rudra Deo, an event which the Hindoo monarchy was not destined long to survive. Its downfall may be regarded as consummated in 1592, when a lieutenant-governor arrived from the Mahomedan kingdom of Bengal to assume charge of the administration of Cuttack. With the exception of this province, and a portion of Midnapore, Orissa was acquired by the East-India Company in 1765, by virtue of the firman of Shah Alum, emperor of Delhi, granting the Dewanny of Bengal, Behar, and Orissa.

OSIMLEE.—One of the Cossya hill states: it is surrounded entirely by the other hill states, and extends from lat. 25° 20' —25° 59', long. 91° 26'—91° 41'. It is forty-three miles in length from north to south, and sixteen in breadth, and has an area of 350 square miles.¹

OSMANPOOR,¹ in the British district of Agra, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, by Khaagunj, and 14² miles N.E. of the former. The road in this part of the route is bad; the country much cut up by ravines, and very partially cultivated. Lat. 27° 19', long. 78° 11'.

OSSOOR.—See OSSOOR.

OTTAPUDARUM.—A town in the British district of Tinnevelly, presidency of Madras, 28 miles N.E. by E. of Tinnevelly. Lat. 8° 56', long. 78° 5'.

OUDANULLA.—See OONDWA NULLAH.

OUDE,¹ a kingdom so called from the ancient city of the same name, is bounded on the north and north-east by the territory of Nepaul; on the east by the British district of Goruckpore; on the south-east by the British districts Azimgurh and Jounpoor; on the south by the British district

¹ Parliamentary Return, April, 1851.
² E.I.C. Ms. Doc.
³ Garden, Tables of Routes, 4.
⁴ E.I.C. Ms. Doc.
OUDE.

Allahabad; on the south-west by the Doab, including the British districts Futtehpore, Cawnpore, and Furrukhabad; and on the north-west by Shahjehanpoor. It lies between lat. 25° 34'—29° 6', long. 79° 45'—83° 11'; is 270 miles in length from south-east to north-west, and 160 in breadth. The area is 23,788 square miles. The north and north-eastern part, lying along the base of the Sub-Himalaya, or continuation of the Sewalik range, has not been well explored by Europeans; it forms part of the Terrai or wooded marsh stretching through that part of Hindostan, and, suffering from a deadly malaria, is scarcely habitable. Tieffenthaler, who penetrated into this tract, states it to be generally a forest, impassable on account of the close growth of trees, underwood, and reeds, and giving shelter to the elephant, rhinoceros, bear, wild kine, wild hog, and deer. The general surface of the Oude country is a plain, declining from north-west to south-east, according to Butter at the rate of seven inches per mile; and hence in that direction is the course of the principal rivers, the Raptee, Surjoo or Ghogra, Goomtee, and Sae. The elevation of Birimdeo guard-house, at the north-western angle, is estimated by Webb at 798 feet above the sea; that of the left bank of the Ganges, at the south-eastern point, may be concluded to be 346½. The only irregularities in the surface are caused by the various degrees of resistance opposed to the abrasive effect of water by the different consistence of the soils. Some patches of kunkur or calcareous conglomerate undergo abrasion very slowly, and stand seventy or eighty feet above the neighbouring country, which, consisting of softer materials, has been washed away by the agency of water. In consequence of the abundance of this indurated conglomerate, the rivers, however winding, have permanent channels, which the current gradually deepens, and in general perfectly drains the soil, though there are some

* Hamilton estimates it at 20,000 square miles; Sutherland at 23,923.

† The distance of this point by the river's course above Benares, is, according to Garden, 153 miles, and according to Prinsep (G. A.), the slope of the waterway in this part of its course is six inches per mile. Prinsep (J.) estimates the elevation of Benares above Calcutta at 246 feet, or about 270 above the sea. Consequently, the elevation of the south-eastern part of Oude may be assumed at 270 feet + 76½, or 346½.
OUDE.

extensive pools or marshes; but these are for the most part exhausted of water during the dry season, either by evaporation or irrigation. The most extensive of these pools is near the town of Betagano, in the south-eastern extremity of the territory. It is sixteen miles in length and eight in breadth, and was originally formed in the deserted bed of the Ganges. Its exhalations are productive of great mortality, many of the permanent inhabitants dying of intermittents, and immigrants from other parts rarely surviving a year.

The climate of Oude is dry during the greater part of the year, and subject to wide extremes, the temperature sometimes rising to 112°, and at others sinking to 28°. The cool season extends through November, December, January, and February, and is pleasant and salubrious, though occasionally rather chilly, sometimes to such an extent that thin ice appears on shallow water; but in sheltered spots the sun has considerable power throughout the season. March, April, May, and June, are the hot months; noon daily bringing a westerly wind, loaded with fine light greyish sand, which obscures the horizon, gives a sombre hue to the entire atmosphere, and is so sultry and drying as to cause woodwork to crack. The temperature, however, generally diminishes towards sunset, and rarely continues oppressive throughout the night. Occasionally the wind blows from the east all day, and is loaded with oppressive vapour from the swamps of Bengal, or Assam. The power of the hots winds is observed to be steadily on the increase. Sometimes hurricanes, accompanied by thunder, lightning, and rain, set in, and do extensive damage. The annual fall of rain varies greatly in amount, as the rains sometimes commence in the middle of June and terminate in October, while at other times they last only two months. The consequence is, that in some years eighty inches fall, in others not more than thirty.

The soil in general is light, there being a preponderance of siliceous and calcareous earth, especially in the form of kunkur or calcareous conglomerate. With the exception of this latter, no portion of rock larger than a grain of sand is to be found in the original soil; but the beds of the rivers contain small fragments of felspar, hornblende, quartz, and mica, brought down from the northern mountains. The Goomtee and the Tons (North-eastern) abound in shells, which yield a fine...
OUDE.

mortar, and might be converted into excellent manure, but the natives neglect this portion of rural economy. The richest soils are towards the left bank of the Ganges, in the southeastern part of the territory. Oude being altogether an alluvial country, its mineralogy is very scanty and uninteresting; carbonate of soda, muriate of soda, sulphate of soda, nitrate of potash, and carbonate of lime, being its only mineral productions worth notice.

Besides the huge quadrupeds which haunt the marshy forests of the Terrai, the following wild animals¹ are found in the country:—the tiger, wolf, hyæna, jackal, fox, hare, nylogau or blue antelope, wild hog, porcupine, otter, mongoose, squirrel, rat, musk rat, wild cat, bat, and flying fox.¹ Tigers are so numerous, that, during the visit of Von Orlich² to Lucknow, a hunting-party killed forty of them, some of great size, the skin of one having measured nine feet from the head to the tail. Wolves are very abundant, and destroy many persons, especially children, whom they carry off even from the bazars of the towns. These ferocious animals are often spared when in the power of the natives, from a mischievous superstition that their death causes the destruction of the slayer's house. Wolves are not the only devourers of children: hyenas carry off many. Porpoises are seen in the Goomtee during the rainy season. The most remarkable birds are the adjutant, vulture, hawk, kite, crow, raven, jay, parrot, partridge, paddy-bird, quail, dove, cuckoo, lark, kingfisher, wild goose, wild duck, and wood-pecker; besides a great variety of singing-birds. Two species of alligator infest the great rivers at all seasons, but venture into the small rivers only during the rains. Lizards abound, as well as snakes: among the latter are the deadly karait and the cobra di capello. Of the crustaceous classes may be mentioned the crab, prawn, scorpion, and centipede. Insects† are in great numbers and variety. The botany, which is rich and varied, is copiously treated of by Butter,² to whom reference must be made, as the necessary limits of the present article do not

¹ Butter, 28.
² Travels in India, ii. 114.
³ pp. 31-47.

* Butter does not mention the monkey tribe, which, however, as well as wild peafowl, are very numerous,¹ as might be expected from the number of the woods and groves, the climate, and other circumstances.

† Butter¹ states, "The cochineal insect is sometimes seen on the prickly pear bush."
admit, consistently with a due regard to other topics, of bestowing upon this the degree of attention which is requisite to render it of any value.

Manufactures are destined exclusively for home consumption; and the demand for the raw materials for their fabrication being thus contracted, the rural economy of the country is principally directed to the management of alimentary crops. Irrigation is extensively practised for the rubbee, or crop sown in the autumn and reaped in spring. The water in considerable proportion is raised either from wells, tanks, or rivers. The wells are in some places sixty or seventy feet deep; and from such the water is generally raised in a bucket or leathern bag, brought up by a rope, passing over a pulley or roller at the top, and worked by cattle; but where the poverty of the cultivator precludes him from this assistance, he and his family must themselves work the well-rope. The Persian wheel is not in use in Oude. Such irrigation is, however, becoming continually more difficult and precarious. The entire surface of the country is increasing in aridity; tanks replenished during the rainy season are now sooner exhausted than formerly, and wells must be dug much deeper than heretofore to yield the accustomed supply of water.

The principal alimentary articles of the rubbee crop are wheat, barley, gram, called also chana (Cicer arietinum), masur (Ervum lens), mustard, and some other oil-plants. Kusum (Carthamus tinctorius), grown for dye-stuff, is also an article of this crop. Of the kurreef, or crop reaped in autumn, the principal article is rice, sown in those parts liable to inundation. In the Ayeen Akbery the rice of Oude is stated to be "incomparable for whiteness, delicacy, odour, and digestiveness." The other principal articles of this crop are millet of various sorts, maize, makra (Cynosurus coroceanus), joar (Holcus sorghum), bajaran (Holcus stativus), urdh (Phaseolus maximus), kodu (Paspalum frumentaceum), moth (Phaseolus aconitifolius), urhur (Cajanus flavus), and til (Sesamum orientale). The cultivation of the sugarcane is very circumscribed, and the produce, from mismanagement, execrable; though soil and climate appear rather well adapted for its growth. Potatoes have been introduced, and their cultivation is on the increase, but rather slowly. The growth of opium receives some atten-
OUDE.

tion, and might be immensely extended; but the drug, from the slovenly and injudicious manner in which it is prepared, and its bad character from adulteration, scarcely commands a remunerating sale. Hemp is cultivated for the sake of its products in the shape of bang, ganjha, charas, and similar powerful inebriants. Generally each village has a patch of ground under tobacco. Most of the esculent vegetables of temperate climates succeed in the cool season. Little attention appears to be given to fruit-trees, though no doubt they might be cultivated in considerable number and variety: the most important are the mango, citron, jak (Artocarpus integrifolia), bair or jujube (Zizyphus jujuba), sharifa or custard-apple (Annona squamosa), jamani (Eugenia jambolina). The mahua (Bassia latifolia) is now extensively planted; "the fleshy7 berry-like flowers are either eaten raw or are dried (when they are described as tasting like dried grapes) and then roasted;" they are moreover subjected to fermentation, and a powerful and cheap spirit is distilled from them, which is that principally drunk in some parts of Northern India; the seeds also yield oil on expression. Great destruction is, however, going on among the groves and woods of this country; and the natives attribute to this cause, and most probably with justice, its increasing aridity. Cotton8 is raised in many places throughout the country, and is of good quality, though inferior to that of Bundlecund. The quantity, however, is not sufficient for the demand, and much is imported from Bundlecund and the Doab. The modes of tillage are extremely rude and inefficient, the operation of ploughing being so feebly and unskilfully performed, that it must be repeated between thirty and forty times for a wheat crop, and afterwards harrowing must be performed as often as seven or eight. Oxen and buffaloes are the only cattle employed for agricultural purposes, and they are generally stunted, broken-down, and miserable animals. From mid-winter to the commencement of the rains in June, provender for them is very scarce; but a resource is found in the oily seeds of cotton, which, steeped in water, afford good food for milch-cattle, causing a great quantity of milk, which yields a large proportion of butter. The price of farming-stock is very low; that of a pair of oxen varies from 10 to 20 rupees. Large numbers of sheep and goats are kept, but on very
OUDE.

scanty fare, being allowed to roam about and pick up whatever they can find, and in the dry season supplied with a few leaves and twigs: a small sheep may be bought for about a shilling; the largest does not cost more than double that sum.

The operations of manufacturing industry, as has been said, are not numerous. One of the most important is the extracting of soda, saltpetre, and culinary salt, by washing the soils in which they respectively abound, and evaporating the saturated liquid. Much culinary salt is also made by evaporating brine drawn up from wells, sunk for the purpose in various parts of the country. The quality is considered to be not inferior to that of any in India. Gunpowder is everywhere made; the price is low, but the quality inferior. Matchlocks, blunder-busses, spear-heads, and swords are manufactured in all the towns; and bows of bamboo are made throughout the country, being in much request among the poorer classes of travellers, who use them in self-defence. The best steel bows are made in Lucknow and its vicinity; those of horn are imported from the Doab. Cotton cloths and coarse woollen blankets are made everywhere; coarse paper is manufactured at Bahraieh and Lucknow; bottles, and other simple works in glass, are made in those parts where the soil abounds in soda. Such dyeing as is required by the simple habits of the natives is carried on in every village.

The weights and measures vary in different places: the more usual linear measure is according to the following scale:

1 Gur = 2 Hath (of 19½ or 20 in. each) = 39 or 40 in.
1 Hath = 6 Muthees (3½ inches each) = 19½ in.
1 Muthi = 4 Anguls (of about ¼ in. each) = 3 in.

The silver currency consists of the Lucknow rupee, coined at that city, and the Company’s and Furruckabad rupees. The copper coin is the Madhosahy paisa, of 270 grains; and of which 32, 33, or 34 go to the Company’s rupee. Gold coin is seldom seen; that which enters the country speedily disappears, being in great demand for hoarding. Those who have spare cash convert it into the coin of least bulk and greatest value, and bury it under the floors of their houses.

According to Butter, Oude has no superfluity for export but salt and saltpetre. It imports matchlocks from Lahore, swords from the same place, and from Guzerat and Marwar. We are
OUDE.

These blades possess a "keenness of edge, which is sometimes such as to cut through a matchlock barrel." This certainly indicates a very remarkable degree of keenness. Oude also imports shields of rhinoceros and of buffalo-hide from Sylhet, paper from Calpee, reeds for writing from Calcutta, soap from various places, iron from Saugor and Nepal, and coffee from Kumaon and Nepal. A few fine shawls are imported from Cashmere; kimkhwab (brocade) and other fine native and European wares, spices, dye-stuffs, drugs, coral, pearls, and various gems, from the Company's territory and other parts of Hindostan; horses from the Punjab, from Cabul, and from Turkistan; ponies from the Himalaya tracts; elephants from Nepal and Chittagong. Since there are scarcely any exports, the return for the imports must be made in specie brought or remitted into the country by some means not readily explainable. The distressed state of the holders and cultivators of land gives scope for the operations of many small mahajans or capitalists, who make advances either in money, wares, or grain, both for subsistence and seed, and stipulate for an interest, rendered enormous by the necessities of the borrowers. Not unfrequently, however, the distressed governor, or some powerful landowner, compels the capitalist to disgorge largely; and thus a contest is carried on between extortionate cupidity and reckless violence. The principal merchants and capitalists are of the Bain tribe of Rajpoorts, who extend their commercial operations over every part of Hindostan. Much of the internal commerce of the country is conducted at melas or fairs, frequently held at the principal marts. At these fairs the amount of business done is represented as very small in proportion to the number of people who flock to them. At Surajpore, for instance, 200,000 are said to assemble, though the value of the property transferred does not exceed 10,000£ or 15,000£.

Throughout Southern Oude there is scarcely an edifice deserving the name of a bridge. One at Sahganj, over the Toos (North-eatern); another at Mohan, over the Sai, on the only metalled road, being that connecting Cawnpore with Lucknow; and a long low bridge, or perforated causeway, south of Tanda, are the only ones of which Butter had any knowledge. Lucknow has an ancient bridge of stone, and a
OUDE.

modern one of iron; but Northern, like Southern Oude, is by no means rich in such erections. The roads, with the exception of that just mentioned, are mere tracks, so difficult for wheeled carriages of any kind, that the native population prefer transport on the backs of bullocks. Little advantage is taken of the inland navigation, in consequence of the ruinous exactions of the zemindars along the course of the rivers. Its extent, however, in proportion to the size of the country, must be great, as will be apparent from an enumeration of the more important rivers by which it is traversed. These are, the Ghagra, Goomtee, Sai, Rapti, Chouka, Ganges, Ramgunga (Western), and Gurra.

Though Oude appears to have ceased to be an independent realm at a very remote period, the population have a highly warlike character; the territory, in proportion to its extent, supplying a surprising number of soldiers to the army of the East-India Company, and to those of Gwalior, Hyderabad, Nagpore, and Alwur. Most of the troops of the last-mentioned power are said to be natives of Oude. Though the kingdom has been for several centuries under Mussulman sway, much the greater portion of its inhabitants are Hindoos. If a judgment may be formed on the relative amount of the different classes stated by Butter in the enumeration of the population of the towns, the Mussulman proportion forms a very insignificant part. The first class of Hindoos, in number and influence, are the Brahmins, who are divided into sub-castes, too numerous and intricate to be here enumerated. The next in numbers and importance are the Chhatris, or military caste, in which the Rajpoots rank first, and are divided into a great number of sub-castes. The Brahmins have numerous and preposterously strict regulations respecting intermarriages; the Chhatris, on the contrary, admit intermarriages between all tribes of their own caste. The proposal of marriage is made by the girl's father, who, in proportion to his means, incurs a large expenditure, less in the way of dower than in presents to the youth and his relations, and in feasting the families and acquaintances on both sides. Among most Brahmin tribes, however humble the station of the parties, no marriage can take place without an expenditure of 700 rupees; of which 100 are laid out in trinkets for the bride; fifty for

9 Butter, 149.
culinary utensils; fifty for clothes; 100 as a present to the youth from the head of the girl's family; 100 similarly presented by the same person to the youth's father; a sum, sometimes amounting to 150 rupees, distributed in presents of four rupees each to the youth's relatives; the remainder being expended in feasting, which continues five days. The matrimonial "ceremony" is performed when the parties chiefly concerned are about thirteen years of age, sometimes later; but never until they are past the age of nine. Cohabitation commences at fourteen; and there is then a repetition of the same merry-making, but at half the expense." Important characters in society are the Bhats,* hereditary bards or minstrels, who perambulate from house to house, sing the praises of the inmates, and are rewarded with presents of money, horses, arms, and clothing. The Mussulmans, probably, are for the most part Shias, or those who reject from the Khalifate the first three successors of Mahommed, revering exclusively his grandson Ali. The king is of that persuasion, being of Persian descent, and in consequence commemorates the Muharram, or anniversary of the slaughter of Hussain, son of Ali, with great solemnity⁵ and funeral pomp. Besides the great Hindoo festival held at the approach of the vernal equinox, the Ram Sila, or mask and mummery to represent the story of Rama and his monkey ally Hanuman, is celebrated in various places during the month Koar, or part of September and of October. It attracts great numbers, in some places exceeding 50,000 persons, who attend generally during the day, and return to their homes at night. During the ten days for which it lasts, alms in various forms are extensively distributed by the Brahmins and Chhatris. A festival, called the Gurui,⁴ is also annually held in all parts of the country, at which wrestling, single-stick, and sword-exercise are practised; and the elderly men employ their evenings throughout the year in preparing the younger for the display of skill and activity on these occasions.

The entire population of Oude is understood to be 2,970,000, affording an average of 125½ to the square mile. The dwelling-  

* Wilford remarks¹ that the name is not Sanscrit, but a corruption from it. An account of these persons will be found in that writer, in Tod,² in Macnurdo,³ and in the Ayeen Akberry.⁴

⁴ Butler, ut supra, 165.
Houses of the people are generally built either of unburned brick, or of layers of mud, each about three feet in breadth and one foot high. The roofs are made of square beams, placed a foot apart, and covered above with planks laid crosswise; over which are mats and a covering of wet clay, well rammed down, and a foot and a half in thickness. The walls are carried up to six or seven feet above the upper surface of the roof, to afford a concealed place of recreation for the females of the family; and during the rains this small elevated court is covered with a slight roof of bamboos and grass. These thick mud-covered roofs are very durable. Around the houses there are usually verandas, covered with pentroofs of tiles. Inside, the beams and covering are exposed to view, without any ceiling; the floors are of earth, well beaten down and smoothed; and are partially covered with mats, or, on great occasions, with cotton carpets. In the front of the house is a chabutra, or raised platform of earth, open to the air at the sides, and having a roof of tiles or grass supported on pillars. Here the neighbours meet and chat in the evenings.

Butter, a medical authority, considers the climate of the southern districts of Oude superior in salubrity to any other part of the great Gangetic plain; and adds, "every town can show inhabitants who have numbered 100 years." The people are in general tall, well-proportioned, and athletic; and many may be observed among them who would be considered very fine men in any country in Europe. Notwithstanding the state of misrule in this country, and the disorganization in the social system, amounting almost to total anarchy, the character of the people is represented favourably by Butter, whose prolonged residence among them must have afforded him sufficient opportunities for observation. He says, "Keeping then in view the nearly absolute privation of the principle of government in its protective and judicial functions throughout the provinces of Oude, and the scope, unbounded save by the courageous resistance of the individuals aggressed, and the moderation of the aggressing party, thus given to the exercise of cupidity, personal dislike, envy, vindictiveness, and all the worst passions of human nature, the limited amount of crime attributable to private and individual motive that

* Heber met in Oude with a man 109 years of age.
OUDE.

occurs in this country must be considered as highly creditable to the natural humanity, love of justice, and forbearance of its inhabitants." The appalling frequency of the frightful practice of thuggee, coolly premeditated, and treacherous assassination, succeeded by robbery, exhibits a gloomy contrast to this flattering portrait. In a note on a map of the part of the kingdom south-east of Lucknow, comprising less than a half of its area, and laid down by Mr. James Paton, assistant resident at Lucknow, in 1838, after close judicial research, 274 bails, or scenes of murder by thugs, are marked. That judicious and indefatigable inquirer observes, "This map has been prepared to show the fearful extent of murders perpetrated by those diabolical associations. The field of their remorseless operations in the kingdom of Oude alone will be found in the map to extend over the space of 1,406 miles; and the number of their ascertained, well-known, and bloody bails to be no less than 274, being on an average of one bail for 5½ miles; and from the greater number of which the skulls and skeletons of their unhappy victims may still be dug up, and from their graves or wells, bones in abundance be produced." "Every bail on the map may be considered to have been with fatal certainty in existence, and the scene of many murders." "The number of murders perpetrated by some of those miscreants, or in which they have assisted, appears almost incredible; but it must be remembered that they are professional assassins, who support themselves from youth to age by murder; and that the average of the greatest part of them,—namely, by Buhram, 981 murders in forty years of actual thuggee; and Futtykhan, 508 in twenty years of actual thuggee, is about two murders monthly for each of them."

The language in use in Oude is Hindustanee or Urdu, with a greater admixture of Persian and Arabic, and less of Hindee, than in places more eastward. The education of the rising Hindoo generation is conducted by pundits, or learned Brahmins, who are usually maintained by a grant of rent-free ground from the zemindar or landholder. In such case the pupils are instructed gratis; otherwise each is charged at the rate of from 6d. to 1s. (four to eight annas) annually. The course of instruction is confined to reading, writing, and elementary arithmetic.

OUDE.

The government is a pure despotism, unchecked, except by the apprehension of giving offence to the British government, and perhaps but little restrained even by that fear. The protection of that government has no doubt in some instances enabled the rulers of Oude to venture on steps not unlikely to provoke resistance and eventuate in rebellion. Until the demise of Nasir Uddin Hyder Ali Khan, in 1837, the chaprasis, orengers of the king, used to go with palkis or littered to the houses of persons of all ranks, and by force carry off women and girls, whether married or unmarried. This most flagitious violation of the dearest rights of human nature was perpetrated during the presence of an overwhelming British military force, distributed throughout the provinces to preserve peace. The state of the country in 1837 is thus characterized from the personal observation of a European observer:—"The administrative state of the country at that time may be summed up in a few words: a sovereign regardless of his kingdom, except in so far as it supplied him with the means of personal indulgence; a minister incapable or unwilling to stay the ruin of the country; local governors, or, more properly speaking, farmers of the revenue, invested with virtually despotic power, left almost unchecked to gratify their resentment and private enmities; a local army, ill paid, and therefore licentious, undisciplined, and habituated to defeat; an almost absolute denial of justice in all matters, civil or criminal." Such was Oude under the protection of a just and humane government, not unconscious of the existing evils, but feeling the trammels of diplomatic arrangement as a restraint from all effective interference. The army of Oude, or at least the body so called, but which is, in fact, an ill-paid, disorderly multitude, employed in coercing the zemindars under the orders of the chakledars, or collectors of revenue, in conveying the realized revenue to Lucknow, or in making demonstrations against the gangs of plunderers which often harass the country, ostensibly consists of forty-five paltans or regiments, each containing 1,200 men; thus giving an aggregate of 54,000 men. Sutherland states the number in 1814 to have amounted to 60,000. In 1845, a police force was organized, and is still maintained, of the strength of 560 men. This force was specially designed for the protection of the Goruckpore and Shahjehanpore frontiers.
The force maintained by the British government in Oude in 1849 amounted to nearly 5,600. Of these, nearly 2,000 were local infantry, the remainder was composed of the Company's regular troops, chiefly infantry, but including a small body of artillery.

A mode of collecting revenue, not unusual, resembles rather the levying of tribute in a hostile country, than the enforcement of the claims of a lawful sovereign upon his own subjects. The chakledar, or farmer of the revenue, takes the field at the head of a considerable force, and should a zemindar not comply with his demands, he proceeds to urge them by the aid of artillery, using sometimes balls of hammered iron, but more frequently cylindrical billets of wood, which make a great noise by whizzing in their course through the air. The cannonading on such occasions has frequently been heard for several days together at Sultanpore cantonment. Revenue is the only object of the government. The chakledars, the only persons considered as at all responsible for the peace of the country, regard nothing but the collection; no courts of justice are held; no law administered, and the people, where not protected by some powerful zemindar, are subjected to pillage, and to every other outrage, from gangs of robbers, roaming the country in great numbers, and whose audacity is encouraged by the comparative impunity with which they exercise their lawless avocation. Accurate returns of the amount of revenue are not to be expected in this misgoverned country. A few years since, when measures of financial reform were urgently pressed by the British government, and promised by the minister, it was proposed to restrict the expenditure to one crore and fourteen lacs (1,140,000£), which sum was stated to fall within the amount of revenue that might be derived under a moderate assessment. The principal routes are—1. That from Cawnpore, north-east, to Lucknow, being the only regularly-made road in the kingdom. From Lucknow, a route proceeds north-west to Seetapore cantonment, and there diverges, one branch continuing its former direction to Shahjanpore cantonment, the other proceeding north by Khairigarh, and thence up the valley of the Ghogra into Kumaon. 2. A much-frequented route proceeds from Mynpooree, being joined by that from Futtehgurh across the Ganges, at Nanamow

7 Butter, 109.

OUDE.

Ghat, in lat. 26° 52', and thence in a direction from west to east to Lucknow; 3. from Lucknow, a route lies in a north-easterly direction to Sekrora cantonment, and thence to Burasch, and on to Tulisopore, in the vicinity of the Terai or marshy forest at the southern base of the first range of mountains; 4. from Lucknow also a road proceeds eastward to Fyzabad and the city of Oude, and crossing there the frontier by ferry over the Ghogra, continues to hold an easterly course through the British district of Goruckpore to the cantonment and town of that name; 5. a route proceeds in a north-westerly direction from Fyzabad to Sekrora cantonment; 6. a route proceeds in a north-easterly direction from Sultanpore cantonment, crossing the Ghogra by ferry near Kusba-Tanda, and thence proceeding to Goruckpore cantonment; 7. from Allahabad a route lies northward to Pertabghur, and thence in the same direction to Sultanpore; 8. a route leads from Allahabad north-west to Lucknow; 9. a route runs in a direction first north-easterly then south-easterly, from Cawnpore to Sultanpore; 10. another proceeds in a south-easterly direction from Cawnpore to Pertabghur; 11. a much-frequented route proceeds from Lucknow south-easterly to Sultanpore cantonment, and thence into the British district of Juampore and to the cantonment of that name; 13. another leads from east to west, from Jounpoor cantonment to Pertabghur. With the exception of the military road from Cawnpore to Lucknow, the ways are wretched tracks, in many places scarcely passable for wheels; but in military operations, extensive and important use might be made of the rivers as channels of transport and communication.

OUDE.

Lucknow, the capital, as well as the towns of Fyzabad, Ayodha or Oude, Roy Bareilly, Shahabad, Khayreegurh, Manikpore, Bubraech, Sahganj, Ranjit, Purwa, Tanda, and some others of less importance, will be found noticed in their respective places under the alphabetical arrangement.

In natural advantages, Oude may be justly considered to surpass most parts of India. The defence of its south-western frontier is facilitated for a long distance by the line of the Ganges, fordable only in very few places, and in those but for a short period of the year. The soil of the country is amongst the most fertile; its climate, though rather warm, is favourable both to animal and vegetable life; its means of irrigation and of water-carriage are very extensive, and conveniently distributed for the welfare of every quarter. Accordingly, it need excite no surprise that the most judicious and laborious inquiries should have pointed out this tract, the primitive Kosala, as one of the earliest seats of Indian government and civilization. Buchanan conjectures the settlement to have taken place 1,366 years before the Christian era; the reign of Rama, so celebrated in Hindoo romance and mythology, 775

---

OUDE.

years; and the restoration of the kingdom destroyed by hostile aggression, he attributes to Vikramaditya, king of Oojein, anno 57 B.C. It is probable that the independence of Oude was lost, and no further separate notice appears to be made of it in Indian record. At the close of the twelfth century, after the conquest of Canouj by the Mussulmans, Oude was subdued by Mohammed Bakhtiar Khilzi, an officer sent for the purpose by Kutbuddin Aibuk, viceroy of India, for Mohammed Ghori, sultan of Ghuznee. It thenceforward became an integral part of the realm of the sovereigns of Delhi, and on the conquest of the empire by Baber, was easily subdued. On the dismemberment of the Mogul empire, it was about 1760 seized by Shuja-ud-dowlah, the vizier of the empire and also viceroy of Oude. The following is the table of the sovereigns of Oude, according to Prinsep:

<table>

Shuja-ud-dowlah was son of Sefdarjang, vizier (the second name in the list). Sefdarjang was a native of Nishabur, a town of Khorasan, and claimed to be a Syud, or descendant of Mahomet, and also of Abbas the Great, Shah of Persia. His original name was Abulkeman Muhamed Mukiin, which, on commencing his career of greatness, he changed to Sefdarjang. A brother of his mother, also a native of Nishabur, had previously been established in India, where he had attained the high post of vizier of the empire, and nawab of Oude. This was Saadat Ali Khan, the first on the list. Sefdarjang repaired to India about 1735, in the reign of Muhammed Shah, and received in marriage the daughter of his uncle. Elphinstone states that Sefdarjang was the son of Saadat Khan, but he only became so by marriage with that potentate's daughter. Dow, the historian, styles Sefdarjang the "infamous son of a more infamous Persian pedlar;" but Forster conversed in Persian with some inhabitants of Nishabur, who, he says, "bore indubitable testimony to the ancient rank of the family of" the Persian adventurer. Saadat Khan held a command in the army of Muhammed Shah when it was defeated by Nadir Shah of Persia, and being taken prisoner, died a few weeks afterwards at Delhi. Sefdarjang succeeded his father-in-law in the government of Oude, and subsequently, in 1747, became vizier. Sefdarjang dying 1756, was succeeded in his command of Oude by his son Shuja-ud-dowlah, who, in 1761, was made vizier by Shah Alum II., and having previously established himself as the actual sovereign of Oude, was thenceforth known by the name of the Nawab Vizier.
OUDE.

1798. Saadat A%, brother of Shuja-ud-dowlah.
1814. Ghazee-ood-Deen Hyder.
1827. Nuseeer-ood-Deen Hyder.
1887. Mahomed Ali Shah, succeeded in 1842 by his son Soorya Jah.

Shuja-ud-dowlah having in 1768 made common cause with Meer Cossim in resisting the arms of the East-India Company, was, May 18th; 1764, repulsed in an attack on the British army at Patna, and on the 22nd of the same month was totally routed at the battle of Buxar. In the following year, 1765, the British army entering Oude, occupied Lucknow, and again defeated Shuja-ud-dowlah, who in the same year was glad to make peace, putting Shah Alum, the titular emperor of Hindostan, or Great Mogul, in possession of the districts of Allahabad and Corah. In 1768 reports reached the government that the Nawaub Vizier was making extensive military preparations with a view to obtain possession of the provinces of Corah and Allahabad. A reduction of his military force was considered necessary; and by the treaty of November, 1768, the Nawaub Vizier stipulated not to "entertain a number of forces exceeding 35,000 men." Of this number, there were to be—cavalry 10,000; ten battalions of sepoys, not to exceed 10,000; the Nujib regiment, consisting of 5,000 men with matchlocks; 500 artillery; and the remaining 9,500 were to be irregulars, neither to be clothed, armed, nor disciplined after the manner of the English sepoys or Nujib regiment. The ill-advised Shah Alum having transferred his claim to the province of Corah and Allahabad to the Mahrattas, was considered to have forfeited those possessions; and by the treaty of 1773, they were transferred to the Nawaub Vizier, in consideration of the sum of 50,00,000 rupees. In 1774 the British troops, auxiliary to the Nawaub Vizier, having overthrown the Rohilla power, the greater part of Rohilcund became subject to that potentate. Shuja-ud-dowlah died in January, 1775, and was succeeded by his eldest son Asoph-ud-dowlah, who, at his accession, ceded by treaty to the East-India Company Benares, Joupare, and some contiguous districts; and in return, the English engaged "to defend the soubah of Oude at all
OUDE.

...times." It was also stipulated that a brigade of British troops, consisting of two battalions of Europeans, one company of artillery, and six battalions of sepoys, should be stationed in Oude whenever required by the vizier; for the support of which he engaged to pay monthly 2,60,000 rupees, an annual amount of about 312,000l. By agreement, 1781, one regiment of sepoys was added, for the purpose of protecting the office, treasury, and person of the resident at Lucknow, at an expense of 30,000l. annually; and it was provided that Faizullah Khan, the Rohilla chief, having forfeited his independence, the Nawaub Vizier should occupy his dominions, and pay him a moneyed income. In 1787 the Nawaub Vizier agreed to fix his subsidy at 500,000l. per annum; in which sum was included the additional expense on account of troops, the allowance to Saadut Ali Khan, the Rohilla stipend, and the expenses of the British residency. In 1797, a great increase of the Company's military establishment having taken place, the vizier consented to defray the expenses of two regiments of cavalry, one European and one native, the additional charge not exceeding 55,000l. per annum; making the total subsidy 555,000l. per annum. In 1797 the vizier Asoph-ud-dowlah died, and the British government recognised the succession of his supposed son, Vizier Ali. The spuriousness of Vizier Ali's birth being, however, soon after established, Saadut Ali, the brother of the late vizier, was placed on the musnad.

By existing treaties, the Company were bound to defend the territories of Oude against all enemies. In order to enable them to fulfil this engagement, and at the same time to provide for the protection of their own dominions, they had largely increased their military establishment, by the addition of newly-levied regiments both of infantry and cavalry; and, in consequence thereof, Saadut Ali agreed, in 1798, to increase the subsidy to 760,000l. per annum. The Nawaub Vizier also ceded the fortress of Allahabad, and gave 80,000l. to the Company for its repairs, and 30,000l. for those of Futtehgurh. The British troops in Oude were not to consist of less than 10,000 men, including Europeans and natives, cavalry, infantry, and artillery; and should it become necessary to augment the Company's troops beyond the number of 13,000 men, the vizier agreed to pay the actual difference occasioned by the
OUDE.

excess above that number. The threatened invasion of Zeman Shah attracted the attention of the Marquis Wellesley (then earl of Mornington) to the state of Oude. It was desirable to substitute efficient troops for the unskilful and undisciplined force maintained by the vizier, and to place the defence of the Oude frontier against foreign invasion upon a more substantial basis. To accomplish these objects, the pecuniary subsidy was commuted for a territorial cession; and by treaty,\(^4\) 10th November, 1801, the Nawaub Vizier ceded the Southern Doab, and the districts of Allahabad, Azimgurh, Western Goruckpore, and some others, estimated to yield in the aggregate an annual revenue of 1,35,23,474 rupees, or 1,352,347\({}l\). In July, 1814, Saadut Ali Khan died, and was succeeded by his son Ghazee-ood-Deen Hyder. In the month of October of that year, the government of Oude lent the East-India Company 1,000,000\({}l\). A second loan of like amount was obtained in the following year,\(^5\) in aid of the war against Nepaul; and on its successful termination in the beginning of 1816, the British authorities transferred to Oude the whole of the Terrai, or marshy forest stretching along the north-eastern frontier of that country. This tract had been ceded by the government of Nepaul, and the subsequent transfer to Oude was in liquidation of one million sterling of the loan made by the Nabob Vizier. In 1819, the Nabob Vizier formally renounced his dependence on the Great Mogul, or titular emperor of Hindostan, and assumed the title\(^6\) of king of Oude, the assumption being recognised by the British authorities. The financial exigencies occasioned by the Burmese and Bhurtpore wars led the British government, in 1825, to apply to the ruler of Oude for aid, and another crore of rupees (a million sterling) was obtained as a loan in perpetuity, at an unvarying interest of five per cent.\(^7\) Nusseer-ood-Deen Hyder ascended the musnud in 1827, on the death of his father, Ghazee-ood-Deen. In 1829, the British government agreed to receive as a special loan the sum of 624,000\({}l\)., the interest of which was to form a provision for certain members of his majesty’s family; and in 1833, at the request of the king, the British government consented to receive 30,000\({}l\)., and to guarantee the appropriation of the interest thereof to the relief of the poor of Lucknow. In 1837 Nusseer-ood-Deen

OUDE.

Hyder died, without legitimate issue, and was succeeded by his uncle Mahomed Ali Shah, though not without a sharp but very short struggle; the Begum having raised a disturbance, which, by the promptitude and firmness of the British resident, Colonel Lowe, was suppressed in the outset. A treaty was concluded with the new prince, having for its object the more scrupulous performance of existing obligations. The misgovernment of the kingdom had been a subject of frequent and earnest remonstrance on the part of the British government during nearly the whole of the period which had elapsed since the conclusion of the subsidiary treaty. The footing on which that treaty placed the relations between the two states, was as follows. On the one hand, in consideration of the vizier's ceding a portion of his dominions, the British government undertook to uphold his authority in the remainder against all foreign and domestic enemies. On the other hand, to guard against the evils which might result from this assurance of complete protection to an Asiatic sovereign, not only against invaders but against his own subjects, evils not merely possible but highly probable to occur, an article was inserted in the treaty, by which the nawaub bound himself to establish such a system of administration as should "be conducive to the prosperity of his subjects, and be calculated to secure the lives and property of the inhabitants;" and, moreover, undertook always "to advise with, and act in conformity to, the counsel of the officers of the Company." This essential part of his engagement the nawaub had never performed. Some indications of amendment marked the commencement of the new reign, but, as usual, they were fallacious. In 1842, on the death of Mahomed Ali Shah, his son Soorya Jah ascended the musnud, under the title of Aboonzuffer Muslah-ood-Deen, and the opportunity was embraced for pressing the reforms requisite to place the kingdom in a state of tranquillity and security. A limited period was assigned for effecting the required work; and in default of performance, it was distinctly intimated that the country would be placed under British management. The intimation has been totally ineffective. In weakness and profligacy, the new sovereign has equalled, perhaps even surpassed, his predecessors. The progress has been constantly from bad to worse; and the

Calcutta Review, III. 387.
Friend of India, 1853, p. 515.
home government have felt bound, by the representations of the resident at Lucknow, to extend its sanction to the adoption of such measures as may be requisite to give effect to the provisions of the treaty, all unnecessary interference being forborne.

OUDE.—A town in the kingdom of the same name. It is situated on the right bank of the river Ghogra, which Buchanan considers here to be "fully larger than the Ganges at Chunar," and which is navigable downwards to its mouth, upwards to Mundiya Ghaut, in the district of Bareilly. It extends about a mile in a south-east direction, from the adjoining recent city of Fyzabad; the breadth of the town is something less from north-east to south-west, or from the river landwards. The greater part of the site is on gently-swelling eminences; but to the north-west, or towards Fyzabad, is low. Most of the houses are of mud, and thatched, though a few are tiled. Here, in a large building a mile from the river, is an extensive establishment, called Hanumangurh, or Fort of Hanuman, in honour of the fabled monkey-god the auxiliary of Rama. It has an annual revenue of 50,000 rupees, settled on it by Shuja-ud-daulah, formerly Nawab Vizier. It is managed by a malik or abbot, the spiritual superior; and the revenues are dispensed to about 500 bairagis or religious ascetics, and other Hindoo mendicants of various descriptions; no Mussulman being allowed within the walls. Other establishments of similar character are Sugrimkilla, Ram-Parshad-ka-Kana, and Bidiya-Kund; maintaining respectively 100, 250, and 200 bairagis. Close to the town on the east, and on the right bank of the Ghogra, are extensive ruins, said to be those of the fort of Rama, king of Oude, hero of the Ramayana, and otherwise highly celebrated in the mythological and romantic legends of India. Buchanan observes, "that the heaps of bricks, although much seems to have been carried away by the river, extend a great way; that is, more than a mile in length, and more than half a mile in width; and that, although vast quantities of materials have been removed to build the Mahomedan Ayodha or Fyzabad, yet the ruins in many parts..."

* Ayodhya of Shakespeare, and Awadh of the same; represented by Prinsep as Oudh on the Lucknow rupee; Oudh of the Ayeen Akberry;* Oud of the translators of Baber;* Oude generally of the British writers.
OUDE.

retain a very considerable elevation; nor is there any reason to doubt that the structure to which they belonged has been very great, when we consider that it has been ruined for above 2,000 years.” The ruins still bear the name of Ramgarh, or “Fort of Rama;” the most remarkable spot in which is that from which, according to the legend, Rama took his flight to heaven, carrying with him the people of his city; in consequence of which it remained desolate until repeopled by Vikramaditya, king of Oojein, half a century before the Christian era, and by him embellished with 360 temples. Not the smallest traces of these temples, however, now remain; and according to native tradition, they were demolished by Aurungzebe, who built a mosque on part of the site. The falsehood of the tradition is, however, proved by an inscription on the wall of the mosque, attributing the work to the conqueror Baber, from whom Aurungzebe was fifth in descent. The mosque is embellished with fourteen columns of only five or six feet in height, but of very elaborate and tasteful workmanship, said to have been taken from the ruins of the Hindoo fanes, to which they had been given by the monkey-general Hanuman, who had brought them from Lanka or Ceylon. Altogether, however, the remains of antiquity in the vicinity of this renowned capital must give a very low idea of the state of arts and civilization of the Hindoos at a remote period. A quadrangular coffer of stone, whitewashed, five ells long, four broad, and protruding five or six inches above ground, is pointed out as the cradle in which Rama was born, as the seventh avatar of Vishnu; and is accordingly abundantly honoured by the pilgrimages and devotions of the Hindoos. On the right bank of the Ghogra is a brick fort, of quadrangular ground-plan, with low round towers, but quite ruinous since deserted by Saadat Ali, Nawaub Vizier, who, alarmed at some discouraging prediction, removed the seat of government to the site of Fyzabad, adjacent on the north-west to the more ancient city. Ayodha or Oude is considered by the best authorities to be the most ancient city in Hindostan; and Prinsep mentions that some of its coins in the cabinet of the Asiatic Society of Bengal are of such extreme antiquity that the characters in which their legends are graven are totally unknown. According to Elphinstone, “from thence the princes
of all other Indian countries are sprung.” Buchanan\(^7\) conjectures that it was founded by Brahmins, whom he considers as an immigrant race, more advanced in civilization than the indigenous Indians. “These personages\(^7\) came from western Asia, introducing with them the Sanskrit language, generally admitted to be radically the same with the Persian dialect; while the languages spoken among all the rude tribes that inhabit the fastnesses of India, and which are, probably, remains of its ancient tongue, have no sort of analogy to the languages of the West.” This author supposes\(^8\) the city to have been founded by Vaiwswata, one of this race, about 1,366 years before the Christian era. He considers that its renowned ruler Rama perished A.C. 775,\(^9\) involved in the destruction of his city by the hostile confederacy of his sons; that being rebuilt, it suffered a similar fate under the reign of Vridhabala, A.C. 512; and having lain for centuries desolate, was rebuilt A.C. 57, by Vikramaditya,\(^1\) the celebrated king of Oojein. Tod,\(^2\) however, and Wilford, fond of large numbers, place the foundation of Ayodha\(^6\) in an era more than 2,000 years B.C. The former writer states,\(^3\) without comment, a tradition that Lucknow, distant eighty miles from the present city of Oude, was formerly one of its suburbs. The great decline of Oude is of comparatively recent date, as it is described in the Ayeen\(^4\) Akbery as one of the largest cities of Hindostan; and it is farther stated, “In ancient times this city is said to have measured 148 cose [perhaps 200 miles] in length, and thirty-six cose in breadth. It is esteemed one of the most sacred places of antiquity.” With the havili or municipal district attached, the city is assessed in the Ayeen Akbery\(^5\) at 50,209 rupees, a sum so moderate as to throw discredit on the previous statement of its being one of the greatest cities of India.

\(^4\) Akbery.
\(^5\) Ayeen Akbery.
\(^6\) The city was measured at 50,209 rupees, a sum so moderate as to throw discredit on the previous statement of its being one of the greatest cities of India.

* Tod\(^1\) gives a translation of a passage from the Ramayana, descriptive of this city in its prime:—“Ayodha, built by Menu, twelve yojuns (forty-eight miles) in extent, with streets regular and well watered. It was filled with merchants, beautified by gardens, ornamented with stately gates and high-arched porticos, furnished with arms, crowded with chariots, elephants, and horses, and with ambassadors from foreign lands; embellished with palaces, whose domes resembled the mountain-topes; dwellings of equal height resounding with the delightful music of the tabor, the flute, and the harp. It was surrounded by an impassable moat, and guarded by archers.”

47
present population, according to Butter, is 30,000, including
500 Mussulmans. Distant E. from Lucknow 75 miles, N.
from Allahabad 95. Lat. 26° 47', long. 82° 11'.

OUDEYPORÉ.—See OODEYPOOR.

OUDEYPORÉ, in the territory of Oude, a town on the
route by Shahabad from Lucknow to Shahjehanpoor, 14 miles
S. of the latter. It is situate on the north-western frontier,
towards the British district of Shahjehanpoor; and, according
to Heber, "is what would be called a moderate-sized market-
town in England." It is situate close to an extensive grove of
mango-trees, in the midst of which is a shrine of Siva. The
inhabitants have the character of a thievish, murderous race,
within whose reach it is dangerous to come without adequate
protection. The surrounding country is rather well cultivated,
especially under cotton. Lat. 27° 42', long. 80°.

OUNLA.—See AUNLAGANJ.

OUR.—A town in the Rajpoot state of Jodhpoor, situate on
the right bank of the Sookree river, and 64 miles S.S.W. from
Jodhpoo. Lat. 25° 26', long. 72° 50'.

OURAD.—A town in the native state of Hyderabad, or the
territory of the Nizam, 94 miles N.W. by W. from Hyderabad,
and 109 miles E.N.E. from Sholapoor. Lat. 18° 14', long.
77° 29'.

OURAHEE.—A town in the native state of Oude, situate
on the left bank of the Ghogra river, and 60 miles N.N.E.
from Lucknow. Lat. 27° 39', long. 81° 26'.

OURLAGONDA.—A town in the native state of Hyderabad,
or the territory of the Nizam, 92 miles E. from Hyderabad,
and 76 miles N.W. by N. from Guntoor. Lat. 17° 14', long.
79° 54'.

OURUNGA.—A river rising in lat. 20° 37', long. 73° 33',
on the western slope of the Syadree range of mountains, and
flowing in a westerly direction for thirty-three miles through
the native states of the Daung rajahs and Bansda, and fifteen
miles through the British district of Surat, falls into the
Arabian Sea, in lat. 20° 36', long. 72° 56'.

OWEN ISLAND.—One of the islands forming the Mergui
Archipelago. It is about four miles in diameter, and its centre
is in lat. 11° 15', long. 98° 21'.

OWLUHA KHASS.—A town in the British district of
OWN—PAB.

Sarun, presidency of Bengal, 22 miles S.E. of Bettiah. Lat. 26° 33', long. 84° 49'.

OWNCHUH, in the British district of Mynpoorie, lieutenant-governorship of the North-West Provinces, a town 13 miles N.W. of the town of Mynpoorie. Lat. 27° 10', long. 78° 53'.

OWSA.—A town in one of the recently sequestrated districts of the native state of Hyderabad, or dominions of the Nizam, situate 59 miles N.E. from Sholapoor, and 145 miles N.W. from Hyderabad. Lat. 18° 16', long. 76° 34'.

P.

PAAREE.—A town in the Rajput state of Seeroosee, five miles S.E. from Seeroosee, and 98 miles S. by W. from Jodhpoor. Lat. 25°, long. 72° 51'.

PA BANG.—A town of Burmah, 130 miles E. by N. from Prome, and 109 miles N.N.E. from Pegu. Lat. 19° 8', long. 96° 59'.

PABUL.—A town in the British district of Poonah, presidency of Bombay, 26 miles N.N.E. of Poonah. Lat. 18° 50', long. 74° 3'.

PABUR,¹ a river of Bussahir, has its source close to the Burenda Pass, in a lake² called Charamai, about a mile in circuit, whence the stream rushes forth over a perpendicular rock, forming a fine cascade. Above are enormous banks of snow, 80 or 100 feet in thickness, which have cracked, and partly fallen outward into the lake. This spot is in lat. 31° 22', long. 78° 12', and has an elevation of 13,839³ feet above the sea. The river holds a southerly course of between ten and eleven miles to the confluence of the Sipoon, at an elevation of 8,354 feet above the sea, and in lat. 31° 18', long. 78° 4', and in that distance has the enormous average fall of 545⁵ feet per mile. Continuing its course in the same direction for about eleven miles to Chergaon, it there receives, at an elevation of 5,985 feet, and in lat. 31° 13', long. 77° 56', the Andrytee,
flowing from the north-west. For this last portion of its course it has an average fall of 254 feet per mile. The valley through which it thenceforth holds its way is the finest part of Bussahir, being beautiful, fertile, and highly cultivated, and, from the amount of its elevation above the sea, enjoying a genial climate. The river flows still in a south-westerly direction between ten and eleven miles to Rooroo, lat. 31° 12', long. 77° 48', and at an elevation of 5,100 feet: there it takes a southerly direction, of about twenty-five miles to its confluence with the river Tons, in lat. 30° 56', long. 77° 54', after a total course of about fifty-eight miles. Fraser describes it as a large, clear, and rapid stream at Raingarb, about fifteen miles above its mouth.

PABYA RIVER.—An offset of the Yenmn, one of the branches of the Irrawaddy, the chief river of Burmah. The Pabya runs in a south-easterly direction, intersecting a portion of the valley lying between the Irrawaddy and the Sitang, and falls into the latter after a course of about fifty miles, in lat. 18° 58', long. 96° 30'.

PACHAMRAT, a district of the territory of Oude, is bounded on the north-east by the river Ghogra, dividing it from the British district Gorwickpop; on the south-east by the district of Aldemau; on the south-west by Sultanpoor; and on the west by Bainswara. Its centre is in about lat. 26° 63', long. 81° 53'.

PACHETE, a British district in the presidency of Bengal, is denominated from the town of the same name. It is under the jurisdiction of the Governor-General's agent for the south-west frontier. It is bounded on the north by the British districts Ramgarh and Beerboon; on the east by the British district Bancora; on the south by the British districts Pooralia, Barabhoon, and Singhbhoon; on the west by the British district Chota Nagpore; it lies between lat. 22° 56'—23° 54', long. 86° 46'—87° 10'; is 105 miles in length from north-east to south-west, and ninety-five in breadth. The area is 4,792 square miles. The information respecting its aspect and physical geography is very scanty. Jacquemont, who traversed the northern part from east to west, describes the

* 5,177 feet according to Table iii. No. 40, at end of account of Koonawur by same author.
PACHETE.

country as marked by hills from 400 to 600 feet high, overrun with forest or jungle, in some places intersected with plains or open vales of limited extent. About lat. 23° 36', long. 85° 50', near the town of Pachete, and skirted by the river Damooda, he observed a mountain having, as he conjectured, an elevation of 2,500 or 3,000 feet. About fifteen miles more south-west is Bogonathpore, and near the centre of the district the same traveller examined several hills, the rocky formation of which was of granite; the elevation about 900 feet. In the vales and plains rice is the staple crop, interspersed with oil-seeds and some other products of less importance; but much of the country now covered with jungle or waste, bears marks of having been formerly cultivated. Its present condition probably arises from the injudicious rural economy of the natives, under which the soil is cropped until exhausted, and then neglected until the rest of many years gives hope of its again becoming productive. The geological formation is described by Jacquemont as generally primitive, consisting of either granite, gneiss, or syenite. In the northern part of the district, however, according to the received theories, it appears to be of a later era, coal being found near Jeria, in lat. 23° 44', long. 86° 25', and iron-ore existing in great abundance at a short distance. The south-western part appears to be a maze of mountains and ravines, connected with the adjacent highlands of Chota Nagpore. The district is traversed by some considerable rivers, the course of which being to the south-east, indicates the general slope of the country to be in that direction. The Damooda river, flowing from the British district Rangurh, touches on this district in lat. 23° 42', long. 86° 6', and taking an easterly course for fifteen miles, forms the boundary towards the British district, from which it flows; then entering Pachete, it continues to flow easterly for seventy miles to the eastern frontier, which it crosses into the British district of Bancoora. The Soobunrreeka touches on the western frontier in lat. 23° 26', long. 85° 49', and flowing fifty miles in a south-easterly direction, forming for one-half of that distance the boundary towards Chota Nagpore, finally leaves the district in lat. 22° 55', long. 86° 8'. The Coosye rises on the north-western frontier, in lat. 23° 34', long. 85° 58', and flowing south-easterly about 100 miles, passes over the south-eastern
PAC.

frontier into the British district Midnapore. Many torrents discharge themselves into those greater streams, the country being fully under the influence of the periodical rains; and the drainage is good, in consequence of the rapid declivity of the surface. This tract is considered to have been considerably improved since its incorporation with the dominions of the East-India Company, villages formerly deserted having become re-inhabited, many more having been built, and culture much extended. An investigation has recently taken place into an alleged case of suttee, reported to have been authorized by the rajah of Pachete, a petty potentate of hill jungle in this district; but the inquiry has resulted in the acquittal of the rajah. There does not appear to be any collection of residences which can be properly termed a town. Pachete, regarded as the capital, Rogonathporo, Jalda, and Chas, are noticed under their respective names in the alphabetical arrangement. The great trunk road from south-east to north-west from Calcutta to the North-West Provinces, through Burdwan, passes through the northern part of the district; the other route between the capital and the North-West Provinces, through Bancoora and Hazareebagh, lies through the middle of the district. The only remaining route of any importance is from east to west, from Bancoora, through Jalda, to Chota Nagpore. Pachete is within the limits of the Dewanny granted to the British in 1765 by Shah Alum, emperor of Delhi.

PACHETE, reputed the principal place of the British district of the same name, a ruined town six miles south-west of the right bank of the river Damooda. It is situate midway between the new and old line of road from Calcutta to the North-West Provinces, and about ten miles from each line. * Distance from Calcutta, N.W., 150 miles. Lat. 23° 36', long. 86° 50'.

PACHIPONTA.—A town in the British district of Vizagapatam, presidency of Madras, 56 miles N. by W. of Vizagapatam. Lat. 19° 30', long. 83° 10'.

PACKBURRAH, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village

* Hamilton's statement is as follows:—“The fort is now a wilderness, some miles in extent, situate at the base of a high wooded mountain. It was no doubt at one period a very formidable stronghold, being surrounded by a treble labyrinth of moats and mounds.”
on the route from the town of Moradabad to Mozuffarnuggur, and six miles W. of the former place. It is situate in an open country, partially cultivated. The road in this part of the route is generally good, though in some places sandy and heavy. Distant N.W. from Calcutta 890 miles. Lat. 28° 50', long. 78° 44'.

PACTNA, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a town on the route from Almora to Pilleebheet, 19 miles S.S.E. of the former. Lat. 29° 21', long. 79° 49'.

PADRA.—A town in the native state of Guzerat, or dominions of the Guicowar, situate eight miles W.S.W. from Baroda, and 36 miles N. by E. from Broach. Lat. 22° 12', long. 73° 7'.

PADROO.—A town in the Rajpoot state of Jodhpoor, situate 11 miles E. from the left bank of the Loonee river, and 82 miles S.W. from Jodhpoor. Lat. 25° 32', long. 72° 11'.

PADSHAHGANJ, in the district of Sultanpoor, territory of Oude, a village two miles S.W. of the cantonment of Sultanpoor. Here a foujdar or commandant of police resides in a square building of masonry. Butter estimates the population at 300, of whom 100 are Mussulmans. Lat. 26° 18', long. 81° 59'.

PADSHAH MAHAL, in the British district of Suharunpoor, a ruined palace, built by Shahjehan, is situate at the spot where the river Jumna enters the plain, and opposite the point where the Delhi Canal passes off to the south-west. Distant N.W. from Calcutta 1,030 miles; elevation above the sea 1,276 feet. Lat. 30° 20', long. 77° 39'.

PADSHAHPOOR, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a small town on the route from Hansi to Muttra, by Goorgaon; distant 25 miles S.W. of Delhi. It is situate among rocky hills, and has still a bazar, though much fallen away from its state during the time of the Patan sovereigns of Delhi. Lat. 28° 22', long. 77° 6'.

PADSHAHPOOR.—A town in the British district of Belgaum, presidency of Bombay, 21 miles N.E. by N. of Belgaum. Lat. 16° 5', long. 74° 46'.

* From Padshah, "king," and Mahall, "house."
PAD—PAH.

PADSHAHPUR.—See SHARHPUR.

PADUR.—A town in the British district of Coimbatore, presidency of Madras, 78 miles N.E. of Coimbatore. Lat. 11° 41', long. 77° 49'.

PAGHAM MEW. 1—A town of Burmah, situate on the left bank of the Irawady river, and 99 miles S.W. by W. from Ava. According to Hamilton, 2 this city, in remote times, was the residence of a long dynasty of kings, and is still famous for its numerous temples, to count which is among the proverbial impossibilities of the Burmese. Lat. 21° 7', long. 94° 42'.

PAGODA POINT.—The southernmost extremity of the district of Bassein, province of Pegue, named from a pagoda standing upon it. Lat. 15° 56', long. 94° 19'.

PAGODA POINT.—A prominent headland on the coast of Tenasserim, at the entrance of the small river on which situate the town of Amherst. Lat. 16° 5', long. 97° 38'.

PAHAREE.—See PUHAREE.

PAHARGURH, in the territory of Gwalior, or possessions of Scindia's family, a town 28 miles S.W. of the fort of Gwalior, situate on a sandstone hill; whence its name. Lat. 26° 11', long. 77° 44'.

PAHARPOOR, in the Daman division of the Punjab, a town situate on the right bank of the Indus, 186 miles S. by W. of the town of Peshawar. Lat. 32° 8', long. 71° 3'.

PAHARPOOR, 1 in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Bareilly to that of Futtehgurh, and seven miles 1 N.E. of the latter. The road in this part of the route is good; the country level, fertile, and very well cultivated. 2 Lat. 27° 28', long. 79° 41'.

PAHLADPOOR, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a village on the route from Agra to Bareilly, and 68 miles N.E. of the former. It is situate in a depressed place, formerly the bed of the Ganges, but now deserted by the stream and dry. The road in this part of the route is heavy and sandy, the country partially cultivated. Lat. 27° 52', long. 78° 46'.

* Mountain Town; from Pahar, "Mountain," and Pur, "town;" an unaccountable denomination of a place in a remarkably level tract.
PAHLUNPORE.

PAHLUNPORE.—A petty state under the political superintendence of the presidency of Bombay, comprising the divisions of Dhandar, Deesa, and Dhuneyra. It lies between lat. 23° 57'—24° 41', and long. 71° 51'—72° 46'. It is bounded on the north by the Rajpoot principality of Serohee; on the south by the Putten district; on the east by the Guicowar district of Keyralls, and by that of Daunta; and on the west by the petty chieftainship of Thurraid. It contains about 300 villages.

In the neighbourhood of the town of Pahlunpore the country is undulating, consisting of a succession of sandy hillocks and small valleys. To the north and westward, towards the Rann, it becomes level, and is covered with low jungle. A range of mountains, commencing about eighteen miles from the town of Pahlunpore, and running from north to east, divides Guzerat from Marwar or Joudpore.

To the north and west, the soil, light and sandy, produces only one crop yearly; to the south and east, towards the hills, it is rich and black, allowing of the production of three crops in the year. For the former soil, light showers suffice; but heavy rain is required to develop the productive powers of the latter. The wells are generally about forty feet deep. Wheat, rice, bajree, are the usual products of the district. A good deal of sugarcane is cultivated in the black soil under the hills, but no attempt has yet been made to manufacture sugar. The produce is either made into goor, or sold in the stick at a very cheap rate. A little cotton is grown in the neighbourhood of the villages. The jungles north and west are good grazing lands, but contain no timber of any value. The year may be divided into four seasons; namely, a hot one, comprising the three months of April, May, and June; a rainy season, extending over the months of July and August; a second hot season, continuing during September and October; and a cold season, embracing the remaining five months, from November to March inclusive. During the first season, the hot winds blow with great violence, accompanied by sandstorms; the thermometer often ranging from 90° to 120°. During the second, the rains, though constant, are seldom heavy. The third season (the second hot one) is considered the most unhealthy for both Europeans and natives: the fourth, or cold season, is delightful. With the exception of
the second hot season, comprehending the months of September and October, the climate, although the heat at times is excessive, may be considered not unhealthy.

The rivers that water the Pahlunpore territory, are the Bunass, Surruswuttie, and Numrodakee, with other small streams. They all take their rise from the mountains in the north-east, and fall into or disappear near the Runn. The principal of them is the Bunass, on the banks of which is the Deesa cantonment. There is but one good road through the district; but it is of some importance, being the route by which most of the commerce from Hindostan, including the great mart of Pallee, finds its way to the different bunders on the Cutch, Kattywar, and Guzerat coasts; and again from those bunders to the north.

The number of inhabitants is about 130,000: of these, one-seventh are Mussulmans, the rest Hindoos. There appears to be a remarkable disparity between the numbers of male and female children; and from the paucity of the latter, it has been suspected that female infanticide is practised. Major Brown, who inquired into the subject in 1845, acquitted the people of this horrible charge, and assigned the following three causes for the disparity above adverted to: first, early marriages, under which female children were regarded as adults; secondly, the marriage of females with foreigners; thirdly, an excess of male births. This statement does not, however, appear altogether conclusive. If the practice of early marriage caused a diminution of the apparent number of female children, by throwing them into the class of adults, it must, at the same time, have unduly increased the latter class, and created therein an apparent disparity of females over males. The second cause, if it existed to any great extent, would to that extent account for the disparity; but its existence is asserted only, not proved; and if proved, would further require to be shown that it operates so as to withdraw a large number of females from the country, not after attained maturity, but during the period of childhood. So, also, with the third alleged cause; it is not proved; and it may naturally be asked, Why should this great preponderance of male over female births occur in Pahlunpore rather than anywhere else? There is certainly no reason à priori to conclude that the district is in this respect
PAHLUNPORE.

an exception to the rest of the world. Another British officer, however, Captain Leckie, concurs in the belief that infanticide is not practised; and the result of the latest inquiries (1848) is only the conclusion, that no light can be thrown upon the subject.

The Pahlunpore state pays no tribute of any kind to the British government, but merely the expenses of its agent, amounting to 500 rupees per mensem; but it pays 50,000 rupees yearly tribute to the Guicowar state.

The revenues of the state, including land-tax and customs, average nearly 300,000 rupees per annum: the disbursements, including civil, military, and agency charges, allowances to the late Shumahere Khan's family, and relatives of the present chief, amount to about 200,000 rupees per annum. If to this be added the tribute of 50,000 rupees to the Guicowar, there remains a sum of about 50,000 rupees for the expenses of the chief and his household.

In 1844, a criminal court for Pahlunpore, and the neighbouring petty states, was established, on the principle of the political agent's court in Kattywar and the Myhee and Rewa Cauntas.

The only engagement with neighbouring states is with the petty Rajpoot district Daunta, joining the eastern boundary of Pahlunpore. In 1819, that state having suffered severely from the depredations and incursions of the Coolies of the neighbouring districts north and east of it, its chief sought the assistance of Pahlunpore. It was granted, on an agreement between the two states, that for the support to be afforded, Pahlunpore should receive seven annas in the rupee of all the revenue collected in Daunta. The contract was approved and confirmed by the British government, and still remains in force. The native force consists of 115 horsemen and 416 foot-soldiers; they are stationed on the frontiers and in different villages, as police, to protect the district from incursions of the Coolies and Bheels of the neighbouring states, and to afford protection generally. From the tranquillity which has usually prevailed, it is to be inferred that they are efficient. The only troops subsidized by this state, are 150 Guicowar horse and 100 Guicowar foot. They consist generally of foreigners, and are commanded by jemadars, who receive
PAHLUNPORE.

thirty rupees per mensem for each horseman, and ten rupees per mensem for each foot-soldier; all expenses of arms and horses being included in these respective amounts. They were first raised in 1817. They are bound to serve wherever they are ordered, but the foot-soldiers generally remain stationed in the town of Pahlunpore, together with a portion of the horsemen, for the protection of its different gates. The rest of the horsemen are posted in detachments on the frontier most open to the incursions of plunderers. Formerly, an officer, receiving 600 rupees per mensem, was appointed to command them; but they are now under the charge of the political superintendent.

The nawaub or dewan of this small state is of a Mussulman family, originally from Afghanistan, which appear to have migrated to Behar, and subsequently to Malwa, in which province their chief was confirmed as foujdar of Jhalore, by the Emperor Akbar. Here they remained until the reign of Aurungzebe, by whom they were transferred to Pahlunpore and Deesa, the office of foujdar being retained.

Our first connection with this state was in 1813. For some years previously, the chief power had been in the hands of a faction of Scindee jemadars, who in 1812 murdered the then reigning dewan, Peeroze Khan, when out hunting, under suspicion that he was about to restrict their authority. Having committed this act, they offered the dewanship to his only son, Futteh Khan, the present chief, and then only thirteen years of age. By the advice of his mother he refused the offer, and, through his late father's karbarees, petitioned the Guicowar and British governments for assistance and protection from his father's murderers. In the mean time the jemadars, having seized and placed him in strict confinement, invited his uncle, Shumshere Khol~, then chief of the district of Deesa and Dhuneysra, to Pahlunpore, to undertake the management of affairs. This chief, who had been superseded in the dewaniship by Peeroze Khan eighteen years before, although he had since constantly waged a petty war with Pahlunpore, and sometimes with success, had no hand in the death of the dewan. He, however, accepted the offer made to him; but in the mean time, interference in favour of the rightful heir being considered necessary by both the British and Guicowar governments, Captain Carnac, then Resident at Baroda, proceeded to Pahlun-
Pahlunpore, with a force furnished by those governments, under the command of General Holmes. On the road, information was received that, on the approach of the force to Pahlunpore, the jemadars intended to carry off Futteh Khan, in order that his presence might give a sanction in the country to any lawless measures which it might suit their interest to pursue. In this design, however, Shumshere Khan did not participate, and he was afterwards fully exonerated from all suspicion. In hopes of preventing the meditated act, the force marched with all practicable speed to Pahlunpore, which was threatened with assault, unless Futteh Khan was immediately given up. Thereupon he was sent to the British camp, and Shumshere Khan shortly afterwards surrendered himself. Captain Carnac intimated to the rebellious jemadars, that if they submitted, their personal safety would be insured, and anything they had to urge in defence of their late proceedings would be attended to; but, fearing the displeasure of the British government, they fled, with a few followers, to the hills; whence, from the great strength of the country, and the smallness of the force disposable for the purpose, it was not considered advisable to follow them. The town was given up without resistance.

In consequence of Futteh Khan's youth and inexperience, it became necessary to ascertain if any members of his family were fit to superintend the affairs of the state during his minority. After a strict examination, none were found to whom the trust could safely be committed, all being deficient in intellect, education, or habits of business; or from other causes incapable. Under these circumstances, the choice of a guardian became a point of some difficulty, as the interposition of the Guicowar's authority was a measure which it was most desirable to avert. After some consideration, it was deemed the most advisable course, with a view to the suppression of anarchy and intestine feuds, and to the gratification as far as practicable of the feelings of all parties, to unite the interests of the young chief Futteh Khan with those of his uncle Shumshere Khan. The management of affairs during the minority of the young chief was accordingly offered to Shumshere Khan. He at first refused, and urged his priority of pretension to the guddée over the family of the late chief. Into this claim it consequently became requisite to inquire,
and the result of the researches instituted by Captain Carnac was a conviction that it was untenable. Shumshere Khan after a time acquiesced in the decision; and finally, after much discussion, it was agreed that he should be associated with Futteh Khan; and, having no issue of his own, that he should adopt the latter as his son, and make him heir to all his possessions, including the districts of Deesa and Dhuneyra; with the exception, in the event of a son being subsequently born to him, of a small provision for such offspring. The differences which prevailed having been apparently settled by this compromise, agreements were signed by the respective parties before Captain Carnac; and on the 22nd December, 1813, the ceremony of investing Futteh Khan with the rule of Pahlunpore, and his adoption by Shumshere Khan, took place, in presence of that officer and several other gentlemen, as well as the principal people of the place, to whom the arrangement appeared to be entirely agreeable. To make the tie more binding, it was afterwards agreed that Shumshere Khan should give his daughter in marriage to Futteh Khan. From this date until 1816, although dissensions were not unknown, it does not appear they were considered of sufficient moment to require the interference of the British government; but at the latter end of that year Futteh Khan complained to the resident at Baroda of his uncle's conduct in alienating the revenues of the state, and other malpractices. Lieutenant Robertson was thereupon deputed to inquire into the alleged grievances; and, both parties being summoned to Sidpore (eighteen miles from Pahlunpore), a lengthened investigation of the different charges took place; and it was fully proved that Shumshere Khan had on several occasions departed from his agreement as guaranteed by the British government. It appeared that since he had held the management of affairs the debts of the state had greatly increased; that the Guicowar's tribute of 50,000 rupees had remained unpaid since 1813; and that within three years last preceding, Shumshere Khan had, without the signature or permission of Futteh Khan, given away nearly 100 villages to wuzedars, distant relations of his own, and to others, in order to attach them to his person; thereby alienating from the state nearly 50,000 rupees, or upwards of one-fifth of its yearly revenue. It was also reported
PAHLUNPORE.

to the agent, on good authority, that Shumshere Khan had threatened to take the life of the young chief, should he be deprived of the management of affairs. Lieutenant Robertson having received his instructions from the resident, then addressed a letter to Shumshere Khan, in the name of the British government, informing him that, in consequence of his having failed in administering the affairs of the state according to his agreement, as shown in the foregoing inquiry, it was deemed necessary, with a view to the security of the rights and interests of Futteh Khan, to divest him (Shumshere) of all authority in the state; and that any resistance to this measure would deprive him of all claim to consideration, and put an end to any chance of retaining his authority over Deesa. On receiving this letter, Shumshere Khan, as a last resource, opened a private communication with Futteh Khan, trying to persuade him that the British government, in interfering between them, merely wished to benefit itself at their joint expense, and that Futteh Khan would thereby become a mere pensioner on that government. He suggested a restoration of the relations of friendship for their mutual benefit, and promised at once to carry into effect the marriage of his daughter with Futteh Khan, a measure long before agreed on, but which had been delayed by the dissensions of the contracting parties. These solicitations and promises seem to have answered their intended purpose, for Futteh Khan secretly left the agent's camp in company with Shumshere Khan, and proceeded with him and his followers to Pahlunpore. On this Lieutenant Robertson returned to Baroda, and a field-force under Colonel Elrington was detached to Pahlunpore to effect a settlement of its affairs; Captain Miles being appointed to accompany it and conduct the negotiations.

On the 10th October, 1817, the force having arrived in the neighbourhood of Pahlunpore, it was attacked by the troops under Shumshere Khan, who, after a slight skirmish, retreated within the walls. The town was then assaulted and carried; Shumshere Khan and all his followers retreating towards the hills northward, taking Futteh Khan with them. Detachments from the British force having followed the fugitives, Shumshere Khan took shelter in the foreign territory of Neemuj, and Futteh Khan shortly afterwards came to Captain
PAHLUNPORE.

Miles and submitted himself to the British government, who, taking into consideration his youth and inexperience, and being aware that he had acted by the advice and influence of others, refrained from visiting his error in the manner which he might reasonably have expected. Of his inability to conduct his own affairs, he himself, however, soon became painfully conscious; for, a few days after his return, he addressed a letter, through Captain Miles, to the Guicowar, requesting that prince to use his interest with the British government to allow him an English gentleman to superintend his concerns; and also asking that the Guicowar government would depute a respectable native as vakeel, to assist him in his revenue accounts, and make arrangements for the payment of the yearly tribute to that state. Both requests* were consented to, and after some negotiation, the villages unlawfully alienated from the state by Shumshere Khan having been resumed, articles of agreement in supersession of all former treaties were sealed and delivered by Futteh Khan to Captain Miles, and afterwards approved and confirmed by the British and Guicowar governments, with the exception of one article; the number of troops to be subsidized was reduced from 250 to 150, the state being considered unequal to bearing the expense of the greater force. Under this agreement, Futteh Khan engaged to hold no communication with Shumshere Khan or his adherents. Captain Miles was shortly after confirmed in his appointment as political agent, to superintend the affairs of Pahlunpore. In 1819, Shumshere Khan having given himself up, nine villages, whose net revenue amounted to 25,000 rupees per annum, were appropriated for his support; to revert to the state at his death. This event happened in 1834, when provision was made for his widows and servants, to the amount of 6,000 rupees yearly, in addition to the revenue of four villages, amounting to 6,000 rupees; making a total of 12,000 rupees. His daughter had been married to Futteh Khan shortly after his submission. By the arrangement which has thus existed with this state since 1817, the British government exercise a control over its finances; the different charges and expenditure being fixed, and no extra disbursement of any

* The office of Guicowar's vakeel appears to have been subsequently abolished.¹

¹ Bombay Pol. Disp. 6 Feb. 1840.
PAHLUNPORE.

heavy amount being admitted without its special sanction. All interference, however, with its internal affairs is limited to recommending measures when called for, leaving the execution of them to the authorities.

The interference of the British government has been of the greatest advantage to this petty state. From the day a British agent was placed in charge of its affairs, it has continued to prosper; instead of being a scene of anarchy and confusion, ruled as it often had been, by a band of foreign mercenaries, and overwhelmed with debts, it is now in a flourishing condition, in the enjoyment of perfect immunity both from foreign oppression and internal dissension, and unembarrassed by oppressive debts.

The present dewan of Pahlunpore derives his descent from a tribe of Affghans, who occupied Behar in the reign of Hoomayon, emperor of Delhi. In 1682, Futtuh Khan, one of his ancestors, was dewan of Shalore, now a large district of Marwar, adjoining Pahlunpore. During his deanship he received from the emperor of Delhi, in gift, the districts of Pahlunpore, Deesa, and Sachore: he died in 1688, leaving one only son, by name Peer Khan, whose claim to the deanship was set aside by his uncle Kumaul Khan, on the plea of incapacity. During Kumaul Khan's reign, and in the year 1698, Shalore and Sachore were resigned by him to Marwar. Pahlunpore and Deesa only were retained in the family, who then came to reside at the former place, which from this date became the seat of government. In 1704 Peeroze Khan succeeded his father Kumaul Khan; Peer Khan's claim having been again passed over, he applied to Delhi, and obtained a sunnud of investiture from the royal court for his patrimonial rights. By some mistake, or through the intrigues of Peeroze Khan's vakeel, who also went to Delhi to support his master's rights (it is said, indeed, that the writer of the sunnud was bribed by him), the name of Peeroze Khan was inserted in the sunnud instead of that of Peer Khan, unknown to the court. This lost the latter his rights; for Peeroze Khan, standing on the letter of the sunnud, refused to resign, and Peer Khan was eventually persuaded not to urge his claim, and remained satisfied with the grant of ten or twelve villages for his maintenance. He died in 1735, leaving an only son, named
PAHLUNPORE.

Futteh Khan, who, at his decease, left three sons—Tej Khan, Peeroze Khan (the present chief's father, who was murdered in 1812), and Mahomed Khan. Peeroze Khan, the second son, some years afterwards laid claim to the chieftainship, but for a long period without effect, the other branch of the family being too powerful.

Peeroze Khan, the son of Kumaul Khan, died in 1721, and was succeeded by his son Kurreen Khan, who, in 1783, was followed by his son Par Khan. In 1743, Par Khan, having died childless, was succeeded by his uncle Bhadur Khan, son of Peeroze Khan and brother to Kurreen Khan. In 1781, Sulleen Khan, his son, reigned; and in 1784 was succeeded by his son Sheer Khan. In 1791, Sheer Khan, having died childless, was succeeded by his nephew Moobariz Khan, through the intrigues of his mother, a sister of Sheer Khan's; but he only reigned for about two years, being superseded by Shumshere Khan, of whom mention has already been made. Shumshere Khan was a grandson of one of the brothers of Bhadur Khan, and was assisted in the usurpation by such of the chiefs of the district as were hostile to Moobariz Khan. During the disturbances which followed, Peeroze Khan, the son of Futteh Khan, whose claims had so long been overlooked, now urged them afresh, and Shumshere Khan having fled to Deesa, his rival was installed in 1794, with, it is alleged, the unanimous voice of the people. The murder of Peeroze Khan in 1812 was followed by the events which have been already recounted.

PAHLUNPORE, in Guzerat, a town, the capital of the petty state of the same name, and situate on the route from Neemuch to Deesa. It is surrounded by a wall, and has some trade and manufactures, there being within it many artificers of various kinds, and shopkeepers. The population is estimated at 30,000. The chief, styled Nawaub, who is also chief of Deesa, is descended from a tribe of Afghans settled in Behar in the time of Humaion, emperor of Delhi, and established in their present possessions in the reign of Aurungzebe. Distance from Neemuch, W., 160 miles; from Deesa, S.E., 18 miles; from Ahmedabad, N., 80 miles. Lat. 24° 12', long. 72° 23'.

PAHTUN.—A town in the British province of Sattara,
PAI—PAK.

presidency of Bombay, 23 miles S.S.W. of Sattara. Lat. 17° 22', long. 73° 56'.

PAI.—A town in the British territory of Tenasserim, presidency of Bengal, 103 miles N.N.W. of Tenasserim. Lat. 13° 30', long. 98° 36'.

PAIGA, in the Daman division of the Punjab, a town situated 33 miles W. from the right bank of the Indus, 69 miles W. by S. of the town of Mooltan. Lat. 29° 57', long. 70° 24'.

PAIK TSOUNG.—A town in the British territory of Tenasserim, presidency of Bengal, 51 miles N.E. by N. of Moulmein. Lat. 17° 5', long. 98° 8'.

PAIMSAH KA PURWA,1 in the territory of Oude, a village on the route from Lucknow to Sultanpoor, 702 miles S.E. of the former. It is well provided with good water, and supplies may be had from the surrounding country, which is generally cultivated, though in some parts overrun with low jungle. The road in this part of the route is winding and bad, being much cut up. Lat. 26° 25', long. 81° 40'.

PAINTTEE, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to Mozuffurnuggur, and nine miles W. of the former place. There is open ground for encamping, and water can be obtained from a good well. The surrounding country is open and partially cultivated, and the road in this part of the route is good. Distant N.W. from Calcutta 897 miles. Lat. 28° 51', long. 78° 41'.

PAIRA.—A river rising in lat. 19° 32', long. 73° 30', on the eastern slope of the Western Ghats, and, flowing through the Ahmednugur collectorate in an easterly direction for 105 miles, falls into the Godavery on the right side, near the town of Toka, in lat. 19° 36', long. 75° 3'.

PAKANGGOLO.—A town in the native state of Nepal, situate 13 miles E. from the left bank of the Arun river, and 111 miles E. by N. from Khatmandoo. Lat. 27° 59', long. 87° 3'.

PAK CHAN.—A town in the British territory of Tenasserim, presidency of Bengal, 90 miles S. by W. of Tenasserim. Lat. 10° 51', long. 98° 42'.

PAKOLIYA,1 in the British district of Goruckpore, lieu-
tenant-governorship of the North-West Provinces, a petty town on a small feeder of the river Koyane. Buchanan states the number of its houses at 100; and consequently, if six persons be assigned to each, its population may be taken at 600. Distant 46 miles W. of Goruckpore cantonment. Lat. 26° 48', long. 82° 34'.

PAKUL.—See Bakul.

PAL, in the Rajpoot state of Jodhpour, a village on the route from Balotra to the town of Jodhpour, and five miles S. of the latter. It is situated at the north-eastern base of a low rocky ridge. The road in this part of the route is tolerably good, and passes through a wooded tract. Lat. 26° 15', long. 73° 4'.

PALAKEE, in the Sindé Sagur Doob division of the Punjab, a town situated 36 miles W. from the right bank of the Jhelum, 106 miles N.W. by N. of the town of Lahore. Lat. 33° 3', long. 73° 17'.

PALAMOW, a British district of Bengal, is bounded on the north by those of Behar and Ramghur, or Hazerabagh; on the east by the British district last named; on the south by that of Chota Nagpore; on the south-west by the British district Sirgoojah; and on the west by that of Mirzapoor. It lies between lat. 23° 12'—24° 22', long. 83° 18'—89° 31'; is eighty-eight miles in length from south-east to north-west, and seventy in breadth: the area is 3,468² square miles. It is an ill-explored country, and little comparatively is known of it, but that it is rough and irregular.Torrents are numerous in the rainy season, and most of them discharge themselves into the river Koel, which, passing into the British district of Behar, and falls into the Son on the right side, in lat. 24° 33', long. 83° 56'; having a total length of about 130 miles. The torrents quickly disappear as the dry season advances. To this, however, the Koel is an exception, retaining a continuous stream at all times. The mountains are everywhere covered with forest or jungle, containing a great variety of trees and shrubs; amongst them the sal (Shorea robusta). The Mimosa catechu, denominated by the natives Khair, is very abundant; and the gum-catechu, or terra Japonica, which is largely prepared from it, is regarded the best in India. The jungly valleys and mountains harbour
the gaour, a bovine quadruped, greatly exceeding ordinary kine in dimensions, a full-grown bull being above eighteen hands high. It is shy, but when brought to bay very fierce; and though many have been taken young, all attempts to domesticate them have failed. There are also in those valleys the wild buffalo, elk, nylgau (Antilope pica), various kinds of deer and antelopes. Tigers are very numerous, and lions have sometimes been destroyed. There are besides, bears, leopards, wolves, jackals, foxes, and a species of wild dogs, which are represented as hunting in packs, and destroying large game. The wild hog, porcupine, and pangolin, lurk in the jungles which overspread the mountains and valleys. Snakes are numerous, and very dangerous; the boa-constrictor has been met with twenty-three feet long, and the cobra de capello, and many other dreadfully venomous kinds, are common. Bees are numerous, and produce fine honey; and the lac insect abounds in the jungles, producing both the resin of the same name and a much-esteemed dye. The mineral resources of the district are of considerable value and utility. At Singra, on the right bank of the river Koel, in lat. 24° 5', long. 84° 3', are extensive fields of good coal, and iron-ore in inexhaustible quantities. Some other parts contain valuable coal-fields and iron-mines; and the Koel might, it is said, be made available for navigation to a considerable extent. The only places which can with any propriety be denominated towns, are Oontaree, near the northern frontier, and Palamow, in the middle of the district. There are, however, numerous villages and hamlets dispersed over it; yet altogether it is very thinly peopled. Nothing has been stated as to its separate population, but the amount, united with that of Chota Nagpore, is computed to be 482,900. Its area is 3,468 square miles.

This district is part of the territory under the administration of the political agent for the south-western frontier and commissioner for Chota Nagpore, to whose jurisdiction it was transferred in 1833, subsequently to an insurrection commencing in the preceding year, and which overspread the whole of this district, and the adjoining one of Chota Nagpore. A strong military force was employed to reduce the disturbed districts to obedience, and subsequently order has prevailed.
the same name, situate five miles east from the river Koel, amidst mountains containing coal and iron. Distance S.W. from Patna (Behar) 145 miles. Lat. 23° 50', long. 84° 1'.

PALAR.—A river rising in the territory of Mysore, in lat. 13° 20', long. 78° 2'. It holds its course circuitously, but generally in a south-east direction, for fifty-five miles, through Mysore, when it crosses the frontier into the British district of North Arcot, thirty miles below which point it passes through the gorges of the Eastern Ghats, in lat. 12° 41', long. 78° 36', about eighty-five miles from its source. Quitting the hills, it holds a course generally east for eighty-seven miles, and passes by Vellore and Arcot, to lat. 12° 48', long. 79° 42', where it crosses the British district of Chingleput, through which it continues its direction south-eastward for forty-eight miles, to its fall into the Bay of Bengal, on the Coromandel coast, in lat. 12° 28', long. 80° 13'; its total length of course being about 220 miles. "The entrance of the river Palar or Paliar, about three and a half or four miles to the southward of Sadras, is contracted by a bar or narrow ridge of sand, inside of which the river becomes of considerable width." During the rainy seasons, it has a considerable volume of water, but at other times is completely dry, though water may always be obtained by digging in its bed.

PALAVERUM.—A town in the British district of Chingleput, presidency of Madras, 11 miles S.W. of Madras. Lat. 12° 58', long. 80° 15'.

PALLAKONDA.—See PALLAKONDA.

PALDEO, in Bundelcund, a small state, or rather jaghire, granted by the East-India Company to the commandant of the fortress of Kalleenjur at the time of its surrender, and still held by his descendant. It is stated to have an area of twenty-eight square miles, fourteen villages, a population of 8,500, and an annual revenue of 10,000 rupees, or 1,000l. The jaghirdar maintains a force of 100 infantry. Paldeo, the principal place, is situate in a mountainous tract 67 miles S.W. of Allahabad. Lat. 25° 6', long. 80° 51'.

PALEE, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pergunnah of the same name, situate at the

* Palar of Tassiu; Palaur of Buchanan.
PAL.

eastern base of a rocky range, formed of sandstone largely intermixed with quartz. Distance S. from Delhi 18 miles. Lat. 28° 23', long. 77° 18'.

PALEEKHEYRUH, or PALIKHAIIRA.—A town in the British district of Muttra, lieutenant-governorship of the North-West Provinces. Lat. 27° 34', long. 77° 31'.

PALGHAT,1 in the British district of Malabar, presidency of Madras, a fort with straggling town on the north or right side of the Palaur, the principal feeder of the river of Ponany. It is situate in a beautiful country, in that great depression in the Western Ghats, about lat. 10° 35'—10° 55', "which leaves a communication between the two coasts of the Peninsula, covered only with forests of the stately teak." The fort of the Palghat is a fine structure, built by Hyder Ali, when that adventurer, in the year 1757, found footing in Malabar, by marching to the aid of the Nair chief of this place. In the year 1783 it was taken by a British force commanded by Colonel Fullarton, and restored to Tippoo Sultan in the following year, by the treaty of Mangalore. In the year 1790 it was, after a brief but vigorous siege, surrendered to a British force commanded by Colonel Stuart. Distance from Calicut, S.E., 68 miles; Mangalore, S.E., 190; Cananore, S.E., 113; Coimbatoor, S.W., 25; Bangalore, S., 162; Madras, S.W., 290. Lat. 10° 45', long. 76° 43'.

PALHANPOOR.—A town in the native state of Guzerat, or dominions of the Guicowar, 20 miles E. from Deesa, and 83 miles N. by W. from Ahmedabad. Lat. 24° 12', long. 72° 23'.

PALHANPOOR.—See PAHLUNPORE.

PALHRAGUDI.—A town in the native state of Nepal, situate on the left bank of the Arun river, and 147 miles S.E. by E. from Khatmandoo. Lat. 26° 38', long. 87° 14'.

PALI,1 in the district of Sandi, kingdom of Oude, a town on the route from Futtegurh to Seetapore, 18 miles N.E. of the former, 64 W. of the latter. It is situate on the right bank of the river Garba, here crossed by ferry during the rainy season, at other times by ford. There is a bazar, and supplies are abundant. The road to the south-west, or towards Futtegurh, is good, the country open, level, and cultivated; to the north-east, or towards Seetapore, the road is bad, the country level 69

and partially cultivated. Tieffenthaler, describing the condition of this town about eighty years ago, states that it was formerly populous. Distant 90 miles N.W. of Lucknow. Lat. 27° 30', long. 79° 44'.

PALI, in the district of Bainswarra, territory of Oude, a large decayed town on the right bank of the river Goomtee, 38 miles N.W. of Sultanpoor cantonment, 42 S.E. of Lucknow. Lat. 26° 38', long. 81° 33'.

PALI, in Gurwhal, a small town in a sequestered glen, down which flows a stream, falling into the Jumna on the right side. It contains about fifty houses, and probably between 400 and 500 inhabitants, the men of whom are stout and hard-featured, the women generally of light complexions and agreeable countenances. The townsmen and other inhabitants of the glen are noted for a hardy and warlike character, having frequently rebelled against the rajah of Gurwhal, as well as against the Goorkhas during their occupation of the country; and at one time cut off an entire company of those invaders. Lat. 30° 53', long. 78° 22'.

PALICONDA.—A town in the British district of North Arcot, presidency of Madras, 26 miles W. of Arcot. Lat. 12° 54', long. 79°.

PALKOTE.—A town in the British district of Chota Nagpoor, presidency of Bengal, 38 miles S. of Lohadugga. Lat. 22° 54', long. 84° 40'.

PALLA.—A town in the British district of Candeish, presidency of Bombay, 39 miles W. by S. of Malligaum. Lat. 20° 29', long. 73° 55'.

PALLAKONDA.—A town in the British district of Vizagapatam, presidency of Madras, 69 miles N.N.E. of Vizagapatam. The talook of which this town is the principal place, has been leased by the government to the European firm of Arbuthnot and Co. for a term of years. Lat. 18° 36', long. 83° 49'.

PALLAMCOTTAH, in the British district of Tinnevelly, under the presidency of Madras, a town and military station situate a mile from the right bank of the Chindinthaora, here crossed by a good bridge, forming a communication with the town of Tinnevelly, on the opposite side of the river. The fort and town are situate on an extensive plain, varied by a few low
hills. The site of the fort is a slightly elevated surface of granite rock, of a mouldering nature; but not having a wet ditch, it is free from a common and active source of deliterious exhalations. There are a few tanks to the northward; but as they are shallow, and the water, in consequence of being quickly drawn away for the purposes of irrigation, does not stagnate, no pernicious results ensue. Within the fort are many wells, in which water is obtained at depths varying from eight to twelve feet below the surface, and which never fails at any time of the year, but it is perceptibly saline, except in such as are much worked. The barrack occupied by the European artillery is on the most elevated ground within the fort, and contains many commodious apartments. Near the barrack, and separated from it by a narrow road, are the houses of the European officers, forming an oblong square on the southern face of the fort. They are large convenient buildings; and attached to them are public baths, affording the means of luxury and health. The place of arms for the native troops is in the middle of the town, and has in front an open space large enough to admit of a regiment being drawn up in line. Within a few yards of the place of arms, and separated from it by a road, is the hospital, a spacious building, and originally commodious, but now old and in bad repair, so that it is contemplated by government to replace it by a structure adequate to the exigencies of such an establishment. The native lines are situate outside the fort, on a rock of slight elevation, but sufficient to insure complete drainage. The establishment of the jail and its hospital were, in 1833, removed from the town of Tinnevelly to this place; but the buildings originally provided for their accommodation were very faulty and inadequate; and though improvements have been made from time to time, they are still liable to considerable objections. Within the last few years a church has been erected here. Elevation above the sea 120 feet; distance from the town of Tinnevelly, E., three miles; from Madura, S., 88; from Ramnad, S.W., 88; Trichinopoly, S.W., 160; Madras, S.W., 348. Lat. 8° 43', long. 77° 48'.

PALLASSWARA.—A town in the British district of E.I.C. Ms. Doc. Candeish, presidency of Bombay, 69 miles N. of Malligaim. Lat. 21° 31', long. 74° 28'.
PALLAWUR, in the British territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Hoosungabad to Baitool, 36 miles N. of the latter. Lat. 22° 21', long. 77° 55'.

PALLAYGAUM.—A town in the native state of Hyderabad, or territory of the Nizam, 93 miles S. by W. from Ellichpoor, and 173 miles E.N.E. from Ahmednuggur. Lat. 19° 54', long. 77° 14'.

PALLEE, in the Rajpoot state of Jodhpour, a town on the route from Nuseerabad to Deesa, and 108 miles S.W. of the former. It is the principal mart of Western Rajwara, being situate at the intersection of the great commercial route from Mandavee, in Cutch, to the northern provinces, and from Malwa to Bahawulpoor and Sinde. Tod, one of the few Europeans who have visited it, thus states its commerce:—

"Palli has its own currency, which, amidst universal deterioration, it has retained undebased. From remote times, Palli has been the connecting link between the seacoast and northern India. Commercial houses established at Murcat-Mundavi, Surat, and Noanuggur, transmit the products of Persia, Arabia, Africa, and Europe; receiving those of India and Thibet. To enumerate all the articles, it would be necessary to name the various products of each:—from the coast, elephants' teeth, rhinoceros-hides, copper, tin, pewter, dates, dried and moist, of which there is an immense consumption in these regions; gum-arabic, borax, cocoanuts, broad-cloths, striped silks, called putung; various dyes, particularly the kermes or crimson; drugs, especially the oxides of arsenic and quicksilver; spices, sandalwood, camphor, tea, mummaye or mummy, which is much sought after in medicine, and green glass (kanch): from Bhawulpoor, soda (saji), the dyes called al and munjit, matchlocks, dried fruits, asafetida, Mooltan chintz, and wood for household furniture: from Kotah and Malwa, opium and chintzes: from Jeypoor, various cloths and sugars: from Bhooj, swords and horses. The exports of home production are the two staple articles of salt and woollens; to which we may add coarse cloths and paper, made in the town of Palli. The looes or blankets are disseminated throughout India, and may be had at from four to sixty rupees per pair. Scarfs and turbans are made of the same material, but not for exportation;
but salt is the chief article of export, and the duties arising therefrom equal half the land-revenue of the country." Pallee is khalsa, or the crown property of the maharaja of Joudpore, in contradistinction to the numerous places belonging to his feudatories. The sum annually obtained from the duties is estimated by Tod at 7,500l. It was formerly surrounded by a wall, and in consequence, its possession was frequently contested by conflicting parties during the civil wars of Joudpore, until, at the desire of the inhabitants the defences were demolished; and their ruins now give the place an air of desolation, at variance with its actual prosperity. It is an ancient place, and was acquired by the Rajpoors under Seoji, A.D. 1156. Tod states the number of houses at 10,000, which would fix the number of inhabitants at about 50,000. Water and supplies for troops may be obtained here in abundance. Distant S.W. from Delhi 351 miles; S.E. from Joudpore 40 miles. Lat. 25° 48', long. 73° 24'.

PALLEE.—A town in the British district of Tannah, presidency of Bombay, 39 miles S.E. of Bombay. Lat. 18° 31', long. 73° 18'.

PALLERA.—A native state on the south-west frontier of Bengal, bounded on the north by the native state of Bombra; on the east and south by that of Talcheer; and on the west by Bherecole. It is twenty-three miles in length from east to west, and fourteen in breadth; and contains an area of about 220 square miles: its centre is in lat. 21° 10', long. 84° 40'.

PALLYAD.—A town in the native state of Guzerat, or dominions of the Guicowar, situate 46 miles E. from Rajkote, and 83 miles W.S.W. from Kaira. Lat. 22° 15', long. 71° 31'.

PALMYRAS POINT.—The name of a low headland on the coast of Orissa. It is clothed with palmyra-trees, and has on each side of it, at a small distance, the mouth of a river. The lighthouse, formerly situate upon Point Palmyras, was abandoned in consequence of the encroachment of the sea, and False Point selected as the site of a new one. Lat. 20° 43', long. 87° 6'.

PALOOR, in Sirmor, a stream rising on the southern declivity of the Chour peak, and in lat. 30° 51', long. 77° 33'. After a course of about twenty miles in a south-westerly direction, it falls into the Giree, in lat. 30° 42', long. 77° 26'.
PAL—PAM.

PALPA.—A town in the native state of Nepal, situate on the right bank of the Gunduck river, and 112 miles W. by N. from Khatmandoo. Lat. 27° 54′, long. 83° 30′.

PALPOOR, in the territory of Gwalior, or possessions of Scindia's family, a town 70 miles S.W. of Gwalior fort. Lat. 25° 49′, long. 77° 10′.

PALREE, in the Rajpoot state of Jodhpoor, a considerable village on the route from Nusseerabad to Deesa, and 163 miles S.W. of the former. It contains 200 houses and forty shops, and is supplied with water from forty wells and two tanks. The surrounding country, though occasionally studded with hills, is in general rather level, with a gravelly soil, free from jungle, and partially cultivated. Lat. 25° 9′, long. 73° 5′.

PALRI, in the jaghure of Jhujhur, lieutenant-governorship of the North-West Provinces, a village on the route from Rohtuk to Narnol, and 40 miles S.W. of the former. Lat. 28° 25′, long. 76° 15′.

PALUM, in the British district of Delhi, lieutenant-governorship of the North-West Provinces, a town on the north-eastern bank of the extensive jhil or shallow lake formed by the overflow of the Hansouti Nullah during rains. Distance S.W. from the city of Delhi 10 miles. Lat. 28° 35′, long. 77° 8′.

PAMA-CHUN, in Bussahir, a halting-place in the district of Koonawur, and on the south-eastern declivity of the Manerung Pass, from the crest of which it is about five miles distant. In consequence of the great elevation, even the hardy birch ceases to grow, and the only fuel is from a species of juniper, called by the natives pama; and whence the place has received its name. Elevation above the sea 13,643 feet. Lat. 31° 53′, long. 78° 25′.

PAMBAR.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the right bank of the Chenaub river, and 56 miles E.S.E. from Sirinagar. Lat. 33° 38′, long. 75° 50′.

PAMPUR, in Cashmere, a town about five miles S.W. of the city of Sirinagar, is situate on the north bank of the Jhelum or Behut, in a level tract of great fertility, and presents most delightful views of the mountain-ranges to the north. Here is a bridge of several arches over the river. The town is
surrounded by luxuriant orchards and gardens: it contains between 300 and 400 houses, a bazar, and two Mahometan shrines. The neighbouring country is generally cultivated for the growth of saffron, and the produce is considered finer than that of any part of Hindostan. Lat. 34°, long. 75° 3'.

PANCHLA, in the Rajput state of Jodhpour, a village on the route via Nagor, from Jessulmer to Nasirabad, and 131 miles N.W. of the latter. It is built in a scattered manner, but is in good condition, and is supplied with water from three wells 200 feet deep. The road is in some places sandy and heavy, in others firm and good. The surrounding country is in many places covered with thick jungle of kajira, a small tree, the bark of which is in times of scarcity in this wretched country, converted into a sort of food, used as bread: there is also in abundance a sort of burr with very sharp points, the seeds of which are used as food, and considered very palatable. Lat. 26° 58', long. 73° 20'.

PANCHORA.—A town in the British district of Candeish, presidency of Bombay, 54 miles E. by N. of Malligaum. Lat. 20° 38', long. 75° 20'.

PANCHU, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village in the Bhotia subdivision of Juwahir, on the route to Hiundes or Chinese Tartary, and 15 miles S. of the Juwahir Pass. It is situate on the right bank of the Gooree, a little below the confluence of the Goonka. Elevation above the sea 11,284 feet. Lat. 30° 24', long. 80° 12'.

PANDEHWARA, or PANDLEWARA,1 in Guzerat, or territory of the Guicowar, a town on the route from Baroda to Neemuch, 1062 miles N. of former, 184 S.W. of latter. Lat. 23° 24', long. 78° 40'.

PANDHARPUR.—See PUNDERPOOR.

PANDOORNA.—A town in the territory of Nagpoor or Berar, 51 miles N.W. by W. from Nagpoor, and 70 miles N.E. by E. from Ellichpoor. Lat. 21° 36', long. 78° 33'.

PAN DRAS, in Ladakh, a village on the route from Le to Cashmere, by the Bultul Pass, from which it is distant twenty miles N.E. The land in the vicinity is in general employed for pasture, and produces the prangos pabularia, so highly esteemed by Moorcroft for winter fodder. Izzet Ullah,1 who calls this

1 Oriental Mag. 1845, March, 105.
PAN.

place Panderras, observes that the road is good in this part of the route. Gholaum Hyder\(^2\) styles the village Pasen-dur-rauz. Professor Wilson, the editor of Moorcroft,\(^3\) considers that it should be called Pain-dras,\(^4\) or "Lower Dras;" but this does not seem justifiable, as the place lies higher up the course of the river, and is more elevated than Dras. The elevation above the sea exceeds 9,000 feet.\(^5\) Lat. 34° 23', long. 75° 47'.

PANDREE, in the British district of Baitool, territory of Saugar and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Baitool to Ellichpoor, 37 miles S.W. by S. of the former. Lat. 21° 22', long. 77° 41'.

PANDRENTON, in Cashmere, an antique temple of small dimensions, standing in a reservoir or tank about four miles S.E. of Srinagur, the present capital of the valley. It is a striking specimen of the simple, massive, and chaste style which characterizes the architectural antiquities of Cashmere. The ground-plan is a square of twenty feet, and the roof pyramidal. In each of the four sides is a doorway, ornamented with pilasters right and left, and surmounted by a pediment. The whole is constructed of blocks of regularly-hewn limestone. The interior is filled with water, communicating with that without, which is about four feet deep; and as the building is completely insulated, it can be reached only by wading or swimming. The purpose of its construction is not known, but it is generally considered a Buddhist relic. It exhibits neither inscriptions nor sculptures, except the figure of a large lotus carved on the roof inside. Lat. 34° 2', long. 74° 47'.

PANDURE.—A town in one of the recently sequestrated districts of the native state of Hyderabad, presidency of Bengal, 21 miles W.S.W. of Ellichpoor. Lat. 21° 5', long. 77° 15'.

PANEEGONG.—A town of Assam, in the British district of Durrung, presidency of Bengal, 55 miles N.E. by E. of Durrung. Lat. 26° 44', long. 92° 52'.

PANEPEUT,\(^6\) a British district in the territorial division of Delhi, within the lieutenant-governorship of the North-West Provinces, is bounded on the west and north by Sirhind;

* Panipat, or Paniput, in Briggs's Index; Panipat in Elphinstone's India; Paniput in the account by Casi Raja.\(^7\)

---

\(^1\) Perishita, iv. 685.
\(^2\) Hist. of India, ii. 649.
\(^3\) As. Res. iii. 91.
PANEEPUT.

on the east by the river Jumna, separating it from the British districts of Mozuffurnuggur and Meerut; and on the south by the British district of Delhi. It lies between lat. 26° 50'—
29° 48', long. 76° 40'—77° 16'; is sixty-five miles in length,
in a direction nearly south to north, thirty miles in breadth, in
a direction at right angles to the former; and contains an area
of 1,279 square miles.2 The country is level, and intersected
by the Delhi Canal and its branches, as well as by numerous
watercourses,3 ramifying in time of inundation between the
Jumna and those artificial channels. Where not irrigated by
the Jumna, or by canals, the country is generally barren
and of repulsive appearance, being in many places a waste of
undulating sands, exhibiting a very scanty growth of harsh
herbage or stunted shrubs. In many places the soil is covered
with a saline efflorescence,4 so abundant as to look like snow;
and this incrustation, though containing a large admixture of
sulphate of soda with common salt, is collected and used for
culinary purposes.

The extent of the cultivation of sugarcane in Paneeput has
been officially estimated at 5,327 acres. The total produce of
goor, that is, the entire extract before the sugar is separated
from the grosser matter with which it is combined, is estimated
at 49,084 cwts.; of which, 18,882 cwts. are believed to be con-
sumed within the district, at an average of 8 lbs. per head;
leaving a surplus of 30,202 cwts.

Among other productions, the Cactus opuntia is common,
and so large, strong, and armed with such formidable thorns,
that fences made with it are impenetrable even by elephants.
In some fertile tracts, out of the reach of canals or streams,
the water requisite for successful cultivation is raised by the
Persian wheel.5 Numerous wells furnish the requisite supply
of water, and the irrigation thus effected produces abundant6
and luxuriant crops. The average depth of the wells is from
thirty to forty feet.

The jungles, which in some places extend as far as the eye
can reach, abound in game, especially hares, quails, partridges,
and peafowl. A few years ago, they were infested by lions,7
which are, however, now rarely met with, except farther to the
west.

The district is divided into five pergunnahs:—1. Paneeput
PANEEPUT.

Bangur, 2. Paneeput Khadir, 3. Soonput Bangur, 4. Soonput Khadir, 5. Kurnaul; containing 492 mouzahs or townships. The population in 1848 was returned at 288,420; of which number there were Hindoos, agricultural, 125,593; non-agricultural, 60,601: Mahomedans and others, agricultural, 24,781; non-agricultural, 72,445.

It will be seen from this return, that though the Hindoos greatly preponderate in numbers, the proportion of the other classes (chiefly Mussulmans) is larger than is to be found in many parts of India. The number of persons per square mile is something more than 221. The following classification of the towns and villages of this district, with reference to population, is obtained from very recent official returns (1848).

The chief places will be found noticed in the alphabetical arrangement.

The land-assessment has been fixed for a term of years, which will expire on the 1st July, 1872. The district came into the possession of the British from Scindia in 1803, under the treaty of Serjee Anjengaum.

PANEEPUT.1—The chief town of the British district of the same name. It is situate in a fertile tract, the resources of which are to a considerable extent developed by cultivation, of which irrigation by water, principally drawn from numerous wells, is a very efficient part. The appearance of the place on approaching it is described by Barr2 as striking and pleasing.

“As we approached Paniput, the whole of the surrounding country was converted into one mass of cultivation, here and there broken by small clumps of trees, through which are to be seen the spires and cupolas of numerous temples, with their white and polished surfaces, starting from the dark foliage in

† Paneeput, 16,870; Buras, 30,056; Kurnaul, 15,029.

78
PANEEPUT.

which they are imbedded, with an almost dazzling brilliancy.””
Jacquemont considered Paneeput the largest town, except Delhi, which he had seen in Northern India. It is surrounded by walls and ramparts, apparently of no great antiquity, and built at different periods and in different styles, the outline being very irregular. The houses, generally built of brick, and in some instances two stories high, have usually balconies, and a few have cupolas. A great number, however, are said to be untenanted; but if this be so, the place has, notwithstanding, an amount of population which may entitle it still to rank as a very considerable town. The number of inhabitants in 1848, as ascertained from official report, was 16,870. The chief source of the busy scenes of life, however, appears to be that created by two caravanserais which the town possesses, one on each side. The environs are overspread with the ruins of tombs, many indicating, by their size and style of building, that they were the memorials of persons of rank. Water and supplies for troops are abundant here, and there is an extensive and good encamping-ground a mile north of the town, and on the right of the road. The civil establishment consists of a magistrate and collector, a joint-magistrate and deputy-collector, an officer in medical charge, and a deputy-collector of the second grade, under Regulation XIX. of 1833.

Paneeput is situate on the great military route between Western Asia, Afghanistan, and the Punjab, on the one side, and Central and Eastern Hindostan on the other; and the plains around it have repeatedly been the field of battle for powers contending for the empire of India. Here, in 1526, Baber, at the head of 12,000 men, encountered and utterly routed Ibrahim, the Patan king of Delhi, whose army is usually estimated at about 100,000 men, with 1,000 elephants. According to generally received statements, above 40,000 of the army of Delhi were slain, and among them Ibrahim, whose empire was seized by Baber; thus establishing the renowned Timurian dynasty. In the same locality, in 1761, a battle was fought between the Afghans, commanded by their king Ahmed Durrance, and the Mahrattas, under Sedasheo Rao Bhao. The

---

* Hamilton¹ states “that in its greatest extent it is four miles in circumference.”

¹ East-India Gazetteer, ii. 367
troops of Ahmed Shah are estimated by Elphinstone⁷ at 40,000 Afghans and Persians, 13,000 Indian horse, and 38,000 Indian infantry, with thirty pieces of cannon; that of the Mahrattas at 15,000 infantry, of whom 9,000 were regularly disciplined, 55,000 cavalry in regular pay, and 15,000 predatory horse, with 200 cannon, numerous wall-pieces, and a great supply of rockets. After some hours of hard fighting, the Mahrattas yielded to the superior valour of the Afghans and the military talents of Ahmed, and were totally routed;⁸ their commander, and nearly the whole of their best troops, being slain either in the battle or in flight.

Paneeput is mentioned in the Ayeen Akbery as situate in the soubah of Delhi, and as having a brick fort. It lies on the route from Delhi to Kurnaul, and the road in this part of the route may be described as good. Distant N. from Delhi 78 miles,⁹ N.W. from Calcutta 965 miles. Lat. 29° 23', long. 77° 2'.

**PANEITH.**—A town in the native state of Guzerat, or the dominions of the Guicowar, situate on the left bank of the Nerbudda river, and 28 miles S. from Baroda. Lat. 21° 51', long. 73° 18'.

⁷ Hist. of India, ii. 942.

¹ Account of Cabul, ii. 295.
¹⁺ As. Res. iii. 194 — Cai Raja. Account of the Battle of Paneeput.

* Elphinstone elsewhere¹ gives amounts varying from the above. "It is not easy to determine accurately the force of each party on this occasion. I conjecture Ahmed Shah's force to have amounted to 40,000 of his own subjects, 30,000 Rohilla troops, and 10,000 belonging to the Indian chiefs: he had also 700 camel-swivels and a few guns. The Mahrattas are generally said to have had 300,000 men." "They had not less than 200 guns." Whether the 300,000 of the above statement are to be considered as fighting men, is not apparent. If they are to be so considered, the account differs widely from that in the text; if it include the mob of followers which always hang on an Indian army, it may not be irreconcilable with it. It will, however, be greatly at variance with another estimate resting on native authority, but with which it may be reconciled by taking the other branch of the alternative, and assuming the 300,000 to have been fighting men. According to the account last referred to, the Mahratta host, including camp-followers, are estimated at 500,000 persons, and of these it is computed 200,000 were slain. The difficulty arising from the variance between the two accounts, which rest on the distinguished authority of Mr. Elphinstone, may be met in another way. The account given in the text was written many years subsequently to that contained in the earlier part of this note, and may therefore be considered as the result of more mature inquiry, and more deliberate judgment.
PANGKONG.—A long and narrow lake, 100 miles in length, with an average breadth of three, indenting the eastern frontier of the dominions of Gholab Singh, the ruler of Cashmere. Its waters are clear and salt: elevation above the sea 14,224 feet. Cunningham is of opinion, that "in former ages the Pangkong lake had an outlet at its north-western extremity, through a gorge in the limestone cliffs, into the present scanty stream passing by Muglib, and joining the Shayok river just above the village which gives its name to the stream." Its centre is in lat. 33° 45', long. 79° 15'.

PANGREE.—A town in the British district of Sholapoor, presidency of Bombay, 45 miles N. of Sholapoor. Lat. 18° 19', long. 75° 58'.

PANGTOOR.—A town in one of the recently sequestrated districts of the native state of Hyderabad, presidency of Bengal, 16 miles N. of Kurnool. Lat. 16° 3', long. 78° 4'.

PANGULL, in Hyderabad, or territory of the Nizam, a town 80 miles S. of the city of Hyderabad. Lat. 16° 15', long. 78° 9'.

PANJAL, or PANGILA, in the petty hill state of Hindoor, a village situate on the river Gumbur, and in the valley between the ridge of Ramgurh and that of Malown. Lat. 31° 5', long. 76° 52'.

PANJUR.—A river rising on the eastern slope of the Syadree range of mountains, in lat. 20° 53', long. 78° 53', and, flowing through the British collectorate of Candeish in an easterly direction for sixty-two miles, and northerly for thirty miles, falls into the Taptee river, on the left side, in lat. 21° 17', long. 74° 59'.

PANNAH.—See PUNNAH.

PANNALAGURH.—A town in the native state of Gwalior, or possessions of Scindia's family, situate 40 miles S. by E. from Kurgoon, and 107 miles N.E. by E. from Malligaum. Lat. 21° 18', long. 75° 54'.

PANSAVAL.—A town in the British district of Tanjore, presidency of Madras, 37 miles S. of Tanjore. Lat. 10° 16', long. 79° 18'.

PANTI, in native Gurwhal, a village pleasantly situate on the right bank of the Jumna, and 400 feet above its bed. Lat. 36° 48', long. 78° 15'.
PAN—PAP.

PANWARA.—A town in the British district of Bhagulpur, presidency of Bengal, 25 miles S. by E. of Bhagulpur. Lat. $24^\circ 55'$, long. $87^\circ 4'$.

PANWELL, in the collectorate of Tannah (North Can-
can), presidency of Bombay, a small town or village on the
route from Bombay to Poona, 55 miles N.W. of the latter
place. It is situated on the estuary of a small river, the stream
of which fails during the dry season, at which period Panwell
is accessible by water only when the tide is full. At this state
of the tide, communication with Bombay is practicable across
the haven of that place, from which it is distant E., in a direct
line, 22 miles. This passage, by which a considerable portion
of the intercourse between the capital and the great military
station of Poona is carried on, has heretofore been subject to
much uncertainty and delay, from the varying depth of water
and fluctuating strength of tides and winds; but the intro-
duction of the agency of steam will have tended to abate
these inconveniences. Heber describes the place as a "small-sized
country town, with a pagoda, and a handsome tomb of a
Mussulman saint." This pagoda is dedicated to Mahadeo or
Siva. Here is a small fortress, the extent and plan of which
may still be traced, though it is now much decayed.$$ There
is a bungalow or government lodge for travellers, and the road
to Poona is well drained and bridged. Panwell is styled a
populous town by the Court of Directors, and provision has
been made for improving it.$ The Powna and Moolah rivers
are crossed at Panowlee and Awund by indifferent ferries, both
of which may be avoided by the more circuitous route of
Dapooree. Distance from Poona, v\textit{id} Dapooree, 70 miles.
Lat. $18^\circ 58'$, long. $73^\circ 12'$.

PAPARGHAT, in the district of Sultanpoor, territory of
Oude, a ruined town on the route from the cantonment of
Sultanpoor to Jounpore, 47 miles N.W. of the latter, 10 S.E.
of the former. Here Asaf-ud-daula, nawab vizier of Oude,
who reigned from 1775 to 1797, proposed to found a capital,
and commenced building a palace; but, having visited the

* Panwell of Tassin; Panwelli of Heber.$$
† Hamilton says, "This place is extensive, and being eligibly situated
for business, carries on a considerable commerce, although it stands in the
midst of a small morass."
work after employing 400 workmen for three years, was deterred from its completion by a pestilence which broke out among his followers. The Hindoos attributed the visitation to the wrath of their goddess Debi, to appease whom the superstitious Mussulman prince erected a temple in her honour. The temple remains; and annually, in the month of Chait (March-April), about 4,000 Hindoos resort thither, to pay their devotions at the shrine, but remain only one night, in consequence of the pestilential air of the place. Here are besides a mosque and the unfinished palace of the nawab. Half a mile south is the post of a foydar or commandant of police, who has charge of these buildings. It has water in abundance, but supplies are scarce. Lat. 26° 10', long. 82° 17'.

PA PHOS.—A town of Burmah, 140 miles E. by N. from Prome, and 118 miles N.E. by N. from Pegu. Lat. 19° 12', long. 97° 7'.

PAPOUS.—A village in the British district of Hurreeana, lieutenant-governorship of the North-West Provinces. E.I.C. Ms. Doc. Lat. 28° 59', long. 76° 3'.

PAPPAMOW.—See Phaphamow.

PAR.—A river rising in lat. 20° 30', long. 73° 43', on the western slope of the Syadree range of mountains, and flowing in a westerly direction through the territory of the Daung rajahs, then dividing the petty native states of Dhurrum pore and Peint, and subsequently traversing the British collectorate of Broach, it falls into the Arabian Sea, in lat. 20° 32', long. 72° 56'.

PARA, a river of Ladakh, rises in lat. 32° 27', long. 78° 3', at the north-eastern foot of the Parang Pass over the Western Himalaya range, and flows through Rupshu, one of the districts of Gholab Singh's dominions. Subsequently it enters the Thibet valley of Tsotsu, through which it flows for eighty-five miles, and finally traverses the district of Koonawur to its junction with the Sutlej, in lat. 31° 49', long. 78° 41'.

PARADANGA.—A town in the British district of Rungpore, presidency of Bengal, 29 miles N.E. by E. of Rungpore. Lat. 25° 55', long. 89° 40'.

PARAMBALORE.—A town in the British district of Trichinopoly, presidency of Madras, 32 miles N.N.E. of Trichinopoly. Lat. 11° 15', long. 78° 55'.
PARAMUTTY.—A town in the British district of Coimbatore, presidency of Madras, 66 miles E. of Coimbatore. Lat. 10° 57', long. 77° 59'.

PARANG.—A pass over the western range of the Himalaya Mountains; it leads from the British district of Spiti into Gholab Singh's district of Rupshu. Lat. 32° 27', long. 78° 3'.

PARBUTTY (EASTERN), a small river in the Mahratta territory of Gwalior, rises close to the town of Sipree, and in lat. 25° 31', long. 77° 46'. It first holds a northerly course for about forty miles, and subsequently turning to the east for fifty miles, falls into the Sinde, on the left side, in lat. 25° 47', long. 78° 21'. Wilford¹ styles it "the little river Para," but is in error in stating that it winds round the town of Narwar, which is situate on the right bank of the Sinde, twenty-five miles above the mouth of the Parbutty.

PARBUTTY* (WESTERN), a river of Malwa, rises² on the north side of the Vindhya range, 20 miles S. of the town of Ashta, and in lat. 22° 45', long. 76° 33'. It has a winding course of 220 miles, first in a north-easterly direction for eighty miles, and subsequently in a north-westerly, and falls into the Chumbul on the right side, in lat. 25° 50', long. 76° 40'. It receives in its course some mountain-streams, and during rains swells so as not to be fordable. It is crossed³ by ford on the route from Kotah to Saugor, at Kukwasa, 150 miles from its source, and in lat. 24° 28', long. 77° 7'; and "there has a bed 150 yards wide, rocky and stony bottom, and fine clear stream." At Khaliyanpur, sixty miles lower down the stream, and in lat. 25° 7', long. 76° 42', it is crossed⁴ by the route from Kotah to Calpe, and is there fordable.

PARDUMPOOR.—A town in the native state of Phooljer, on the south-west frontier of Bengal, situate on the right bank of the Aurag river, and 69 miles S.W. by W. from Sumbulpoor. Lat. 21°, long. 83° 5'.

PARE.—A town in the native state of Bhotan, situate on the right bank of the Guddada river, and 75 miles N.E. by E. from Darjeeling. Lat. 27° 35', long. 89° 23'.

PARELI,¹ in the petty hill chieftainship of Ghoond, tributary to Keonthul, a village situate on the right bank of the

* Parbati, from whom the river was named, is, according to Hindu mythology, the wife¹ of the deity Siva or Mahadeva.
PAR.

Gire, here a shallow, rapid, rocky stream of very clear water.\(^2\) Archer\(^3\) describes it as "a sweet, romantic village, surrounded with luxuriant cultivation. Judging from the marks of steppes or platforms up to the very tops of the hills, as we came along, the population must have been more extensive than at present is the case." \(\text{Lat. } 31^\circ 5', \text{long. } 77^\circ 27'.\)

PARELL.—A town in the island of Bombay, containing a residence for the accommodation of the governor of the presidency, with a considerable domain attached.\(^1\) Distance N. from Bombay Castle five miles. \(\text{Lat. } 19^\circ, \text{long. } 72^\circ 55'.\)

PARGONG.—A town in the British district of Sumbulpoor, presidency of Bengal, 43 miles W.N.W. of Sumbulpoor. \(\text{Lat. } 21^\circ 40', \text{long. } 83^\circ 24'.\)

PAREMBAUCUM.—A town in the British district of Chingleput, presidency of Madras, 33 miles W. of Madras. \(\text{Lat. } 13^\circ 2', \text{long. } 79^\circ 51'.\)

PARNEIR.—A town in the British district of Ahmednuggur, presidency of Bombay, 20 miles W.S.W. of Ahmednuggur. \(\text{Lat. } 19', \text{long. } 74^\circ 29'.\)

PARO.—A town in the native state of Bhotan, situate on the left bank of the Guddada river, and 64 miles E.N.E. from Darjeeling. \(\text{Lat. } 27^\circ 22', \text{long. } 89^\circ 18'.\)

PARO.—A town in the British district of Chota Nagpoor, presidency of Bengal, 56 miles S.S.E. of Lohadugga. \(\text{Lat. } 22^\circ 43', \text{long. } 85^\circ 6'.\)

PARSIDEYPoor,\(^1\) in the district of Salon, territory of Oude, a town five miles N.E. of the left bank of the Sae, 60 S.E. of Lucknow. Butter estimates\(^2\) the population at 4,000, almost all cultivators; and of the number, 3,000 Mussulmans. \(\text{Lat. } 26^\circ 4', \text{long. } 81^\circ 34'.\)

PARBUNGALOOR.—A town in the native state of Poodocottah, or possessions of Rajah Tundimian, situate 28 miles S.E. by S. from Trichinopoly, and 69 miles N.E. by E. from Madura. \(\text{Lat. } 10^\circ 30', \text{long. } 79^\circ.\)

PARUPUNADA.\(^1\)—The principal place of a tallook or subdivision\(^2\) of the same name, presidency of Madras. The town is also called Vaipur, Veypur, and Beypoor, under which last name it is described in the alphabetical arrangement. Parupunada or Beypoor is in lat. \(11^\circ 10', \text{long. } 75^\circ 51'.\)

PARYUTTIPURAM.—A town in the British district of
PAR—PAT.

Vizagapatam, presidency of Madras, 77 miles N. by E. of Vizagapatam. Lat. 18° 48', long. 83° 30'.

PARYUB.—A town in the British district of Tinnevelly, presidency of Madras, 70 miles N. of Tinnevelly. Lat. 9° 44', long. 77° 51'.

PASKYUM.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 83 miles E.N.E. from Sirinagur, and 119 miles N. from Kangra. Lat. 34° 29', long. 76° 20'.

PASLEE, in the British territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Seuni to Hoosungabad, 24 miles W.N.W. of the former. Lat. 22° 10', long. 79° 20'.

PATA.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 178 miles E. by N. from Sirinagur, and 178 miles N.E. by N. from Chamba. Lat. 34° 28', long. 78°.

PATAN.—See PATAN.

PATAN,1 in Cashmere, a village 25 miles N.W. of the town of Sirinagur. It is situated close to a kariwah or table-land of fertile soil, once well cultivated, as is evident from the remains of canals constructed for the purpose of irrigation. At present it is a complete waste.

This seems to have been an important locality during the predominance of Hindooism in Cashmere, as in the vicinity are the remains of two ancient buildings in a style similar to the celebrated temple at Matnur. Patan is still a place of pilgrimage for the superstitious Hindoos.2 Lat. 34° 7', long. 74° 23'.

PATANAGO.—A town of Burmah, situate on the left bank of the Irawady, and 83 miles N. from Prome. Lat. 19° 58', long. 94° 51'.

PATAPPOOR,1 in the British district of Cawnpore, lieutenant-

1 Moorcr, Punj. Bokh. ii. 278.
2 F. Von Hugel, Kashmir, ii. 584.
1 Kashmir, ii. 107.
* Vigne, who took much interest in the architectural relics in Cashmere, gives the following description of the ruins at Patan:—"After Martund, the old ruin at Putun [Patan] is perhaps the best specimen of the square ruined temple to be found in the valley. The walls and colonnade of the peristyle are no longer in existence, and the interior of the remaining building, with its well-carved and graceful figures of Vishnu and Luchni, are well worth the inspection of the traveller, being scarcely inferior to those at Martund. At a little distance from it are the ruined walls of a smaller and separate building, and both and all are built of the mountain limestone occurring near Putun."
governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 20 miles N.E. of the latter. The road in this part of the route is bad, the country partially cultivated. Lat. 26° 19', long. 80° 1'.

PATABI,1 in Gurwhal, a village five miles from the left bank of the Bhageerettee, as the Ganges is called in the upper part of its course. It is situate in a lofty, mountainous country, but well wooded and romantic.2 Lat. 30° 48', long. 78° 25'.

PATCHMARREE,1 in the territory of Nagpore or Berar, a town situate among the Mahadeo Hills, situate on a table-land of such elevation* that the climate is well suited for the vegetable productions of the temperate parts of Europe, and congenial to the constitutions of Europeans. In this secluded tract Appa Sahib, the fugitive rajah of Nagpore or Berar, took refuge after his flight from his capital in 1818; but was expelled by the judicious and persevering operations of the British troops commande by Col. Adams, who penetrated3 the most difficult recesses, reduced the strongest fastnesses, and thoroughly established the British power over that part of the Mahadeo Mountains. Distant from Hoshungabad, S.E., 53 miles; S. from Saugor 100; N.W. from Nagpore 96. Lat. 22° 25', long. 78° 30'.

PATCHWAREE, in the British district of Beerbhoorn, presidency of Bengal, a town among the highlands in the north of the district, on the south-west route from Berhampoor to Bhagulpoo, 58 miles N.W. of former, 60 S.E. of latter. Lat. 24° 31', long. 87° 30'.

PATEETA,1 in the British district of Mirzapoor, lieutenant-governorship of the North-West Provinces, a town2† surrounded by rampart and fortress, five miles south of the fort of Chunar. In 1781, when Cheyt Singh, the refractory zemindar of Benares, raised the standard of rebellion against the East-India Company, he garrisoned Pateeta, which was stormed3 by Major Popham, though with considerable loss to the captors.

* According to a recent publication,1 the elevation above the sea is 4,500 feet. In the Asiatic Journal2 an elevation of about 3,000 appears intimated.
† Hodges gives a view of it under the name of "Fort of Peteter."

PAT.

Distant S.W. from Benares 18 miles; N.W. from Calcutta, by Hazaribagh and Sasseram, 420. Lat. 25° 4', long. 82° 54'.

PATGAON.—A town in the native state of Kolapoor, territory of Bombay, 44 miles S.S.W. from Kolapoor, and 43 miles W.N.W. from Belgaum. Lat. 16° 8', long. 74°.

PATGONG.—A town in the British district of Rungpore, presidency of Bengal, 44 miles N.N.W. of Rungpore. Lat. 26° 17', long. 89° 3'.

PATHANKOT¹ (Afghan's Fort), in the north-east of the Punjab, and in the southern range of the Himalaya, 14 miles W. of Nurpur, and on the route to Cashmere. The fort has a fine appearance, is built substantially of brick, has a ditch and glacis, and being situate on level ground, is not commanded in any direction; it consequently admits of an obstinate defence. A lofty citadel in the interior rises above the ramparts. It was built by Shah Jehan, the Mogul emperor, during his attack on Nurpur. Notwithstanding its advantageous position and great strength, it seems to be allowed to fall to decay. Elevation above the sea 1,205² feet. Lat. 32° 18', long. 75° 42'.

PATHOWLEE¹, in the British district of Agra, a village on the route from the city of Agra to Jeypoor, and six² miles W. of the former. The road in this part of the route is good, the country well cultivated. Lat. 27° 9', long. 78°.

PATIALAH.—See PUTTEEALA.

PATIAR, in the north-eastern quarter of the Punjab, a town situated 13 miles E.N.E. of Kangra, and 92 miles N.N.E. of the town of Loodianah. Lat. 32° 6', long. 76° 30'.

PATN.¹—One of the principal towns in the valley of Nepal, situate on a rising ground about two miles to the south-east of Kathmandoo, and near the confluence of the Bhagmutty with the Meenusakra and Fookacha. The town is adorned by several handsome edifices, and is said to be a neater town than Kathmandoo. It is also much older than the present capital, having been built by the Newars,² the aborigines of Nepal, before the invasion of the Ghoomkas. Lat. 27° 38', long. 85° 17'.

PATNA.¹—A British district under the presidency of Bengal, named from its principal place. It is bounded on the north by the Ganges, separating it from the British districts Sarun, Tirhoot, and Monghyr, by which last-named district it is also bounded on the north-east and south-east; on the south
PATNA.

it is bounded by the British districts Monghyr and Behar; and on the west and north-west by the river Son, separating it from the British district Shahabad. It lies between lat. 25° 3'—25° 38', long. 84° 45'—86° 10'; is eighty-five miles in length from east to west, and forty-five in breadth: the area is 1,828² square miles. The Ganges flows along its frontier in a stream "fully as large⁶ as in any part of its course," being usually a mile wide, with a very rapid⁴ current during the rainy season, and at all times crowded with craft. The navigation of the river connected with this district is eighty-two miles in length. The bank, though of clay,⁴ is rather high at the town of Patna, but in some parts of its vicinity the surface becomes depressed, and subject to be overflowed. The Son forms the western and north-western boundary of the district for thirty-five miles, and is for that distance navigable⁶ for craft of considerable burthen. The Poonpoon, and the lesser Poonpoon, also traverse the district, which, in the season of the periodical rains, is everywhere intersected by torrents and watercourses. It is altogether a very fertile and highly-cultivated tract, producing abundant crops of fine rice, wheat, and barley, and having its aspect enlivened by numerous orchards and groves of fruit-bearing and other trees. Much opium, of fine quality, is produced about Muneer and Pholwarree, in the western part of the district.⁷

The winters here are in general very mild. The hot season commences about the middle of March, and terminates about the end of June: the heat is very great along the banks of the Son and the Ganges, being increased by the radiation from the sands in the beds of those rivers. The rainy season occurs in the end of summer and the beginning of autumn. On the banks of the Ganges, towards the Son, the west winds⁸ usually prevail from the middle of January until nearly the end of March. From thence to the middle of June, the prevalence of the east and west winds is nearly equal. From that period to the end of July, the east winds are dominant; after which, until the end of August, the west winds again blow. From thence to the end of October, the east winds return; and subsequently, until the middle of January, the east and west winds are nearly balanced. In the rainy season, near the Ganges, there are occasionally north and south winds, and on

the banks of the Son, it is alleged that whatever wind may prevail in the course of the day, every morning the wind blows from the south.

The district comprises the following talookes or subdivisions:—Mussourah, Azimabad, Bhimpur, Biswak, Bykutpoor, Muneer, Pillitch, Sanda, Gyaaspoor, Phoolwari, Tilarah, and Shahjhanpur. The population is 1,200,000.

The most considerable towns—Patna, the sudder or chief civil station, as well as Dinapore, the military cantonment, and some others—are noticed under their respective names in the alphabetical arrangement.

In 1837, with a view to effect a more equal division of the business in the revenue and judicial departments in the two collectorates of Behar and Patna, several pergunnahs were transferred from the former and attached to the latter; by which arrangement the land revenue of Patna was of course considerably increased, and that of Behar diminished. The routes are—1. From north to south, from Bankipore and Patna to Gaya, and thence continued to join the great north-western route from Calcutta; 2. from east to west, along the bank of the Ganges, from Berhampore, through Bhaugulpore, Bar, Patna, Dinapore, and thence across the Son to Arrah, in the British district of Shahabad; 3. from north-east to south-west, along the right bank of the Son, from Dinapore to Daudnagar, and thence to Hooseinabad; 4. from north-east to south-west, from Bar to the town of Behar.

Patna was included under the grant of the Dewanny of Bengal, Behar, and Orissa, made in 1765 by Shah Alum to the East-India Company. The revenue is permanently settled.

PATNA.—The principal place of the British district of the same name, under the presidency of Bengal. It comprises the city or fort, inclosed by a wall of rectangular ground-plan, and extensive suburbs. The city extends a mile and a half in length from east to west, along the right bank of the Ganges, and three-quarters of a mile landwards from it. Many of the houses are built of brick, but the greater number of mud; they are generally tiled, a few only are thatched, but all, with little exception, look mean and slovenly. The eastern and

* According to Buchanan, the name is Pattana, or "the city," given to it emphatically on account of its celebrity.
PATNA.

western ramparts have each a gate in the middle, and a main street, rather wide, runs from one gate to the other; but even this principal thoroughfare is neither straight nor regularly built, and the other streets or passages are narrow, crooked, and irregular. In the rainy season, the roads and passages become in many places sloughs, and in dry weather the dust is thick and suffocating. During the rainy season, there is in the city a considerable jhil or lake, and on the evaporation of the water during the dry season, the bed becomes a dirty and malarious expanse. Buchanan concludes his account of the city by saying, "It is difficult to imagine a more disgusting place." Yet it is a favourite residence of the native population; and in consequence, the houses are very densely crowded together. Numerous ghats, or flights of stairs, give access to the water of the Ganges. Within the city is the grave of the British prisoners murdered in 1763 by Sumroo, the German adventurer, in obedience to the order of Cossim Ali, the expelled nawaub of Bengal: it is covered by a pillar of uncouth form, built partly of stone and partly of brick. There are many mosques, but they receive small care, and are regarded with so little reverence, that most of them are let as warehouses. Even the principal mosque, a handsome stone building, is occupied in this manner, and the chief Mussulman place of worship at present is in the western suburb. Adjacent to this last-mentioned mosque is a much-frequented imambara, where 100,000 persons sometimes congregate. The principal suburb on the eastern side, called Marusganj, contains the chief market, and many storehouses for grain. The buildings being generally constructed of wood and mats, have been often burned down; yet no precaution is taken to prevent a recurrence of the calamity. This suburb is joined by another, denominated that of Giafr Khan. On the other side of the city is a long, narrow suburb, extending to Bankipore, a distance of about four miles. The breadth seldom exceeds half a mile, and there are many interruptions from gardens. This is the quarter of Europeans, whose houses are scattered through it, and principally along the bank of the river; but they are in no great numbers, and of no very imposing appearance. Con-

* A building in which the great Mahometan festival Mohurrum is celebrated.
considered in its most extended dimensions, Buchanan estimates the length of the whole place (city and suburbs) along the bank of the river at nine miles, and the area which it occupies at twenty square miles. The place is ill supplied with water, as that obtained from the river must be carried with much toil to those parts which are at all distant, and in the rainy season it is dirty. The drudgery of bearing it devolves on women. There are wells, but those near the river are deep, and their water brackish; but some of those farther off are shallower, and yield better water.

On approaching the town from the land side, it is not discernible, even at a short distance, as no building overtops the intervening trees; and even from the river, the appearance of the town, especially in the dry season, is wretched, the predominant feature being an irregular high bank of clay, without herbage, and covered with all manner of impurities. The rampart, formerly thirty feet high, with a ditch from fifty to seventy feet wide, and from seven to eleven deep, is now totally ruined; and this circumstance adds to the neglected aspect of the place. It is alleged, and not without an appearance of probability, that at no very distant period the town scarcely, if at all, extended beyond the limits of the rampart, and its present enlarged state and "prosperity seemed to have been owing to the European commercial factories; for at one time the English, Dutch, Danes, and French had factories here, and traded to a great extent, especially in cotton cloth."

It is still a thriving place, having an extensive and lucrative commerce, and considerable banking business. The Ganges, opposite the town, though the navigation is much impeded by sandbanks, is covered with "thousands of picturesque boats, for transporting merchandise, each differing from its neighbour."

The civil establishment here consists of eleven Europeans; viz., a civil and sessions judge, a collector, a magistrate, a joint magistrate and deputy collector, two assistants to magistrate and collector, a principal sudder aumen, a surgeon, a superintendent of survey, and uncovenanted deputy collector. The native staff comprises a principal sudder aumen, three mon-siffs, and three uncovenanted deputy collectors. Here is a school, under the control of a committee, consisting of nine

PATNA.

members, two of whom are natives. The English language and literature, history, and the mathematics, enter into the course of study, which is conducted by a head master and two assistants. Beside these, there are an Oordoo master and a Hindee master. In September, 1850, the number of boys on the books was fifty-seven. There are also some Hindee schools unconnected with government. Within the last few years a penitentiary and house of correction have been erected within the city.4

During the hot season, the temperature is very high at Patna, being increased by the heat reflected and radiated from a naked expanse of sand on an extensive island in the Ganges, opposite the city.5

Buchanan estimates6 the number of houses at 52,000, and allows six inmates to each. On this estimate, he observes, "the whole population will therefore amount to 312,000; which I do not think liable to any considerable error. There are besides, a great many persons,—sepoys, camp-followers, travellers, boatmen, &c., whose number fluctuates, but is generally pretty considerable." The population-estimates of Buchanan are found, when scrutinized, to be generally too high, and in a recent semi-official publication,7 the number of inhabitants of the town of Patna is stated at 284,132, much exceeding the population of any other city within the presidency of Bengal, except Calcutta.

Patna is a place of great antiquity, and is conjectured by Wilford8 to have been identical with Padmavati, the capital of Nanda, who, according to Prinsep,9 reigned over Magadha or Behar 415 years before the Christian era. Subsequently, it probably formed part of the dominions of the rajah of Kunnuj, on whose defeat, in 1194,1 by Shahabuddin, sovereign of Ghor, Patna, with the rest of Behar and Bengal, fell to the conqueror, who annexed his acquisition to the empire of Delhi. Patna appears to have for the most part continued, ostensibly at least, a portion of the empire until the death of Shir Shah, the Patan, who deposed and expelled Humayon. Muhamad, a relative of Shir Shah, made himself master of Patna in 1545, but was soon after subjugated2 by Akbar. Aurungzebe conferred the government of Behar on his son Azim, who resided at Patna, from that circumstance generally named Azimabad3 by the

Mussulmans. The English established factories here at an early period, and carried on an extensive trade in opium, rice, and other articles. In 1763 disputes arose between the Company's servants and Meer Cossim, upon the subject of transit-duties. The former claimed an entire exemption from duty, though a heavy tax was paid by all native traders; and the claim was supported by a majority of the council at Calcutta, who sent a deputation to the nabob at Patna, to request he would confirm it. He was, however, unyielding, but at length gave way to an extent not contemplated or desired. In place of remitting duties on the Company's trade only, he abolished all customs-duties whatever, whether on British or native goods. Mortified, however, at the result of an act which in a moment of exasperation he had committed, and which must have materially diminished his revenue, he took every means to annoy the British, and before long resorted to an act of open hostility, by seizing some English boats which were lying in the river. Mr. Ellis, the chief of the English factory, upon this provocation made a precipitate attack upon the city, and took possession of it. The British were, however, soon driven from it by Meer Cossim, who, following the fugitives to their factory, destroyed many of them, and made prisoners of all the rest who were not so fortunate as to effect their escape. This was on the 24th June, 1763. During the four following months, several actions took place between Meer Cossim's forces and the English, which always ended in the defeat of the former. In the beginning of October, his capital town, Monghyr, was besieged and taken by storm. This so enraged him, that he decided on the perpetration of a deed exceeding in atrocity the murder of the Black Hole. He ordered the execution of all the English prisoners he had in his possession; and thus, in cold blood, 200 defenceless Englishmen, whom he had imprisoned in Patna and other places, were shot or cut to pieces under the direction of a European, named Sumroo, who was in the service of the nabob. Among the number was Mr. Ellis; the only one who was spared was Mr. Fullarton, a surgeon, who afterwards effected his escape. The British took Patna by storm on the 6th November following, whereupon the nabob and his army fled to the dominions of the soubhadar of Oude, with whom he had lately entered into a treaty. In May following,
the British were attacked by Meer Cossim under the walls of Patna, but after a long day's desperate fighting, the enemy were routed, with great loss. Thereupon the English remained in quiet possession.

Patna is distant E. from Dinapore, by land, 10\(^4\) miles, by water 12; E. from Benares, by Ghazepore, 157;\(^6\) by water 205; N.W. from Calcutta, land route, by way of Gaya and Hazaribagh, 377; by water 464;\(^8\) Lat. 25° 35', long. 85° 15'.

PATNA,\(^1\) a raj in the country under the superintendence of the political agent for the south-west frontier of Bengal. It is bounded on the north by Bora Samba and Sumbulpoor; on the east by Sonepore and Boud; on the south by the river Tell; and on the west by Keriall. Its centre is in lat. 20° 40', long. 83° 15': it has an area of 1,158 square miles.\(^2\) Some years since, the country was officially reported to be continually in a state of the most wretched anarchy, incurable except by placing it under the direct management of the British government. The annual estimated revenue is 25,000 rupees: the tribute, which is small,—only 600 rupees, was paid with regularity. The population is believed not much to exceed 52,000.\(^3\) The principal town, bearing the same name, is in lat. 20° 36', long. 83° 9'.

PATNA.—A town in the British district of Belgaum, presidency of Bombay, 20 miles W. of Belgaum. Lat. 15° 52', long. 74° 18'.

PATODEE.—A town in the Rajpoot state of Jodhpour, 48 miles W.S.W. from Jodhpour, and 108 miles S.E. by E. from Jessulmeer. Lat. 26° 9', long. 72° 24'.

PATON, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a town on the route from Almora to the Rakus Lake, 53 miles N.E. of the former. Lat. 30° 10', long. 80° 20'.

PATOWDHII,\(^1\)—A small jaghire inclosed within the territory of Jujhur, subject to the lieutenant-governorship of the North-West Provinces. The grant\(^2\) was made early in the present century, for services against the Mahrattas, by Lord Lake, to Fyze Tullub Khan, brother-in-law to Nawaub Nijabut Ali Khan, who, at the same time, was granted the jaghire of Jujhur. The present jagirdar is Muhammad Akbar Ali Khan, who derives an annual revenue of 50,000 rupees from his...
PAT.

jaghire. Pathowdi, the principal place, is on the route from Delhi to Narnol, and 40 miles S.W. of the former. It has a bazar, and is well supplied with water. The surrounding country is slightly undulated in low irregular swells, with a sandy soil, partially cultivated. The road in this part of the route is sandy and heavy, and bad for carts. Lat. 28° 18', long. 76° 50'.

PATREE, in Guzerat, or territory of the Guicowar, a town at the south-eastern angle of the Runn or Great Salt Marsh. It has a fine tank, and is surrounded by three walls, the innermost of which has a ditch; but, though formerly of considerable importance and strength, it is now much decayed. The chief, styled the Dessaye, has an annual revenue of 18,000 rupees, of which he pays annually a tribute of 5,652 rupees to the British government. Distant W. from Ahmedabad 52 miles. Lat. 23° 10', long. 71° 44'.

PATREE.—A town in the native state of Hyderabad, situate on the left bank of the Godavery river, and 188 miles N.W. from Hyderabad. Lat. 19° 16', long. 76° 30'.

PATROOD.—A town in the native state of Hyderabad, or dominions of the Nizam, 192 miles N.W. by W. from Hyderabad, and 100 miles E. from Ahmednuggur. Lat. 19° 7', long. 76° 17'.

PATTAREE, in Sirhind, a village on the route from Kurmal to Loodiana, and 75 miles N.W. of the former place. It is situate on a small eminence, overlooking a level and fertile country, but in many places swampy, and in general slightly cultivated. The road in this part of the route is good, and water and supplies are abundant. Distant N.W. from Calcutta 1,040 miles. Lat. 30° 34', long. 76° 35'.

PATTERGHATTA.—A town in the British district of Dacca Jelalpoor, presidency of Bengal, 54 miles S.W. of Dacca. Lat. 23° 10', long. 89° 48'.

PATUN, called also BUTISI and TONRAWUTTEE.—A small Rajpoot state, bounded on the north-west by Shekawuttee; on the north-east by Jhujhir; on the east by Ulwar; and on the south-east and south by Jeypore. It lies between lat. 27° 31'—27° 56', long. 75° 48'—76° 12'; it is thirty miles in length from north to south, and twenty in breadth. At the time of Boileau's visit, in 1835, it was ruled by Rao Luchmun
Singh, chief of the Tour tribe of Rajpoots, who anticipated the proper period of succession by the murder of his father, but was subsequently so haunted by remorse, that he abandoned his palace, in which the foul crime was committed, and took up his abode in a temporary residence in the vicinity. The spirit of the murdered chief was supposed to inhabit the chamber which he occupied in life; and a couch, rose-water, and a few other articles, were kept constantly in readiness for his use. The country is a tract of barren hills and fertile valleys: it is tributary to Jeypore. The least accessible parts are inhabited by a tribe called Minas, who formerly subsisted by cattle-stealing and other plunder, and who, in the exercise of their avocation, undertook long journeys, either on foot or mounted on small dark-coloured camels of great speed and endurance, united at some settled point, committed their depredations, and returned, sometimes singly, sometimes in small bodies, to their fastnesses, where they divided their spoil. These marauders, however, have been much checked by the British forces, which have destroyed nearly all their forts, so that many from necessity have had recourse to agriculture for subsistence. Patun, the principal town, is rather a considerable place, situate in a strong position, at the foot of a hill surmounted by a citadel. The palace is on the side of the hill, about half-way between the base and summit. Distance S.W. from Delhi 100 miles. Lat. 27° 47', long. 76° 9'.

PATUN, within the limits of the territory of Bhoondee, in Rajpootads, a town situate on the left bank of the river Chumbul, 22 miles S.E. of the town of Bhoondee. It is the principal place of a pergunnah, of which (though locally situate, as above stated, within the confines of the state of Bhoondee) two-thirds belong to the family of Scindia, having been granted by the Peishwa, who himself received it from the rajah of Bhoondee, in remuneration for aid afforded against Jeypore. The other third, which had been wrested from Bhoondee by Holkar, was ceded by him to the British government, under the 4th article of the treaty of Mundissor. The rajah of Bhoondee was especially anxious to secure possession of Scindia’s portion of Patun, as it contains his ancestral palace, as well as a magnificent temple built and endowed by his family; and by the treaty concluded with the rajah in 1818, the British govern-
ment engaged that this portion of the territory should be restored to its original possessor, who in return engaged to pay an annual tribute of 40,000 rupees; but Scindia refusing to give up the possession, those clauses of the treaty were not carried out. By the treaty of Gwalior, in 1844, however, the management of this part of Patun was transferred to the British; and probably this may lead to an arrangement by which the long-cherished wishes of the Bhoondee rulers may be gratified. Lat. 25° 15', long. 76° 2'.

PATUNSAONGEE.—A town in the territory of Nagpoor or Berar, situate 18 miles N.N.W. from Nagpoor, and 98 miles E. by N. from Ellichpoor. Lat. 21° 20', long. 79° 3'.

PATURGHATTA,¹ in the British district of Bhagulpoor, presidency of Bengal, a small town or village on the right bank of the Ganges, four miles N. of the route from Berhampoor to Dinapoor, 134 miles N.W. of former, 164 E. of latter.² Here are several caves and cells excavated in the rock facing the water. Lat. 25° 19', long. 87° 16'.

PATUS.—A town in the British district of Bombay, presidency of Bombay, 42 miles E. of Poonah. Lat. 18° 28', long. 74° 31'.

PAUDURKAORA, in Hyderabad, or territory of the Nizam, a town near the north-east frontier, towards Nagpoor or Berar. Distance from the city of Hyderabad, N., 178 miles; Nagpoor, S.W., 90. Lat. 19° 55', long. 78° 49'.

PAUGA.—A town in the native state of Bhotan, situate on the left bank of the Guddada river, and 65 miles E. by N. from Darjeeling. Lat. 27° 15', long. 89° 20'.

PAUK PUTTEN¹ (Pure Town), in the Punjab, a town situate ten miles west of the river Bavee, and fourteen miles from Mamoke Ghat, a much-frequented ferry over it. A perfectly level plain of four miles wide extends towards the river from the town, which, viewed at some distance, has the appearance of a citadel situate on the summit of a lofty eminence. It is built on the site of the ancient fort of Ajwadin, Ajodin, or Adjoodhun, and is celebrated as the place close to which Mahmud of Ghuznee, Tamerlane,² and several other invaders of Hindostan, crossed the river boundary of the Punjab on the east. The name of this town is considered to indicate its peculiar sanctity, in consequence of its having been

⁵ Rennell, 91.
for many years the residence of a celebrated Mahometan saint, Shekh Farid-u-Din, of whose miraculous powers many traditions are recounted by the natives. It is related, among his other wonderful deeds, that when hungry, he threw into his mouth handfuls of dust or pebbles, which immediately became sugar; and as he effected similar transmutations in innumerable instances for the benefit of other persons, he obtained the name of Shakarganj, or "Sugar-store." The tomb or shrine is situated in a spot depressed below the rest of the mound on which the town is built, and which has an elevation of about forty feet above the plain. It is an unornamented and insignificant building, having but one small apartment, containing the remains of the saint in a grave, covered with faded drapery. There are in it two small doors, one to the north, the other to the east. The last is called the "door to Paradise," and is only opened on the fifth day of the first Mahometan month, called Mohurram, and considered peculiarly holy, in reference to the belief that during the ten first days the Koran was sent from heaven for revelation to men. This doorway is about two feet wide, but so low that it cannot be passed without stooping; and the chamber itself is of such contracted dimensions, that it can contain only about thirty persons. Those who rub their foreheads on the saint's grave are considered safe from perdition; the first who enters the chamber is believed to secure thereby a peculiarly high degree of felicity in a future state; and as the crowd of pilgrims, comprising Hindoos as well as Mussulmans, is immense, the crush is tremendous. The natives, however, assert that no accidents occur, in consequence of the tender care which the saint has for his votaries. Among other relics preserved here, is a piece of wood in the shape of a cake, which, it is said, was used by the saint to solace himself when assailed by hunger during his long fasts. Pauk Putten is supposed by Masson to have been the site of the colossal altars erected by Alexander to mark the eastern boundary of his conquests. Lat. 30° 17', long. 73° 25'.

PAULY.—A town in the Rajpoot state of Jeypoor, situate on the left bank of the Chumbul river, and 88 miles S.E. by S. from Jeypoor. Lat. 25° 50', long. 76° 37'.

PAULY TANNA, or PALITHANA, in the peninsula of Kattywar, province of Guzerat, a town in the district of
PAU.

Gohilwar. It is situate at the eastern base of the Satrunja, a mountain sacred to Adinath, the deified priest of the Jains. As an instance of the liberal endowments and offerings made to this divinity, it is mentioned that lately a rich banker of Ahmedabad presented a crown of massive gold, studded with sapphires, and of the estimated value of 3,500/. The extensive summit of the mountain, surmounted by numerous steep peaks, is crowded with temples, shrines, images, and viharas or monastic retreats, connected with the belief of the Jains. The town itself is walled, and contains many relics of antiquity of various eras. Distance from Ahmedabad, S.W., 120 miles; Baroda, S.W., 105; Surat, N.W., 70; Bombay, N.W., 190. Lat. 21° 30', long. 71° 47'.

PAUMANEE.—A town in the territory of Nagpoor or Berar, 10 miles N.W. from Jugdulapoor, and 162 miles N. from Rajahmundry. Lat. 19° 20', long. 81° 51'.

PAUMBAUM, in Rameswaran, presidency of Madras, a town and the only collection of dwellings on that island, except the town of Rameswaram, is situate at the eastern extremity, near the mainland of Rannnad. The regular inhabitants consist chiefly of boatmen and pilots; and their only occupations are passing vessels through the reef, loading them, and discharging their cargoes. There are no artificers, and the bazar has but a few shops, chiefly for the sale of provisions, being deficient for the most part in regard to other articles, though generally to be obtained elsewhere. Lately the prosperity of the place received a stimulus from the presence of a number of strangers employed in improving the passage between the Point of Paumbaum and the Cape Tonitorai or Ramen, on the mainland, and commonly designated the Paumbaum Passage. This passage was formerly impracticable for ships, in consequence of the obstructions caused by two parallel ridges of rocks about 140 yards apart; the north ridge being considerably the higher, and termed the first or great dam, in most places visible at low water, though nowhere sufficiently connected to prevent entirely at any time the passage of the water; the line of the south ridge or dam being also distinctly traceable at low water, but only a few detached rocks on it even then appearing above. The whole, or greatest part of the space between these two ridges, was
filled up by large masses of rock in various positions, but generally in directions nearly parallel to the principal ridges, and usually several feet lower. Of those rocks, composed of sandstone, the strata, when observed in situ, are found to be horizontal. It has been surmised, on geological and historical probabilities, that at one time there was an isthmus connecting the island of Rameswaram with the mainland. Tradition countenances this belief; and the original disruption by an inroad of the sea, caused by a hurricane, is by some believed to have occurred as late as the early part of the fifteenth century. Across this double ridge of rocks were two channels; one affording passage for the larger craft, the other used by small boats only. A series of operations for improving the passage commenced in 1837, and extended over several years. It necessarily involved a considerable outlay, but the success was commensurate with the expenditure. The cost of the operations, from their commencement in 1837, until the 30th April, 1844, was 155,949 rupees. The result was, that a channel was formed eight feet deep at low spring tides between the reefs, and about nine and a half feet deep through what is called the Horse-shoe Bank; the advantages of which are demonstrated not only by the rapidly increasing resort of trading-vessels to this place, but by the fact of two war-steamers—the Pluto and the Nemesis—having passed through it safely.

Of a place like this, in what may be called a transition-state, it is difficult to furnish statistical particulars that will possess more than a temporary approach to accuracy. In 1848, Paumbbaum contained about 200 houses. A European officer, with a detachment of about 100 sappers and miners, and a gang of 150 convicts, were stationed there; the camp-followers amounted to about 300. A considerable influx of money, causing a visible improvement in the condition of the inhabitants, was noticeable; and the advancement of trade, and steady increase in the number of shipping visiting the place, afforded indications favourable to its permanent prosperity. Anchorage and customs are levied by the British government. Lat. 9° 17′, long. 79° 17′.

PAUMBEN.—See PAUMBAUM.

PAVANASI.—A town in the British district of Tanjore, presidency of Madras, 12 miles N.E. of Tanjore. Lat. 10° 55', long. 79° 19'.

PAWGUUR.—A town in the native state of Mysore, 123 miles N.N.E. from Seringapatam, and 77 miles S.S.E. from Bellary. Lat. 14° 6', long. 77° 20'.

PAYANG YAY.—A town of Burmah, situate on the left bank of the Irawady river, and 120 miles S.W. from Ava. Lat. 20° 40', long. 94° 39'.

PAYE ISLAND.—One of the numerous cluster of islands known as the Mergui Archipelago. It is situate 13 miles W. from the coast of Tenasserim. Lat. 11° 27', long. 98° 36'.

PA YECH, in Cashmere, a very ancient ruin, situate at the northern base of the Kariwah, or table-land of No Nagur. It is of small dimensions, but in a tasteful and impressive style of architecture. It is thus described by Vigne, probably the only European by whom it has been surveyed:—"The interior and exterior ornaments are particularly elegant. The building is dedicated, I believe, to Vishnu, as Surya or the sun-god, small sitting figures of whom are inserted in niches on the cornice outside. The ceiling of the interior is radiated so as to represent the sun, and at each corner of the square, the space intervening between the angle and the line of the circle is filled up with a gin or attendant, who seems to be sporting at the edge of his rays." Pa Yech is in lat. 33° 50', long. 74° 45'.

PAYNE GUNGA RIVER rises in lat. 20° 32', long. 76° 4', near the eastern boundary of the British district of Candeish,
and, flowing through the Hyderabad territory in a very circuitous but generally easterly direction, for 320 miles, falls into the Wurda river, on the right side, in lat. 19° 56', long. 79° 15'.

PEAK, a river of Berar or Nagpore, rises in lat. 22° 20', long. 78° 47', and, flowing south-easterly for fifty miles, falls into the Pench river, in lat. 21° 55', long. 79° 13'.

PEDDAPULLY.—A town in the native state of Hyderabad, or territory of the Nizam, 110 miles N.E. by N. from Hyderabad, and 182 miles N.N.W. from Guntoor. Lat. 18° 43', long. 79° 26'.

PEEDDA WAG, a river of the Nizam’s dominions, rises in lat. 16° 59', long. 78° 32', and flowing south-easterly for seventy miles, falls into the Kistnah river, in lat. 16° 38', long. 79° 18'.

PEELKUCHLA, in the British district of Jounpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Jounpoor to Fyzabad, 19 miles N.N.W. of the former. Lat. 25° 68', long. 82° 37'.

PEEMING, a pass in the district of Koonawur, in Busahir, traverses a lofty ridge of mountains, which, rising from the left bank of the Sutluj, holds a southerly course, dividing that rugged region from the table-land of Tartary, and at the same time forming the boundary between the British and Chinese empires. Gerard, who had been previously, with the utmost difficulty and peril, making his way amidst the rocky ravines and fearful precipices of Koonawur, found, on reaching the Peeming Pass, a total change in the aspect of the country. "This is the line of separation between Busahir and Chinese Tartary, and there could scarcely be a better-defined natural boundary. In front, the face of the country is entirely changed, as far as the eye can reach eastward; mountain masses succeed each other; no rugged peaks rise into view, but a bare expanse of elevated land, without snow, in appearance like a Scotch heath." At a short distance to the north, the vast Pargeul Mountain rises from the right bank of the Sutluj, to the height of 13,500 feet, or to the total elevation of 22,488 feet above the sea. The elevation of the Peeming Pass above the sea is 13,518² feet. Lat. 31° 49', long. 78° 46'.

PEENOQ, or PIM, a river in the valley of Spiti, rises in lat. 31° 40', long. 78°, and, flowing northerly for thirty-eight miles, falls into the Spiti river, in lat. 32° 6', long. 78° 12'.
PEEPAR,¹ in the Rajpoot state of Jodhpoor, a town on the route from the city of Jodhpoor to that of Ajmeer, and 37 miles N.E. of the former. A mud wall incloses the town, and there is a small citadel in the middle of it. There are 3,000 houses, supplied with good water from a fine tank immediately opposite the south gate. The population, according to Boileau,² is 14,710. The road on the south-west side, towards Jodhpoor, is indifferent, being gravelly, and occasionally encumbered with stones or cut up into ravines: in the other direction, it is stated by Boileau to be execrable. Lat. 26° 24', long. 73° 40'.

PEEPCHO0.—A town in the British district of Ramgur, presidency of Bengal, 49 miles N.N.E. of Ramgur. Lat. 24° 21', long. 85° 47'.

PEEPLEA.—See HATH KA PEEPLEA.

PEEPLEOD.—A town in the native state of Gwalior, or territory of Scindia's family, situate on the left bank of the Suktha river, and 67 miles N.W. by W. from Ellichpoor. Lat. 21° 39', long. 76° 40'.

PEEPLEY,¹ in the British district of Balasore, presidency of Bengal, a town on the left bank of the river Soobunreeka, ten miles above its fall into the Bay of Bengal, formerly or some commercial importance, but now much decayed. It was the first place in which the English were formally permitted to trade, the privilege being in 1634 granted² by Shahjehan Padshah of Delhi. The Soobunreeka is from this town denominated the river³ of Peepley, and a shoal opposite the mouth is called Peepley Sand. Peepley is distant S.W. from Calcutta 90 miles. Lat. 21° 40', long. 87° 22'.

PEEPRA, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town on the south-eastern frontier, towards the British district of Sarun, two miles from the right bank of the river Jharia. According to Buchanan, it contains 100 houses; an amount which would assign it a population of about 600 persons. Distant S.E. from Goruckpore cantonment 52 miles. Lat. 26° 18', long. 84° 9'.

PEEPRAICH¹ (EASTERN), in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, * Piple of Rennell.
a town on the route from Goruckpore cantonment to Mulye, 10\textdegree} miles N.W. of the former. Buchanan,\textsuperscript{3} describing its state forty years ago, observes that it is better built than is usually the case in that district; and adds, "It is said, contains only about 100 houses, although, so far as I can judge by passing through, I should think that it contains at least twice that number." It has a bazar\textsuperscript{4} at present, and is well supplied with water. The road westward, or towards Goruckpore, is heavy and bad, running through jungle almost the whole way; to the east it is good, and passes through a cultivated country. Lat. 26° 47', long. 83° 36'.

PEEPRAICH\textsuperscript{1} (WESTERN), in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town 10 miles N. of the left bank of the river Ghaghra. It contains 200\textsuperscript{2} houses, and consequently, allowing six persons to each house, a population of 1,200. Distant W. from Goruckpore cantonment 38 miles. Lat. 26° 42', long. 82° 48'.

PEEPRAON,\textsuperscript{1} in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route, by the Kutra Pass, from the cantonment of Allahabad to Bœwa, and 19\textsuperscript{2} miles S.E. of the former city. The road in this part of the route is cut up by ravines, the country cultivated. Lat. 25° 19', long. 81° 59'.

PEEFRY.—A town in the peninsula of Kattywar, province of Guzerat, situate 66 miles S. by E. from Rajkote, and 159 miles S.W. from Ahmedabad. Lat. 21° 20', long. 71°.

PEEPULKHEEBEE, in the territory of Bhurtpore, a town on the N.W. extremity towards Alwar, 40 miles N.W. of the towns of Muttra and Bhurtpoor. Lat. 27° 38', long. 77° 9'.

PEEPULSANA, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from Moradabad to Hurdwar, and 41 miles N.W. of the former. The road in this part of the route is good, and passes through an open and partially cultivated country. Lat. 29° 20', long. 78° 32'.

PEEPULTHON.—A town of Malwa, in the native state of Bhopal, 26 miles S.W. by S. from Bhopal, and 42 miles W.N.W. from Hoosungabad. Lat. 22° 58', long. 77° 10'.

PEERAO.—A town in the Rajpoot state of Jodhpour, 187

miles W. by S. from Jodhpoor, and 82 miles S.W. by S. from Jessulmeer. Lat. 26°, long. 70° 11'.

PEERQUNJE.—A town in the British district of Dinajpoor, presidency of Bengal, 26 miles N.W. by W. of Dinajpoor. Lat. 25° 47', long. 88° 20'.

PEERQUNJE.—A town in the British district of Rungpore, presidency of Bengal, 28 miles S.S.E. of Rungpore. Lat. 25° 18', long. 89° 24'.

PEERQUNJE.—A town in the British district of Purnea, presidency of Bengal, nine miles S.S.W. of Purnea. Lat. 25° 39', long. 87° 30'.

PEER POINTEE,¹ in the British district of Bhagulpoor, presidency of Bengal, a small town on the right bank of the Ganges. It is situate at the foot of a detached hill, and on the summit of a cliff overlooking the river is the tomb of Peer Pointee, a reputed Mussulman saint; whence the place has its name. The rocks in the vicinity are excavated into numerous small cells, now unoccupied, but formerly the retreats of solitary ascetics. Distant E. from Bhagulpoor by Colgong 34 miles, by the course of the river 37;² from Rajmahal, N.W., by Sikrigali, 40; from Calcutta, by the course of the river, 289. Lat. 25° 17', long. 87° 26'.

PEEPOREE.—A town in the British district of Nuddea, presidency of Bengal, 77 miles N.N.E. of Calcutta. Lat. 23° 39', long. 88° 48'.

PEESANGUN,³ in the British district of Ajmeer, lieutenant-governorship of the North-West Provinces, a town, the principal place of a pargannah of the same name, having a population⁴ of 15,740 persons. Distance 15 miles W. of Ajmeer, N.W. of Nusserabad 22 miles. Lat. 26° 26', long. 74° 30'.

PEETAR.†—A village of native Gurwhal, on a feeder of the Tons, and about five miles from the right bank of that river. It is situate near the crest of the woody range dividing the valley of the Tons from that of the Pabur, and producing the celebrated Pinus deodar, the first of that magnificent species observed by Jacquemont.† in his progress westward

³ Irvine, Topog. of Ajmeer, 41.
¹ Poosangur of Tod.
† The "Peteri" of Jacquemont.
† Jacquemont states that he can find scarcely any difference between the deodar and the cedar of Lebanon planted by Tournefort in the garden of the king of France.
PEE—PEG.

through the Himalaya. Peetar is at the elevation of 6,684
feet above the sea. Lat. 31°, long. 76° 1'.

PEETUMPOOR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Allahabad to Etawa, and 47 2 miles S.E. of the latter. The road in this part of the route is good; the country level, and partially cultivated. Lat. 26° 24', long. 79° 40'.

PEETUMPOOR, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a town on the route from Boolundshuhur to Allygurh, 20 miles S.E. of the former. Lat. 28° 11', long. 78° 10'.

PEGU.—A British province of Eastern India, recently acquired from the Burmese by the result of war. It is bounded on the north by the Burmese territories; on the east by the river Sittang, separating it from the Tenasserim provinces; on the south by the Bay of Bengal; and on the west by the Bay of Bengal and by the Youmadoung Mountains separating it from the province of Arracan. It extends from lat. 15° 49' to 19° 30', and from long. 94° 11' to 96° 55'; it is 240 miles in length from north to south, and 170 in breadth.

The principal river is the Irrawaddy, which, reaching the southern frontier of Burmah in the latitude of Meaday, crosses into the province of Pegu, and pursues its course in a southern direction for a further distance of between 200 and 300 miles, reaching the Bay of Bengal by several mouths, which form the delta of the Irrawaddy. Some distance below the city of Prome, the river diverges into two main branches, the more easterly of which flows by the town of Rangoon, while the western branch passes by the town of Bassein.

The government of India during the late war having determined to annex Pegu to the British empire, it became necessary to make arrangements for the administration of the province. The task was not beset with any extraordinary difficulties. Upon inquiry, it became obvious that the whole social and administrative system closely resembled those of Arracan and Tenasserim; and it was wisely resolved that the details of the

* The narrow strip of the Arracan province stretching southward from the Kintali Pass to Cape Negrais, and washed by the Bay of Bengal, now forms a portion of the province of Pegu.
administration for the new province, not less than its general form, should be taken from the systems which had long prevailed in the adjacent districts. Accordingly, in the departments of civil and criminal judicature, the regulations have been assimilated to those of Tenasserim. As a temporary measure, the land revenue is levied on each yoke of cattle, according to the custom of the country; but the regulations to be permanently adopted in the revenue department are those of Arracan. The duties upon imports and exports are levied according to the tariff in use at Calcutta.

The earlier history of Pegu would scarcely repay the reader for the labour of tracing it with minuteness. It may suffice to state, that Pegu was formerly an independent state, and that Ava was subordinate to it. After a time, however, Ava revolted, and succeeded in reducing Pegu to a state of dependency. That country in turn revolted, and reasserted with success its claim of supremacy over Ava. Through the energy of an adventurer named Alompra, this claim was, however, questioned; the Peguers were expelled from Ava, and war carried into their own dominions. It terminated in rendering Pegu a province of the kingdom of Ava, in which condition it remained until it became British territory. The events which led to the conquest of Pegu, and to its final incorporation with the British dominions, will be found noticed in the article Burmah. The result has been to sever from the Burmese empire the richest and most fertile of its provinces, and to deprive the court of Ava of its principal resources for maintaining an army in the field. Under British rule, the country promises decided improvement; and commerce, which never could prosper under such a government as that of Ava, will now find opportunity for developing the full resources of Pegu.

PEGU.—One of the principal towns in the newly-acquired British province of the same name, situate on the left bank of the river having a similar appellation, and which further south falls into the eastern branch of the Irrawaddy. The old city was destroyed by Alompra in 1757, on his final triumph over the Peguers. The plan of the new town is a quadrangle, the main street running east and west, and being crossed by others at right angles. The streets are for the most part spacious, and paved with brick; but the houses are of wood, supported
PEII—PEI.

on posts, with roofs lightly covered. The building in the town chiefly attracting attention, is the temple of Shoemadoo, which, according to Symes,\(^1\) "is a pyramidal building, composed of brick and mortar, without excavation or aperture of any sort, octagonal at the base, and spiral at the top." This author gives a rather particular description of the building; but as fifty-four years have elapsed since the publication of his volume, as ruin had at that time begun to invade the walls of the lower terrace, and as on the British visit in 1824 the edifice was found in a very neglected condition, and much injured by the weather, it is probable that the account above quoted would require very considerable modifications to adapt it to present circumstances.

Pegu was captured by the British in 1824, and restored upon the termination of the war. During the second war in 1852, the town, previously taken and abandoned, was a second time occupied. A determined attempt on the part of the Burmese was made once more to recover it, but it was met by the officer in command (Major Hill, of the Madras Fusiliers) with a combination of skill and decision which enabled him to maintain it, though under great difficulties, until relief arrived. Distant N. from Rangoon 62 miles. Lat. 17° 40', long. 96° 17'.

PEHARI,\(^1\) in Bundelcund, a village on the route from Banda to Gwalior, 88\(^2\) miles W. of the former, 116 S.E. of the latter. It has a bazar, and water from wells and a tank, but supplies are rather scarce. It is the principal place of a small jaghire or feudal grant, "comprising\(^3\) four square miles, containing 800 souls, and yielding a revenue of 800 rupees." The jaghiredar, who receives a small tribute from lands appropriated by the neighbouring rajah of Jhansee, is stated to maintain fifty infantry. Lat. 25° 33', long. 79°.

PEHONA.—A town in the territory of Nagpoor or Behar, situate on the left bank of the Wurda river, and 62 miles S.S.W. from Nagpoor. Lat. 20° 20', long. 78° 47'.

PEINLULLAH, in the British district of Hoosungabad, territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Hoosungabad to Seuni, 25 miles E. by S. of the former. Lat. 22° 30', long. 78° 8'.

PET—PEJ.

PEINT, with HURSOOL, a petty native state within the presidency of Bombay, bounded on the north by the raj of Dhurrumpore and the territory of the Daung rajahs; on the east by the British district of Ahmednuggur; on the south by that of Tannah, which also, with Surat, bounds it on the west. It lies between lat. $20^\circ 1'-20^\circ 27'$, long. $72^\circ 58'-73^\circ 40'$; is forty-six miles in length from east to west, and twenty-eight in breadth; and contains an area of 750 square miles, with a population of 55,000.¹

On the death of the rajah of Peint, in 1842, without male heirs, the claim of his daughter to succeed to a Mahomedan chiefship was deemed untenable, and the estate was taken under the management of the British government. An intimation was, however, made to the Begum, that the estate would be transferred to the husband she might marry, provided he were a fit person to be intrusted with the management. Subsequently the Begum was informed that she was at liberty to marry whom she pleased, but that unless her choice was considered by government in all respects unexceptionable, the estate would be continued under British management, in trust for herself and the issue of such marriage; but that her husband, in virtue of his marriage, would acquire no rights over the principality.² Its affairs still continue under the administration of the British. Peint, the principal place, is situate 73 miles S.E. by S. from Surat, and 102 miles N.N.E. from Bombay. Lat. $20^\circ 17'$, long. $73^\circ 31'$.

PEIRGAUM.—A town in the British district of Ahmednuggur, presidency of Bombay, 39 miles S. of Ahmednuggur. Lat. $18^\circ 33'$, long. $74^\circ 45'$.²

PEITAPOOR,¹ in Guzerat, or territory of the Guicowar, a town on the right or western bank of the river Saburmuttee. Population 7,000.² Distance from Ahmedabad, N., 15 miles. Lat. $23^\circ 14'$, long. $72^\circ 40'$.

PEITHAN.—A town in the native state of Nepal, 153 miles W. from Khatmandoo, and 90 miles N.N.W. from Goruckpoor. Lat. $27^\circ 53'$, long. $82^\circ 50'$.²

PEJUR,¹ in Bussahir, a river, or rather large torrent, in the district of Koonawur, rises on the south-eastern declivity of the Lipi Pass, about lat. $31^\circ 47'$, long. $78^\circ 18'$, and holds a south-easterly course of about twenty miles, to the village of

¹ Statistics of Native States, 30.

⁴ Trans. of Phys. and Med. Soc. of Bombay, l. 51—Gibson, Sketch of Guzerat.
Chalan, near which it is joined by the Munglung, a considerable torrent, and below the confluence has the name of Titi, described by Jacquemont as a very impetuous and great stream, one of the largest feeders of the Sutluj, into which, after a total course of about twenty-five miles, it falls, in lat. 31° 38', long. 78° 29'.

PELEW GEWEN ISLAND, situate at the entrance of the Martaban river. The means by which the British became possessed of this desirable island are curious and interesting. After the treaty of Yandabo was agreed to by the East-India Company and the Burmese, the river Martaban being decided upon as the northern boundary of the former's possessions, a question arose as to whom the island of Pelew should belong. This it was agreed should be decided by the course a gourd-shell should take, being placed in the river above Martaban; viz., if the shell floated to the west of the island, it should become the property of the Company; but if it took the eastern channel, the Burmese should claim it. The ceremony took place, and the gourd slowly floated down the stream, entering the sea by the western channel, thereby making it the undisputed property of the Company. 1

PELLUR.—A town in the British district of Nellore, presidency of Madras, 72 miles N. of Nellore. Lat. 15° 29', long. 80° 6'.

PEN.—A town in the British district of Tannah, presidency of Bombay, 25 miles S.E. of Bombay. Lat. 18° 43', long. 73° 11'.

PENANG.—See PRINCE OF WALES ISLAND.

PENCH NUDDEE,—A river of Berar, rising in lat. 22° 11', long. 78° 45', a few miles north of the town of Omrait, and, flowing first easterly for sixty-five miles, and south for fifty-three miles, forms a junction with the Kanhan river, in lat. 21° 18', long. 79° 12', near the town of Kamptee.

PENGRA BAZAR.—A town in the British district of E.I.C. S.W. of Seebpoor. Lat. 26° 51', long. 94° 32'.

PENGUGURRAM.—A town in the British district of Salem, presidency of Madras, 38 miles N.W. by N. of Salem. Lat. 12° 6', long. 77° 55'.

PEÑACONDA.—A town in the British district of Bellary, E.I.C. S.W. of Seebpoor. Lat. 26° 51', long. 94° 32'.
presidency of Madras, 87 miles S.E. by S. of Bellary. Lat. 14° 5', long. 77° 39'.

PENNAGUNCHYPROLE.—A town in the British district of Masulipatam, presidency of Madras, 81 miles N.W. by W. of Masulipatam. Lat. 16° 56', long. 80° 18'.

PENNAGUR.—A town in the British district of Chingleput, presidency of Madras, 52 miles S.W. of Madras. Lat. 12° 39', long. 79° 44'.

PENNAG (NORTHERN).—A river having its origin in the territory of Mysore, about lat. 13° 23', long. 77° 43', and deriving its earliest supply from a square stone tank, in the centre of the ruined fort of Chandradroog. The tank overflows in the rainy season, and the redundant water, falling into a deep cleft in the rock, issues in a stream from the side of the mountain, about 200 yards lower down. This source fails during the dry season. The stream, flowing to the north-west for thirty miles, then crosses the northern boundary of the territory of Mysore, and takes a northerly course for ninety-five miles, to Ooderpee Droog, where it turns eastward, and, continuing to flow in that direction for 230 miles, passes in its course by Nellore, and falls into the Bay of Bengal in lat. 14° 38', long. 80° 13'; its total length being 355 miles. Its principal tributaries on the right side are the Chittruty, the Paupugnee, and the Cheyair; on the left side, the Koondaur.

PENNAR (SOUTHERN).—A river of Mysore, rising north of the Nundydroog Hills, and in lat. 13° 32', long. 77° 45'. Receiving the redundant water of a series of tanks at that place, it flows circuitously, but generally south, for fifty-five miles, to Mootanhalli, where it crosses the south-eastern frontier of Mysore into the Carnatic, through which it holds a south-easterly course of 190 miles, and falls into the Bay of Bengal, in lat. 11° 45', long. 79° 51', a mile north of Fort St. David; its total length being 245 miles. Gold is found in its sands, in its passage through the Carnatic. Heyne erroneously states that this river falls into the river Cauvery.

PENT.—A town in the British district of Rutnageriah, presidency of Bombay, 40 miles N.N.E. of Rutnageriah. Lat. 17° 30', long. 73° 35'.

PENNY KYOUNG BENTINCK, or MIDDLE BOLONGO, the centre of three islands at the entrance of the
Amcan river. It is about twenty-six miles in length, and six in breadth; mountainous, woody, and rugged; without any appearance of inhabitants or cultivation. The centre of the island is in lat. 20°, long. 93° 4'.

PEORA, in Sirhind, a small town on the route from Thanesir to Kythul, and 15 miles W. of the former town. It is situate on a small river or torrent, access to the water of which is given by several neat ghats or stairs. It rises in a striking manner over the jungle which surrounds it, being situated on a rough mound, formed by the ruins of a more ancient town. The houses are built of good brick, but are confusedly intermixed with ruins in every stage of decay. Distant N.W. from Calcutta 1,003 miles. Lat. 29° 50', long. 76° 37'.

PEORAH, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village, with a public bungalow or reception-house, on the route from Almora to Bareilly, and nine miles S. of the former. The road in this part of the route, though passing over a very rugged country, and intersected by torrents, is rather good; and supplies may be obtained. Elevation above the sea 5,238 feet. Lat. 29° 31', long. 79° 40'.

PEPERGAON, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town on the route from Furruckabad to Mynpooree, five miles W.S.W. of the former. Lat. 27° 22', long. 79° 34'.

PERAL, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by Rajapoor ferry, from the cantonment of Allahabad to Banda, and 18 miles W. of the former. The road in this part of the route is bad, the country level, and well cultivated. Lat. 25° 26', long. 81° 34'.

PERANTUREI.—A town in the British district of Coimbatore, presidency of Madras, 46 miles E.N.E. of Coimbatore. Lat. 11° 16', long. 77° 38'.

PEBOOBOOTPORE, in the British district of Ghazepoor, lieutenant-governorship of the North-West Provinces, a village on the left bank of the Ganges, 532 miles N.W. of Calcutta by water, or, if the Sunderbund passage be taken, 709; E. of Ghazepoor cantonment 50. Lat. 25° 48', long. 84° 20'.
PERI,\(^1\) in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town of about 100 houses,\(^2\) near the south-eastern frontier, towards the British district of Sarun, distant 50 miles S.E. of Goruckpore cantonment. Lat. 26° 20', long. 84° 12'.

PERIAPATAM,\(^1\) in the territory of Mysore, a town near the south-western frontier, towards Coorg, in an elevated tract on the eastern declivity of the Western Ghats, and about 4,000 feet\(^2\) above the level of the sea. The surrounding country is well watered, containing many small lakes, besides numerous tanks; the latter, however, being in a ruinous state, either from neglect or wilful injury during the frequent wars with which the country has been afflicted. The soil is rich, and the climate rather moist and fertile; hence its name, indicating "favoured town." Formerly a flourishing place, protected by two forts, the inner of mud, surrounded by another of stone, it was utterly wasted by the troops of Tippoo Sultan. When visited by Buchanan in 1800, the inner fort was quite ruinous, in consequence of the defences having been blown up; and the place had become so infested by tigers, as to be dangerous to enter even at midday: some families of Brahmins, who had houses in the outer fort, were obliged to shut themselves up at nightfall. There are two temples\(^3\) of the Brahminical, and one of the Jain persuasion, in the town. The mahal or palace consists of a square area, surmounted by a dome and surrounded by apartments. This place was formerly the capital of a petty rajah, who, in 1644, being besieged by Kanthi Rao Marso, the kurtar or ruler of Mysore, in despair destroyed his family, and rushing forward recklessly, died sword\(^4\) in hand in the midst of his enemies. In 1791 it was occupied by the British army of Bombay, under the command of General Abercromby, with the view of co-operating with that of Lord Cornwallis before Seringapatam; but the siege of that place being then relinquished, Abercromby precipitately retreated, leaving behind him part of his battering-train and a large quantity of powder, which Tippoo Sultan caused to be exploded, to destroy\(^5\) the great Jain temple in which it had been stored. In the following year Periapatam was again occupied\(^6\) by the army of Bombay, and subsequently once more in

1799, by the army of that presidency, under General Stuart,
marching to join General Harris, then besieging Seringapatam.
Just previously to the time of its occupation by General
Abercromby, it contained 1,500 houses; which number,
according to the usually received ratio of five inmates to each
house, would indicate a population of 7,500 persons. Tippoo
Sultan not only dismantled and ruined the forts, but destroyed
the houses also. After the overthrow of Tippoo Sultan, in 1799,
the inhabitants returned, and the place has since been slowly
recovering from its disasters. Distance from Seringapatam, W.,
43 miles; Bangalore, S.W., 110; Mangalore, S.E., 90; Madras, W., 290. Lat. 12° 21', long. 76° 9'.

PERIKHALEE.—A town in the British district of the
Soonderbunds, presidency of Bengal, 83 miles E. of Calcutta.
Lat. 25° 30', long. 89° 42'.
remains found imbedded in the conglomerate. They are those of the elephant, mastodon, hippopotamus, rhinoceros, hog, deer, ox, tortoise, and saurian reptiles. Baron Hügel obtained forty-one pieces of fossil bones, the greater part belonging to the Mastodon latidens, of which the teeth left no doubt. Of these he says, "Some of the bones are of an immense size; one fractured piece of the tusk measuring, from the centre to the outside of the circle, 5½, which gives 10½ inches diameter, or thirty-four inches in circumference." A lighthouse has been erected on this island. Lat. 21° 38', long. 72° 19'.

PERIPOLLIAM.—A town in the British district of Chingleput, presidency of Madras, 22 miles N.W. of Madras. Lat. 13° 17', long. 80° 7'.

PERMACOIL.—A town in the British district of South Arcot, presidency of Madras, 33 miles N. of Cuddalore. Lat. 12° 10', long. 79° 45'.

PEROWA, in the territory of Tonk, or possessions of Ameer Khan, a town on the route from Oujein to Kotah, 69 miles² N. of former, 72 S. of latter. Lat. 24° 9', long. 76° 4'.

PERRIMBIRE.—A town in the British district of Chingleput, presidency of Madras, 60 miles S.W. by S. of Madras. Lat. 12° 23', long. 79° 50'.

PERTAUBPORE.—A town in the British district of Midnapore, presidency of Bengal, 28 miles E. of Midnapoor. Lat. 22° 24', long. 87° 50'.

PERTAUBGHUR.—See PERTAUBGHUR.

PESHAWUR.—A province of the British principality of the Punjab, occupying the extreme north-western corner of the empire, and lying between the Indus above and below Attock and the Khyber Mountains, through which is the great Khyber Pass. It is bounded on three sides by the Khyber, Mohmund, Swat, and Khuttuk hills; in the east it is open to the Indus. It lies between lat. 33° 42' and 34° 30', and long. 71° 35' and 72° 42'. In the extent here assigned to this territory, it is sixty-five miles long, fifty miles broad, and about 2,400² square miles in extent. Its climate is very hot in summer, the thermometer frequently reaching 110° or 112° in the shade. The heat, however, is occasionally mitigated by the breezes from the neighbouring mountains; and as the country, naturally
PESHAWUR.

Fertile, is well watered by the Indus, the Kabool river, and its tributaries, the chief of which are the Swat and the Bara, and is, moreover, well cultivated, it is amazingly productive. The water is applied to the purposes of cultivation by means of canals and innumerable small channels, from whence it is drawn up by means of a pole having a fulcrum in the middle and a bucket suspended at one end, which is raised by the hand pressing the other end; or where the depth is too great for this mode of operation, the water is obtained by the use of the Persian wheel, worked by camels or bullocks. Here, water is in general too near the surface to require the use of the draw-well. In consequence of this abundant supply, the country continues verdant during the whole year. The principal crops are wheat, barley, maize, millet, and various other crops suitable to warm climates. Peshawur produces the finest rice in the world. It is called Bara rice, because grown on ground irrigated by that river; and Runjeet Singh, ever watchful to secure to himself the best of everything prized by man, exacted part of his tribute in this valued article. Escentive vegetables are cultivated with much success. Many of them are of the kinds known in England—carrots, turnips, radishes, cabbages, cauliflower, onions; others are there of common occurrence in India. As a substitute for hay, corn and certain green crops are cut before ripe and dried for fodder. Barley, and sometimes wheat, are cut before they form ears, and used for this purpose; and this treatment does not injure the crop. What is called here *paualai*, is a very important portion of the crop, and comprises musk-melons, water-melons, scented-melons, and various kinds of cucumbers, pumpkins, and gourds, produced in the greatest luxuriance, and consumed in the hot season in large quantities. The castor-oil plant is cultivated: the oil, however, is not intended for culinary or medicinal purposes, but for any other in which a coarse oil may be required. Sesamum, mustard, and some other plants, are reared for the sake of their oil. The sugarcane is raised to be consumed as a sweetmeat; sugar itself being obtained from Hindostan. Ginger, turmeric, tobacco, and cotton, are also extensively cultivated. The ground is moved by the plough, the spade being little employed. Scythes are unknown, and crops of all kinds are cut with sickles. Oxen are used for ploughing,
PESHAWUR.

harrowing, and treading out the corn. Mulberry-trees abound, and silk is produced in moderate quantities. The principal fruits are plums, figs, peaches, pomegranates, mulberries, and quinces; but, though large, all except the last have an inferior flavour. The quince of Peshawur is said to surpass those of all other countries.

Elphinstone, who entered the country in March from the great defile through which the route from the south passes, describes the scene formed by the mountains, crowned with eternal snow, surrounding the luxuriant and picturesque plain, as at once grand and beautiful in the highest degree, and he found that a nearer survey increased his admiration. At the time of Elphinstone's visit, the population was so dense, that thirty-two villages were counted within a circuit of four miles. It may be doubted whether the impressions of the European visitors on this occasion were not somewhat over sanguine, but it was their belief, "that never was a spot of ground better peopled." Since its annexation to the British dominions, the province has been held by a regular military force of 10,500 men, in which are comprised two regiments⁶ of European infantry and a detail of artillery.

Through this fine province lies the great route from Khorasan and Kabool into India, by the passes of the Khyber mountains and across the Indus at Attock. It is also traversed by the grand trunk road from Lahore to the city of Peshawur, along which is located the army of the Punjab. The former of these routes being open to the wild inhabitants of the mountains, it was found necessary to adopt a comprehensive plan of defence for the security of the valley.⁶ The territorial division of Peshawur includes, besides Peshawur proper, the districts of Huzara and Kohat.⁷

PESHAWUR, or PESHAWER, the capital of the province of the same name, is situate about eighteen¹ miles east of the eastern extremity of the Khyber Pass. In the early part of the present century, when visited by Elphinstone, it was a flourishing town, about five miles in circuit, and reported to contain 100,000 inhabitants. Twenty years later, Runjeet Singh, after defeating the Afghans in the decisive battle of Noushara, took Peshawer, demolished the Bala Hisar, at once the capital and state residence; destroyed the fine houses of

PETHORA GURH.

the chief Afghans; desecrated the mosques, and cutting down the groves and orchards about the city, laid waste the surrounding country. Subsequent exactions and oppressions prevented for a time its revival. The numerous mosques, many built in a splendid style of oriental architecture, were intentionally polluted by the Sikhs, and the commerce of the city languished under their stern rule. The fortress erected by them on the site of the Bala Hisar, is a square of about 220 yards, and is strengthened by round towers at each angle, every curtain having in front of it a semicircular ravelin. There is a fausse-braie all round, of substantial towers and curtains, with a wet ditch. The height of the inner walls is sixty feet, of the fausse-braie thirty, all constructed of mud. Within, are capacious and well-constructed magazines and storehouses. The only gateway is on the northern face, and it is protected by towers. The present population of the city is returned at 56,045, of whom 7,706 are stated to be Hindoos, and the remainder Mussulmen. Peshawur was built by the Mogul emperor Akbar, who affixed the name, signifying "advanced post," in reference to its being the frontier town of Hindostan towards Afghanistan. Elevation above the sea 1,068 feet. Since its occupation by the British, all restrictions have been removed, and trade is rapidly expanding. The suburbs and environs are also represented as having improved in appearance. Lat. 34°, long. 71° 38'.

PETHORA GURH, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a cantonment for troops stationed to protect the frontier towards Nepal. It is situated about 10 miles W. of the right bank of the Kali river, and on a low ridge in the middle of Shore valley. The site is injudicious and unfortunate, being in the midst of rice-swamps, flooded during rains, and causing remittent and other fevers, and dysenteries. The water is also very bad, and injurious to the digestive organs. In the rainy season, the low tract is covered with a dense growth of tall grasses and other herbaceous vegetation, which is fired at the commencement of the dry season, with the double view of expelling the wild animals lurking in it, and making room for the growth of fresh pasture. There is a bazar attached to the cantonment, and also a large airy hospital, built of stone, and

Report, ut supra.

India Rev. Disp. 19 Jan. 1858.

As. Res. xvi. 149 —Trail, Statistical Survey of Kumaon.

2 Dollard, Medical Topography of Kales Kumaon, 40.
roofed with slates. A hundred yards west of the lines is Fort Loudoun, a neat and well-arranged structure, which commands the whole place. The elevation above the sea probably does not exceed\* 1,600 feet. Distance N.W. from Calcutta 1,200 miles. Lat. 29° 35', long. 80° 16'.

PETABBAR.—A town in the British district of Ramgur, presidency of Bengal, 21 miles E. by S. of Ramgur. Lat. 23° 40', long. 85° 50'.

PETT.—A town in the province of Guzerat, or dominions of the Guicowar, situate 92 miles N.N.E. from Baroda, and 89 miles N.E. by E. from Kaira. Lat. 23° 30', long. 73° 46'.

PETTAH.—A town in the British district of Masulipatam, presidency of Madras, three miles N.W. of Masulipatam. Lat. 16° 11', long. 81° 10'.

PETEE, in the Baree Doob division of the Punjab, a town situated 11 miles from the right bank of the Sutlej, 45 miles E.S.E. of the town of Lahore. Lat. 31° 17', long. 74° 54'.

PETTEI.—A town in the British district of South Arcot, presidency of Madras, 40 miles N.W. of Cuddalore. Lat. 12° 7', long. 79° 26'.

PEYHANEE,\* in the kingdom of Ouide, a small town on the route from Futtehgurh cantonment to that of Seetatpoor, 48\* miles N.E. of the former, 34 W. of the latter. It is situate between the rivers\* Goomtee and Sacee. It has a bazar, and abundance of good water, but supplies, if required in considerable quantities, must be collected from the surrounding country. The road to the south-west, or towards Futtehgurh, is bad, running through a level country, scantily cultivated and much under jungle; to the east, or towards Seetatpoor, it

\* The Jhulghat, or passage over the Kali river, ten miles east of the cantonment, is 1,789 feet\* above the sea; the elevation of the bed of the river Surjoo, about eight miles south-west of the cantonment, is estimated at 1,500; and consequently, the confluence of those rivers, a little lower down, must be at a less elevation than the latter amount. The Okul, a small stream draining the valley in which Pethora Gurh is situate, and rising near the cantonment, has a course of about twelve miles, falling into the Kali close to the confluence, or at an elevation not exceeding 1,500 feet; and as its course lies through swamps, its descent probably does not exceed ten feet each mile, or 120 in all. From which considerations it may be concluded that the elevation of the site of Pethora Gurh is between 1,600 and 1,600 feet.
PEY—PHA.

is good: the country is open, level, and rather well cultivated.
Distant N.W. from Lucknow 70 miles. Lat. 27° 43', long. 80° 17'.

PEYNT.—See PEYNT.

PEYTAHN.—A town in the native state of Nepal, situate
on the left bank of the Jimru river, and 206 miles W. by N.
from Khatmandoo. Lat. 28° 34', long. 82° 6'.

PEYZOO, in the Daman, a division of the Punjab, situate
16 miles W. from the right bank of the Indus, 133 miles
S.S.W. of the town of Peshawar. Lat. 32° 13', long. 70° 52'.

PHAGEH.—A town of Burmah, 191 miles N. by W. from
Ava, and 96 miles E. by S. from Muneepoor. Lat. 24° 34',
long. 95° 30'.

PHAGGEE, in the state of Jeypore, in Rajpootana, a town,
with bazar, on the route from Delhi to Neemuch, 192 miles
W. of former, 180 N.E. of latter. Lat. 26° 34', long.
75° 38'.

PHAJUDEE.—A town in the native state of Bhotan,
situate on the right bank of a branch of the Guddada river,
and 68 miles N.E. by E. from Darjeeling. Lat. 27° 29', long.
89° 19'.

PHALGU, or PHALGGOO,* in the British district of
Behar, presidency of Bengal, a vast torrent, formed by the
junction of two great mountain-streams, the Mehane and
Lilajun, which, rising in the British district of Ramgurh, flow
northward, and making their way through the mountains on
the south frontier of Behar, flow through this latter district in
a northerly direction. From the junction near Gayah, and
about lat. 24° 44', long. 85° 3', it has an enormous volume of
water during the rainy season in the latter part of summer,
when it rushes down with great violence and rapidity, filling
its channel, from 500 to 800 yards wide, bounded on each side
by high and rocky banks. It thence proceeds first through
Behar, and finally through Patna, in a course a little east of
north, to lat. 25° 25', long. 85° 30', where, about 180 miles from
its remotest source, it takes an easterly direction, which it
generally holds to its fall into the Ganges, on the right side, in
lat. 25° 11', long. 86° 10', having flowed a total distance of
about 246 miles. It sends forth a great number of branches

* Leelajan of Tassin's Map of Bengal and Behar.
right and left, so that during the rainy season its ramifications everywhere intersect the country, and partially lay it under water. In the lower parts of its course, it bears the name of Mehanee, in the higher parts, Julwara and Kuthor; that of Phulgoon being confined to the middle portion, extending about twenty-five miles, and considered sacred, from its vicinity to Gayah.

**PHALIAH**, in the Jetch Doob division of the Punjab, a town situate six miles N. of the right bank of the Chenab, 73 miles N.W. of the town of Lahore. Lat. 32° 27', long. 73° 38'.

**PHAPAMOW**, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on a small eminence on the left bank of the Ganges, the bed of which is here a mile and half wide, the stream during the dry season occupying one-sixth of this space. It is on the route from the cantonment of Allahabad to that of Lucknow, and four miles N. of the former. Supplies are abundant, the country being fertile and studded with small villages. The road in this part of the route is bad; the navigation of the river in the dry season uncertain, difficult, and impracticable for craft having a draught exceeding two feet. The current is rapid and powerful, the channel shallow and uncertain, shifting through extensive flats of sand. Distance by river, N. from Allahabad, seven miles; N.W. from Calcutta 815. This place is stated to have been selected for the location of the government powder-manufactory. Lat. 25° 32', long. 81° 56'.

**PHENA**, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to that of Mozuffurnagur, and 34 miles N.W. of the former place. It is situated in an open and partially cultivated country, from which water and supplies can be obtained. The road in this part of the route is sandy, and heavy for wheeled carriages. Distant N.W. from Calcutta 922 miles. Lat. 29° 5', long. 78° 25'.

**PHENCHOOGUNJE.**—A town in the British district of Silhet, presidency of Bengal, 16 miles S.S.E. of Silhet. Lat. 24° 41', long. 91° 57'.

**PHILLOUR**, in the Julinder Doob, a division of the Punjab, a town situate on the right bank of the Sutlej, eight...
PHI—PHO.

miles N.N.W. of the town of Loodianah. Lat. 31° 1', long. 75° 50'.

PHIRANDEE.—A town in the native state of Cutch, 22 miles S. from Bhooj, and 18 miles E.N.E. from Mandavee. Lat. 22° 57', long. 69° 40'.

PHITTI, or PITY RIVER.—One of the largest, deepest, and best-defined of the mouths of the Indus, and generally frequented by the Indus steamers to and from Kurrachee. On the south side of the entrance, two flagstaff beacons have recently been erected,1 which may be seen in the offing six or seven miles. The mouth of the Phitti is in lat. 24° 42', long. 67° 12'.

PHOAH.—A town in the British district of Umballa, in the Cis-Sutlej territory, 32 miles S. by W. of Umballa. Lat. 29° 58', long. 76° 40'.

PHOBOOM.—A town in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 32 miles S.E. by E. of Moulmein. Lat. 16° 12', long. 96° 6'.

PHOOKANUH, in the British district of Muzuffurnugur, lieutenant-governorship of the North-West Provinces, a town on the route from Muzuffurnugur to Rohtuk, 22 miles W.S.W. of the former. Lat. 29° 19', long. 77° 29'.

PHOOL,1 in Sirhind, a town forty-eight miles from the left bank of the Sutlej, and on the route from Delhi to Ferozepore by Munuk. It forms part of the possessions of a Sikh chief under British protection and control. Distant N.W. from Calcutta, by Delhi and Munuk, 1,0452 miles. Lat. 30° 22', long. 75° 14'.

PHOOLGHUR.1—A small raj under the superintendence of the political agent for the south-west frontier of Bengal. Its central point is in lat. 21° 15', long. 83°; the area is 8902 square miles. Great part of the country is flat, but there is a portion considerably elevated, which enjoys the advantage of a cool temperature. The soil throughout is rich, and adapted for successful cultivation; but little is reported to be done to improve its capabilities, and herds of wild buffaloes overrun the neglected territory. The administration of the government was found to be such as might be expected from the idle and lawless character of the people, and security for life or property to be unknown. The country has been computed to produce a

1 Fenner, Memoir of the Indus, 6.
2 Garden, Tables of Routes, 171.
3 Statistics of Native States.
PHO.

revenue of 6,000 rupees; the amount of the tribute is 440. The post road from Bombay to Raepore traverses this district for some distance; and in consideration, a deduction of eighty rupees is made from the tribute. The population is estimated at 40,000.  

PHOOLMURRY, in Hyderabad, or territory of the Nizam, a town near the north-west frontier, towards the British district Ahmednugur. It is situate on the upper part of the river Gurka Poornah, a considerable tributary of the Godavery. The situation is pleasant, amid groves of mango-trees, tamarinds, and cocoanut-trees. It is surrounded by a wall, flanked with towers of masonry in stone, and is the residence of a petty nawab, or, more properly, jaghiredar. Distance from Aurungabad, N., 20 miles; Hyderabad, N.W., 280. Lat. 20° 9', long. 75° 28'.

PHOOLPOOR, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on the route from the city of Allahabad to Jounpoor, and 19² miles N.E. of the former. It is situate twelve miles from the left bank of the Ganges, and on the right bank of the small river of the same name. It has a bazar, and is supplied with water from a tank and wells. The road to the south-west, or towards Allahabad, is good; to the north-east, heavy. The country is well cultivated, and studded with villages. Lat. 25° 33', long. 82° 9'.

PHOOLREYEE, in the British district of Etawa, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Agra to that of Etawa, and 14² miles N.W. of the latter. The road in this part of the route is generally good, though in some places sandy. Water is plentiful; the country cultivated, and studded with small villages. Lat. 26° 56', long. 78° 55'.

PHOOLTAMBA.—A town in the British district of Amed-

* Hamilton¹ states, "Prior to 1802 a considerable commerce was carried on at Phoolpoor, in pargunnah Secundra, to the north of the Ganges. The commodities circulated were salt, cotton, iron, drugs of various kinds, copper, zinc, lead, broad-cloth, and other articles from Bengal; but the traders were then so much oppressed by the nabob of Oude's officers, that they retired with their capital to Mirzapoor, and other places of greater security. Shahzadpoor and Phoolpoor are still much resorted to by traders from the nabob of Oude's reserved dominions."
nuggur, presidency of Bombay, 50 miles N. of Ahmednuggur. Lat. 19° 48', long. 74° 40'.

PHOOLTULA.—A town in the British district of Jessore, presidency of Bengal, 68 miles E.N.E. of Calcutta. Lat. 23°, long. 89° 24'.

PHOOLWAREE.—A town in the British district of Patna, presidency of Bengal, nine miles W.S.W. of Patna. Lat. 25° 30', long. 85° 8'.

PHOONDA.—A town and pass in the native state of Kolapoor, presidency of Bombay, leading to Vizadroog, in the British district Rutnageriah, distant 34 miles S.W. from Kolapoor. Lat. 16° 22', long. 73° 57'.

PHOONDI, or COONDEE RIVER.—One of the mouths of the Indus, having five feet at low water. "This stream communicates with the Buggaur, and, during the swell of the Indus, discharges fresh water. People are here employed in pearl-fishing."1 The mouth of the Phoondee is in lat. 24° 38', long. 67° 13'.

PHUGWARA, in the Julinder Dooab division of the Punjab, a town situated 15 miles N. from the right bank of the Sutlej, 14 miles E.S.E. of the town of Julinder. Lat. 31° 14', long. 75° 45'.

PHULOWDEE,1 in the Rajpoot state of Jodhpoor, a town on the route from Beekaneer to Balmeer, and 147 miles N.E. of the latter. It is built on a rising ground, and appears to have been once surrounded by a wall, of which a ruinous portion remains on the southern side of the town. On the west side is the bed of a torrent, which runs only during the rainy season. There are some lofty well-built houses of merchants of the Jain persuasion, who are considered to be the wealthiest in Marwar. There are three small Jain temples, and some pagodas of the ordinary Hindoo persuasion, but meriting no particular notice. There is a stone fort, 100 yards long, seventy yards wide, based on a rocky foundation, with walls about forty feet high, but having neither ditch nor renee. The gate is in the east face, and is covered by a small outwork. There are a few guns mounted on the walls, which are of weak section; and it is altogether a place of no strength. The lower half of the fort, and the fronts of the houses of the wealthy merchants, are built of a deep-red sandstone, quarried

1 Pennet, Memoir of the River Indus, 6.

1 Boileau, Raj-
PHULSOOND, in the Rajpoot state of Jodhpoor, a town in the depressed tract near the south-west frontier. The surrounding country is, during the rainy season, liable to inundations from a torrent flowing from the north; and in 1824 a neighbouring hamlet, with many people, was swept away by the flood. Lat. 20° 24', long. 71° 57'.

PHULTUN.—A town in the Sattara jaghire of Phultun, 56 miles S.E. from Poonah, and 37 miles N.E. from Sattara. Lat. 17° 59', long. 74° 31'.

PHULUNG.—A town in the native state of Bhotan, situate on the left bank of a branch of the Monas river, and 87 miles N.W. by N. from Durrung. Lat. 27° 28', long. 91° 20'.

PHUMARARA.—A town of Sinde, within the territory of Ali Moorad, situate on the right bank of the Naroo river, and 32 miles S.S.E. from Khyrpoo. Lat. 27° 10', long. 69° 1'.

PHURSABAHA.—A town in the native state of Jushpoor, on the south-west frontier of Bengal, 73 miles N.N.W. from Sumbulpoor, and 102 miles S. by W. from Palamow. Lat. 22° 25', long. 83° 32'.

PHURSOO, in the territory of Bhurtpore, a village on the route from Agra to Ajmeer, 46 miles W. of the former, 183 E. of the latter. It is situate on the Bangunga, which, in the periodical rains, is a brisk stream; but when Heber visited the place in the middle of January, its course was indicated merely by a dry sandy channel. "The village contains a fortified house of the rajah's, now empty and ruinous, but built in by no means a bad taste, and having its surrounding court ornamented with a range of hadeome stone cloisters, lining the inside of the mud rampart." The surrounding country, though naturally of little fertility, is indefatigably
irrigated with water drawn from wells, and is richly cultivated under grain-crops. Lat. 27° 3', long. 77° 23'.

PHYRIA.—A town in the native state of Nepal, 87 miles N.E. from Khatmandoo, and 134 miles N. by W. from Durbunga. Lat. 28° 3', long. 85° 45'.

PICHALEE, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a small town or village on the route by Muhubun from the city of Agra to the cantonment of Muttra, and 17 miles S.E. of the latter. Lat. 27° 23', long. 77° 59'.

PICHORE, in the territory of Gwalior, a town near the S.E. frontier, towards Dutteah. According to the description of Tieffenthaler, about eighty years ago, here was a large fort of masonry, with three gates, battlements, and towers, and situate on a rocky eminence, the town lying below it. The rajah, a Jat, formerly possessed territories in the vicinity of Gwalior yielding an annual revenue of from 30,000£ to 40,000£; but they were wrested from the family by Scindia, who left it no more than a jaghire or feudal grant of 1,500£ annually. In consequence of the high lineage of the jaghiredar, his daughter was in 1832 married to Bulwunt Singh, son and heir of Baldeo Singh, rajah of Bhurtpore. Pichore is 25 miles S.E. of Gwalior, 85 W. of Calpee. Lat. 25° 57', long. 78° 30'.

PICKALOW.—A town in the British district of Cuttack, presidency of Bengal, 18 miles E. by N. of Cuttack. Lat. 20° 30', long. 86° 11'.

PILAKOOND, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to that of Mozuffernuggur, and 26 miles N.W. of the former place. It is situate in an open cultivated country, yielding supplies and water in abundance: the road, however, in this part of the route is sandy and heavy in many places. Distant N.W. from Calcutta 914 miles. Lat. 28° 59', long. 78° 30'.

PILLEEBHEET.—A town, the principal place of the pargunnah of the same name, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces. It is situate on the left bank of the river Gurrah, the bed of which is here 250² yards wide; but the stream in the dry season,
from December to June, so shallow as to be fordable, though at other times passable only by ferry. The town is of considerable extent, and the route from Bareilly to Petoragah passes through it.  

The population was officially returned in 1848 at 25,157. Pilleebheet is the mart of a considerable traffic by which timber, pitch, honey, wool, borax, metals of various kinds, and other produce of the Terai, or marshy forest of Kumaon, and of Chinese Tartary, are exchanged for goods furnished from the plains. The Pilleebheet rice, much prized throughout India for its whiteness, firmness, and fine flavour, is produced in the south of Kumaon, in the fertile valley down which the Kosilla flows to the plain, and has received the name by which it is generally known in commerce, in consequence of being brought to market here. Elevation above the sea 517 feet; distance N.W. from Calcutta 802 miles. Lat. 28° 38', long. 79° 52'.

The territorial division of which this town is the principal place, formerly constituted a separate district: it is now incorporated with the district of Bareilly.

PILLITCH.—A town in the British district of Patna, presidency of Bengal, 28 miles S.S.E. of Patna. Lat. 25° 12', long. 85° 27'.

PILOWDA, in the Rajpoot territory of Jeypore, a town on the route from Agra to Kotah, 90 miles S.W. of former, 130 N.E. of latter. According to Thorn, it is a large town, built on the side of a hill. It is stated to have 1,000 houses; an amount which would assign it about 5,000 inhabitants. Lat. 26° 37', long. 76° 53'.

PIMPULGAUM.—A town in the British district of Ahmednuggur, presidency of Bombay, 17 miles N.E. of Nassick. Lat. 20° 10', long. 73° 59'.

PIMPULNEIR.—A town in the British district of Can-

* Hamilton states that it "was greatly enlarged by Hafiz Rehmut (the Rohilla Pathan chief), who erected a mosque here, elegant in structure, but deficient in magnitude, and which, in consequence, makes a more superb show as a picture than the reality justifies. He also built a spacious pethah (suburb) four miles in circumference."
PIN.

deish, presidency of Bombay, 39 miles N.W. of Malligaum. Lat. 20° 55', long. 74° 4'.

PINAHT, or PINNAHUT,¹ in the British district of Agra, lieutenant-governorship of the North-West Provinces, a town which with Bah gives name to the pergunnah of Bah Pinnahut. It is situate two miles from the left bank of the Chumbul, 30 miles S.E. of Agra, and contains a population of 6,592 inhabitants.² Lat. 26° 51', long. 78° 28'.

PINAYA.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 70 miles S.S.W. from Sirinagur, and 112 miles N. by E. from Lahore. Lat. 33° 11', long. 74° 25'.

PIND DADUN KHAN, in the Punjab, a town lying near the right or western bank of the Jhelum, from which it is separated by a narrow verdant plain. It consists of three small collections of houses, situate close to each other, and about four miles from the river. The houses are built of mud, with a framework of deodar or cedar, the materials for which are floated down the river from the mountains to the north. Pind Dadun is a short distance south of the Salt range, and salt is raised in the vicinity for the supply of a great part of the Punjab. Lat. 32° 36', long. 73° 5'.

PINDEE PUTHAN, in the Reechna Doobab division of the Punjab, a town situated six miles from the left bank of the Chenaub, 71 miles N.W. by W. of the town of Lahore. Lat. 32°, long. 73° 16'.

PIND MULIK ONLEA, in the Sinde Sagur Dooab division of the Punjab, a town situated 10 miles S.E. from the left bank of the Indus, 54 miles S.E. by S. of the town of Peshawar. Lat. 33° 14', long. 72° 8'.

PINDRAEE, in the British territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Jubbulpoor to the territory of Nagpore, 45 miles S.E. by S. of the former. Lat. 22° 34', long. 80° 17'.

PINDUR.—A river rising in the British district of Kumaon, in lat. 30° 19', long. 80° 6', from three snow-beds on the western declivity of a summit* of the Himalaya, having an elevation of 22,491 feet. It takes a course generally south-west for forty-five miles, to Chirinda, where it turns north-

Burnes, Bokh. I. 49.

* Designated by Webb "No. XV."
westward, flowing in that direction thirty miles, to Kurnprag, in lat. 30° 15', long. 79° 16', where it joins the Aluknunda.

PINGERI, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to that of Muttra, and 19 miles N.W. of the former. The road in this part of the route is heavy and sandy, the country open and cultivated. Lat. 27° 17', long. 77° 53'.

PINJOR, on the north-eastern boundary of Sirhind, a small ruined town belonging to the rajah of Puttecala, is situate at the confluence of two feeders of the river Gagur. The rajah has here a residence and pleasure-ground, which cannot be better described than in the language of an intelligent visitor:—"We next proceeded to a most delightful place. It is a garden, which has been laid out on the natural slope of the ground in six separate and successive terraces, one below another. A canal of about ten feet wide, of the clearest water, runs through the centre. In this is a line of fountains, extending from the entrance to the end, abundantly supplied with water from the hills above, which flows through the canal, and falls in chuddurs [sheets] or broad cascades from terrace to terrace. Behind these crystal curtains there are recesses for lamps, which are lit during nights of festivity. Similar lines of fountains branch off, right and left, to the other parts of the garden. In the centre is an artificial tank, and in the middle of it a small mahal [house], surrounded with fountains, which during the hot months must be a delicious retreat. A profusion of roses, with other flowers, shrubs, and handsome trees, ornament this beautiful spot. From the mahal there is an enchanting view; the valley on one side being closed by high mountains, crested with dark-green pines, and overspread with woods, rich fields, rocks, hamlets, and hill forts; while nearer heights, covered with jungle of all shades, broken by shreds of culture, and dotted with circular towers of gurhees [small forts] and numerous villages, partially hide it on the other side from the plains, which are occasionally seen between the gaps in the range, and now covered with the ruddy golden haze of sunset. The valley itself is thickly wooded, although in parts there is cultivation; and it is besides richly diversified by the tall broken banks of the Kosilla, which runs through
The garden, containing about sixty acres, is well stocked with trees, bearing the mango, orange, pomegranate, apple, and some other fruits. The fort of this place was dismantled by Bourquin, a French adventurer in the service of Doulut Rao Scindia. The inhabitants of Pinjor at present are few; but the care displayed in the construction and embellishment of a large baoli or well, and the numerous fragments of Hindoo sculpture and architecture scattered about, bear evidence of former populousness and wealth. Pinjor gives name to a valley or doon* teeming with vegetable and animal life. Moorcroft describes it as abounding with peafowl, wild fowl, black and grey partridges, elephants, buffaloes, leopards, tigers, lions, wild cats, various kinds of deer, such as the chital or spotted axis, the para or hog-deer, the kaka, resembling the roebuck, and the stag. Baber is full and accurate, as usual, in his description of this tract. "This dun is a very pleasant dale; and there are meadows all along the stream. In several places they sow rue. Through the middle of it runs a stream, large enough to turn three or four mills. The width of the dale is one or two kos [two or three miles]; in some places it is even three kos [four or five miles]. Its hills are very small, like hillocks, and all its villages stand on the skirts of those hillocks. Where there are no villages, there are abundance of peacocks and monkeys. There are also many fowls, resembling barn-door fowls; they resemble them in shape, but generally are of a single colour." A more recent traveller supposes the valley may have in parts a breadth of six miles, and estimates its length at thirty. Its surface is generally level, and the hills on its southern frontier are of much less elevation than those of the Derah valley. From the south-eastern angle of the valley the streams run in one direction, southerly, towards the Guggur, and in another north-westerly, to the Sursa Nuddee, a feeder of the Sutlej. There is, however, a dreadful drawback on the attractions ascribed to this place, in the pestiferous climate, which, as in all low fertile tracts stretching along the southern base of the Himalaya, is so deadly during the rainy season, that all the inhabitants whose circumstances allow quit the valley at that

* Dun, "a valley." Baber says: "In the language of Hindostan, they call a julga (or dale) dun."
time, and those unable to take that precaution perish in great numbers, or have their constitutions irretrievably ruined, from malignant fevers or similar endemic diseases. The fatal miasmata result probably from the rank vegetation acted on in the close valley by great heat, as Pinjor is only 1,900 feet above the sea. The town is distant N.W. from Calcutta, via Kurnaul and Umballah, 1,053 miles. Lat. 30° 48', long. 76° 59'.

PINYAREE, in Sinde, a great branch of the Indus, parting from the main stream on the eastern or left side, at Bunna, in lat. 25° 2', long. 69° 22'. A little below this place Burnes found the channel of the Pinyaree, during the low season, to be a mile broad, with a large sandbank in the middle. It is navigable downwards as far as Mughribee, where a bund or dam, forty feet broad, was thrown across it by one of the ameers in 1799. At Mughribee this great watercourse is called the Goonggroo. Below this dam it is navigable southwards to the Seer mouth, in lat. 23° 41', long. 78° 11', at which it is two miles wide.

PIPCHA, or BARDAN PIPCHA.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 124 miles E.S.E. from Sirinagur, and 105 miles N.N.E. from Kangra. Lat. 33° 25', long. 77° 1'.

PIPELI, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from Moradabad to Mozuffurnuggur, and 44 miles N.W. of the former. It is situate in an open country, partially cultivated, and from which water and considerable supplies can be obtained. The road in this part of the route is sandy, and heavy for wheeled carriages. Distant N.W. from Calcutta 932 miles. Lat. 29° 11', long. 78° 17'.

PIPERA, in Bundelcund, a town situate in the petty raj of Bijawur, on the right bank of the river Dhasan, 90 miles S.W. of Banda. Lat. 24° 46', long. 79° 24'.

PIPEREAH, in Bundelcund, a ghat or pass by which the route from Banda to Jubbulpore ascends from the more depressed tract of Loharganow to the plateau on the range called by Franklin the Bandair Hills. It is 105 miles S. of Banda, 90 N.E. of Jubbulpore; and is steep, but neither long

nor very difficult. There is confined encamping-ground on the left bank of the river Cane, at the foot of the ascent and north of the pass. About two miles from the pass, the Cane rolls over the rocky brow of the mountain, and forms the falls of Pipersah. "They are well worthy the notice of the passing stranger, on account of the singular forms presented by the rock, which receives the river and conceals its course for many miles." Lat. 24° 15', long. 80° 23'.

PIPERENDA, in the British district of Banda, lieutenant-governorship of the North-West Provinces, a small town on the route from Cawnpore, by Chila Tara Ghat, to the town of Banda, 10 miles N. of the latter. It has a bazar and abundance of water. Lat. 25° 38', long. 80° 28'.

PIPLACE, in the Rajpoot state of Jeypore, a considerable walled town with fort, situate in an extensive sandy plain 55 miles S.E. of the town of Jeypore. Lat. 26° 31', long. 76° 35'.

PIPRAGANOW, in the British district of Mirzapoor, lieutenant-governorship of the North-West Provinces, a village on the right bank of the Ganges, three miles N. of the city of Mirzapoor, or lower down the stream; 718 N.W. of Calcutta by the stream, or 895 if the Sunderbund passage be taken. Lat. 25° 12', long. 82° 39'.

PIPRAH, in the district of Sultanpoor, territory of Oude, a town 80 miles S.E. of Lucknow. It is situate in a dense jungle, extending six miles in every direction from the town, although much of it has from time to time been cut down by order of the government. The inhabitants are notorious freebooters, as their forefathers have been, and maraud at night in parties of from ten to twenty, stealing everything valuable which can be removed; but they do not murder. Some years ago, the governor of the district punished them severely, and burned their town; since which event their depredations have been rather restricted. Distant N. from Gonda eight miles. Lat. 26° 0', long. 82° 4'.

PIPRA KHAS.—See PEERPAICH.

PIPROWL, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a ferry over the Ganges, on the route from Agra to Bareilly, and 81 miles N.W. of the former. The stream of the Ganges being in some
seasons divided into several branches at the ferry of Keuchla Ghat, four miles below Piprowl, the passage is then found preferable at the latter. Piprowl is in lat. 27° 57', long. 78° 55'.

PIPUREAH, in the British district of Shahjehanpore, lieutenant-governorship of the North-West Provinces, a village on the route from Pilleebheet to Oude, and 35 miles S.E. of the former. Lat. 28° 20', long. 80° 14'.

PIRII.—A town in the native state of Nepal, 53 miles E. by S. from Khatmandoo, and 103 miles N. from Durbunga. Lat. 27° 37', long. 86° 0'.

PIRKEE, in the British district of Sohagpoor, territory of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Sohagpoor to Ruttunpoor, 44 miles S.E. by S. of the former. Lat. 22° 47', long. 81° 48'.

PIRNAGAR,¹ in the territory of Oude, a village on the route from Lucknow to Seetapoor, 37 miles N. of the former, 14 S. of the latter. It has a small bazar, is well provided with water, and supplies are procurable to a moderate extent from the surrounding country, which is partially cultivated, though having much jungle. On the north of the village is encampng-ground on the banks of a stream, traversed by a bridge of brick. The road is bad to the south, or towards Lucknow, good to the north, or towards Seetapoor. Lat. 27° 23', long. 80° 46'.

PIR PANJAL,¹ or the SAINT'S MOUNTAIN, a lofty range, forming part of the south-west boundary of Cashmere, and separating it from the Punjab. Its general direction is from north-west to south-east; its length, from the Baramula Pass, at the former extremity, to the Pir Panjal Pass, or that of Nandnn Sar, at the latter, is about forty miles. Its highest point is supposed to be about in lat. 33° 40', and is estimated to be 16,000 feet above the sea.² According to Vigne, the highest part is basaltic, consisting of amygdaloidal trap, which has upheaved; transition rocks appearing on its borders. Quartz, slate, and other primary formations are observable on the northern or Cashmere side. At the south-western extremity is the pass, generally called the Pir Panjal Pass, or

* Saint's Town; from Pir, "an old man or spiritual guide," and Nagar, "town."
PIR—PIT.

that of Nandan Sar, from a lake of that name near its northern extremity. It is about 12,000 feet high, and, though devoid of trees, is below the limit of perpetual congelation. The name of Pir Panjal, or the Pir's Mountain, has been given, from one of its summits being the residence of a Pir, or Mahometan saint, who gives benedictions to those who travel over the pass, and also supplies them with refreshments. This pass, though so elevated, must remain open to a late period in the year, as Von Hügel* traversed it in the middle of November, with a numerous train of porters and other attendants from the plain.

*PIB PANJAL, a river in Gholab Singh's territory, rises in lat. 33° 30', long. 74° 48', and, flowing first north-westerly for forty-five miles, and subsequently south-westerly for sixty-three miles, falls into the Jhelum, in lat. 33° 16', long. 73° 38'.

PIERTHULUH, in the jaghire of Bulubgarh, lieutenant-governorship of the North-West Provinces, a village on the route from Delhi to Muttra, and 34° miles S. of the former. Water may be had from the tank and from wells, but supplies are scarce, and must be collected from the neighbourhood. The road northwards, or towards Delhi, is low, and laid under water during the rains, but good towards the south. Lat. 28° 13', long. 77° 21'.

PISEENY.—A town in the native state of Hyderabad, or territory of the Nizam, 144 miles N.N.W. from Hyderabad, and 128 miles S. by E. from Ellichpoor. Lat. 19° 24', long. 78° 1'.

PIILAUD, or PITLAWUD, in the territory of Indore, or possessions of Holkar's family, a town in the jaghire or feudal grant of the chief of Jaboos, on the route from Neemuch to Baroda, 117° miles S. of former, 150 N.E. of latter. It is a large town, the principal place of a pergunnah of the same name. Lat. 28°, long. 74° 52'.

PIILAUD.—A town in the British district of Kaira, presidency of Bombay, 42 miles S.S.E. of Ahmedabad. Lat. 22° 27', long. 72° 50'.

PITORIA, in the British district of Saugur, territory of Saugor and Nerbudda, lieutenant-governorship of the North-
PIT—PLA.

West Provinces, a town on the route from Saugur to Narwar, 21 miles N.W. of the former. Lat. 24° 3', long. 78° 37'.

PITY RIVER.—See Phitti.

PLASSEE, in the hill state of Hindoor, a small town on the route from Roopur to Belaspoor, and 10 miles N.E. of the former place. It is situate on the right bank of the Sursa, a small river discharging the waters of the Pinjor Doon into the Sutlej. Here, at the close of October, 1814, the British army under General Ochterlony took post on the advance against the Goorkha garrison in Malown. Distant N.W. from Calcutta 1,080 miles. Lat. 31° 2', long. 76° 44'.

PLASSEY.—A town in the British district of Purncah, presidency of Purnea, 39 miles S.E. by E. of Purnea. Lat. 25° 27', long. 88° 2'.

PLASSY, in the British district of Nuddea, presidency of Bengal, a town on the left bank of the Hooghly, or rather, perhaps, the Bhagruttee, and on the route from Calcutta to Berhampore, 96 miles N. of the former, 22 S. of the latter. It was here, on the 23rd June, 1757, that the memorable battle was fought between Clive and Sooraj-o-o Dowlah, soubahdar of Bengal, which ended in the total defeat of the latter. The day before the battle, a council of war had been held by the English commander, which decided against hazarding a conflict. This decision, however, Clive, although he had concurred in it, and had been even the first to deliver an opinion in its favour, resolved, after some deliberation, to set at nought; and, acting on this impression, he gave orders for crossing the river which interposed between his army and the enemy. The English force consisted of about 650 European infantry, 150 artillery-men (including fifty seamen), 2,100 sepoys, and a small number of Portuguese, making a total of somewhat more than 3,000 men, with eight six-pounders and one or two howitzers. The soubahdar's force consisted of 18,000 cavalry and 50,000 infantry, forty or fifty French artillery-men, with fifty pieces of...
cannon of heavy calibre, and four pieces of light artillery. Clive had been in negotiation with Meer Jaffier, a distinguished commander in the service of Sooraj-oo-Dowlah, who aspired to supplant his master, and a treaty had been concluded with this personage, which was to give effect to his wish. The cooperation of Meer Jaffier was consequently to be looked for, and warlike operations had been commenced in the anticipation of receiving it. Still the general character of native diplomacy, and the individual character of Meer Jaffier, forbade implicit reliance upon his fidelity to his engagements, and down to a late period in the day on which the battle took place, Clive remained in a state of much doubt and anxiety. At daybreak, the army of Sooraj-oo-Dowlah was discovered in motion. The cavalry and infantry were disposed in columns of 4,000 or 5,000 each, and between them were placed portions of the artillery. They marched as if intending to surround the English force as far as the river would permit; but as soon as their rear was clear of the camp, they halted, and the Frenchmen, under an officer named Sinfray, advanced with some guns. A general cannonading commenced from the soubahdar's artillery. This was felt severely by the English, who had quitted a grove in which they had taken their first position, and where they were sheltered by a bank, in front of which they were subsequently drawn up. Clive, on the enemy's guns becoming annoying, withdrew his troops to their former position behind the bank. The enemy thereupon advanced their heavy artillery nearer, and fired with greater rapidity than before, but they produced little effect, the English troops escaping the shots by sitting down under cover of the bank. About noon, a heavy shower so much damaged the enemy's powder, that their fire became feeble; but the English, who throughout the day answered the enemy's guns with their field-pieces, continued firing without interruption. The death of Moodeen Khan, an able and faithful officer of the soubahdar, who fell by a cannon-ball, afforded opportunity for the train laid by Clive to take effect. Upon the occurrence of this disastrous event, the soubahdar, a weak and capricious man, sent for Meer Jaffier, with whom he had been on bad terms, and whose fidelity he strongly suspected, and in almost abject terms conjured him to forget all past differences, and to devote all his energies to
the defence of the throne. Meer Jaffier readily promised all that was required of him, and the first instance given of his sincerity was to recommend a suspension of the conflict till the following morning. The soubadhar, after some objection, yielded, and consented to the withdrawal of the troops. A letter was addressed by Meer Jaffier to Clive, intimating this arrangement, and urging the English commander to push on for the camp; but the communication miscarried, and Clive was left to act upon his own impression, derived from appearances. These satisfied him that Meer Jaffier meant to adhere to the English; and with characteristic energy and promptness, he spontaneously took the step which it was the object of the letter to suggest. The result was a general rout of the army of Sooraj-oo-Dowlah, whose camp, baggage, and artillery fell into the hands of the British. The enemy were pursued for about six miles, and it is supposed lost in the action, and during the pursuit, 500 or 600 men: the loss of the English in killed and wounded was about seventy. The immediate effect of this memorable battle was the transfer of the soubahdarship of Bengal from Sooraj-oo-Dowlah to Meer Jaffier; but its eventual consequences were much more important, seeing that in this victory was laid the foundation of the magnificent fabric of the British empire in India. Lat. 23° 46', long. 88° 15'.

PODANGMEW.—A town of Eastern India, in the British province of Pegu, situate on the right bank of the Irawady river, and nine miles S.W. from Prome. Lat. 18° 41', long. 94° 58'.

PODYCHAID.—A town in the native state of Hyderabad, or territory of the Nizam, 51 miles E. from Hyderabad, and 110 miles N.W. from Guntoor. Lat. 17° 28', long. 79° 19'.

POGULAPULLY.—A town in the native state of Hyderabad, or territory of the Nizam, six miles from the right bank of the Godavery river, and 161 miles E. by N. from Hyderabad. Lat. 17° 33', long. 80° 58'.

POHONEE,1 in the territory of Nagpoor, a town on the right or west bank of the Weingunga.2 After the fall of Apa Sahib, the rajah of Nagpoor, in A.D. 1818, it was occupied by a British force, but subsequently restored to his successor.

1 E.I.C. Ms. Doc.
2 Jenkins, Report on Nagpoor, S.
POH—POK.

Distance from the city of Nagpoor, S.E., 45 miles. Lat. 20° 47', long. 79° 42'.

POHOOJ, a small river of Bundelcund, rises from a small lake near the south-west boundary, towards Gwalior, 20 miles S.W. of Jhansi, and in lat. 25° 18', long. 78° 25'. It holds a course sinuous, but generally north-east, for 125 miles, and falls into the Sinde, on the right side, in lat. 26° 25', long. 79° 13'. It is crossed by ford on the route from Calpee to Gwalior, ninety-five miles from its source, and in lat. 26° 6', long. 79° 5'.

POHUR.—A town in one of the recently sequestrated districts of the native state of Hyderabad, or dominions of the Nizam, 72 miles W.S.W. from Ellichpoor. Lat. 20° 46', long. 76° 35'.

POKHURN, in the Rajpoot state of Jodhpour, a town on the route from Phulodi to Jessulmere, and 66 miles E. of the latter. It is situated close to a deserted town of the same name, and contains 3,000 houses, surrounded by a good wall of uncemented stone, and about fifteen feet high, including a parapet six feet high and two and a half feet thick. The terreplein is four feet broad; the whole being marked by a renee, with a small ditch, formed out of the hard red soil on which the walls are built. There is a citadel on the west side of the town, and forming part of its enceinte. The figure is an irregular oblong, 120 yards long from north to south, and eighty yards broad. The walls, strongly built of cut stone, are thirty-five feet high outside, but only eighteen feet inside up to the terreplein. The citadel is mounted with a few guns, is in excellent repair, and has a deep narrow ditch, faced with masonry. In the interior is the residence of the chief, detached from the surrounding defences, and forming an inner citadel, supplied with good water. There are two large tanks outside the walls of the town, one of them communicating with the ditch, for the purpose of inundating it on occasion. A very conspicuous temple, in an elevated situation, marks the site of the old deserted city, and near it are the monuments of the deceased members of the chief's family. Pokhurn being on one of the great commercial tracks between Eastern Rajpootana and Sinde, much money is realized by the transit-trade. The country also in its immediate neighbourhood is more fertile than in the generality of Jodhpoor. It is one of the greatest
POKREE, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village situated on the western declivity of a mountain covered with forests of oak, rhododendrons, and pines. Here are copper-mines, once so productive that one is represented to have yielded a return valued at 5,000l. per annum; but experiments recently conducted there under European management, afforded a return of 780 rupees, against an expenditure of 8,164 rupees; and the undertaking was consequently abandoned in 1841. The richest ore is the vitreous, lying in dolomite or talcose schist, and yielding about twenty per cent. The main obstacles met with in the working are the great quantity of water and the rottenness of the ground, which requires continual and strong timbering. The village of Pokree, situated in a ravine furrowing the mountain on the west side, contains about 100 inhabitants, chiefly of the Chowdry or mining caste. Its elevation is 3,800 feet above the river Aluknunda, from which it is nine miles west, and 6,100 feet above the sea. Lat. 30° 20', long. 79° 15'.

POKROURA, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village on the route from Pethoragurh to Askoth, seven miles N. of the former. Lat. 29° 41', long. 80° 16'.

POKRUN.—See POKHURN.

POKUR, in the British district of Ajmere, under the lieutenant-governorship of the North-West Provinces, a town, the principal place of a pergunnah of the same name. It is situated in a low and swampy valley, and on the south margin of a lake, stated to be in Brahminical eyes the most sacred in India. The surrounding scenery is picturesque and striking; the mountains in many places consisting of rose-coloured quartz,
displaying bold pinnacles and abrupt rocky sides. Immediately around the town are numerous sandhills, among which are many shrines and cenotaphs, belonging to the families of various rajahs and great men of India, in various styles of architecture. By far the most conspicuous is the shrine of Brahma; of which Tod says:—"This is the sole tabernacle dedicated to the one God which I ever saw or have heard of in India." The same writer mentions, that it struck him "as not a little curious," and well it might, "that the sikra or pinnacle is surmounted by a cross. The edifice was erected a few years ago, by a wealthy Mahratta, Gocul Pauk, minister of Scindia, at a cost of about 15,000l., though the materials were at hand, and the labour could be got almost for nothing." Ghats or flights of stairs of stone give access to the sacred water, which is frequented every full moon by great numbers of pilgrims, for the purpose of ritual ablution. The full moon in October is regarded to have peculiar sanctity, and then the concourse is much the greatest: a fair for traffic in horses, camels, and kine, as well as for various wares, is held there on that occasion. The lake is asserted to be artificial, and to have been excavated by a prince of Mandor, to receive the water of a natural fountain, by which it is still replenished: the rivers Looni and Sarasvati carry off the redundant water. The lake is of an oval shape, and above a mile in circuit: it is deep, and never dries up: many alligators harbour in it, and are protected from any molestation. The town, situate on the south margin of the lake, has many good houses. According to Heber, this place is renowned for its gardens and vineyards; the grapes are said to be by far the best and largest in India, and equal to those of Shiraz." Distance from Ajmer, N.W., five miles. Lat. 26° 30', long. 74° 40'.

POLACHY.—A town in the British district of Coimbatoor, presidency of Madras, 26 miles S. of Coimbatoor. Lat. 10° 39', long. 77° 4'.

* Wilson observes that the worship of Brahma has totally disappeared among Hindus; but here is an exception.

† Boileau states the number of houses at 2,000, an amount which, according to received principles of estimation, would assign the place a population of 10,000; but, according to the official return, the population is only 4,334.
POLAIR.—A town in the hill zemindarry of Jeypoor, presidency of Madras, 61 miles S. from Jeypoor, and 74 miles W.N.W. from Vizagapatam. Lat. 18° 10′, long. 82° 20′.

POLAWURUM.—A town in the British district of Rajahmundry, presidency of Madras, 23 miles N.N.W. of Rajahmundry. Lat. 17° 16′, long. 81° 41′.

POLE.—A town in the native state of Guzerat, or dominions of the Guicowar, 81 miles E. by S. from Deesa, and 83 miles N.E. by N. from Ahmedabad. Lat. 23° 59′, long. 73° 20′.

POLEKUL.—A town in the British district of Bellary, presidency of Madras, 72 miles N.E. of Bellary. Lat. 15° 50′, long. 77° 46′.

POLENSHAW,¹ in Hyderabad, or the territory of the Nizam, a town, with a fort, 13 miles from the right bank of the river Godavery. It is situate in a verdant fertile valley, about four miles wide, which is surrounded on all sides by lofty ranges of hills. The fort is a square of about 300 yards, and has a tower at each angle: the rampart is faced with masonry, and is surrounded by a dry ditch: the town is two miles in circumference, and, though containing huts only, is said to be very populous. The residence of the rajah is a small house, the top of which is visible above the rampart. He is called not only rajah of Polenshaw, but also the rajah of Kummummett, from a considerable town of that name within his zemindarry or feudal grant. Distance from Hyderabad, E., 150 miles. Lat. 17° 36′, long. 80° 46′.

POLLASURRA.—A town in the British district of Ganjam, presidency of Madras, 27 miles N.W. by N. of Ganjam. Lat. 19° 41′, long. 84° 53′.

POLLIAM.—A town in the native state of Hyderabad, or territory of the Nizam, situate on the right bank of the Godavery river, and 154 miles N.W. from Hyderabad. Lat. 19° 1′, long. 77° 1′.

POLLOOR.—A town in the British district of North Arcot, presidency of Madras, 33 miles S.W. of Arcot. Lat. 12° 31′, long. 79° 10′.

POLY.—A town in the British district of Cuddapah, presidency of Madras, 31 miles S.E. by E. of Cuddapah. Lat. 14° 14′, long. 79° 15′.

POMOORNA.—A town in the lapsed territory of Nagpoor, situate nine miles from the right bank of the Wein Gunga.
PONANY.

river, and 95 miles S.S.E. from Nagpoor. Lat. 19° 53', long. 79° 40'.

PONANY,1* in the British district of Malabar, presidency of Madras, a seaport town situate on the south side of an estuary of a river of the same name, close to its entrance into the Arabian Sea. The river is shoal, and navigable only for small craft, and three or four miles to sea is a shoal with about four fathoms water on it, but inside, and between it and the mainland, having anchorage in six fathoms. The town is built in a straggling manner, on a sandy plain, and is inhabited principally by Mussulmans, who have forty mosques, and are governed by a chief-priest called the Tangul. The population is supported by fishing and by trade, having numerous patemars2 or sea-going boats, which ply to Surat, Arabia, Bombay, Madras, and even as far as Bengal, exporting principally pepper, betel, rice, cocoanuts, iron, and very fine timber,3 sent down the river from the Ghats. The imports are wheat, sugarcane, molasses, oilseeds, groceries, and spices. Salt is also imported, though in the vicinity there is some made by evaporating sea-water. At the commencement of this century, when Buchanan visited this place, it had about 500 good houses, built with stone, and two stories high, and 1,000 huts. It had formerly been a much more considerable place, until nearly ruined by the oppression of Tippoo Sultan. Besides the patemars, there are manches, large row-boats, used for navigating the river and for coasting. They are about fifty feet4 long, ten or twelve wide, and five or six deep, and carry sail at sea. They are rudely constructed, and venture to sea only in fine weather. Under the system of railways by which the Madras territories are about to be traversed, the eastern and western coasts of this part of the peninsula will be united by means of a line from Poonany to the city of Madras. Distance from Bombay, S.E., 600 miles; Mangalore, S.E., 160; Calicut, S.E., 34; Bangalore, S.W., 190. Lat. 10° 48', long. 75° 58'.

PONANY,—A river, named from the town situate on the south side of its estuary,2 where it disembogues into the Arabian Sea. It rises in the British district Coimbatoor, in the vicinity of some tanks near Cootichipaitum, and in lat. 10° 19', long. 77° 6', and flowing north-west, through the great

depression separating the Western Ghauts from the mountains in the vicinity of Cape Comorin, crosses the east boundary of the British district of Malabar in lat. 10° 42', long. 76° 46', and about fifty-five miles from its source. Thence, turning west, it flows by the fort and town of Palghat, and continuing to hold the same direction for twenty-five miles, it in lat. 10° 45', long. 76° 32', becomes the boundary between the raj or territory of Cochin and the British district of Malabar, continuing so for twenty-three miles, to lat. 10° 47', long. 76° 15', where it enters the district, and flows westward through it for twenty-five miles, to the fall into the Arabian Sea, in lat. 10° 47', long. 75° 58'; the total length of the course being 128 miles. It is navigable for canoes as high up as Palghat, sixty-three miles from the sea. Buchanan, who crossed it during the dry season five or six miles above its mouth, found the channel very wide, but most of it occupied by dry sands, the water clear, the stream gentle, but with difficulty fordable, on account of the depth. It can be navigated only by small craft, as well on account of a bar with small depth of water at the mouth, as shoal water inside, but is very useful during the monsoons, when it floats down to the coast great quantities of fine timber, highly valuable for the largest ships of war.

PONASSA, or POMAWA, in the Rajpoot state of Jodhpur, a village on the route from Nusserabad to Deesa, and 157 miles S.W. of the former. It is situate in a country which, though in some places studded with hills, is in general rather level, with a gravelly soil, free from jungle and partially cultivated. The road in this part of the route is good. Lat. 25° 2', long. 73° 4'.

PONDA.—A town in the Portuguese territory of Goa, nine miles S.E. by E. from Goa, and 66 miles W. from Dharwar. Lat. 15° 25', long. 74° 5'.

PONDALURIA.—A town in the lapsed territory of Nagpur or Berar, 165 miles N.E. by E. from Nagpur, and 74 miles S. from Sohagpur. Lat. 22° 15', long. 81° 26'.

PONDICHERRY, on the Coromandel coast, a French settlement included within the limits of the British district of South Arcot. It is situate at the mouth of a small river capable of admitting only coasting-craft of insignificant burthen. "In the fair-weather season, from 1st of January to
PONDICHERRY.

October, the common anchorage in the road is abreast the town, in seven or eight fathoms, about three-quarters of a mile from it. Small ships may moor in five and a half or six fathoms, but during the season when stormy weather may be apprehended, it is prudent to anchor well out, in twelve or fourteen fathoms, in what is called the outer road." The site of the town is eligible, being to the south-east of a long flat hill, and close to the beach, and having numerous buildings, and a conspicuous and agreeable aspect, viewed from the sea.

"Previously to the war in 1756, Pondicherry was perhaps the finest city in India. It extended along the seacoast about a mile and a quarter, and was about three-quarters of a mile in breadth, was well built, and contained many public buildings, and a citadel, then the best of its kind in India, but of too contracted dimensions. This fine city was first taken by the English in 1761, and immediately razed to the ground."

During the obstinately-contested wars between the British and French in India, in the course of the last century, Pondicherry, as a military and maritime station, had the advantage over Madras of lying to windward of it during the south-west monsoon, which was the season for hostile operations. At the commencement of the present century, it was described by Lord Valentia as the handsomest town, except Calcutta, that he had seen in India. At present, it is regularly built, and divided into two parts, the White Town and the Black Town, separated by a canal. The White Town, which is situate to the eastward of the other, and close to the beach, has well-built streets, regularly laid out at right angles to each other, with trees along the sides. To the west is the Black Town, inhabited by natives. Boulevards planted with trees are great ornaments to the town. The most remarkable buildings are the church of foreign missions, the government house, and bazaars constructed in 1836. In the same year a lighthouse was finished, exhibiting a light eighty-nine feet above the sea, and which, in clear weather, may be seen from a ship's poop distant sixteen or seventeen miles. In consequence of the small depth of water on the bar, and the violence of the surf, landing can be effected only by a sort of rafts or flat-bottomed boats, constructed for the purpose. Pondicherry is the capital of the...
French possessions in India, and the seat of their supreme government. In each of the other settlements there is a government agent, who receives the governor's orders direct, and corresponds with him. The territory of Pondicherry consists of,—1. The district of Pondicherry properly so called, containing, besides the town, eleven villages; 2. the district of Vallanor, containing forty-five villages; 3. the district of Bahour, containing thirty-six villages. The total area is estimated at 107 square miles, and the population in 1840 was 79,743, of which 790 were white. The establishment here comprises—1. Executive and legislative, including governor, and council of administration and council general; 2. judicial, including the Royal Court, the Tribunal in the First Instance, and the tribunal of peace and of police; 3. department of public instruction; 4. marine; 5. military. The population of the town is estimated at from 25,000 to 30,000. Distance from Madras S.S.W. 86 miles. South of the town is the village of Ariancoopan, captured by Admiral Boscawen in 1748, prior to the unsuccessful siege of Pondicherry. The town of Pondicherry is in lat. 11° 56', long. 79° 54'.

PONDUA.—A town in the British district of Silhet, presidency of Bengal, 15 miles N.N.W. of Silhet. Lat. 25° 6', long. 91° 47'.

PONGA.—A town in the British district of Rungpore, presidency of Bengal, 39 miles N.W. of Rungpore. Lat. 26° 5', long. 88° 52'.

PONPUTTA.—A town in the British district of Malabar, presidency of Madras, 71 miles S.E. of Cannanore. Lat. 11° 12', long. 76° 15'.

PONWAR.—A town in the British district of Shahabad, presidency of Bengal, 51 miles N.E. by E. of Sasseram. Lat. 25° 21', long. 84° 41'.

POOAREE, in Koonawur, a district of Bussahir, is a village on the left bank of the Sutlj, here about 120 feet

* Consisting, independently of Pondicherry, of the following settlements:—Karical, on the coast of Coromandel; Yanoon and the lodge of Masulpam, on the Orissa coast; Mahé and the lodge of Calicut, on the Malabar coast; Chandernagore, and the five lodges of Cossimbazar, Jougdia, Dacca, Balasore, and Patna. The possession of these lodges is however nominal, and they have been abandoned by the French.
wide, and flowing with a gentle but deep current. The village, 200 feet above the river, consists of about thirty houses, from two to four stories high, chiefly built of pine-wood, and has adjacent a level, fertile piece of ground, well cultivated with vines, corn, and esculent vegetables. Here, at one time was a sanga or wooden bridge, which having been allowed to fall, through decay, has been replaced with a jhula or rude suspension-bridge, consisting of a cable made of hair ropes stretched across, and traversed by means of a curved piece of wood sliding on it, and bearing the passenger suspended on a seat hanging below, and drawn from one side to another by means of a string, as occasion may require. Elevation above the sea 6,008 feet.* Lat. 31° 33', long. 78° 20'.

POOBTHUL.—A town in the British district of Burdwan, presidency of Bengal, 32 miles N.E. by E. of Burdwan. Lat. 29° 28', long. 88° 21'.

POOCH, in Bundelcund, in territory of Jhansi, a village on the route from Calpee to Goona, 55 miles S.W. of former, 150 N.E. of latter. Supplies and water may both be had. Lat. 25° 50', long. 79° 6'.

POODOOCOTTAH, or RAJAH TONDIMAN'S COUNTRY, is bounded on the north by the British district of Trichinopoly, on the east by Tanjore, and on the south and west by Madura: it extends from lat. 10° 6' to 10° 46', and from long. 78° 33' to 79° 16'; is forty-three miles in length from north to south, and the same in breadth, and has an area of 1,165 square miles, with a population of 61,746. Upon the death of Rajah Bagoonath Tondiman, in 1839, arrangements were made for conducting the administration by the widow during her son's minority. The arrangement, however, was not altogether satisfactory, and it was shortly after so far modified as to admit of the judicious interposition of the British resident; and much benefit appears to have resulted from the exercise of this temporary authority. The young chief, who has now assumed the government, is noted for the excellence of his disposition; and the hopes entertained of his successful administration have not been disappointed.

* The elevation is stated at 7,033 feet in the table at the end of Herbert's report, but that given in the text accords better with the estimate of Gerard. 1

the principal place, is situate on the left bank of the Vellaur river, 59 miles N.E. by E. from Madura. Lat. 10° 24', long. 78° 52'.

POOHY SAWUR.—A town in the territory designated the Daung, within the presidency of Bombay, situate 63 miles W. from Malligaum, and 58 miles S.E. from Surat. Lat. 20° 37', long. 73° 32'.

POOKAREE, in the British district of Banda, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Banda to Ajegurb, 202 miles N. of the latter. Lat. 25° 7', long. 80° 29'.

POOKHRAEN, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a small town on the route from the cantonment of Cawnpore to that of Calpee, and 102 miles N.E. of the latter. It has a bazar, and supplies and water are abundant. The road in this part of the route is rather good; the country well cultivated, and studded with small villages. Lat. 26° 14', long. 79° 54'.

POOLALCHERROO.—A town in the British district of Cuddapah, presidency of Madras, 73 miles N. of Cuddapah. Lat. 15° 31', long. 78° 59'.

POOLAVAINDLA.—A town in the British district of Cuddapah, presidency of Madras, 40 miles W. by S. of Cuddapah. Lat. 14° 25', long. 78° 17'.

POOLBADY.—A town in the hill zemindarry of Jeyyoor, in Orissa, 44 miles S.E. by S. from Jeyyoor, and 68 miles N.W. by N. from Vizagapatam. Lat. 18° 33', long. 82° 51'.

POOLP, in the British district of Kumnaon, lieutenant-governorship of the North-West Provinces, a village half a mile W. of the right bank of the Kalee (Eastern), 13 miles S.E. of Champawut cantonment. Lat. 29° 17', long. 80° 20'.

POONA,—A British collectorate of the presidency of Bombay. It is bounded on the north by the Ahmednuggur collectorate; on the east by those of Ahmednuggur and Sholapore; on the south and south-west by the territory of Sattara; and on the west by the Tannah collectorate. It lies between lat. 17° 53' and 19° 26', long. 73° 20' and 75° 10', and has an area estimated at 5,2983 square miles. The whole is included within the Deccan. The face of the country is intersected by numerous spurs or ridges, which part from the eastern side of
POONA.

the culminating range called the Western Ghauts, and generally hold a direction south-east, diminishing continually in height, until they sink into the plains of the Nizam's territory.

The Moola Moota, the Goor, and the Yeil, uniting with some other streams of less magnitude, which rise in the vicinity of the city of Poona, form the Bheema, which, taking a course south-east, receives, at about 160 miles from the source of the Goor, its remotest head, the Neera, a considerable stream; and below the confluence, continuing to flow in the same direction for sixty miles, finally passes into the territory of the Nizam. The Neera, which rises within the territory of Sattara, on the eastern declivity of the Ghauts, a few miles north of the British sanitarium of Mahabulishwur, flowing south-east for about eighty miles, forms the boundary between Sattara and this collectorate. Those streams must derive most of their contents from the monsoon rains on the Ghauts, as the climate of the less-elevated table-lands of the Deccan, and of the more depressed expanses in its western part, is characterized by aridity. The amount of annual rain-fall has been stated for the year 1830. "The easterly winds are characterized by extreme dryness; the lips, and the exposed parts of the skin, are cut, and become harsh and scaly; windows, doors, and joiners' work shrink, and present numerous interstices; and to sleep, exposed to the easterly wind, is to risk the loss of a limb, or a whole side." In general, however, the climate is not unhealthy, and the cantonments at Poona are found to be remarkably suited to the European constitution.

The character of the vegetation is indicative of the aridity of the soil and climate. Jacquemont found the country in June a parched waste, and water could nowhere be obtained by digging; yet in a few days moderate falls of rain covered the surface with verdure. Trees are very rare in this tract, there being only the Melia azadirachta, intermingled with cactus and euphorbia. Much attention has been given by government to the culture of the mulberry for feeding silkworms; but the experiment, though conducted by a gentleman from the south of Europe, well versed in the business, proved entirely abortive.

* It must be observed, however, that the Deccan, to which this rain-fall is attributed, is a tract of considerable extent, including several districts in addition to that of Poona.
POONA.

The trees attained no reasonable size, many decayed altogether, and the aspect of the remainder was so sickly, stunted, and dwindling, as to forbid all probable hope of success. Heber conjectured that the cultivation of the vine would be successful, but the average annual temperature would probably be too high.

The common cereal grains of the Deccan form the staple products of the collectorate, the surplus of which finds its way to the city of Poona, the great mart of the country, and thence to the coast, where salt and European goods are received in exchange. The potato is grown extensively in the northern parts of the collectorate, and supplies a large portion of the Bombay market, to which easy access is obtained by the excellent road that intersects the Northern Pergunnahs. Cotton is not cultivated to any great extent, Indapore being the only producing district. Throughout the collectorate, the cultivation of the Mauritius sugarcane has greatly diminished, owing, it is stated, to the poverty of the Deccan soil. In some of the districts, but more especially in the pergunnahs intersected by good roads, agricultural stock is on the increase. It is calculated that a pair of oxen are equal to the cultivation of ten acres of land. In some of the districts the proportion of land to stock is greater; and this would seem to indicate a more slovenly tillage in those districts.

The principal roads are those from Poona, connecting the city with Bombay, Sholapore, Ahmednuggur, Nasseck, Sattara, by the Neera bridge. Metalled roads, with side-drains, have recently been constructed in the Cusba Ghora of the Kheir pergunnah, with funds partly raised by assistance received from government, and partly by the voluntary contributions of the inhabitants; a fact showing that the natives are not altogether insensible to the advantages of improved means of communication, and that the expectation of interesting them in such matters is not hopeless. The line of road of the greatest commercial importance in this collectorate is that which, intersecting the Indapoor and Bheemthurry pergunnahs, leads from Sholapore to Poona. A considerable export from the south-

* The following is given as the average amount of land to a pair of oxen in the districts named:—Indapore, 26 acres; Soops, 21; Faubul, 21; Havillee, 20; Bheemthurry, 18.
POONA.

eastern and central provinces of the peninsula, consisting chiefly of cotton-wool, is brought to the coast by this line, much of it in carts, for which description of carriage the metalled road from Poona, by way of the Bhore Ghaut, to the coast, affords great facilities.

In this collectorate there are no manufactures for export. In some of the large towns, coarse cotton cloths are produced for consumption in the immediate neighbourhood. Paper is manufactured at Poona.

By far the greater portion of the population is Mahratta. There are, however, a considerable number of families deriving their origin from the Concan, some Guzerattees, and not a few Mussulmans, the descendants of the ruling race, when the country was held first by the sovereigns of Ahmednuggur and Beejapore, and subsequently by those of Delhi. There are also some of that class of Mussulmans denominated Boras. The total amount of population is stated to be 666,006,¹ being at the rate of about 11¾ to the square mile.

The mass of the population is agricultural, and a great portion of needy condition and unthrifty habits: the frugal and painstaking ryot, however, is tolerably well off. The recent revision² of the assessment, and the encouragement given to irrigation by the thirty' years exemption from veerhoonda,³ all tend to the advance of prosperity. Each village,⁴ or circle of villages, possesses one or more banyans, who, providing cash for the revenue payments, monopolize a great portion of the raw produce of the soil, which finds its way eventually to the city of Poona. Under the levelling rule of the British government, the village institutions are hastening to decay. The ryot having direct access to the government officer, heeds not the subordinate of the village; and as revenue settlements are now made with individuals, joint responsibility is set aside. These innovations doubtless tend to future good. The number of villages in the collectorate amounts to 1,174, of which 900 belong to the government; the revenues of the remainder being alienated.

At the close of the year 1852,⁴ there were in this collectorate sundry government vernacular schools, besides the Sanscrit and English college in the city of Poona. The Poorhunder village

¹ Parliamentary Return, 1851.
² Bombay Rev. Disp. 25 Feb. 1858.
schools, which were established by way of experiment in 1836, with schoolmasters at very low rates of pay, and principally for the purpose of introducing some little instruction among the agricultural classes, were not attended with successful results, and the Board of Education resolved to avail themselves of every opportunity of closing these district schools, and to apply the funds in support of a few schools of a higher class.

The principal towns are described under their respective names in the alphabetical arrangement.

Poona, at the period of its earliest mention in history, appears to have formed part of the Mussulman state of Ahmednuggur; by the sovereign of which state, a jaghire, of which Poona was the chief place, was conferred, in 1604, on an officer named Malolee. A son of Malolee, named Shahjee, after acting a conspicuous part in the closing events of the kingdom of Ahmednuggur, passed into the service of Bejapoor, and was continued in his jaghire, which had fallen to that state in the partition of the Ahmednuggur territories. Shahjee was the father of Sevajee, the founder of the Mahratta dominion, which for a time occupied so important a place in the political system of India. The son of Sevajee, named Sambajee, possessed few of the qualities which contributed to his father's success; he was made prisoner by Aurungzebe, and put to death while in captivity. His son Sevajee, subsequently known by the name of Saho, at the time of his father's death was an infant and a captive; circumstances little calculated to benefit his claims to sovereignty, more especially in Asia. Saho was eventually liberated on the death of Aurungzebe, but found the succession contested by his cousin, as stated in the article on Colapore, where also an account of the mode in which the contest was terminated will be found. A Brahmin, named Balajee Biswanat, held under Saho the office of Peishwa or minister; an office which, though it ultimately became the first in the Mahratta confederacy, and even absorbed the authority of the nominal chief, was originally only the second, the Priti Nidhi, or delegate of the rajah, being superior. By Balajee the affairs of Saho were managed with much address; and by the influence of negotiations conducted by him, a treaty was, in 1717, concluded with Hosen Ali, acting on the part of the emperor, by which the claim of Saho to the whole of the
POONA.

territory formerly possessed by Sevajee, with the addition of later conquests, was acknowledged, the emperor agreeing to restore all the forts in his possession within that tract; to allow the levy of chout, or Mahratta demand of a fourth part of the revenue throughout the Deccan, thus giving a legal title to that which was before a mere extortion; and to make a further payment of one-tenth of the remaining revenue, under the name of Sirdesmuki. In return, Saho was to pay a certain amount of tribute, to furnish a specified quota of horse, and to be answerable for any loss occasioned by depredations; thus acknowledging himself a vassal of the emperor. On the death of Balajee Biswanat, his son Bajee Rao succeeded to the office of Peishwa. Bajee Rao was not only a consummate master of artifice, but a man of great boldness of spirit, and actuated by a restless and insatiable ambition. He had a rival in the Priti Nidhi, by whom the arrangement with the rajah of Colapore was concluded; but the success of this minister did not enable him to supplant Bajee Rao, whose influence continued to extend in proportion to the numerous territorial and fiscal acquisitions which he succeeded in making, nominally for his master, but actually for himself. This course of aggression received a temporary check by the invasion of Nadir Shah; but when the country was relieved by the withdrawal of that invader, he resumed the prosecution of his schemes of aggrandizement with unabated vigour. In 1739 he conquered Salsette and Bassein from the Portuguese. The vicinity of Salsette to Bombay, coupled with the fact of Rajah Saho having granted all countries conquered from the Portuguese to the Peishwa in his own right, alarmed the Bombay government, who began to apprehend that the views of this Mahratta leader might not be restricted to the dominions of the Portuguese, but might extend to the possessions of other Europeans. The Peishwa, moreover, was endeavouring to create a maritime force. All these circumstances prompted the resort to measures of security; and with the intention of avoiding the dangers which seemed to be impending, the Bombay government concluded a treaty of fourteen articles with the brother of Bajee Rao, in which the claims of the contracting parties were defined and confirmed. Not long after the conclusion of this treaty, Bajee Rao died, leaving three sons, of whom the eldest, Balajee Rao,
POONA.

succeeded to the office of Peishwa, though not without serious opposition from various powerful Mahratta functionaries and chiefs, the Priti Nidhi, the rajah of Berar, and the Guicowar. The rajah Saho, always indolent, fell, towards the close of his reign, into a state of imbecility, which placed him entirely at the mercy of those around him. His minister Balajee, and the prince's wife Sawatri Bai, contended for the power of controlling him; and the former was so successful as to prevail on the demented rajah to sign a deed transferring all the powers of his government to the Peishwa, on condition of maintaining the royal title and dignity in the house of Sevajee, though Ram Raja, a posthumous son of the second Sevajee, whose existence had long been concealed* by his grandmother, the Tara Bai; and who accordingly succeeded to the nominal chieftainship on the death of Saho, in 1749. Balajee, now virtually the head of the Mahratta confederacy, continued to exercise his power with varied success, till his death in 1761; an event said to have been accelerated by the result of the battle of Paneeput, so fatal to the interests of the Mahrattas. The power and influence of the Peishwa thenceforth declined. Madhoo Rao, the second son of Balajee, succeeded his father; but being a minor, his uncle Bagoba was appointed regent. A protracted struggle for power succeeded between the uncle and the nephew, which ended in favour of the latter. Bagoba was deprived of authority, and subjected to confinement. Madhoo Rao died in 1772. Under the impression that his dissolution was approaching, he sent for Bagoba, and for his brother and successor, Narain Rao, and conjured them to adhere to each other. For a time, amicable feelings appeared to exist between them; but discord arose, and Bagoba was again placed under restraint. Within a year from his accession, the young rajah was murdered, and the ministerial party and Bagoba mutually charged each other with the crime. Bagoba, however, was proclaimed Peishwa; but his security in the possession of that title was shaken by the widow of the murdered Narain

* The title of this occupant of the throne of Sevajee has been questioned, but the weight of authority seems to be in favour of his claim. Its validity is, however, doubted by Mr. Elphinstone, who also throws suspicion on the fact of Saho having actually executed any deed conveying the exercise of the supreme authority to the Peishwa.
POONA.

Rao giving birth to a son. Ragoba asserted that the child was spurious; but his title was maintained by a powerful party, and the infant was formally installed as Peishwa. In this state of affairs Ragoba applied to the government of Bombay for assistance. The importance of obtaining possession of Salsette had long and urgently been impressed on that government; and the disputed succession of Poona seemed to afford a favourable opportunity for the attainment of the desired object. The Bombay government accordingly recognized the title of Ragoba, and opened negotiations with him. Pending these negotiations, intelligence arrived that the Portuguese were fitting out an expedition at Goa for the recovery of Salsette and Bassein. To prevent these places falling into the hands of their European rivals, the Bombay government took immediate possession of them, informing Ragoba that the measure was merely precautionary, and not intended to affect his rights.

In 1775, a treaty was concluded at Surat, by which Ragoba, in consideration of a certain amount of military force to be furnished by the Company's government for the prosecution of his claims, ceded to that government in perpetuity certain territories, including Bassein and Salsette. In accordance with the stipulations of this treaty, an English force, under Colonel Keating, joined the army of Ragoba at Cambay. Advantages, though not of a decided nature, were gained; but the government of Bengal disapproved of the treaty, and of the connection with Ragoba, and directed the withdrawal of the British force. The Bengal government also deputed Colonel Upton to Poona, to treat with the party in power there without the intervention of the Bombay government. Colonel Upton concluded a treaty, but the conditions were never fulfilled. The Poona ministry was divided into two parties, one headed by Moraba, the other by Nanah Furnavese. Moraba and his party were disposed to make Ragoba regent; Nanah professed views nearly similar, but as he proposed to carry them out through the assistance of the French, the government of Bengal became alarmed, and not only authorized that of Bombay to support Ragoba, but despatched a body of about 5,000 troops from Hindostan to Bombay for the same purpose. A new treaty was hereupon concluded by the Bombay government with Ragoba, in which it was
POONA.

stipulated that he was to exercise the office of regent with full power, during the minority of his rival claimant; while the Bombay government engaged to apply for orders from the Company to sanction the following extraordinary arrangement: that if Ragoba should be able satisfactorily to prove the child supposititious, he, Ragoba, should become Peishwa; but if the child should appear to be really the son of the deceased Peishwa, then, on his attaining the age of seventeen, the government and country should be equally divided between him and his uncle Ragoba. Without waiting for the Bengal troops, then on the Nerbudda, the Bombay government despatched a force to conduct Ragoba to Poona, and to invest him with the regency. This force advanced to within a few miles of Poona, when those under whose orders the expedition was placed suddenly determined on retreat. The force accordingly fell back on a place called Wargaum, where, being surrounded by the Mahrattas, a convention was concluded, under which it was agreed that Salsette and all the recent acquisitions from the Mahrattas should be restored, and that the Bengal detachment should be ordered back to Calcutta. The terms of the convention, which was concluded by a committee of persons called field-deputies, were such, however, as neither they nor even the Bombay government had power to grant, and it was never ratified. Colonel Goddard, who commanded the Bengal troops, knowing that the convention was of no force, disregarded it altogether, and, though his return had been made one of the conditions, pushed on, and arrived at Surat in February, 1779. He was vested with the full powers of treating with the Mahrattas, which other parties had prematurely exercised before his arrival. The Poona durbar, however, declared that no peace could be made unless Salsette were given up: hostilities were accordingly resolved on. Colonel Goddard took Ahmedabad and Bassein; but subsequently, from the general state of affairs and the want of resources, he was compelled to confine himself to the defensive. At length Scindia concluded a separate treaty for himself: one at an earlier period had been concluded with the Guicowar; and after some delay, a treaty, known as the treaty of Salbye, put an end to the war between the British and those administering the territory of the Peishwa. By the treaty, Bassein
and some other conquests were restored to the Peishwa; but the cession of Salsette and some other islands to the British, stipulated for in Colonel Upton's treaty, was confirmed. Various other diplomatic arrangements, calculated to effect particular objects, were subsequently concluded between the Peishwa and the British government; but in this brief sketch it would be superfluous to notice them in detail. In 1795 the Mahrattas became involved in war with the Nizam, a war terminated by the convention of Kurdjah, the conditions of which were highly advantageous to the former. In the same year, the Peishwa, Maderow Narrain, died. The next heir was Bajee Rao, the son of Ragoba; but Nana Furnavese tried to exclude him, in order to secure a continuance of his own power. Scindia, however, arriving at Poona with a large force, placed Bajee Rao on the musnud, and was thenceforward lord of the counsels of Poona. In 1802, Bajee Rao, taking part with Scindia in a contest which had arisen between that chieftain, shared in the defeat of his ally, Holkar having gained a complete victory in a battle fought near Poona, on the 25th October. The Peishwa fled to Bassein, having previously sought to avert the ruin he saw impending, by a communication to the British Resident at his court, expressing a desire to enter into a defensive alliance with the British, on the basis of that which they maintained with the government of Hyderabad. A treaty of defensive alliance, known as the treaty of Bassein, was accordingly concluded: a supplementary treaty was concluded in 1803; another treaty, for the settlement of territory ceded by the rajah of Berar and Scindia, was entered into in 1804. The Peishwa had readily entered into a close alliance with the British government, to avert the entire extinction of his authority; but, from his restoration to his deposition, he systematically pursued a course of policy having for its object the subversion of the British power.

In 1812 and 1813 the British government was called upon to arbitrate an adjustment of the Peishwa's claims upon the chiefs of Colapore and Sawunt Warree, and the Southern Mahratta jaghiredars. The decision, which was fatal to his pretensions of sovereignty over Colapore, strengthened the hostile feelings which he previously cherished towards the power to which he was indebted for the retention of his position as a
POONA.

sovereign prince, and his escape from the ruin which, without British assistance, awaited him; the condition of a close prisoner, or that of a destitute wanderer, being the alternative before him. Trimbuckjee Danglia, a man who, by pandering to the profligate passions of his master, had risen from a very low station to be the most important personage in the court of the Peishwa, fanned these feelings, and was ready to take any step for their gratification. The British government was bound by treaty to arbitrate certain long-standing disputes between the Peishwa and the Guicowar, or ruler of Baroda. In 1816, the Peishwa became pressing for the settlement of the disputed claims, and suggested that Gungadhur Shastry, the Guicowar's minister, should come to Poona, there to assist in the investigation and settlement of them. The Shastry knew that he was hated by Bajee Rao; he knew, moreover, the character of that prince, and that of his minion Trimbuckjee Danglia. It is not therefore surprising that he should have been reluctant to place himself in any degree in the power of such men. But the British government guaranteed the personal safety of the Guicowar's minister, and, thus assured, he ceased to be actuated by apprehensions which probably could have been overcome in no other way. The arrival of the Shastry was welcomed by Bajee Rao with the strongest demonstrations of friendship; he proposed to unite the family of his visitor with his own by marriage; and it is not unlikely that the flattering proposal tended in some degree to throw the stranger off his guard and diminish his fears, though it did not altogether remove them. The Peishwa and the Shastry proceeded together on a pilgrimage to Punderpoor, one of those places which Hindoo superstition has invested with sanctity. While there, the Shastry was invited by Trimbuckjee to repair to a celebrated temple, on some occasion which was regarded as of peculiar solemnity. His just appreciation of the villainous character of the man who proposed the visit was still sufficiently strong to induce him to hesitate; and it was not until after repeated messages that he yielded. He went, performed such devotions as Hindoo delusion prescribed, and on his return was assassinated by ruffians hired by Trimbuckjee Danglia, acting under the atrocious instructions of the master, of whom he thus proved himself so fitting an instrument.
The British Resident at the court of the Peishwa of course demanded the instant surrender of the wretch who had contrived the means and superintended the committal of the murder. The Peishwa sought to protect him; but at length the British government obtained possession of his person. He was confined in the fort of Tanna, whence, however, he soon found means of escaping. In the mean time the Peishwa was secretly striving by all the means in his power to induce the Mahrattas to unite in common cause against the English: Trimbuckjee, after his escape, actively promoted the designs of his master, by collecting troops for the meditated contest. These steps compelled the British government to pursue a decisive course, by demanding from the Peishwa such terms as a regard for the peace and security of India required, though by no means such as his crimes merited. He had no choice but to comply, or to be at once involved in war with the most powerful state in India. He was not prepared for the latter, and after a severe struggle, he most unwillingly and ungraciously accepted the terms tendered to him.

On the conclusion of the consequent treaty, the greater portion of the British troops were withdrawn from the Peishwa’s territories, preparatory to operations against the Pindarries. This appeared to Bajee Rao to afford him another chance of gratifying his revenge, and he availed himself of the opportunity by concentrating a large force at Poona. The small British brigade left at that place was thereupon removed to Kirkee, four miles distant, for the sake of occupying a better position. At this place they were attacked by the Mahrattas; but though the disparity of numbers was great, the enemy was repulsed at every point with great loss. A tedious course of warfare followed; but in all the actions that took place, the Peishwa’s forces were defeated. Towards the end of May, 1818, Bajee Rao, wearied out by constant defeat and hopeless wandering, and perhaps apprehensive of a worse fate than that of falling into the hands of the British, opened a communication with Sir John Malcolm. The result was, the formal renunciation by Bajee Rao of all sovereign power, and his acceptance of a grant of pensionary provision, at the amount of which even he could not fail to be surprised, and which, considering the character of the man, together with the
facts of his deposal having been formally proclaimed, and his country almost entirely reduced, the Governor-General, the Marquis of Hastings, was justly warranted in considering unnecessarily large. He, however, ratified the terms. Bajee Rao lived many years to enjoy, or at least to receive and expend, the vast income which had been placed at his disposal. With him ended the dynasty of the Peishwa, begun in usurpation and terminated in treachery. Out of the territories placed at the disposal of the British government by the crimes of Bajee Rao, a dependent principality was assigned to the rajah of Sattara, the representative of the founder of the Mahratta rule; the remainder were incorporated with the British dominions. Latterly, the Sattara line of rajahs has run out its course, and this portion of territory has lapsed to the British government.

POONA.—The principal town of the British collectorate of the same name. It is situate on the small river Moota, immediately above its confluence with the Moola, in a treeless plain, extending eastward from the Ghauts, which, at the distance of a few miles, rise to the height of 1,000 feet above the town. Poona was originally an ill-built city, without walls or fort, the bazars were mean, and the streets irregular; but recent and extensive improvements have changed both its character and appearance. In the period intervening between the years 1841 and 1846, no less than 400 new houses were built, and several more were in the latter year in the course of construction. A stone bridge of excellent masonry across the Nagjurree Nullah was also in the last-mentioned year completed, at the private cost of a wealthy courtesan, affording greatly-increased facilities to a large class of grain-dealers for the transport of their grain into the heart of the town. The old Mahratta bridge across the Moota Moola river having fallen into decay, was taken down; and it has been replaced by a bridge of stone, at an outlay of 47,000 rupees, or 4,700£, of which the government contributed 3,600£. The road over this bridge, which is at the west end of the city, is on the direct route to Bombay, and by it European imported goods, salt, and other articles, are brought from that port, as well as supplies of provisions and fuel from the neighbouring districts. There is another bridge over the same river, in the vicinity of
POONA.

Poona, called the Wellesley Bridge, which was built by the government. The streets and thoroughfares of the whole of the eastern portion of the city adjacent to the cantonment have been macadamized. The most remarkable building is the palace, formerly the residence of the Peishwa. It is of considerable extent, and contains a handsome quadrangle, surrounded by cloisters of carved wooden pillars. It now serves the various purposes of a prison, an hospital, and a lunatic asylum. The head-quarters of one of the divisions of the Bombay army are at Poona. The cantonments are on an elevated site a mile west of the city, and are perhaps the most extensive and best-arranged in India. The church is spacious and convenient, but in bad architectural taste, and disfigured on the outside by gaudy colouring. Poona is represented to have been long in a declining state. During the height of the Mahratta power, the population is believed to have amounted to 150,000. At the time of the overthrow of the Peishwa, in 1818, it was estimated at 110,000; it was in 1838 rated at 75,170. It is, however, to be observed, that these numbers are but conjectural; and the recent increase of houses, already adverted to, would scarcely seem compatible with any considerable diminution of inhabitants. Measures are in progress for effecting municipal improvements in the city.

An ample supply of water for this city had long been a want of primary importance, as affecting the health and comfort of the inhabitants; and endeavours have been made to obtain this desideratum by the repair and enlargement of the adjacent tanks and aqueducts. These measures, however, proved ineffectual, and it was finally decided to throw a dam across the Moota Moola river, with adequate waterworks for the supply of the city. Sir Jamsetjee Jejeebhoy agreed to defray the cost, which was estimated at 73,945 rupees, or 7,394L, exclusive of the machinery, which this distinguished benefactor of his country also undertook to provide. The dam, which was to be erected under the superintendence of an officer of the government, was commenced in the year 1844, but twice failed, once in 1845, and again during the floods in the following year. Sir Jamsetjee having already expended on this work a sum amounting to 175,000 rupees, or 17,500L, the completion of the work was in 1847 authorized at the public expense. The estimated

8 Bombay Jud. Disp. 18 Oct. 1850.
9 Bombay Public Disp. 2 Nov. 1842.
10 Id. 17 July, 1844.
11 Id. 20 Aug. 1847.
cost was 37,775 rupees, or 3,777l. Late in the year last mentioned, further difficulties were encountered in the construction of the dam, and a third failure ensued. In the year 1850, however, the works were brought to a termination, and a full supply of water has been thus secured to the mass of population in the vicinity of the cantonments.

There was a government English school in this city, which, in 1846, contained 118 pupils. On this number, the large majority (eighty-one) consisted of Brahmins; the remaining number (thirty-seven) was composed of Purvocs, Indo-Britons, Sonars, and nine other castes. A public examination of the school was held in October, 1846, conducted by the bishop of Bombay. With respect to the highest class, his lordship expressed himself in terms of high praise. This school has been recently amalgamated with the Sanscrit College, which was instituted in the year 1821, for the preservation, it is stated, of the ancient literature of the country. It is placed under the special superintendence of a European officer. It consists of three departments, Sanscrit, English, and Normal, and in 1853 contained 497 pupils, of whom 342 were in the English department. An interesting experiment is now in progress for promoting female education in this town. In July, 1851, the first girls’ school in Poona was established by a few educated native gentlemen. The number of girls under tuition at the end of the first year was fifty. At the close of the second, the number of schools had increased to three, while the aggregate number of pupils amounted to 237.

With the exception of grain-dealers, and those who trade in the raw products of the country, the mercantile classes in Poona are said to be declining in wealth. No market is now found for jewellery and precious stones, which were much sought after when Poona was the seat of native rule. The introduction of European piece-goods has caused the disappearance of native fabrics, which could not compete with them in price, and Poona has now scarcely any manufacture except a very small one of paper. Judging, however, from the annual increase in the number of houses, it is to be presumed that the loss of the trade, consequent on the deprivation of a court and other causes, has been supplied to some extent from new sources.
POONAHANAH.

The judicial establishment consists of one European judge and sessions judge, who is also government agent for the adjustment of claims against sirdars, and one European assistant-judge. There is a superintendent of police, and assistant-magistrate, who is a European. The native judicial officers are one principal sunder aumeen, two sunder aumeens, and seven moonsiffs.

The first mention of Poona in history seems to have been in 1604, when it was granted by the sultan of Ahmednuggur as jaghire to Mallojee, the grandfather of Sevaje, the Mahratta chief. In 1687 it was confirmed by the sultan to Shahjee, father of Sevaje. In 1683, during the operations conducted against Sevaje, by order of Aurungzebe, the imperial viceroy Shaista Khan took possession of this open town, from which, when surprised a few days afterwards by Sevaje, he had great difficulty in making his escape. His son, and most of his guards, were cut to pieces, and he himself wounded. A powerful force, however, immediately reinstated the discomfited commander. In 1667, Aurungzebe restored Poona to Sevaje; but under the sway of his successor Sambajee, it was occupied by Khan Jehan, an officer of the Padshah. On the Peishwa obtaining supremacy in the Mahratta confederacy, the seat of government was removed from Sattara to Poona. In 1763, Nizam Ali, of Hyderabad, sacked the town, and burned such parts of it as were not ransomed. In the struggle between the successive peishwas and their nominal subordinates Scindia and Holkar, Poona suffered many vicissitudes, until, in 1802, by the provisions of the treaty of Bassein, the Peishwa admitted a British subsidiary force to be stationed there. After the deposal of the Peishwa Bajee Rao (the particulars of which event are narrated in the article on the Poona collectorate), the city became the locality of the British civil establishment, as well as of the principal cantonment of the Deccan. Elevation above the sea 1,823 feet. Distance from Bombay, S.E., 74 miles; from Sattara, N., 58; from Ahmednuggur, S.W., 70. Lat. 18° 31', long. 73° 53'.

POONAHANAH, in the British district of Goorgaon, lieutenanted-governorship of the North-West Provinces, a town on the route from Muthra to Bewaree, 40 miles N.W. of the former. Lat. 27° 51', long. 77° 16'.
POOKULLO.—A town in the native state of Hyderabad, or territory of the Nizam, situate on the left bank of the Godavery river, and 126 miles N.N.E. from Hyderabad. Lat. 19° 6’, long. 79° 7’.

POONAMALLEE.—A town in the British district of Chingleput, presidency of Madras, 13 miles W.S.W. of Madras. Poonamallee is a military station, and accommodation is maintained for two or three companies of European troops. Lat. 13° 2’, long. 80° 10’.

POONASSA.—A town in the native state of Gwalior, or territory of Scindia’s family, 82 miles S.E. by S. from Oojain, and 97 miles W. by N. from Baitool. Lat. 22° 10’, long. 76° 30’.

POONCH.—See PUNCH.

POONDUR.—A district originally subject to the hill state of Joobul, of which it forms the northern part. It extends about eight miles in length, nearly in a direction from southwest to north-east, and five in breadth, in a direction at right angles with the former; lying between lat. 30° 58’—31° 4’, long. 77° 35’ and 77° 42’. This tract consists principally of a main ridge running from south-west to north-east, forming part of the range connecting the peak of Wartu with that of Chur, and having probably an elevation of from 6,000 to 7,000 feet above the sea. The streams flow across the district in a south-easterly direction towards the Tonne. They so abound in fish, that some men employed by Fraser in about twenty minutes drew out a considerable quantity by hand merely, they being unprovided with any fishing apparatus. The inhabitants are a hardy, fearless race, who continued to resist the Goorkhas after the other mountaineers had submitted, and until after a bloody conflict at Matteelee, where they were overpowered by a force of 6,000 men. On the march of the English troops into this part of the mountains, the inhabitants again rose in arms against the Goorkhas, exterminated those occupying their country, and investing the fort of Chepal, farther south, conducted mainly to its surrender. On the expulsion of the Goorkhas, and subsequent pacification of the country, Poondur devolved to the East-India Company for want of heirs to the former ruling family; and as no advantage appeared likely to result from retaining dominion over its barren soil and rude
people, it was, by the advice of Sir David Ochterlony, transferred to the rana of Keonthul, its present sovereign. It is estimated by De Cruz to have an annual revenue of 300L, and a population of 3,000, of whom 400 bear arms.

POONG.—A town in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 11 miles N. of Moulmein. Lat. 16° 38', long. 97° 42'.

POONGUL, in the Rajpoot state of Beekaneer, a village on the route from the town of Beekaneer to that of Bahawulpoo, and 48 miles N.W. of the former. It is described by Elphinstone as situate amidst desolation, striking even in that desert region. "If I could present to my reader the foreground of high sand-hills, the village of straw huts, the clay walls of the little fort going to ruins, as the ground which supported them was blown away by the wind, and the sea of sand, without a sign of vegetation, which formed the rest of the prospect, he probably would feel as I did, a sort of wonder at the people who could reside in so dismal a wilderness, and of horror at the life to which they seemed to be condemned." Lat. 25° 29', long. 72° 52'.

POONITU.—A town in the native state of Travancore, territory of Madras, 57 miles N. by E. from Quilon, and 91 miles N.W. from Tinnevelly. Lat. 9° 40', long. 76° 50'.

POONOO.—A town in the British district of Shikarpoor, territory of Scinde, presidency of Bombay, 32 miles W. of Shikarpoor. Lat. 27° 58', long. 68° 8'.

POONPOON.—A river rising in Ramgurh, among the mountains on the northern frontier of Behar, about lat. 24° 80', long. 84° 20'. It holds a course generally north-east, through Behar and Patna, receiving in its course some considerable torrents. At its mouth it has steep banks, about thirty feet high, and a channel 100 yards wide. Its total length of course is about 130 miles. At the distance of a few miles further east, is the course of the Little Poonpoon, holding a direction nearly parallel to that of the larger stream, and ultimately joining it twelve miles above its confluence with the Ganges, at Futwa, in lat. 25° 29', long. 85° 23'.

POONWA,1 in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route, by Rajapoop ferry, from the cantonment of Allahabad to

1 E.I.C. Ms. Doc.
**POO.**

Banda, and 38\(^{2}\) miles W. of the former. The road in this part of the route is bad and winding, the country well cultivated. Lat. 25° 27', long. 81° 28'.

POOPREE.—A town in the British district of Tirhoot, presidency of Bengal, 36 miles N.E. of Mozufferpoor. Lat. 26° 30', long. 85° 50'.

POOR, in the British district of Mozuffurnuggur, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pargannah of the same name. Elevation above the level of the sea 963\(^{1}\) feet. Lat. 29° 40', long. 77° 54'.

POORAH,\(^{1}\) in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a town on the route from the cantonment of Futtehghur to that of Cawnpoor, and 26\(^{2}\) miles N.W. of the latter. It has a bazar, and is well supplied with water. The road in this part of the route is indifferent, the soil rather sandy, but highly cultivated, and abounding with groves of mango-trees. Lat. 26° 45', long. 80° 9'.

POORAINUH, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Oudh, 54 miles W. by N. of the former. Lat. 26° 49'; long. 82° 32'.

POORALIA.—A British district in the presidency of Bengal, bounded on the north-west by those of Barrabhoom and Pachete; on the east by Bancoorah and Midnapoor; and on the south-west by Singhboom and the native state of Mohur-bunge. It lies between lat. 22° 9'—23° 15', long. 86° 5'—87° 13'; is seventy miles in length from north-east to south-west, and sixty miles in breadth. Pooralai, the principal place, is the station of the assistant to the political agent for the south-west frontier of Bengal and commissioner for Chota Nagpore. It is situate forty miles west of Bancoorah.\(^{1}\)

POORANDA.—A town in the British district of Purneac, presidency of Bengal, 22 miles W. of Purneac. Lat. 26° 46', long. 87° 10'.

POORANUM, in the Jetch Dooab division of the Punjab, a town situated on the left bank of the Jhelum, 89 miles N.N.W. of the town of Lahore. Lat. 32° 46', long. 73° 40'.

---

POO.

POORBOONI, in Koonawur, a district of Bussahir, is a village on the left bank of the Sutluj. It is of considerable size, with houses built of hewn stone, bonded with beams of deodar. The roofs are flat, and formed of tempered clay, spread over layers of birch-bark, supported by horizontal timbers. Grapes are produced here in great abundance and of fine quality. The inhabitants are, like most other Koonawaris, of a commercial turn, and trade to Chinese Tartary, taking thither iron, horse-shoes, swords, matchlocks, dried fruits, and tobacco, and receiving in return wool, salt, goats, and sheep. Poorbooni is 7,318 feet above the sea. Lat. 31° 35', long. 78° 22'.

POORBUNDER,1 in the peninsula of Kattywar, province of Guzerat, a town on the south-west coast, in the district of Burda. Though having no shelter for ships2 of considerable burthen, in consequence of a bar obstructing the entrance, it is much frequented by craft of from twelve to eighty tons burthen, and “is the best on the west coast,”3 carrying on brisk trade with the opposite coast of Africa, and with various ports in Sinde, Beloochistan, Arabia, the Persian Gulf, and the coasts of the Concan and Malabar; and about sixty vessels of various sizes belong to the port. The exports are principally grain and cotton, the imports of various kinds. Poorbunder belongs to a rana or chief of the Jaitwa tribe of Rajpoote, who also holds the whole district of Burda or Jaitwar, for which he pays4 an annual tribute of 3,000l. to the Guicowar, and also pays annually to the British government the moiety of the duties levied at the seaport of Poorbunder, yielding annually a revenue of from 3,000l. to 3,500l. The reigning family claim descent from Hanuman, the monkey-god, and are believed popularly to resemble him in the appendage5 of tails, whence their surname Pancheria, or “tailed.” Distance from Ahmedabad, S.W., 210 miles; Baroda, W., 230; Bombay, N.W., 275. Lat. 21° 37', long. 69° 45'.

POOREE.—See JUGUBNAUTH.

POORMAH.—A town in the recently lapsed territory of Nagpoor, 126 miles E.N.E. from Nagpoor, and 87 miles S. from Ramgur. Lat. 21° 38', long. 81° 8'.

POORNA, a river of Hyderabad, and a considerable feeder
POO.

of the Godavery, rises in lat. 20° 22', long. 75° 16', and, flowing south-east for 190 miles, falls into the Godavery river, in lat. 18° 6', long. 77° 5'.

POORNANA.—A river rising in lat. 20° 59', long. 73° 44', on the western slope of the Western Ghats, and flowing through the territory of the Daung rajahs, Wusravee, and the British district of Surat, falls into the North Indian Ocean, in lat. 20° 53', long. 72° 48'.

POORNAH RIVER rises in lat. 21° 35', long. 77° 16', in the British district of Baitool, and flowing southerly for sixty-five miles through that district, and for ninety-five through one of the recently sequestrated districts of the Nizam's dominions, falls into the Taptee, in lat. 21° 4', long. 76° 8'.

POOROGAON.—A town of Eastern India, in the British district of Northern Cachar, presidency of Bengal, 60 miles E. by S. of Jynteahpore. Lat. 25° 4', long. 99°.

POORSBA.—A town in the British district of Dinajepore, presidency of Bengal, 39 miles S.E. of Dinajepoor. Lat. 25° 13', long. 89° 6'.

POORUNDHUR, in the collectorate of Poona, presidency of Bombay, "a hill fort, connected with a neighbouring range." The highest point of the mountain of Poorundhur is upwards of 1,700 feet from the plain immediately below, and 4,472 feet above the sea. There are two forts, an upper and a lower, situated from 300 to 400 feet below the summit. The works, like most of the hill forts in that part of the country, are of perpendicular rock, and frequently weakened rather than strengthened by curtains and bastions of masonry, by which the natural defences are generally surmounted. It was one of the first places which the Mahratta chief Sevajee secured, and he obtained it by practising on the weakness of those by whom it was held. In 1665 it was invested by the forces of Aurungzebe, under the command of Dilir Khan, and though the defence was obstinate, and the success of the undertaking doubtful, Sevajee appears to have been so intimidated at the prospect of its fall, that he surrendered the place and himself, and entered the service of Aurungzebe, from whom, however, he soon revolted, and in 1670 recaptured the fort. After the power of the Peishwas had superseded that of the descend-
ants of Sevajee at Poona, it was the usual stronghold to which
the former retreated when unable to remain in safety at the
capital. In 1818 it was invested* by a British force, and, after a
brief resistance, surrendered at discretion. The fort commands a
passage through the Ghats, denominated the Poorundhur Ghat.
Here, in 1776, was concluded a treaty between the British
government and the Mahratta states; but its conditions were
never fulfilled, the treaty being overruled by a subsequent
agreement between the Bombay government and Ragoba.

The Poorundhur village schools were established by way
of experiment, by Lieutenant Shortrede, in 1836, with school-
masters on rates of pay from three rupees to eight rupees per
mensum, principally for the purpose of introducing some little
instruction among the agricultural classes. These rates proved
too low, except for a very inferior class of teachers. Accord-
ingly, the reports of the Poorundhur schools continued to be
from year to year exceedingly unsatisfactory. The attention
of the Board of Education was constantly directed to the inca-
pacity of the masters and the apathy of the inhabitants, and
in 1846 it was determined not only to reopen no school in the
district which had once been closed, but to take every oppor-
tunity of abolishing the schools still existing, and to appro-
piate the fund in support of a fewer number of schools of a
higher class. The number of schools in the Poorundhur districts
of the Poona collectorate in 1846 amounted to sixty, and that
of boys to 1,353.

Poorundhur is one of the sanitarial stations* for European
officers: it is distant 20 miles S.E. of Poona, 40 miles N. of
Sattara, and 90 S.E. of Bombay. Lat. 18° 16', long. 74° 2'.

POURUNGURH.—A town in the British district of Rut-
nageriah, presidency of Bombay, 12 miles S. of Rutnageriah.
Lat. 16° 50', long. 73° 22'.

POORUNPOOR, in the British district of Shahjehanpoor,
lieutenant-governorship of the North-West Provinces, a town
on the route from Bareilly to the Nepal territory, 48 miles E.
by N. of the former. Lat. 28° 30', long. 80° 13'.

POORWA.—A town in Bundelcund, situate on the left
bank of the Pysunnee river, distant four miles N. from Tir-
bowan. Lat. 25° 16', long. 80° 56'. The territory of which
this town is the principal place, belongs to a native chief under

the protection of the British government: it contains an area
of twelve square miles, and a population of 1,800.

POORWAH.—A town in the native state of Oude, 65 miles
N.W. from Lucknow, and 37 miles E.N.E. from Furruckabad.
Lat. 27° 30', long. 80° 13'.

POORWAH.—A town in the native state of Oude, 65 miles
S.S.W. from Lucknow, and 30 miles E. from Cawnpoor. Lat.
26° 29', long. 80° 51'.

POORYNHA, in the British district of Shahjehanpoor,
lieutenant-governorship of the North-West Provinces, a village
on the route from Futtehgurh to the cantonment of Shahjehan-
poor, and 18 miles S.W. of the latter. The road in this part
of the route is indifferent; the country level, open, and par-
tially cultivated. Lat. 27° 45', long. 79° 46'.

POORYNEE, in the British district of Bijnour, lieutenant-
governorship of the North-West Provinces, a village on the
route from Moradabad to Hurdwar, and 44 miles N.W. of the
former. The road in this part of the route is good, and passes
through an open and partially cultivated country. Lat. 29° 24',
long. 78° 31'.

POOSA,¹ in the British district of Tirhoot, presidency of
Bengal, a town on the route from Dinapore to Purnesh,
50 miles N.E. of former, 150 W. of latter. It is situate on
the banks of the Little Gunduck river, has a good bazar, and
supplies are abundant. Lat. 25° 59', long. 85° 41'.

POOT.—A town in the British district of Tavoy, one of the
Tenasserim provinces, presidency of Bengal, 110 miles S. by E.
of Moulmein. Lat. 14° 56', long. 98° 5'.

POOTH, in the British district of Meerut, lieutenant-
governorship of the North-West Provinces, a town on the route
from Meerut to Budooon, 88 miles S.E. by E. of the former.
Lat. 28° 40', long. 78° 16'.

POOTLEE.—See KOTPOOTLEE.

POOTLEE.—A town in the Rajpoot state of Ulwar, 28 miles
W.N.W. from Ulwar, and 98 miles S.W. from Delhi. Lat.
27° 40', long. 76° 13'.

POOTORAY.—A town in the native state of Travancore,
presidency of Madras, 20 miles S.E. from Trivandrum, and
32 miles W.N.W. from Cape Comorin. Lat. 8° 17', long.
77° 11'.

POO—POR.

POOTTOOR.—A town in the British district of South Canara, presidency of Madras, 26 miles E. by S. of Mangalore. Lat. 12° 47', long. 75° 15'.

PORAKADY.—A town in the British district of Malabar, presidency of Madras, 55 miles E. by S. of Cannanore. Lat. 11° 41', long. 76° 13'.

PORENAUMLA.—A town in the British district of Cuddapah, presidency of Madras, 39 miles N. by E. of Cuddapah. Lat. 15°, long. 79° 4'.

PORIAN POINT, on the coast of the British province of Pegu, at the mouth of the Negrawa river. It lies low, is formed of white cliffs covered with trees. Distant 69 miles S.S.W. of Bassin. Lat. 15° 49', long. 94° 29'.

PORKA, or PORKAD,\(^1\) in the territory of Travancore, under the political superintendence of presidency of Madras, a town on the seacoast, having a trade in timber, cocoanuts, pepper, and coir or cocoanut-fibre. There is no haven or port of any kind, and ships trading here anchor\(^2\) in the open sea off the town, in six fathoms water, one and a half or two miles from shore. It was formerly a place of much greater importance than it is at present, and was the principal place\(^3\) of a small raj or state, which was subverted in the year 1748, by the rajah of Travancore. Distance from the city of Cochin, 8 E. 53 miles. Lat. 9° 20', long. 76° 25'.

POBTO NOVO,\(^1\) in the British district of South Arcot, presidency of Madras, a town on the Coromandel coast, at the mouth of the river Vellaur, which, rising near the base of the Eastern Ghats, and having a considerable length of course, is small at its mouth, and admits\(^2\) only coating craft. Ships of superior burthen must anchor two miles off shore, where they have six or seven fathoms of water, with good holding-ground in mud. This town was formerly of considerable importance and prosperity; but having suffered much in the wars between the British and Mysorean governments, sank into decay. Its prosperity is, however, rising, in consequence of extensive ironfoundry-works having been established here by a joint-stock association, called the East-India Iron Company, to whom also belong the works at Beypore.\(^3\) The ore smelted is in great abundance\(^4\) in the vicinity, and can be reduced by the usual processes into the finest steel.
Porto Novo was burned by Hyder Ali in July, 1780, upon his first irruption into the Carnatic. In the following year, a critical battle was fought at this place, between Hyder and the British, which terminated in the complete discomfiture of the former. Hyder had anticipated a different result. Relying upon his vast superiority of numbers, he trusted that the day had arrived when he might completely annihilate the only army that remained to oppose him, and actually issued an order at the commencement of the action, that no prisoners should be taken. Distance from Tranquebar, N., 32 miles; Madura, N.E., 155; Tanjore, N.E., 63; Madras, S., 116. Lat. 11° 31', long. 79° 49'.

POUDELLAH.—A town in the British district of Nellore, presidency of Madras, 28 miles W.N.W. of Ongole. Lat. 15° 38', long. 79° 41'.

POUNA, or PONNA.—See Gon.  
POUNNALY.—A town of Burmah, situate on the left bank of the Irawady river, and 66 miles N. from Ava. Lat. 22° 49', long. 96°.

POWAEEN, in the British district of Shahjehanpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Shahjehanpoor to Jemlah, 18 miles N.E. of the former. Powaeen is returned as containing a population of 5,245 inhabitants. Lat. 28° 4', long. 80° 10'.

POWANGURBH.—A town in the native state of Guzerat, or dominions of the Guicowar, 22 miles N.E. from Baroda, and 69 miles S.E. by E. from Ahmedabad. Lat. 22° 28', long. 78° 30'.

POWAR.—A town in the British district of Poonah,
POW-PRI.

presidency of Bombay, 17 miles W. of Poonah. Lat. 18° 31', long. 73° 39'.

POWNAR.—A town in the lapsed territory of Nagpoor or Berar, 40 miles S.W. from Nagpoor, and 79 miles E.S.E. from Ellichpoor. Lat. 20° 48', long. 78° 42'.

POWREE, in the territory of Gwalior, a town on the route from Calpee to Kotah, 195 miles S.W. of former, 126 E. of latter. It has a bazar, and supplies may be had; but the water, which is obtained from a small stream and from wells, is bad. Lat. 25° 32', long. 77° 27'.

POWTI.—A town of the British district Bijnour, lieutenant-governorship of the North-West Provinces. Lat. 29° 12', long. 78° 32'.

POWUNGURH.—A town in the native state of Kolapoor, presidency of Bombay, 64 miles S. from Sattara, and 69 miles N.N.W. from Belgaum. Lat. 16° 47', long. 74° 12'.

PRAIGPOOR, in the Rajpoot state of Jeypore, a town on the route from Delhi to the town of Jeypore, 107 miles S.W. of former, 54 N.E. of latter. It has a bazar, and water is plentiful. Lat. 27° 38', long. 76° 13'.

PRANHETA RIVER.—See Weingunga.

PRINCE OF WALES ISLAND (called also Penang, from its form resembling that of the areca nut, for which Penang is the Malay term*), is situated near the northern entrance of the Straits of Malacca, off the western coast of the Malay peninsula, being separated from its dependency Province Wellesley, on the mainland, by a channel two miles and a half wide. It lies between lat. 5° 14'-5° 29', long. 100° 25'; is fifteen miles in length and twelve in its greatest breadth, and contains an area of 160 square miles.

Favoured by nature, not less in its highly advantageous mercantile situation than in the rich and varied produce of its soil, this flourishing island is sheltered from the south-west by the lofty mountains of Sumatra, and on the east by the chain of the Malayan peninsula, so that ships approaching its shores escape the fury of the storms which prevail in this quarter of the globe; and a safe access is at all seasons easily obtained to the

* Though this is the derivation given by several authorities, it appears not improbable that the large growth of arecas on the island should have given rise to the title.

178
PRINCE OF WALES ISLAND.

harbour, which, formed by the strait separating Penang from the Quedah coast, is deep, with good anchorage, enabling ships of large burden to lie a few hundred yards off the town; and so spacious, as to be capable of containing almost any number of vessels. A considerable commerce is accordingly carried on, which is represented as being on the increase. The coast is bold, and studded with several islands, and on almost every side the shore is lined with groves of the cocoanut. A chain of mountains, having an elevation of from 2,000 to 2,500 feet above the level of the sea, run diagonally across the island from north-east to south-west; on each side, extending from their base to the coast, are fertile plains, which are entirely cultivated, except where interrupted by forests of fine trees and groves of the areca. To the north-east is a level plain, three miles in breadth, called the “Valley.” This is the most populous part of the island; Georgetown (the capital), with its forts, barracks, &c., being built on its eastern extremity, and the houses of the principal European inhabitants scattered over its surface. The northern part is generally mountainous, and the summits of many of the hills are studded with residences of European planters. There are no rivers; but numerous streams and rivulets, which find their source in these mountains, serve to irrigate and fertilize the soil.

The climate of Penang varies on the hills and in the valley. In the former it is most delightful: the medium temperature of the year is 70°; the average annual range of the thermometer about 10°. Being exposed at all times to refreshing breezes, the heat in the middle of the day, in the hottest weather, is never oppressive; and from the purity and bracing character of the air, together with the beauty of the scenery, it offers a most agreeable resort for convalescents. At some seasons, morning fogs hang over the summits, which make it cold, and render warm clothing necessary. In the valley, covered with its rich verdure and luxuriant vegetation, the climate is moist. There the temperature in the day rises to 90°, and is seldom lower than 76°; but the nights and mornings are always delightfully cool. January and February are the driest months; April, May, and June are rainy ones; but showers are frequent throughout the year. The diseases which are most
PRINCE OF WALES ISLAND.

common are the cholera, fevers, diarrhoea, dysentery, rheumatism, and ulcers.

The geological formation of Prince of Wales Island is primitive. The mountains consist almost exclusively of granite; mica occasionally occurs in pretty large quantities, and quartz is sometimes found. The subsoil of the hills consists in some places of decomposed rock, varying from one to eight feet in depth; the valley is of alluvial formation, formed by the detritus of the mountain, which has been accumulating for ages. Dr. Ward supposes that the sea at some remote period covered these parts, and washed the base of the mountains; and this opinion is borne out by the appearance of the opposite shore, where Captain Low discovered for some miles inland evidences of the gradual retirement of the ocean, in the ridges which at intervals run parallel with the coast. The only mineral known to exist is tin; and it is said the mountains are rich in this ore, though no mines have been worked.

The soil throughout the island is generally light, but varies in quality: at the foot of the mountains it becomes rich; in the valleys it consists of a vegetable mould, some inches in depth, with a substratum of sand. Towards the sea, where it has been covered with mangroves, the soil is a rich black mould, mixed with small quantities of sand and gravel.

The whole island is covered with a luxuriant vegetation. When first transferred to the English, dense forests and noxious jungle covered its surface: these have been now cleared away, and highly-cultivated fields and smiling gardens occupy their place. The eastern side of the island, consisting of low lands, which are well adapted to the growth of rice, is almost exclusively appropriated to its cultivation. On the south-western side, the soil, being of a different character, is occupied by beautiful plantations of the spice and pepper plants. The cleared summits of the hills are productive in cloves, which are the finest in the world; their sides are clothed with forests and plantations of tea, cotton, and tobacco; and the plains are rich also in coffee, sugarcane, and all descriptions of fruit-trees and vegetables. The nutmeg is a tall tree: the island contains several descriptions, varying in the colour of their leaves and the shape of the fruit. The betel-vine is extensively planted;
the natives have a great partiality for the leaf, and are large consumers of it.

So great a variety of races constitutes the population of Prince of Wales Island, that Sir George Leith remarks, "There is not, probably in any part of the world, so small a space in which so many different people are assembled together, or so great a variety of languages spoken." There are Malays, Chinese, Buttas, Bengalese, Europeans, Chuliahs, Siamese, and Burmese. When first taken possession of by the British, it was very thinly populated; a few Malay families, who used to gain their livelihood by fishing, and several bands of pirates, being the only inhabitants. Soon after the settlement of the British, however, Chinese, and people from various countries, congregated here to enjoy the advantages of British protection; and in 1797, ten years after the first establishment of the British, the number of inhabitants amounted to 6,937. In 1801 it had increased to 9,587; in 1828 the population was 37,715; in 1848 it had risen to 39,589. The total population of the Straits settlements at the same period, inclusive of military and convicts, was as follows:

The British inhabitants are either planters, merchants, or gentlemen holding official situations.

Prince of Wales Island is the seat of government for all the British possessions in the Straits. At the latter end of the last century, the East-India Company deemed it necessary to establish a port in the Straits of Malacca; and after several fruitless endeavours to obtain Acheen, Penang was fixed upon. The Company were at the same time apprized by Captain Light, that the king of Quedah would transfer the island into their hands upon the annual payment of 6,000 Spanish dollars. Terms being drawn up and agreed to, Captain Light was appointed by the government superintendent of their new settlement. Through the indefatigable exertions of Captain
Light, forests were cleared, lands distributed, a town built, and a port constructed; so that in a few years the island was in a most flourishing condition. In 1791, the king of Quedah seeing its prosperous state, demanded an increase of stipend, and upon refusal, collected a force on the opposite shore for the purpose of attack. This intention, however, was frustrated by the timely operations of the superintendent, who, applying for assistance from Bengal, drove him away, dispersed his troops, and afterwards entered into a treaty with him. Captain Light, after filling his station to the satisfaction of his country and those over whom he was placed, died in 1794. A few years afterwards, the designation of superintendent was changed to that of lieutenant-governor. In 1802, a strip of land on the opposite coast, now known as Province Wellesley, was obtained from the king of Quedah; and in 1807, the judicial administration, previously in the hands of the local government, was vested in a recorder's court. Before the year 1805, the authorities of Penang were subordinate to the Bengal presidency; at that period they were constituted a separate presidency. This new arrangement lasted till 1830, when Malacca and Singapore were incorporated with Penang, and the eastern settlements were again made subordinate to Bengal. A commissioner or governor was appointed to preside over the three settlements, and a deputy resident was placed over each. In 1851, this dependency upon the government of Bengal was removed, and the governor of the united settlements was declared subject only to the government of India.

PROME.—A town in the British territory of Pegu, situated on the left bank of the Irawaddy. It is a place of considerable importance, and under British administration will probably advance in commercial consequence, wealth, and prosperity. During the first Burmese war (1825), it was taken possession of by the British without the trouble of firing a gun, the enemy having deserted it, after setting it on fire. The conflagration destroyed one quarter of the town. The captors were rewarded by finding among the spoil a hundred pieces of artillery and a large supply of grain. In the second war with Ava (1852), Prome again fell into the hands of the British, and with almost as little effort on their part. Some resistance was offered as part of the troops, after landing, advanced to
the position meant to be occupied for the night; but it was speedily overcome, with very trifling loss, and in the morning the town was found evacuated. *Prome is distant from the town of Pegu, N.W., 113 miles. Lat. 16° 47', long. 95° 3'. *PROMNA.—A town in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 53 miles N. of Moulmein. Lat. 17° 16', long. 97° 42'. *PROVINCE WELLESLEY.—See WELLESLEY PROVINCE. *PUCHITGURH.—A town in the native state of Sawuntwarree, presidency of Bombay, 20 miles N.E. from Vingoora, and 52 miles S.W. by S. from Kolapoor. Lat. 16° 3', long. 73° 58'. *PUCHITGURH.—A town in the native state of Kolapoor, presidency of Bombay, 50 miles N.W. from Kolapoor, and 38 miles S.W. by S. from Sattara. Lat. 17° 12', long. 73° 47'. *PUBB MOUNTAINS, 1 extending southward from the Hala range, and forming a natural boundary between the Belooche province of Lus and Sinde. If we consider their northern limit to be in lat. 26°, where the Hala range becomes contracted to about thirty miles in breadth, 2 and their southern to be Cape Monze, their length will be found to be about ninety miles. In lat. 25° 3', long. 66° 50', they are crossed by the route from Kurrachee to Sonmeanee, at the pass of Gun-cloba, described by Hart 3 as 'stony, of trifling ascent, and the descent equally gentle.' The highest part appears to be about lat. 25° 30', where native report represents the elevation as great, though it does not probably exceed that of the mountains of Western Sinde, considered to be about 2,000 feet. 4 *PUBNA. 1—A British district under the presidency of Bengal, named from its principal place. It is bounded on the north by the British district Bogra or Bagurn; on the northeast by the British district Mymensing; on the south-east by the British district Dacca Jelalpore; on the south by the British district Jessore; on the west, and also on the north-west, by the British districts Nuddea and Rajeehahye: it lies between lat. 28° 34'—24° 36', long. 88° 55'—89° 48', and has an area of 2,606 square miles. * It is a remarkably watery tract, containing many jhils or shallow lakes, and being traversed

* Royounge, in the northern quarter of the district, was made over to Boogoora in 1840. 1
PUBNA.

by the Ganges, and numerous offsets from that river and from the Brahmapootra. The Ganges, called at this part of its course the Podda, enters the district at Balmarea, on the western frontier, in lat. 24° 10', long. 88° 56', and holds a course sinuous, but generally south-easterly, for ninety miles, to Molasora, in lat. 23° 40', long. 89° 52', where it passes into Daca Jelalpore, about fifteen miles above which point, it on the left side receives the Jaboona, a great offset from the Brahmapootra. It throws off numerous offsets right and left, and in many places expands widely, inclosing numerous extensive islands. Hober, who navigated it during the rainy season, describes it at that time as from four to five miles wide. The Ballasir, a great watercourse formed by the junction of the Attree and the Burrul, an offset of the Podda, holds a course from north-west to south-east for fifty miles (or, including its affluents, sixty), and then joins the Jaboona, a great branch of the Brahmapootra. It is throughout a succession of lakes or jhils, many of which are of considerable extent. The great river Curatteea joins it on the left side, about fifteen miles above the confluence with the Jaboona. This last stream, transmitting the main volume of the Brahmapootra, and flowing from north to south, forms the eastern boundary of this district during a course of twenty miles, when it falls into the Ganges on the left side. The Pubna, a considerable watercourse, parts from the Podda on the left side, near the town of Pubna, whence it derives its name, takes a sinuous, but generally south-easterly course, for about fifty miles, and rejoins the main stream just above its confluence with the Jaboona. The Gorai, the Chundna, and the Hariganga, large streams, diverge from the Podda on the right side, and traverse the southern part of the district in a south-easterly direction. The Kumar, a large offset from the Martabhanga branch of the Ganges, holding a very tortuous course, but generally in a south-easterly direction, forms the south-western boundary of this district, separating it from the British possession of Jessore for about sixty miles, to Surbaz. All these streams communicate right and left by means of numerous channels, rendering the surface a reticulation of watercourses, and everywhere, during the rainy season, causing widely-spread inundations. The district is indeed nearly as much intersected by watercourses as the Sunderbuuds; but the

2Narrat. of Journ. l. 166.
streams of the former are fresh, whilst those of the latter are salt, or at least brackish. The country is in many places very fine, especially along the banks of some of the rivers. Heber, in the narrative of his navigation of the Chundna, observes, "The broad river, with a very rapid current, swarming with small picturesque canoes, and no less picturesque fishermen, winding through fields of green corn, natural meadows covered with cattle, successive plantations of cotton, sugar, and pawn, studded with villages, and masts in every creek and angle, and backed continually (though in a continuous and heavy line, like the shores of the Hooghly) with magnificent peepul, banian, bamboo, and cocoa trees, afford a succession of pictures the most riant that I have seen, and infinitely beyond anything which I ever expected to see in Bengal."

The population of this district, according to official return, amounts to 600,000.5

From the facility of water-carriage in every part of the district, and in every direction, roads are little required. The principal routes are from north to south, from Pubna, by Comercolly, to Jessore; from east to west, from Pubna to Cossimbazar and Moorshedabad; and from south-east to north-west, from Pubna to Rampore.

This tract was acquired by the East-India Company in 1765, by virtue of the firman of Shah Alam, conveying to that authority the Dewanny of Bengal, Behar, and Orissa.

PUBNA.—A town, the principal place of the British district of the same name, situate about a mile north of the left bank of the Podda, or great eastern branch of the Ganges, and on the Pubna, an offset from it. The civil establishment here consists of a collector, with a suitable number of inferior officers. Pubna is distant N.E. from Calcutta 180 miles. Lat. 24°, long. 89° 12'.

PUCCOLE.—A town in the British district of Mymunsing, presidency of Bengal, 49 miles S.S.W. of Nusserabad. Lat. 24° 9', long. 90°.

PUCHARI.—A village in the district of Shekawuttee,
PUC.

territory of Jeypore, lieutenant-governorship of the North-West Provinces. Lat. 28° 8', long. 76° 1'.

PUCHEBUR, in the Rajpoot state of Jodhpur, a town 60 miles S.W. of the city of Jodhpur, and eight miles N. of the right bank of the Sonne. It is situated in a fertile but scantily cultivated country, and three miles south of salt marshes, the brine of which is so strong in the dry season, that the salt spontaneously crystallizes into large masses about bushes thrown into the pools for that purpose. The town and the salt-works belong to the khalsa or royal estate of the maharaja of Jodhpur, and the revenue from them is allocated to the maintenance of his zenana. There is a manufactory of coarse cloths in the town, which contains about 1,000 houses. Lat. 25° 57', long. 72° 21'.

PUCHEWUR, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village at the confluence of the rivers Surjoo and Kalee (Eastern), on the left bank of the former, right of the latter, 10 miles S. of the cantonment of Petoragurh. Lat. 29° 27', long. 80° 18'.

PUCHEWOR,1 in the Rajpoot state of Jeypore, a town on the route from Agra to Nusseersabad, 1832 miles S.W. of the former, 40 N.E. of latter. It is of considerable size, has a bazar, and supplies and water are abundant. Lat. 22° 80', long. 75° 26'.

PUCHEWORN, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a village on the route from Allygurh cantonment to that of Delhi, and 35 miles N.W. of the former. The road in this part of the route is good, the country open and partially cultivated. Lat. 28° 19', long. 77° 52'.

PUCHEWREA, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Pillibheet to Petoragurh cantonment, 25 miles N.E. of the former. Lat. 28° 57', long. 80° 4'.

PUCHEPERA, in the British district of Algygurh, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, and 52 miles N.E. of the former. Lat. 27° 41', long. 78° 37'.

PUCHEPERA, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the
route from the town of Pillibheet to Nugina, and 16 miles N.W. of the former. Lat. 28° 48', long. 79° 40'.

PUCHPERA,¹ in the British district of Mynpoorie, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Etawa, and 30² miles N.W. of the latter. The road in this part of the route is good; the country cultivated, and studded with small villages. Lat. 27° 5', long. 78° 41'.

PUCHROLI, in the Rajpoot state of Jodhpour, a village on the route from the town of Jodhpour to that of Ajmeer, and 37 miles N.W. of the latter. The road in this part of the route is indifferent. Lat. 28° 35', long. 74° 11'.

PUCHUM SUREEORA,¹ in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by the Rajapoor ferry from the cantonment of Allahabad to Banda, and 39² miles W. of the former. The road in this part of the route is bad and winding, the country well cultivated. Lat. 25° 26', long. 81° 22'.

PUCKA BH0OTA.—A town in the native state of Bha-wulpoor, situate on the left bank of the Indus river, and 131 miles S.W. by W. from Bhawulpoor. Lat. 28° 26', long. 69° 59'.

PUCKERPOOR.—A town in the native state of Oude, 51 miles N.E. from Lucknow, and 106 miles E.S.E. from Shahjehanpoor. Lat. 27° 22', long. 81° 35'.

PUDAPADDY.—A town in the British district of Malabar, presidency of Madras, 49 miles S.E. by E. of Cannanore. Lat. 11° 29', long. 76° 2'.

PUDDOW.—A town in the British district of Tavoy, one of the Tenasserim provinces, presidency of Bengal, 131 miles N.N.W. of Tenasserim. Lat. 13° 53', long. 96° 22'.

PUDHOR.—See BHUDUR.

PUDORA, in the British district of Allygurh, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, and 53³ miles N.E. of the former. It has water from wells, but other supplies must be obtained from the surrounding villages. The road in this part of the route is generally good, the country level and partially cultivated. Lat. 27° 42', long. 78° 37'.

PUDREE.—A town in Scinde, situate in the territory of ¹ Garden, Tables of Routes, 7.
² Garden, Tables of Routes, 2S.
³ Garden, Tables of Routes, 4.

E.I.C. Ms. Doc.
PUD—PUH.

Ali Moorad, 73 miles S.S.E. from Bukkur, and 106 miles N.E. by N. from Hydrabad. Lat. 26° 40', long. 69° 19'.

PUDERE.—A town in the British district of Tirhoot, presidency of Bengal, 44 miles S.E. of Durbunga. Lat. 25° 38', long. 86° 23'.

PUDROWNAN.—The principal place of the pergunnah of Sidboa Jobuna, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpore cantonment to Mullye, and 86 2 miles E. of the former. It is situate in a beautiful, well-wooded country, and when Buchanan surveyed it about forty years ago, "contained 700 houses. A few had two stories, and a few were tiled, but by far the greater part consisted of miserable thatched huts. The rajah's castle occupied one corner, and the whole had been surrounded by a ditch and bamboo hedge." He adds, "The town had considerable manufactures of sugar, nitré, and cloth, and advances were made from the Company's factory at Ghazeeapore for the two latter." Supplies are abundant here, and the road in this part of the route is good. Distant N.W. from Dinapoor 105 miles. Lat. 26° 50', long. 84° 1'.

PUGGUR.—A town in the British district of Ramgur, presidency of Bengal, 23 miles W. by S. of Hazareebagh. Lat. 25° 54', long. 85° 3'.

PUGHROOKHEE.—A town in the British district of Behar, presidency of Bengal, 33 miles S. of Behar. Lat. 24° 44', long. 85° 37'.

PUHAREE, or PAHAREE, a native state of Bundelcund, with an area of four square miles, containing a population of 800. The rajah maintains a military force of fifty infantry. Puharee, the capital, is in lat. 25° 14', long. 80° 50'.

PUHAREE, in the territory of Bhurtpore, a village on the route from Mathura to Ferozpoor, by Deeg, 54 2 miles N.W. of former, 15 S.E. of latter. Lat. 27° 43', long. 77° 9'.

PUHASOO, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a town on the route from Boolundshuhur to Allygurh, 19 miles S.E. of the former. Lat. 28° 11', long. 78° 8'.

PUPOOND, in the British district of Etawa, the principal place of the pergunnah of the same name, is situate near 183
PUH—PUK.

the river Seengur, 32 miles S.E. of Etawa, 56 miles W. of Cawnpore. Puhepoond contains a population of 6,063 inhabitants.¹ Lat. 20° 36', long. 79° 32'.

PUHRAH, or PAHRAH, one of the native states of Bundelcund, containing an area of ten square miles, with a population of 1,600. The rajah maintains a force consisting of four horse and ninety-nine infantry.¹ Puhrah, the principal place, is in lat. 25° 23', long. 80° 18'.

PUJOUL,¹ in the hill state of Komharsen, a village on the right bank of the Giree. Elevation above the sea 4,980² feet. Lat. 31° 6', long. 77° 81'.

PUKHROULA, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Meerut to that of Moradabad, and 37 miles S.E. of the former place. It is situate near the left bank of the Ganges, in an open and partially-cultivated country. The road is generally bad, and under water in many places during the rains. Distant N.W. from Calcutta, via Moradabad, 924 miles. Lat. 28° 51', long. 78° 15'.

PUKHURA.—A town in the native state of Nepal, situate on the right bank of the Naling river, and 102 miles W.N.W. from Khatmandoo. Lat. 28° 15', long. 83° 47'.

PUKKA SERAI, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a village on the route from Allygurh cantonment to that of Delhi, and 14 miles¹ S.E. of the latter. The road in this part of the route is generally good, though in some places sandy and heavy; the country is level, open, and partially cultivated. Lat. 28° 32', long. 77° 26'.

PUKLI,¹ in the north of the Punjah, a small tract east of the Indus: it is very fertile. Runjeet Singh obtained possession of it about twenty years ago, by expelling the Mahometan chief, Poyndu Khan, who took refuge in the island of Chuttoorbye, in the Indus: it is generally supposed to be the Peuceolatis² of Arrian, but erroneously, as that (lib. iv. 22) was on the west side of the river, and Pukli³ is on the east. Lat. 34° 15'—34° 30', long. 72° 50'—73° 15'.

PUKREE,¹ in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the right bank of the Ganges, 781 miles² N.W. of Calcutta by the
PUL.

der route, and 27 S.E. of the city of Allahabad by the same. Lat. 25° 18', long. 82° 12'.

PULANA, or PLANAN,1 in the hill state of Goond, tributary to Keonthul, a village on the right bank of the Giree, near the confluence of a feeder from the north. Elevation above the sea 6,133 feet.2 Lat. 31° 6', long. 77° 29'.

PULANA.—A town in the Rajpoot state of Oodeypoor, 15 miles N.N.E. from Oodeypoor, and 66 miles W.N.W. from Neemuch. Lat. 24° 48', long. 78° 55'.

PULANTI.—A town in the native state of Nepal, situate on the right bank of the San Coos river, and 28 miles E. from Khatmandoo. Lat. 27° 42', long. 85° 44'.

PULICAT,1 in the British district Chingleput, presidency of Madras, a town on an island in an extensive inlet of the sea or salt-water lake of the same name. The lake of Pulicat is thirty-three miles2 in length from north to south, and eleven in breadth where widest, and contains some large islands besides that on which the town is situate. It seems to have been produced by “the sea's breaking3 through a low sandy beach, and overflowing the lands within, for its communications with the sea are extremely narrow, like the embouchures of small rivers.” From one to two miles off shore is the road called Pulicat Anchorages, where there are six or seven fathoms4 water. The lake, throughout its whole length, forms the north-eastern limit of the British district of Arcot, south division. An extensive line of water communication has been established between the city of Madras and the town of Doogoorauzepam, principally by means of this lake.5 The town of Pulicat is distant from Arcot, N.E., 76 miles; Nellore, S., 75; Madras, N., 22. Lat. 18° 25', long. 80° 22'.

PULLA, in the British district of Aligurh, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Aligurh to that of Delhi, and nine miles N.W. of the former. The road in this part of the route is in many places heavy, and confined between ridges of drifted sand; the country open, with a sandy soil, partially cultivated. Lat. 27° 59', long. 78° 3'.

PULLA CHAND, in the British district of Aligurh, lieutenant-governorship of the North-West Provinces, a village on the route from Meerut to Muttra, and 32 miles1 N.E. of the

PULLYPATTI.—A town in the British district of Salem,
presidency of Madras, 23 miles N.E. of Salem. Lat. 11° 55', long. 78° 26'.

PULNEY.—A town in the British district of Madura, presidency of Madras, 59 miles N.W. of Madura. Lat. 10° 30', long. 77° 35'.

PULBA.—A village in the British district of Mozaffurnagur, lieutenant-governorship of the North-West Provinces. Lat. 26° 22', long. 77° 35'.

PULUSGAON.—A town in the recently lapsed territory of Nagpoor or Berar, 29 miles S.W. by S. from Nagpoor, and 92 miles E.S.E. from Ellichpoor. Lat. 20° 46', long. 78° 55'.

PULWUL,† in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a small town, giving name to the pergunnah so called, on the route from Delhi to Muttra, and 41 miles S. of the former. It has a population of 10,062 inhabitants. The road in this part of the route is good. Lat. 28° 9', long. 77° 23'.

PUNAKHA.—A town in the native estate of Bhotan, situate on the left bank of the Baghee river, and 96 miles E.N.E. from Darjeeling. Lat. 27° 34', long. 89° 45'.

PUNAMURTHCOTAH.—A town in the British district of Malabar, presidency of Madras, 49 miles E. by S. of Cannanore. Lat. 11° 44', long. 76° 8'.

PUNAPOOR, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Seetapore, and six miles S.E. of the former. The road in this part of the route is good; the country open, fertile, and cultivated. Lat. 28° 21', long. 79° 23'.

PUNAR.—A river of the British district of Kumaon, lieutenant-governorship of the North-West Provinces, rising on the northern declivity of the Sub-Himalaya, or southern and inferior range of the Himalaya, in lat. 29° 28', long. 79° 48', and 11 miles S.E. of Fort Almora. It flows circuitously, but generally in an easterly direction, and, receiving many rivulets right and left, falls into the Surjoo, a great tributary of the Gogra, on the right side, in lat. 29° 32', long. 80° 7', having a total length of course of twenty-five miles. Buchanan, on hearsay evidence, states that gold is found in its channel; but

† In the Ayeen Akbery it is mentioned to have a brick fort on a hill.
neither Traill,\(^5\) in his Statistical Account of Kumaon, nor Webb,\(^4\) appears to mention this circumstance.

PUNASSA,\(^1\) in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a small town on the route by the Kutra Pass, from the cantonment of Allahabad to Rewah, 21 miles\(^2\) S.E. of the former. It is situated on the left bank of the Tons, close to its confluence with the Ganges. The Tons, here crossed by ferry, has a bed 400 yards wide; its left bank steep, its right sloping. The stream in the dry season is about 150 yards wide, and generally runs under the left bank. The road in this part of the route is cut up by ravines, the country cultivated. Lat. 25° 16', long. 82° 7'.

PUNCH,\(^1\) in the Northern Punjab, a small town on the southern slope of the mountains bounding Cashmere on the south. It is situated at the foot of the Punch Pass, and on the banks of a river of the same name, discharging itself into the Chenab. It was formerly the capital of a small independent raj, the rajah of which was slain by Gulab Singh, the Sikh chief, who exposed his head, and that of his nephew, in an iron cage. At Punch, two much-frequented routes from the Punjab to Cashmere, that by Koteli and that by Rajawur, meet and proceed thence northward, through the Baramula Pass. Elevation of the Punch Pass,\(^2\) 8,500 feet; of the town, 8,280.\(^3\) Punch is in lat. 33° 51', long. 74° 10'.

PUNCH RIVER, in the Punjab, rises on the south-western declivity of the Pir Panjal Pass, about lat. 33° 33', long. 74° 43', and takes a direction generally north-westerly down the valley, dividing the Pir Panjal from the Bhatan Panjal. After continuing in that direction for about fifty miles, it, close to the town of Punch, receives a feeder from the north, and below the confluence turns to the south-west. Here it is styled by Moorcroft\(^1\) a rivulet; but Jacquemont, who mentions it under the name of Tchaomok,\(^2\) describes it as a torrent so rapid and powerful, that there is much danger in fording it, insomuch that a horse which loses its footing is swept down the stream, and irretrievably perishes. Holding a south-westerly course of about forty miles, it near Koteli receives a considerable feeder, called the river of Rajour,\(^3\) and after a course of about thirty miles further, falls into the Chenab, in lat. 33° 12', long. 73° 41'.

PUNDERPOOR.

PUNDERPOOR.—A town within the presidency of Bombay, on the north-eastern frontier of Sattam, towards the collectorate of Sholapore. It is situate on the Beema, a tributary to the Kistna, and is highly revered by the Brahmins, as containing a celebrated temple dedicated to an incarnation of Vishnu. Here, in 1815, Trimbuckjee Danglia, the profligate minion of the Peishwa, perpetrated the murder of Gungadhur Shastry, the Guicowar's minister and envoy, who had repaired to Poona under the sanction and protection of the British government. The circumstances under which this atrocious crime was committed are thus related:—As he (Gungadhur Shastry) passed along, one of his attendants heard a man in the crowd ask, "Which is the Shastry?" and another reply, "He who wears the necklace;" but not thinking the inquiry of any importance, he paid no attention either to the person asking the question or to him who made the answer. The Shastry entered the temple, performed his devotions, and after remaining a few minutes in conversation with Trimbuckjee Danglia, returned towards the house which he occupied. He advanced but a short distance from the temple, when three men came running behind him, and as if clearing the road for some person of distinction, calling out, "Make way, make way." Their left hands were folded up in cloths, and each of them in his right hand bore what seemed to be a twisted cloth, such as appears to be commonly used for striking persons in a crowd, to make them stand aside. One of them struck the Shastry a violent blow with the cloth, and it was then discovered that he had a sword in his hand; another seized him by the hair and threw him down; and whilst in the act of falling, a third ruffian cut him on the head. Three of the Shastry's attendants remained with their master; but two more assassins rushing from the front, the whole of them were wounded and disabled. The rest of the Shastry's friends and followers, who do not appear to have been blest with any large share of personal intrepidity, ran away, leaving him in the hands of his murderers. Being thus at liberty to complete their bloody work, they mangled the unhappy man in a dreadful manner, and then departed, one of them exclaiming in the Mahratta language, "We have now finished him."

Three of the Shastry's people had remained at the temple in
PUN.

attendance upon one of his suite. As they approached the spot where the murder had been committed, they saw five men with naked swords running towards the temple. This alarmed them; but not being aware of what had happened, they made their way as quietly as possible to the Shastry’s house; not finding him there, they returned to the road, where they discovered his body cut to pieces. The population of Punderpoor is believed not to exceed 20,000 persons. Distance S.E. from Poona 112 miles, and 185 S.E. from Bombay. Lat. 17° 40', long. 75° 24'.

PUNDOOA, in the British district of Hooghly, presidency of Bengal, a small town with dak or relay station for bearers, on the route from Calcutta to Burdwan, 82 miles N.W. of former, 30 S.E. of latter. Lat. 23° 3', long. 86° 18'.

PUNDOOKESUR, in the British district of Gurhwal, lieutenant-governorship of the North-West Provinces, a town on the route from Sreenuagur to Thibet, 54 miles N.E. by E. of the former. Lat. 80° 37', long. 79° 36'.

PUNDRAWUL, in the British district of Boolundshukur, lieutenant-governorship of the North-West Provinces, a village on the route from Khasgunj to Meerut, and 86 miles N.W. of the former. The road in this part of the route is good, the country open and partially cultivated. Lat. 28° 7', long. 78° 15'.

PUNGANORE.—A town in the British district of Cuddapah, presidency of Madras, 79 miles S. by W. of Cuddapah. Lat. 13° 20', long. 78° 37'.

PUNGI, in Bussahir, a collection of hamlets in the district of Koonsawur, on the right bank of the Sutluj, and at the south-eastern base of a range dividing the valley of the Kushang from that of the Mulgun. The access to it is very difficult, especially from the north-east, in which direction, according to Gerard, the footpath was rugged in the extreme, lying a great part of the way upon fragments of granite and gneiss, which appeared to have lately fallen; amongst which we saw many a noble pine lying prostrate, whilst a few, with their branches broken off and otherwise disfigured, just barely peeped above the stones. Large portions of rock fall yearly, and their effects are truly dreadful: they sweep every-

* The proper name of the village is Thempi; there are several others close to it, and the whole collectively have the name of Pungi.
thing with them, and sometimes stop the channels of the
largest rivers for weeks." The appearance of the place is
pleasing, as the houses are arranged in irregular terraces one
above the other, on the mountain side, and amidst much
thrive cultivation. Here is a handsome temple, covered with
slate, and constructed with much care and skill, the woodwork
being elaborately and tastefully carved; and in it is installed
an idol of mongrel Hindoo lineage, as is usually the case in this
part of the country. Close at hand is a small building, serving
as the buttery of the deity, and stored with corn, butter,
spirits, and other provender, the offerings of the villagers, who,
on festivals, are entertained by the priests of the idol. The
mountains in the vicinity of the village are in many parts
formed artificially into terraces, formerly cultivated and pro-
ductive, but now wild and overgrown with ancient trees,
indicating the decay of population, industry, and productiv-
ness in this part of Bussahir. Elevation above the sea 9,197
feet. Lat. 31° 35', long. 78° 20'.

PUNGURA,¹ in the British district of Banda, lieutenant-
governorship of the North-West Provinces, a village on the
route from the town of Banda to Jubulpore, 20 miles S. of the
former. It has water from a tank and wells; but supplies are
scanty, the surrounding country being barren. Lat. 25° 13',
long. 80° 31'.

PUNHITTÁ,¹ in the British district of Allygurh, lieutenant-
governorship of the North-West Provinces, a village on the
route from the cantonment of Allygurh to that of Mynpoorie,
eight miles S.E. of the former. The road in this part of
the route is good, the country open and rather well cultivated.
Lat. 27° 51', long. 78° 14'.

PUNIAH,¹ in the territory of Gwalior, or possessions of
Scindia's family, a town 12 miles S.W. of the fort of that
name, the scene of an engagement which took place on the
29th December 1843 (the date of the victory of Maharajpore),
between the British and Mahratta forces. Major-General
Grey leading from Bundelcund a British detachment to co-
operate with that marching from Agra under the conduct of
Sir Hugh Gough, commander-in-chief, crossed the river
Sindh at Chandpur, and proceeding north-west, on the 29th,
after a march of sixteen miles, was attacked by the Mahratta

army, strongly posted near the village of Mangor. The British army took post at Puniar, and by a series of attacks drove the enemy from all points of his position and captured all his artillery, amounting to twenty-four pieces, and all his ammunition. The Mahratta army is represented to have been about 12,000 strong, and to have suffered most severely; the British loss amounted to thirty-five killed and 182 wounded. Lat. 26° 6', long. 78° 6'.

PUNJAB1 (THE), an extensive territory on the north-west of India, so called from two Persian words, signifying "five waters," the name having reference to five great rivers which flow through it. With respect to the propriety of the designation, it is, however, to be observed, that there are in fact six rivers, the Indus, the Jhelum, the Chenab, the Ravee, the Beas, and the Sutlej; but as the Beas has a much shorter course than the others, it seems to have been disregarded when the name of the country was bestowed. In semi-civilized states, and especially in those of Asia, the boundaries, at all times ill-defined, are subject to frequent changes; and this holds true in regard to the territory lately acquired from the Sikhs, in consequence of their incessant wars with their neighbours to the north and west. In the present case, the province now designated the Punjab will be regarded as co-extensive with the recent empire of the Sikhs, with the exception of the provinces allotted by the British to Gholab Singh, and which are now comprehended within the newly-constituted kingdom of Cashmere. Regarded in this view, the Punjab will be found to possess natural limits remarkably well defined.* They are as follows:—On the north, the lower boundaries of Gholab Singh's dominions; on the west, the Suliman range of mountains; on the east and south-east, the river Sutlej and its continuation the Ghara. The shape in outline approaches that of the sector of a circle, the centre of which is at the confluence of the Punjnad and the Indus, in lat. 28° 55', long. 70° 31'; the extreme radii, the Suliman range,

PUNJAB.

holding in general a direction not greatly varying from north to south; the Sutlej, and its continuation the Ghara, holding a direction from north-east to south-west; the arc in its highest latitude touching the 35th parallel. The most western point is just below the confluence of the Punjnud and Indus; the most eastern is between the 78th and 79th meridian. The length from east to west is about 550 miles; the breadth, measured at right angles to this, about 420; the superficial extent, 78,477 square miles.

No two regions can differ more in physical character than the northern and southern part of this territory. Within the north-east angle is comprehended the Alpine region of Kangra. The north-west angle comprises the Euosfzye country, Peshawur, Kohat, Huzara, and the country thence extending southward to the Salt range; the entire tract being intersected by mountain-ranges, and consisting of a series of valleys, encircled by hills. The remainder includes the plain country of the Punjab, distributed into the five doabs, and stretching south-west with a regularity rarely broken by any eminence of importance. The declivity of the surface from north-east to south-west is proved beyond question by the course of the rivers, which all descend in that direction. Jacquemont\(^2\) considers that the courses of the Soorsutty and Guggur, which, flowing from the Himalaya, are lost in the desert of Bikanir, lie along an elevated tract dividing the basin of the Jumna from that of the Sutlej, and that barometric and other observations prove the plain of the Punjab to be below that of Eastern Hindostan. He thence concludes the bed of the Sutlej, in its course through the plain, to be lower than that of the Jumna; that of the Beas lower than that of the Sutlej; and so in succession westward with regard to the beds of the Ravee, the Chenaub, and the Jhelum, to the Indus, flowing through the lowest part of this extensive basin.

About the town of Mundi, near the north-eastern frontier, and on the upper course of the Beas, in the most southern and lower ranges of the Himalaya, is an extensive tract of rocks and deposits of recent formation,\(^3\) of limestone, sandstone, gypsum, argillaceous slate, amidst which veins of quartz occasionally occur. This formation is important, in conse-

---

\(^2\) *Voyage, v. 188.*

\(^3\) *Jacquemont, v. 518.*
PUNJAB.

quence of containing inexhaustible beds of fossil salt,* very compact and heavy, and of a reddish colour. On the west of the Punjab, and crossing the Doab, between the Jhelum and the Indus, is the Salt range, which is cross-cut by the channel of the Indus, and which, to the north of the Daman, on the western side of that river, joins the Suliman and Khyber ranges. The Salt range, sometimes (on the west of the Indus) called the Kalabagh range, holds a direction a little south of east, between lat. 32° 30′—33°, and terminates rather abruptly on the right bank of the river Jhelum. The elevation is not great, probably in few places exceeding 2,000 feet above the sea. The formations composing it are gruwacke, limestone, sandstone, gypsum, and red tenacious clay, investing enormous deposits of common salt, or chloride of sodium.

Altogether, the ascertained mineral wealth of the Punjab and its dependencies appears scanty in proportion to the great extent of its mountains. Gold is found in the sands of the streams of the Chenab, the Huroo, and the Swan. Graphite or plumbago abounds in the Pir Panjal, bounding Cashmere on the south-west. Iron is also raised in Mundi, as well as common salt. The Salt range, besides the mineral from which it is named, produces antimony, alum, and sulphur. Nitre is obtained in abundance from the alluvial plains. Coal exists about the Salt range at Mukkud, on the left bank of the Indus, and in the localities of Josa, Meealee, and Nummul. Scientific inquiries into the mineral resources of the Salt range, and the Alpine portion of the Sindh Sagur Doab, have been authorized by the government.

No country of the same extent probably enjoys more largely than the Punjab the means of irrigation and of inland navigation, by means of its six noble rivers. The most eastern, the Sutlej, has its source in Thibet, in lat. 30° 8′, long. 81° 53′. Holding a south-westerly course of about 550 miles, it

---

* Moorcroft states that the salt of this tract is found in gruwacke: the occurrence of this rock is not mentioned by Jaquemont.
† Considered to be the Zadadrush, Hesidrus, Hesudrus, of the classical writers; the Satadru, or Satabrada, "the hundred-channelled" of the Sanscrit.
‡ Gerard considers its length of course to be 570 miles, but this appears rather an over-estimate.
PUNJAB.

receives the Beas, below the confluence of which, taking place near Hurekee, and in lat. 31° 12', long. 75° 3', the united stream is called the Ghara for about 300 miles, to the confluence of the Chenau; thenceforward the aggregate body of water bears the name of the Punjnad for a further distance of about sixty miles, to its confluence with the Indus. Next to the Sutlej, westward, is the Beas,* rising in lat. 32° 24', long. 77° 12', and holding a sinuous course of about 290 miles, in general to the south-west, to its confluence with the Sutlej. Farther to the west flows the Ravee,† the least in the volume of its water, though not in the length of its course. Issuing from a lake‡ embosomed in the Himalaya, in lat. 32° 30', long. 77° 1', it holds a very tortuous course, but generally in a south-westerly direction, for about 420 miles, to its confluence with the Chenau. This last-mentioned river,‡ usually regarded as the largest of the Punjab, flows in general west of that of the Ravee, though its source is more eastward, as it sweeps in a wide flexure round the upper part of the smaller rivers. Rising in Lahoul, in lat. 32° 48', long. 77° 27', the Chenau pursues a circuitous course, but for the most part south-west, and at the distance of about 600 miles from its source, unites with the Jhelum, near Trimo ferry. The united stream, proceeding in the same direction for about fifty miles, receives the water of the Ravee;‡ below the confluence it loses the name of Chenau, and is called the Trimab‡ for a further distance of 110 miles, to the junction of the Ghara. From that point the river flows about sixty miles, as before mentioned, to its confluence with the Indus, being called the Punjnad, a name derived from its conveying the accumulated water of the Beas, the Sutlej, the Ravee, the Chenau, and the Jhelum. This last river rises in Cashmere,‡ the whole valley of which it drains. Soon after its issue therefrom, it receives a large tributary, the Kishungunga, or river of Mazufursbad, and after

PUNJAB.

a course of about 490 miles, generally in a south-westerly direction, it unites with the Chenaub near Trimo ferry. The Indus, the most westerly of the Punjab rivers, traverses the country in a direction from north to south for about 500 miles, from Derbend to the confluence of the Punjnad. These noble streams, besides affording means of inland navigation, scarcely equalled, are of inestimable value for the purposes of irrigation. Several of the old canals have been improved and enlarged. A new canal, intended to traverse the entire length of the Baree Doab, is under construction. "The central line is to be 247 miles in length. It will commence from that point where the river Ravee debouches from the lowest of the Himalayan ranges, thence, cutting through a high bank, it will cross two mountain torrents, till it gains the table-lands; then it will traverse the heart of the Manjha, passing near the great cities of Deenanuggur, Buttala, and Umritsur; thence, striking into the deeps of the wildest wastes of the lower Doab, and running past the ruined cities, tanks, temples, and canals, all of which it to vivify and regenerate, it will rejoin the Ravee fifty-six miles above Mooltan. At the thirtieth mile of its course, a branch diverges to fertilize the most arid lands of the Doab, and reach the ancient city of Kussoor. From this branch again, a smaller channel is diverted to the eastward, and carried on till it nearly meets the Sutlej opposite the battle-field of Sobraon. At the fifty-fifth mile of the grand line, another channel branches off, to spread fertility down to the capital of Lahore. In addition to the main 247 miles, the Kussoor, Sobraon, and Lahore branches, of eighty-four, sixty-one, and seventy-four miles respectively, will make up an aggregate of 466 miles."4

The plain of the Punjab is divided by its rivers into five extensive natural sections, described by the native term doab, signifying a great tongue of land lying in the bifurcation above the confluence of two rivers. First, the doab of Julinder,4 between the Sutlej and the Beas; second, the doab of Baree, between the Beas and Ghara on the east, and the Ravee on the west; third, the doab of Rechna, between the Ravee on the east, and the Chenaub on the west; fourth, the doab of Jetch.

1 Wilson, Ariana Antiqua, 105.
Ritter, Erdkunde von Asien, ill. 1147.

4 Report, ut supra, 94.
PUNJAB.

between the Chenaub on the east, and the Jhelum on the west; fifth, the doab of Sinde Sagur, between the Jhelum, Trimur or Chenaub, and Panjnud on the east, and the Indus on the west. Of these, that of Sinde Sagur is the most extensive, but that of Baree by far the most populous, as well as the most important, containing the three great cities, Lahore, Amritsar, and Mooltan.

The regular and gradual slope of the great plain of the Punjab has been mentioned: even the upper part is but of moderate elevation. Thus, Amritsar⁶ and Lahore⁷ are each 800 feet above the level of the sea, the town of Jhelum about 1,600, and the surface slopes regularly to the south-western extremity, where, close to Mittunkote, the elevation is about 220 feet.⁸ In consequence of the nearly unbroken flatness of the surface, the great rivers frequently change their courses in an extraordinary degree. "Bands of sand traverse the country in a north and south direction, which point out the old beds of rivers, and prove that all of them have been changed. The Sutlej, which formerly ran close to the town of Loodianah, is now seven miles to the northward; the Ravee, which twenty years ago washed the walls of the city of Lahore, runs in a channel three miles off to the northward; the Chenaub, which ten or twelve years ago ran close to the town of Ramnuggur, is now four miles distant; and the same applies to the Jhelum."⁹ So the Ghara, at no great distance of time, held, for above 200 miles, a course considerably westward of the present, and parallel to it.

Elphinstone¹ says, "The fertility of the Punjab appears to have been too much extolled by our geographers; except near rivers, no part will bear a comparison with the British provinces in Hindostan, and still less with Bengal, which it has been thought to resemble. In the part I passed through, the soil was generally sandy and by no means rich; the country nearer the hills was said to be better, and that further to the south worse; of the four divisions (doabs) east of the Hydaspes, the two nearest to that river are chiefly pastured on by herds of oxen and buffaloes, and that more to the east, towards the Hydaspes or Sutlej, though most sterile, is best cultivated. The two former are quite flat, the latter is wavy; there is not a hill to the east of the Hydaspes, and rarely a tree, except of the dwarf race of babool (mimosa). On the whole, not a
PUNJAB.

third of the country we saw was cultivated." The physical peculiarities of the country, and the varying character of its fertility, are well described in the official report.

"The face of the country presents every variety, from the most luxuriant cultivation to the most sandy deserts, and the wildest prairies of grass and brushwood. A traveller, passing through those lines of communication which traverse the northern tracts, would imagine the Punjab to be the garden of India; again returning to the road which intersects the central tracts, he would suppose it to be a country not worth annexing. The culture manifestly depends upon two causes—

the lower Himalayan range, and the rivers. From the base of the hills southward, there stretches a strip of country from fifty to eighty miles broad, watered by mountain rivulets, and for fertility and agriculture unsurpassed in Northern India. In their downward course, the rivers spread wealth and fruitfulness on either side, and their banks are enriched with alluvial deposits, and fringed with the finest cultivation. These tracts, though unadorned with trees, and unrelieved by any picturesque features, are studded with well-peopled villages, are covered with two waving harvests in the year, and are the homes of a sturdy, industrious, and skilful peasantry. Within this tract are situated the sister capitals of Lahore and Umritsur, and most of the chief cities, such as Deenanuggur, Buttala, Salkote, Wuzeerabad, Goozeranwalla, Ramnugger, and Goojrat.

"Far different is the sad and strange scene which meets the eye in the centres of all the doabs. These are interminable wastes, overgrown with grass and bushes, scantily threaded by sheep-walks and the foot-prints of cattle. The chief tenants of these parts are nomad pastoral tribes, who, knowing neither law nor property, collect herds of cattle, stolen from the agricultural districts. Here and there a hamlet stands alone in the wilderness, tenanted by a semi-barbarous population, the very aborigines of the land. Around the homesteads there will be patches of good cultivation, for the soil is rich and repays irrigation, although the water be deep below the surface. But there are constantly recurring tokens to show that once this region was not inferior to the most favoured districts. Everywhere are seen ruined cities, villages, temples, tanks, wells, and watercourses; such are the changes which have
PUNJAB.

passed over this country! But it would be an error to suppose that this region is merely an object of scientific or historical interest. It possesses a practical and appreciable importance. It is the only source from which the capital, the chief towns and cities, the great British cantonments, can be supplied with firewood. It yields an abundant supply of grass for all equestrian establishments. It sustains with its inexhaustible pasturage a noble breed of cattle, buffaloes, sheep, and goats. Its boundless grazing-grounds support the race of camels that mainly carry on the Cabul traffic. Portions of it will become the scene of gigantic undertakings, which will tax the skill and resources of the state, but which will, ultimately, yield an ample return for the outlay of capital. Indeed, the Punjab could ill spare its wastes; they are almost as important as the cultivated tracts.

"Such are the centres of the Baree, Bechnah, and Chuj Doabs. In the Sindh Saugur Doab, the waste is much less overgrown and productive, and is little better than a sandy desert, within which the famous fort of Munkhera is the only sign of human habitation.

"But there is one feature of the Sindh Saugur Doab not yet noticed. The doab is divided into two parts by the Salt range, which runs east and west from the Jhelum to the Indus, then reappearing on the opposite bank, stretches onward to meet the Sulimane range. The fiscal and commercial importance of this range, with its inexhaustible veins of rock salt, will occasion its frequent mention hereafter. Below it spreads the sandy champaign, above it rises a plateau of table-land, abrupt, rocky, and precipitous. In places it undulates into numerous valleys and glens, which are adorned by cultivation. Otherwise, sterility extends throughout the upper and lower divisions of the doab. It can, however, boast of three considerable towns, Rawul Pindee, Chukawul, and Pind Dadun Khan, the latter celebrated for its salt-mines."  

The climate of the plain of the Punjab is in general characterized by dryness and warmth. Little rain falls, except in those parts extending along the southern base of the Himalays, and where the south-west monsoon is partially felt, diminishing in its effect in proportion as it proceeds westward. According to the statement of Elphinstone, the rain "in the north of the

\[\text{Report, ut supra, 2.}\]

\[\text{Vigne, Ghunnee, 10.}\]
PUNJAB.

Punjab exceeds that of Delhi; but in the south of the Punjab, distant both from the sea and the hills, very little rain falls." Still the rains of the monsoon extend as far as Lahore,\(^4\) and fall heavily there in midsummer. In the more southern part of the plain, the soil, where productive, is rendered so by irrigation. In addition to the facilities offered by the rivers and canals, the Persian wheel is employed to draw to the surface the water of numerous wells. The winters are cool, even to the feelings of a European. Elphinstone\(^6\) observes, in regard to his residence in Mooltan, at the end of December: "The weather was delightful during our stay; the thermometer, when at the lowest, was at 29° at sunrise; there were slight frosts in the night." During the march of the English army through this country in 1838, thin ice was formed on the water at the end of December,\(^6\) whilst in the day the thermometer rose to 70°. At the end of December, Elphinstone,\(^7\) marching through the doab between the Chenab and the Indus, found a very cold wind; but it does not appear that snow falls in this part of the Punjab. Burnes\(^8\) describes the weather in the beginning of February as cold and bleak, frequently rainy, and always cloudy. In January, 1839, the lowest state of the thermometer was found, on different nights of the month, to be respectively 34°, 37°, 36°, 44°. In the day the thermometer, even in midwinter, is seldom below 70°, and in January generally reaches 80°, so that vegetation rapidly proceeds, and the wheat harvest is gathered by the end of April.\(^1\) Such, during winter, is the general temperature of the Punjab south of the Salt range. North of that, and even outside the limits of the mountains, the cold is greater, an effect attributable to a slight increase of elevation rather than to change of latitude. The British, in marching through that tract in December, 1839, found the cold severe, the thermometer during the night sinking to 2° below the freezing-point.\(^2\) The heat in summer is excessive; in the plains at Mooltan\(^3\) it is so great as to be proverbial. At Lahore\(^4\) it was found, in the beginning of June, to raise the thermometer to 112° in a tent artificially cooled. A traveller, who experienced the heat of this season, describes it as “perfectly intolerable; we are unable,” he adds, “to eat, drink, or sleep, and support existence by suction alone.”\(^5\) Bernier,\(^6\) who had endured the heat of the most

PUNJAB.

sultry part of Arabia, found that of the country between Lahore and Cashmore much more distressing, and each morn-
ing entertained a dread of being unable to survive till the evening. He describes his body as having become as it were
a dry sponge, and he no sooner took a draught of water than it oozed from all parts of his skin, from which the cuticle had
peeled, leaving the surface covered with pustules. Some of his companions died of heat even in the shade.

The indigenous vegetation of the plain of the Punjab closely resembles that of the drier tracts of Eastern Hind-
dostan; trees are scarce, and there occur extensive tracts,7 containing only a few bushes, principally baboos of the
mimosa species. Even the date-palm is, according to Burnes,8
an exotic, introduced by the Mahometan invaders. The wild
palm,9 a species which produces no fruit, is in many places
abundant; as are the peloo1 (Salvadora persica), various species
of willows, the pepool (Ficus religiosa), divers species of acacias
and tamarisk, the byr-apple or ju-jube (Zizyphus ju-juba), and
capparis, called here kureel, juwassi, or camel-thorn; the tallee,
a tree called sissoo in Eastern Hindostan, and sometimes of
twelve feet girth, useful for boat-building; the neem (Melia
azadurachta), the mudar (Troposea), the toolse (Ocymum sanc-
tum), kurmul or wild rue.2 Fuel is scarce, in consequence of
the general absence of trees, and cow-dung3 is extensively
used for the purpose. The towns and villages of the Punjab
are, however, generally surrounded by groves, but these are
usually of forced fruit-trees artificially cultivated,—date,4
orange, pomegranate, mulberry, apple, fig, peach, apricot,
plum, quince, almond, and a few others of less importance.
The mango is cultivated, but does not attain high perfection
except about Moolltan, and deteriorates in proportion to the
advance northward.5 Since the occupation of the province by
the British, endeavours have not been wanting on the part of
the government to encourage the growth of timber. Arrange-
ments have been made for the preservation of the tracts of
forest and brushwood which already exist; for the planting of
copes near the cantonments; of groves round public buildings,
and at intervals along the main roads, and of avenues on the
banks of canals.6

The zoology of the Punjab is more rich and varied than its
PUNJAB.

botany. No accounts afford authority for concluding that elephants exist there in a state of nature; for though Arrian mentions the hunting of elephants on the banks of the Indus, the animals in question clearly appear to have been some turned loose by the natives in their hasty flight. Tigers lurk in the jungle and forests, and sometimes attain the enormous length of ten feet. Lions are not uncommon. The other beasts of prey are panthers, leopards, hyenas, lynxes, wolves, bears, jackals, foxes, otters, martins, stoats, and divers other small viverrae; there are also nylgaus, wild hogs, porcupines, various animals of the deer, goat, and antelope species, monkeys and bats, including the large and hideous vampire, deemed sacred by the natives. Among the feathered tribes there are pea-fowl, parrots, jungle-fowl (the wild stock of our common domestic fowl), pheasants, various kinds of partridges, quails, water-fowl in great number and variety, herons, cranes, pelicans, eagles, vultures, hawks, magpies, hoopoes, and doves of various kinds. The bulbul, or nightingale of Cashmere, is inferior in note to that of Europe, but very beautiful. A small species of alligator swarms in the rivers, especially the Jhelum. The porpoise ascends the Indus to a great distance. Among serpents, the more remarkable are the cobra di capello, and a small snake, the bite of which is almost immediately fatal. The rivers abound with fish; the pulla, a delicious species of carp, swarming in the Indus, forms an important article of subsistence. Of insects, the silk-worm thrives remarkably, and produces an article of admirable quality; bees also produce wax and honey in great abundance and of the finest kind, and this department of husbandry receives great attention. The more important domestic animals are the camel (especially in the south) and the buffalo, of which great herds are kept in the neighbourhood of rivers, these animals being almost of an amphibious nature. Horses are bred extensively, especially in the plain country in the north-east, and receive great attention, the Sikhs being an equestrian people. Much additional light on the ornithology and botany of the Punjab is about to be afforded by an elaborate report on those subjects by Dr. Jameson.

The more important crops in the low, level, and fertile tracts, are indigo, cotton, sugar, tobacco, opium, wheat, which is
PUNJAB.

abundant and in quality excellent; buck-wheat, rice, barley, millet, juwarcce (Holcus sorghum), bajra (Holcus epistus), moong (Phaseolus mungo), maize, various sorts of vetches, oilseeds, such as sesameum and mustard; peas and beans, carrots, turnips, onions, melons, cucumbers, and sundry kinds of cucurbitaceous plants. So plentiful is wheat, that it sells at Mooltan at from half a rupee to a rupee per maund. Bang, or hemp, is produced for the purpose of inducing intoxication; saffron, safflower for dyes, and a great number of less-important products. Milk, butter, and wool are very important objects of rural economy, the former being almost the only* produce of the numerous herds of kine, as the slaughtering of these animals for food is not allowed by the Sikhs.

The manufacturing industry of the Punjab is considerable. It is exercised principally in the silk and cotton productions of Amrisir, Lahore, Mooltan, Shoojahbad, Leia, and some other places in the south, and in the fabrication of arms in Lahore. Much of the commerce of the Punjab consists in the transit of the goods of Hindostan to the countries west of the Indus. The chief marts are Amritsir, Leia, and Mooltan, Lahore being in this respect of inferior importance. The imports from British India are principally sugar, spices, and other groceries; dye-stuffs, cotton, woollen, and silk cloths; metals, and utensils of various kinds of metal; ivory, precious stones, glass, porcelain, and cutlery. From the west, the imports are gold, turquoises, silver, silk, madder, cochineal, asafetida, safflower, fruits (fresh and dried), wool, horses, and a few of the more portable manufactures of Russia. The exports, whether in the way of transit or the produce of the country, are grain, ghee or clarified butter, hides, wool, silk and cotton fabrics, carpets, shawls, silk, cotton, indigo, tobacco, salt, and horses.

The population consists of various races, being composed of Jats, Gujurs, Rajpoots, and Patans. A small portion of the country included between the Kishengunga and the Indus, north of the Salt range, is held by the Eusufzye Afghans. Of the races above mentioned, the most prominent are the Jats, who are represented as having formed the "core and nucleus" of the Punjab.

* Leech (Report of the Commerce of Mooltan, p. 88) mentions hides as an article of commerce in the Punjab: they must be taken off kine which have died of disease or age.
of the Sikh commonwealth and armies. They occupy the centre portion of the Baree Doab and the vicinity of Amritsar; but they have also extensive colonies in various parts of the Punjab. In the south-west angle of the province, about Mooltan, they are held in indifferent repute, their importance there being merely agricultural. The Gujurs, supposed to be the aborigines of Huzara, are described as an industrious class, devoting much attention to agriculture, and differing in this respect from the Rajpoote. The principal localities of the Patans are Mooltan and Kusoor, in the Baree Doab. "From the Beas to the Chenab the Hindoo race predominates; but, in all parts of this region, the Mahomedans are numerously interspersed, and in the south they actually form the majority; but of the Mahomedans a large portion are of Hindoo origin. From the Chenab to the Indus, the population chiefly consists of Hindoo converts to Mahomedanism. Beyond the Indus the pure Mahomedan race prevails. Of the whole population, two-thirds are Mussulmans (both spurious and genuine), the remaining one-third are chiefly Hindooa, and of these half are Sikhs." 4

For administrative purposes, the province has been distributed into a limited number of territorial divisions, each division comprising several districts. The names of the principal divisions, with their respective areas and amount of population, so far as these can be particularized, are stated below.

No official returns have been received of the area and population of the division of Peshawur, nor those of Kangra, &c. The total area of the province, as already stated, is 78,447 square miles, and the population can scarcely fall short of 7,000,000.

The Sikhs are for the most part concentrated about the capitals, Amritsir and Lahore. The belief of this sect was
PUNJAB.

originally, according to Malcolm, a pure deism, but has so far degenerated that they now consider their founder entitled to divine honours, and regard him as a saviour and mediator with God. Their faith admits the doctrine of the transmigration of souls, either as a punishment, or a remedial process for moral deficiency, and of a future state of bliss for the good. To kill kine is considered by them a horrible impiety. Tobacco is prohibited, but fermented liquors are allowed, and no kind of food is forbidden except beef. Malcolm lays down the following as the great points by which they are separated from the strict Hindoos:—the renunciation of the distinctions of castes, the admission of proselytes, and the rendering the pursuit of arms not only allowable, but the religious duty of all. The sect, though it has but recently become powerful, was founded by Nanac, who was born in 1469, at Raypur, sixty miles west of Lahore, and received the name of Guru, or “spiritual pastor,” from his votaries, who themselves assumed the appellation of Sikhs, or “disciples.” His followers were at first peaceable and humble, and remained so until the murder, by the Mahometans, of their fourth Guru in succession from Nanac; on which event his successor, Har Govind, in revenge, drew the sword, which has never since been sheathed. Guru Govind, the fifth in succession from Har Govind, and the tenth from Nanac, is regarded as the founder of the temporal power of the Sikhs. His votaries were instructed by him always to bear arms, or at least steel in some form or other, about them, and to assume the name of Singh, or lion, previously affected only by the Rajpootees. By this name they are distinguished from the other Sikhs or followers of Baba Nanak. They ceased to have any spiritual leader after the death of Govind, who was killed in 1708; and from that period, until the power of Ranjeet Singh became paramount, they constituted a turbulent and irregular republic, holding, in cases of great emergency, a Guru-mata, or general diet, at Amritsar, but at other times engaged incessantly in petty warfare with each other. Ranjeet

48 seem to be corroborated by that of Jacquemont, in his notice of Amritsar—“Cette Rome du Pendjab n’a point de pape.” Burnes, however, makes mention of “the head of the Sikh church, the Bedee or Sahib Sag.”
viewed the congregated meetings at Amritsir with great jealousy, and built at that place the great fortress of Govindghur, ostensibly to protect, but actually to overawe and control, the excited followers of Govind, who resorted there. Those Sikhs who adhere to the original doctrines of Nanac are called Khalasa; they are less fanatical and warlike than the Singhis, or followers of Guru Govind. Of these latter, a peculiar class is called Acalis, or immortals, and sometimes Nihungs. Their fanaticism, Burnes observes, borders on insanity, and they seem to be at war with all mankind. They go about heavily armed, frequently bearing a drawn sword in each hand, two other swords in their belts, a matchlock on their back, and on their turbans iron quoits six or eight inches in diameter, with their outer edges sharpened; and these, it is asserted, they throw with such force, as well as precision of aim, as to lop off the leg of a horse, or even of an elephant. Osborne, however, who has frequently seen them try their skill, found them to be very bungling, and the missile in their hands to be very inefficient. They are a lawless and sanguinary class, and would have rendered the country desolate, had they not been vigorously coerced by Runjeet Singh.

The sacred books of the Sikhs are called Granth (scripture). The principal of them are the Adi-Granth, composed by Nanac, their first Guru, and the Das Pardah ke Granth, composed by Guru Govind, their last spiritual guide. They charge in battle to the war-cry, \( \text{Wai! Guru\text{'}ki Fath} \), "O Victory to our master the Guru!"

The Sikhs as soldiers appear in a respectable light. Their repeated and signal successes against the formidable Afghans are conclusive evidence of their valour; they are patient of fatigue and privation, and, in case of reverse, readily rally. Malcolm gives rather a favourable view of their character. "The Sikh soldier," he says, "is, generally speaking, brave, active, and cheerful, without polish, but neither destitute of sincerity nor attachment." But for the occurrence of some recent events, the present race of Sikhs might have claimed exemption from the charge of cruelty. Their celebrated maharaja, Runjeet Singh, rarely shed the blood either of criminals or of his personal enemies, and he appears to have aspired to the praise of clemency.
PUNJAB.

In person, the Sikhs bear a general resemblance to other people of Hindoo origin, but they are more robust; the result of a more varied and liberal diet: they especially excel others of the Hindoo race in having the lower extremities full, muscular, and symmetrical. Their women are esteemed beautiful.

The general dress of the male portion of the Sikh population consists of a jacket and trousers reaching to the knee; of late, the chiefs have lengthened the trousers to the ankles. They also wear shawls and scarfs, and wrap their heads in thin narrow cloths, so as to form a rude turban. The Sikhs are in general remarkably illiterate; Runjeet Singh was unable to read or write, and most of his courtiers were alike destitute of these elementary attainments. This may, perhaps, be accounted for from the fact of most of the sect, including Runjeet himself, tracing their origin to the Jats, a Rajput tribe of very low order.

The language of the Punjab is called by Malcolm a jargon, compounded of various tongues. As spoken in large towns, it is a dialect of the Urdu or Hindustani: in the villages, the dialect in use is Jathky, sprung from a cognate root, and originally the language of the country: on the southern frontier, Punjaubhi contains a large admixture of Sindhi. There are two characters used,—Laude, that of common translation, and Gurmukhi, or the character of the Granth. Measures have been taken by the government for the promotion of popular education. The indigenous schools are of three descriptions, resorted to by Hindoos, Mussulmans, and Sikhs respectively. A government educational institution, partaking of a collegiate character, has been founded at Amritair. It is remarkable that female education is to be met with in all parts of the Punjab. The girls and the teachers (also females) belong to all of the three races above enumerated.

In facilities of communication, this province enjoys great advantages. Besides those afforded by its noble rivers, it possesses others in a number of roads constructed since its occupation by the British. Of these the principal is the main road from south-east to north-west, from Lahore to Peshawur, passing the towns of Wuzeerabad, Jhelum, Rawul Pindee, and Attock. From Lahore this road is continued in a south-
PUNJAB.

easterly direction across the Jullunder Doab to Loodiana, where it communicates with the grand trunk road from Calcutta. 2. From north to south, from Lahore to Ferozepore; 3. from north-east to south-west, from Lahore to Mooltan; 4. from east to west, from Lahore to Dera Ismael Khan; 5. from north-west to south-east, from Dera Ismael Khan, passing the town of Jhung, in the Bechna Doab, and traversing the Baree Doab to Uloahur, where it joins the road from Delhi; 6. from south to north, from Amritsir to Sealkote. There are, besides, several routes connecting the great northern cities with the chief southern outlet at Mooltan.

The Sikh realm has many considerable towns; of these, the most worthy of notice are—Lahore, Amritsir, Pind Dadun Khan, Mooltan, Peshawar, Dera Ghazee Khan, Dera Ismael Khan, Jullinder, Vazeerabad, Lea, Nurpur, Le, Jelum, Jelalpoor, Shoojabad, and several others, especially noticed under their names in the alphabetical arrangement.

The Punjab was, in remote antiquity, the scene of some of Alexander's most arduous exploits. At the beginning of the eleventh century of the Christian era, it was ravaged, widely and sweepingly, by Mahmood of Ghiznee, "the Destroyer." Lahore for about a century remained in possession of the successors of Mahmood, and was frequently the seat of their government, until 1186 when the Ghaznevide dynasty was uprooted by Mahomed, Sultan of Ghore. Subsequently to this event, the Punjab became the prey of a succession of weak, licentious, and turbulent rulers, among whom the Afghans generally predominated, until, in 1526, Baber gained the victory of Paniput, and, ascending the throne, established the sovereignty of the Timurian family. In 1748, Ahmed Shah Durani, finding the power of the Moguls broken by the invasion of Nadir Shah, overran the Punjab with an Afghan army, and made himself master of Lahore; and in 1756 the Mogul emperor of India ceded to him these conquests. Soon after this, the power of the Sikhs began to assume a formidable aspect, and in 1768 they overran the country east of the Jhelum, and, crossing that river, took the celebrated fortress Rotas. In 1797, Shah Zeman Durani invaded the Punjab and took Lahore, but being immediately recalled by an insurrection at home, left the country in greater confusion than he
PUNJAB.

found it. The expulsion of Shah Shooja in 1809, and consequent subversion of the Afghan monarchy, facilitated the rise of Runjeet Singh, a Sikh of the caste of Jats, one of the humblest but most numerous among the Rajpoots. In 1799, this adventurer had obtained from Zeman Shah Durani a grant of Lahore, and in the same year succeeded in expelling three rival Sikh chieftains, who had maintained themselves there. In 1809, having extended his power over the greater part of the Punjab, and some of the petty hill states, he carried his arms across the Sutlej, and attacked the Sikh chieftains under British protection. Negotiations ensued, and were brought to an amicable conclusion by a treaty, providing "that the British government will have no concern with the territories and subjects of the raja to the northward of the river Sutlej," and that Runjeet Singh would not commit or suffer any encroachment on the possessions or rights of the chiefs on the left bank of that river. In 1818, Runjeet Singh stormed Mooltan, and extended his power over the whole southern part of the Punjab, and in the same year marched a force across the Indus, and made himself master of Peshawar. In 1819, the Maharaja of the Sikhs, as Runjeet styled himself, conquered the Derajat, on the west side of the Indus, and Cashmere. In 1831, at Rooper, on the Sutlej, an interview took place, amidst great pomp and display, between Runjeet Singh and Lord Auckland, the Governor-General of British India, and a paper was placed in the hands of the Sikh ruler promising him the perpetual amity of the British government. In 1835, Golab Singh, a vassal of the Maharaja, reduced to subjection the extensive hill state of Ladakh, or Middle Tibet, and five or six years later, the same chieftain subdued Bulti, or Little Tibet. In 1838 Runjeet Singh became a party in the tripartite treaty with the British government and Shah Shooja, and succeeded in obtaining a stipulation securing to him the right to all the territories which he then possessed on both sides of the Indus. Runjeet Singh died in July, 1839, and was succeeded by his son Kurruck Singh. The latter died in 1840, and, as generally believed, from the effects of poison. Before the funeral ceremonies for this prince were fully ended, his son and successor was killed by the falling of a beam—a catastrophe not accidental, though intended to have the appearance of being
so. A competition for the vacant throne then ensued between the widow of Kuruck Singh and a reputed son of Runjeet Singh, named Sheer Singh, but who, though born in wedlock, had been subjected by his alleged father to the stigma of illegitimacy. Shere Singh finally succeeded, but his triumph was of short duration: near the close of the year 1843 he was assassinated; and this was followed by a widely-spread, frantic, and sanguinary anarchy, which, after raging with a fury that overspread the Punjab with desolation and misery, eventuated in an aggressive movement upon the British dominions. The British government, ever reluctant to interpose in the internal disensions of neighbouring states, had of course no choice but to resort to arms when its own territories were invaded. The appeal was crowned with success to the righteous cause, although the conflicts of Moodkee, Ferozeshah, Aliwal, and Sobraon, attest the obstinacy of those who, having thrown their own country into confusion, proceeded to extend that confusion, if possible, to the territories of a neighbour anxious only to preserve the relations of peace, but whose power was as great as his disposition was pacific. The insolent foe was driven back; and it was in the Seik capital Lahore, then occupied by the British, that the treaty which was designed to regulate the future position of each government towards the other was concluded. But it was not destined long to command even a nominal acquiescence. Treachery and perfidy, almost unparalleled in the annals of even oriental affairs, provoked a further manifestation of British power, and the Governor-General came to the conclusion that, to use his own language, "no other course is open to us than to prosecute a general Punjab war with vigour, and ultimately to occupy the country with our own troops." It would occupy far greater space than can here be spared to detail the events which followed. The battle of Chillianwallah, which at the time excited much discussion, and the victory of Gujerat, were among the most noticeable. The result was not less triumphant, and was far more decisive than that of the former war.

On the 29th of March, 1849, Lahore was again the scene of a most imposing spectacle, the actors in which were assembled for the same object as on a previous occasion—the settlement
PUNJAB.

of the affairs of the Punjab. In the contest between good faith and treachery, victory had decided for the former. The British, now masters of the Punjab, held the determination of its fate, and that determination was the most happy for the people of the conquered territory that could have taken place. On the day and at the place above named, it was solemnly proclaimed that the family of Runjeet Singh had ceased to reign, and that the country of the Five Rivers was incorporated with the British empire. The effects which have followed the incorporation, so different from the usual results of conquest, may be seen in the remarks addressed by the Court of Directors of the East-India Company to the government of India, on receiving a report of the first two or three years only of British administration. 4

"In the short period which has elapsed since the Punjab became a part of the British dominions, results have been achieved such as could scarcely have been hoped for as the reward of many years of well-directed exertions. The formidable army which it had required so many battles to subdue, has been quietly disbanded, and the turbulent soldiery have settled to industrious pursuits. Peace and security reign throughout the country, and the amount of crime is as small as in our best-administered territories. Justice has been made accessible, without costly formalities, to the whole population. Industry and commerce have been set free. A great mass of oppressive and burthen-some taxation has been abolished. Money rents have been substituted for payments in kind, and a settlement of the land revenue has been completed in nearly the whole country, at a considerable reduction on the former amount. In the settlement, the best lights of recent experience have been turned to the utmost account, and the various errors committed in a more imperfect state of our knowledge of India have been carefully avoided. Cultivation has already largely increased. Notwithstanding the great sacrifices of revenue, there was a surplus, after defraying the civil and the local military expenses, of fifty-two lacs in the first, and sixty-four and a half lacs in the second year, after annexation. During the next ten years, the construction of the Baree Doab Canal, and its branches, and of the great network of roads already in rapid progress, will absorb the greater part of the surplus; but even during this interval,
according to the Board's estimate, a balance will be left of more than double the amount of the cost of two corps, at which the Governor-General computes the augmentation of the general military expenses of India due to the acquisition of the Punjab. After the important works in question are completed, the Board of Administration, apparently on sound data, calculates on a permanent surplus of fifty lacs per annum applicable to general purposes.

"Results like these reflect the highest honour on the administration of your Lordship in Council, and on the system of Indian government generally. It is a source of just pride to us, that our services, civil and military, should have afforded men capable, in so short a time, of carrying into full effect such a series of enlightened and beneficent measures. The executive functionaries in the subordinate ranks have proved themselves worthy of the honourable career which awaits them. The members of the Board of Administration, Sir Henry Lawrence, Mr. John Lawrence, Mr. Mansell, and Mr. Montgomery, have entitled themselves to be placed in the foremost rank of Indian administrators."

PUNJNUD, a great stream of the Punjab, discharges into the Indus the collected water of the Ghara and Trimab, and consequently of the Sutlej, Beas, Ravee, Chenaub, and Jhelum. The great channel bearing the name of Punjnud commences at the confluence of the Ghara and Trimab, in lat. 29° 21', long. 71° 3', and, taking a south-westerly course of about sixty miles, joins the Indus nearly opposite Mittunkote, and in lat. 28° 57', long. 70° 30'.

PUNKEEMATH, in the British district of Gurhwal, lieutenant-governorship of the North-West Provinces, a town on the route from Sireenuggur to Thibet, 43 miles E.N.E. of the former. Lat. 30° 27', long. 79° 30'.

PUNNAGHUR, in the British district of Saugor and Nerbudda, a town on the route from Allahabad to Jubulpooor, 261₂ miles S.W. of former, and 10 N.E. of latter. It appears to be a place of considerable antiquity; and amongst other striking objects is a curiously-sculptured bull, on a very high altar of stone. Fitzclarence, who marched by the town, but had not time to visit it, mentions that a great number of Hindoo temples were visible. The dwellings of the inhabitants
we, however, very poor, being merely constructed of mats coated with mud. To the south-east of the town is a very fine tank. Elevation above the sea 1,477 feet. Lat. 23° 16', long. 80° 3'.

PUNNAH, in Bundelcund, a town, the principal place of the territory of the same name, lies on the route from Banda to Jubbulpore, 622 miles S. of the former, 169 N. of the latter. It is situate on the north-eastern slope of a barren range, or rather plateau, rising about 300 feet above the Bindachal plateau, stretching towards the north-east, and from this town styled by Franklin the Punnah Hills. The site, which is picturesque, is close to an extensive jhil or tank, formed by embanking the extremity of a deep valley. A palace, formerly the occasional residence of Chuttur Saul, noted as the founder, of the short-lived independence of Bundelcund, is situate on the bank of the jhil, and around are many mausoleums of elaborate and tasteful architecture. In the jhil are alligators, considered by the Hindoos sacred. Though now quite in ruins, Punnah was once a fine well-built town, the houses being generally constructed of squared sandstone, and covered with tiles. A pathway of large flags extends down the middle of the streets, which have an air of solidity, cleanliness, and convenience. Whole streets, however, are now desolate, being tenanted only by large troops of monkeys, which, posted on the roofs or at the windows, view passengers without alarm. The palace of the rajah is a spacious, beautiful building, surmounted by high, elegant kiosks, and having its exterior crowded with numerous ornamental carvings; but it is in many places ruinous. The town is crowded with Hindoo temples, in a mixed style of architecture, partaking of the Saracenic, and partly derived probably from the Mussulmans. There does not appear to be any mosque in the town, it being almost exclusively inhabited by Hindoos. There are here, however, some followers of "Pran Nath," a Khetriya, who, being versed in Mahomedan learning, as well as in his own, attempted to reconcile the two religions. There is a building consecrated to the use of this sect, in one apartment of which, on a table covered with gold cloth, lies the volume of the founder."

* Punna of Briggs's Index, and also of Jacquemont.†
† The Mahitariyal.
PUNNAH.

The former prosperity of this place resulted from the diamond-mines in the vicinity. The diamonds are found in several localities, of which one is situate a short distance to the north-east of the town, and hence the mines there are called the Punnah mines. The ground at the surface, and a few feet below, consists of ferruginous gravel, mixed with reddish clay; and this loose mass, when carefully washed and searched, affords diamonds, but few in number, and of small size. The matrix containing in greater quantity the more valuable diamonds, lies considerably lower, at a depth varying generally from twelve to forty feet, and is a conglomerate of pebbles of quartz, jasper, hornstone, Lydian stone, and some others. The fragments of this conglomerate, quarried and brought to the surface, are carefully pounded, and after several washings, to remove the softer and more clayey parts, the residue is repeatedly searched for the gem. As is common in such seductive pursuits, the return often falls below the outlay, and the adventurers are ruined. The business is now much less prosperos than formerly; but Jacquemont does not consider that there are any symptoms of exhaustion in the adamantine deposits, and attributes the unfavourable change to the diminished value of the gem everywhere. The rejected rubbish, if examined after a lapse of some years, has been frequently found to contain valuable diamonds, which some suppose have in the interval been produced in the congenial matrix; but experienced and skilful miners are generally of opinion that diamonds which escaped a former search, in consequence of incrustation by some opaque coat, have been rendered obvious to the sight from its removal by fracture, friction, or some other accidental cause. More extensive and important is the adamantine tract extending from twelve to twenty miles north-east of the town of Punnah, and worked in the localities of Kamariya, Brijpur, Bargari, Myra, and Etwa. Diamonds of the first water, or completely colourless, are, however, very rare, most of those found being either pearly, greenish, yellowish, rose-coloured, black, or brown. Franklin conjectures the ferruginous conglomerate to have been of igneous origin, but Brewster's authority is against this opinion. While admitting the possibility of the diamond having been in a state of igneous fusion, that writer considers it highly impr-
PUNNAH.

bable that it ever was so. The conglomerate matrix of the diamond rests on sandstone, which Franklin, from observations on the hill-side, and in the deep ravines in the neighbourhood, conjectures to be at least 400 feet thick, and remarks, "that there are strong indications of coal underlying the whole mass." During the prosperity of the mines, a tax of twenty-five per cent. was levied on their produce, but the tax now imposed is stated to exceed this rate. The revenue is divided in proportions between the rajahs of Punnah, Banda, and Chircaree. Franklin, calculating the share of the Punnah state at 30,000 rupees, and the aggregate of the other shares at a fourth of that sum, estimates the value of the diamonds found in three mines at 120,000 rupees per annum. Pogson, who worked one of the mines on his own account, considers "that inexhaustible strata producing diamonds exist here;" and Jacquemont imagines that if the mines were properly worked, their productiveness would be found not to have diminished. None of the great diamonds now known appear to be traceable to the mines in the vicinity of Punnah, and Tieffenthaler mentions it as a general opinion that those of Golconda are far superior.

The territory of which Punnah is the principal place, is bounded on the north by the British district of Banda, and by one of the outlying divisions of the native state of Chirkaree; on the east by the Saugar and Nerbudda estates of Sohawul, Oocheyra, and Myheer; on the south by the British territory of Saugar and Nerbudda; and on the west by several of the petty states of Bundelcund. It lies between lat. 28° 52'—25° 5', long. 79° 50'—80° 45', and "in 1832 was stated to comprise 688 square miles; to contain 1,062 villages, with a population of 67,000 souls; and to yield a revenue of eight lacs (80,000l.)" but the income was supposed in 1848 to be only one-half of the above amount. The state pays a tribute

* Hamilton vaguely states that in one of the temples of the town of Punna "is an idol, reported to have a diamond eye of immense value and brilliancy." He adds "that the Punna raja is said to possess one valued at Rs. 50,000 (5,000l.), for which he cannot find a purchaser." The authority for these statements cannot be fixed. Pogson observes, "that the principal building in Punna is a large and handsome temple, containing images of Krishna and Luchmun, whose eyes are said to be diamonds of great value."

of 10,000 rupees (1,000£.), and maintains a force of 250 cavalry and 3,000 infantry.

Early in the eighteenth century, Chutter Saul threw off subjection to the sovereign of Delhi, and assumed the title of rajah of Punnah, but being hard pressed by the Musulman chief of Furruckabad, had recourse to the assistance of the Peishwa, by whose aid he was, in 1733, rescued from his perilous position. After his death, the succession became disputed, and the country fell into a distracted state, until the Peishwa ceded a portion of his rights in the province of Bundelcund to the East-India Company by the treaty of Bassein in 1802; the cession being confirmed and extended by the subsequent treaty in 1817. In 1807, the British authorities granted the raj or territory of Punnah to Kishor Singh, a descendant and representative of the house of Chutter Saul.

The rajah of Punnah was one of the few Bundelcund chiefs who had not consented to abolish suttee; and upon the occurrence of his death, in 1849, the sacrifice took place. Instructions were thereupon given to the British agent to defer the recognition of the late chief’s brother as his successor, in order to make use of the opportunity for inducing him to enter into an engagement for its future prevention.

The elevation of the town of Punnah is 1,800 feet above the sea; distant 130 miles S. of Calpee, by Banda; 173 S.W. of Allahabad; 668 N.W. of Calcutta, by Allahabad. Lat. 24° 44', long. 80° 15'.

PUNNAIR.—See PUNIAR.

PUNNECOIL, in the British district of Tinnevelly, presidency of Madras, a small town, with roadstead, on the north-west coast of the Gulf of Manar. The approach from the south is dangerous, in consequence of an extensive reef stretching in that direction; but a ship having safely made its way past that danger may anchor securely in seven or eight fathoms, with bottom soft mud, and two miles from the beach. Vegetables are scarce, but water, swine, sheep, and fish, abundant. Lat. 8° 39', long. 78° 11'.

PUNNEEALA, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 122 miles 8.S.W. of the town of Peshawar. Lat. 32° 15', long. 70° 57'.

PUNNOH, in the territory of Bhurtpore, a small town on
PUN—PUR.

the route from Agra to Ajmeer, 43 miles W. of former, 185 E of latter. Supplies may be had, and water is obtainable from wells. Lat. 27° 4', long. 77° 24'.

PUNTA DEYRA.—A town in the British district of E.I.C. Ms. Doc. Shikarpour, province of Scinde, presidency of Bombay, 27 miles S.W. by W. of Shikarpour. Lat. 27° 40', long. 69° 18'.

PUNTI, in the British district of Bareilly, division of Pilibheet, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Petoragurh, and 70 miles N.E. of the former. Lat. 29° 2', long. 80° 3'.

PUNWAR.—A town in the Rajpoot state of Jeypoor, E.I.C. Ms. Doc. 81 miles S. by W. from Jeypoor, and 72 miles S.E. from Ajmeer. Lat. 25° 48', long. 75° 36'.

PUNWAREE, in the British district of Humeerpoor, E.I.C. Ms. Doc. the principal place of the pergunnah of the same name, a town on the route from Goona to Calpee, 126 miles S.W. of the latter. It has water from a lake, and supplies are procurable. Lat. 25° 26', long. 79° 32'.

PURBAI, in the territory of Oude, a town on the route from Azimgurh to Faizabad, 76 miles N.W. of the former, 10 S.E. of the latter, two S.W. of the right bank of the Ghaghra. Lat. 26° 43', long. 82° 10'.

PURANEEOOR, in the British district of Allahabad, E.I.C. Ms. Doc. lieutenant-governorship of the North-West Provinces, a village on the right bank of the Ganges, 779 miles N.W. of Calcutta by the river route, 29 miles S.E. of Allahabad by the same. Lat. 25° 18', long. 82° 14'.

PURANEES.—A town in the native state of Hyderabad, E.I.C. Ms. Doc. or territory of the Nizam, situate on the right bank of the Doodna river, and 174 miles N.W. from Hyderabad. Lat. 19° 17', long. 76° 50'.

PURGAI, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to that of Futtehgurh, and 10 miles N.W. of the former. The road in this part of the route is rather good, the country well cultivated. Lat. 26° 33', long. 80° 17'.

PURGY.—A town in the native state of Hyderabad, or territory of the Nizam, 41 miles W.S.W. from Hyderabad, and * Panwari of Franklin.

* Panwari of Franklin.
188 miles E. by S. from Sholapoor. Lat. 17° 10', long. 77° 58'.

PURKUNDEE, in the British district of Gurhwal, lieutenant-governorship of the North-West Provinces, a town on the route from Sireenuggur to the native state of Tibet, 28 miles N.E. of the former. Lat. 30° 30', long. 79° 10'.

PURKYAL, or TUZHEGUNG, in Bussahir, a peak of the ridge in the district of Koonawur, separating the Spiti from the Sutlej, and rising six or seven miles north-east of the confluence of those rivers. A point on a peak two miles west of the highest summit was reached by Gerard, who on this height, 19,411 feet\(^*\) above the level of the sea, found the thermometer, on the 18th of October, only 10° below the freezing-point, and the ground free from snow. The elevation of the highest peak was ascertained to be 22,488 feet\(^*\) above the sea. Vegetation was observed to reach the height of 17,000 feet; and it is intimated that its farther progress was caused by want of soil. At the highest point reached, the peak was found to be formed of enormous disunited blocks of granite, between which were large lumps of ice, clear as crystal. Lat. 31° 54', long. 77° 46'.

PURLAIHKEMEDY.—A tract inhabited by one of the independent hill tribes of Orissa, bordering on the western frontier of the British district of Ganjam; its centre is in lat. 19° 20', long. 84° 10'.

PURLAH KEMEDY.—A town in the British district of Ganjam, presidency of Madras, 78 miles S.W. by W. of Ganjam. Lat. 18° 47', long. 84° 10'.

PURLEY.—A town in the native state of Hyderabad, or territory of the Nizam, 165 miles N.W. by W. from Hyderabad, and 123 miles E. by S. from Ahmednuggur. Lat. 18° 51', long. 76° 38'.

PURMUTTY.—A town in the British district of Salem,

* Perhaps the highest point reached on the surface of the globe.

\(^*\) 22,000 according to Jacquemont; 22,700 according to Hodgson and Herbert. Gerard, however, elsewhere reconciles this apparent discordance of his conclusion with that of Hodgson and Herbert:—"Two peaks (of Parkyul or Pargenl) have been found, by measurement, respectively 22,500 and 22,700; but it is possible that there are still loftier points in the background, where it abuts on the table-land."
presidency of Madras, 37 miles S. by W. of Salem. Lat. 11° 9', long. 78° 6'.

PURNABADA RIVER.—A large offset of the Attree, from which it separates in lat. 25° 50', long. 88° 41', in the British district of Dinajepore. After a course of sixty miles, it passes into the district of Malda, which it traverses for twenty-five miles, and then falls into the Mahananda, in lat. 24° 47', long. 88° 20'.

PUNNEAH.1—A British district under the presidency of Bengal, named from its principal place. It is bounded on the north by the kingdom of Nepal, and by Sikhim; on the east by the British district Dinajepore; on the south by Malda and Bhauulpore; and on the west by Bhauulpore. It lies between lat. 25° 9'—26° 37', long. 86° 48'—88° 23': it is 117 miles in length from north-east to south-west, and 105 in breadth: the area is 5,878 square miles.2 Though remote from the sea, it is a level and rather depressed tract, traversed by numerous streams, generally descending from the Himalaya Mountains, lying to the north. There are no mountains or hills within Purneah, the chief eminence throughout this extensive tract being a conical peak, about 100 feet high, at Munneeree, near the bank of the Ganges. "In the northern corner of the district, towards the Mahanonda, are a few small hillocks of earth," but so inconsiderable as scarcely to deserve notice. So thoroughly alluvial is the geological structure, that it is only in "one small spot the naked calcareous stone is exposed on the surface;"3 and this is the only rock in the district. So low and level is the surface, and such the redundancy of water, that about 45 parts out of 100 are inundated annually.4 "On about three-quarters of this the floods only rise three or four times a year, and at each time cover the soil two or three days; on the remainder the water continues almost constantly for two or three months." The soil varies greatly in quality in different parts: near the great rivers it undergoes rapid changes. "The same field one year is overwhelmed with sand, and the next year this is covered with a rich and fertile mud. This, however, is often so irregularly applied, that, in a field of two or three acres, many spots are quite barren, while others are very productive. The changes in rivers, which have taken place in times of old, have produced

6 id. 11.
7 id. iii. 2.
in many parts of this district, as well as in most parts of Bengal, a similar intermixture of barren and fertile soils in the same plot. In these parts the intermixture is permanent, the cause of change having for many ages been removed."

The Ganges touches on this district on the south-west side, at its confluence with the Kosee, lat. 25° 20', long. 87° 16'. The river there is confined within a channel a mile in width, free from islands and sandbanks, and navigable for the largest vessels used by the natives, "which are of very considerable burthen, although they draw little water." At the confluence of the Kosee it spreads out to a great size, measuring, including its islands, from six to seven miles from bank to bank. The Ganges holds an easterly course through the district to a point, lat. 26° 11', long. 87° 52', where it enters the district of Maldah. In this part of its course its dimensions and volume of water are greater than in any other, as it here has received the Kosee, the last of its great tributaries, and is not yet diminished by the numerous great offsets which a few miles lower down begin to convey a portion of its vast aggregation of waters to the Bay of Bengal. Next in magnitude is the Kosee, a great stream, which, flowing south from Nepaul, touches on this district in about lat. 26° 32', long. 87° 12', and for ten miles forms the boundary between the dominions of Nepaul and those of the East-India Company. It is in this part of its course about two miles in width, free from rocks, but containing numerous islands, covered with tamarisks and coarse grass. After entering the district of Purneah, its main stream holds a course little deviating from a direct southerly one, and, after throwing off part of its waters and receiving others, it ultimately falls into the Ganges, in lat. 25° 20', long. 87° 16'. Its total length of course through this district is about ninety miles, the channel varying in breadth from a mile and a half to two miles, of which the stream usually occupies about three-quarters, the remainder being sandbanks and shoals, covered with aquatic vegetation. About eight miles above its mouth, it on the right side receives the river Gogaree, flowing east from the British district of Bhaugulpore; from which point the united stream forms for the remainder of its course the boundary between Purneah and Bhaugulpore. The Mahanunda, another great river, touches on this district at the north-east
PURNEAH.

angle, in lat. 26° 38', long. 88° 22', and for about ten miles forms the eastern boundary, towards the British district of Dinajepore, and then, entering Purneah, takes a south-western course for fifty-five miles, as far as Colapura, in lat. 25° 56', long. 87° 48', where it turns south-east, and flows fifty miles to Jagatnathpore, in lat. 25° 28', long. 88° 6'; at which place it, on the left side, receives the Nagor, a considerable stream flowing from the north: subsequently it holds for twenty miles a direction south, forming for that distance the boundary between this district and Dinajepore; and finally, in lat. 25° 18', long. 88° 7', it passes into the district of Maldah. Besides these rivers, there are numerous smaller streams, connected with the larger and with each other, and in general admitting craft of considerable burthen; so that few tracts have equal advantages of irrigation and water-carriage. The lowest part of the surface is that contiguous to the bank of the Ganges, at the south-east corner of the district, and it may be estimated to have an elevation of 123 feet above Calcutta. Titaliya, on the north-east frontier, and probably the highest point in the district, has an elevation estimated at 275 feet above the sea. There are no lakes of any magnitude in Purneah, but many jhils or extensive shallow ponds, which, according to all appearance, were formerly the deeper parts of the channels of rivers which have changed their courses.

In the latter part of spring, and the commencement of summer, the westerly winds in the south of the district bring very hot, dry weather. During the periodical rains, from the early part of summer to the middle of autumn, easterly winds prevail. In spring, violent squalls are common, which, setting in at sometimes from the north, at others from the north-west and north-east, "are accompanied by uncommon quantities of hail. In one storm, by far the greater part of the stones were as large as walnuts, and vast numbers were like small apples, while several were like ordinary-sized oranges." The cold of winter is in every part of the district sufficient to produce

* The elevation of Kahlalgang or Colgong, on the bank of the Ganges, at the south-west corner of the district, is estimated at 130 feet; and as the slope of the waterway in this part is estimated at four inches per mile, the most southern point of the district, twenty miles lower down the stream than Colgong, may be estimated at 123 feet above Calcutta.
Purneah.

Hoar-frost, and, at times, seriously to damage the more tender crops. Earthquakes are not unfrequent, several shocks usually occurring every year, but so slight as to cause no material injury.

Among the wild animals are elephants, but they are not numerous. There are tigers and leopards, but they are not common, except among the decaying vestiges of the ruined city of Gaur. Monkeys (the markat or Simia rhesus) abound in various parts, and do much mischief, but no steps are taken to lessen their numbers. The jackal and the Indian fox are common, and the former has the reputation of stealing money as well as other things, and hiding them; but this Buchanan believed to be a fiction, invented and kept up by those who derived impunity for their own dishonesty from laying the thefts upon the jackals. Wolves formerly existed, but they have disappeared. The Indian bear, though not entirely unknown, is very uncommon. Deer of various kinds—the axis or spotted deer, and the cerf des Ardennes of Buffon, are pretty numerous wherever the country is overgrown with woods and bushes. The common antelope is abundant in the western parts of the district. In the wastes of the south, are some wild buffaloes; and throughout the district, where there is any shelter, wild hogs are exceedingly numerous. The numbers of the porcupine are kept down by the avidity with which the animal is pursued, the flesh being an article of food greatly esteemed by the pure Hindoos. Hares are numerous. The ichneumon and the otter, both which are common, remain to be added to the list. Of birds, paroquets abound in the northern parts, and peafowl in the southern. The kaim (Galinula porphyrio of Linnaeus), a bird celebrated for its beauty by the Greeks, with whom it was a rarity, remains here throughout the year; the ortolan, called by the natives bageri, found in large flocks, but only during fair weather, deserves mention, as constituting a delicate article of food; and the kolang, or common crane (Ardea grus) of Europe, may be noticed. All the above-mentioned birds are described as making great havoc among the grain-crops. Partridges and quails are numerous; the kalatita or black partridge is the more common, but the flesh is represented to be of very indifferent quality: a much larger partridge, called titar,
PURNEAH.

furnishes material for a more acceptable repast. Water-fowl exist in astonishing swarms. Ducks are taken in vast numbers by means of nets; but the class of people who exercise this vocation find few or no customers excepting Europeans, such food being regarded as unclean by all natives but those belonging to the very impure classes. Snipes, golden plovers, and the florikin or lesser bustard, abound; all excellent articles of food, but neglected by the natives. Of the smaller white heron there are many varieties and great numbers, while stags and water-crows exist in myriads: sparrows are found, and are considered luxurious eating. Of birds of prey, vultures, eagles, kites, and hawks, may be mentioned as existing in immense variety and numbers. Tortoises are very numerous, and in some places are much eaten. In the large rivers, porpoises abound; crocodiles infest the waters, and are rarely molested; in some instances they are held sacred. Venomous serpents swarm in incredible numbers; and it was computed by Buchanan that 120 persons annually perish from their bites: great numbers of cattle are destroyed in the same manner. They are most to be dreaded in rainy weather, as they then take shelter in houses. The hooded serpent is considered in some degree sacred; and this superstition generally insures impunity to these dangerous animals, although the natives do not seem to have any aversion to their destruction, if effected by other agency than their own. Buchanan's testimony on the point is as follows: "The Brahmans say that a prudent and wise man would not with his own hand put one of the kinds of hooded snake (gokhar) to death; yet on all occasions I saw them very much satisfied with the impure sinners who took that trouble."

The rivers and jhils afford a moderate supply of fish, but in many cases this advantage is rendered comparatively unavailable by the unskillfulness of the fishermen. One hundred and thirty-four species of fish are enumerated by Buchanan. Honey-bees are not very numerous; but it was the opinion of the author just named, that if adequate attention were paid to this source of production, considerable advantage would accrue.

For a botanist, the country is represented as being a field of little interest. The inhabitants, it appears, consider it a religious duty to plant trees; but the manner in which the duty
PURNEAH.

was discharged at the time of Buchanan's observations, called forth his reprehension, the trees planted being for the most part worthless. That writer enumerates 122 species of trees existing within the district, and regrets the stupidity of the people in not giving encouragement to those of most value, and best suited to the country. The bamboo, though it thrives well, is represented, notwithstanding its great utility, to be little cultivated by the short-sighted and indolent natives. The mango produces excellent fruit, in a small portion of the district at the south-east corner; in the remainder, its fruit is execrable, the timber worthless, though quantities were in Buchanan's time planted and maintained. The khajur palm (elate) is cultivated for its sap, which is drawn off by means of incision, and which, fermented, yields an intoxicating beverage.

The palmyra-palm, called also tal, is likewise cultivated for its sap, as affording the means of intoxication. The coconut-palm is exotic, and regarded merely as an object of ornament or curiosity. The mahua (Bassia latifolia) is cultivated to considerable extent in the south-western part of the district for the petals of its flowers, which, by distillation, yield an ardent spirit, consumed by the natives.

The staple produce of the district is rice, which is cultivated with considerable care. The summer rice (bhadai) is a very important crop, and is usually followed in the cool season by crops of wheat, barley, pulse, or oil-seeds, or sometimes intermixed with other articles. The varieties of winter rice are very numerous. Besides maize or Indian corn, various kinds of millet are raised. The principal esculent vegetables are, bhattan or egg-plant, spinach, various kinds of amaranthus and of cucurbitaceous plants, sweet potatoes, common potatoes, pease, cabbage, and yams; the condiments, ginger, capsicum, turmeric.

The cultivation of the sugarcane was found by Buchanan to be very limited and unskilful, and that of cotton subject to the same remarks. Tobacco, a great favourite with the population, is extensively cultivated, as is hemp, for supplying the powerful stimulant called bang. Betel is also one of the productions of the district. The opium-poppy was believed by Buchanan to be secretly reared to some extent. Indigo is the principal commercial crop. Safflower is represented as an object of some importance towards the eastern part. The mulberry-tree was,
PURNEAH.

in the time of Buchanan, confined to three small divisions of the south-east corner of the district, but there the number was very great. It was, however, found to be a precarious branch of industry, as in some years the crop of leaves totally failed, and in others, the worms, without any ascertained cause, perished, without producing silk. The cultivation appears to have been in many instances slovenly.

Buffaloes are the most important and valuable of domestic animals; next to these, kine; but both are inferior to some of the like animals found in parts of India not far distant. The horses are small, and of a wretched description, being valued at only from three to five rupees each. Goats are numerous, and kids are in demand for sacrifice. The sheep produce excellent wool, some of which is exported.

The manufacturing industry of the district is exercised principally in coarse work, in metals of various species, and in spinning and weaving cotton and silk goods; the manufacture of wool also affords employment to some of both sexes. The value of the cotton fabrics manufactured in this district was estimated at 13,00,000 rupees annually; but the competition of cheaper British goods has, there can be no doubt, much diminished the amount of cotton-weaving, as well as of silk-winding and silk-weaving, and probably of the spinning and weaving of wool. The preparation of sugar for the market is very limited and rude. Some culinary salt is procured by washing the earth; and nitre is obtained from a similar source, and from washing the soil of inclosures in which cattle are kept.

In consequence of the great extent of navigable streams, the number of river craft is very great, their tonnage varying from about five to sixty tons. In the rainy season, canoes, carrying from half a ton to two tons, are almost the only mode of conveyance to and from market, and between the neighbouring villages; and some adventurers, not possessing any such craft, make their way on floats of bamboo, supported on earthen pots. Canoes and small boats are imported from Nepaul, being made in the Terai or marshy forest at the base of the hills.

Cotton is imported from Mirzapore and other places lying to the west; sugar is imported from the British districts Dinajpur, Thoot, and Patna. The only external commerce from the district is to Nepaul. The chief exports are cattle, coarse
cotton fabrics, silk, indigo, and grain. "Banking is carried on to
some extent, especially at the town of Purneah, where there are
some considerable capitalists; but so scanty is the circulating
medium, that, according to Buchanan,1 "A rupee in this country
is a large sum; for being a ploughman's money wages for two
months, it may be considered of as much importance in the
circulation of the country as three or four pounds sterling may
be considered in England."

The population amounts to 1,600,000. Buchanan (who,
however, estimated the people at nearly double the above
numbers) reckoned the Hindoos2 to the Mussulmans as 57 to
43. The people in general are characterized by great want of
energy and courage; scarcely any enter into the army, and they
seldom can muster sufficient resolution to repel the attacks of
wild beasts. Their dwellings, with few exceptions, are wretched,
and their personal habits correspond, their clothes being en-
crusted with dirt, and worn until they fall off in rags.

Purneah, the capital, and the other towns of importance
within the district, are described under their respective names
in the alphabetical arrangement.

The principal routes are—1. From south-west to north-east,
from Bhaugulpore, through the town of Purneah to Titaleea,
and thence to Darjeling; 2. from south-east to north-west,
from Maldah, through the town of Purneah, to Nathpur; 3.
from east to west, from Dinajpore to the town of Purneah, and
thence to Mozufferpore, in Tirhoot; 4. from south to north,
from Rajmahal to Purneah and Nathpore.

The fabulous history of this tract represents that at a remote
period of antiquity it formed3 part of the primeval realm of
Mithila, and was governed by a rajah, whose daughter was
Sita, the renowned spouse of Rama; and whose abduction by
Rawan, the demon-tyrant of Ceylon, gave rise to the war
which is the subject of the Ramayana. The district appears to
have been subjugated by the Mussulmans about4 the year
1541, and was acquired5 by the East-India Company in 1765,
under the firman of Shah Alum, of Delhi.

PURNEAH.1—The principal place of the British district of
the same name, under the presidency of Bengal. It is situated
on the banks of the Little Kosi, occupying both sides of the
river, and lying on the route from Bhaugulpore to Titaleea,
PUR.

78 miles² N.E. of the former, and 72 S.W. of latter. It includes a space of about three miles square; but much of it is occupied by plantations, gardens, and open places. The best part of the town is on the left side of the river, and consists of one wide and tolerably straight street, half a mile long, the houses in which are pretty well built and tiled. Two inferior streets, parallel to the principal one, run on each side of it. It is surrounded by straggling suburbs, in one of which, called Maharajganj, are situate the buildings for the accommodation of the civil establishment of the district, which consists of a civil and sessions judge, a sudder aumeen, a moonsiff, a collector, a magistrate, an assistant to collector, two deputy magistrates, an assistant-surgeon, and an uncovenanted deputy-collector. The above are Europeans; and there are, besides, a principal sudder aumeen and several moonsiffs, who are natives. With respect to the population, Buchanan observes, "This town, which occupies a space equal to more than half of London, most assuredly does not contain 50,000 people, though it is one of the best country towns in Bengal." Purneah is distant N.W. from Calcutta by Berhampoor 283 miles;⁴ S.E. from Katmandoo by Nathpoor 200 miles; S.W. from Darjeeling 98. Lat. 25° 46', long. 87° 30'.

PUROKH, in the British district of Mynpoorie, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Allygurh to that of Mynpoorie, and eight miles N.W. of the latter. The road in this part of the route is good; the country is open, and but partially cultivated. Lat. 27° 17', long. 79° 1'.

PUROWLEE,¹ in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Allygurh to that of Futtehgurh, and 44 miles² N.E. of the latter. There is good water from wells, and supplies may be obtained from the neighbourhood. The road in this part of the route is bad; the country level, cultivated in some parts, in others overrun with bush-jungle. Lat. 27° 31', long. 79° 2'.

PURRAINDER.—A town in one of the recently sequestrated districts of the native state of Hyderabad, 211 miles N.W. from Hyderabad. Lat. 18° 19', long. 75° 30'.

PURRAUNTAJE.—A town in the British district of ⁵ E.I.C. Ms. Doc.

¹ E.I.C. Ms. Doc. ² Garden, Tables of Routes, 807. ³ Buchanan, ut supra, iii. 51. ⁴ Garden, Tables of Routes, iv. vi. ⁵ Garden, Tables of Routes, 47.
Kaira, presidency of Bombay, 50 miles N. by E. of Kaira. Lat. 23° 26', long. 72° 53'.

PURRAUR.—A town in the native state of Travancore, territory of Madras, 126 miles N.N.W. from Trivandrum, and 82 miles S.S.E. from Calicut. Lat. 10° 9', long. 76° 16'.

PURROOA,¹ or PARRUA,* in the British district of Maldah, presidency of Bengal, a town on the route from Maldah to Purneah, six miles N. of former. It is now much ruined, but contains many monuments of antique greatness, especially the Adinah mosque, a vast structure nearly 500 feet in breadth from north to south, and 300 from east to west. The style of architecture is, however, rather complex than grand, consisting of a great number of pillars and domes, diminutive in proportion to the vast dimensions of the ground-plan of the building. Within the precincts are the tombs of Sikandar Shah and some other Mussulmans of rank. Besides this vast structure, there are many others, but all very ruinous. The principal are the Golden Mosque, the Eklaky, or mosque of 1,00,000 (rupees), so denominated from having cost that sum; and there are many of less note scattered along each side of the principal street, which may be still traced in a direction from north to south, a distance of six² miles. About this principal street are tanks and buildings innumerable, most of them constructed of materials drawn from the still more ancient and extensive city of Gaur, situate about twelve miles farther south. "The³ true appellation of the city is said to be Panduuya, or Pandovipn," derived from its having been founded by a rajah of the Pandu family, renowned in the lore of Hindu mythology and romance. It has repeatedly⁴ been the seat of the government of Bengal, though Gaur more frequently had that distinction. Distant⁵ N. from Calcutta by Burhampoor 197 miles. Lat. 25° 4', long. 88° 9'.

PURSA.—A town in the British district of Sarun, presidency of Bengal, 25 miles N.W. of Chupra. Lat. 25° 57', long. 84° 37'.

PURSOEE.—A town in the British district of Mirzapoor, presidency of Bengal, 53 miles S.S.E. of Mirzapoor. Lat. 24° 27', long. 82° 58'.

PURSOOD,¹ in the British district of Muttra, lieutenant-

* Parra of Tassin; Peruya, Handuya, or Pandovipn of Buchanan;¹ Purrush or Fundun of Rennell;² Fundus of Stewart.³

governorship of the North-West Provinces, a village on the route from the cantonment of Allygurh to that of Muttra, and 112 miles N.E. of the latter. The road in this part of the route is heavy and bad for carriages, the country well cultivated and studded with small villages. Lat. 27° 34', long. 77° 54'.

PUCHAR. — A town in the native state of Guzarat, or dominions of the Guicowar, 41 miles N.N.W. from Rajkote, and 60 miles E.S.E. from Bhooj. Lat. 22° 51', long. 70° 36'.

PURTABGHUR. — A town on the route from Neemuch to Baroda, 33 miles S. of the former, and 206 N.E. of the latter. It is the principal place of a raj or small state of the same name, under the political superintendence of the Governor-General, comprising part of the tract called Bagur, and the whole of that denominated Kantul. The raj is bounded on the north-west and north by the state of Mewar or Odeypore; on the east by Mundesore, Jowra, and Rutlaum; and on the south-west by Banswarra; and lies between lat. 23° 14'—24° 14', long. 74° 27'—75°. The area is estimated at 1,457 square miles, and the population at 145,700. It is a hilly and ill-cultivated tract, rather elevated, and hence frost is not unknown. The annual revenue of the rajah was, in 1848, estimated at 156,000 rupees, or 17,500. The armed force consists of 250 cavalry and 300 infantry, with a police establishment of 200 men. The ruling family is of a junior branch of that of Odeypore. Before the raj became tributary to Holcar, it formed a dependency of the Mogul empire, and one of its former rulers, Salim Sing, having obtained from Mahomed Shah the privilege of coining money in his own name, struck in the mint of Purtabghur the Salim Shahee rupee. The privilege thus conceded has been grossly abused by the more recent rajahs, who have permitted the fraudulent alteration of the standard; and the debased coin issued from this mint has frequently been made the subject of remonstrance on the part of British government. In 1818, the rajah concluded a treaty with the East-India Company, under which he became entitled to protection; he binding himself to subordinate cooperation, and to pay annually to the other contracting party a tribute of 72,700 Salim Shahee rupees, which sum is transferred to Holcar, the feudal superior of Purtabghur. A detail of the circumstances under which Dulput Singh, the regent of Doon-
gerpoor, succeeded to the raj of Purtabghur, and relinquished
his claim of succession to that of Doongerpoor, will be found
in the article upon the latter state.

The town of the same name as the district, and the chief
place within it, though of considerable size, presents no
nothing particularly worth notice. Elevation above the sea 1,698 feet.
Distance of the town direct from Mhow, N.W., 118 miles;
from Oojin, N.W., 80. Lat. 24° 5', long. 74° 58'.

PURTABGURH.—A town in the recently lapsed territory
of Berar or Nagpoor, 70 miles E.S.E. from Nagpoor, and 92
miles S.S.E. from Seuni. Lat. 20° 49', long. 80° 10'.

PURTABGURH.—A district of the kingdom of Oude, named
from its principal place. It is bounded on the north-east by
the district of Sultanpoor; on the east by the British district
Jounpoor; on the south by the British district Allahabad; and
on the west by the districts Ahlaganj and Salon. It lies
between lat. 25° 40'—26° 15', long. 81° 40'—82° 5'; is forty-
five miles in length from south-east to north-west, and twenty
in breadth. It contains the following subdivisions: 1. Pur-

PURTABGURH, or BELHAGHAT, in the territory of
Oude, a town two miles south of the right bank of the river
Saee. It is surrounded by a decayed rampart of mud, and on
its west side is a fort of the same material, in a ruinous state,
but still inhabited by a foujdar or officer of police. The site
is rather elevated, sandy, yet not unproductive, and water is
found at from thirty to thirty-five feet below the surface.

Butter states the population at 10,000, “of whom half are
Mussulmans, and almost all cultivators, there being no manu-
factories.” Previously to 1834, one of the Company’s native
infantry regiments, with two guns, was cantoned three miles
north-east of the town, on a very healthy spot on the right bank
of the Saee. Tieffenthaler gives a brief notice of Purtabghur,
which he concludes by observing, “in this district much salt
and saline earth are obtained.”

Purtabghur is distant N. from Allahabad 32 miles, N.W. from Calcutta 534 S.E.
from Lucknow 90. Lat. 25° 54', long. 81° 59'.

* Partabgarh of Tassin; from Partab, a proper name of common occurrence in India, and Gurb, “fort”;—Partab’s Fort. It is called Belha
Ghat, or ferry of Belha, from being situated near the ferry which leads over
the Sai to the neighbouring town of Belha.
PURTABPOOR, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a village on the route from Delhi to the town of Meerut, and eight miles S.W. of the latter. The road in this part of the route is good. Lat. 28° 55', long. 77° 42'.

PURTABPOOR, in the British district of Mynpoorie, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Allygurh to that of Rawah, and 41½ miles N.W. of the latter. The road in this part of the route is good, the country open and cultivated. Lat. 27° 13', long. 78° 35'.

PURTTOOR.—A town in the native state of Hyderabed, or territory of the Nizam, situate on the right bank of the Doodna river, and 140 miles S.W. by S. from Ellichpooor. Lat. 19° 36', long. 76° 18'.

PURTYALL.—A town in the British district of Guntoor, presidency of Madras, 59 miles N.W. by W. of Masulipatam. Lat. 18° 40', long. 80° 30'.

PURULEA.—See Pooralia.

PURUSGAON.—A town in the recently escheated territory of Berar or Nagpoor, 71 miles E. by N. from Nagpoor, and 180 miles S. from Jubbulpooor. Lat. 21° 18', long. 80° 14'.

PURUSPUTI,¹ in the territory of Oude, a village on the route from Azimgurh to Sultanpoor cantonment, 63½ miles W. of the former, 12 S.E. of the latter. Lat. 26° 17', long. 82° 10'.

PURWAN NUDDEE.—A river rising in lat. 25° 31', long. 67° 2', in the British district of Tirhoot, and, flowing in a southerly direction for seventy miles, generally through the district of Bhagulpore, falls into the Dhamora, in lat. 25° 38', long. 86° 49'.

PUSGAW.—A town in the native state of Oude, 82 miles N.W. by N. from Lucknow, and 16 miles E. by S. from Shajahanpooor. Lat. 27° 50', long. 80° 13'.

PUTAOO, in the Rajpoot state of Jodhpooor, a village on the route from Balotra to the city of Jodhpooor, and 14 miles N.E. of the former. The road in this part of the route is good, and lies through a level country, rather fertile, and with some cultivation. Lat. 26° 57', long. 72° 30'.

PUTCHPAHAB.—A town in the Rajpoot state of Jhalawar, 82 miles W.S.W. from Jhalra Patun, and 58 miles E. from Neemuch. Lat. 24° 21', long. 75° 45'.
E.I.C. Ms. Doc.
Garden, Tables of Routes, 54.

PUTEANUGLA, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to Almora, and 20 miles N. of the former. It is situate in an open, low, level country, partially cultivated. Water is supplied from wells. The road in this part of the route is bad for wheeled carriages. Lat. 29° 4', long. 78° 57'.

E.I.C. Ms. Doc.

PUTEHBUR, in the British district of Suharunpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Suharunpoor to Simla, 12 miles N.N.W. of the former. Lat. 30° 8', long. 77° 32'.

E.I.C. Ms. Doc.

PUTENE, in the British district of Mozuffurnuggur, lieutenant-governorship of the North-West Provinces, a village on the route from Kurnal to Meerut, and 19 miles S.E. of the former. The road in this part of the route is rather good, the country open and well cultivated. Lat. 29° 32', long. 77° 14'.

E.I.C. Ms. Doc.

PUTERA,¹ in British district of Banda, lieutenant-governorship of the North-West Provinces, a village on the route by Chila Tara Ghat from Cawnpore to town of Banda, 17² miles N. of latter. Lat. 25° 42', long. 80° 32'.

E.I.C. Ms. Doc.

PUTHIA, in the British district of Mynpoorie, lieutenant-governorship of the North-West Provinces, a village on the route from Allygurh cantonment to that of Mynpoorie, and 37 miles S.E. of the former. The road in this part of the route is good; the country low, level, and partially cultivated. Lat. 27° 37', long. 78° 37'.

E.I.C. Ms. Doc.

PUTHONA, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on the route from Allahabad to Futtehpoor, 21 miles W.N.W. of the former. Lat. 25° 32', long. 81° 38'.

E.I.C. Ms. Doc.

PUTHURRIA,¹ in the British district of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Allahabad to Saugor, 286 miles S.W. of former, and 28² N.E. of latter. It is situate at the east extremity³ of a range of trap hills, at an elevation of 1,395 feet above the sea. Lat. 23° 58', long. 79° 11'.

E.I.C. Ms. Doc.

PUTJIRWA.—A town in the British district of Sarun, presidency of Bengal, eight miles W.N.W. of Bettiah. Lat. 26° 48', long. 84° 28'.

E.I.C. Ms. Doc.

PUTNEETOLA.—A town in the British district of Dinaje-
pore, presidency of Bengal, 40 miles S. of Dinajpore. Lat. 25°2', long. 88°42'.

PUTNI. 1—A small river rising in the Saugor and Nerbudda territory, in lat. 23°40', long. 80°1', and taking a northerly course of eighteen miles, it crosses the northern frontier into Bundelcund, through which it flows first north-easterly and then north-westerly, and falls into the Cane on the left side, in lat. 24°20', long. 80°8', having a total course of about seventy miles.

PUTPURGUNJ, 1 in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a small town near the left bank of the Jumna, on the route from Allygurh to Delhi cantonment, and eight miles S.E. of the latter. It has a bazar, and is supplied with water from wells. Close to it was fought, in 1808, the engagement more generally styled the battle of Delhi, in which the British army under General Lake totally defeated the Mahrattas commanded by Bourquien, a French adventurer. Lat. 28°37', long. 77°21'.

PUTRA.—A town in the recently lapsed territory of Berar or Nagpoor, seven miles N.N.W. from the hill zeminbarry of Jeypoor, and 182 miles W. by S. from Ganjam. Lat. 19°17', long. 82°28'.

PUTRUHUT, 1 in the district of Sohawul, territory of Saugor and Nerbudda, a small town, with bazar, on route from Saugor, by Rewah, to Allahabad, 168 miles S.W. of the latter. It is situate on the right bank of the river Tons (South-eastern), here a great torrent, with channel 200 yards wide, and stream about sixty yards wide in the dry season, and crossed by ford. A ruinous fortress of fine and picturesque aspect, built on a limestone rock, formerly commanded the passage, but is now merely the residence of some humble relatives and domestics of the rajah. Lat. 24°34', long. 80°59'.

PUTSEEN.—A town in the British district of Rajeshaye, presidency of Bengal, 82 miles N.E. by E. of Rampore. Lat. 24°37', long. 89°5'.

PUTTACOTTE.—A town in the British district of Tanjore, presidency of Madras, 29 miles S.S.E. of Tanjore. Lat. 10°25', long. 79°21'.

PUTTA HAT.—A town in the British district of Bulloah, presidency of Bengal, 14 miles N.W. of Bulloah. Lat. 23°, long. 90°46'.
PUTTANAPARAM.—A town in the native state of Travancore, presidency of Madras, 43 miles N. by W. from Trivandrum, and 62 miles W.N.W. from Tinnevelly. Lat. 9° 6', long. 76° 55'.

PUTTARY,¹ in the territory of Rewah, province of Begbeldund, a small town on the old route² from Mirzapoor to the town of Rewah, and 35 miles S.W. of the former. It is described by an anonymous³ British traveller as "an immense collection of pigstyes huddled together in the greatest confusion." Lat. 24° 48', long. 82° 5'.

PUTTEEALA.—A native state in Sirhind, and within the jurisdiction of the commissioner and superintendent of the Cis-Sutlej states. It is the most important of those known as the Seik protected states, and the chief is regarded by his neighbours as the head of the Pholkean⁴ tribe. The original dimensions of the territory were extended by purchases made of additional dominions, on the dismemberment of the states of Bughat and Keyonthul, subsequently to the expulsion of the Ghookkas; and further extension more recently accrued from grants made by the British government, in reward of the fidelity displayed by the rajah during the war with Lahore. The area is returned at 4,448² square miles, and the population at 662,762 persons. The territory is among the most fertile in Sirhind, and exports great quantities of grain across the Sutlej to Lahore and Amritsar. By the manifesto issued by the British government on taking possession of Sirhind in 1809, the rajah is guaranteed the sovereignty within his own possession, and is bound to furnish a quota of troops in case of war. On one occasion, in 1812, an interference with the independence of the rajah became indispensable, in consequence of his frantic and ruinous extravagance; he having so misapplied his resources, that when called upon to supply troops for the public service, he could furnish no more than 200 horsemen of the worst description. At length his misconduct was considered to amount to insanity, and he was deposed,⁵ and placed under restraint.

In conferring the additional territory lately bestowed by the British government on the rajah of Putteeala, in reward of his fidelity during the Lahore war, it was stipulated that the rajah should renounce the right of levying transit-duties;⁶ should make and maintain in repair a military road, and abolish suties, infanticide, and slave-dealing within his dominions.
PUTTEEALA,¹ in Sirhind, the chief place in a native state of the same name. It is situate on the river, or rather torrent, Kosilla. This stream, known also by the name of the Puttreeala river, runs past the town in a very deep channel, yet has in time of inundation so large a volume of water, that a great embankment has been found necessary to preserve the walls from its destructive influence. It is a compact town, built of brick, neater³ and more cleanly that the generality in this part of India, and densely peopled. The citadel is small, and of no great strength: it is the residence of the rajah. Puttreeala is distant N.W. from Calcutta 1,024 miles. Lat. 30° 20', long. 76° 25'.

PUTTEEALEE,¹ in the British district of Furruckabad, the principal place of the pergunnah of the same name, a small town near the north-western frontier, towards the districts of Mynpoorie and Budson, and 44 miles N.W. of Futtehgurh. Here, in 1749, an engagement took place between Ahmed Khan, the Afghan nawaub of Furruckabad, and Safder Jang, nawaub of Oude and vizier of the empire of Delhi. "During² the hottest part of the engagement, there suddenly arose a sandstorm (common in those parts of India), which blew with violence directly in the faces of the Moguls, and the Afghans, improving this advantage, rushed on in the bosom of a thick cloud of dust, and charged their enemies with irresistible impetuosity. The vizier's troops being blinded by the sand, could neither judge of the number nor distinguish the attacks of their assailants; their panic was increased by the whirlwind and darkness which surrounded them, and in a few minutes they gave way, and fled with the utmost precipitation. All the vizier's artillery was taken, and his infantry cut off to a man. He himself escaped with difficulty." It is mentioned in the Ayeen Akbery³ under the name of Puttyaly, and its assessment stated at 46,940 rupees. Lat. 27° 41', long. 79° 4'.

PUTTEERAM.—A town in the British district of Dinaje- poor, presidency of Bengal, 21 miles S.S.E. of Dinajepoor. Lat. 25° 18', long. 86° 47'.

PUTTHRI, in the British district of Suharunpoor, lieutenant-governorship of the North-West Provinces, a river or large torrent, having its origin on the south-western declivity of the Khansrow Ghat or Pass through the Sewalik range,
and in lat. 30° 3', long. 78° 5'. It holds a course of about thirty miles in a direction generally southerly, and falls into the Banganga Nuddee, an offshoot of the Ganges, in lat. 29° 42', long. 78° 9'. In the upper part of its course, it flows down a bed of shingle and sand, but for the greater part is a shallow expanse of water with little current. This torrent is crossed by the Ganges Canal, by means of a dam thrown across the river, constructed with ten openings of ten feet each, and flank overfalls.

PUTTUN,\(^1\) or ANHULWAR PATTAN, in Guzerat, or the territory of the Guicowar, a town situate on the small river Saraswati, a tributary of the Banas. Here are extensive traces of the ancient city of Anhulwara:—"The eye\(^2\) can trace the course of the walls, which formed an irregular trapezium of perhaps five miles circuit, around which extended, chiefly to the east and south, the suburbs, to which there may have been an external circumvallation.” The wall inclosing the present city of Puttun is built half-way up with stones from the ancient city, whether from palaces, temples, or fountains; and these more solid foundations are surmounted by a comparatively flimsy rampart of brick. Here are some manufactures\(^3\) of importance, as of swords, spears, pottery of a very light fine kind, and weaving in silk and cotton. The population is estimated at 30,000. Distance from Ahmedabad N.W. 63 miles. Lat. 23° 46', long. 72° 3'.

PUTTUNCHERROO.—A town in the native state of Hyderabad, or territory of the Nizam, 21 miles N.W. by W. from Hyderabad, and 158 miles E. from Sholapoor. Lat. 17° 31', long. 78° 19'.

PUTTUN SOMNAUT.—See SOMNATH.

PUWYE.—A town in the Boondela state of Punnah, 32 miles S. by W. from Punnah, and 55 miles N.E. by E. from Dumoh. Lat. 24° 16', long. 80° 14'.

PYARU.—A village in the jaghire of Bulubghur, lieutenant-governorship of the North-West Provinces; distance S. from Delhi 30 miles. Lat. 28° 16', long. 77° 22'.

PYENA,\(^1\) in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small market-town on the left bank of the river Ghoghra. Buchanan\(^2\) states that it has 500 houses, which would assign it a population of...
about 3,000 persons. Distant S.E. from Goruckpore cantonment 45 miles. Lat. 29° 15', long. 83° 50'.

PYGA.—A town in the British district of Moradabad, lieutenant-governorship of the North-West Provinces. Lat. 29° 8', long. 78° 59'.

PYKHIA.—A town in the British district of Mergui, one of the Tenasserim provinces, presidency of Bengal, 80 miles N. by W. of Tenasserim. Lat. 18° 14', long. 98° 50'.

PYKOWLEE, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town on the route from Dinapore to Goruckpore cantonment, 125 miles N.W. of the former. It has a bazar, and supplies may be collected from the neighbouring country, which is level, well cultivated, and planted with mango-trees. The road in this part of the route is good. Lat. 26° 52', long. 88° 38'.

PYLADY.—A town in the British district of North Arcot, presidency of Madras, 38 miles N. by W. of Madras. Lat. 13° 38', long. 80° 17'.

PYLANEE, in the British district of Bandah, lieutenant-governorship of the North-West Provinces, a town on the route from Bandah to Lucknow, 23 miles N. by E. of the former. Lat. 25° 46', long. 80° 30'.

PYNG.—A town of Burmah, 19 miles W. from the right bank of the Irrawady river, and 149 miles S.W. from Ava. Lat. 20° 18', long. 94° 24'.

PYNGAWA,* in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Muttra to Ferozpoor, and 13 miles N.E. of the latter. It is situate a mile east of the Khanpoor Ghat, a pass through a range of low hills. The village has water from wells, and supplies are procurable. The road in this part of the route is good. Lat. 27° 54', long. 77° 10'.

SYSUNNEE.—A small river rising in Bundelcund, on the table-land surmounting the Punna range, and in lat. 24° 52', long. 80° 43'. It first flows north-east, and at Jorai is precipitated over the brow of the ridge by a cascade, the height of which is estimated by Jacquemont to exceed 300 feet. A few miles further on, it passes into the British district of Banda, through which it flows first north, subsequently north-east,

* The Pilungwa of Walker's Great Indian Atlas. 1

1 Garden, Tables of Routes, 268.
2 Voyages, iii. 409.
3 No. 50.
and falls into the Jumna on the right side, in lat. 26° 26', long. 81° 14'; its total length of course being eighty miles. It "is sacred among the Hindoos; and its cataract near Jorai, as well as its romantic course to the plains below, is exceedingly interesting."

PYTHEEA, in the district of Aldemau, territory of Oude, a village four miles S.W. of the right bank of the river Tons (North-eastern), 55 miles S.E. of the city of Oude. Butter estimates its population at 400, of whom 100 are Mussulmans. Lat. 26° 16', long. 82° 48'.

PYTIANI RIVER.—One of the mouths of the river Indus. It communicates with the Buggaur, the western branch of the Indus, in lat. 24° 36', long. 67° 21', and flows into the sea in lat. 24° 24', long. 67° 13'. Little difficulty would be experienced in entering the creek, it being better defined than most of the mouths of the Indus.

PYTÓN.—A town in the native state of Hyderabad or territory of the Nizam, situate on the left bank of the Godavery river, and 53 miles N.E. by E. from Ahmednuggur. Lat. 19° 29', long. 75° 28'.

Q.

QABUR SHAKWALA, in the British district of Blutteeana, lieutenant-governorship of the North-West Provinces, a town on the route from Mundate to Beekaneer, 71 miles S. by W. of the former. Lat. 29° 50', long. 74° 8'.

QUEDAH.—A native state on the Malay peninsula, occupying that portion of the mainland which lies opposite the British possession of Prince of Wales Island. Province Wellesley forms its western boundary. Quedah, the principal place, is in lat. 6°, long. 100° 30'.

In 1786 an agreement was entered into with the rajah of Quedah, under which Prince of Wales Island was ceded to the British, in consideration of an annual stipend of 6,000 Spanish dollars. In 1800 a further treaty was concluded with the rajah, under which Province Wellesley was transferred to the British, and the annual payment to the rajah increased to
10,000 dollars. In 1821 the king of Siam invaded Quedah, and expelled the rajah, but was induced, in 1842, upon the submission of the latter, to reinstate him in the most valuable portion of his former territory. At a subsequent date, the rajah of Quedah placed himself in a position of hostility towards the British, who visited his misconduct by withholding payment of his stipend. Upon its restoration, the arrears which had accumulated during the period of suspension were declared forfeited.

QUILON, in the native state of Travancore, presidency of Madras, a town on the seacoast, in a bight where ships may anchor under shelter, at about two and a half or three miles from the fort. A small British force is usually stationed here. "The ground, on which the cantonment stands, rises by a gentle ascent from the sea, and includes an area of nearly five miles in circumference." "There is no natural boundary between the military cantonment and the Travancore territory, but a broad road round the cantonment points out the line of demarcation." There is in the cantonment a barrack for European troops, formerly occupied by a company of foot-artillery, but for many years past untenanted, and now fast falling to decay: there is also a European hospital. The site of the cantonment is healthy, being in the highest part about forty feet above the sea. The soil is for the most part sandy; but within its limits is a considerable piece of swampy ground. Water is abundant and good. There is a jail here, under the charge of the Travancore authorities. The roads about the cantonment are of laterite, broken small, and are in excellent condition. With Trivandrum, the capital of Travancore, the communication is carried on almost entirely "by means of canals, dug parallel to the low sandy shore, and connecting the different lakes formed by the backwater." There is also a military road, adapted for wheeled carriages, which, however, is but little frequented, owing to the great facility of water communication, and which, in 1848, was represented as out of repair. Northwards, towards Allepi and Cochin, there are similar opportunities for communication by water; but horses and cattle can travel by an ill-formed sandy road along the beach. In a direction north-easterly, there is a line of communication with Tinnevelly by a pass through the mountains; but it is
QUO—RAC.

only an indifferent route, and is rather a footpath than a road. The vegetable productions of Quilon are timber, cocomanuts, coir or cocomanut-fibre, pepper, cardamoms, ginger, betelnuts, and coffee. The population is stated to be about 20,000. An Episcopal church was some years ago erected at this place. 

Distance from Trivandrum, N.W., 38 miles; Cananore, S.E., 225; Mangalore, S.E., 303; Bombay, S.E., 740; Bangalore, S.W., 290; Madras, S.W., 385. Lat. 8° 53', long. 76° 39'.

QUOMOROODENUGGUR, in the British district of Delhi, lieutenant-governorship of the North-West Provinces, a village on the route from Rohtuk to the city of Delhi, and 11 miles W. of the latter. The road in this part of the route is good. Lat. 28° 40', long. 77° 6'.

RAAT, in the British district of Humeerpore, the principal place of the pergunnah of the same name, a small town on the route from Jubulpoor by Kitha to Calpee, 46 miles S. of the latter. It has a bazar, and supplies and water are abundant. Davidsonstyles it "a populous and busy village," though a short time before his arrival the corpses of seventy of the inhabitants had been burned, in consequence of dreadful mortality, caused by malaria, resulting from the numerous swamps, tanks, and the rank vegetation with which the place is surrounded. Raat contains a population of 8,616 inhabitants. Lat. 25° 36', long. 79° 38'.

RACHERRY.—A town in the native state of Hyderabad, or territory of the Nizam, 19 miles from the left bank of the Godavery river, and 158 miles N.E. from Hyderabad. Lat. 18° 59', long. 80° 13'.

RACHOL.—A town in the Portuguese state of Goa, situate 14 miles S.S.E. from Goa. Lat. 15° 19', long. 74° 4'.

RACHOOTEE, in the British district of Cuddapat, presidency of Madras, a town situate on the Mundaveer or Chittair, a small stream tributary to the river Northern Pennair or Pennaur. It is the principal place of a subdivision of the

* Rahat of Franklin.
RAC—RAD.

same name. Distance from the town of Cuddapah, S., 30 miles; Nellore, S.W., 86; Madras, N.W., 123. Lat. 14° 3', long. 78° 49'.

RACHUR.—A town in the British district of Guntoor, presidency of Madras, 29 miles S.E. by E. of Guntoor. Lat. 16° 3', long. 80° 50'.

RACKEE, in the Sinde Sagur Dooab division of the Punjab, a town situated on the left bank of the Swan river, 54 miles S.S.E. of the town of Attock. Lat. 33° 15', long. 72° 48'.

RACKLING.—A town in the native state of Sikhim, 19 miles N. from Darjeeling, and 116 miles N.N.E. from Purneah. Lat. 27° 18', long. 88° 22'.

RADHUNPOOR, a petty state in the north-western quarter of Guzerat, including the pergunnahs of Moorjpoor and Summee. It lies between lat. 23° 26' and 23° 58', and long. 71° 28' and 72° 3'; and is bounded on the north by Therwarra; on the south by Mundall and Juroowarra; on the east by the Puttun district; and on the west by that of Warye. Its dimensions are about forty miles by twenty.

During the months of April, May, June, and July, the heat is excessive; in August and September, if rain falls, the weather is agreeable; October and November are again hot; but from December until the return of the heat in April, the climate is delightful. There are three descriptions of soil—sandy, black, and saline. The chief products are wheat, cotton, and all the common grains. Salt is both manufactured and self-produced. The British government rent the Unwerpoora salt-pans of the nawab, at the annual sum of 11,048 rupees.

The district is traversed by the Bunnaa river, and by the minor streams of the Surruswutti and Roopan. One of the great roads from Hindostan and Palee to the Mundavie Bunder, in Cutch, passes through Radhunpoor. The population, principally Hindu, consists of about 45,000 souls. Radhunpoor is not tributary either to the British or any other government, but pays black mail to the surrounding Coolie districts. A police force, consisting of 235 sowars and 320 foot-men, is kept up by the state, and detachments are spread about in the different villages for their protection. In case of foreign invasion, the state is entirely dependent on the British government. The first connection of that government with
RADHUNPOOR.

Radhunpoor was in 1818, in which year Captain Carnac, then Resident at Baroda, concluded an engagement between the nawab and the Guicowar, by which the Guicowar state was empowered, under the advice and mediation of the British government, to control the external relations of Radhunpoor, and to assist the nawab with forces in defending it from foreign invasion, but excluded from any interference in the internal affairs of the country. During the five following years, the Kosas and other marauders having greatly infested the north-west part of Guzerat, and more particularly this petty state, the nawab voluntarily solicited the aid of the British government to expel them, and offered to pay a share of the expenses of the war. The required aid was afforded. In 1819, Colonel Barclay marched with a force and expelled the freebooters from all parts of Guzerat; and an agreement was negotiated with the nawab of Radhunpoor, by which he consented to pay a yearly tribute to the British government, leaving the actual amount to be subsequently decided. In 1822 the tribute was fixed at 17,000 rupees per annum for five years, after which it was to be left to the British government to increase the amount or not. The engagement continued in force until the year 1825, when the home authorities, considering the state unable to bear the amount of tribute imposed, it was, by the order of the Bombay government, remitted in full in the month of July of that year.

The Radhunpoor state is under the management of the British agent at Pahlunpoor, who controls its relations with the neighbouring states, but avoids all interference in its internal affairs. It has enjoyed perfect tranquillity since its connection with the British government in 1819.

The first person of the reigning family of which there is any record is Sheer Khan Babee, who was thannadar of Chowal in 1663. His grandson, Mahomed Khan Jehan, was the first of the family appointed as foujdar of Radhunpoor, in 1715. He left two sons, Kumaboodun and Mahomed Unwar. A few days after their father's death, Moobarigul Moolk, then souabahdar of Guzerat, gave the pergunning of Summee and Moorjoor to the eldest, with the title of Jowan Murd Khan, and appointed the second foujdar of Radhunpoor. In 1765, Jowan Murd Khan died, and was succeeded by his eldest son,
BAD-RAE.

Gazeeoddeen, in the pergunnahs of Summee and Moorjpoor, his second son succeeding to that of Radhunpoor. In 1787, the latter died childless. In 1813, Gazeeoddeen died, leaving two sons, Sheer Khan and Kumaloodeen Khan. The former succeeded to the Radhunpoor pergunnah, and the latter to those of Summee and Moorjpoor. In 1814, the latter dying without issue, Sheer Khan succeeded to the nawaubship of the three pergunnahs. Sheer Khan died in 1825, and with the unanimous consent of the people was succeeded by the present chief, Zoorawar Khan, an only son, by a slave-girl. But Zoorawar being at this time only three years of age, Sirdar Bebee, the second wife of the late chief, was appointed regent during his minority. In 1837, he was intrusted with the management of his own affairs. He is now about thirty-two years of age, and has a son, heir-apparent to the chieftainship.

RADHUNPOOR,1 in Guzerat, or territory of the Guicowar, a town on the route from Ahmedabad to Hydrabad, in Scinde, 85 miles direct N.W. of former, 270 S.E. of latter. Though a considerable and fortified town, and not devoid of trade and manufactures, the majority of its population are cultivators, principally Rajpoota and Coolies. Its principal exports are butter, hides, and grain, and coarse cotton cloths the local manufacture. The chief, styled nawaub of Radhunpoor, is a Mussulman, of the influential family of Babi, and has an annual income of 1,60,000 rupees. He acknowledges fealty to the Guicowar, by annually presenting to him a horse and clothes. His military establishment consists of sixty horse and 660 infantry. Population 16,000. Lat. 23° 29', long. 71° 30'.

RAEEBAG.—A town in the British district of Belgaum, presidency of Bombay, 48 miles N.N.E. of Belgaum. Lat. 16° 29', long. 74° 50'.

RAEEOURH,1 in the British collectorate of Tannah, presidency of Bombay, a fort situate amidst the Northern Ghats. During the last campaign against the Peishwa, it was regarded as one of the strongest fortresses in India, and, in fact, "as impregnable as Gibraltar." It was invested by a British force under Colonel Prother, in April, 1818, and surrendered after a bombardment of fourteen days, by which every building, except one granary, was reduced to ashes. Raeegurh, originally

5 Blacker, Mem. of War in India, 315.
denominated Rairi, in 1648 fell into the hands of Sevajee, who changed its name to Raeeegurh, and made it his capital. In 1690 it was taken by the forces of Aurungzebe, and having reverted to the Mahrattas during the decadence of the Mahometan empire, was finally taken by the British forces, as already stated. Rairi, as this fort was originally called, must not be confounded with another place of the same name in Sawuntwarree, on the coast of the South Concan. Raeeegurh is distant S.E. from Bombay 65 miles, S.W. from Poona 32, N.W. from Sattara 52. Lat. 18° 14', long. 73° 30'.

RAEEN.—One of the Cis-Sutluj hill states. It is bounded on the north, east, and south by the native state of Bussahir, and on the west by Turroch and Bussahir. It extends from lat. 31° 2'—31° 12', and from long. 77° 47'—77° 57', and is twelve miles in length from north to south, and five in breadth.

RAEEPOOR, in the British district of Minpooree, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Algyghur to that of Minpooree, and 55 miles S.E. of the former. The road in this part of the route is bad; the country is level and partly cultivated, partly overrun with jungle. Lat. 27° 39', long. 78° 54'.

RAEEPOOR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 16 miles S.W. of the former. The road in this part of the route is bad, the country partially cultivated. Lat. 26° 25', long. 80° 12'.

RAEGANJ, in the British district of Dinajepore, presidency of Bengal, a town on the west boundary, towards the British district Purnea, on the left or east bank of the river Kooluk. It is the principal mart in the district, and nearly engrosses the traffic of an extent of rich country about seventy miles in length and twenty in breadth. Rich merchants have numerous stores here, consisting of large yards, inclosed by fences of straw hurdles or mats, and containing many huts and sheds filled with wares. The streets of the town are narrow, irregular, and filthy, "but it is a place of great stir, and crowded with boatmen and drivers of cattle." It is said "that, on an average for eight months in the year, 5,000 loaded
oxen arrive each day.” It contains about 1,000 houses, a number which, according to the usually received ratio of inmates to dwellings, would assign it a population of about 5,000. Distant W. from the town of Dinajepoor 32 miles; N.W. from Calcutta, by Dinajepoor, 292. Lat. 25° 40’, long. 88° 8’.

RAEKOTE,1 in Sirhind, a town situate thirty miles from the left bank of the Sutlej. It belongs to the petty chief of a territory having an area2 of six square miles, with about 800 inhabitants. It is under the protection and control of the British. The town is distant N.W. of Calcutta, by Delhi and Hansee, 1,130 miles.3 Lat. 80° 40’, long. 75° 39’.

RAEPOOR.—A town in the Rajpoot state of Oodeypoor, 61 miles N.N.E. from Oodeypoor, and 82 miles S.S.W. from Ajmeer. Lat. 25° 26’, long. 74° 9’.

RAEPOOR, in the British district of Allygurb, lieutenant-governorship of the North-West Provinces, a village on the route from Futtetghur to Meerut, and 106 miles N.W. of the former, is situate near the left bank of the Kalee Nuddee (East), in an open country but partially cultivated. The road in this part of the route is good. Lat. 28° 5’, long. 78° 17’.

RAGAVAPOORAM.—A town in the British district of Masulipatam, presidency of Madras, 68 miles N. by W. of Masulipatam. Lat. 17° 8’, long. 80° 59’.

RAGOOGHUR,1* in the territory of Gwalior, or possessions of Scindia, a town on the route from Goona to Mow, 16 miles S.W. of former, 169 N.E. of latter. This, which is represented to be a considerable place, is situate on a feeder of the river Parbuttee. It has a bazar and a fort, which, though now much dilapidated, was in the early part of the present century so strong as for a considerable time to baffle the disciplined army of Doulut Rao Scindia. It was founded2 in the time of Shahjehan, who reigned from 1628 to 1658, by Lal Singh, a Rajpoot chief; and after the rest of Malwa had been subjugated by the Maharattas, his successors long resisted, until Dhokul Singh was, in A.D. 1821, finally defeated by the contingent force of Gwalior, commanded by British officers. By the mediation of the British authorities, he was allowed to retain6 Ragooghr, with an estate of 55,000 rupees, on con-

dition that some retainers of the family should be always in the
service of the maharajah of Gwalior. Distant N.E. of Oojain
130 miles, S. of Agra 200. Lat. 24° 30', long. 77° 17'.

RAGOONAUTHPOOR, in the territory of Gwalior, or
possessions of Scindia's family, a town 77 miles W. of Gwalior,
neat the south or right bank of the river Chumbul. Lat.
26° 4', long. 76° 56'.

RAHA.—A town in the British district of Nowgong, in
Upper Assam, presidency of Bengal, 20 miles S.W. by W. of
Nowgong. Lat. 26° 12', long. 92° 31'.

RAHATAH.—A town in the British district of Ahmed-
nuggur, presidency of Bombay, 47 miles N.N.W. of Ahmed-
nuggur. Lat. 19° 42', long. 74° 30'.

RAHINDINPOOR.—See RADHUNPOOR.

RAHINPUB, in the British district of Allahabad, lieu-
tenant-governorship of the North-West Provinces, a village on
the route from the cantonment of Allahabad to Jounpore, and
eight miles N.E. of the former. The road in this part of the
route is good; the country fertile, well cultivated, and studded
with villages. Lat. 25° 28', long. 82°.

RAHLAI, in the British district of Agra, lieutenant-
governorship of the North-West Provinces, a town on the
southern frontier, towards the territory of Dholpoor, 17 miles
S. of the city of Agra. Lat. 26° 56', long. 78° 6'.

RAHM GHUR, in the Rajpoot state of Jeypoor, a village,
with fort, on the route from Agra to Ajineer, 72 miles W. of
former, 156 E. of latter. The fort "is built of stone, with six
round towers, perched on a steep eminence, with a double
embattled wall stretching down one side to a wall at its foot."
Lat. 27° 3', long. 76° 58'.

RAHOOREE.—A town in the British district of Ahmed-
nuggur, presidency of Bombay, 21 miles N.N.W. of Ahmed-
nuggur. Lat. 19° 23', long. 74° 40'.

RAHUN, in the Rajpoot state of Jodhpooor, a town on the
route from Nusserabad to Nagor, and 57 miles N.W. of the
former. It has a large bazar: water is obtained from a tank
and fifty wells. The road in this part of the route is good,
and passes over an immense plain, covered with scanty bush-
jungle. Lat. 26° 46', long. 74° 8'.

RAHYGAWUW.—A town in the native state of Nepal,
RAI.

situate on the right bank of the Bhyroee river, and 21 miles S. by W. from Jemlah. Lat. 29°, long. 81° 37'.

RAICHAO.—A town in the Rajpoot state of Jhalawar, eight miles S.E. from Jhalra Patun, and 89 miles E. from Neemuch. Lat. 24° 27', long. 76° 20'.

RAICHOOR.—A town in one of the recently sequestrated districts of the native state of Hyderabad, 111 miles S.W. by S. from Hyderabad. Lat. 16° 10', long. 77° 24'.

RAIDEE.—A town in the British district of Chota Nagpoo, presidency of Bengal, 41 miles S.W. by S. of Lohadugga. Lat. 22° 55', long. 84° 28'.

RAIDROOG.—A town in the British district of Bellary, presidency of Madras, 31 miles S. of Bellary. Lat. 14° 41', long. 76° 55'.

RAINGURH.¹—A fort surrounded by a small district, inclosed by the territory of Bussahir. It is situate on the left bank of the Pabur, and at the time of the expulsion of the Goorkhas in 1815, consisted of a rampart surrounding a small peak, and having rude houses for the accommodation of the garrison. Jacquemont² describes it, at the time of his visit, in 1830, as forty yards long and twenty broad, with a weak rampart about twenty feet high, along the inside of which were ranged the lodgings of the garrison, no better than dog-holes. It is commanded from various points even by musketry, and has no regular supply of water, as the Pabur runs below, at the perpendicular depth of 476 feet.³ The Goorkha garrison, which surrendered to the British, was supplied from tanks, sufficing for about a month's consumption. The Pabur, at about a musket-shot below the fort, is crossed by a sanga or wooden bridge, forty yards long. The river, in that part deep, meanders through a level tract about 200 yards wide, fertile, and bearing fine crops of rice, wheat, and opium poppies. It is one of the most delightful spots amidst the Himalayas, and is held by a small community of Brahmins, who have charge of two temples built in the Chinese style. Hindostanee is spoken in considerable purity, and the inhabitants in easy circumstances resemble in make, complexion, and countenance, the Hindoos of the plains; while the labouring classes differ nothing from the ordinary mountaineers.

Raingurh belonged to Bussahir⁴ previously to the invasion

¹ E.I.C. Trigon. Surv. ² E.I.C. Ms. Doc. Fraser, Tour in Himalaya, 243, 244. ³ Jacquemont, ut supra, 140. ⁴ Fraser, ut supra, 343.
of the Goorkhas, by whose garrison, on the 10th June, 1815, it was surrendered to the British. In the subsequent settlement of the hill states, it was reserved, with a small surrounding district about five miles long and three miles wide, but at a later period was transferred to the chief of Keonthul, in exchange for territory now forming part of Simla. Distant N.W. from Calcutta by Kurnaul 1,075 miles. Elevation of the fort above the level of the sea, 5,408 feet; of the bed of the Pabur below the fort, 4,932 feet. Lat. 31° 7', long. 77° 48'.

RAIPOOR, in the British district of Calpee, lieutenant-governorship of the North-West Provinces, a town on the route from Calpee to Etawah, 16 miles N.W. of Calpee. Lat. 26° 17', long. 79° 36'.

RAIPOOR, in the British district of Suharunpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Suharunpoor to Sirmoor, 20 miles N. of the former. Lat. 30° 16', long. 77° 40'.

RAIPORE.—See RAJAPORE.

RAIREE.—A river of Jodhpour, rising on the confines of Mairwara, in lat. 25° 55', long. 74° 4', and, flowing in a westerly direction for eighty-eight miles, falls into the Loonee river, in lat. 25° 64', long. 72° 61'.

RAIREE, on the coast of Runagherry, in the south Concan, presidency of Bombay, a fort on a rocky eminence at the mouth of a small river, navigable for boats of considerable size. It was built in 1662, by Sevajee; subsequently passed into the hands of the rulers of Sawuntwarree; and, becoming a stronghold of the pirates sent out by that state, was in A.D. 1765 taken by a British force, but restored in the following year. By virtue of a treaty concluded in 1819, it passed back to the English; and their possession was confirmed by another treaty concluded in 1820. This place is also called Yeswuntgurh. Distant S. from Bombay 225 miles. Lat. 16° 45', long. 73° 44'.

RAISEEN, in Malwa, a strong fort in territory of Bhopal, 23 miles N.E. of the town of Bhopal, in an elevated tract, a peak in its vicinity rising to the height of 2,500 feet. The fort is on the route from Hoshungabad to Saugar, 50
RAI—RAJ.

miles\(^3\) N. of former, 87 S.W. of latter. It is built at the eastern extremity of a sandstone hill, and on the most elevated part of it. "It is very conspicuous\(^4\) for many miles around, and said to have been built by the celebrated king (Rama) of Ayodha, as a place of refuge from the temporary anger of his brother (Bharata); and that the hill arose at his desire." According to this tradition, probably conveying some truth mixed with fable, the era of its foundation was about\(^*\) 775 years before Christ. Though little noticed of late years, it was formerly of importance; and when, in 1543, it was besieged by Shir Shah, Padshah of Delhi, and one of the most powerful and martial princes who ever ruled Hindostan, the siege was protracted for a length of time. When the place at length capitulated,\(^5\) on condition that the Hindoo garrison should be allowed to march out unmolested with their arms and property, Shir Shah commanded his troops to attack them, and after a desperate resistance they were slaughtered to a man. On the dismemberment of the empire, towards the middle of the eighteenth century, the fort was, with the adjacent country, seized by the Mahrattas, from whom it was wrested,\(^6\) about A.D. 1748, by the nawaub of Bhopal. At this place, in 1818, was negotiated the treaty\(^7\) between the British government and the nawaub. Distant E. from Oojein 126 miles, S. from Gwalior 202, S. from Agra 260, S.W. from Allahabad 290, N.W. from Nagpoor 170. Lat. 28° 22', long. 77° 56'.

RAITPOOR,\(^1\) in the British district of Aligurh, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Aligurh to that of Muttra, and 20 miles\(^2\) S.W. of the former. The road in this part of the route is heavy, and bad for carriages; the country open, with a sandy soil, partially cultivated. Lat. 27° 38', long. 78° 1'.

RAJABETA.—A town in the British district of Beerbhoon, presidency of Bengal, 159 miles N.W. of Calcutta. Lat. 24° 8', long. 86° 40'.

RAJAHAT.—A town in the British district of Twenty-four Pergunnahs, presidency of Bengal, 19 miles S.S.W. of Calcutta. Lat. 22° 20', long. 85° 20'.

RAJAH BELL, in the Daman division of the Punjab, a

town situated on the right bank of the Indus, 123 miles S.S.W. of the town of Peshawar. Lat. 32° 14', long. 71° 11'.

RAJAHMUNDOOOG.—A town in the British district of North Canara, presidency of Madras, 15 miles N.N.W. of Honahwar. Lat. 14° 31', long. 74° 26'.

RAJAHMUNDRY.¹—A British district named from its principal place, and forming part of the territories subject to the presidency of Madras. It is bounded on the north by Orissa; on the north-east by the district of Vizagapatam; on the south-east by the Bay of Bengal; on the west by the British district of Masulipatam; and on the north-west by the territory of the Nizam. It lies between lat. 16° 18'—17° 36', long. 81° 7'—82° 40', and has an area of 6,050² square miles. The seacoast, commencing at the outlet from the Lake of Colair, proceeds eastwards for ten miles to Point Narasipore, at the mouth of the Narasipore river, or southern branch of the Godavery. In this estuary ships of small draught may find shelter, as there are eight or nine feet of water on the bar, and three, four, or five fathoms inside; but ships of considerable burthen cannot be brought nearer to the shore than four or five miles, in consequence of shoals extending out to sea. From Narasipore Point the coast of this district extends in a direction north-east, along the seaward face of the delta of the Godavery, a distance of fifty-seven miles, to Point Gordeware, a low narrow sand-bank, extending north and south several miles, on the west side of which is the estuary of the great northern branch of the Godavery. Opposite to this are several shoals and low islands, caused probably by the accumulation of silt, swept down by that vast torrent. About seven miles north-west of Point Gordeware is the estuary of another and smaller branch of the same river, generally called Coringa river, from the town of Coringa, situated on its bank. This admits vessels of moderate burthen, having twelve or fourteen feet of water on the bar at spring tides. On Hope Island, a small sand-bank above water, about five miles eastward of the mouth of the Coringa river, is a lighthouse for the guidance of shipping on this intricate and shoaly coast, which is so low, that the sea has, in violent storms, extensively overflowed and devastated the land. A little north of Hope Island, and the shoals lying about it, the coast becomes bolder and
RAJAHMUNDRY.

more free from dangers, so that large ships can approach within two or three miles of it; and it continues to be of the same nature for thirty-seven miles, to Yamawaram, at the north-eastern extremity of the district; its direction during that distance being nearly north-east. The northern and north-western part of the district is hilly; the ground there participating of the character of the Eastern Ghats, situate farther west. The geological formation of those hills is granite,\(^4\) intermixed with gneiss\(^6\) and amygdaloidal trap, and kunkur or calcareous tufa, with a scanty admixture of fine porcelain clay. East of those hills of primitive formation, are others less elevated, and of alluvial formation, principally sandstone,\(^6\) containing valuable deposits of iron-ore.\(^7\) In the bed of the Godavery are abundance of fragments of chalcedony, cornelians, agates, quartz, and crystals.

Towards the coast, the country for the most part is alluvial, fertile, level, and low, and in the rainy season extensively inundated. The only considerable river is the Godavery, which enters the district at the northern frontier, in lat. 17° 29', long. 81° 34', and holds a course, generally southerly, through the gorges of the Eastern Ghats for twenty-five miles, to Poorasotputnum, where it passes into the plain, through which it continues to hold a southerly course, slightly inclining to east, for twenty miles, to the town of Rajahmundry; about four miles below which it diverges into two branches, the right flowing first southerly for thirty-two miles, subsequently south-westerly for thirteen miles, to Point Narsipore, where it falls into the Bay of Bengal; the other, or left branch, taking a course south-east and subsequently east for fifty-two miles, falls into the same bay three or four miles south-east of Coringa. The total length of the river's course through this district, measured along the main line and continued by either branch to the sea, is about 100 miles; but if the two branches be included in the measurement (and each during a considerable portion of the year has a large volume of water), the total length of fertilizing stream must be nearly 160 miles. During the greater part of the year, it is navigable\(^8\) for boats in all parts within this district, and large quantities of teak timber are floated down it to the sea. The deltas between the two branches are "known\(^9\) to be the richest and most fertile landscapes in the peninsula."

RAJAHMUNDRY.

Formerly this enormous torrent during the dry season "dwindled to a small stream, generally fordable;" but since the construction of a dam or annicut across the river at the head of the delta, a never-failing supply of water, previously allowed to flow in useless abundance to the sea, is retained for purposes of irrigation. Numerous small islands or lunkas, as they are vernacularly called, are formed it its course by the deposits of silt; and as they are very fertile, and consequently valuable, their formation is assisted by the proprietors of adjacent lands, who plant in the bed of the river a species of long grass, which, shooting up with great strength and luxuriance, obstructs the sand and mud in their progress downwards, until in successive years they form islands of considerable area, and especially desirable, in consequence of being suitable for producing tobacco (the most lucrative crop) in the highest perfection. During spring and the early part of summer, the climate is very hot; but it does not appear that any exact register of the temperature has been made public. The wind during that period is either westerly or south-westerly, and sweeps along great quantities of very fine white sand, rendering the season very disagreeable and oppressive. The south-west monsoon succeeds, and the river becomes swollen from the rains which fall in the more elevated region west of the Eastern Ghats. In October the north-east monsoon sets in, and from that time until March, the climate is peculiarly healthy in the plains; but throughout the year a deadly malaria broods in the jungly valleys and gorges in the hills in the northern and north-western part of the district.

Of the zoology of the country little has been made public; but it comprehends hyænas, jackals, foxes, antelopes, and hares. The deep jungly valleys of the mountains in the west and north of the district must harbour great numbers of wild beasts, but the pestilential air of those secluded tracts renders it impracticable to explore them. Of domestic animals, sheep, which are numerous, are of small size, but the mutton is good; kine are abundant, but their flesh is indifferent; poultry of all kinds are very plentiful.

The soil in the plain is generally a rich alluvial deposit, and along the banks of the river is the fertile dark-coloured earth known by the name of the black cotton ground. The principal
RAJAHMUNDRY.

Alimentary crops are rice, maize, millet, pulse of various kinds, oil-seeds, and sugarcane. Many European vegetables succeed during the cool season. Of commercial crops, the principal are tobacco, indigo, and cotton. The cocoanut-palm and palmyra-palm grow well in the sandy soil along the seashore. The quantity of cotton produced in one year, according to official return, was 4,150,000 pounds.

The population is returned at 1,012,086; an amount which, compared with the area, indicates a relative density of 167 to the square mile. The great majority are Brahmins. Of Musalmans, now a small body, the number must formerly have been considerable, as there are many mosques in Rajahmundry and other places. Serious disturbances have occurred from time to time in the hill districts of this collectorate, but by the adoption of conciliatory measures, peace and good order appear to have been re-established.

Rajahmundry, the principal place, Samulkotta, and Corins, the only towns of importance, are described under their respective names in the alphabetical arrangement.

The principal routes are—1. From north-east to south-west, from Calcutta, through Vizagapatam and Rajahmundry, to Ellore; 2. from east to west, from Samulkotta, through Rajahmundry, to Hyderabad; 3. from south to north, from Rajahmundry to Nagpore.

Rajahmundry is one of the five Norethern Circars which were obtained by the French in 1753, and transferred in 1759, by the results of war, to the British, to whom their possession was confirmed in 1765, by the emperor of Delhi.

RAJAHMUNDRY.¹ The principal place of the British district of the same name, presidency of Madras. It is situate on ground² slightly elevated, on the left or north bank of the river Godavery, here a mile broad, and during inundations having a vast body of water, which fills the channel from bank to bank, and sweeps along in its course from the upper country rafts³ of wood, trees, and herds of cattle. The town consists of one principal street, about half a mile in length from north to south, and containing the chief bazar. The houses on each side are generally of one story, built of mud and tiled. From the principal street are several narrow lanes, running east and west. Those to the west proceed to the bank of the
RAJ.

river in an oblique direction, and consist of mean houses, built of mud and tiled, and containing in some few places a larger description of dwelling with upper stories; and in those reside the zemindars or landholders of the vicinity, and some are inhabited by wealthy traders, principally Brahmans. The streets on the east side of the bazar are narrow and very irregular, and inhabited by people of various denominations, but principally Gentoos. The fort, situate north of the town, has a square ground-plan, with high walls of mud, and a ditch now partially filled up. It contains the barracks, hospital, jail, magazine, and the lines of the garrison. The jail is very substantially built and fire-proof, there being no wood in its construction except for the doors and windows, and is capable of containing 400 persons. Within the fort are also the court-house and lodges for European officers. The inhabitants are supplied from the river with water for drinking and for culinary purposes, as that of the wells is brackish, and the tanks are an imperfect resource, as they sometimes become dry. The population is estimated at from 15,000 to 20,000; of whom the Mussulmans form but a small and indigent class, though numerous mosques, still to be seen, indicate them to have been formerly numerous and wealthy. Distance from Ellore, N.E., 50 miles; Madras, N.E., 285; Calcutta, S.W., 580. Lat. 17°, long. 81° 50′.

RAJAHPOLLIAM.—A town in the British district of Tinnevelly, presidency of Madras, 51 miles N.N.W. of Tinnevelly. Lat. 9° 27′, long. 77° 31′.

RAJAHPOOR.—A town in the native state of Oude, situate on the right bank of the Ghogra river, and 50 miles N.N.E. from Lucknow. Lat. 27° 30′, long. 81° 20′.

RAJAKHAIRA,¹ in the territory of Dholpoor, a town, the principal place of a small district of the same name. The rana or prince of Gohud, having by treaty, in 1804, ceded² the fort of Gohud, with the districts dependent on it, to the East-India Company, was granted³ the small district of Rajakhaira, with that of Baree and Dholpoor; and these now form the raj or territory held by the rana of Dholpoor. Rajakhaira is 23 miles N.E. of the town of Dholpoor, 20 S.E. of Agra. Lat. 28° 55′, long. 78° 15′.

RAJAM.—A town in the British district of Visagapatam,
presidency of Madras, 58 miles N.N.E. of Vizagapatam. Lat. 18° 27', long. 83° 44'.

RAJAORI, or RAJAWUR,¹ in the north of the Punjab, a town situate on the banks of a stream, which, rising in the Pir Panjgal, or mountain bounding Cashmire on the south, falls into the Chenaub. The houses are generally built of mud, strengthened with frames of timber, but a few of those of the wealthier classes are of brick. Elevation above the sea 2,800 feet.² Lat. 33° 19', long. 74° 21'.

RAJAPOOR.—A town on the coast of Bombay, in the district of Jinniera, or territory of the Hubsies, situate on the northern point of land forming the entrance of the harbour of Rajapoor. Lat. 18° 18', long. 73° 3'.—See also JINNEERA.

RAJAPOOR.—A town in the British district of Ruttnergeriah, presidency of Bombay, 30 miles S.E. by S. of Ruttnergeriah. Lat. 16° 39', long. 73° 35'.

RAJAPOOR,¹ in the British district of Banda, lieutenan- governorship of the North-West Provinces, a small town, with bazar, on the route from Allahabad cantonment to that of Banda, 15 miles² W. of the former, 60 E. of the latter. Here is a ferry across the Jumna, the bed of which is sandy, and about 800 yards wide, with the left bank sloping, the right steep. In the dry season the stream occupies about half the bed. Lat. 25° 24', long. 81° 14'.

RAJAPORE,¹ in the British district of Goruckpore, lieutenan- governorship of the North-West Provinces, a small town on the left bank of the Ghogra, at the confluence of the Raptee. It contains, according to Buchanan,² 150 houses, or rather huts. Distant S.E. from Goruckpore cantonment 35 miles. Lat. 26° 14', long. 83° 48'.

RAJARAMPORE.—A town in the British district of Dinajpore, presidency of Bengal, five miles N.E. of Dinajpore. Lat. 25° 36', long. 88° 41'.

RAJAURA, in the British district of Agra, lieutenan- governorship of the North-West Provinces, a town on the right bank of the Jumna, immediately below the embouchure of the Baun Ootunghun, and 32 miles S.E. of the city of Agra. Lat. 26° 58', long. 76° 32'.

RAJBARREE.—A town in the British district of Cuttack,

RAJ.

presidency of Bengal, 55 miles E.N.E. of Cuttack. Lat. 20° 42′, long. 86° 44′.

RAJEAKA, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village on the route from Narnol to Rewaree, and six miles S.W. of the latter. Lat. 28° 8′, long. 76° 35′.

RAJEHPOOR, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a village on the route from Calpee to Futtugurg, and nine miles S. of the latter. The road in this part of the route is good, the country well wooded and cultivated. Lat. 27° 14′, long. 79° 42′.

RAJEPORAH, in Sirhind, a town on the route from Umballa to Loodiana, and 13 miles N.W. of the former place. It has grown up about a palace built by one of the Mogul emperors, and hence its name.* The wall inclosing this relic of former greatness is still in good preservation. Opposite to it is the town, surrounded by a high brick wall, with only one entrance, and near it a large caravanserai, with numerous turrets and bastions, and opposite its gateway a massive round tower, built of brick. It is at present employed as a prison for convicts sentenced to work on the roads. There is a bazaar in the town, which is well supplied with water; and the surrounding country, level and fertile, affords abundant supplies. Rajepoorah is distant N.W. from Calcutta 1,033 miles. Lat. 30° 29′, long. 76° 41′.

RAJESHAYE, a British district within the presidency of Bengal, is bounded on the north by the British district of Dinajpore; on the north-east by the British district Bagora or Bogra; on the east and south-east by the British district Pubna; on the south by the Podda or Ganges, dividing it from the British district Nuddea; on the south-west by the same stream, dividing it from the British district Moorshedabad; and on the west by the British district Maldah. It lies between lat. 24° 6′ — 24° 58′, long. 88° 18′ — 89° 20′; is sixty-two miles in length from east to west, and fifty in breadth. The area, according to official statement, is 2,084 square miles. According to a recent publication, "To the westward the country is hilly, and overrun to a comparatively large extent with grass-jungle. The hills go off to the west and north: there is no regular range of

* From Raja, "king," and Pura, "house."
RAJESHAYE.

them, but an almost unconnected scattering of them dots the country where they abound. The other parts of the district are flat table-land, where there is chiefly a rich cultivation." It is a very moist tract, having numerous rivers streaming from the Himalaya, situate north of it. The Ganges, called in this part of its course the Podda, touches on the district at the south-west side, at Burgatchee, in lat. 24° 26', long. 88° 20', and, holding a course south-east along the south-western frontier for sixty-five miles, passes away from it at Belmorea, at the south-east corner, in lat. 24° 10', long. 88° 59'. The Mahanunda, flowing from the north, touches on this district at Rohunpur, and, continuing its southerly course, falls into the Ganges at Godagari. The other principal rivers traversing the district are the Attree, the Jubuna, the Nagor, the Burrul, and the Narrud, receiving the united drainage of the jhils or swampy lakes of Maunda, Dulabari, and Chilum. During the periodical inundations, the district is intersected by numerous other watercourses, the channels of which are dry for the greater part of the year. Many of those watercourses stagnating, give rise to swamps or jhils, of which that of Chilum is the largest, extending during the rains, in a direction from south-east to north-west, about twenty-five miles, with an average breadth of about five, one-half being comprised within this district, the other half within the neighbouring district of Pubna. Two others, the jhil of Dulabari and that of Maunda, are each about eight miles in length and three in breadth, and others of inferior dimensions are numerous; and there are also some tanks, or artificial pieces of water, of considerable dimensions.

"The year may be said to be divided into three seasons. The hot season is from March to May, during which the thermometer ranges from 80° to 100°. In June the regular rainy season commences, and continues till the end of September. During this period the rain falls with little intermission for several days, seldom followed by many days of fair weather. Cool winds prevail from October till February."

Of wild animals, there are the tiger, leopard, deer, wild buffalo, wild swine; which two last cause great havoc in cultivated grounds. The principal domestic animals are the buffalo, kine, goat, and sheep. Rice is the staple crop; but there is considerable cultivation of wheat, oats, barley, pulse of various
RAJGEER.

kinds, oil-seeds, cucurbitaceous plants, sweet potatoes, hemp, yam, onion, garlic, capiscum, turmeric, ginger, sugarcane, pine-
apple. Of fruit-trees, there are the mango, jak (Artocarpus
integrifolius), tamarind, pomegranate, lemon, and citron. The
cocanutt and betelnut are cultivated, but they are neither
common nor produced in great perfection. Of articles of
commerce, the most important are indigo and silk, of which
there are large annual exports. The population, according to
official return, is 671,000; a number which, if compared with
the area, indicates a relative density of 322 to the square mile.
The majority of the population are Hindoos; the Mussulmans
are in considerable numbers, and amongst them the Patans are
the most numerous. A large portion of the lower orders are
of a mixed class, whose observances are founded on the united
tenets of Islam and Brahmanism. Baliya, the locality of the
civil establishment of the district, and Nator, the only places
which can be called towns, are described under their respective
names in the alphabetical arrangement. The principal routes
are, 1. that from south to north, from Calcutta to Darjeeling;
2. from south-west to north-east, from Berhampoor to
Jumalpoor. The district was ceded to the East-India Company
by the grant of the Dewanny, made by the emperor of Delhi
in 1765.

RAJGEER,¹ or RAJAGRIHA, in the British district of
Behar, presidency of Bengal, a small town denominated from
its containing the Rajagriha,² or royal palace of the ancient
sovereigns of Magadha or Behar. It is situate amidst the
summits of the Rajagriha hills, and near the north-western
extremity of the range, and on the huge and massy rampart of
an old fortress. This fortress, which bears every mark of
great antiquity, is of the form of an irregular pentagon, and
consists of a great rampart of earthwork, surrounded by a
ditch, and inclosing a space of considerable diameter. The
ditch appears to have been about 100 feet wide, and all the
earth excavated from it has been heaped up to form the
rampart. The space at the south-west corner of this ancient
work has been inclosed from the rest, so as to form a separate
fortress. This work is attributed to Sher Shah, the Pathan
chief who deposed Humayun and expelled him from India.
Within the inclosure of the great fort are numerous large
RAJ.

mounds, probably the ruins of the residences of Jarasandha and his court, as that monarch, the paramount sovereign of India, is considered to have here had his seat of government. Around the inclosure are several great mounds, probably also the ruins of buildings. In the vicinity of this place is a mound four miles long, 150 feet broad at the base, and twelve feet high. It now serves to dam up the inundation from the periodical rains, and thus form an artificial lake; but, according to Buchanan, its main purpose originally was to serve as a causeway to the royal residence. At a short distance south of the town are numerous hot springs, the water of which has a temperature of about 108°. The number of houses has been computed at 800, which, according to the usually assumed average of inmates to each, would assign it a population of 4,000 persons. Rajagriha is 40 miles S. of Patna. Lat. 25° 2', long. 85° 29'.

RAJGHAT, in the south-western corner of the Dehra Doon, a village with a ferry over the Jumna, there, when crossed by Moorcroft in the middle of February, about 100 feet broad. The ferry is a short distance below the confluence of the Giree and Jumna. Elevation above the sea 1,516 feet. Lat. 30° 26', long. 77° 45'.

RAJ GHAT, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a village on the right bank of the Ganges, 73 miles S.E. of Delhi. Lat. 28° 14', long. 78° 25'.

RAJGHUR.—A town in the province of Guzerat, or dominions of the Guicowar, 30 miles N.E. from Baroda, and 72 miles E.S.E. from Ahmedabad. Lat. 22° 31', long. 73° 35'.

RAJGHUR.—A town in the recently-lapsed territory of Nagpoor, situate on the right bank of the Wein Gunga river, and 88 miles S.S.E. from Nagpoor. Lat. 20° 3', long. 79° 49'.

RAJGHUR.—A town in the Rajpoot state of Oodeypoor or Meywar, situate on the right bank of the Banas river, and 77 miles S.S.E. from Ajmeer. Lat. 25° 29', long. 75° 11'.

RAJGUR, in the territory of the rajah of Putteeala, a fort two miles from the right bank of the river Giree, a quadrangle built of uncemented stone, and sixty-six feet long and fifty-five wide. Elevation above the sea 7,175 feet. Lat. 30° 53', long. 77° 14'.

s 2
RAJ.

RAJGUR. — A town of Baghelcund, in the native state of Rewah, situate on the left bank of the Sone river, and 54 miles E. by N. from Rewah. Lat. 24° 35', long. 82° 13'.

RAJGURH. — A town in the native state of Gwalior, or territory of Scindia, 75 miles S.W. by S. from Gwalior, and 68 miles W. by S. from Jhansee. Lat. 25° 20', long. 77° 35'.

RAJGURH, in Sirmor, a ruined fort belonging to the rajah of that state. It is situate on a natural terrace or flat projection from the side of a mountain, and is of a square outline, with a tower at each corner about forty feet high and twenty square. Inside, along the inclosing wall, are the remains of buildings to accommodate the inmates, the area in the middle being about forty feet square. The whole structure is of slate rock very neatly cut, and bonded throughout with large beams, put together in a substantial and workmanlike manner. It was fired and nearly demolished by the Goorkhas in 1814. Elevation above the sea 7,115 feet. Lat. 30° 52', long. 77° 23'.

RAJGURH, in the Rajpoot state of Alwar, under the management of the Governor-General's agent for Rajpootana, a town on the route from Nuusserabad to Muttra, and 76 miles S.W. of the latter. It is situate on an eminence surmounted by a large fort, and rising abruptly from the bottom of a valley inclosed by steep hills. Troops can obtain water and supplies here in abundance. The road to the north-east, or towards Muttra, is sandy and stony; to the south-west, or towards Nuusserabad, good. Lat. 27° 14', long. 76° 42'.

RAJGURH, in the British district of Ajmeer, lieutenant-governorship of the North-West Provinces, a village, the principal place of a pergunnah of the same name, according to official return having a population of 12,340 persons. According to Jacquemont, here are the ruins of a fortress, the history of which is altogether unknown. The edifice itself is insignificant, but the inclosing rampart is lofty and massive, constructed of great masses of rough stone, and environing an extensive area. Contiguous is a small lake, apparently artificial, and altogether the site is delightful. Distance S. from Ajmeer 10 miles, from Nuusserabad W. six. Lat. 26° 19', long. 74° 44'.

RAJGURH. — A town in the Rajpoot state of Beekeaneer,
RAJ.

140 miles E.N.E. from Beekaneer, and 40 miles S.S.W. from Hissar. Lat. 28° 38', long. 75° 31'.

RAJGURH.—A town of Malwa, meriting notice only as the residence of the rawul or chief inheriting a share of the tract called Omutwarra. An account of the mode of territorial division, and such other particulars as deserve mention, will be found under the article Omutwarra. Recently,¹ the affairs of the rawul fell into that state of confusion not unusual in the East, and after the failure of some milder expedients for restoring them, it became necessary for the British government temporarily to assume the management, and assign a stipend for the support of the chief. Lat. 23° 59', long. 76° 49'.

RAJHLEE,¹ in Sirhind, a village on the route from Hansee to Lodiana, and 56 miles N. of the former town. It is situated on a branch of the river Guggur, in a low, level country, liable to be overflowed by its inundations, at which time the road becomes impracticable for artillery or carriages, though at other times good. Distant N.W. from Calcutta 1,032² miles. Lat. 29° 52', long. 76° 2'.

RAJHPOOR, in the territory of Alwar, under the political management of the Governor-General's agent for Rajpootana, a small town on the route from the town of Alwar to Jeypore, and 55 miles N.E. of the latter. It has a fort situated on an eminence rising abruptly from the plain. Lat. 27° 10', long. 76° 36'.

RAJKOTE,¹ in the peninsula of Kattywar, province of Guzerat, a town in the prant or district of Hallar. The territory annexed to it contains fifty-five² villages, and a population of 20,000. It belongs to a Rajpoot thakoor or chief, who has an annual income of 34,500 rupees, out of which he pays an annual tribute³ of 17,000 rupees to the British government. A church has been erected in the town for the accommodation of the Christian community.⁴ Distance from Ahmedabad, S.W., 125 miles; Baroda, W., 150. Lat. 22° 18', long. 70° 50'.

RAJMAHAL,¹ in the British district of Bhaugulpore, presidency of Bengal, a town situate on the right bank of the Ganges, and on the main line of railway now under construction from Calcutta and the valley of the Ganges to Delhi.

¹ E.I.C. Ms. Doc.
² Jacob, Report on Kattuewar, 60.
³ Clune, Append. to Itinerary of Western India, 54.

¹ Pol. Disp. to India, 30 August, 1849.
RAJMAHAL.

and the north-west frontier. The site of the town is a bank of considerable elevation and steepness, round which the Ganges, here at its greatest magnitude, sweeps with great violence, and sometimes renders ^3 away large portions of the land. The place is principally remarkable for the ruins of a palace, built by Shajehan's son, 4 Shuja, viceroy of Bengal. The Jamanasajit, or principal mosque, built by Man Singh, viceroy of Akbar, is a spacious ^4 building of imposing aspect, but of rude execution. It is 188 feet in length, and sixty wide. Another mosque of inferior size was built by Futehjung Khan, a rival of Man Singh. Here, also, are the ruins of a palace, built by Cossim Ali, the soobahdar of Bengal, raised and subsequently expelled by the East-India Company. The general aspect of the town is ruinous and dismal, as it is now a collection of wretched houses or huts, dispersed amongst twelve market-places, situate at considerable and inconvenient distances from each other. The permanent population is estimated at about 30,000 persons; and the transitory population is considerable, the number of travellers by land and water being great. The supply of provisions to such passengers is the chief support to the town.

Rajmahal is considered by Wilford as a place of great antiquity, and identical with Rajagriha, 7 built by Balarama, brother of Krishna, who, according to Hindoo chronology, is conjectured to have lived 3,101 years B.C. Buchanan, on the other hand, mentions that the natives consider the place as of very recent date, owing its origin to Man Singh, 1 the Rajpoot viceroy of Akbar; and hence the name of Akbarabad, given to it in honour of the Padshah, and generally used by the Mussulmans to designate it. In the reign of Shahjehan, his son Shuja 2 held the same high trust, until defeated and expelled 3 by his brother Aurungzebe. It was occupied by the British troops after they had, at Oondwa Nullah, forced 4 the lines of Cossim Ali, in 1763, and was formally ceded to the East-India Company by the firman of Shah Alum in 1765, granting them the Dewanny of Bengal. 5 Distant N.W. from Calcutta, by

* A detailed account of the mountaineers of the highlands south and south-west of Rajmahal is given by Stewart, 1 but the scope of the present work does not admit even of a close compression of the mass of curious information contained in it.
RAJ.

Burhampoor, 196 miles; by water, by the course of the Ganges, 249. * Lat. 25° 1', long. 87° 50'.

RAJNUGGUR.—A town in the Rajpoot state of Oodeypoor, 39 miles N.E. from Oodeypoor, and 107 miles S.S.W. from Ajmeer. Lat. 25° 4', long. 74° 2'.

RAJNUGGUR, in Bundeleund, a town in the raj of Chutter-pore, hence often called the raj of Rajnugur. It is situate 85 miles S. of Calpee. Lat. 24° 52', long. 80°.

RAJNUGUR.—A town in the British district of Silhet, presidency of Bengal, 26 miles S. of Silhet. Lat. 24° 32', long. 91° 52'.

RAOOKONDDU.—A town in the native state of Hyderabad, or dominions of the Nizam, 23 miles E.S.E. from Hyderabad, and 108 miles N.N.E. from Kurnool. Lat. 17° 12', long. 78° 51'.

RAJOORA.—A town in the native state of Hyderabad, or dominions of the Nizam, situate on the right bank of the Wein Gunga river, and 180 miles N. by E. from Hyderabad. Lat. 19° 49', long. 79° 26'.

RAJOORY.—A town in the native state of Hyderabad, or territory of the Nizam, 138 miles N.W. by W. from Hyderabad, and 100 miles N.E. from Sholapoor. Lat. 18° 40', long. 77°.

RAJPEEPLA.—A petty Rajpoot state in the Rewa Caunta division of Guzerat. It is bounded on the north by the Nerbudda river; on the east by the district of Akraune; on the west by the British collectorate of Broach; on the south by the Guicowar's district of Wusraee, and the district of Mandavee, now incorporated with the collectorate of Surat. It lies between lat. 21° 28' and 21° 59', and long. 73° 5' and 74°. The area is 1,650 square miles, inhabited by a population of 122,100.

* During part of the year the distance is rendered much more by the necessity of resorting to the circuitous route through the Sunderbunds. Some time since a plan was suggested for making a canal from Rajmahal to the confluence of the small river Kurri with the river Hooghly, near the town of Culna, which would, during the dry season, have effected a considerable saving of distance; but, upon consideration, it was regarded as impracticable, and on this account, as well probably as with reference to the projected connection of Rajmahal with Calcutta by railway, it was not deemed expedient that the work should be undertaken.

2 India Statistics, 30.
RAJPEEPLA.

Many parts of the state are inhabited by a wild race, composed of Rajpoobs and Bheels, but the lowlands contain a large population of Koonbees, belonging to the industrious portion of the agricultural peasantry, whose villages indicate, from their flourishing condition, the industry peculiar to that class. It is watered by the river Kurgun, on which is situated the capital, Nandode.

The sovereigns of Delhi endeavoured at an early period to impose a tribute upon Rajpeepla. The attempt was made without success, but its rulers agreed to keep up a body of horse and foot, whose services should be available when required. Akbar first established a tribute in lieu of this force, but it was paid only so long as authority was retained in the country by the Mahometan rulers. Subsequently, Damajee Bow Guicowar, with the consent of the Peishwa, revived the claim, and the rajah consented to pay annually the sum of 40,000 rupees to the Guicowar state. Thus Rajpeepla was constituted one of the original tributary possessions obtained by the Guicowar family on the establishment of its power in Guzerat; and from the year 1764 to 1780 the Guicowar continued to receive tribute to the amount above stated. From the last-named period the successive rulers of Guzerat availed themselves of various favourable opportunities for increasing the amount, until it finally reached a lac of rupees, a sum altogether disproportionate to the ability of the Rajpeepla state to pay. In 1822, the amount of tribute was fixed at 60,000 rupees. An agreement was also entered into for discharging the arrears; and to secure the fulfilment of the revised engagement, a receiver of all the revenues was appointed under British guarantee, which arrangement still prevails.

For many years the state was a prey to internal dissensions, owing to the claims set up by rival candidates to the guddee. Ram Sing, whom his father, Ajeeb Sing, had intended to set aside, was placed on the guddee by the aid of his Arab troops, but becoming unfit to conduct the business of the state, the sanction of the British government was given to an arrangement by which Pertaub assumed the management of affairs in the name of his disqualified parent. The legitimacy of Pertaub was disputed by his uncle Nhar Sing, who established his allegation, and laid claim to succeed as rightful heir, but being
RAJPEEPLA.

blind, his eldest son, Vereesaljee, was proclaimed rajah by the united authority of the British and Guicowar governments.

The terms entered into by this chief are, to pay the amount of tribute to the Guicowar government; to restrain his wild tribes; not to harbour offenders escaping from justice, and to abide by the decision of the British government in certain specified cases.

Rajah Vereesaljee, who was born in 1810, still continues to administer the affairs of the state.

The force maintained by the rajah, for purposes of police and state, consists of 100 horse and 285 sebundies, at an annual cost of 47,000 rupees.

The revenue of this district formerly amounted to 3,45,500 rupees, but a gradual falling off has taken place: in the year 1843, it only reached 2,22,783 rupees; and a further decline has subsequently taken place. With a view to the adoption of some remedial measures, the Court of Directors in 1848 called the attention of the Bombay government to the fact that this state, which was delivered to the rajah's management in a prosperous condition, was again falling into difficulties, and that the annual disbursements actually exceeded the receipts. An inquiry was thereupon instituted, and the results disclosed the existence of a gross system of misappropriation and deception on the part both of the rajah and potadar or receiver of the revenue. There also appeared strong ground for suspecting certain inferior officers of corruption; and the oppression of the people by illegal exactions and other nefarious practices, was clearly established. Various modes of removing these evils, and preventing their recurrence, were suggested, and subsequently decided upon.

Three miles to the east of Numoodra, in the Rajpeepla district, lie the celebrated cornelian-mines. The stones are conveyed by the merchants to Cambay, where, being cut and polished, they are formed into the beautiful ornaments for which that city is celebrated. The revenue derived from the mines has greatly declined, and they now scarcely yield 1,000 rupees per annum.

Within the last few years, the rajah has suppressed suttee, and has likewise abolished burning as a capital punishment.
RAJ.

Primogeniture governs the succession, and the custom is not infringed.

RAJPEELA.—A town in the Rewa Caunta division of Guzerat. A Rajpoot, named Chokrana, having quarrelled with his father, the rajah of Oojeein, retired to this country, and fixed his residence in Peepla, situated on the top of a lofty hill, now styled Old Rajpeepla, to distinguish it from the modern village of that name. Having made this spot the seat of government, its old name was abandoned, and that of Rajpeepla, now the general appellation of the whole province, given to it. The place is almost inaccessible, and for carts, or any kind of carriage, altogether so. It was, however, a safe retreat for the rajahs whenever the country was invaded by a powerful enemy. In modern times, Nhar Sing was enabled by local advantages to hold out against a superior force sent against him by the Guicowar government. Lat. 21° 47', long. 73° 29'.

RAJPEETA.—A town in the British district of Pachete, presidency of Bengal, 30 miles N.W. of Rognatpoor. Lat. 23° 50', long. 86° 25'.

RAJPOOR.—A town of Allee Mohun, in Malwa, presidency of Bengal, and the present residence of the rajah. It is a large and well-built town, and has a capital bazar, with a market-day on Monday. Lat. 22° 20', long. 74° 21'.

RAJPOOR, in the Julinder Doob division of the Punjab, a town situated nine miles from the left bank of the Beas, and 43 miles N.E. of the town of Julinder. Lat. 31° 46', long. 76° 13'.

RAJPOOR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Calpee to Etawah, and 16 miles N.W. of the former. The road in this part of the route is rather good, the country partially cultivated. Lat. 26° 18', long. 79° 45'.

RAJPOOR, in the British district of the Dehra Doon, a village on the route from the town of Dehra to the sanatory station of Landour, and six miles and a half S. of the latter. The road to Dehra is very good, having a gentle declivity to that town from Landour: it is for the first three miles very steep, but easier for the remaining part. There is a good bazar,
RAJ.

and here are kept the camels and elephants of the visitors to Landour.¹ Lat. 30° 24', long. 78° 10'.

RAJPOORA, in the British district of Bareilly, division of Pillibheet, lieutenant-governorship of the North-West Provinces, a village on the route by Nanakmath and Ruderpoor, from the town of Pillibheet to Kasheepore, 20 miles S.E. of the latter. Lat. 29° 3', long. 79° 16'.

RAJPOORA.—A town in the Rajpoot state of Beekaneer, 112 miles N.E. by E. from Beekaneer, and 62 miles S.W. from Hisrar. Lat. 28° 33', long. 75° 4'.

RAJPOOREE.—See RAJAPPO.

RAJPOOTANA.¹—An extensive tract of Western India, so denominated from its prevailing population, the Rajpoots. It is bounded on the north-east by the British districts Butteecana and Kurreecana, and the native state of Jhujheru; on the east by the British district of Goorgaon, and by Bhurtapore, Dholapore, and Gwaliour; on the south by the province of Omurtwa, by the territories of Scindia, of Holkar, and of the Guicowar, by Jabboor and the presidency of Bombay; on the west by Scinde; and on the north-west by Bhawulpore and the British district of Butteeceana. Defined by these limits, it lies between lat. 23° 35'—29° 57', long. 70° 5'—77° 40'; is 420 miles in length from east to west, and 400 in breadth. The detailed areas of the states, as given in an official document,² are in square miles as follows:—Oodeypore or Mewar, 11,614; Jeypore, 15,251;* Joudpore, 35,672; Jhullawar, 2,200; Kotah,† 4,839; Bhoondee, 2,291; Alwur, 3,573; Bickaneer, 17,676; Jessumuree, 12,252; Kishengurh, 724; Banswarra, 1,440; Pertagurgh, 1,457; Doongerpore, 1,000; Kerowlee, 1,878; Serohee, 3,024; giving a total of 114,391 square miles.

Each of those states is noticed under its respective name in the alphabetical arrangement. In the present state of our information respecting Rajpootana, the result of any attempt to estimate its aggregate population can at best be only a

* Shekawuttee is not specially enumerated, being comprised within Jeypore.

† Kotah, with Bhoondee, forms the division of Rajpootana denominated Haroutee.

¹ Jacquemont, iv. 37.
² Statistics of Native States.
tolerable approximation. If the scale adopted by Malcolm for Central India, in 1820, before the country had recovered from the ravages of the Mahrattas, be now considered applicable to Rajpoootana (ninety-eight to the square mile), the entire population will be upwards of 11,000,000.

The widely-spread sept of Rajpootts* are considered offsets from the Khatriyas, one of the four great castes into which the Hindoos were originally divided. In the dim and uncertain light in which Hindoo history lies previously to the Mahomedan invasion in the tenth century, it is not safe to form any judgment as to the period when the Rajpootts appeared as a distinct race. Their origin is by Hindoo tradition placed in Mount3 Aboo, bordering on Guzerat. Their power and renown appear to have been at their acme about the close of the twelfth century, when Ajmere and Delhi were held in union by one of their princes, Kunnouj by another, Guzerat by a third; but their power soon fell before the enthusiasm, ferocity, and military qualities of the Mussulmans. Pirthi Raj, the sovereign of Ajmere and Delhi, in 1191 defeated4 at Tirouri Shahabuddin Muhammed, sultan of Ghor, but was in 1193 defeated by that monarch in a great battle, and being taken prisoner, was put to death. Following out his success, Shahabuddin in 1194 defeated5 Jain Chandra, the Rajpoot rajah of Kunnouj; and by these shocks, the sway of the Rajpootts was restricted within limits nearly corresponding with those which form their present boundaries. Besides the tract denominated Rajpoootana, the race is dispersed6 over many parts of India; as in Bundelcund, where many of the chiefs are Rajpootts, and in Baghelkhand or Rewa, the rajah of which is a Baghel7 Rajpoot; also in Gurbwal,8 and several others of the hill states, and in the territory of Cutch.9 An able1 writer adverts with much felicity to the "peculiar character of the Rajpootts, arising from their situation as the military class of the original Hindoo system. The other classes," he continues, "though kept together as castes by community of religious rites, were mixed up in civil society, and were under no chiefs except the ordinary magistrates of the country. But

* According to Wilson,1 Rajputra; from Raj, "a king," and Putr, "son"—"a descendant2 of a raja."
the Rajpoots were born soldiers; each division had its hereditary leader, and each formed a separate community, like clans in other countries, the members of which were bound by many ties to their chiefs and to each other. The rules of caste still subsisted, and tended to render more powerful the connection just described. As the chiefs of those clans stood in the same relation to the rajah as their own relations did to them, the king, nobility, and soldiery, all made one body, united by the strongest feelings of kindred and military devotion. The sort of feudal system that prevailed among the Rajpoots, gave additional stability to this attachment, and altogether produced the pride of birth, the high spirit, and the romantic notions so striking in the military class of that period. Their enthusiasm was kept up by the songs of their bards, and inflamed by frequent contests for glory or for love. They treated women with a respect unusual in the East, and were guided even towards their enemies by rules of honour, which it was disgraceful to violate. But although they had so many characteristics of chivalry, they had not the high-strained sentiments and artificial refinements of our knights, and were more in the spirit of Homer’s heroes, than of Spenser’s or Ariosto’s. If to these qualities we add a strong disposition to indolence (which may have existed formerly, though not likely to figure in history), and make allowances for the effects of a long period of depression, we have the character of the Rajpoots of the present day, who bear much the same resemblance to their ancestors that those did to the warriors of the Maha Bharat. With all the noble qualities of the early Rajpoots was mixed a simplicity, derived from the want of intercourse with other nations, which rendered them inferior in practical ability, and even in military efficiency, to men actuated by much less elevated sentiments than theirs.” Another intelligent writer, who spent much time among the Rajpoots, gives a less favourable account of them. He says, “The warlike character of the Rajpoot has been very much overrated. There appears to be very little chivalrous feeling in his breast. By nature, Rajpoots are generally powerful, muscular men, active by habit and practising gymnastics (though, when not excited, inclined to indolence to a high degree); those who possess horses are
RAJPOOTANA.

generally good horsemen. Some are, by constant practice, dexterous in the use of lance or sword, and, individually, must be often superior to one of an enemy trained to act in combination, according to a rigid system of discipline. But amongst a large body of Rajpoot horse, only a few would be found such superior men at arms, or so to venture. The Rajpoots do not possess the cool determinate courage, ready to dare any danger, and requiring no artificial excitement. According to their own accounts, even in their former attacks on caravans and towns, surprise was their object; and if successful, they were equally cruel and rapacious, showing no mercy to their captives; and if they met with much resistance, became as cowardly as they had before been violent, and resorted to flight: fighting was not their object. In all their single combats, and all assaults, they resorted to the excitement of opium before commencing battle: their own bards describe the eyes of their heroes as being red from opium. Among their rajas, the treacherous murders of each other on record were numerous and long premeditated." There is probably much truth in this latter view. Many gloomy shadows darken the portrait of the Rajpoot character, and contrast painfully with the bright hues depicted in the earlier notice. Among them may be reckoned the practice of suttee under its most atrocious forms, the horrible holocaust being increased in cases where the rank and wealth of the deceased were thought to demand the addition, by forcibly throwing\(^3\) numbers of females, either attendant slaves or retainers, into the flames, together with the chief victim.

As another fearful stain on Rajpoot manners, may be mentioned the once universally prevalent crime of female infanticide.\(^4\) To such an extent was it carried among some tribes, that, in 1818, when Macmurdo\(^5\) wrote, it is stated that among the offspring of 8,000 married Jhareja Rajpoots, not more than sixty females were living; and it was considered probable that the number did not exceed thirty. To such an extent was this cruelty to daughters carried, that they were sometimes destroyed after attaining adolescence; the instinct of affection, even when strengthened by time and habit, being insufficient to overcome the suggestions of pride, or imaginary expediency.

\(^6\) Bombay Trans. ut supra, 229.
RAJPOOTANA.

In 1810, when the rajahs of Joudapore and Jeypore became suitors\(^6\) for a princess of Oodeypore, and supported their pretensions by waging war against each other, the family of the unhappy girl terminated the contest by putting her to death. Some years ago, the marriageable daughter of the rajah of Bickaneer was put to death\(^7\) under similar circumstances, and from similar motives. A practice, less hideously criminal, but most dangerous to themselves and others, is their addiction to the use of opium, already adverted to, in which they indulge to a degree which first inflames their passions, then impairs their intellects, leading in the last stage to permanent and hopeless fatuity. Before the debilitating drug has effected this dire result, it is to the Rajpoot the source of false courage and insensate desperation. Furious from its influence, Rajpoot armies have in many instances recklessly rushed on certain death, and, neither giving nor receiving quarter, have perished to a man. The most appalling manifestation of this madness is denominated johar. It consists in an army or garrison, reduced to despair and inflamed by opium, butchering their families in the first place, and then rushing on the enemy and fighting till destroyed. Notwithstanding, however, their deficiency in steady courage, and their inferiority in discipline and tactics, it is certain that the Rajpoots have succeeded in rendering themselves formidable to some of the greatest military characters of India. Baber, exercised from boyhood in the most varied and fierce scenes of warfare, honestly relates\(^8\) the dismay into which himself and his veterans were thrown by the approach of Rana Sanka, of Mewar, the champion of Brahminism, on whose overthrow the Mussulman sultan assumed, for the first time, the much-desired title of Ghazi, or "champion victorious in defence of the faith." Subsequently, Sher Shah, the Afghan who defeated and dethroned Humayon, the son of Baber, and the padshah of Delhi, having invaded Rajpootana at the head of 80,000 men, was fiercely encountered, and nearly repulsed by Kunbha, a Rajpoot chief, at the head of 10,000 of his clan. The Afghan observed,\(^9\) after his dearly-won victory, that he had almost lost the empire of India for a handful of joar, alluding to a coarse grain forming the staple crop in the barren country, which he found so obstinately

RAJ.

defended. In more recent times, the Rajpoota have scarcely sustained their former reputation.

Notwithstanding their many strongholds, their numerous forces, and boasted military prowess, they offered little resistance to the Mahrattas, who at will desolated their lands, until shielded by the British power. Some of the Rajpoota states were brought into connection with the British government early in the present century, by the Marquis of Wellesley. His successor, Sir George Barlow, adopted a different policy; but experience having manifested the wisdom of that of the previous Governor-General, it was resumed by the Marquis of Hastings, and these states became generally subject to British influence, and entitled to the benefit of British protection. The required powers are exercised through an officer called the Governor-General's agent for the states of Rajpoota. The connection appears to have been greatly beneficial to the country. European principles of justice and policy are gradually making way. Arrangements have been introduced for the decision of international questions, as well as for the general administration of justice, and are said to be working well.

RAJULA.—A town in the peninsula of Kattywar, province of Guzerat, in the prant or district of Babriawar. Distance from Ahmedabad S.W. 155 miles, Baroda 145. Lat. 21° 2', long. 71° 28'.

RAJULDESIR, in the Rajpoota state of Beekaneer, a town on the route from Butungurh to the town of Beekaneer, and 75 miles E. of the latter. It has four towers for its defence, and contains 283 houses, and six wells 100 feet deep. The road in this part of the route is sandy, as is the surrounding country, though producing in some places crops of bajra (Holcus spicatus). Lat. 28° 1', long. 74° 34'.

RAJUMPETT.—A town in the native state of Hyderabad, or territory of the Nizam, 66 miles N. by W. from Hyderabad, and 186 miles E. by N. from Sholapoor. Lat. 18° 17', long. 78° 21'.

RAJUNPOOR.—A town in the native state of Bhawulpoor, situate on the left bank of the Indus river, and 116 miles S.W. by W. from Bhawulpoor. Lat. 25° 31', long. 70° 10'.

RAJUR.—A town in the territory belonging to Ali Moorad,
RAK—RAL.

27 miles S.E. from the left bank of the Indus, and 27 miles S.E. by E. from Bukkur. Lat. 27° 26', long. 69° 16'.

RAKHAM, in Bussahir, a village situate in the valley of the Buspa, on the right bank of the river of that name, and near the confluence of a stream called the Gor. The site of the village is striking and not unpleasing, at the western extremity of a glen, and at the base of a huge mass of bare rocks, which rise abruptly in numerous black spires above the village. The dell is about three furlongs wide, and produces thriving crops of wheat and barley. Elevation above the sea 10,456² feet. Lat. 31° 22', long. 78° 27'.

RAKHA.—A town in the native state of Nepal, situate on the right bank of the Gunduck or Salagra river, and 145 miles W.N.W. from Khatmandoo. Lat. 28° 37', long. 83° 13'.

RAKISHBOON.—A town in the native state of Hyderabad, or dominions of the Nizam, situate on the right bank of the Godavery river, and 37 miles S. by W. from Jaulnash. Lat. 19° 20', long. 75° 46'.

RAKRI, in the British district of Aligurb, lieutenant-governorship of the North-West Provinces, a village 12 miles S.E. of the cantonment of Aligurh. Lat. 27° 46', long. 78° 15'.

RALA.—A town in the British district of Arracan, presidency of Bengal, 22 miles N.W. by W. of Arracan. Lat. 20° 51', long. 93° 8'.

RALDANG,¹ or WEST KAILAS, in Bussahir, a lofty mountain of Koonawar, separating the valley of the Buspa from that of the Tidung. Gerard,² who viewed it from the left bank of the Sutlej, gives the following description:—"Some idea of it may be formed by imagining an assemblage of pointed peaks, presenting a vast surface of snow, viewed under an angle of twenty-seven degrees, and at a distance of not more than five miles in a direct line." The highest peak has an elevation of 21,103 feet. Lat. 31° 29', long. 78° 21'.

RALEIGAON.—A town in one of the recently sequestrated districts of the native state of Hyderabad, 85 miles S.E. from Ellichpoor. Lat. 20° 27', long. 78° 36'.

RALHOOPOOR, in the British district of Benares, lieutenant-governorship of the North-West Provinces, a town on

---

RAM.

the route from Benares to Sasseram, five miles S.E. of the former. Lat. 25° 14', long. 83° 7'.

RAMA.—A town in the Rajpoot state of Jodhpoor, 46 miles S.S.W. from Jodhpoor, and 128 miles W.S.W. from Ajmeer. Lat. 25° 41', long. 72° 54'.

RAMAGIRI,¹ in the territory of Mysore, a town with a fort, the principal place of a talook or subdivision of the same name. It is situate² on the right or west side of the river Arkavati. The fort is situate on a high rocky hill of granite, and is capable of defence, yet it surrendered³ promptly, A.D. 1791, to the British force which advanced against it. The jungles and rough ground about it are very much infested by tigers. Distant from Seringapatam, N.E., 48 miles; Bangalore, S.W., 25. Lat. 12° 45', long. 77° 30'.

RAMAREE,¹ in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village on the route from Almora to the frontier of south-western Tibet, by the Juwahir Pass, 67² miles N.E. of the former, 89 S.W. of the latter. There is encamping-ground near a spring between the road and the village, but no supplies are procurable. Lat. 29° 58', long. 80° 9'.

RAMAS.—A high bluff headland on the coast of Goa, "forming in two level points when seen either from the northward or southward: that called False Cape is highest and first discernible; the other, less elevated, forms the extremity of the true cape, on which is a small fort belonging to the Portuguese."¹ Lat. 15° 5', long. 73° 58'.

RAMA SERAI, in Gurhwal, a valley extending in a direction from north-west to south-east, between lat. 30° 46'—30° 58', and long. 78°—78° 12'. It is about a mile wide, fertile, and well watered, and formerly was well cultivated, and contained several good villages; but of late years, in consequence of Goorkha devastation, is nearly desolate, overrun with jungle, and full of wild beasts. The Camalda river, which flows down the valley, falls into the Jumna on the right side.

RAMBUDRAPPOOR.—A town in the native state of Hyderabad, or dominions of the Nizam, situate on the left bank of the Godavery river, and 168 miles E. by N. from Hyderabad. Lat. 17° 48', long. 81° 2'.
RAM.

RAMDOORG.—A town within the territories of Bombay, situate 54 miles E. by N. from Belgaum, and 66 miles S.S.W. from Beejapoor. Lat. 15° 58', long. 75° 22'.

RAMESUR,¹ in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village with a Hindoo temple at the confluence of the rivers Surjoo and Eastern Ramgunga. Elevation above the sea 1,500² feet. Lat. 29° 32', long. 80° 8'.

RAMESWARAM.—An island at the western extremity of Adam's Bridge, forming the northern boundary of the Gulf of Mannar, and extending in a direction nearly east and west, between Ceylon and the south-eastern coast of the peninsula of India. It is represented to be about fourteen miles in length † from south-east to north-west, and five in breadth. It is uncultivated, and principally inhabited by Brahmins and their followers, who are supported by the profits derived from the great pagoda and other temples. The entrance to the principal temple is through a fine gateway about 100 feet high, and elaborately carved, its form being trapezoid. The workmanship is massive and regular, and in a style of architecture resembling the Egyptian. Within is a cloister, having a passage between a triple row of pillars, to a square of about 600 feet, cloistered all round, and into which the sacred temples open. The whole is well built, and is one of the finest structures in India. It appears to be dedicated to the divinity Siva, of whom, according to Brahminical legend, Rameswara² or Rama is an avatar or incarnation. According to the Ramayana and other Puranic legends, Ravana, the demon tyrant of Lanka, having abducted³ Sita, the consort of Rama, the injured monarch pursued the ravisher, who carried off his prize to Lanka; so that pursuit was stayed by the intervening sea, until "Nala," the son of fire, then commenced to make a bridge over the sea, and prayed his father that all the great stones, and other heavy articles necessary for the work, might be deprived of their weight and float on the sea.

* Rameswar of Brigg's Index; from Rama, the hero and divinity of that name, and Iswar, "god," the god Rama.
† According to McKenzie,¹ the island is low, sandy, and uncultivated; but Lord Valentia² mentions "the hills of Ramiseram."

RAMESWARAM.

This prayer being granted, he soon completed the bridge, over which the troops marched to Lanka." Such is the fabled origin of the long bank forming the northern boundary of the Gulf of Manaar, and called by the Brahmmins "Rama's Bridge;" by the Mussulmans and Christians, "Adam's Bridge."

Near the town of Rameswaram is a fresh-water lake, about three miles in circumference. The great pagoda is a celebrated place of pilgrimage, frequented by crowds from all parts of India; it is under the guardianship and management of a chief, styled Pandaram, who must observe celibacy through life, and on his death is succeeded by his sister's son, or, should there not be any such, by the next eldest collateral male relative. The image of the deity is every morning drenched with water brought on the shoulders of fakirs from the Ganges, and poured over it, and which, having received additional sanctity by this rite, is sold to devotees at a high price. A splendid view of this pagoda is given by Daniell.

At the western extremity of the island is the small town of Paumbaum, and between it and the mainland of India is a passage, formerly so beset with rocks and shoals as to be nearly unavailable for navigation. Measures for its improvement have recently been taken with success, of which some notice will be found under the article Paumbaum. According to local tradition, this island was connected with the mainland of India until the early part of the fifteenth century, when the connecting neck of land was partially swept away by the sea during a dreadful hurricane, and the breakers were brought to their present extent by a succession of similar interruptions. Geological observation lends some support to this. The bottom consists in general of sandstone of the same kind as that on Rameswaram and the neighbouring part of the continent of India. The number of pilgrims visiting annually the pagoda is estimated at 30,000, the fixed population at 4,288, of whom 811 are Brahmmins, 620 Mussulmans, 372 native Christians, other classes 2,485. The population would appear to be well lodged, as the number of houses is considerable in proportion to its amount; but these being constructed in a great measure to meet the resort of pilgrims, a judgment framed with reference only to the accommodation thus provided would probably be
RAM.

fallacious. The town of Rameswaram is in lat. 9° 18', long. 79° 21'.

RAMGHA T,1 in the British district of Bolundshuhur, lieutenan
tenant-governorship of the North-West Provinces, a town on
the route from Allygurh to Bareilly, and 30 miles N.E. of the
former, situate on the right bank of the Ganges, here crossed
by ferry. The bed of the river is about a mile and half wide,
and the stream in the dry season usually occupies one-third of
that space, and is sometimes divided into two or more channels.
The road to the south-west, or towards Allygurh, is good; to
the north-east heavy. Ramghat is 80 miles S.E. of Delhi.
Lat. 28° 9', long. 78° 30'.

RAMGHERY, in Hyderabad, or territory of the Nizam,
a town 110 miles N.E. of the city of Hyderabad. Lat. 18° 38',
long. 79° 39'.

RAMGUNGA (EASTERN).—A river rising in the British
district of Kumaon, on the southern declivity of the main
chain of the Himalaya, at an elevation of about 9,000 feet,
and in lat. 30° 11', long. 80° 8'. It holds a course generally
southerly for about fifty-five miles, to Ramesur, where it falls
into the Surjoo, on the left side. Its descent must be very
rapid, as the point of its confluence with the Surjoo is estimated
to be only 1,500 feet above the sea. The name of Ramgunga
is often given to the united stream as far as its confluence
with the Kalee. Webb, who crossed it by a spar bridge, in
lat. 29° 48', long. 80° 12', about thirty miles from its source,
found it to be there unfordable during the rainy season, but
ascertained that it could be forded at other times, when it had
a depth of four feet. Twelve miles higher up the stream, it is
crossed by the route from Almora to the Juwahir Pass into
Tibet, and is there "fordable,3 except in the rains, when a rope
bridge is thrown across it."

RAMGUNGA (WESTERN).—A river rising in the British
district of Kumaon, amidst the outer or lower group of the
Himalayas, and in lat. 30° 6', long. 79° 20'. The stream is
formed by a junction of several small rills, flowing from various
directions. The elevation of its remotest source above the sea
does not appear to be ascertained, but that of Dewalle Khal, a
temple situate on a summit two or three miles from it, is
7,144 feet. At the confluence with the Kothar stream, about

5 Garden, Tables of Routes, 55.
RAMGUNGA.

five miles lower down, the elevation is 3,838 feet. Its course for the first twenty miles is in a south-easterly direction; it then becomes south-westerly, and so continues to its exit from the hills, in lat. 29° 30', long. 78° 49', at the distance of about ninety miles from its source. In this upper part of its course, it receives numerous mountain-streams, on both the right and left sides. A short distance below its entrance into the plain, and about 100 miles from its source, it takes a southerly direction, which it holds for fifteen miles, and in lat. 29° 17', long. 78° 42', receives the Koh, a considerable feeder, on the right side. At the town of Moradabad, forty miles below this confluence, the Ramgunga, in the early part of December, when it is probably lowest, is described by Heber as "a sluggish river, as wide nearly in this place as the Severn at Shrewsbury, but shallow and fordable." Garden states that the bed is a mile wide here, and that the stream in the dry season is usually divided into two or three channels, from one to three feet deep, with uneven sandy bottom, and that the passage in the wet season is made by ferry. Fifteen miles below this, it, in lat. 29° 41', long. 79° 1', receives on the left side the Kosee, a considerable stream, but continues even after this accession fordable from the month of December to that of June, sixty miles lower. Besides some feeders of less size, it receives on the left side the Sunka, and is not usually fordable below Jalalabad, seventy-three miles further, in lat. 27° 44', long. 79° 40'. Sixty miles still lower, it on the left side receives the Deoha or Gurrah, a considerable stream. Ten miles below this last confluence, the Ramgunga falls into the Ganges on the left side, nearly opposite the ancient city of Kanouj, and in lat. 27° 7', long. 80° 3'. Its total length of course is about 373 miles.

* Ritter has fallen into an oversight in stating that this river forms the boundary between Gurhwal and Kumaon: "Der (Ramganga) die provinz Gherwal im West von Kamaun im Osten scheidet." If he mean by "the province Gurhwal" the raj or state of that name, the dividing-line is the course of the Alakmanda; if the portion of Gurhwal now included in the British district Kumaon, the boundary on the east, dividing it from Kumaon proper, is stated by Batten to be an "imaginary" line "crossing the Ramgunga river near its numerous sources, and again recrossing it at the upper part of the Patlee Dhoon." Ritter, however, may have been led into the error by Traill.
RAM.

RAMGUNGE, in the territory of Oude, a village on the route from Cawnpore to Lucknow, 16 miles N.E. of the former, 37 S.W. of the latter. Lat. 26° 37', long. 80° 37'.

RAMGUNJE.—A town in the British district of Bulloah, presidency of Bengal, 12 miles N. of Bulloah. Lat. 23° 3', long. 90° 57'.

RAMGUR.—A town in the recently lapsed territory of Nagpoor, 80 miles S. from Bustur, and 76 miles N. by E. from Rajahmundry. Lat. 18° 5', long. 82°.

RAMGURH, otherwise called HAZAREEBAGH, formerly part of a collectorate of wider dimensions. In 1832 a general insurrection broke out on the south-west frontier of Bengal, and extending to this locality, the disturbed tracts comprised within the present district of Ramghur were withdrawn from the operation of the ordinary regulations, and annexed to the territory under the administration of the political agent for the south-west frontier of Bengal. Both the names by which the district is designated are derived from towns situate within its limits. It is bounded on the north by the British district Behar; on the north-east by the British district of Mongheer; on the east by the British district Beerbhoom; on the south-east by the British district Pachete; on the south by the British district Chota Nagpore; and on the south-west and west by the British district Palamow. It lies between lat. 23° 20'—24° 50', long. 83° 50'—86° 38'; is 175 miles in length from east to west, and ninety in breadth: the area is 8,524 square miles. Many groups of hills are dispersed over the district; there is also much undulating ground, consisting of plateaus of moderate extent, separated by gentle depressions. Of these plateaus one of the most extensive and elevated is that of Hazareebagh, nearly in the middle of the district, and having, it is stated, an elevation of 1,800 feet above the sea. Many of the mountains are of primitive formation,—granite, quartz, or gneiss; but others, of later formation, abound in coal and iron: the latter, though smelted to a great extent, is reputed not to be of the best quality. Lead-ore is said to have been discovered in the vicinity of Hazareebagh; and it is conjectured that silver-ore may be obtained in the same mine. There are ores of antimony in many places. In the vicinity
RAMGURH.

of Hazareebagh are beds of very fine mica, from which large transparent laminae are obtained.

The whole country is very thinly peopled, insomuch that Jacquemont, on one occasion at least, scarcely observed a house in a day's journey, though travelling along the direct road from Calcutta to Benares. As far as the eye could reach, nothing could be seen but thick forests, the lairs of lions, tigers, leopards, bears, hyænas, foxes, jackals, wild dogs, wild buffaloes, wild kine, wild swine, hog deer, and other kinds; monkeys, porcupines, and some other quadrupeds of less importance. Tigers are particularly numerous; and the dread of their ravages so great as sometimes to have impelled the inhabitants to desert their homes. Everywhere in those forests lurk the monstrous boa, and several venomous species of serpents, as the cobra de capello and karait. The timber is fine; and together with the sal (Shorea robusta), are found a great variety of trees and plants, unknown to Europeans. In many parts the forests are totally impenetrable, and where of practicable access, the air during a portion of the year is so pestiferous as to cause almost certain death to those exposed to its influence. The winter and beginning of spring are the healthier times, and are, in consequence of the elevation, so cool that ice is formed on stagnant water.

The rivers are numerous, but none of them of great volume. The principal drainage is to the south-east, towards the estuary of the Ganges, by the Damooda, and its tributary the Barrackur, the torrent flowing by Hazareebagh. Other streams flow northward, as the Mohana and Leelajan, passing into Behar; others again westward, discharging themselves into the river Koel; and a few small tributaries find their way southward through the channel of the Soobunreeka river into the Bay of Bengal. This great diversity in the directions of the watercourses indicates that the general elevation of the district is greater than that of the tracts surrounding it.

The inhabitants are in a low state of civilization, and live, thinly scattered over this spacious country, in small villages, consisting of wretched huts of hurdles, mud, and matting, covered with a thin roof of thatch. "The natives of these districts are principally agriculturists; many are occupied in trades of different kinds, and some are engaged as soldiers."
RAM.

They are in general temperate, industrious,* and tolerably cleanly in their houses and persons."

There are scarcely any places in this district which can properly be denominated towns. Ramgurh and Hazareebagh, which are the principal collections of dwellings, are described under their respective names in the alphabetical arrangement.

The population some years since was vaguely conjectured to amount to half a million. More recently it has been computed at 372,216,—a number far more consistent with probability.

The main course of communication from south-east to north-west, between Calcutta and the North-Western Provinces, lies through this district, in two distinct lines, nearly parallel, and at an average distance from each other of about twenty miles. That more to the south-west passes through Deigwar, Hazareebagh, Kukumsande, and Kanaehuttee; the other line, more to the north-east, is the grand trunk road, and passes through Doomree, Dhourara, and Churparun, shortening the route about three miles. The district of Ramghur is within the limits of the East-India Company in 1765, by Shah Alum, emperor of Delhi.

RAMGURH.—A town within the district of the same name. As it communicates its name to the surrounding tract of country, it may be presumed to have been formerly a place of some importance; but it is now utterly insignificant. Lat. 23° 42', long. 85° 30'.

RAMGURH, in the British district of Ramghur, territory of Sauger and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Sohagpoor to Nagpoor, 45 miles S.W. by S. of the former. Lat. 22° 49', long. 81° 1'.

The territory of which this town is the chief place, forms a subdivision under the jurisdiction of the political agent for the Sauger and Nerbudda provinces. Its population is returned at 41,766. The district was ceded to the British by the rajah of Nagpore, in commutation of subsidy.

RAMGURH.—A town of Malwa, in the native state of

Burbanee, 21 miles S.W. from Burwanee, and 67 miles N. from Dhoolia. Lat. 21° 50', long. 74° 49'.

RAMGURH, in the British district of Ajmeer, lieutenant-governorship of the North-West Provinces, a town on the route from Ajmeer to Oodeypoor, 39 miles S.S.W. of the former. Lat. 25° 59', long. 74° 32'.

RAMGURH,¹ in the Rajpoot territory of Shekhawutee, a town on the west frontier towards Beekaneer. It is a thriving² place, neatly fortified, and contains the residences of several wealthy bankers. Distance W. from Delhi 140 miles, N.W. from Jeypoor 100, E. from Beekaneer 108. Lat. 28° 9', long. 75° 5'.

RAMGURH.—A town in the Rajpoot state of Jeypoor, 41 miles N.W. by W. from Jeypoor, and 68 miles N.E. by N. from Ajmeer. Lat. 27° 15', long. 75° 21'.

RAMGURH, in the Rajpoot territory of Alwar, under the political management of the Governor-General's agent for Rajpooztana, a town on the route from Alwar, by way of Ferozpore, to Delhi, and 95 miles¹ S. of the latter. It has about 2,000 habitations,² small and wretched in the extreme, each generally not more than seven or eight feet long, and of the same width, and scantily covered with straw. According to the usual proportion of inmates to houses in this region, the number of inhabitants is probably about 10,000. Lat. 27° 35', long. 76° 52'.

RAMGURH, in the British district of Baitool, territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Baitool to Kurgoon, 54 miles W. of the former. Lat. 21° 49', long. 77° 8'.

RAMGURH.—A town in the native state of Gwalior, or territory of Scindia's family, 36 miles N. from Gwalior, and 34 miles S.S.E. from Agra. Lat. 26° 44', long. 78° 12'.

RAMGURH.—A town in the British district of Chittagong, presidency of Bengal, 48 miles N. by W. of Chittagong. Lat. 23°, long. 91° 43'.

RAMGURH,¹ in the hill state of Hindoor, a fortress on the steep and high ridge which, rising from the left bank of the Sutlej, has a south-easterly direction, and ultimately joins the Himalaya. In the beginning of November, 1814, at the commencement of the Goorkha war, it was invested by the British
ARMY under General Ochterlony, who, by a course of tedious yet wonderfully energetic and laborious operations, succeeded in conveying battering-guns up the precipitous and previously trackless declivity. The defences were in consequence speedily demolished, and the garrison capitulated. Elevation above the sea 4,054 feet. Distant N.W. from Calcutta 1,094 miles. Lat. 81° 5', long. 76° 51'.

RAMGURH, in the Rajpoot state of Jesulmeer, a fort and village 35 miles N.W. of the town of Jesulmeer, is situate at the termination of a low rocky ridge of recent formation, extending from Cutch in various ramifications, but generally in a northerly direction. Ramgurh is in lat. 27° 16', long. 70° 42'.

RAMGURH, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village with a bungalow, or public reception-house, on the route from Almora to Bareilly, and 19 miles S.W. of the former. Water is scarce here; supplies, however, are abundant, though Heber was struck by the general indigence of the population. "The houses, people, children, and animals showed marks of poverty. Almost all the children were naked, and the grown persons, except their black blankets, had scarcely a rag to cover them. The houses were ranged in a line, with a row of still smaller but opposite, which seemed to be for their cattle, though in England they might have passed for very poor pig-sties. The houses indeed were little better, none of them high enough to stand up in; the largest not more than ten feet square, and the door, the only aperture, a square hole of about four feet every way." This place had formerly a fort, as the name indicates, but it has been allowed to fall to decay. Elevation above the sea 4,872 feet. Lat. 29° 27', long. 79° 37'.

RAMGURRAH.—A town of Bundelcund, in the native state of Punnah, situate 48 miles S. by E. from the town of that name, and 69 miles N.N.E. from Jubbulpore. Lat. 24° 3', long. 80° 28'.

RAMGURTAL, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a jhil or shallow lake close to the cantonment of Goruckpore. At the close of the rainy season it is about six miles long and three broad, but even at that time is shallow and overgrown with

RAM.

weeds, and in the shoaler parts with aquatic trees. As the hot, dry season advances, the vegetation increases, and the water diminishes, and becomes dirty and crowded with reptiles and insects, the decaying remains of which, and of the vegetation, produce malaria. During the rainy season, when the jhil and the contiguous river Raptee swell, so as to communicate, this malaria is either mitigated or totally suspended. Lat. 26° 46', long. 83° 24'.

RAMJUNDAH.—A town in the British district of Palamow, presidency of Bengal, 24 miles W. by S. of Palamow. Lat. 23° 46', long. 83° 40'.

RAMKOLA, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town on the route from the cantonnment of Goruckpore to Betiya, 28 miles E. of the former, 54 W. of the latter. Buchanan styles it a market-town, yet elsewhere states that it does not deserve the name of town. It has, however, a bazar, and supplies and water are abundant. Distant N.W. from Dinapore 110 miles. Lat. 26° 50', long. 83° 56'.

RAMMAGHERRY.—A town in the British district of Madura, presidency of Madras, 58 miles N. of Madura. Lat. 10° 41', long. 78° 12'.

RAMMESSWUR.—A town in the British district of Pooree, presidency of Bengal, 28 miles N.W. by W. of Juggurnaut. Lat. 20° 1', long. 85° 33'.

RAMNAD, in the British district of Madura, presidency of Madras, a town, the principal place of an extensive semindarry or feudal estate of the same name, is situate five or six miles from the seacoast of Palk's Bay, and about a mile and a half from the right bank of the river Vigai or Viguairu. "It is about two miles and a half in circumference, surrounded by a wall and a ditch, and defended by numerous small bastions, but the works are now in a ruinous condition, and the ditch nearly filled up. Though the streets are narrow and ill contrived, the houses are moderately well built. There are a few mosques, which, though not conspicuous, are by no means inelegant. The fort is contiguous to the town, on the west of it, and between them runs a wide street, with two rows of bazaars regularly built. The ground-plan of the fort is an equilateral quadrangle, the sides of which respectively facing
the cardinal points, are each half a mile in length, and consist of a single wall twenty-seven feet high and five feet thick, without rampart, but with loopholes, and surrounded by a ditch. There are thirty-two bastions and one gateway, which is on the east side. In the centre stands the palace or residence of the zemindar. This fort was built about two hundred years ago, by Moghava Ragunatha Setupatti, who at the same time constructed the large reservoir or tank on the north side. Contiguous to the palace is a handsome residence, built by Colonel Martinez, who for nearly forty years commanded here, and near it a small but neat Protestant church, kept in good repair. The few principal streets, which are within the fort, are wide and airy. There are, however, several mean streets, with mud-built houses. The number of inhabitants within the fort is about 5,000, principally dependent on the zemindar. The only manufacturing industry worth notice in the town, is that of coarse cloths for native wear; any other business is trade in provisions and wares for the supply of the population. This place is garrisoned by a company of native troops. It is a hot station, but the evenings are usually cool, from the influence of the sea-breeze, and altogether it is a very healthy place. Distance from Palamkotta, N.E., 87 miles; Madura, S.E., 60; Tanjore, S., 100; Madras, S.W., 275. Lat. 9° 24', long. 78° 50'.

RAMNAGAR, in the district of Aldemau, territory of Oude, a village on the route from Pertabghur to Fyzabad, 45 miles N. of the former, 18 S. of the latter. Butter estimates its population at 400, all Hindus. Lat. 26° 24', long. 82° 56'.
RAM.

RAMNEGHUR, or RAMNUGGUR, in the Punjab, a walled town close to the left or east bank of the Chenab, stands on a spacious plain, where, during the reign of Runjeet Singh, the Sikh troops frequently mustered for campaigns to the westward. There is a ferry here across the Chenab, which, at its lowest season, was found to be 300 yards wide, and for the most part nine feet deep, running at the rate of a mile and a half an hour. Two miles below the town there is, however, a ford, where the depth does not exceed three feet when the water is low. This place was called Rasulnuggur, or "Prophet's Town," until stormed in 1778 by Maha Singh, the father of Runjeet, when it received the present name, signifying the "town of God." Lat. 32° 20', long. 73° 50'.

RAMNUGGUR.—A town in the dominions of Golab Singh, the ruler of Cashmere, 95 miles S.S.E. from Sirinagar, and 100 miles N.E. from Lahore. Lat. 32° 45', long. 75° 25'.

RAMNUGGUR, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town near the south-eastern frontier, towards the British district of Sarun. According to Buchanan, it contains 200 houses. Distant S.E. from Goruckpore cantonment 50 miles. Lat. 26° 10', long. 84° 2'.

RAMNUGGUR, in the British district of Minporee, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to the cantonment of Minporee, and 25 miles W. of the latter. The road in this part of the route is laid under water to the depth of from one to three feet during the periodical rains in the latter part of summer, at other times it is tolerably good; the country is flat and partially cultivated. Lat. 27° 8', long. 78° 45'.

RAMNUGGUR.—A town in the British district of Sarun, presidency of Bengal, 80 miles N.N.W. of Bettiah. Lat. 27° 9', long. 84° 23'.

RAMNUGGUR.—A town in the native state of Rewah, situate on the left bank of the Sone river, and 23 miles S. from Rewah. Lat. 24° 10', long. 81° 20'.

RAMNUGGUR, in the British district of Futtehpore, lieutenant-governorship of the North-West Provinces, a town on the right bank of the Ganges, 879 miles from Calcutta by way
of the river, and 71 miles by water above Allahabad; 24 miles by land E. of the town of Futtehpore. Lat. 25° 55', long. 81° 15'.

RAMNUGUR, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a small town on the route, by the Kutra Pass, from the cantonment of Allahabad to Rewa, and 26 miles S.E. of the former. The road to the north-west, or towards Allahabad, is much cut up by ravines, to the south-east it is good, and the country is well cultivated. Lat. 25° 15', long. 82° 11'.

RAMNUGUR.—A town in the native state of Oude, situate on the right bank of the Gogra river, and 55 miles E. from Lucknow. Lat. 26° 47', long. 81° 53'.

RAMNUGUR, in the British district of Benares, lieutenant-governorship of the North-West Provinces, a town on the right bank of the Ganges, and at present the residence of the titular rajah of Benares. The fort in which the rajah resides is a huge pile of building, rising directly from fine ghats or flights of stairs, giving access to the sacred stream. Ramnugur contains a population of 9,490 inhabitants, and is distant N.W. of Calcutta 673 miles by water, or 860 taking the Sunderbund passage; four miles S. of the city of Benares, or higher up the stream; 425 from Calcutta by the new line of road. Lat. 25° 16', long. 83° 5'.

RAMNUGUR, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a town on the route from Shahjehanpoor to Pilleebheet, 40 miles N. of the former. Lat. 28° 28', long. 79° 58'.

RAMOO.—A town in the British district of Chittagong, presidency of Bengal, 68 miles S.E. of Chittagong. Lat. 21° 24', long. 92° 13'.

RAMOO SERAI.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 17 miles S. from Srinagar, and 75 miles N. from Jamoo. Lat. 38° 50', long. 74° 58'.

RAMPOOR, in the British district of Saharanpooor, lieutenant-governorship of Agra, presidency of Bengal, a town, the

* According to Hamilton, built of stone. He also mentions "two spacious streets, crossing each other at right angles, which compose the existing town of Rannaghur." Daniell has given a splendid view of the fort or residence of the rajah, and also of a noble baoli or well. 287
RAM.

principal place of the pergunnah of the same name, is in lat. 29° 48', long. 77° 31'.

RAMPOOR.—A town in the British district of Malabar, presidency of Madras, 71 miles E. by S. of Cannanore. Lat. 11° 42', long. 76° 29'.

RAMPOOR.—A town in the native state of Guzerat, or dominions of the Guicowar, 64 miles E. by N. from Baroda, and 112 miles E.S.E. from Ahmedabad. Lat. 22° 26', long. 74° 12'.

RAMPOOR.—A town in the British district of Bellary, presidency of Madras, 63 miles N.E. by N. of Bellary. Lat. 15° 56', long. 77° 24'.

RAMPOOR, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Seetapore, and 32 miles S.W. of the former. The road in this part of the route is good, the country open and partially cultivated. Lat. 28° 15', long. 79° 57'.

RAMPOOR, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a town on the right bank of the river Jumna, 23 miles N. of Muttra. Rampoor contains a population of 11,711 inhabitants. Lat. 27° 50', long. 77° 38'.

RAMPOOR, in the British district of Mirzapoor, lieutenant-governorship of the North-West Provinces, a village on the left bank of the Ganges, 12 miles N.W., or higher up the stream, than the city of Mirzapoor; 733² N.W. of Calcutta by water, or 910 if the Sunderbund passage be taken. Lat. 25° 14', long. 82° 30'.

RAMPOOR, in the British district of Allygurb, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, and 45 miles N.E. of the former. The road in this part of the route is good, the country level and partially cultivated. Lat. 27° 43', long. 78° 28'.

RAMPOOR, in the British district of Subharunpoor, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pergunnah of the same name, is in lat. 29° 48', long. 77° 31'.

RAMPOOR, in the district of Salon, territory of Oude,
RAM.
a town on the route from Cawnpore to Pertabgurh, 26 miles N.W. of the latter. Butter estimates the population at 4,000, principally cultivators, 1,000 of the number being Mussulmans. The zemindar or proprietor resides in a fort, and has 1,000 armed followers, to protect him from the oppression of the government. Lat. 25° 53', long. 81° 47'.

RAMPOOR, in the district of Aldemau, territory of Oude, a town near the north-east frontier, towards the British district of Goruckpore. A considerable quantity of sugar is made there. Butter estimates the population at 1,000, including 300 Mussulmans. Lat. 26° 36', long. 82° 12'.

RAMPOOR.—A town of Bussahir, in the division of Koonawar, situate on the left bank of the Sutlej river, and 36 miles N.E. from Simla. Lat. 31° 27', long. 77° 41'.

RAMPOOR.—A town of Baghelcund, in the native state of Rewah, situate on the left bank of the Sone river, and 20 miles S.E. from Rewah. Lat. 24° 19', long. 81° 33'.

RAMPOOR.—A town in the native state of Oude, situate on the left bank of the Ghogra river, and 138 miles N.N.W. from Lucknow. Lat. 28° 46', long. 80° 23'.

RAMPOOR.—A town in the recently lapsed territory of Nagpoor, 98 miles N.W. from Nagpoor, and 47 miles S.E. from Hoosungabad. Lat. 22° 18', long. 78° 17'.

RAMPOOR.—A town in the native state of Oude, situate on the left bank of the Chowka river, and 40 miles N.E. by N. from Lucknow. Lat. 27° 20', long. 81° 22'.

RAMPOOR.—A town in the native state of Nepal, situate on the right bank of the Gunduck or Salagra river, and 93 miles W. from Khatmandoo. Lat. 27° 46', long. 83° 49'.

RAMPOOR.—A town in the British district of Rajeshaye, presidency of Bengal, 125 miles N. of Calcutta. Lat. 24° 23', long. 88° 33'.

RAMPOOR, within the British division of Rohilcund, an extensive fief or jaghire, is bounded on the west and north by the British district of Moradabad; on the north-east and south-east by the British district of Bareilly. It lies between lat. 28° 30'—29° 11', long. 78° 55'—79° 30', and has an area of 720 square miles. It is a level, fertile country, abundantly supplied with water in its northern division by the rivers Kosila and Nahul, both of which hold a course generally
RAMPOOR.

southerly, and nearly parallel to each other; the latter on an average about ten miles east of the former. The southern division is irrigated by the Ramgunga, which, after receiving the waters of the Kosila, traverses this quarter of the territory in a south-easterly direction. The northern part of the district adjoins the Terai, or tract of marshy forest which extends along the base of the mountains, and is much overrun with jungle, wood, and grass, of such luxuriant growth as to be sufficient to conceal a man on horseback. The air in consequence is dreadfully pestilential, except in the coldest part of winter and the time of the heaviest rains. The malaria acts very unfavourably on the population, who are described by Heber as "a very ugly and miserable race of human beings, with large heads and particularly prominent ears, flat noses, tumid bellies, slender limbs, and sallow complexions; and have scarcely any garments but a blanket of black wool." The general slope of the country is from north to south, as indicated by the descent of the rivers in that direction, as well as from actual measurement; Ruddurpoor, on the northern frontier, in lat. 28° 58', having an elevation of 630 feet above the sea, whilst at the town of Rampoor, a few miles farther south, in lat. 28° 48', the elevation is but 546 feet. Davidson describes the country in the vicinity of the town of Rampoor as exceedingly "rich and beautiful. The eye wanders with delight over one continuous sheet of ripening corn, interspersed with groves of mango, clumps of bamboo, and little villages." The general thriving cultivation of the country bears favourable testimony to the industry and intelligence of the Patans, the principal occupants of the soil. The population has been computed at upwards of 320,000. The annual revenue is at present estimated at 100,000l. The nawaub maintains a military force of 500 cavalry and 1,447 infantry.

This territory was possessed by Fyzoola Khan, a chieftain who gave considerable trouble both to the Vizier and the British government, during the administration of the latter by Warren Hastings. On the death of that personage in 1794, the pretensions of his eldest son and lawful successor were opposed by a younger brother, who raised a rebellion, made prisoner the rightful heir, and subsequently murdered him. A British force under Sir Robert Abercrombie defeated that of
the usurper; an event followed by the deposal of the latter, and the grant of a jaghire to the infant son of the murdered chieftain. On the death of the late chief, in 1840, without direct male heirs, the right of a daughter to the succession was discussed and rejected in favour of the next male claimant, Mahomed Saeed Khan, who had served the British government in the important office of deputy-collector of Budaon. Some disturbances took place previously to the final arrangement of the succession, in which the minister of the deceased chieftain and some of his dependants and followers were murdered. Their families were provided for by the new ruler, who, according to report, exercises his authority mildly and judiciously.

**RAMPoor.**—The principal place of the jaghire of the same name. It is situate on the left bank of the Kosila, here 450 yards wide, and from two feet to two and a half deep from December to June, for which time it is fordable, but must during the rainy season be crossed by ferry. It is a large town, densely peopled, irregularly built of mud, and surrounded by a thin belt of bamboos, trees, and brushwood; at the back of which there is a low ruined parapet, the only entrance being by narrow ways, defended by strong wooden barriers. The upper order of inhabitants are for the most part Robilla Patans, a handsome indolent race. The chouk or market-place is decorated by a lofty mosque.* A little north of the town is the tomb of Fyzoola Khan, raised on a terrace of masonry, and shaded by trees. Rampoors is 546 feet above the sea. Distant N.W. from Calcutta 789 miles. Lat. 28° 48', long. 79° 5'.

**RAMPoor,** the capital of Bussahir, is situate on the left bank of the Sutluj, over the bed of which its site is elevated 1382 feet. Fraser, who approached it from the south-east, by ascending along the left bank of the Sutluj, describes the way as very rugged. The town is situate at the western base of a lofty and nearly perpendicular mountain, which, on the east, stretches to the outer range of the Himalaya. The cliff surrounds the town in the form of a funnel, which confines the

---

* Hamilton states, "During the lifetime of Fyzoola Khan, Rampoor was very prosperous, and at his death comprehended a space four miles in circumference, surrounded by a thick bamboo hedge, within which were mud fortifications, and contained above 100,000 inhabitants."
RAM.

air; and in the hot season the rocks radiate the heat in such a manner as then to render the climate nearly insupportable. The climate in winter, on the contrary, is represented as cold and damp, so that the thermometer is frequently lower than at Kotgurh, which is 3,500 feet more elevated. The expanse on which the town is built is rugged, so that the streets and houses rise in tiers one above another. Some of the houses are well built of stone, commonly two stories high, and covered with slate, which is thick, of a blue colour, and laid on with considerable neatness. The palace of the rajah, situated at the north-east corner of the town, is a collection of buildings, some of three, some of four stories high, covered with very large oblong slates, laid on curved roofs, having the concavity outwards, in the Chinese style. They have wooden balconies, ornamented with neat carvings. The Dewan Khana, or hall of audience, has the remains of grandeur, being spacious and ornamented with carving and fresco, much defaced by the Gorkhas when they held this town. There is another residence usually occupied by the inferior branches of the ruling family. Both the palaces are built of stone, uncemented, but bonded by means of numerous beams of larch. The town, previously to the havoc made by the Gorkhas, was larger than at present, having from 300 to 400 houses, and a large bazar, filled with the wares of Hindostan, the Himalayan regions, and of Tartary. It has begun to recover since it has been taken under British protection. The rajah of Bussahir resides here during winter, retiring from the heat in the summer months to the more elevated station of Saharan. The elevation of Rampoor above the sea is 3,300 feet. 6  

Lat. 31° 27', long. 77° 40'.  

RAMPOOR SHAHPOOR, in the British district of Allygurh, lieutenant-governorship of the North-West Provinces, a village on the route from Meerut to Muttra, and 44 miles N.E. of the latter. The road in this part of the route is good; the country open, with a sandy soil, partially cultivated. Lat. 28° 3', long. 77° 55'.  

RAMPOORA.—A town in the native state of Indore, or territory of Holkar, 34 miles E. from Neemuch, and 124 miles N. by W. from Indore. Lat. 24° 26', long. 75° 26'.  

RAMPOORA, 1 in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on
the route from the cantonment of Etawa to that of Cawnpore, and 45\textsuperscript{2} miles W. of the latter. The road in this part of the route is rather good, the country cultivated. Lat. 26° 21', long. 79° 46'.

RAMPOORA,\textsuperscript{1} in Rajpootana, a town, the principal place of a pargannah, part of the possessions\textsuperscript{2} held by the noted Patan freebooter Muhammad Ameer Khan. It is surrounded by a rampart of great strength, being in some places forty feet in thickness, and where weakest twenty feet. It was on the 15th May, 1804, taken by storm by a British force commanded by Colonel Don. The storming party rushed forward, provided with a twelve-pounder,\textsuperscript{3} and with it blew open three gates, which in succession lay on the way into the fort. Of the enemy's garrison, above 1,000 strong, forty or fifty were killed; the number of wounded was very great, and about 400 attempting to fly, were cut up by the British cavalry in the adjoining plain. It was subsequently, by the declaratory article of the treaty of 1805,\textsuperscript{5} restored by the British government to Holkar, and in 1818, when the battle of Mahidpore had placed Holkar's dominions at the disposal of the British government, Rampoor was\textsuperscript{6} added as a free gift to the possessions which had been guaranteed in the previous year to Ameer Khan. The area of the territory is 152 square miles. Its separate revenue is not known, but with that of Tonk it amounts to 2,00,000 rupees. The estimate of its population is included in that of the whole of the possessions of Ameer Khan, for which see Tonk. The town is distant 8. from Jeypore 70 miles, S. from Nusserabad 90, W. from Agra 145. Lat. 25° 58', long. 76° 14'.

RAMPOORA,\textsuperscript{1} in the territory of Indor, or possessions of Holkar's family, a town on the route\textsuperscript{2} from Neemuch to Kota, formerly the capital and residence\textsuperscript{3} of the court, before the selection of the town of Indor. It is situate a mile from the north bank of the river Taloyi,\textsuperscript{*} at the base of a ridge of hills. It is of considerable size, surrounded by a wall, and has a good bazar. North-east of the town is a Hindoo temple, a place of pilgrimage in the month of April. Here, in January, 1818, Roshun Beg,\textsuperscript{4} in command of a body of infantry with sixteen guns, the relics of the force defeated at Mehidpoor,

* According to Garden, Toolsee.
RAM.

attempted to make head against the British arms, but was immediately defeated, and his troops dispersed. Rampoora has annexed to it several pergunnahs, containing 500 villages, and yielding an annual revenue of 8,75,000 rupees. Elevation above the sea 1,360 feet. Distance N. from Indor 120 miles, from Oojine 95. Lat. 24° 28', long. 75° 25'.

RAMPOORA.—A town in the native state of Gwalior, or territory of Scindias's family, 123 miles S.W. by S. from Gwalior, and 120 miles N.W. by W. from Saugur. Lat. 24° 45', long. 77° 11'.

RAMPOOREA, in the British district of Bareilly, division of Pilibhit, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Petoragurh, and 37 miles N.E. of the former. The road in this part of the route is bad; the country low, level, fertile, and well cultivated. Lat. 28° 41', long. 79° 52'.

RAMPOREE,¹ in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a town five miles S.E. from Nujeebad: it contains a population of 8,207² inhabitants. Lat. 29° 34', long. 78° 29'.

RAMPORA, in the territory of Gwalior, a town five miles south of the confluence of the Sindh with the Jumna. Lat. 26° 22', long. 79° 6'.

RAMPORE,¹ in the British district of Jounpoor, a town on the route from Jounpoor cantonment to that of Mirzapoor, 21² miles S. of the former, 22 N. of the latter. Supplies and water are abundant and good here, and the road in this part of the route is good. Lat. 25° 29', long. 82° 38'.

RAMPORE.—A town in the British district of Tipperah, presidency of Bengal, 52 miles N. of Tipperah. Lat. 24° 13', long. 91° 10'.

RAMREE.—A town in the British district of Arracan, presidency of Bengal. It is sicate on the island of Ramree, 31 miles S.E. of Kyouk Phyou. The island is separated from the mainland of Arracan by a narrow but deep channel. Its length is about fifty miles from north to south, and its extreme breadth twenty. After the occupation of Arracan in 1825, a British detachment was sent against Ramree, which, upon approaching, they found to be evacuated; possession of it was accordingly taken on the 22nd April, and since that period it

has continued under the government of the East-India Company. Lat. of town 19° 5', long. 93° 54'.

RAMRYE, one of the Cossya hill states, bounded on the north by the British district of Camroop; on the south-east by the native states of Muriow and Nustung; and on the west by the territory occupied by the Garrow hill tribes. It is about forty miles in length from north to south, and twelve in breadth, and contains an area of 328 square¹ miles. Its centre is in lat. 25° 35', long. 91° 13'.

RAMSAHGAON.—A town in the British district of Nowgong, in Upper Assam, presidency of Bengal, 46 miles S.E. by E of Nowgong. Lat. 25° 59', long. 93° 22'.

RAMSURBA, in the British district of Bhtteeana, lieutenant-governorship of the North-West Provinces, a town on the route from Hissar to Mooltan, 74 miles W. by N. of the former. Lat. 29° 23', long. 74° 38'.

RAMTEAK,¹ in the territory of Nagpore, on the route from Saugor to Nagpore, 24² miles N.E. of the latter, a town on an elevated ground, the geological formation of which is primitive,³ being either granite or gneiss. East of the town is a steep peaked hill, on the summit of which, about 500 feet above the circumjacent plain, is a group of Brahminical temples, access to which from below "is by a broad⁴ steep flight of well-laid gneiss steps, with resting-places and seats at intervals. The whole is of the best construction, and promises to last as long as the hill itself." East, south, and west, the view is extensive over the plain of Nagpoor, varied with villages, tanks, and mango-groves; and to the north the view is over a valley of similar character, about two miles in width; beyond which extends the first range of hills, covered with jungle, and in the distance rising in gradations to the great Vindhya range. The principal temple and accompanying buildings are dedicated to Rama, whose votaries make a grand jatra or pilgrimage⁵ thither annually, commencing on the full moon of the lunar month Kartik, and lasting ten days. It is frequented by persons from all parts of the Nagpoor territory, and from such portions of that of the Nizam as lie north of the Godavery; and it is computed 100,000 persons then resort to it. In the valley north of the temples is a large fine tank, round which are several small handsome edifices, dedicated to religious purposes,

RAM—RAN.

and communicating with the group on the top of the hill by a noble, easy, and lofty flight of steps formed of gneiss. Lat. 21° 24', long. 79° 22'.

RAMUREDDYPET.—A town in the native state of Hyderabad, or territory of the Nizam, 76 miles N. from Hyderabad, and 17½ miles E.N.E. from Sholapur. Lat. 18° 27', long. 78° 25'.

RANA,1 in Gurhwal, a village on the left bank of the Jumna, consists of about twenty houses, neatly built of stone,2 and roofed with shingles. The sides of the hills sloping to the river are fertile, producing grain and potatoes, the culture of which latter has been recently introduced into this part of the Himalayan regions. Elevation above the sea 7,084½ feet. Lat. 30° 55', long. 78° 26'.

RANAUSUN.—A town in the province of Guzerat, or dominions of the Guicowar, 87 miles S.E. from Deesa, and 48 miles N.E. from Ahmedabad. Lat. 23° 28', long. 73° 9'.

RANEEBULA, in the British district of Bhuttiana, lieutenant-governorship of the North-West Provinces, a village on the route from Hansee to Bhutnair, and 28 miles E. of the latter. The surrounding country is sandy and barren, and the road in this part of the route heavy and bad. Lat. 29° 32', long. 74° 40'.

RANEE GODOWN.—A town in the British district of Camroop, in Lower Assam, presidency of Bengal, 14 miles S.W. of Gowhatty. Lat. 26°, long. 91° 35'.

RANEENGUNGE,1 * in the British district of Banoora, presidency of Bengal, a town four miles to the left or S.W. of the route from Calcutta to Benares, 128 miles N.W. of former, 295 S.E. of latter. It is situate on the river Damodah, amidst the rich coal-measures generally known as the Burdwan Collieries. The geological formation, according to Jacquemont,2 is—1. Superficial stratified sandstone, effervescing, and about thirty feet thick; 2. sandstone, scarcely effervescing but very hard, and about a yard thick; 3. argillaceous schist, containing marks of vegetables; 4. workable coal, at

* Raneengunge, Princess Town; from Ranee, "princess," and Gunge, "market." "The popular name of Raneengunge is derived from the proprietary rights of one of the collieries having been vested in the late ranee of Burdwan."

1 Journ. As. Soc. Beng. 1849, p. 728
—Homfray, on Coal-field of Damoodah.

2 Skinner, Excursions in India, l. 263.
3 Jacqueuont, Voyages, il. 78.
4 Voyages, il. 276.
the depth of seventy-five feet, and ten feet thick; 5. hard micaceous schist, four inches thick; 6. coal, eight inches thick, not worked; 7. schist, marked with vegetable productions, and four inches thick; 8. coal, a foot thick, loaded with pyrites, and not worked; 9. argillaceous ironstone; 10. gneiss, alternating with mica-schist. Ten years later, the state of the coal-measures is thus described by an operative miner:—"These collieries have their pits sunk down to the main vein of coal, generally to a depth of ninety feet, the vein varying from seven and a half to eight and a half feet in thickness." "This vein of coal is perceptible for seven or eight miles up this nullah." That the district is rich in coal and iron mines, is universally admitted. Some difference of opinion exists on the point whether the latter could be worked at a profit; but the construction of a branch from the Calcutta Railway, diverging in the vicinity of Burdwan, and extending to this town, has been sanctioned; and upon its completion, the conditions under which the manufacture of iron could now be undertaken must be materially altered. Distant N. from the civil station at Bankoora 25 miles; from Calcutta, N.W., by line of railroad, 120. Lat. 23° 35', long. 87° 10'.

RANEEPOOR, in the British district of Azimgurh, lieutenant-governorship of the North-West Provinces, a town on the route from Azimgurh to Ghazeepoor, 17 miles E.S.E. of the former. Lat. 25° 53', long. 83° 29'.

RANEE SERAE,1 in the British district of Azimgurh, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Azimgurh to that of Joumpore, eight2 miles S.W. of the former, 34 N.E. of the latter, 50 N. of Benares. Lat. 26°, long. 83° 7'.

RANEEESUNKER.—A town in the British district of Dinajepore, presidency of Bengal, 30 miles N.W. of Dinajepore. Lat. 25° 50', long. 88° 17'.

RANEEUH,1 in the British district of Bhuttiana, lieutenant-governorship of the North-West Provinces, a town on the route from Hansee to Bhutnair, and 36 miles E. of the latter. It is situate in a country of great natural fertility, but generally unproductive, from want of water, the river Gagur or Cuggur, which formerly inundated it, being so much exhausted by embankments and channels for irrigation higher up, in the
possessions of the protected Sikhs, that the stream is, in ordinary seasons, lost before reaching Raneuuh. When those embankments have been cut, and the stream allowed to flow to Raneuuh, luxuriant crops of very fine wheat have been produced in great abundance. The town has a tolerably well-supplied bazar and sufficiency of water. The road to the eastward is very good, though, lying for some distance in the bed of the Gagur, it is liable to be overflowed in the event of extraordinary inundations, when the stream reaches this part of the country. To the west, the road is generally good, though sandy in some places. Lat. 29° 32', long. 74° 53'.

**RANEH BEDNORE.**—A town in the British district of Dharwar, presidency of Bombay, 72 miles S.E. by S. of Dharwar. Lat. 14° 37', long. 75° 41'.

**RANGAMUTTEE.**—A town in the British district of Chittagong, presidency of Bengal. It is situate on the right bank of the Kurrumfoolee river, 44 miles E.N.E. from Chittagong. Lat. 22° 40', long. 92° 30'.

**RANGNA.**—A town in the native state of Sawuntwarree, presidency of Bombay, situate 12 miles N.W. from Sawuntwarree, and 49 miles W.N.W. from Belgaum. Lat. 16° 3', long. 73° 53'.

**RANGOON.**—A town in the recently acquired British province of Pegu, situate on the great eastern branch of the Irrawaddy known as the Rangoon river. The town was originally built in 1753, by Alompra, the founder of the Burmese monarchy, who named it Rangoon, or the "City of Victory," in reference to his conquest of Pegu. When occupied by the British during the first Burmese war, in 1824, it was built in the form of a parallelogram, extending along the river's bank, about twenty-five miles from the sea, the houses, with the exception of some public buildings, being of wood and bamboo, raised on piles, and thatched. It was entirely destroyed by fire in 1850, when upwards of 2,000 houses were reduced to ashes. The site of the new town by which it was succeeded was thrown back from the original position on the river bank to a distance of about a mile; its ground-plan was that of a square of about three-quarters of a mile, having at its northern side a pagoda as a citadel, which was an artificial mound, ascending in ledges, with terraces, and tapering towards the
RAN.

top. This stronghold was stormed by General Godwin during the second Burmese war, in April, 1852; and the capture of the pagodas was the fall of Rangoon: the town suffered severely by fire from the shipping. In 1853 it was visited by another fearful conflagration; many of the public buildings were destroyed, and the houses, being constructed of hollow bamboo and thatched, offered little resistance to the progress of the fire. In the arrangements for rebuilding the town, conditions have been prescribed by the British government not only for insuring its protection against conflagration, but also for securing its cleanliness, by proper drainage and other sanitary precautions.3

Distant from Pegu, S., 62 miles. Lat. 16° 46', long. 96° 17'.

RANGOUTTEE.—A town of Bengal, situate in the native state of Tipperah, 40 miles S. by E. from Silhet, and 80 miles N.E. by N. from Tipperah. Lat. 24° 20', long. 92°.

RANIGAT, in the Peshawar division of the Punjab, a town situated 15 miles from the right bank of the Indus, 53 miles N.E. by E. of the town of Peshawar. Lat. 34° 20', long. 72° 30'.

RANIGHAT, in the British district of Nuddea, presidency of Bengal, a town 44 miles N. by E. from Calcutta. It is said to be the abode of many rich zemindars.1 Lat. 23° 11', long. 88° 33'.

RANIWALA, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from Allyghur to Moradabad, and 50 miles N.E. of the former. Water is abundant, but supplies must be collected from the neighbouring villages. The road in this part of the route is bad; the country low, level, and partially cultivated. Lat. 26° 30', long. 79° 29'.

RANJITPURA,1 in the district of Bainswara, territory of Oude, a town 22 miles E. of Cawnpore, 30 S.W. of Lucknow. It may be considered the capital of the district, and formerly was scarcely inferior2 to Lucknow. Here is a mud-built fort, mounting twelve pieces of artillery, and held by a foudjar or commandant of police. There are many old market-places of masonry, and substantial new houses: cutlery is the only manufacture. Lat. 26° 30', long. 80° 40'.

RANJUNGAUM.—A town in the British district of Ahmednuggur, presidency of Bombay, 17 miles S.W. by S. of Ahmednuggur. Lat. 18° 53', long. 74° 37'.
RANKA.—A town in the British district of Palamow, presidency of Bengal, 26 miles N.W. by W. of Palamow. Lat. 21° 2', long. 83° 42'.

RANMUTSII.—A town in the native state of Nepal, situate on the right bank of a branch of the Kurnalli river, and 16 miles E.N.E. from Jemlah. Lat. 29° 22', long. 81° 56'.

RANNEE CHOKEE.—See BUNNEE CHOKEE.

RANOD,¹ in the territory of Gwalior, or possessions of Scindia's family, a town three miles to the right or N. of the route from Calpee to Goona cantonment, 155 miles² S.W. of former, 50 N.E. of latter. It is represented³ to be "a large town, with a great trade in grain." Measures were taken by the British government in 1847 for exploring the antiquities of the town.⁴ Lat. 25°, long. 77° 53'.

RANSEE, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a secluded village two or three miles to the right of the route from Sireenuggur to the Temple of Kedarnath, and 15 miles S. of the latter. It is situate about a mile from the right bank of the river Mudmesur. Lat. 30° 34', long. 79° 10'.

RANSKANDY.—A town of Eastern India, in the British district of Southern Cachar, presidency of Bengal, 10 miles E. of Silchar. Lat. 24° 47', long. 98°.

RAOLDEE.—A village in the jaghire of Jujhur, district of Dadree, lieutenant-governorship of the North-West Provinces. Lat. 28° 36', long. 76° 21'.

RAOMAKA BAZAR.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 88 miles S.E. by S. of Hyderabad. Lat. 24° 20', long. 69° 14'.

RAOTSIR.—A town in the Rajpoot state of Beekaneer, 115 miles N.E. from Beekaneer, and 81 miles W. by N. from Hissar. Lat. 29° 18', long. 74° 30'.

RAPTEE,¹ called also AIRAWATI,² after the white elephant of the god Indra, a considerable river, rising in Nepaul. It does not issue from the main range of the Himalaya, covered with perpetual snow, but takes its rise in the Sub-Himalayas, in lat. 29° 10', long. 82° 45'; whence flowing first in a southerly direction for forty miles, and then north-westerly for fifty-five miles, it enters the plains of Oude, in lat. 28° 3', long. 81° 55', which it traverses in a south-easterly
RAPTEE.

direction for ninety miles, and in lat. 27° 17', long. 82° 32', forms for about twenty miles the western boundary of the British district of Goruckpoor, which it then enters, and continuing a south-easterly and tortuous course for seventy miles, it receives, on the left side, the Dhumela or Burha Rapti, draining an extensive tract extending southwards from the Sub-Himalaya. Below this junction, the Rapti turns southward for the distance of thirty miles, communicating in this part of its course with the Moti jhil, called also the Lake of Bakhira, and thence turns westward for ten miles, to the town of Goruckpoor. From this place it continues its course, in a circumcuous but generally south-easterly direction, for eighty-five miles, to its junction with the Ghoghra, on the left side of the latter, in lat. 26° 13', long. 83° 46'; its total length of course being, from its remotest source, 400 miles, for eighty-five of which downward from the town of Goruckpoor it is navigable for large boats, and for those of smaller size a considerable distance higher. In its course through the district of Goruckpoor, it receives numerous streams right and left, and by lateral channels communicates with several of the numerous water-courses and lakes or marshes found in this level, alluvial country. At the town of Goruckpoor it is crossed by the route from that place to Lucknow, the passage being made by ferry. The channel is there 200 yards wide, and at all seasons contains deep water. About ten miles below the town, it is crossed, at the Bhowapoor ghat, by the route from Ghazeepoor to Goruckpoor cantonment, the passage being made by ferry during the dry season, but the route being scarcely practicable during the rains, in consequence of the extent to which the country is overflowed.

RAPTEE† (BURHA).*—A considerable feeder of the Rapti. Its sources are in the Sub-Himalaya, in the territory of Oude, and about lat. 27° 34', long. 82° 10'. Flowing for forty-five miles through the territory of Oude, it touches the frontier of the British district of Goruckpoor in lat. 27° 22', long. 82° 36', and holding an easterly direction for nineteen miles, forms the boundary between the two territories. At the point of

* Burha, "old"—Old Rapti. The tradition among the natives asserts that this was once a channel of the great Rapti, though having now no communication with it, except at the confluence.

8 Buchanan, Survey of Eastern India, ii. 309. Trigonometrical Survey, Map of Goruckpore.
RAR—RAS.

its entrance into the British territory, it receives on the left side the Arta, a stream descending from the Sub-Himalayas. Eighteen miles below this confluence, at the ruined town of Sanauli, the Burha Raptee becomes navigable in the rainy season, and a good deal of timber is then sent down it. Fifteen miles below this place, and in lat. 27° 13', long. 83° 1', it receives on the left side the Bangunga; and from the confluence downwards is often known by the name of that stream, which is considered to have the larger volume of water. Twenty-two miles farther, the Burha Raptee receives on the left side the Dhumela, which thenceforward gives its name to the united stream. Buchanan observes, "The channel immediately below the junction is about 100 yards wide, and in January (dry season) contains a pretty considerable stream, although it is fordable; but oxen cannot pass with loads, and a ferry is therefore employed to transport the goods. Timber comes down both the Burha Raptee and Bangunga." Twelve miles below the last-named junction, the united stream is joined on the left side by the Ghoongee, and three miles lower down is discharged into the Raptee, on its left side, in lat. 26° 58', long. 83° 17'. The length of course to this point is about 184 miles, in a direction generally from north-west to south-east.

RARUNG, in Bussahir, a village of the district of Koonawar, is situate near the right bank of the Sutluj, on the southern side of a mountain of mica-slate, characterized by dreary barrenness, and producing little but a few stunted pines. It contains about twenty families, votaries of a mongrel belief, between Buddhism and Hindooism, but more inclined to the former. Elevation above the sea 9,519 feet. Lat. 31° 36', long. 76° 24'.

RASEEN.—A town in the British district of Ahmednuggur, presidency of Bombay, 46 miles S.S.E. of Ahmednuggur. Lat. 18° 29', long. 74° 58'.

RASHMEE.—A town in the Rajput state of Oodeypoor, 52 miles N.E. from Oodeypoor, and 103 miles S. by W. from Ajmeer. Lat. 25° 2', long. 74° 27'.

RASOORY.—A town in the native state of Hyderabad, or territory of the Nizam, situate eight miles from the left bank of the Payne Gunga river, and 108 miles S.E. by S. from Ellichpoor. Lat. 19° 59', long. 78° 36'.
RAS—RAU.

RASULPOOR, in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Futtehgur to that of Cawnpoor, and 30 miles N.W. of the latter. The road in this part of the route is indifferent. Lat. 26° 47', long. 80° 9'.

RASUNWAS.—A village in the jagheer of Jujbur, district of Dadree, lieutenant-governorship of the North-West Provinces. Lat. 28° 36', long. 76° 18'.

RATGURH, in the British district of Saugur, territory of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Saugur to Bhopal, 21 miles W. by S. of the former. Lat. 23° 47', long. 78° 29'.

RATTEE, in the district of Bainswara, territory of Oude, a village on the route from Allahabad to Lucknow, 90 miles N.E. of the former, 29 S.W. of the latter. It has a small bazar, and water and supplies may be obtained. The road to the south-east, or towards Allahabad, is indifferent; to the north-west, or towards Lucknow, good. Lat. 26° 32', long. 80° 53'.

RAUCHERLA.—A town of Madras, in the native state of Mysore, 138 miles N.N.E. from Seringapatam, and 72 miles S.E. by S. from Ballary. Lat. 14° 15', long. 77° 30'.

RAUJGURH.—A town in the Rajpoot state of Kotah, situate on the right bank of the Neewuj river, and 30 miles E. by S. from Kotah. Lat. 25° 5', long. 76° 20'.

RAUNPOOR.—A town in the British district of Ahmedabad, presidency of Bombay, 78 miles S.W. of Ahmedabad. Lat. 22° 20', long. 71° 40'.

RAUNPOOR.—A town in the native state of Guzerat, or dominions of the Guicowar, 75 miles W.S.W. from Rajkote, and 16 miles N. by E. from Poorbunder. Lat. 21° 50', long. 69° 49'.

RAURAH.—A town in the native state of Nepal, situate on the left bank of a branch of the Kurmain river, and 13 miles N.N.E. from Jemlah. Lat. 29° 30', long. 81° 46'.

RAUS, or RASS, in the Rajpoot state of Jodhpoor, a town on the north-west declivity of the Aravulli range, on the route from Nusseerabad to Deessa, and 38 miles W. of the former. It contains 600 houses, supplied with water from twenty wells. Lat. 26° 17', long. 74° 16'.
RAU—RAV.

RAUSHPOORAM. — A town in the British district of Salem, presidency of Madras, 15 miles S. of Salem. Lat. 11° 28', long. 78° 16'.

RAVEE, or RAVI, a river of the Punjab, rises in Kulu, on the declivity of a mountain called Bungall, and a short distance west of the Botang Pass. The source is situate about lat. 32° 26', long. 77°. At the distance of about forty miles from the source, in a south-westerly direction, the Ravee is joined by two feeders, the Nye and the Boodhill, the latter taking its rise in a lake called Munee Muhees, regarded as sacred by the superstitious Hindoos. Where surveyed by Cunningham, four or five miles from Burmawur, at an elevation of about 7,000 feet, it was found 116 feet wide. At Chamba, about twenty miles below, and south-west of this place, or 100 miles from its source, according to the statement of Vigne, the Ravee is crossed by a bridge. Forster states that it is there "forty or fifty yards broad, and fordable at most seasons of the year." At Bisuli, to which the downward course is about twenty-five miles due west, Forster found it, early in April, about 120 yards wide, very rapid, and unfordable. The statement of Vigne is less explicit:—"I have been twice ferried over the Ravi at Bisuli, once during the rainy season, when it was swelled to a roaring torrent, and once again in winter, when its stream was far more tranquil. On both occasions the natives made the passage upon buffalo-hides. Its width is about eighty yards." From Bisuli, in lat. 32° 34', long. 75° 48', the Ravee takes a south-westerly direction, which it generally holds for the rest of its course. Macartney found it, at Meance ferry, on the route from Amritsar to Vazeerabad, and about 185 miles from its source, to have, at the beginning of August and at the time of fullest water, a breadth of 518 yards, and a depth of twelve feet, where greatest. The deep channel was between thirty and forty feet in breadth, the rest of the waterway having a depth of from three to five feet. In the cold season, when lowest, the water is in no part more than four feet deep. Moorcroft describes it at Lahore, about twenty miles lower down, as divided into three different streams.

* Vigne considers the Boodhill river, flowing from the Munee Muhees, or Muni Mys, as the real Ravee; but the evidence of Cunningham, who approached nearer the locality, merits more credit.
or branches. These, he states, are "separated, in the dry weather, by intervals of half a mile, but in the rainy season the two most easterly branches* are united, and form an expansive and rapid stream." "The two first branches are fordable, but the third, which is the principal one, has a ferry." He remarks, that the boats on the Ravee were the largest and best-built that he has seen in India. Burnes, who navigated the Ravee from its confluence with the Chenaub to Lahore, says it "is very small, and resembles a canal, rarely exceeding 150 yards in breadth in any part of its course. Its banks are precipitous, so that it deepens before it expands. Nothing can exceed the crookedness of its course, which is a great impediment to navigation, for we often found ourselves, after half a day's sail, within two miles of the spot from which we started. The water of the Ravee is redder than that of the Chenaub. It is fordable in most places for eight months in the year." From Lahore, its course south-west, measured according to the main direction of the stream, to its confluence with the Chenaub, is about 200 miles, but along all the sinuosities, 380.7 This point is in lat. 30° 36', long. 71° 50'. The Ravee joins the Chenaub by three mouths close to each other. Its total length, measured along the main direction of its course, is about 450 miles.† It is considered to be the Hydraotes mentioned by Arrian, and the Irawati of Sanscrit authorities: it is still known by the name of the Iraotee, which might easily be corrupted by the Greeks into that which they appear to have given it.

RAVER.—A town in the British district of Candeish, presidency of Bombay, 121 miles E.N.E. of Malligaua. Lat. 21° 14', long. 76° 11'.

RAVOOR.—A town in the British district of Nellore, presidency of Madras, 33 miles W.N.W. of Nellore. Lat. 14° 36', long. 79° 34'.

* Moorcroft appears in error in stating the eastern branches of the Ravee to be the principal, as all other accounts represent the western as the main stream. There can be no doubt that he is in error in stating that Shahdehra, the burial-place of Jehanjir, is on the left bank of the Ravee, as Masson, Burnes, and Jacquemont, agree that it is on the right or west bank.

† The estimate of Macartney is less, being only 415 miles; but he did not know the exact locality of its source.
RAV—RAY.

RAVYPAUD.—A town in the British district of Cuddapah, presidency of Madras, 80 miles N.N.E. of Cuddapah. Lat. 15° 34', long. 79° 15'.

RAWAI.—A town in the native state of Gwalior, or territory of Scindia's family, 24 miles S.S.E. from Nemuch, and 83 miles N.W. from Oojin. Lat. 24° 8', long. 75° 1'.

RAWALHEIR, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from Moradabad to Hurdwar, and 40 miles S.E. of the latter. The road in this part of the route is good, and passes over an open cultivated country. Lat. 29° 30', long. 78° 28'.

RAWDUCOONDA.—A town in one of the recently sequestrated districts of the native state of Hyderabad, 31 miles S.E. from Moodgul. Lat. 15° 41', long. 76° 50'.

RAWUL, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village on the route from Rewaree to Alwar, and eight miles S. of the former. Lat. 28° 4', long. 76° 38'.

RAWUL PINDE, in the Punjab, between the Indus and the Jhelum. It is a large populous town, consisting of mud houses with flat roofs. It contains what is called a palace, a wretched building of brick, constructed by Shah Soojah, on his expulsion from Kabool. There is a large bazar, and a considerable business in the transit trade between Hindostan and Afghanistan. The town is surrounded by a wall with bastions, and has an old fort, on which a few cannon are mounted. Lat. 33° 37', long. 78° 6'.

RAWUNIEREE, in the Rajpoot state of Beekaneer, a village on the southern frontier, and on the route from the town of Beekaneer to that of Jesulmeer, being 45 miles S.W. of the former. It is situate in an open country, scantily cultivated. The road in this part of the route is hard and good. Lat. 27° 40', long. 72° 40'.

RAWUTSIR.—A town in the British district of Hydrabad, province of Scinde, presidency of Bombay, 147 miles E. by S. of Hydrabad. Lat. 25° 2', long. 70° 46'.

RAYUH,1 or RAI, in the British district of Muttra, a town, the principal place of the pergunnah of the same name, is situate on the route from the cantonnement of Allygurh to that
of Muttra, and nine² miles N.E. of the latter. It is supplied with water from wells, and has a small bazar with market. The road in this part of the route is bad and heavy for carriages, the country well cultivated, and studded with small villages. Lat. 27° 33', long. 77° 52'.

REDANOH.—A town in the Rajpoot state of Jodhpoor, 135 miles W. by S. from Jodhpoor, and 74 miles S. from Jessulmeer. Lat. 25° 51', long. 71° 3'.

REEAN,¹ in the Rajpoot state of Jodhpoor, a town on the route from the city of Jodhpoor to that of Ajmeer, and 27 miles N.W. of the latter. It is surrounded by a ruinous mud wall, and has a fort, the stronghold of the thakoor or chief of the Mertea tribe of Rahtor Rajpoots. The fort, commanding the whole town, is built of stone, and situate on the top of an insulated rocky hill about 200 feet above the plain, and is fifty yards long from north to south, and thirty yards broad. The gateway is at a corner pointing westward, and is defended by a screen of masonry. The town is situate at the western base of the rocky hill: it contains 700 houses, abundantly supplied with water from numerous wells of the depth of twenty feet. There is besides a fine baoli, or large well, forty feet deep, pleasantly shaded by large trees, and having abundance of fine water, to which access is obtained by flights of steps. The population, according to Boileau,² is 5,650. The road in this part of the route is bad. Lat. 26° 32', long. 74° 20'.

REECHNA DOOAB.—A natural division of the Punjab, situated between the rivers Chenaub and Ravee, and extending from lat. 80° 33' to 82° 36', and from long. 71° 49' to 75° 36'.

REEGA.—A town in the territory occupied by the Abor tribe, on the northern boundary of Upper Assam. It is situate on the right bank of the Dihong river, 51 miles N.W. from Sudiya. Lat. 28° 20', long. 95° 7'.

REERWEE, in the Rajpoot state of Beekaneer, a village on the route from Rutungurh to the town of Beekaneer, and 50 miles E. of the latter. It is of considerable size, and is supplied with water from three wells. Lat. 27° 55', long. 74° 11'.

REGOWLEE, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on

¹ Boileau, Rajwara, 148, 219.
² Garden, Tables of Routes, 49.

² p. 254.
the route from Goruckpoor to Khachi, 21 miles N.N.W. of the former. Lat. 26° 59', long. 83° 17'.

REGOWLI.—See ADJYGURH.

REGULAVALAASA.—A town in the British district of Vizagapatam, presidency of Madras, 23 miles N. by W. of Vizianagaram. Lat. 18° 27', long. 83° 27'.

REH, in the British district of Futtehpore, lieutenant-governorship of the North-West Provinces, a village on the left bank of the Jamna, at the mouth of the small river Bind. Lat. 25° 52', long. 80° 37'.

REHELU, in the Baree Dooab division of the Punjab, a town situated on the left bank of one of the branches of the Beas, 11 miles N. of the town of Kangra. Lat. 32° 14', long. 76° 18'.

REHLI, in the British district of Saugar and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Gurrwarra to Saugar, 60² miles N.W. of former, 26 S.E. of latter. It has a bazaar, and water and supplies are abundant. Here is a prison capable of containing from forty to fifty persons. Elevation above the sea 1,350 feet. Lat. 23° 44', long. 79° 5'.

REHLY, in the territory of Oude, a town on the route from the cantonment of Goruckpoor to that of Sekrora, 73² miles N.W. of the former, 39 S.E. of the latter. Lat. 26° 52', long. 82° 4'.

REHUND.—A river rising in lat. 22° 46', long. 83° 17', in the British district of Odeipoor, on the south-west frontier of Bengal. It first takes the name of the Rhern, and flowing in a northerly direction through Odeipoor, Sirgojah, Rewa, and the British district of Mirzapoor, it falls into the Sone on the right side, near the town of Agoreee Khas, in lat. 24° 32', long. 83° 3'.

REINWAL, in the Rajpoot state of Jeypoor, a town on the route from Delhi to Mow, 181² miles S.W. of former, 326 N.E. of latter. It has a bazaar, and is supplied with water from wells. Lat. 26° 41', long. 75° 45'.

REITAL, in native Gurwhal, a village close to the right
bank of the Bhageerettee, as the Ganges is called in the upper part of its course. Its situation is very pleasant, on the eastern side of a mountain, the river flowing at the base below it. The village contains about thirty-five houses, which are large and three stories high, built of stones and long cedar beams in alternate courses, the ends of the beams meeting at the corners, where they are bolted together by wooden pins. The under story serves to shelter the cattle at night, the middle is a granary, and the upper is occupied by the family. Round the upper story is a strong balcony or gallery, constructed of wood, and supported on beams projecting from the wall, and over all the roof projects, with eaves shelving nearly horizontally, somewhat in the style of those of a Chinese pagoda. Those houses have a handsome appearance, are substantially built, and as the deodar or Himalaya cedar which is used in their construction is nearly indestructible, they last a long time. They are, however, very filthy inside, and full of vermin.

Beital was a secondary station in the trigonometrical survey of the Himalaya. Elevation above the sea 7,082 feet. Lat. 30° 49', long. 78° 39'.

RELLI.—A town in the British district of Vizagapatam, presidency of Madras, 14 miles N. by W. of Vizagapatam. Lat. 17° 58', long. 83° 19'.

REMRAH.—A town in the native state of Phooljer, on the south-west frontier of Bengal, 75 miles W. by S. from Sumbulpore, and 82 miles S.E. by S. from Ruttunpoor. Lat. 21° 18', long. 82° 52'.

RENEE,1 in the Rajpoot state of Beekaneer, a walled town near the north-eastern frontier, towards Shekawuttee. The surrounding country is less barren than most other parts of Beekaneer, in consequence of the moisture produced by the Katuri, a small stream which flows from Shekawuttee, and is lost in the sands of Beekaneer. Tod2 states the number of houses at 1,500. Renee is in lat. 28° 41', long. 75° 6'.

RENTICHOTA.—A town in the British district of Ganjam, presidency of Madras, 61 miles S.W. of Ganjam. Lat. 18° 49', long. 84° 27'.

REOTEE,1 in the British district of Ghazeepoor, lieutenant-governorship of the North-West Provinces, a town situate on the stream which discharges the water of the Lake Sooraha

E.I.C. Ms. Doc.
1 E.I.C. Ms. Doc.
into the river Ghagra, and four miles S.W. of the right bank of the latter. It is represented as a place of some trade. Distant N.E. of Ghazeepoor cantonment 55 miles. Lat. 25° 50', long. 84° 25'.

REOTEEPOOR,¹ in the British district of Ghazeepoor, lieutenant-governorship of the North-West Provinces, a town two miles S.W. of the right bank of the Ganges, 10 S.E. of Ghazeepoor cantonment. Reotepoor contains a population of 17,355 inhabitants.² Lat. 25° 30', long. 83° 48'.

REPALLE.—A town in the British district of Guntoor, presidency of Madras, 32 miles S.E. by E. of Guntoor. Lat. 16° 3', long. 80° 53'.

REIGHT.—A town in the native state of Nepal, situated on the right bank of the Gunduck or Salagra river, and 116 miles W. by N. from Khatmandoo. Lat. 27° 58', long. 83° 27'.

RESSOOLPOOB NARAINPOOB, in the British district of Bolundshuhur, lieutenant-governorship of the North-West Provinces, a village on the route from Aligurh cantonment to that of Moradabad, and 20¹ miles N. of the former. The road in this part of the route is good; the country open, level, and partially cultivated. Lat. 28° 10', long. 78° 15'.

REUNI, in Bussahir, a halting-place on the route from Rampoor to the Shatul Pass, from which last it is three miles S.W. The road in this part of the route is exceedingly difficult and dangerous, proceeding among loose piles of stones, which seem to have lately descended from the cliffs. Elevation above the sea 11,800¹ feet. Lat. 31° 22', long. 77° 58'.

REVELGUNJE,¹ in the British district of Sarun, presidency of Bengal, a town on the left bank of the Ganges, five miles below the confluence of the Gogra. Here is annually held a fair,² much frequented, especially by Hindoos, who throng in great numbers for ritual ablution at the neighbouring confluence. Distance N.E. from Benares, by land, 118 miles, by the course of the river 165; N.W. from Dinapoor 24. Lat. 25° 44', long. 84° 50'.

REWA CAUNTA.—A division of Guzerat, under the political superintendence of the government of Bombay. It

¹ Routipoor of the surveyor-general's map; Rowteepore of Tassin.
² According to Colebrooke, 11,750.
REWAH.

is bounded on the north by the Myhee Caunta; on the south by the British collectorate of Candeih, from which it is separated by the river Taptee, and by the Bheel territory of Wussmvee; on the east by the petty states of Banswarra, Dohud, Jabooah, Allee, and Akrauna; and on the west by the possessions of the Guicowar, and the British collectorates of Kaira and Surat. It lies between lat. 21° 23' and 23° 33', and long. 73° 3' and 74° 18'. The Rewa Caunta comprises the states of Rajpeepla and Oodepoor, tributary to the Guicowar; Soauth, tributary to Scindia; Loonawarra, tributary both to Scindia and the Guicowar; and Deoghur Barreeah, tributary to the British. An account of each of these tributary states will be found in its proper place. A court of justice, styled the Rewa Caunta Criminal Court, exists in this province. It was established in 1839, and the result has fully realized all the advantages anticipated from its institution. Originally, the British Resident presided in this court, and three or four chiefs sat as assessors. A slight alteration has recently been made in its constitution, the first assistant political commissioner, instead of the Resident, now presiding; but his proceedings are forwarded to government through the latter, an arrangement by which the supervision of that officer is increased. Though not intended to supersede the authority of the chiefs in the internal administration of their territories, yet when they are too weak to punish their subjects, as sometimes happens, criminals are tried before this court, a representative from the state being invited to assist at the trial. On the other hand, when the head of a village is competent to take cognizance of the case, he is allowed to dispose of it; so that no undue interference takes place with their authority. Some account of the chiefs residing on the banks of the Nerbudda, styled the Mehwassee chiefs, who are subject to the jurisdiction of the Rewa Caunta agency, will be found under the head "Mehwassee," and under that of the "Naikras," some particulars of that wild tribe. The practice of suttee has been interdicted within the Rewa Caunta.

REWAH, called also BAGHELCUND, or country of the Baghels, an independent raj or principality, bounded on the

* From Bhagel, a Rajput tribe, and Khand, "country." Elliot observes, that the word Bhagel means literally "tiger whelps."
north by the British districts Allahabad and Mirzapore; on
the east by the British district Mirzapore; on the south-east by
the native state of Korea; on the south by the British district
Saugor and Nerbudda; and on the west by Saugor and Nerb-
udda, and by Bundelcund. It lies between lat. 23° 20'—
25° 10', long. 80° 40'—82° 52'; is about 140 miles in length
from east to west, and 120 in breadth. The area is 9,827
square miles. The western and north-western parts, com-
prising a considerable proportion of the whole raj, are covered
by mountains, rising in three successive plateaus, or vast
terraces, from the valley of the Ganges. Of these, that most
to the north-east, and styled by Franklin the Bindachal, or
First Range, is the lowest, having an average elevation of from
500 to 530 feet above the sea: it is formed of horizontal
strata of sandstone: the upper surface presents an expanse
of very great sterility. Little of this plateau, however, is
included within the limits of Rewah, the boundary of which on
this side lies nearly along the base of the mountain styled by
Franklin "the Pannah Hills, or Second Range." The eleva-
tion of these averages from 900 to 1,200 feet above the sea.
Their formation is sandstone, intermixed with schist and quartz,
and to the west overlaid with limestone. Above this plateau,
nearly parallel to the brow, but more to the south-east, rises
the Kaimur range, of which nothing appears to have been
ascertained either as to elevation or formation. The brows of
those ranges, especially of the second, are steep, in some parts
nearly mural, and the Tons (South-eastern), and its tributarie-
s, which drain the second plateau, descend to the lower grounds
in cascades of various degrees of fall, from that of Bilohi, of
400 feet, to that of Chachai, of 200. About a third of the
country lying south-east of the Kaimur hills is part of the
valley of the Son, a tract as yet nearly unexplored. That
great river, flowing north from the British district of Saugor
and Nerbudda, crosses the south boundary of this raj in lat.
23° 21', long. 81° 30', and, flowing through it circuitously, but
generally in a direction north and north-easterly, for 180 miles,
crosses, in lat. 24° 37', long. 82° 50', over the north-eastern
frontier, into the British district Mirzapore. Its principal
tributary is the Mahanuddee, flowing into it on the left side,
in lat. 24° 5', long. 81° 6'; and it, besides, receives numerous

torrents and small streams right and left. The Tons, flowing north-east from Bundelcund, first touches the raj in lat. 24° 25', long. 80° 55', and, draining the highlands, receives the Beher, the Bilund, and several minor torrents, and, holding a course generally north-easterly, passes, in lat. 26° 1', long. 81° 51', into the British district of Allahabad, its course through Rewah being eighty miles. None of the rivers are navigable in this raj. According to Hamilton, "there are few parts of the British provinces more highly cultivated than the higher regions of Rewah;" and Ironside, describing the country sixty years ago, states, that it is "well cultivated, and produces tolerably good crops of grain." The villages are in good order, full of inhabitants, who appear to be industrious. The produce of this country is wheat, barley, and different kinds of peas; and they have also large herds of cattle, and flocks of sheep." Jacquemont's report, however, rather tends to discredit these statements, though he mentions that he saw considerable cultivation on the second plateau, north of the town of Rewah. Much of the surface being rock, is unfit for culture, and produces a scanty growth of stunted wood. This is now in many places yielding to the axe, to supply the demand for timber in the British districts in the valley of the Ganges.

The principal places—Rewah, Simerea, Mowganj, Bandoogurh—are noticed in their places in the alphabetical arrangement.

The military routes are, 1. From north-east to south-west, from Mirzapoor to Saugor, through the town of Rewah; 2. from north-east to south-west, from Allahabad by the Kutra Pass, to Jubbulpore, through the town of Rewah; 3. from north-east to south-west, from Allahabad by the Sohagi Pass, through the town of Rewah to Jubbulpore; 4. from north-east to south-west, from Allahabad to Saugor; 5. from north-west to south-east, from Banda to Rewah.

The revenues of Rewah have been estimated at twenty lacs (200,000). There formerly existed numerous jaghires, of the value of four or five lacs per annum, held by younger descendants of former sovereigns. About twenty years since, resumption to some extent took place, yielding to the state a considerable accession of revenue.

As the rajah and his subjects are Rajpoos, their religion is Brahminism; and the horrible Rajpoot atrocity of female infan-
REWAH.

ticide prevails, or did prevail, to a great extent. The rajah, however, it is stated, on his own authority some time since issued a proclamation, in which he not only forbade the practice, but promised pecuniary aid, when necessary, for the marriage expenses of daughters; and this proclamation was subsequently repeated. Suttee does not appear to be mentioned by any writer as practised in this territory. The population is stated to be 1,200,000. The military force amounts to upwards of 8,000 men.

The earliest mention of the Bhagels is probably that adverted to by Elliot, who says, "The Baghel chief of Rewa is the descendant of the famous Sid Raee Jye Singh, the ruler of Anhulwas Puttun from 1094 to 1145. His court was visited by the Nubian geographer Edrisi, who distinctly states, that at the time of his visit the chief adhered to the tenets of Buddha." The existence of the raj of Rewah seems scarcely ascertainable in the general history of India, until the early part of the present century, when the Pindarries, in 1812, passing through the territory of Rewah, made an inroad into the British district of Mirapore. The rajah of Rewah was considered to have abetted this enterprise, and he was required to accede to a treaty, by which the British government acknowledged his sovereign title, and bound itself to amity and protection towards him, on condition that all differences between him and foreign powers should be referred to the arbitration of the British authorities; that British troops might be marched through, or cantoned within his raj, for the purpose of guarding against the advance, or intercepting the retreat of an enemy; and that on such occasions the rajah should dispose his troops in the manner which might be pointed out by the British commanding officer. As the rajah ill followed out his engagements, the British government in 1818 had recourse to military operations, which enforced the conclusion of a second

* Sleeman, however, states a circumstance which, if his conclusion in regard to it be correct, would seem to show that the practice is not here regarded with horror:—"The sister of the rajah of Rewah was one of four or five wives who burned themselves with the remains of the rajah of Oodeepore; and nothing in the course of his life will be recollected by her brother with so much of pride and pleasure, since the Oodeepore rajah is the head of the Rajpoot tribes."
treaty, confirmatory of the former, and binding the rajah further to receive a permanent agent, and to maintain a vakeel, on his own part, with the British agent in Bundelcund, and with the commanding officer of any British detachment stationed in the Rewah territory. He likewise bound himself to concur in the chastisement of certain offenders, and to pay the expenses of the armament sent against him, to the amount of 45,173 rupees. In 1814, a third treaty was concluded, confirmatory of the two preceding ones. In the English copies of the treaties, the chief is styled rajah of Rewah and Mookundpore, the latter appellation being probably from Muckunpoor, a place of some note eight miles S. of the town of Rewah.

REWAH.†—The principal place of the raj or territory of the same name, a town on the route by the Kutra Pass, from Allahabad to Saugor, 131 miles S.W. of the former, and 182 N.E. of the latter. It is situate on the banks of the small river Beher,‡ a tributary of the Tons (South-eastern), on a formation§ of dark-coloured limestone. Around it runs a high and thick rampart, still nearly entire and continuous, flanked by towers, and which, in a state of repair, must have been a strong defence. Within this, a similar rampart immediately environs the town, and still further inward, a third surrounds the residence of the rajah, consisting of a few habitable buildings amidst the ruins of a great decayed structure. The town has an aspect of poverty and barbarism, yet the population is estimated by Jacquemont at about 7,000, principally supported by the expenditure of the rajah, who maintains some degree of barbaric state.§ Elevation above the sea about 1,200 feet. Lat. 24° 31', long. 81° 21'.

* Hamilton† states that on this occasion the British government mulcted the rajah in a portion of his territory. "The annual rent of the tract annexed on this occasion to the British dominions amounted to 40,000 rupees," but this cession is not mentioned either by Sutherland or D'Cruz, or in the subsequent or third treaty concluded in 1814.

† Riwan of Tassin; Reeve of Briggs's Index; Rewah of Rennell, Sutherland, and D'Cruz.
‡ Called by Hamilton Richanuddy.
§ The elevation above the sea, of Chachei on the Beher, is, according to the barometrical measurement of Franklin, 990 feet; and it is twenty-five miles lower down the stream than Rewah. If a fall of ten feet per mile be
REW—RHO.

REWAREE,¹ in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a town on the route from Delhi to Jeypoor, 50 miles S.W. of the former. Rewaree contains a population of 26,936 inhabitants.² Lat. 28° 11', long. 76° 41'.

REWASUN, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village on the route by Ferozpoor from Alwar to Delhi, 66 miles N.E. of former, 44 miles S.W. of the latter. Lat. 28° 10', long. 77° 8'.

REWDUNDA.—A fort in the British district of Tannah, presidency of Bombay, situate on the coast, 29 miles S. of Bombay. Lat. 18° 33', long. 73°.

REYJWA, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, and 34 miles¹ N.E. of the former. The road in this part of the route is good, the country well wooded and cultivated. Lat. 27° 30', long. 78° 26'.

RHAMUTGANJ,¹ in the territory of Oude, a village on the route from Cawnpore to Lucknow, 22 miles² N.E. of the former, 31 S.W. of the latter. It is well provided with water, but supplies must be collected from the surrounding country, which is but partially cultivated, low, flat, and liable in many places to be laid under water³ during the rains. Lat. 26° 40', long. 80° 41'.

RHOTASGURH,⁺ in the British district of Shahabad, presidency of Bengal, a celebrated hill-fort on the left or north-west bank of the river Sone. It is situate in the hilly tract in the south of the district, on a table-land five miles² in length from north to south, and four in breadth. The outline is much indented and irregular, and the circuit, including all its sinuosities, is computed at twenty-eight miles.† The surface of the table-land is very uneven, and much of it consists of bare rock; but there is likewise a considerable extent of fertile red soil, on which grow many fine trees. It is very difficult of access on every side except the south, in which direction a allowed for this mountain-torrent, the elevation of Rewah may be assumed at 1,240.

⁺ Rohdasagarh of Tassin; Rohtas of Briggs's Index; Rotas of Rennell.

† The estimate of fourteen kos in the Ayeen Akbery¹ nearly corresponds with this.
Rhotasgurh.

rocky neck or ridge once connected it with the contiguous table-land; but it has been traversed by a deep trench quarried in the rock with great cost and toil. East of the spot where this ditch is excavated in the rock, are some most stupendous works; and access into the fortress is gained through two fine gateways, one thirty yards within the other; and these, as well as the ditch, are protected by a great number of complicated works. These are pierced with embrasures for archery and matchlocks, but there are none suited for regular artillery; and all the defences in this quarter are completely commanded from a height 200 yards distant, so that a passage could readily be laid open for a storming force to occupy the works, and there is no citadel within. On the verge of the mountain all round is a massive battlement, formed of great stones laid together without cement. When Tieffenthaler's account was written, eighty years ago, there were fourteen gateways, but ten of them had been walled up. Notwithstanding the general steepness and elevation of the sides of the mountain, there are, besides the principal passage traversed by the trench, eighty-three others in various places; much difficulty would consequently be experienced in guarding so many points against surprises. Within the inclosure are several small pieces of water and perennial springs. Sher Shah, on obtaining possession of this place in 1639, set about strengthening it; but the works which he commenced were abandoned, owing to his having discovered a situation which he considered more favourable, and where he erected Shergar.

The most ancient structures herein were built by the Hindoos; the place, according to their tradition, was founded by Cush, the son of Rama, king of Ayodha, long previously to the Christian era. Ferishta, however, attributes the foundation to Robut, viceroy of Afra-Siab, the legendary king of Turkestan. Sher Shah took the place from the Hindoo rajah, by a stratagem frequently recurring in Indian history. Having asked the rajah to give refuge to the females of his family, taking with them a large amount of treasure, a great number of dolas or covered litters arrived, the foremost of which being examined and found to contain only women, all were admitted.

* Tieffenthaler, however, states that there were 360 cannon on different parts of the ramparts.
without suspicion. The greater number of the dolas, however, were filled with armed men and weapons for the bearers, also soldiers; and the force thus introduced forthwith attacked and slaughtered the garrison and seized the fort. When the Rajpoot Maun Singh\(^1\) was appointed viceroy of Behar and Bengal, a trust for which he was probably indebted to the alliance of his house with that of Akbar, his cousin being married to Prince Selim, son of that monarch, he selected Rhotasgurh as a place of security for his family and treasure. After his death, the fortress was annexed to the office of vizier of the empire, and at a later period it came into the hands of Cossim Ali, nawab or soulabdar of Bengal, who, after his defeat at Oondwa Nulla, imitated the example of Maun Singh, by selecting this place for the residence of his family and the depositary of his treasure. It was surrendered a short time after the battle of Buxar, in 1764, to the British army under Goddard.

The air of Rhotasgurh, as of many of the hill forts of India, is dreadfully unwholesome,\(^2\) especially for European constitutions. Limestone has been discovered in the vicinity, which will be of great service in bridging the Sone.\(^3\) The elevation above the sea is probably about 700 feet,\(^4\) and above the plain 200. Distance S. from Sasseeraam 22 miles, S.E. from Benares 75, N.W. from Calcutta 378. Lat. 24° 38', long. 84°.

RhotuK.—See Rohtuk.

RhouNoo,\(^5\) in the British district of Jounpore, lieutenant-governorship of the North-West Provinces, a village on the route from Jounpore cantonment to that of Sultanpoor, in Oude, 12 miles N.W. of the former, 46 S.E. of the latter. Water is plentiful, but not very good, and supplies are scarce, and must be collected from the surrounding country, which is productive and cultivated. The road in this part of the route is excellent. Lat. 25° 50', long. 32° 35'.

Riasi, within the dominions of Gholab Singh, the ruler of Cashmere, a town situate near the left or east bank of the Chenab, and on the southern slope of the most southern of the Himalaya ranges. Here is a fort considered by Vigne "one of the strongest, perhaps the strongest, and best constructed in the country." It is situated on a conical and rocky eminence south of the town, and is nearly square.
wells are built of stone: they are very lofty, and are rendered still more difficult to be scaled by their rising immediately from the precipitous sides of the hill, which are steeply scarped. There is a tower at each angle, and no pains have been spared to render these, as well as most of the buildings of the interior, bomb-proof. The garrison is supplied with water by means of two large tanks within the walls. The fort is separated, by a deep ravine, from an eminence of sandstone of the same height, about a mile distant. The town itself is an inconsiderable place, having about 1,000 inhabitants. Lat. 33° 5', long. 74° 52'.

RICAH, in the British district of Pilleebheet, lieutenant-governorship of the North-West Provinces, a town on the route from Pilleebheet to Rampoor, 18 miles W.N.W. of the former. Lat. 28° 43', long. 79° 37'.

RICHEL RIVER.—The name of one of the mouths of the Indus river, flowing into the sea in lat. 24° 3', long. 67° 26'.

RICHOLA, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Pilleebheet, and 20 miles N.E. of the former. The road in this part of the route is frequently laid under water during the rains, in consequence of the Bhagul river being dammed up for the purposes of irrigation. The country is level, open, and cultivated. Lat. 28° 32', long. 79° 41'.

RICNAR.—A river rising amidst the mountains of the British district of Jansar, in lat. 30° 53', long. 77° 59'. It holds a south-easterly course of about twenty miles, and falls into the Jumna on the right side, in lat. 30° 44', long. 78° 8'.

BIKHESUR, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a halting-place and small military station on the left bank of the Lohughat river, on the route from Champawut to Petoragurh, and 16 miles S.W. of the latter. Lat. 29° 24', long. 80° 8'.

RIKKEE KASEE,1 in the Dhera Doon, a Hindoo temple at the north-east angle, where the Ganges, leaving the mountains, enters the plains of Bengal. The temple is 1,427 feet above the level of the sea; the bed of the river below it, 1,377 feet.2 Lat. 30° 6', long. 78° 22'.

RILAKOT, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village in the

---

2 As Res. xiv. 927.—Hodgson and Herbert, Trigon. Survey of Himalaya.
subdivision of Juwahir, on the route to Hiundes or Chinese Tartary, by the Juwahir Pass, from which it is 20 miles south. It is situate on the left bank of the river Goree, which runs 250 feet below. The roofs of the houses have a slight pitch, and are firmly coated with compact clay, as a protection against the inclemency of the climate. From the end of October to the beginning of June, the inhabitants totally desert the vicinity, residing in the more southern and lower part of Kumaon. During the summer months they return to this barren and dreary tract, less with a view to the scanty crops and pasturage obtainable here, than to the management of the active and lucrative traffic with Hiundes. Elevation 10,680 feet above the sea.* Lat. 30° 19', long. 80° 15'.

RINGNOD.—A town of Malwa, in the native state of Jowra, situate on the left bank of a branch of the Chumbul river, and eight miles N.N.E. from Jowra. Lat. 23° 43', long. 75° 10'.

RINJAKHAR.—A town in the recently escheated territory of Nagpoor, 153 miles E.N.E. from Nagpoor, and 53 miles S.S.E. from Ramgurh. Lat. 22° 6', long. 81° 20'.

RINTIMBORE, or RANTAMBOOR,† in the Rajpoot state of Jeypore, a fortress of great strength, near the southern frontier, towards Boondee. It is situate on a rock, on all sides isolated by deep and nearly impassable ravines, and access to the summit is had only by a narrow pathway, inclosed on each side by high and overhanging cliffs; and in the upper part the steepness so increases, that the ascent is made by flights of stairs passing through four gateways in succession. The summit of the rock, a mile in length, and of nearly equal breadth, is surrounded by a massive stone rampart, conforming to the irregular verge, and strengthened by towers and bastions. Within the inclosure are an antique palace, the residence of the governor; a mosque, the tomb of a reputed Mahomedan

* According to Webb's Field Book, 10,653 above Calcutta, which is twenty-five feet above the level of the sea, according to Journ. As. Soc. Beng. 1837, p. 937.
† Ranarthambor of Tassin; Runthunbore of Briggs's Index; Rantambor of the translators of Baber. According to Colebrooke, "sometimes written Ran-thamb-bhawer, which is nearer to the Sanscrit Rana-athamba-bharama—the bee of the pillar of war." From Bhramara, "bee," Stambha, "pillar," and Rana, "war."
RINTIMBORE.

saint, and buildings for the accommodation of the garrison. Water is supplied from a perennial spring and tanks within the walls. To the east of the fort is a town communicating with it by means of a long flight of narrow stone steps. The fort, regarded as impregnable before the introduction of artillery, is indefensible against the attacks of modern warfare, being completely commanded by the rocky summits on all sides. According to Tieffenthaler, it was at a remote period founded by Rauhamir, a Rajpoot chief. In A.D. 1291 it was in vain besieged by Julal-ood-deen, the Patan king of Delhi, and in the reign of his successor Alla-ood-deen, it is mentioned as being held by Rajah Bhim Deo, who, A.D. 1297, gave refuge to one of the nobles flying from the wrath of his sovereign. In 1299, Noosrut Khan, the vizier of Alla-oood-deen, besieged the fort, but being killed by a stone thrown from an engine, the rajah marched out and defeated the Patan army with great slaughter. Alla-oood-deen shortly after in person renewed the siege, and having formed a mound from a neighbouring height to the top of the rampart, stormed the place, and put to the sword the rajah, his family, and garrison. It was subsequently wrested from the sovereign of Delhi, probably during the distractions consequent on the invasion of Tamerlane at the close of the fourteenth century, and in 1516 it is mentioned as belonging to the king of Malwa. In 1528, it was surrendered by Bikermajet, its Rajpoot possessor, to Baber, who assigned him Shamsabad and its territory as a remuneration. After the expulsion, in 1553, of Muhammad Shah Sur Adili, the Patan king of Delhi, by Humain, the governor of Rintimbore surrendered it to the rajah of Boondee, who shortly after transferred it to Akbar, receiving in return extensive districts and high immunities. It probably fell into the hands of the rajah of Jeypore on the dissolution of the empire, consequent on the invasion of Ahmed Shah Doorane in 1761. It is at present held, partly by the rajah of Jeypore, partly by the thakoors or feudal nobility of the state, each having the honour of defending a particular gate, or portion of the work. Distant S.E. from Jeypore 75 miles, S. from Delhi 195, S.E. from Ajmere 115. Lat. 25° 56', long. 76° 26'.
RISHI IRPU, in Bussahir, a halting-place in Koonawar, on the route from Dabling to Bekhur, and nine miles S.E. of the former place. It is situate on the right bank of the Hocho, in a dreary valley, by which access from the west is gained to the Gantung Pass over the mountain dividing the valley of the Sutluj from that of the Taglakhar river. The road from the Gantung Pass westward to Rishi Irpu lies "for a short way upon continuous snow, and afterwards on loose rock and snow for a mile, where the head of the dell is formed on each side of us. In this plain of wrecks and horrid scenery, the detached summits of the chain rose in various misshapen forms, dark and naked on their sides, but terminating in spires and domes of perpetual whiteness. Around their bases, which here rest at an elevation of 17,000 feet, are enormous accumulations of snow, containing basins of still water, the dread of travellers who approach them. The scene surpasses description. The dell, nearly half a mile wide, is covered by layers of broken stones, exhibiting extraordinary variety, beautiful to the eye, but severe to the feet." This halting-place owes its importance solely to a scanty growth of juniper, yielding the only fuel to be found in this frozen region for a great distance on the route to Chinese Tartary. Elevation above the sea 14,800 feet. Lat. 31° 41', long. 78° 40'.

RISHI TALAM,1 in Bussahir, a halting-place in Koonawar, on the route from Dabling to Bekhur, and 18 miles E. of the former place. It is situate on the right bank of the Taglakhar, and in the upper part of a dell, by which the elevated Kiobrung Pass is ascended from the west. Here, at an elevation of 14,977 feet above the sea, the thermometer was found at sunrise, in the end of June, to stand at 35°. Lat. 31° 37', long. 78° 50'.

RISPE,1 in Koonawar, a district of the hill state of Bussahir, is a village situate on the left bank of the Sutluj, a short distance below the confluence of the river Tidung. Here Lamaic Buddhism is found to be the general religion, the traveller proceeding northwards perceiving here for the first time the lamas or priests of that belief. The vicinity abounds with manes or tumuli, formed of stones, and from ten to forty feet in length, four in height, and two in breadth, and covered at top with large slates, inscribed with various holy texts in the Tibetan
RITHOURA, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Petorgurgh, and 11 miles N.E. of the former place. It is situate in an open and cultivated country, and supplies and water are abundant. The road in this part of the route is level, but in some places heavy. Lat. 28° 28’, long. 79° 34’.

RIXI.—A town in the British district of Palamow, presidency of Bengal, 24 miles S.S.E. of Palamow. Lat. 23° 30’, long. 84° 11’.

ROBKRIE, in the Sinde Sagur Doab division of the Punjab, a town situated 10 miles from the left bank of the Indus, 95 miles S. of the town of Peshawar. Lat. 32° 40’, long. 71° 33’.

ROGI, in Bussahir, a village of the district of Koonawar, situate about a mile from the right bank of the Sutluj, which rolls 8,000’ feet below it. The fine orchards surrounding it produce peaches, apricots, and apples, of which the last are remarkable for size and excellent taste, though grafting is never practised to improve the stock. The road from this place to Pangi, lying north of it, proceeds along the precipitous side of a mountain overhanging the Sutluj. The description of Gerard, who travelled by it, is appalling:—“The last one and half mile is of an extraordinary nature, along the brink of a tremendous precipice, and often upon unsteady scaffolding, that has been constructed with very great labour: this continues for several hundred yards together, and is formed of spars driven into the crevices of perpendicular faces of rock, with their other ends resting upon trees or posts, and boards across. Now and then you meet with a rude stair of wood or stone, which must have required much trouble to erect. The rocks project above the path, and the traveller is obliged frequently to stoop, in order to avoid them, whilst at the same time he must pay equal attention to his footing.” Rogi is 9,100’ feet above the level of the sea. Lat. 31° 30’, long. 78° 17’.

ROGONATHPORE, in the British district of Pachete, a small town or village on the route from Bankoora to Hazareebagh, 352 miles N.W. of former, 103 S.E. of latter. Jacquet, p. 384.
a

vo~ag-111. lea

mont describes it as a small place, situate at the foot of a group of small wooded hills of granite, about 800 feet high. Lat. 23° 31', long. 86° 44'.

E.I.C. Ms. Doc.

ROH.—A town in the British district of Behar, presidency of Bengal, 60 miles E.N.E. of Sherghotty. Lat. 24° 53', long. 85° 46'.

ROHA.—A town in the native state of Cutch, presidency of Bombay, 30 miles W. from Bhooj, and 50 miles S.E. from Luckput. Lat. 23° 15', long. 69° 17'.

E.I.C. Ms. Doc.

ROHANA, in the British district of Suharunpore, lieutenant-governorship of the North-West Provinces, a village on the route from Meerut to Suharunpoor, and 42 miles N. of the former. Lat. 29° 35', long. 77° 46'.

R0HERA.—A town in the Rajpoot state of Oodeypoor, 42 miles W. by N. from Oodeypoor, and 76 miles N.E. by E. from Deesa. Lat. 24° 42', long. 73° 10'.

ROHEYREE, in the British district of Allyghur, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Allyghur cantonment, and 20 miles S. of the latter. The road in this part of the route is good, the country open and rather well cultivated. Lat. 27° 49', long. 78° 17'.

ROHILCUND, an extensive tract so called, lying to the east of the Ganges, and bounded on the north-east by British Gurwhal and Kumaon; on the east by the territory of Oude; and on the south-west and west by the Ganges, separating it from the Doab. It comprises the British districts of Bijnour, Moradabad, Bareilly, including the subdivision of Pilleebheet, Budaon, Shahjehanpoor, and the native jaghiro of Rampoor. Its limits are from lat. 27° 15'—29° 51', and from long. 78° 3'—80° 30'.

ROHTUK, one of the districts of the great British territorial division of Delhi, under the lieutenant-governorship of the North-West Provinces, derives its name from its principal town. It is bounded on the north-east by the British district
ROHTUK.

of Paneeput; on the east by the Delhi district and the native state of Bahadoorgurh; on the south by Jhujhur; on the south-west by Dadree; and on the west by the British district Hurrianah, and by Sirhind. It lies between lat. 28° 38'—29° 16', long. 76° 10'—77° 4'; is fifty miles in length in a direction from east to west, and forty-four in breadth, and comprises an area of 1,340 square miles.

The Rohtuk branch of Feroze's canal traverses this district from north to south. The line of the old Delhi Canal lay also through this district to Gohana, where it diverged south-east to Jatola, and thenceforward took a course identical, or nearly so, with the line of the present canal. At Gohana, there is an extensive depression, the scene of a great calamity which occurred in the course of the original construction of the Delhi Canal by Ali Murdan Khan, when the water, escaping from the channel intended to confine it, overspread the country, and destroyed the town of Lalpur. Rohtuk is divided into seven pergunnabs, named severally Rohtuk, Beree, Gohana, Kerthowda, Mundowthee, Mehim, and Bewhanee. By the latest returns (1846–47), the amount of population is stated as follows:—Hindoos, agricultural, 150,572; Hindoos, non-agricultural, 81,541; Mahomedans and others, not being Hindoos, agricultural, 16,720; of the like classes, non-agricultural, 45,286; making a total of 294,119. A classification of the towns and villages, drawn from official records of the same date, shows the following results:—

† Rohtuk, 10,350; Bhewane, 29,442.
ROH—ROL.

British government in 1825, to convey a supply from the canal of Ferozshah. The population amounts to 10,850, and there is a good bazar. The road in this part of the route is generally good, though in some places sandy and heavy. Lat. 28° 54', long. 76° 38'.

ROHUD, in the British district of Rohtuk, division of Delhi, lieutenant-governorship of Agra, presidency of Bengal, a village on the route from Delhi to Hanse, and 27 miles N.W. of the former. The road in this part of the route is good in dry weather. Lat. 28° 44', long. 76° 52'.

ROHUNPORE, in the British district of Rajeshaye, presidency of Bengal, a town on the western frontier, towards the British district of Malda, on the left side of the river Mahanunda, a short distance below the confluence of the Purnabada. Distant S.E. from town of Malda 20 miles, N. from Calcutta, by Bhirampoor, 168. Lat. 24° 48', long. 88° 20'.

ROHUT, in the Rajpoot state of Jodhpour, a village on the route from Neemuch, vid Palee, to the city of Jodhpour, and 24 miles S. of the latter. Supplies can be procured, but good water is scarce. The road to the south is sandy, over undulating ground; to the north, hard and good in some places, in others very sandy, over an open plain. Lat. 25° 59', long. 73° 14'.

ROIR BAZAAR.—A town in the British district of Pooee, presidency of Bengal, 23 miles N.N.E. of Juggurnaut. Lat. 20° 7', long. 86°.

ROJAN.—A town in the British district of Shikarpoo, province of Scinde, presidency of Bombay, 29 miles N.W. of Shikarpoo. Lat. 28° 18', long. 66° 18'.

BOLAGAON.—A town of Malwa, in the native state of Bhopal, 49 miles S.W. by W. from Bhopal, and 61 miles E. by N. from Indoor. Lat. 22° 51', long. 76° 48'.

ROLEE, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a village on the route from Agra to Bareilly, and 41 miles S.W. of the latter. The road in this part of the route is good, the country partially cultivated, but in some places overrun with jungle. Lat. 28° 2', long. 79° 5'.

ROLPAH.—A town in the native state of Nepal, 40 miles S. from Jemlah, and 121 miles E. from Pilleebheet. Lat. 28° 45', long. 81° 51'.
RON—ROO.

RONCHI, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to that of Muttra, and five miles S. of the latter. It is situate near the right bank of the Jumna, in a country cut up by ravines, and partially cultivated. The road is sandy, heavy, and bad for wheeled carriages. Lat. 27° 25', long. 77° 47'.

RONTAN, a considerable village in Baeen, a small hill district occupied by the East-India Company, among the mountains between the Himalayas and the plains, is situate near the left bank of the Pabur. It was a secondary station in the trigonometrical survey of the Himalayas. Elevation above the sea 7,898 feet. Lat. 31° 6', long. 77° 50'.

ROODHAMOW.—A town in the native state of Oude, situate 10 miles from the left bank of the Ganges, and 51 miles W. by N. from Lucknow. Lat. 27° 7', long. 80° 13'.

ROODRAR.—A town in the British district of Cuddapah, presidency of Madras, 58 miles N.N.W. of Cuddapah. Lat. 15° 16', long. 78° 40'.

ROODURPOOR.—A town in the British district of Chota Nagpoor, presidency of Bengal, 61 miles S.W. by S. of Lohadugga. Lat. 22° 46', long. 84° 9'.

ROODURPOOR, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town, containing 300 mud-built dwellings, with a population of 5,535 inhabitants, is situate on the Mujhane, a small stream, a feeder of the river Raptree. Adjoining the town is a building of considerable size, formerly a mandir (temple), of pyramidal shape, with a small chamber in its lower part, and surrounded on all sides by a number of lower buildings. The chamber contains an image of Vasudeo or Krishna, which has lost its legs and part of its arms; and on each side is the lion rampant of Gautama. On part of the ruins adjoining this ancient temple a petty rajah of the place has built a small temple, and placed in it another image taken from the ruins, and which resembles that called Jagannath, but which has received the name of Chatrabhoj. Roodurpoor is distant 9 E. from Goruckpore cantonment 28 miles. Lat. 26° 24', long. 88° 40'.

ROODURPOOR, in the British district of Bareilly, the
ROO.

principal place of the pergunnah of the same name, on the route from Bareilly to Almora, and 53 miles N. of the former. It is situate on the bank of a bright rippling stream, a feeder of the Ramgunga, amongst some very fine mango-groves, from which the tops of temples and other buildings appearing, give the place, when viewed at some distance, an appearance of beauty and importance, that quickly vanish on a nearer approach. Heber found "all the usual marks of a diminished and sickly population, a pestilential climate, and an over-luxuriant soil. The tombs and temples were all ruins; the houses of the present inhabitants, some two or three score of wretched huts, such as even the gipsies of the open country would hardly shelter in. The people sat huddled together at their doors, wrapped in their black blankets, and cowering round little fires, with pale faces and emaciated limbs; while the groves, which looked so beautiful at a distance, instead of offering, as mango-groves do in well-peopled and cultivated spots, a fine open shade, with a dry turf and fresh breeze beneath it, were all choked up with jungle and nightshade."

The road is good on the north, or Almora side, but bad on the south, towards Bareilly. Elevation above the sea 629 feet. Lat. 28° 58', long. 79° 28'.

ROOKUNPUR, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a village on the route from Allygurh cantonment to that of Delhi, and 23 miles N.W. of the former. The road in this part of the route is good; the country open, with a sandy soil, and scantily cultivated. Lat. 28° 9', long. 77° 58'.

ROOL, in Bussahir, a village near the southern base of the Shatul Pass, gives name to a small district in the pergunnah of Chooara. The district of Rool contains five villages, varying in elevation above the sea from 9,000 to 9,400 feet, at which last altitude it is the highest inhabited ground on the south-western face of the Snowy range. The crops are wheat, barley, buckwheat, and pulse: wheat, however, seldom comes to complete maturity, and is cut sometimes nearly green. The road rises rapidly to the Buchkal Ghat, through a beautiful wood of oak, yew, pine, rhododendron, horse-chestnut, and juniper. Rool village is 9,350 feet above the sea. Lat. 31° 19', long. 77° 57'.
ROO.

ROOMAH,¹ in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to Futtehpoor, and 10 miles² S.E. of the former. The road in this part of the route is good, the country level and partially cultivated. Lat. 26° 21', long. 80° 30'.

ROONUNG,¹ in Bussahir, a pass in the district of Koonawar, over a range dividing the valley of Ruskulung from that of Pejur. The ridge consists of slate, and the crest of the pass is below the limits of perpetual congelation, as the juniper grows there, and even on the heights above. The pass is closed for four of the coldest months of the year, and the communication is then effected by a circuitous and very dangerous route along the bank of the Sutluj. Elevation of Runung Pass above the level of the sea 14,500 feet.² Lat. 31° 43', long. 78° 28'.

ROOPGUNGE.—A town in the British district of Dacca, presidency of Bengal, eight miles N.E. of Dacca. Lat. 23° 47', long. 90° 31'.

ROOPGURH.—A town in the Rajpoot state of Jeypoor, 45 miles N.W. from Jeypoor, and 76 miles N.E. by N. from Ajmeer. Lat. 27° 21', long. 75° 22'.

ROOPNARAIN.—A large estuary extending twelve miles, between the British districts Hoogly and Hedjelee, from Tumlook, in lat. 22° 18', long. 88°, to Fort Mornington, in lat. 22° 13', long. 88° 6'. This expanse is formed by the Dalkisore meeting the tide at its entrance into the estuary of the Hooghly.

ROOPNUGUR.—A town in the Rajpoot state of Kishengurh, 26 miles N.E. by N. from Ajmeer, and 61 miles W. by S. from Jeypoor. Lat. 26° 47', long. 74° 55'.

ROOPOHEE RIVER.—A considerable watercourse formed by the Brahmapootra river: it leaves that stream in lat. 26° 34', long. 92° 51', and rejoins it again in lat. 26° 17', long. 92° 1', after a course of seventy miles, through the district of Nowgong, in Lower Assam.

ROOPSEE, in the Rajpoot state of Jesulmeer, a small town and fort 10 miles N.W. of the city of Jesulmeer. Lat. 26° 58', long. 70° 50'.

ROOPYN.—A river of Guzerat, rising in lat. 23° 31', long. 92°.
72° 2', and, flowing west for forty-two miles, falls into the Runn of Cutch, in lat. 23° 28', long. 71° 28'.

ROORGAON,1 in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Allahabad to Etawa, and 63 miles S.E. of the latter. The road in this part of the route is good, the country fertile. Lat. 26° 14', long. 79° 49'.

ROORKEE,1 in the British district of Suharunpore, lieutenant-governorship of the North-West Provinces, a town on one of the most elevated sites in the doab between the Jumna and the Ganges. It is on this account that the great Ganges Canal has been made to pass by this place, whence channels of irrigation can be directed to most parts of the Doab. With the view of effecting this project, the river Solani has been traversed by an aqueduct of 920 feet in length. The clear waterway will be 750 feet, by fifteen arches of fifty feet span each: the estimated cost of the aqueduct is 158,000/. The selection of this place as the head-quarters of the canal operations, and the establishment of the necessary workshops, model-rooms, and offices, have tended to convert a small village into a considerable European station. A college has been established here, for the purpose of affording instruction in civil engineering to Europeans and natives, and which, as a mark of respect to the memory of its founder, has been designated the 'Thomason College.'

ROOROO,1 in Bussahir, a village on the right bank of the Pabur, near the confluence of a small feeder called the Supil. The neighbouring tract is described by Hutton as the most populous and best cultivated which he had seen in the hills. It is peculiarly well suited for the culture of rice, being watered by many canals, cut from the river which winds through it. Elevation of the village above the sea 5,100 feet. Lat. 31° 12', long. 77° 48'.

ROOSHKATONG.—See DARBUNG.

ROOSTUMPOOR, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from Hurdwar to the town of Moradabad, and 13 miles N.W. of the latter. The road in this part of the route is good. Lat. 29° 1', long. 78° 45'.

ROPA, in Bussahir, a village of the district of Koonawur, is
ROPUR.

situate in the valley of Ruskulung, and near the left bank of the river Darbung. Three or four miles from this village are numerous extensive and rich veins of copper-ore, situate 13,000 feet above the level of the sea. Access to this locality is obtained with excessive difficulty by climbing up the precipitous side of a lofty mountain, near the summit of which the principal veins have been discovered. These lie in white quartz, running between grauwacke and red sandstone, which are here the chief formations. Elevation of Ropa above the sea 9,800 feet. Lat. 31° 47', long. 78° 28'.

ROPUR,\(^1\) in Sirhind, a town situate a mile from the left bank of the Sutlej, a short distance below its efflux\(^2\) from the Himalaya. The river is here crossed by a ferry, affording an important communication between the Punjab and Sirhind. It is described to be "a noble stream, thirty feet deep, and more than 500\(^*\) yards in breadth."\(^3\) Its bed consists of large smooth pebbles, mixed with mud. The low range of the Sub-Himalaya, bounding Sirhind on the north-east, does not reach to the Sutlej, along the left bank of which a narrow plain extends for several miles, and in this the town is situate, on a slight eminence.\(^4\) It was the residence of the rajah of the adjacent territory, which yielded an annual revenue of 6,000L.; but he, being one of the protected Sikh chiefs who failed in fidelity to the British government on the breaking out of the war with Lahore subsequently to the death of Runjeet Singh, was compelled to retire on a pensionary provision, and his territory escheated\(^5\) to the British authority. Here, in 1831, an interview took place between Lord William Bentinck, Governor-General of India, and Runjeet Singh; the Sikh ruler first crossing on a bridge of boats, and subsequently receiving in turn the visit of the Governor-General, on the right bank of the Sutlej. On "the 1st of November, 1831, both camps broke ground, and commenced their march in opposite directions, after a week of magnificence and mutual display, reminding one of the days of the field of cloth\(^6\) of gold." On this occasion, Runjeet requested and received from the British authorities a paper, containing a promise of perpetual friendship.

Boopur is about 1,100 feet above the level of the sea. Distant N.W. from Calcutta 1,120 miles. Lat. 30° 58', long. 76° 37'.

\(^*\) Lloyd\(^1\) states the breadth to be 550 yards.

8. Journey to Himalayas, l. 94.
ROREE, or LOHUREE (the ancient Lohurkot), in Sinde, a town situate on the eastern bank of the Indus, on a rocky eminence of limestone, interspersed with flint. This rocky site is terminated abruptly on the western side by a precipice of forty feet high, rising from the beach of the Indus, which, in inundation, attains a height of about sixteen feet above its lowest level. Westmacott is of opinion that it formerly must have risen to fifty feet, washing the brow of the eminence on which Roree stands, and that then the neighbouring rocky islets in the Indus were sunken rocks. According to the unanimous testimony of the natives, the level of the river during inundation continually decreases, and this is probably owing more to the wearing down of the rocky bed, than to any diminution of the supply of water in the upper part of the river's course.

Roree, when seen from without, has a striking and pleasing appearance, as the houses are four or five stories high, and of corresponding extent; but when surveyed more closely, they are found to be ruinous, in many instances rudely constructed with a slight timber frame, filled up with wicker-work, and plastered with mud: and as whitewash, though very easily obtainable, is not used, they have a dingy and neglected appearance. The few more costly houses of burned brick were erected by wealthy merchants before the establishment of the dynasty of the late ameers. The streets are so narrow that a camel in passing occupies the entire breadth from side to side. The air, in consequence, is very close and unwholesome. There are forty mosques in which prayers are still recited, and twice that number in a state of ruin and desertion. The great mosque stands on an elevated site in the north-east part of the town, and was built at the commencement of the seventeenth century, by the lieutenant of the Emperor Acbar. It is a massive, gloomy pile of red brick, covered with three domes, and coated with glazed porcelain tiles. In an adjacent shrine is kept a hair in amber, in a gold case set with rubies and emeralds, and inclosed in another of wood enriched with silver. This the pious Mahometan undoubtingly believes to be a hair of the beard of his prophet; and a number of guardians of this precious relic are supported at the public expense.
ROREE—ROT.

Roree has a spacious and well-built serai, or lodging-place for travellers, but it has been allowed to fall into great decay. There are two bazaars, one for grain, the other for miscellaneous articles, and both are tolerably well supplied; but they are ill-built and ruinous. Manufactures are few and unimportant. They embrace the fabrication of paper of indifferent quality, leather, silks, and cottons, and the dyeing and printing of the last-named article. The population is mixed, consisting of Hindoos, indigenous Sindians, Belooches, Afghans, and Moguls. All trades and handicrafts, with the exception of works in gold, silver, and jewellery, are in the hands exclusively of Mahometans; the Hindoos devote themselves chiefly to banking, money-broking, and similar traffic. The population is estimated at about 8,000. Lat. 27° 38', long. 68° 55'.

ROREE MEER SHAH, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 75 miles N.W. by N. of the town of Mooltan. Lat. 31°, long. 70° 46'.

ROSHUNABAD, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town near the right bank of the Ganges, 10 miles N.W. of the city of Furruckabad. Lat. 27° 30', long. 79° 32'.

ROSS ISLAND.—A considerable island, forming one of the group known as the Mergui Archipelago. Its centre is about lat. 12° 14', long. 96° 12'.

ROTANGA PASS, leading through the mountains that separate the British district of Lahoul from Kullu, 32 miles N. of Sultanpoor. Lat. 32° 25', long. 77° 12'.

ROTAS, in the Punjab, an extensive fort six miles west of the right or western bank of the river Jhelum.¹ The interior is two miles and half long, and is of an oblong, narrow form, having its two sides and eastern end resting upon the edge of ravines, which divide it from a table-land of elevation equal to that of the hill on which the fort stands. The western face of the plateau is washed by the small river Gham running at its base. Its works are of immense strength, consisting of massive walls of stone thirty feet thick, cemented with mortar, and strengthened with bastions, all crenated throughout, and provided with a double row of loopholes. Connected with the

fortress is an immense well, lined with masonry, and having passages down to the water so numerous that from fifty to a hundred persons may draw water at once.  

The present fortress was built about the year 1540, by Shir Shah, the Patan emperor of Delhi, who had driven Humainoon into exile; and he is said to have expended a million and a half sterling in its construction. When Humainoon returned, at the head of an army, to reclaim his empire, the fortress was given up to him without resistance. He demolished the palace raised within the fort by his rival and enemy, but found the massive defences too strong for the limited time and means which he could allow for their destruction. The fortress is at present in a ruinous state, and in one place a huge mass of the wall has tumbled down the precipice, and rendered the interior accessible. It is considered by military men indefensible against modern modes of attack.  

**ROTAS.**—See **Rhotasgurh.**  

**ROTTHINGI,** in Bussahir, a pass in the district of Koonawar, over a ridge rising abruptly from the left or south-eastern bank of the Taglakhar torrent. The ascent of the pass from the south-west is a mile in length, at an angle from top to bottom of 43°. The elevation of the crest of the pass is 14,688 feet above the sea, yet the rays of the sun, reverberated from the bare rocks, produced a heat quite oppressive. Above “rise hoary summits of incredible height and grandeur, with extensive valleys between them, loaded by prodigious bodies of undisolving snow.” Lat. 31° 36', long. 78° 42'.  

**ROTKUK.**—See **Routuk.**  

**ROUNAPUR,** in the British district of Azimgurh, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Azimgurh to that of Goruckpoor, and 18 miles N. of the former, 43 S. of the latter. It has a few shops; water is plentiful, and supplies may be had from
the surrounding country, which is low, level, and partially cultivated. Distant N. from Benares 70 miles. Lat. 26° 15', long. 83° 20'.

ROWLI GHAT, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a ferry over the Ganges, on the route from Moradabad to Mozaffarnuggur, and 25 miles E. of the latter town. The village of Rowli is situated on the left bank of the Ganges. The road on the south-eastern side, towards Bijnour, is good, but on the right side of the river is bad, lying over khadir or marsh-land. Distant N.W. from Calcutta 970 miles. Lat. 29° 26', long. 78° 8'.

ROWRAH.—A town in the British district of Ahmednuggur, presidency of Bombay, 118 miles N.W. by N. of Ahmednuggur. Lat. 20° 29', long. 73° 42'.

ROWSURA.—A town in the British district of Tirhoot, presidency of Bengal, 31 miles S.S.E. of Durbunga. Lat. 25° 43', long. 86° 7'.

ROXAKANDEE.—A town in the British district of Jessore, presidency of Bengal, 50 miles N.E. of Jessore. Lat. 23° 40', long. 89° 26'.

ROYACOTTAH.—A town in the British district of Salem, presidency of Madras, 61 miles N. by W. of Salem. Lat. 12° 31', long. 78° 5'.

ROY BAREILLY,¹ in the district of Banswara, in the territory of Oude, a town on the route from Allahabad to Lucknow, and 73² miles N.W. of the former, 55 S.E. of the latter. It is situated on the river Sai, which is crossed by a brick-built bridge, and is navigable so far up, and can bear craft of twelve tons, though there are none except a few ferry-boats at the place, in consequence of the intolerable exactions of the proprietors of lands along the lower course of the river. It is mentioned in the Ayeen Akberry, in the sirkar or subdivision Manikpoor, soobah or province Allahabad. "Roy-bereyli has a brick fort, and is assessed at 91,274 rupees." Lat. 26° 14', long. 81° 19'.

ROYBUGGA.—A town on the S.W. frontier of Bengal, in the native state of Gangpoor, situated on the left bank of the Sunk river, and 81 miles N.E. by N. from Sumbulpoor. Lat. 22° 17', long. 84° 42'.

ROYCHANGA.—A town in the British district of Coosch ² ²
ROY—RUD.

Behar, presidency of Bengal, 18 miles N.W. of Behar. Lat. 26° 27', long. 89° 16'.

ROYMUNGUL RIVER.—One of the mouths of the Ganges, falling into the sea in lat. 21° 42', long. 89° 5'.

RUBOOPOORA, in the British district of Bolundahuhur, lieutenant-governorship of the North-West Provinces, a town on the route from Muttra to Delhi, by the left bank of the Jumna, 35 miles S.E. of Delhi. Lat. 28° 15', long. 77° 40'.

RUDAULI, in the kingdom of Oude, a town 40 miles E. of Lucknow. It is surrounded by swamp, except on the west side, and is superior to many other places of this country, in having brick-built houses; and there is also a Mussulman mausoleum of the same material. Lat. 26° 54', long. 81° 27'.

RUDAWAL, in the territory of Bhurtpore, a village on the route from Agra to Mow, 41² miles S.W. of the former, 374 N.E. of the latter. Close to it is encamping-ground, and supplies and water are obtainable. Lat. 26° 59', long. 77° 29'.

RUDLEGUNJ.—A town in the British district of Rungpore, presidency of Bengal, 14 miles W. by S. of Rungpore. Lat. 25° 37', long. 89° 2'.

RUDOWLEE, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a small town on the river Ami, 40 miles N.W. of Goruckpoor cantonment. Buchanan, describing it forty years ago, states the number of houses to be 100; and, assigning six to each house, the population consequently may be estimated at 600. Lat. 27° 3', long. 82° 48'.

RUDRA HIMALEH, a lofty summit of the Himalayas, rises on the eastern frontier of Gurhwal, towards Chinese Tartary. Fraser, who viewed it from Gangotri, at a distance of eight or ten miles, describes it under that aspect as having five huge, lofty snowy peaks, rising behind a mass of bare rocky spires. The highest summit, as ascertained in the trigonometrical survey, has an elevation of 22,390 feet above the sea. Lat. 30° 58', long. 79° 9'.

RUDRAPRAYAG, in the British district of Kumaon, lieutenant-governorship of Agra, presidency of Bengal, a village at the confluence of the rivers Alakananda and Mandakini. At an inconsiderable height above the water is a small math or temple, and adjacent a few houses of Brahmins. There is also
RUG—RUH.

a rock thirty feet high and fifteen in diameter, called Bhim ka Chulha, or the "Kitchen of Bhim," a giant famous in Hindoo lore. It is completely excavated, somewhat in the form of a dome, with apertures at top, in which Bhim is supposed to have placed his cooking utensils. It is one of the five principal prayags2 or confluences mentioned as holy in the sacred books of the Hindoos. Its elevation above the sea is about 2,200 feet. Distance N.W. from Calcutta, by Lucknow, Bareilly, Almora, and Srinagar, 1,0203 miles. Lat. 30° 17', long. 79° 2'.

RUGONATHGURH.—A town in the Rajpoot state of Jeypoor, 57 miles N.N.W. from Jeypoor, and 104 miles S. by W. from Hissar. Lat. 27° 40', long. 75° 31'.

RUGOWLEE,1 in the British district of Banda, lieutenant-governorship of the North-West Provinces, a lofty rocky eminence, very steep and difficult of ascent, 10 miles N. of the hill-fort of Ajegurh. In 1809, when the British government commenced2 military operations against Luchman Singh, rajah of Ajegurh, his uncle, Pursaud Singh, took post with about 500 picked men on the hill of Rugowlee, the fortified summit of which was accessible only by narrow zigzag pathways, commanded every twenty yards by strong posts behind large rocks, and manned with matchlockmen. All the lower defences were, however, successively stormed by the British forces, who, for want of scaling-ladders, being unable to make good an entrance within the upper inclosure, were withdrawn. In the course of the night the inclosure was, however, evacuated by the enemy, leaving their chief and between sixty and seventy of their number killed, 150 or 160 being wounded. The British loss amounted to twenty-eight killed and 115 wounded. The summit of the hill is probably about 800 feet above the base, or 1,300 above the sea. Lat. 25° 1', long. 80° 22'.

RUHEEMPOOR, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a town on the right bank of the Jumna. Distant S.E. from Delhi 42 miles. Lat. 28° 6', long. 77° 31'.

RUHOLEE, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Delhi, 40 miles W. of the former. The road in this part of the route is good; the country is open.
RUJ—RUN.

with considerable cultivation, and in a few places overrun with jungle. Lat. 28° 27', long. 78° 54'.

RUJGAWA,1 in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by the Rajapur ferry, from the cantonment of Allahabad to Banda, and 41 miles W. of the former. The road in this part of the route is bad and winding, the country well cultivated. Lat. 25° 25', long. 81° 21'.

RUJILA.—A town of Malwa, in the native state of Jabboah, 10 miles S. by E. from Jabboah, and 96 miles E.N.E. from Baroda. Lat. 22° 39', long. 74° 39'.

RUJORA, in the territory of Dholpoor, a town on the route from Agra to Baree, 30 miles S.W. of former, 14 N.W. of the town of Dholpoor. Lat. 26° 50', long. 77° 45'.

RUJOU, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Shahjehanpoor, and seven miles S.E. of the former. The road in this part of the route is good; the country open, level, and well cultivated. Lat. 28° 17', long. 79° 33'.

RUMALUH,1 in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town on the route from Delhi to Suharunpore, 88 miles N. of the former. Rumaluh has a population of 5,234 inhabitants.2 Lat. 29° 13', long. 77° 20'.

RUMYEPEPOOR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a town 10 miles W. of the right bank of the Ganges. Lat. 26° 21', long. 80° 21'.

RUNDALA.—See Khundalu.

RUNEEA,1 in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a small town on the route from the cantonment of Cawnpore to that of Calpee, and 31 miles N.E. of the latter. The road in this part of the route is bad, the country partially cultivated. Lat. 26° 24', long. 80° 8'.

RUNGAGOORA.—A town in the British district of Muttuck, presidency of Bengal, 55 miles N.E. of Seebpooor. Lat. 27° 32', long. 95° 20'.

RUNGAMUTTEE.—A town in the British district of
BUN.

Goalpara, presidency of Bengal, 40 miles W. of Goalpara. Lat. 26° 7', long. 90° 1'.

RUNGAPOOR.—A town in the native state of Hyderabad, or territory of the Nizam, 102 miles N.E. from Hyderabad, and 148 miles N.N.W. from Guntoor. Lat. 18° 17', long. 70° 44'.

RUNGASAMOODBA.—A town in the British district of Cuddapah, presidency of Madras, 65 miles S.W. by S. of Cuddapah. Lat. 18° 42', long. 78° 19'.

RUNGELPOOR, in the Bhere Doob division of the Punjab, a town situated on the left bank of the Ravee river, 25 miles S.W. of the town of Lahore. Lat. 31° 20', long. 74°.

RUNGPOOR.—See BELASPOOR.

RUNGPOOR.1—A British district under the presidency of Bengal, named from its principal place. It is bounded on the north-east by Cooch Behar; on the east by the Brahmapootra, dividing it from the British districts Goalpara and Mymensing; on the south by the British district Bograh; and on the south-west by the British district Dinajepore. It lies between lat. 25° 16'—26° 21', long. 88° 26'—89° 50'; is 106 miles in length from south-east to north-west, and sixty in breadth: the area is 4,130 square miles. A great part of the district is low; and it is estimated that in a considerable portion thirty-six parts out of 100 are inundated during the rains. The general slope of the surface is from north-west to south-east, as indicated by the flow of the rivers in that direction, the principal of which are the Kuruttea, Teesta, Dhorla, and Brahmapootra. In addition to these, there are many other streams of less note; the whole country being permeated by watercourses, forming communications between the great rivers. During the rains, the surface having everywhere great equality of elevation, an accidental depression in the waterway of either the Brahmapootra or the Ganges will immediately cause the general drainage of the country to set towards the lower of these great rivers. From some unexplained cause, more permanent alterations have taken place in the direction of the drainage; the great volume of the water of the Teesta, which formerly was, by the Attree, or south-western channel of that stream, thrown into the Ganges, is now, by the south-east channel, still denominated the Teesta, thrown into the

3 Prinsep, Steam Navigation in British India, 42.
RUNGPOOR.

Brahmapootra. Though there is no lake of any considerable extent, there are numerous jhils or small stagnant sheets of water, formed either in the deserted channels of streams or by the overflowing of springs. Their numbers and positions vary very much; the old ones becoming obliterated either by silt or the accumulation of decayed vegetation, and new ones being formed by the alterations in the courses of rivers and other causes. Buchanan was of opinion, that between the time of Major Rennell and that at which he wrote, these minute lakes had diminished both in number and in size.

The climate of Rungpore differs considerably from that of places in India farther south and west. The hot winds of spring are but little felt anywhere within it; in the eastern part they are unknown, and even in the western they blow for not more than eight or ten days in the whole year. During May the temperature is rather high; but its effects are modified by the easterly winds, which are comparatively cool. From the beginning of June to the end of October the heat is more felt; but this, in the judgment of Buchanan, is owing to the calmness of the weather, as he never found the temperature exceed 84°. In the northern part hoar-frosts are said occasionally to occur in midwinter.

On the zoology of this district Buchanan is almost the sole guide. Apes and monkeys of various kinds are numerous; lemurs are sometimes, though rarely, to be met with; tigers and leopards are neither very numerous nor very mischievous, as they seldom destroy human beings, and the number of cattle falling a prey to them is not great. There are black bears in the district, but not in large numbers; of otters, foxes, and jackals, there are many. Two other animals, seemingly of the canine tribe,—the hungra and the kubok, are spoken of, but Buchanan was unable to procure a sight of either. Wild elephants infest the eastern part, and also portions of the north-west: they are very destructive to grain-crops, especially rice. The woods harbour the rhinoceros, which is killed for its horn, to which imaginary virtues are attributed, and for its skin, out of which excellent targets are made: the hunters use the flesh as an article of food. The wild hog exists

* Buchanan gives this not improbable statement on native testimony, but intimates a doubt whether he rightly understood it.
RUNGPOOR.

in different parts, in greater or less numbers; the flesh is eaten, and is considered pure. There are wild buffaloes, as well as various kinds of deer and of antelopes. The porcupine is less numerous than in some other parts, and is less sought after for food. The pangolin is found, though a rare animal, and its flesh is greatly valued. Hares are very abundant. Porpoises are numerous in the Brahmapootra, and are killed for the sake of their oil. River turtles are numerous, and attain great size; some, Buchanan was informed, measuring between seven and eight feet in length. These animals furnish an abundance of food to the inhabitants, though Buchanan found it distasteful.

The principal crops are rice, wheat, barley, pulse, oil-seeds, garden vegetables, sugarcane, tobacco, and indigo; the mulberry-tree thrives. Cotton⁵ indeed seems unquestionably to be a failure in the district. There are about fifty⁶ large indigo-factories. These are either managed by Europeans, or after the European method. Much of that made by natives is of inferior quality, but some is said to equal that of the Europeans. The number of factories of all sizes and descriptions is about 400.

Commerce appears in the time of Buchanan¹ to have been by no means active. He gives a list of exports, which, however, may be regarded as superseded by a more recent one² in another publication, and which comprises both exports and imports. From this, indigo appears to be by far the largest among the exports; silk, gunny-bags, tobacco, sugar, carpets, and paddy are next in order: the remainder are less considerable. Among the imports, piece-goods occupy the first place; cotton, salt, woollens, manufactured silks, and metals, are next in importance; and a number of miscellaneous articles are imported to a small extent.

The population of the district has been returned at 2,559,000.³

The tract comprised within the British district Rungpoor was formerly the western part of the ancient Hindoo country called Camroop.⁴ The realm appears to have attained its greatest power and prosperity under Rajah Nilambor, who was conquered about the close of the fifteenth century, by Husain Shah⁵ of Bengal. On the overthrow⁶ of the kingdom of

Bengal, about 1542, by Shir Shah, the renowned Afghan, subsequently padشاه of Delhi, the district appears to have become part of that great empire. During the turbulent period subsequent to the death of Shir Shah, it was severed from the empire, to which it was again annexed by Akbar, about 1584. It passed to the East-India Company in 1765, under the firman\textsuperscript{7} of Shah Alum.

Rungpore\textsuperscript{1}—The capital of the British district of the same name, under the presidency of Bengal, a town situate on the route from Purna to Goalpara, 128 miles\textsuperscript{2} E. of the former, 105 S.W. of the latter. Though the locality of the civil establishment of the district and the head station of the police, it is represented as a wretched\textsuperscript{3} place, consisting of scattered huts with a few brick-built houses. A mosque of considerable size, and two monuments much revered by Musulmans, having been erected in honour of reputed saints, constitute its principal attractions. The Hindoo places of worship are quite unworthy of notice.

Rungpore is 150 miles N.E. of Berhampur by Dinajpur, and 268 N.E. of Calcutta by the same route. Lat. 25° 40', long. 89° 16'.

Runkutta\textsuperscript{1} in the British district of Agra, lieutenant-governorship of the North-West Provinces, a village a mile from the right bank of the Jumna, on the route from the city of Agra to that of Muttra, and 12 miles\textsuperscript{2} N.W. of the former. It has a few shops, and is supplied with water from five pucca (brick-lined) wells, from forty to forty-five feet deep. The road in this part of the route is wide and generally good, though in some places sandy and heavy; the country is level and well cultivated. Lat. 27° 14', long. 77° 56'.

Runn of Cutch.—See Cutch.

Runpoor.—A tract of Orissa, inhabited by one of the independent hill tribes, situate on the western boundary of the British district of Pooree. Its centre is about lat. 20°, long. 85° 20'.

Ruojan.—A town in the British district of Chittagong, presidency of Bengal, 19 miles N.E. of Chittagong. Lat. 22° 33', long. 92° 5'.

Rupbas\textsuperscript{1} in the territory of Bhurtpore, a small town 16 miles S.E. of the city of Bhurtpore. The hills here consist,
in inexhaustible quantities, of rock of compact durable sandstone, of various hues, much in request for fine building purposes, and hence quarried to great extent. The tasteful and highly-finished buildings of Deeg, in the northern part of the territory, are constructed of this stone. Lat. 27°, long. 77° 39'.

RUPIN, in Bussahir, a pass over the range of the Himalaya bounding Koonawar on the south. The formation of the rocks is partly gneiss, partly granite; but the former is most abundant. Elevation above the sea 15,480 feet. Lat. 31° 21', long. 78° 12'.

RUPSHU, in Ladakh, among the Western Himalayas, is a very elevated and barren plain, or extensive valley, bearing a scanty vegetation of grass and stunted furze, subjected, even in the height of summer, to frost and snow, and being swept over by the most impetuous whirlwinds. Its mean elevation is 16,000 feet. The climate is characterized by great aridity; and from this cause, and the intense cold, is peculiarly suited to the constitution of the yak and shawl-goat, which thrive here, notwithstanding the scantiness of pasture. Its centre is about lat. 33°, long. 78° 15'.

RURTONDA GHAT.—A pass by which the road from Nagotna to Sattara is carried over the Western Ghats. Distant 34 miles W.N.W. of Sattara. Lat. 17° 54', long. 73° 38'.

RUSAREH, or RUSRA, in the British district of Ghazepore, lieutenant-governorship of the North-West Provinces, a town on the route from Bulliah to Azimgurh, 20 miles N.W. of the former. Rusareh contains a population of 10,683 inhabitants. Lat. 25° 50', long. 83° 56'.

RUSHDUN, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Calpee to the cantonment of Futtehgurh, and 20 miles N. of the former. It contains a population of 5,000 inhabitants, has a large bazar, and is well supplied with water. The road in this part of the route is good, the country well cultivated. Lat. 26° 22', long. 79° 44'.

RUSKOOND.—A town in the British district of Midnapoor, presidency of Bengal, 26 miles N. of Midnapoor. Lat. 22° 47', long. 87° 28'.

RUSKULUNG.—See DARBUNG.
RUS.

RUSSOOLA, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, and 25 miles S.W. of the latter. It is situate in a well-watered, level, fertile, and highly-cultivated country. Lat. 28° 14', long. 79° 12'.

RUSSOOLABAD, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town near the left bank of the Eson, 25 miles S. of the city of Furruckabad. Lat. 27° 2', long. 79° 42'.

RUSSOOLPOOR, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a village on the route from Muttra cantonment to Bhurtpore, and 13° miles S.W. of the former. Water is abundant, and supplies are procurable. The country is open and flat, with a sandy soil, partially cultivated. The road is good in this part of the route. Lat. 27° 20', long. 77° 38'.

RUSSAREH, in the British district of Ghazeepoor, lieutenant-governorship of the North-West Provinces, a town near the northern frontier, towards Goruckpoor, and 25 miles N.E. of Ghazeepoor cantonment. It is represented as a place of some trade. Lat. 25° 51', long. 83° 55'.

RUSSELKONDAH, in the British district of Ganjam, presidency of Madras, a town with military cantonment on the north-western frontier, towards the British territory of Orissa. Its name is compounded of the surname of a British commissioner, who accompanied the army in its operations in this part of India, and kondah, signifying "hill," the cantonment being situate at the foot of an eminence of moderate height. The surrounding country is very rugged, with hills varying in height from 500 to 2,000 feet, thickly covered with jungle, in the lower parts consisting of bamboo, in the upper of various stunted trees and bushes. The soil of the level parts is fertile, though sandy, being peculiarly favourable to the growth of the mango-tree, which produces its fruit in great abundance and excellence. It forms a considerable portion of the diet of the inhabitants, whose health does not suffer in consequence. Two small rivers flow through the cantonment, in a direction south-east, and subsequently uniting, pass by Ganjam, a short distance below which the united stream falls into the Bay of Bengal. They overflow their banks during...
the rains, but are dry at other times, and then the cantonment is supplied with water from wells. In the cantonment are barracks, and a spacious, well-built, commodious hospital. The climate is very hot and oppressive during March, April, and May, but for the rest of the year pleasant and salubrious. Elevation above the sea 150 feet. Distance from Madras, N.E., 560 miles; Calcutta, S.W., 300; Ganjam, N.E., 50. Lat. 20°, long. 84° 40'.

RUSSELLAWALA, in the Baree Dooab division of the Punjab, a town situated 15 miles from the left bank of the Chenaub, 18 miles E.N.E. of the town of Mooltan. Lat. 30° 12', long. 71° 47'.

RUSSOOLABAD, in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Cawnpoor to Etawah, 38 miles W.N.W. of the former. Lat. 26° 40', long. 79° 56'.

RUSSOOLABAD, in the territory of Oude, a town on the route from Cawnpoor to Pertabgurh, 40² miles N.W. of the latter. Supplies and water may be had in abundance there, and the road in that part of the route is good. Lat. 26°, long. 81° 30'.

RUSSOOLPOOR.—A town in the British district of Behar, presidency of Bengal, 25 miles N.E. by N. of Sherghotty. Lat. 24° 52', long. 86° 4'.

RUTBHANPOOR, in the British district of Mynpooree, lieutenant-governorship of the North-West Provinces, a small town on the route from the cantonment of Etawah to that of Mynpooree, and 10² miles S. of the latter. Supplies may be obtained here after due notice, and water is obtainable from wells. The road in this part of the route is good. Lat. 27° 6', long. 79° 4'.

RUTHOWRUH, or RHUTORAH, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town on the route from Delhi to Suharunpoor, 37 miles N. of the former. Ruthowruh contains a population of 5,734² inhabitants. Lat. 29° 12', long. 77° 17'.

RUTLAM, in Malwa, the principal place of a district of the same name. It is a large⁸ and well-built town, with good bazars. The district contains eighty-eight villages, and yields an annual revenue of 4,50,000 rupees, or 45,000L. The rajah

⁸ Malcolm, Index to Map of Malwa, 384.
who holds it as tributary to Scindia, is descended from Ruttun Singh, a scion of the Rajpoot family of Joudpore, who, about the middle of the seventeenth century, received a grant of the place from Shah Jehan, the emperor of Delhi. Though now much humiliated, he retains influence over a considerable Rajpoot population, and in 1819 succeeded, on a few days' notice, in assembling 1,200 mounted combatants to resist Scindia's claim of tribute. On that occasion, the British government interfered, and enforced an arrangement, by which it guaranteed the annual payment of 84,000 Salim Shabee rupees (about 66,000 Company's rupees) to Scindia, and freedom from molestation or interference to the Rutlam rajah. The population of the town is about 10,000; that of the district, inclusive of Sillana, is computed at 91,728. The area of the territory, as above, is stated to be 936 square miles. The military force of the state amounts to about 800 men. Elevation of the town above the sea 1,677 feet. Distant 50 miles W. of Oojeen, 288 S.W. of Gwalior fort. Lat. 23° 19', long. 75° 1'.

RUTMOO.—A river, or rather a great torrent, of the British district of Saharanpoor, has its origin on the south-western declivity of the Sewalik range, about lat. 30° 10', long. 78° 2'. It holds a course of about thirty-five miles in a southerly direction, to its confluence with the Solani, in lat. 29° 50', long. 78°. The body of water in the Rutmoo in time of flood must be very considerable, as where the passage of the stream crosses the Ganges Canal, a dam has been constructed, with forty central openings of ten feet each, and two side openings of 100 feet each, with flank overfalls, while a regulating bridge is built across the canal, to exclude the waters of the river during the floods.

RUTNAGHERY, a collectorate of the presidency of Bombay, is bounded on the north by the Hubsies' territory and the collectorate of Tannah; on the south by Sawunt Warree and the Portuguese territory of Goa; on the east by Sattara and Kolapore; and on the west by the Arabian Sea. It extends from north lat. 15° 44' to 18° 6', and from east long. 73° 6' to 73° 58'. Its greatest length from north to south is 167 miles; its greatest breadth from east to west forty miles. Its area is 3,964 square miles.
RUTNAGHERRY.

The quantity of arable land in the collectorate is small; and from this cause, as well as from the advantage of water-carriage afforded by the numerous creeks which intersect the country, and enable the ryot to find a ready market for his produce, the comparative breadth of cultivation is considerable. On this account, the extreme of want is seldom experienced in this district: while, however, many facilities exist for internal communication, the Concan labours under the disadvantage of being shut out from the Deccan by the Syadree range, which is a vast obstacle to traffic. Down various parts of this range, the different ghauts or passes communicate with the seacoast, and these, under the native government, were kept by the farmers of the transit-duties in sufficient repair for the passage of bullocks. The transit-duties being now abolished, there is no person directly interested in the repair, and for the most part these avenues of communication between the upper and lower country from the harbour of Bombay, as far south as Malwan, are in a wretched state. There are two exceptions: the "Botunda* Ghaut," leading from Mhar to Sattara, over the Mahabulishwar range, and the "Koombarlee Ghaut," leading from Chiploon to the Deccan, south of Sattara, which was converted into a good bridle-road in 1824, and has been since kept in tolerable repair. The passes of most importance to the well-being of the Concan, independently of the two above specified, are the "Anus Koora Ghaut," which leads to Rajapoor, the town of greatest trade probably in the collectorate, and the principal ghaut leading to Malwan, that of "Bhowda." The former of these is a very important one, probably the most important of any south of the Bhore Ghaut. Were it passable for carts, it would open to the coast a large district, extending along both banks of the Krishna, as far east as Bagulkote and Beejapoor, a rich district, a large portion of the trade of which still passes by this ghaut. Great as has been the relief to the trade of the country from the abolition of transit-duties in 1837, and of sayer-taxes in 1844, greater relief, and a greater impetus to trade, would, in the judgment of competent authority, have been afforded, as regards this district, had those taxes been retained, and their proceeds

* This pass is stated erroneously to be on the Bombay and Agra road.\(^1\)

\(^1\) Bombay Public Disp. 21 May, 1844.
BUTNAGHERRY.

expended on roads and bridges between the countries separated by the Ghauts. At present, trade stagnates for want of adequate means of intercourse; the cost of carriage is greatly increased by the necessity of resorting to the use of pack-bullocks. In unfavourable seasons, when forage is scarce, large droves of cattle can scarcely penetrate into the interior, except at a ruinous cost. The employment of bullocks in draught, did the road permit it, would effect an extraordinary saving, as two bullocks harnessed to a cart on a fair road would draw an amount of goods which it would require five or six to carry on their backs. The district has suffered much from the ravages of tigers.  

The character of the people is marked by ignorance and apathy; and though, as already mentioned, the extreme of destitution is seldom known, poverty may be noted as the general condition of the district. Near the seacoast, the people are somewhat better off than their neighbours inland. The Mussulman fishermen are a well-fed, strong race of men; the people in the interior are a more weakly race, except the Ramooses, above the Ghauts, and the Mhars. The Koolwarrees, who are tenants at will of the Khotes, are represented as being in a deplorable state of poverty. The population of Rutnagherry is 665,238, and the area being 3,964 square miles, the proportion is about 170 to the square mile.

The chief products of the country are rice and grain. Attempts have been made to introduce superior descriptions of produce, but they have been attended by very little success. The Mauritius sugarcane has been tried, but to a very small extent; its cultivation is languid, and nearly stationary, the advance being too slight to merit notice. One of the experimental cotton farms was established in Rutnagherry; but the failure was complete, and in 1845 the establishment was abolished. Some advance seems to have been recently made in the culture of hemp. To the growth of flax, the soil and climate appear to be uncontrollably opposed. The plant is a miserable dwarf, and the fibres of the stalk too short and too weak to be of any value to the manufacturer.

With a view to further improvement, it has been resolved by the government, with the concurrence of the home authorities, that a new survey shall be undertaken at the period.

2 India Sep. Rev. Disp. 28 March, 1839.
3 Bombay Rev. Disp. 28 July, 1848.
that the avocations of the collector will permit of his superintending the duty. Rutnagerry, the chief town of the district, is in lat. 17°, long. 73° 20'.

RUTSCER, in the British district of Ghazeepoor, lieutenant-governorship of the North-West Provinces, a town near the northern frontier, towards Azimgur, and 35 miles N.E. of Ghazeepoor cantonment. Lat. 25° 50', long. 84° 8'.

RUTTEE, in the British district of Huriana, lieutenant-governorship of the North-West Provinces, a town on the route from Hissar to Ferozepore, 37 miles N. by W. of the former. Lat. 29° 40', long. 75° 41'.

RUTTOLE, in Sirhind, a village on the route from Hansee to Lodiana, and 30 miles S. of the latter place. It is situate in a country with a surface slightly undulated, moderately fertile, and partially cultivated. The road in this part of the route is frequently miry during heavy rains. Distant N.W. from Calcutta 1,082 miles. Lat. 30° 29', long. 76°.

RUTTUNGUNJE.—A town in the British district of Bhagulpore, presidency of Bengal, 23 miles W.S.W. of Bhagulpore. Lat. 25° 4', long. 86° 56'.

RUTTUNGHUR, in Kuhloor, a fort on the crest of the steep ridge of Malown, and a mile and half N.W. of that stronghold. During the brief but obstinately-contested war with the Goorkhas, it was occupied by the British troops and though of inconsiderable size, being substantially built, and very strong by its site, formed a very important position in the operations against Malown. Distant N.W. from Calcutta 1,098 miles. Lat. 31° 14', long. 76° 51'.

RUTTUNGURKH KHEREE, in the territory of Gwalior, or possessions of Sindbis's family, on the route from Neemuch to Boondee, 36 miles N.E. of former, 73 S.W. of the latter. It is of considerable size, has a bazar, and is abundantly supplied with water from wells and a small stream. The surrounding country is elevated, and has many rocky hills. Lat. 24° 49', long. 75° 13'.

RUTTUNPOOR.—A town in the native state of Oude, 11 miles from the right bank of the Gogra river, and 13 miles S. from Oude. Lat. 26° 35', long. 89° 10'.

RUTTUNPOOR, in the territory of Nagpoor, a town, or rather collection of huts, on the route from Hazaribag to the
RUT.

city of Nagpore, 330 miles of the former, 244 N.E. of the latter. Though the capital of the district of Chotessargh, Blunt describes it, at the time of his visit fifty years ago, as consisting of about 1,000 huts, a great many of which were desolate. It is, however, a place of great antiquity, and formerly exhibited much more prosperity and civilization than at present, as is proved by the numerous ruins and tanks in its vicinity. Of the tanks, the largest has been formed by collecting the water by means of an embankment nearly two miles in length. The town is situate in "a champaign country, abundantly watered with little rivers, full of villages, and beautifully ornamented with groves and tanks." It was originally called Rajepour; but was named Rutunpoor, in honour of Rutun Singh, once rajah of the place. In A.D. 1744, Bhonsla Raghojee, rajah of Berar, having dispossessed the Gond rajah of Deogarh, gave him a jaghire in Rutunpoor. In A.D. 1761, after Law and his French followers, supporters of Shah Alum, were discomfited by the British at Patna, a remnant of 120 men, attempting to retreat across the country to the Deccan, were entertained here for a few days by the Mahratta commander of the town, and afterwards treacherously massacred by him. Rutunpoor is distant S. from Allahabad 220 miles. Lat. 22° 14', long. 82° 8'.

RUTURSAW.—A town in the British district of Purneash, presidency of Bengal, 34 miles N.W. of Purneash. Lat. 26° 5', long. 87° 9'.

RUTUNGURH, in the Rajput state of Beekaneer, a town near the eastern frontier towards Shekhawutee, on the route from Odypore to the town of Beekaneer, and 86 miles E. of the latter place. It is surrounded by a low stone wall, and has a small citadel on the top of a sandhill at its south-east angle. The bazaars are neatly laid out, and look well. Everything about the place indicates it to have been built at a recent period. It is the private property of the rajah of Beekaneer, or is khalsa, a term in some measure corresponding to our "crown land." According to Tod, the number of houses is 1,000. Lat. 28° 3', long. 74° 48'.

RUTUNJUN.—A town in the British district of Sholapoor, presidency of Bombay, 29 miles N. of Sholapoor. Lat. 18° 4', long. 75° 57'.

RUTUNPOOREE, in the British district of Pillibheet, E.I.C. Ms. Doc. lieutenant-governorship of the North-West Provinces, a village on the route by Nanakmath and Ruderpoor, from the town of Pillibheet to that of Kashipoor, 25 miles S.E. of the latter. Lat. 29°, long. 79° 21'.

RUTWAH, in the territory of Gwalior, a village on the E.I.C. Ms. Doc. route from Calpee to the fort of Gwalior, 84 miles W. of former, 40 E. of latter. Lat. 26° 11', long. 78° 40'.

RUTWUL.—A town in the British district of Sarun, E.I.C. Ms. Doc. presidency of Bengal, 24 miles N.W. of Bettiah. Lat. 27°, long. 84° 17'.

RYAGUDDAH.—A town in the hill zemindarry of Jeypoor, situate on the right bank of the Lalghar river, and 72 miles N. from Vizianagrum. Lat. 19° 10', long. 83° 29'.

RYALPETTAH.—A town in the British district of Cuddapah, E.I.C. Ms. Doc. presidency of Madras, 80 miles S. of Cuddapah. Lat. 18° 19', long. 78° 48'.

RYEPOOR,1 in the territory of Nagpoor, a town on the 1 E.I.C. Ms. Doc. route from Cuttack to the city of Nagpoor, 348 miles W. of former, 180 E. of latter.2 It has a large bazar and good encamping-ground, and provisions and water are abundant and good. Though remote from the sea, bulky and heavy articles can be conveyed3 to its vicinity during the rains by the continuous courses of the Mahanuddee and Sew rivers. Distant from Calcutta, S.W., 465 miles. Lat. 21° 11', long. 81° 40'.

RYEPOOR, in the territory of Gwalior, or possessions of Scindias’s family, a town six miles S.W. of the fort of Gwalior. E.I.C. Ms. Doc. Lat. 26° 8', long. 78° 4'.

RYGURH.1—A raj within the jurisdiction of the political 1 E.I.C. Ms. Doc. agent for the south-west frontier of Bengal. The area is 1,421 square miles: the centre is in lat. 22° 10', long. 83° 30'. The country, a plain, is wild; but the native government being a tolerable one, it is improving, and the people are orderly. The town of Rygurh, which is neat and surrounded by agreeable groves, is in lat. 21° 48', long. 83° 12'. The country is computed to be worth 20,000 rupees annually; the tribute is only 170 rupees. The population is returned at nearly 64,000.2

RYK—SAB.

RYKWARA.—A town in the native state of Oocheyra, 41 miles W. from Rewah, and 95 miles N.W. by N. from Sobraon. Lat. 24° 30', long. 80° 44'.

RYPOOR, in the tract of Baghcund, in the territory of Rewah, a small town on the route by the Kutra Pass, from Allahabad to Jubulpore, and 95 miles S.W. of the former. An anonymous British traveller describes it as a "large place; but the houses are little paltry huts," and the surrounding "country a verdant green as far as the eye could reach." This description refers to its appearance at the beginning of December. Jacquemont styles it a populous village, the inhabitants of which are in a state of deplorable indigence, and expresses his doubts as to the reported fertility of the surrounding country, which is described by Garden as "undulating, well wooded, highly cultivated, and exceedingly beautiful." There is a bazaar, and abundance of water from wells and tanks. Elevation above the sea about 1,100 feet. Lat. 24° 34', long. 81° 30'.

RYPOBA.—A town of Punnah, in the province of Bundelkund, 61 miles S. by W. from Punnah, and eight miles E. from Sangur. Lat. 23° 58', long. 80'.

S.

SAAR RIVER, in Burmah, an offset of the Yennan, one of the branches of the Irawaddy. It runs in a south-easterly direction, and falls into the Sitang, near the town of Tongo, in lat. 19° 2', long. 96° 20'.

SAAWAN, in the territory of Gwalior, or possessions of Scindia's family, a town on the route by Bhaupoora and the Muckundura Pass, from Neemuch to Kotah, 13 miles E. of former, 109 S.W. of latter. It has a bazaar, and supplies and water are plentiful. Population about 1,800. Lat. 24° 26', long. 75° 10'.

SABALGURH, in the territory of Gwalior, or possessions of Scindia, a town with a fort of great natural strength, on a
SAB—SAD.

hill on the right or south bank of the river Chumbul, 45 miles W. of Gwalior fort. Lat. 26° 15', long. 77° 24'.

SABAR.—A town in the British district of Dacca, presidency of Bengal, 18 miles N.W. of Dacca. Lat. 23° 52', long. 90° 13'.

SABBAYEA.—A town of Burmah, situate on the right bank of the Irawady river, and 144 miles S.W. by S. from Ava. Lat. 20° 10', long. 94° 43'.

SABHAWALA, in the British district of Dehra Doon, a village on the left bank of the Asun. Here was a station of the series of small triangles in the trigonometrical survey of the Himalayas. Elevation above the sea 1,792 feet. Lat. 30° 22', long. 77° 51'.

SABURMUTTEE, a river of Guzerat, rises in lat. 24° 44', long. 73° 30', near the town of Mairpoor, in the Rajpoot state of Oodeypoor, and after a course in a southerly direction of about 200 miles, it falls into the Gulf of Cambay, in lat. 22° 20', long. 72° 21'.

SACKEKAMENG.—A town of Eastern India, in the native state of Muneepoor, situate on the left bank of the Nankatha Khyoung river, and eight miles N.E. from Muneepoor. Lat. 24° 52', long. 94° 9'.

SACRAPPATAM.—A town in the native state of Mysore, 88 miles N.W. from Seringapatam, and 84 miles N.E. by E. from Mangalore. Lat. 13° 26', long. 75° 59'.

SACUN.—A town in the British district of Sumbulpore, on the south-west frontier of Bengal, eight miles N. by E. of Sumbulpore. Lat. 21° 34', long. 84° 2'.

SADDEEPOR, in the British district of Banda, lieutenant-governorship of the North-West Provinces, a town on the right bank of the Jumna, 26 miles N.E. of the town of Banda, 20 miles S.W. of the town of Futtehpore. Lat. 25° 46', long. 80° 37'.

SADOOLAPPOOR.—A town in the British district of Rungpore, presidency of Bengal, 26 miles S.E. by S. of Rungpore. Lat. 25° 22', long. 89° 29'.

SADRAS, in the British district of Chingleput, presidency of Madras, a town on the Coromandel coast, in this part low and wooded, though inland three or four miles is a range of rugged hills of no great height, called the Sdras Hills. The
SAE.

estuary of the river Palar, three miles to the south, is so ob-
structed by a bar as to admit only insignificant coasting-craft;
and at Sadras there is no haven, so that ships must anchor in
the open sea. "Sadras is a large but poor-looking town,
once a Dutch settlement, and still containing many families of
decayed burghers, the melancholy relics of a ruined factory.
Some of them have little pensions from the charity of the
British government." Here are still the ruins of a fort, a
place of some strength during the possession of the town by
the Dutch. Distance from Cuddalore, N., 62 miles; Arcot,
S.E., 62; Madras, S., 42. Lat. 12° 31', long. 80° 13'.

SAEE, in the territory of Oude, a river rising in lat.
27° 10', long. 80° 32', about mid-distance between the Goomtee
and the Ganges. It holds a very serpentine course, in a
direction generally south-east, and falls into the Goomtee, on
the right side, ten miles below the town of Jounpore, its total
length of course being about 280 miles. It is navigable during
the rains for craft carrying from ten to twelve tons as far as Rae Bareilly, 130 miles from its mouth. At Mohaun,
about forty miles from its source, it is crossed by a stone
bridge. Close to Rae Bareilly is a bridge of brick, over which
passes the route from Allahabad to Lucknow. At Pertabghur,
sixty miles lower down, it is crossed by the route from Allaha-
bad to Sooltanpore, the passage being made during low water
by ford, at other times by ferry. Still lower, and about twenty
miles from its mouth, it is crossed on the route from Allaha-
bad to Jounpore, by means of a fine brick-built bridge. Wilford
observes that this river "is called Sambu and Sucti, and in the
spoken dialects Sye, because it abounds with small shells.
This," he continues, "is really the case, as I have repeatedly
observed whilst surveying or travelling along its banks. They
are all fossil, small, and embedded in its banks, and appear
here and there, when laid bare by the encroachments of the
river: they consist chiefly of cockles and periwinkles." He
reminds subsequently, "This river is not mentioned in any
Sanskrit book that I ever saw, but I take it to be the Sambu
of Megasthenes."

SAE—SAH.

SAENUGURH, in the territory of Punna, in Bundelcund, a town on the route from Banda to Jubbulpoor, 69 miles N. of the latter. The garhi, or little fort here, "consists of four stone houses, connected by a wall, very capable of defence if not attacked by artillery." Lat. 23° 55', long. 80° 20'.

SAFAPOOR.—A town in the dominions of Gholab Singh, the ruler of Cashmere, 14 miles N.W. by N. from Sirinagur. Lat. 34° 14', long. 74° 49'.

SAFTIBAREE.—A town in the British district of Rungpore, presidency of Bengal, 14 miles N.E. by N. of Rungpore. Lat. 25° 51', long. 89° 22'.

SAGGOUR.—A town in the native state of Bonei, on the south-west frontier of Bengal, 86 miles E.N.E. from Sumbulpoor, and 110 miles N.N.W. from Cuttack. Lat. 21° 55', long. 85° 15'.

SAGOR, in the territory of Indore, or possessions of Holkar's family, a small town on the route from the British cantonment of Mow to Baroda, 12 miles W. of former. Elevation above the sea 1,932 feet. Lat. 22° 36', long. 75° 40'.

SAHANGURREE.—A town in the territory of Nagpoor, 60 miles E. by S. from Nagpoor, and 78 miles S. by E. from Seuni. Lat. 20° 59', long. 80° 3'.

SAHAPOOR, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Meerut to that of Moradabad, and 36 miles S.E. of the former place. Lat. 28° 50', long. 78° 18'.

SAHIDUREE.—A town in the Rajpoot state of Oodeypoorn, 51 miles E.S.E. from Oodeypoorn, and 23 miles W. by S. from Neemuch. Lat. 24° 21', long. 74° 33'.

SAHIDUREE.—A town in the Rajpoot state of Oodeypoorn, 62 miles E.S.E. from Oodeypoorn, and 13 miles S.W. by W. from Neemuch. Lat. 24° 20', long. 74° 43'.

SAHEB GUNJ.—A town in the British district of Tirhoot, presidency of Bengal, 30 miles W.N.W. of Mozufferpoor. Lat. 26° 14', long. 85°.

SAHEEWAL, in the Jetch Dooab division of the Punjab, a town situated on the left bank of the Jhelum river, 119 miles W. by N. of the town of Lahore. Lat. 31° 58', long. 72° 21'.

SAHG ANJ, or SAEGANJ, in the district of Pachhamrat, territory of Oude, a town three miles S.W. of the right bank
SAH—SAI.

of the Tons (North-eastern). It is surrounded by two mud walls, one within the other, a ditch of six feet deep intervening. Distant S.E. of Lucknow 78 miles. Lat. 26° 37', long. 82° 2'.

SAHI, in the hill state of Hindoor, a village and halting-place on the route from Subathoo to Belaspoor, and 18 miles N.W. of the former. Lat. 31° 7', long. 76° 56'.

SAHINSPOOR, a village in the British district of Dehra Doon, is situated on the right bank of the Asun. It was a secondary station in the great trigonometrical survey of the Himalayas. Elevation above the sea 1,754 feet. Lat. 30° 24', long. 77° 52'.

SAHJADPUR, in the district of Aldemau, territory of Oude, a town a mile S.W. of the right bank of the river Tons (North-eastern), 100 miles E. of Lucknow. According to Butler, the population is 3,000, of whom two-thirds are Mussulmans, principally weavers. Lat. 26° 26', long. 82° 28'.

SAH KHAS, in the British district of Futtehpoor, lieutenant-governorship of the North-West Provinces, a town situated on the route from the town of Futtehpore to Banda, and seven miles S.W. of the former. Lat. 25° 53', long. 80° 46'.

SAHLAYDAN.—A town in the British territory of Pegu, situated on the right bank of the Irawady river, and 16 miles S.W. by S. from Prome. Lat. 18° 35', long. 94° 54'.

SAHUNPOOR, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a town on the route from Morabad to Hurdwar, and 64 miles N.W. of the former. Lat. 29° 38', long. 78° 23'.

SAHUSPOOR.—A town in the British district of Sumbulpur, south-west frontier of Bengal, 11 miles S.S.E. of Sumbulpur. Lat. 21° 20', long. 84° 5'.

SAIDABAD, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a town on the route from Agra to Aliqurb, and 21 miles N. of the former. Lat. 27° 26', long. 78° 6'.

SAIGURH, in the territory of Oude, a village on the route from Lucknow cantonment to Pertabghur, 80 miles S.E. of the former, 30 N.W. of the latter. Water and supplies are plentiful; the road in this part of the route is good. Lat. 26° 18', long. 81° 30'.

SAIN, in Sirmour, a range of mountains stretching in a
direction from north-west to south-east, between the river Julal, flowing along its south-western, and the Giri, along its eastern base. It is entirely of limestone, the course of the Giri forming the bounding line between that formation and the slate farther north. Fraser states that its height was usually conjectured to be about 8,000 feet, but he considers that amount too great, and adds that between 6,000 and 7,000 is more probable. The range stretches about twenty-five miles in length, between lat. 30° 37'—30° 51', long. 77° 15'—77° 29'.

SAINJ, a river of Kuloo, rises in lat. 32° 2', long. 77° 40', and, flowing south-west for thirty-eight miles, falls into the Beas, in lat. 31° 43', long. 76° 16'.

SAINT MARTIN ISLAND, off the coast of Arracan, is formed of two divisions united by a dry ledge of rocks, near the east side of the island. There is anchorage in five or six fathoms, where ships may procure fresh water from the springs on the island. Lat. 20° 36', long. 92° 25'.

SAINT THOMAS'S MOUNT, in the British district of Chingleput, presidency of Madras, a military station at the foot of a hill, the most northern and least elevated of a small range running parallel to the Coromandel coast, and about five miles west of it. "The cantonment is laid out at the base of the eastern and southern sides of the hill from which it takes its name, and occupies a surface of 750 acres. The barracks and most of the buildings have an eastern aspect, and are open to the genial influence of the sea-breeze." It is the principal station and head-quarters of the Madras artillery. The Adyar river, which in the monsoon season has a considerable body of water, but is nearly dry at other times, is at the distance of a mile north of the cantonment, and there are numerous tanks scattered throughout the neighbouring country. The geological formation of the hill is syenite and greenstone, and its summit, 340 feet above the level of the sea, is surmounted by a small range of buildings, including a Roman Catholic chapel and appropriate establishment, under the jurisdiction of the Portuguese archbishop of Goa. According to tradition, the hill called Little Saint Thomas's Mount was the scene of the martyrdom of Saint Thomas, whose apostolic toils are thought

* According to Heber, however, it belongs to "those Armenians who are united to the church of Rome."

1 Horsburgh, Directory, 6.
2 E.I.C. Ms. Doc.
4 Report, ut supra, 86.
5 Tours in Himalayas, 108.
to have extended thus far. The native population of Saint Thomas’s Mount, exclusive of the military establishment, amounted in 1837, according to official statement, to 17,720 persons; 3,500 being Mussulmans. Distance from Madura, N.E., 252 miles; Tanjore, N., 170; Cuddalore, N., 95; Bangalore, E., 178; Madras, S.W., 10. Lat. 13°, long. 80° 15’.

ST. THOMAS¹ in the British district of Chingleput, presidency of Madras, a town on the Coromandel coast, at the bottom of a small bay. From time immemorial, this town, called² by the natives Mailapur, is crowded every year with pilgrims from various parts of Asia, including Syria, Palestine, and Armenia, eager to visit the spot where, according to tradition, St. Thomas the apostle suffered³ martyrdom. The generally alleged scene of the martyrdom is a small mount near the petty fort of St. Thome or Mailapur, and is now included within the suburbs of Madras, in consequence of the extension of the city in that direction. Others, however, maintain that the apostle was martyred at St. Thomas’s Mount, rising over the military cantonment of that name. According to the traditions of the native Christians, St. Thomas, having preached Christianity in Arabia, the island of Socotra, and Malabar, proceeded to the Coromandel coast, and having succeeded in making many proselytes at Mailapur, excited the violent jealousy and resentment of the Brahmins, at whose instigation he was stoned to death by the populace, and buried on the mount. The place was taken in the year 1547 by the Portuguese, who named it St. Thome, instead of Mailapur or “City of Peacocks.” During the ascendancy of this nation in India, it became a place of considerable importance.⁴ Lat. 13° 2’, long. 80° 18’.

SAIPOOR, or SIAHIPUR.—A town in the native state of Rewah. It is situated on the river Bhern, a tributary of the Sone, 90 miles S. of Benares, 170 W. of Hazareebagh, 409 W. of Calcutta. Lat. 24° 3’, long. 82° 45’.

SAJAPOR,¹ in the jaghire of Sumpter, in Bundelkund, a town 12 miles N.W. of the left bank of the river Betwa. Here, in Dec. 1817, the British army commanded by the Marquis of Hastings, Governor-General, encamped,² in course of its advance towards Gwalior, to intimidate Scindia. Distant S.W. of Calpee 75 miles. Lat. 25° 46’, long. 78° 53’.
SAK—SAL.

SAKKEYMOUN.—A town in the British territory of Pegu, situate on the left bank of the Irawady river, and 52 miles S.S.E. from Prome. Lat. 18° 6', long. 95° 21'.

SAKOON.—A town in the Rajpoot state of Jeypoer, 49 miles W.S.W. from Jeypoer, and 34 miles N.E. by E. from Ajmeer. Lat. 26° 42', long. 75° 11'.

SAKOOR.—A town in the native state of Hyderabad, 72 miles S. by E. from Ellichpoor, and 31 miles N.W. from Mahur. Lat. 20° 10', long. 77° 40'.

SAKUM, in the Bcechna Doobab division of the Punjab, a town situated 14 miles from the right bank of the Ravee, 18 miles N.W. by N. of the town of Lahore. Lat. 31° 49', long. 74° 8'.

SALAGRA.—See Gunduck.

SALAGRAM.—A town in the native state of Mysore, 32 miles W.N.W. from Seringapatam, and 77 miles N.E. from Cannanore. Lat. 12° 35', long. 76° 18'.

SALAON, or SALON, the principal town of the district of the same name, is situate close to the right bank of the river Saee. It belongs to a proprietor, who, though denominated fakir, has an annual income of 30,000 rupees; out of which reserving 1,200 for his personal wants, he expends the remainder on the maintenance of Hindoo and Mussulman religious mendicants, without distinction of tenets. The population is estimated by Butler at 4,000, of whom 1,000 are Hindoo cultivators, the rest Mussulmans. Lat. 26° 2', long. 81° 30'.

SALBY,1 or SALBYE.—A town in the territory of Gwalior, or the possessions of Scindia's family, 32 miles S.E. of the fort of Gwalior. Here, in 1782, was concluded a treaty2 between the Maharatta states and the British government, unfavourable on the whole to the latter, but making to them an unqualified transfer of Salsette and two or three islands of minor importance, as well as confirming a previous assignment of the Maharatta claims in regard to the city of Broach. Lat. 25° 50', long. 78° 16'.

SALEEHHATTA.—A town on the south-west frontier of Bengal, in the petty native state of Patna, situate on the left bank of the Aurag river, and 42 miles S.W. by S. from Sumbulpooor. Lat. 21°, long. 88° 39'.

1 E.I.C. Ms. Doc.
2 Treaties with the Native Powers, 381.
SALEM, a British district under the presidency of Madras, named from its principal place, is bounded on the north by Mysore and the northern division of Arcot; on the east by the northern and southern divisions of Arcot; on the south and south-east by Trichinopoly; on the south-west by Coimbatore; and on the west by the last-named district and by Mysore. It lies between lat. 11° 2'—12° 54', and long. 77° 32'—79°; the area is returned at 8,200 square miles. The western part of the district, bordering on Mysore and the British district of Coimbatore, is very mountainous, and some of the ranges attain an elevation of between 5,000 and 6,000 feet above the level of the sea. "The Juvenaddy Mountains are situate on the eastern side of the Baramhabal, the Sheevaroy near the town of Salem, the Patchamally in the talook of Ahtoor, and the Collemally and Shendamungalam range in the south-eastern corner of the district. All these hills are inhabited and extensively cultivated, and produce abundance of teak, sandal-wood, and black-wood." The river Cauvery touches on this district at its north-western angle, and flowing first south-eastward, and subsequently southward, forms the western and south-western boundary of this district towards Coimbatore for 140 miles. It passes into Trichinopoly, and ultimately falls into the Bay of Bengal. The general drainage of the country is southward and southwestward into the river Cauvery; and of the streams taking this course, the principal is the Tyromany, flowing by the town of Salem. A few streams in the eastern part of the district flow northward or north-eastward, and discharge themselves into the Palar, which flows through a portion of the northern part of the collectorate. There are no considerable lakes in this district, but tanks or artificial pieces of water are very common; and during the rains, much of the country becomes swampy, and productive of malaria. Wells are very numerous, and water is generally found within a short distance of the surface; but it is brackish and not perfectly wholesome. The climate, owing to the great difference of elevations, varies considerably: on the hills it is cold and bracing, and for a great part of the year very salubrious. The qualities of the soil differ much; in the country immediately surrounding the town of Salem, a thin layer of calcareous and red loam
SALEM.

generally prevailing, through which quartz rocks appear on the surface in many places. Native carbonate of magnesia is found in a stony barren plain about five miles to the northwest of Salem, and is used in forming an excellent cement, as well as in the preparation of sulphate of magnesia, and also in obtaining pure magnesia. In the southern part of the district there is much iron-ore, which, on reduction, yields sixty per cent. of the metal fit for castings. Cotton is the principal commercial crop, and comprises the indigenous, the Bourbon, the American, and the Nankin. Coffee, indigo, sugar, and tobacco are also cultivated. An experiment, conducted by the authority of government in this district in 1849, for the improvement of the manufacture of sugar from the cane, is stated to have been successful. The population is stated to amount to 1,195,377.

SALEM. The principal place of the British district of the same name, under the presidency of Madras. "It lies in the lowest and narrowest part of a valley about seven miles in width, formed by the Shevaroy hills to the northward, and a smaller and undistinguished range to the southward. This valley is prolonged about five miles from Salem in an easterly direction, when, by the termination of the smaller hills, the country again becomes open. Westward, the country is generally open, the only exceptions being occasional small insulated hills."

The climate is somewhat fluctuating and uncertain, "the thermometer having been found to range in December from 60° to 87°; in January from 58° to 82°; in February from 60° to 91°; and in March from 66° to 95°: in the two succeeding months the variation is less, being in April from 72° to 95°, and in May from 75° to 96°. Early in June, the monsoon from the western coast generally extends to Salem in short but heavy and frequent showers, attended with thunder and lightning, continuing till late in September; by the end of October, rain begins to fall from the north-east monsoon, and showers recur with a very clouded sky till the middle of December. Between June and December, the extremes of the thermometer are 68° and 90°." A north-easterly wind prevails pretty steadily at Salem from the beginning of November to the end of January or middle of February, which is for the
first two months after it sets in rather moist, cool, and agreeable; but becomes more and more arid as the season advances, blowing from the mountains which bound Salem on the north. In January the wind becomes disagreeably cold in the morning, and unpleasantly warm at noon, being dry and parching at both periods. It produces even in people in health an annoying dryness of the skin, and exposure to it seems a frequent exciting cause of fever. After the middle or end of February, the wind, which is at times variable with frequent lulls, shifts round to the south and south-west, and blows from that quarter in hot puffs and with much uncertainty during April and May. Cooled by the rains of the south-west monsoon, this wind blows pretty freshly in June and July, and more moderately in the two following months. In October the wind becomes again variable, till the setting in of the north-east monsoon."

The river Tiromany, which holds its course down the valley, sweeps along the north and west sides of the town, and is traversed by a substantial bridge of three arches. On the western bank of the river, and rather to the south of the town, stands the old mud fort of Salem, the ramparts of which have been partially thrown down and the ditch filled up. It is now inhabited chiefly by the peons, or local irregular infantry. The houses of the few Europeans resident here are at some distance west of the fort. The old jail, situate on a slightly elevated rocky site on the right bank of the river, is a heavy bomb-proof building, with thick and strong walls of brick and chunam: the new jail is situate on the left bank of the river. There is a small military detachment stationed at this place. There are many handsome choultries or public lodges for travellers; and Salem may be considered a well-built town for this part of India, there being two wide principal streets, which run from east to west. The number of houses is 3,821, the population 19,021. Elevation above the sea 1,070 feet; distance from Bangalore, S.E., 100 miles; Madras, S.W., 170. Lat. 11° 39', long. 78° 12'.

SALHANA.—A town in the British district of Shikarpoor, province of Scinde, presidency of Bombay, 20 miles S. of Shikarpoor. Lat. 27° 44', long. 68° 37'.

SALIMPUR,¹ in the territory of Oude, a village on the
route from Lucknow cantonment to Purtabghur, 26² miles S.E. of the former, 84 N.W. of the latter. Lat. 26° 45', long. 81° 4'.

SALLYMAUN, in the Reechna Doob division of the Punjab, a town situated on the left bank of the Chenaub, 88 miles W. by S. of the town of Lahore. Lat. 31° 33', long. 72° 29'.

SALMOORA KAPALEE.—A town in the native state of Nepal, situate on the left bank of one of the branches of the Gunduck river, and 144 miles W. by N. from Khatmandoo. Lat. 28° 4', long. 83°.

SALPEE GHAT.—A town in the British territory of Sattara, presidency of Bombay, 23 miles N.N.E. of Sattara. Lat. 17° 59', long. 74° 14'.

SALSEE.—A town in the British district of Rutnageriah, presidency of Bombay, 50 miles S.S.E. of Rutnageriah. Lat. 16° 20', long. 73° 39'.

SALSETTE,¹ in the presidency of Bombay, an island separated by a narrow channel from the island of Bombay on the south, and from the mainland on the east, but connected with the former by an arched stone bridge,² and likewise by the Bandora and Makim Causeway, more recently constructed at the joint expense of government and Sir Jamsetjee Jejeebhoy. Communication between the two islands and the mainland is also now afforded by means of the Bombay and Callian railroad. It lies between lat. 19° and 19° 18', long. 72° 54'—73° 3'; is eighteen miles in length from south-west to north-east, and ten in breadth: the area is about 150 square miles. It is a beautiful, picturesque, and well-wooded tract, its surface being much diversified by hills³ and mountains, some of considerable elevation, while the lower grounds and valley are very fertile, though in some places inadequately cultivated. The eminence of Keneri, in the middle of the island, “commands an extensive view; the island of Salsette appears like a map around the spectator, presenting a fine champaign of rice-fields, cocoa-groves, villages, and cattle, woody hills, and fertile vales; the surrounding mountains form a foreground of grey rocks, covered with trees, or hollowed into gloomy caverns, the haunt of tigers, serpents, bats, and bees in immense swarms. The horizon is bounded on the south by the island of Bombay, with

¹ E.I.C. Ms. Doc. ² Garden, Tables of Routes, 233. ³ Von Orlich, Travels in India, Translation, i. 31. ⁴ Forbes, Oriental Memoirs, i. 205. ⁵ Valetina, Travels, ii. 166. ⁶ Forbes, i. 200.
the harbour and shipping; east by the continent; north by Bassein and the adjacent mountains; and west by the ocean. In various parts of Salsette are romantic views, embellished by the ruins of Portuguese churches, convents, and villas, once large and splendid, but suffered to decay since the Mahrrattas conquered the island."

According to conjecture of rather recent date, the population amounts to 50,000; an amount which would fix the relative density at 333 to the square mile.

Salsette contains several antiquities, especially at Keneri, in the centre of the island.

Salsette was attached to the province of Aurungabad under the Mogul rule, but fell into the hands of the Portuguese at an early period of their Indian career. It was claimed by the English as an appendage of Bombay, under the marriage-treaty with Charles II; but the Portuguese authorities denied its being a dependency of that island, and refused to surrender it to the expedition which, in 1662, arrived on the western coast of India to receive possession of the territory ceded as the marriage-portion of the Queen Catherine. The British, not being in a condition to enforce their claims, were necessitated to be content with such portion of territory as the Portuguese chose to part with, and to submit to their construction of the terms of the treaty. In 1739, the island was taken from the Portuguese by the Mahrattas. In 1774 it again changed masters, being conquered by the British, who retained possession of it, under the additional clause of the treaty of Poorunder, until 1782, when it was solemnly and finally confirmed to them in perpetuity by the treaty of Salbye.

SALT RANGE.—An extensive group of mountains stretching generally, in lat. 32° 30'—33° 20', in a direction from west to east, from the eastern base of the Suliman Mountains to the river Jhelum, in the Punjab. This range is, in different parts, known to the natives under various denominations, but is by Europeans comprehended under the general term Salt Range, in consequence of the great extent and thickness of the beds of common salt which it in many places contains. Though the southern part of this group terminates rather abruptly at the west bank of the Jhelum, the more northern part is, according to Jameson, connected with the 354
SAALT RANGE.

recent formation constituting the lowest and most southern range of the Himalaya, and runs “on by Bimber, Jummoo, Nurpoor, and down by the south of Belaspoor, crossing the Jumna at Fyzabad, and the Ganges at Hurdwar.” The general direction of the range is from north-west to south-east.

This extensive range, of recent formation, may consequently be considered to contain not only the saliferous deposits of Kala-Bagh and Pind Dadun Khan, but also those of Mundi, in the north-east of the Punjab. The salt-mines have been long known, being mentioned in the Ayeen Akbery. At the time of the visit of Burnes, in 1832, the total quantity of salt raised in a year amounted to 80,000,000 pounds.

The elevation of the Salt Range is not considerable, and probably no summit attains the height of 2,500 feet above the sea. Burnes states that these mountains contain alum, antimony, and sulphur. Jacquemont, Burnes, and Wood obtained numerous specimens of coal from various parts of them.

The Salt Range is remarkably barren: — “Vegetation is scanty, and the bold and bare precipices, some of which rise at once from the plain, present a forbidding aspect of desolation.” About lat. 32° 50', long. 71° 40', the Indus traverses this range, making its way down a deep, narrow, rocky channel, on the sides of which the salt-beds come to light. Those parts of the range which lie on the west side of the river are denominated by Macartney the Salt-hills of Kala-Bagh or Karra-Bagh, from the name of the town where its geological structure is most fully exposed to view. Its appearance there is thus described by Elphinstone: — “As we passed beneath, we perceived windows and balconies at a great height, crowded with women and children. The road beyond was cut out of the solid salt at the foot of cliffs of that mineral, in some places more than 100 feet high above the river. The salt is hard, clear, and almost pure. It would be like crystal, were it not in some parts streaked and tinged with red. In some places salt-springs issue from the foot of the rocks, and leave the ground covered with a crust of the most brilliant whiteness. All the earth, particularly near the town, is almost blood-red, and this, with the strange and beautiful spectacle of the salt-rocks, and the Indus flowing in a deep and clear stream through
SAL.

lofty mountains past this extraordinary town, presented such a scene of wonder as is seldom to be witnessed."

The rocks in this part of the range are—first, magnesian limestone; second, new red sandstone; third, fossiliferous sandstone; fourth, red clay and sandstone, containing coal and mineral sulphur, rock-salt, gypsum, brown and red iron-ore, and alum-slate. The lower beds contain no organic remains, but the upper abound in them. The iron-ore is a red or brown hematite, so rich that in many places the needle of the compass becomes quite useless, even at a considerable distance from the rocks, owing to their being highly magnetic, from the quantity of iron which they contain. The sandstone abounds with the exuvia of enormous animals, either saurians or sauroid fishes. Most of the torrents of the Salt Range carry down gold-dust in their sands, which are washed, in search of the precious deposit, in numerous places, throughout the greater part of the year. The hills at Kala-Bagh contain great quantities of alumina slate, from which alum is obtained at various manufactories in that town. The slate, well sprinkled with water, is laid in alternate strata with wood, until the pile reaches a height of from twenty-five to thirty feet; it is then lighted, and the combustion continued for about twelve hours, in which time the colour of the slate is converted from greyish black to dark red. This change of colour indicating that the process has been carried to a sufficient extent, the mass is thrown into a tank holding as much water as it is computed the alum is competent to saturate. After three days, the water, which becomes of a dark-red colour, is drawn off, mixed with a due proportion of potash, and boiled down, the residuum on cooling becoming a solid mass of alum. Dr. Jameson expatiates with the earnestness of sanguine excitement on the mineral wealth of the Salt Range, concluding in these terms:—"Such is a rapid account of the riches of this district; and there are few, if any, districts in the world where iron, gold, sulphur, salt, gypsum, limestone, saltpetre, and coal are met with in such quantity."

SALUR.—A town in the British district of Vizagapatam, presidency of Madras, 58 miles N. of Vizagapatam. Lat. 18° 32', long. 83° 16'.

SALWEEN.—The largest river in the Tenasserim provinces. Its source has never been visited by Europeans, but it appears
SAM.
to take its rise about lat 27° 10', long. 98° 57', to the north of the Chinese province of Yunnan, where it is known by the name of Lookeang. It takes a southerly course, passing through the provinces of Laos and Siam, enters the British dominions at the confluence of the river Thon-khan, about lat. 18° 40', and, after a long course, unites its waters with those of the Gyne and Attaran rivers, at Martaban, and enters the sea by two mouths, formed by the island of Belu. The northern mouth is in lat. 16° 25', long. 97° 29'.

SAMANA.—A town in Sirhind, in the native state of Patialah, 16 miles S.W. from Patialah, and 34 miles S.W. by W. from Ambala. Lat. 30° 10', long. 76° 20'.

SAMANUGUR.—A town in the British district of Silhet, presidency of Bengal, 31 miles W. by S. of Silhet. Lat. 24° 50', long. 91° 21'.

SAMARSEE, a river of Central India, rises in lat. 21° 50', long. 77° 53', in the territory of Nagpoor, and, flowing north-west for sixty miles, through Nagpoor and the Saugor and Nerudda territories, falls into the Nerudda, in lat. 22° 46', long. 77° 49'.

SAMB, in the British district of Seuni, territory of Saugor and Nerudda, lieutenant-governorship of the North-West Provinces, a town on the route from Jubbulpoo to the Nagpoor territory, 76 miles S. by E. of the former. Lat. 22° 5', long. 80° 16'.

SAMBHAM.—A town in the British district of Vizagapatam, presidency of Madras, 49 miles N.N.E. of Vizagapatam. Lat. 18° 20', long. 83° 40'.

SAMBHUR LAKE, 1 in Rajpootana, partly in the state of Jyepore, partly in that of Joudpore, lies on the western boundary of the former, and on the eastern of the latter. According to Boileau's map 2 of Northern Rajwara, it lies between lat. 26° 52'—27°, long. 74° 40'—75° 18'; is twenty-two miles in length from east to west, six in breadth, and about fifty 3 in circuit; but in times of very great moisture the length is thirty miles, and the breadth ten miles. Those are the dimensions

* Sambar of Tassin; Sambhour of Busawun Lal; 4 called also Sacambhari. 5

637
during the periodical rains of autumn, when the saltness of the water is much diminished; but during the hot and dry season the greater part of the water evaporates, and a great quantity of salt is found crystallized on the bottom of the lake. The salt is exposed to the sun, to be perfectly dried and hardened, and though at first of reddish hue, becomes in the course of the process very clear and of fine flavour. The western part belongs to the state of Joudpore, the eastern to that of Jyepore, and its produce is monopolized by those governments, which dispose of it on the spot, at the rate of a rupee, or two shillings, for a bullock-load of 375 pounds, according to regulation. The revenue derived from the Jyepore division of the lake was placed under British management, to defray the expenses incurred by the military operations in Shekhowatee, but was released from sequestration upon the liquidation of the debt. The town of Sambhur is situate on the south bank of the lake. Lat. 26° 53', long. 75° 13'.

SAMBRANI.—A town in the British district of North Canara, presidency of Madras, 37 miles N. of Soonda. Lat. 15° 14', long. 74° 49'.

SAMBUL.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 12 miles N.W. from Sirinagur. Lat. 34° 11', long. 74° 47'.

SAMBURA, in the Rajpoot state of Jodhpour, a village on the route from Balmeer to the city of Jodhpour, and 58 miles E. of the former. It is situate three miles N. of the right bank of the Loonee, in a low swampy country, liable to be laid under water by the inundation of that river in the rainy season, when the road becomes heavy and difficult. Lat. 25° 55', long. 72° 19'.

SAMER.—A town in the native state of Gwalior, or territory of Scindia, 20 miles N. by W. from Indoor, and 14 miles S. from Oojein. Lat. 22° 57', long. 75° 48'.

SAMIWALA, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from Moradabad to Hurdwar, and 22 miles S.W. of the latter. The road in this part of the route is good, and passes...
over a fertile country, much intersected by streams and water-courses. Lat. 29° 42', long. 78° 18'.

SAMOT, in the Rajpoot state of Jeypore, a considerable town on the route from Delhi to Mow, 143 miles S.W. of former, 36° N.E. of latter. It is situate at the base of a fortified hill, and is surrounded by a rampart. Supplies are abundant, and it is provided with water from wells. Lat. 27° 13', long. 75° 54'.

SAMPLUH, in the British district of Bohtuk, lieutenant-governorship of the North-West Provinces, a village on the route from Delhi to Hansee, and 30 miles N.W. of the former. Supplies and water are abundant. The road in this part of the route is good in dry weather. Lat. 28° 46', long. 76° 49'.

SAMRA, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a town on the route from Agra to Jeypoor, 32 miles W. by S. of the former. Lat. 27° 5', long. 77° 37'.

SAMULCOTTAH, in the British district of Rajahmundry, presidency of Madras, a town, with military cantonment, situate on the right side of a torrent which falls into the Bay of Bengal ten miles to the south-east. The torrent is devoid of water during a great part of the year, but in the wet season is full from bank to bank, though at all times fordable. The cantonment is situate to the north-west of the village, and contains an area of about three-quarters of a mile in diameter. The barracks and sepoys' lines are stated to be judiciously placed, but the hospital is represented as in an objectionable situation, and the officers' houses are said to be badly arranged and badly built.

This place came into the possession of the East-India Company by cession from the Nizam, in 1766.

Elevation above the sea seventy feet; distance from Rajahmundry, E., 25 miles; Hyderabad, E., 245; Bangalore, N.E., 410; Ellore, N.E., 75; Madras, N., 300; Calcutta, S.W., 550. Lat. 17° 4', long. 82° 14'.

SAMUREBA, in the British district of Bareilly, division of Pillibheet, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Petoragurh, and 41 miles N.E. of the former. The road in this part of the
SAN.

route is good; the country open, level, fertile, and cultivated. Lat. 25° 44', long. 79° 52'.

SANAH.—A town in the British district of Mongheer, presidency of Bengal, 40 miles S. by W. of Mongheer. Lat. 24° 48', long. 86° 20'.

SANAUOLI,¹ in the British district of Ghazeepoor, lieutenant-governorship of the North-West Provinces, a village on the right bank of the Ganges, 25 miles² S. of Ghazeepoor cantonment by water, 14 by land, 624 N.W. of Calcutta by water, or, taking the Sunderbund passage, 801. Lat. 25° 25', long. 83° 28'.

SANCHORI, in the Rajpoot state of Jodhpooor, a village on the route from Nusserabad to Deesa, and 132 miles S.W. of the former. It contains eighty-five houses, supplied with water from a tank and twelve wells. The surrounding country is level and bare, and the road in this part of the route firm and good. Lat. 25° 26', long. 73° 25'.

SAN COOS RIVER.—The name given to the Coosy in the upper part of its course.—See Coosy.

SANDAH.—A town in the British district of Patna, presidency of Bengal, 19 miles S.S.W. of Patna. Lat. 25° 19', long. 85° 8'.

SANDAIRA, in the Rajpoot state of Jodhpooor, a town on the route from Nusserabad to Deesa, and 144 miles S.W. of the former. It is abundantly supplied with water from wells. The soil of the surrounding country is gravelly and partially cultivated, the road firm and good. Lat. 25° 17', long. 73° 17'.

SANDI,¹ in the territory of Oude, a small town on the route, by Shahabad, from Shahjeanpore to Lucknow, 85 miles² N.W. of the latter. Tennant,³ who by a whimsical English corruption calls it Sandy Point, complains of "the bleak, desolate, and dreary aspect of the country; where you are constantly sinking at every step in loose sand, and blinded by showers of dust;" yet he admits, that where irrigation can be practised, good crops of grain could be produced. This tract must have much improved since that description was written (1799), as Heber,⁴ who traversed it in 1824, says: "The country through which we passed to-day was extremely pretty, undulating, with scattered groves of tall trees, and some extensive lakes, which still showed a good deal of water. The
SAN.

greater part of the space between the wood was in green wheat, but there were round the margins of the lake some tracts of brushwood, and beautiful silky jungle-grass, eight or ten feet high." Tennant, however, travelled through the country in the dry season, Heber a short time after the close of the rains. This last traveller describes the place itself at present, as "a poor little village," and its neighbourhood infested by a race of very bad character. In the driest season of the year the water of the lake totally evaporates, and its bed then becomes a luxuriant pasture; water is, however, at all times plentiful, and there is a bazar.\(^5\) Lat. 27° 18', long. 80° 1'.

SANDOWAY.—A town in the British province of Arracan, presidency of Bengal, situate on the southern bank of a tide nullah, bearing the same name as the town, and distant ten miles from the sea. The town is comprised within a circular area, open on the east and west, where are the desiles through which the river flows. It contains about 500 houses, and was occupied by the British in 1825. The district of which this town is the chief place, forms one of the three divisions of Arracan; 176 miles S.S.E. of Arracan. Lat. of town 18° 25', long. 94° 30'.

SANDWA.—A town in the Rajpoot state of Beekaneer, 58 miles E. by S. from Beekaneer, and 93 miles N.N.W. from Ajmeer. Lat. 27° 45', long. 74° 17'.

SANDY ISLAND.—A small island off the coast of Arracan, 80 miles N. of Cape Negrais. Lat. 17° 11', long. 94° 31'.

SANEE, a river of Gurlwal, rises in lat. 30° 6', long. 79° 12', and flowing southerly for thirty miles, and north-west for thirty-two, falls into the Bhageerette river, in lat. 30° 4', long. 78° 39'.

SANGAMOOLASA.—A town in the British district of Vizagapatam, presidency of Madras, 77 miles N. of Vizagapatam. Lat. 18° 48', long. 83° 27'.

SANGANEER,\(^1\) in the territory of Oodeypore, a town on the route from Neemuch to Nusseerabad, 74\(^2\) miles N. of former, 69 S. of latter. It is of considerable size, and is surrounded by a wall, and from the account of Garden,\(^3\) its present state appears superior to that in which Tieffenthaler\(^4\) describes it to have been eighty years ago, when all there was wretchedness and ruin. Lat. 25° 22', long. 74° 44'.

\(^1\) E.I.C. Ms. Doc.  
\(^2\) Garden, Tables of Routes, 288.  
\(^3\) Beschreibung von Hindustan, l. 226.  
\(^4\) Garden, ut supra.
SAN.

SANGANEER.—A town in the Rajpoort state of Jeypoor, nine miles S. by W. from Jeypoor, and 78 miles E.N.E. from Ajmeer. Lat. 26° 49', long. 75° 53'.

SANGAWARA,¹ in the raj or state of Banswar, in Rajpoottana, a town on the route from Mow to Deesa, 136 miles N.W. of former, 165² S.E. of latter. It is the only place of any consequence³ in the raj of Banswar, except the town of that name. Lat. 23° 37', long. 74° 05'.

SANGHEE.—A village in the British district of Rohtuk, lieutenant-governorship of the North-West Provinces. Lat. 29° 02', long. 76° 41'.

SANGIM.—A town in the Portuguese district of Goa, territory of Bombay, 24 miles S.E. of Goa. Lat. 15° 13', long. 74° 13'.

SANGLEE.—One of the southern Mahratta jaghires, territory of Bombay. It consists of several detached portions, but the centre of the principal tract is in lat. 17° 28', long. 75° 30'. Sanglee yields an annual revenue of about 46,800l.¹ In 1846,² a sword was presented to Chintamun Row, chief of this territory, by the East-India Company, in testimony of their respect for his high character, and in acknowledgment of his unsparing fidelity and attachment to the British government during the Kolapore rebellion. Chintamun died a few years after, and arrangements have been made for the administration of the estate during the minority of the present chief.⁵

SANGOD,¹ in the Rajpoort territory of Kotah, a town on the route from Nusseerabad to Saugor, 153² miles S.E. of former, 197 N.W. of latter. It is a considerable place, with a bazar, and water and supplies are abundant. Distant from the city of Kota, S.E., 33 miles. Lat. 24° 55', long. 76° 20'.

SANGOLA.—A town in the British province of Sattara, presidency of Bombay, 81 miles E. by S. of Sattara. Lat. 17° 26', long. 75° 16'.

SANGOLEE.—A town in the British district of Belgaum, presidency of Bombay, 24 miles E.S.E. of Belgaum. Lat. 15° 44', long. 74° 54'.

SANGROOL.—A town in the native state of Kolapoor, territory of Bombay, 10 miles W.S.W. from Kolapoor, and 63 miles N.N.W. from Belgaum. Lat. 16° 40', long. 74° 10'.

SANGWA, in the Rajpoort state of Jodhpoor, a village on
the route from Nusserabat to Deesa, and 128 miles S.W. of the former. Lat. 25° 32', long. 78° 27'.

SANICHABA,¹ in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a small town situate four miles from the left bank of the Ghaghra, and as many from the right of the Koyane. It has a market,² but according to the report of Buchanan, made about forty years ago, “contains only sixty or seventy³ houses, buried in thicket;” so that, allowing six persons to each house, the population cannot much exceed 400. Distant S.W. from Goruckpoor 25 miles. Lat. 26° 30', long. 88°.

SANK,¹ in the territory of Gwalior, a small river rising about lat. 26° 3', long. 77° 57'. It runs in a north-easterly direction, and falls into the Asun river on the right side, in lat. 26° 30', long. 78° 16', after a course of about forty-five miles, the whole of which is through the Gwalior territory. It is crossed thirty miles from its source, and in lat. 26° 28', long. 78° 9', by the route from Agra to Gwalior, and has² there “water shallow, bed stony and rough, right bank rather steep.” At Nurabad, ten miles below, or north-east of the ford, it is crossed³ by a bridge of seven arches, very well built of masonry.

SANKERRY DROOG.—A town in the British district of Salem, presidency of Madras, 26 miles S.W. by W. of Salem. Lat. 11° 28', long. 77° 55'.

SANKHA,¹ in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Allahabad to Calpee, and 18² miles E. of the latter. Lat. 26° 10', long. 80° 3'.

SANSAR DHARA,¹ in the Debra Dhoon, a remarkable spot, the romantic characteristics of which are thus described by an eye-witness:—“In the commencement of this day’s march, we enjoyed a sight of uncommon beauty, which was rendered more striking by being concealed by a jutting point of rock till we approached very near, and ascended a little bank, when it burst suddenly on our view. It was a fall of water from an excavated bank, with a cave or grotto at each extremity, forming together an arch of about 100 feet in perpendicular height, with a subtended base of eighty or 100 yards. Through every part of the impending summit, the
water oozed in drops, which fell in showers into a basin, whence it was carried by a small stream into the river below. The lofty trees and luxuriant shrubs which overhung the brow threw a partial shade over the picture, while the sun striking full upon the cascade, was reflected in the sparkling globules, giving a richness and brilliancy to the scene which words are incompetent to express. Upon an inspection of the grotto on the right, we were struck with new and more singular appearances. It is a cavern, about six feet in height, ten in depth, and fourteen or sixteen in length, and is a natural excavation, the walls and roof of which are of rock. The water filters through the top, from which pendent shoots like icicles are disposed in all the different stages of petrifaction. The small ramifications form variegated beds of moss, serving as conductors for the water when it first begins to crystallize; and from a tube or pipe, they become, by repeated incrustations, a firm consolidated mass. The various colours produced by the vegetation, changing with the different shades of light, give to the outer surface the appearance of mother-of-pearl; but when the petrifaction is complete, the inside has a great resemblance to alabaster.” The water is very cold and clear, and probably contains much lime that is precipitated upon the various substances on which the shower falls. Sansar Dhara is by the superstitious Hindoos considered sacred to Mahadeva, and, in consequence, visited by them in pilgrimage. It is within a dozen miles of the sanitary station of Mussourcee and Landour. Lat. 30° 21', long. 75° 6'.

SANIPORE.1—A town in the British district of Nuddea, presidency of Bengal, 56 miles N. of Calcutta. The town has long been famous for its learning.2 Lat. 23° 14', long. 88° 26'.

SANTOO.—A town in the Rajpoot state of Jodhpoor, situate on the right bank of a branch of the Sookree river, and 84 miles S.S.W. from Jodhpoor. Lat. 25° 13', long. 72° 38'.

SAONKEIRA.—A town in the native state of Guzerat, or dominions of the Guicowar, 21 miles E.S.E. from Baroda, and 84 miles N.E. by N. from Surat. Lat. 22° 10', long. 73° 31'.

SAPE.—A town in the native state of Bhotan, 116 miles N. from Goalpara, and 141 miles E.N.E. from Darjeeling. Lat. 27° 48', long. 90° 26'.

874
SARAHUN, or SERAN, the summer residence of the rajah of Bussahir, is situate three miles from the left bank of the Sutluj. Its site is fine, being in a beautifully wooded recess or amphitheatre, formed by the hills advancing round it in a semicircle behind, while in front they slope down to the Sutluj, beyond which the mountains of Kulu rise, barren, steep, and with snow-clad summits. The summits of the mountains round the town to the east and south are covered with snow until June, when the rainy season sets in, under the influence of which it melts away. The buildings of this town may be considered handsome, according to the humble standard of taste in this region. They are all in the Chinese style, with pent-roofs, balconies, and some beautifully-carved woodwork. The most remarkable building is a temple dedicated to the Hindoo goddess Kali, to whom, previously to the establishment of British supremacy, human sacrifices were here offered. The residence of the rajah is extensive, consisting of several houses. Sarahun is the limit of Brahminism towards the north, as none of that caste are established beyond it. Elevation above the sea 7,246 feet. Lat. 31° 30', long. 77° 50'.

SARANGPOOR, in the district of Aldemau, a town on the river Tons (North-eastern), 110 miles S.E. of Lucknow. Its population is estimated by Butter at 9,000. Lat. 26° 24', long. 82° 33'.

SARAOON, in the British district of Bhuetteana, lieutenant-governorship of the North-West Provinces, a town on the route from Sirsuh to the Punjab, 62 miles N.W. of the former. Lat. 30° 12', long. 74° 25'.

SARAWAH.—A town in the British territory of Pegu, situate on the left bank of the Irawady river, and 64 miles W. from Pegu. Lat. 17° 44', long. 95° 19'.

SARAYAT, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a village 50 miles N.W. of Goruckpore cantonment. It stands on a heap of the rubbish of buildings attributed by tradition to the Tharus, an energetic race, formerly occupying this district. Lat. 27° 20', long. 82° 53'.

SARDAH, or GHOGRA RIVER.—See GHOGRA.

SARENDI, in the district of Banswara, territory of Oude.
a town near the right bank of the river Saee, 50 miles S.E. of Lucknow. Butter estimates the population at 6,000, including 100 Mussulmans. Lat. 26° 16', long. 81° 5'.

SARGAUM.—A town in the British district of Tannah, presidency of Bombay, 53 miles N. of Bombay. Lat. 19° 43', long. 72° 52'.

SARH, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a town in the subdivision of Sulimpur, hence sometimes called Sarh Sulimpur. Lat. 26° 14', long. 80° 24'.

SARHAT, in the British district of Beerbhoom, presidency of Bengal, a town on the route from Pachete to Monghyr, 45 miles N. of former, 80 S. of latter. Lat. 24° 16', long. 86° 52'.

SARHENDI, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a town on the route from Agra to Kerowly, 29 miles S.W. by W. of the former. Lat. 26° 56', long. 77° 46'.

SARHULL.—A town in the Rajpoot state of Jhalawar, 27 miles E. by S. from Jhalra Patun, and 143 miles W.N.W. from Saugur. Lat. 24° 28', long. 76° 40'.

SARSA, a small river, rises in the valley south of Subatoo, and in lat. 30° 54', long. 77° 3'. It holds a north-westerly course through the Pinjor Doon, and, receiving several small feeders from the mountains of Hindoor, falls into the Sutlej near Kanoli, in lat. 31° 2', long. 76° 38', after a course of about thirty miles.

SARSAP, in the Rajpoot state of Jeypore, a hill fort on the route from Agra to Neemuch, 145 miles S.W. of former. Lat. 26° 10', long. 76° 10'.

SARSEEBEE.—A town in the British district of Belgaum, presidency of Bombay, 22 miles E. by N. of Belgaum. Lat. 15° 55', long. 74° 54'.

SARUN.—A British district under the presidency of Bengal, and named from the town of Sarun, its principal place. It is bounded on the north and north-west by the territory of Nepaul; on the east by the British district Tirhoot; on the south-west by the Ganges, dividing it from the British districts Patna and Shahabad, and the Ghaighra, dividing it from the British district Ghazeeapore; and on the west by Goruckpoor.
SARUN.

It lies between lat. 25° 40'—27° 29', long. 83° 55'—86° 30'; is 115 miles in length from north to south, and ninety in breadth. The area is 6,894 square miles.* It is throughout a very level tract, having no mountains, and scarcely any hills, or even undulations, but with a general inclination towards the south-east, as indicated by the flow of the rivers in that direction. The rivers and watercourses are very numerous, few tracts being better supplied in this respect. The Ganges, flowing south-east, forms the south-western boundary from the confluence of the Ghaghra to the confluence of the Gunduk. The other principal rivers by which the district is either traversed or bounded, are the Ghagra, Gunduk, and Bagmuttee.

The general elevation of the surface of the district is very moderate: that of the confluence of the Ganges and Gunduk, at the south-east angle, is about 200 feet above the sea; that of the north-east angle, and probably the most elevated part of the general surface of the country, is about 500 feet. The climate in the north-eastern division is unhealthy, in consequence of excessive moisture: in the south-eastern division of the district, the climate is better; and at the station of Chapra, on the left bank of the Ganges, is considered healthy, even for Europeans.

The principal products² are wheat, barley, rice, gram (Cicer arietinum), millet, maize, peas, and some other pulse, oil-seeds, hemp, opium, indigo, tobacco, cotton. The district in general affords an ample and fruitful field for the cultivation of sugar-cane.³ The esculent vegetables of Europe in general thrive well during the cold season. The forests contain some fine timber-trees, of which the best is the sal (Shorea robusta); the Mimosa catechu is very abundant, and yields, in large quantities, the gum-catechu, or terra Japonica of trade. Manufactures are few, and of small note. The commerce of the district consists principally in the export of raw produce, of which the chief articles are timber, grain, sugar, tobacco, opium, indigo, and cotton. The most important import is culinary salt; the remainder is composed of silks, broad-cloths,

³ Report of Select Committee of House of Commons on East-India Produce, 57.
and a few other articles, regarded as luxuries amongst the natives, in general simple in their habits.

The principal towns—Sarun or Chupra, Bettiah, Revelgunj, Aliganj—are noticed under their respective names in the alphabetical arrangement.

The population is stated at 1,700,000, and it is said, with the exception of three Christian villages, and a few European settlers, consist exclusively of Hindoos and Musulmans, in the proportion of six of the former to one of the latter. This district formed part of the kingdom of Magadha, the monarch of which is represented to have been paramount ruler of India long previously to the Christian era. On the overthrow, in 1193, of the kingdom of Kunnouj, by Shahab-uddin Muhammad, king of Ghor, the victor, following up his success, subdued the kingdom of Behar, of which Sarun formed part. Subsequently, in the early part of the sixteenth century, it was subdued by Baber, and in 1765 it was included in the grant of the Dewanny made to the East-India Company by Shah Alum, the padshah of Delhi.

SARUNGHUR. A town in the native state of Sarunghur, on the south-west frontier of Bengal, 68 miles W. from Sumbulpoor, and 84 miles S.S.W. from Odeipoor. The native state of which this town is the chief place, contains an area of 799 square miles, and a population of 35,955. Lat. 21° 30', long. 82° 59'.

SARUNGKOT, in the Sinde Sagur Doob division of the Punjab, a town situated on the left bank of the Swan river, 73 miles S.S.E. of the town of Peshawar. Lat. 33° 5', long. 72° 13'.

SARUNGPOOR, in Malwa, in the territory of Dewas, a town on the route from Goona to Mow, 97 miles S.W. of former, 88 N.E. of latter. It is situate on the right or east bank of the Kallee Sindh river, here crossed by ford; "bed 400 yards wide; bottom of rock in ledges and sand; water shallow during the dry season." Distant N.E. from Oogein 55 miles. Lat. 23° 31', long. 76° 30'.

SARWAPALLI.—A town in the British district of Nellore, presidency of Madras, 12 miles S. by W. of Nellore. Lat. 14° 17', long. 80° 1'.

SARWUR.—A town in the British province of Sattara,
presidency of Bombay, 10 miles S.W. of Bejapoor. Lat. 16° 43', long. 75° 41'.

SASA, a river of the Mutuuck country, in Upper Assam, rises in lat. 27° 26', long. 95° 16', and flowing westerly for forty-five miles, falls into the Booree Dehing river in lat. 27° 15', long. 94° 43'.

SASOOKHA.—A town in the native state of Bhotan, 110 miles N. from Goalpara, and 141 miles N.W. from Durrung. Lat. 27° 44', long. 90° 40'.

SASOORAHULLY.—A town in the native state of Mysore, situate on the right bank of the Toonga river, and 138 miles N.W. by N. from Seringapatam. Lat. 14° 9', long. 75° 45'.

SASPANEE, in the British territory of Saugur and Nurbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Jubbulpore to Nagpore, 39 miles S.S.W. of the former. Lat. 22° 39', long. 79° 49'.

SASRAN.—A town in the native state of Gwalior, or territory of Scindia, 42 miles S.W. by W. from Gwalior, and 70 miles W.N.W. from Jhansie. Lat. 25° 55', long. 77° 40'.

SASSERAM,¹ in the British district of Shahabad, presidency of Bengal, a town on the route from Hazareebagh to Benares, 117 miles² N.W. of former, 72 S.E. of latter. It has a bazar, and is of considerable size; but the greater part of its extent is occupied by ruinous mosques and tombs of Mussulmans. The town has a few rude manufactures in hardware and jewellery, and there are many weavers, principally Mussulmans. There is an endowed school, supported by lands formerly granted for the purpose. The population is estimated by Jacquemont³ at 10,000; but according to Buehanan,⁴ the number of houses is 3,600; and assuming the usually-received average of inmates, the number of inhabitants would appear to be 18,000. Lat. 24° 57', long. 84° 4'.

SASSOOR.—A town in the British district of Poonah, presidency of Bombay, 16 miles S.E. of Poonah. Lat. 18° 20', long. 74° 3'.

SASUNEE,¹ in the British district of Allygurk, lieutenant-governorship of the North-West Provinces, a town on the route from Agra to the cantonment of Allygurk, and 14 miles² S. of the latter. It has a large bazar, and water and supplies are abundant. The road in this part of the route is good, the
country well cultivated. In 1803, the conduct of a refractory zemindar rendered necessary the employment of force for the reduction of the fortress, which was consequently attacked by the British, under General Lake, and captured, though not without severe loss on the part of the victors. Sasunee contains a population of 5,524. Lat. 27° 42', long. 78° 9'.

SATA, or SETTA, in Sinde, the greatest eastern branch of the Indus, or rather the continuation of the main stream, which formerly sent off to the west a large arm called the Buggaur. This last, however, is now almost completely closed during the season when the river is low, becoming then little else than a succession of dundes, or fresh-water pools. The Sata below the divarication is generally about 1,000 yards wide. It sends off, on the left or eastern side, two branches,—the Mull and Moutnee, once great streams, but now, during the dry season, shallow rivulets. At the time that Carless wrote, in 1837, the Hujamree and Kedywaree mouths, which gave exit to two other branches sent off by the Sata on the right side, were navigable; but in 1839 the Hujamree's mouth was closed by a great alteration in the course of the stream. Having thrown off these branches on the right and left side, the Sata, still the main stream of the Indus, and known in the lower part of its course by the names Munnejah and Wanyanee, falls into the Indian Ocean by the Kookewaree mouth, in lat. 24° 2', long. 67° 32'.

SATAHUNG.—A town in the native state of Nepal, 102 miles W.N.W. from Khatmandoo, and 102 miles N. by E. from Goruckpoor. Lat. 28° 7', long. 88° 44'.

SATAK.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 160 miles E.S.E. from Sirinagur, and 100 miles N.E. from Kangra. Lat. 33° 8', long. 77° 30'.

SATHEEKA.—A town in the Rajpoot state of Jodphoor, 53 miles N. by E. from Jodhpoor, and 97 miles W.N.W. from Ajmeer. Lat. 27° 2', long. 73° 18'.

SATHWALY.—A town in the native state of Hyderabad, situate on the right bank of the Manjera river, and 64 miles N.W. by N. from Hyderabad. Lat. 18° 9', long. 78° 3'.

SATIGHAT.—A town in the native state of Nepal, situate on the right bank of the Marachandgi river, and 70 miles W. from Khatmandoo. Lat. 27° 46', long. 84° 10'.
SATKOOONEA.—A town in the British district of Chittagong, presidency of Bengal, 27 miles S.E. of Chittagong. Lat. 22° 1', long. 92° 9'.

SATPOORA, in territory of Indore, or possessions of Holkar’s family, a small town on a tributary of the Nerbudda, 75 miles S.E. of Indore. It gives name to a range of mountains, which, running east and west, divides the valley of the Taptee from that of the Nerbudda. This range may be considered as extending between lat. 21°—22°, from long. 78° 40′ to long. 78°, where it becomes confounded with the Vindhya range. The south declivity towards the Taptee is abrupt, the north towards the Nerbudda very gentle. Its elevation does not appear to have been accurately determined. Aseergurh, one of its summits, is probably about 1,200 feet above the sea. Fraser, an eye-witness, estimates the elevation of the highest points at about 2,500 feet above the sea. “The Satpoora differ extremely in appearance from the Vindhya mountains, being bold and romantic in the outlines, rising into lofty peaks, and swelling into shapes that would induce the beholder from a distance to consider them as primitive.” They, however, consist of amygdaloid and greenstone, and on the summits, of overlying trap, and are altogether of volcanic formation. Satpoora is in lat. 21° 48′, long. 76° 27′.

SATTARA, so denominated from the fort of that name, is a British province within the presidency of Bombay. It is bounded on the north by the British collectorate of Poona; on the north-east and east by that of Sholapore; on the south by the collectorate of Belgaum, the southern Mahratta jaghires, and the state of Colapore; and on the west by the collectarates of Rutnagherry and Tannah. It lies between lat. 16° 22′—18° 32′, long. 73° 24′—76° 25′; is 215 miles in length from south-east to north-west, and ninety in breadth: the area is about 10,222 square miles. The culminating range of the Siadri Mountains, or Western Ghauts, extend along its west frontier for about ninety miles, separating it from the Concan. Those mountains, which rise so precipitously on the west side, or towards the Concan, have a more gradual declivity on the Deccan side, or towards the east; and in that direction, though the surface is generally very rugged, and diversified by many considerable ranges and isolated mountains, it sinks gradually

\[\text{(381)}\]
SATTARA.

to the plains of Hyderabad, or territory of the Nizam. All the streams hold a south-easterly direction, and ultimately joining the Kistna, which rises in this territory, are conveyed by the channel of that great river to the Bay of Bengal. Of the remaining rivers, the chief is the Neera. In addition to the Kistna and the Neera, are the Mar, the Yena, the Nandhur, the Yerla, the Wurna, and the Quina, over which last-mentioned river a bridge is about to be constructed.  

The climate of the higher parts in the west of this territory is characterized by extreme moisture, the annual fall of rain exceeding that registered in many other places, and having been known to amount to nearly 300" inches in the year. On the eastern declivity of the Ghats in the Deccan, and in the lower parts still farther east, "the rains are light, uncertain, and in all years barely sufficient for the wants of the husbandman; and a slight failure occasions much distress." The mean annual fall of rain in the less-elevated parts is stated not to exceed twenty-three and a half inches. In the upper parts of the Ghats, the heat is much moderated by the elevation; the mean annual temperature being 66°. April is found to be the hottest month, the mean temperature being 74°; the extreme maximum also occurred in the same month, reaching, in 1836, 90°. In the Deccan, at an elevation of 1,700 or 1,800 feet, the maximum temperature of the whole year is stated to be 94°, the minimum 37°. In the upper part of the Ghats, the monsoons during autumn are violent in the extreme; in the less-elevated parts eastward of the Ghats, they are in general scarcely felt, though the extreme east is sometimes slightly visited by the monsoon from the north-east, or that from the Coromandel coast. The climate is considered very salubrious.

With respect to the zoology of this part of the Deccan, there have been no attempts at scientific statements in which any just confidence can be placed.

The great majority of the population is Mahratta; and this part of India appears from time immemorial* to have been the head-quarters of that race, which held the widely-extended region of Maharashtra. The first intimation deserving notice

* Wilson, indeed, as quoted in Elphinstone, says, "All the traditions and records of the peninsula recognise in every part of it a period when the natives were not Hindoos."
respecting this race, occurs as early as the year 77, when a
ruler named Salivahana extended his sway over a wide tract.
His empire was probably in the Deccan, where his name is
still known, and his era still that in ordinary use. Towards
the close of the thirteenth century, the Mahratta country was
invaded by the Mussulmans from Delhi. Neither from the
records which the Mussulman writers have left us, nor from
the knowledge subsequently acquired of the position and cir-
cumstances of the Mahrattas, is there any reason to conclude
that they had then at any time been united under one great
monarchy, or that they had ever been distinguished in literature
or civilization. The cave-temples are the sole monuments of
their earlier existence; and until the rise of Sevajee, they make
no figure in history. Of the present population, the Brahminist
Mahrattas form the most influential portion, except as far as
they are coerced by the British authorities. They are described
as "an intriguing, lying, licentious, corrupt, and unprincipled
race of people;" and it is added, that, "when in power, they are
coolly unfeeling and systematically oppressive, and now generally
discontented, and only restrained by fear from being treasonable
and treacherous." "They are superstitious, and narrow in their
attachment to their caste to a degree that has no example
elsewhere; but they are mild, patient, intelligent on many
subjects, even liberal and enlightened, and though regardless of
sufferings which they indirectly produce, they are naturally
very averse to cruelty and bloodshed; there are among them
many instances of decent and respectable lives, although they
are generally supple and insincere. The Mahratta chiefs while
in power, and especially while with armies, are generally
course, ignorant, rapacious, and oppressive. Those settled in
their own country, and unconnected with courts and armies,
bear a much better character, being sober, industrious, and
encouragers of agriculture. It must indeed be remembered,
both of this class and of the Brahmans, that we see the very
worst of the whole, and that it is among those at a distance
from the seat of government that we are to look for any virtue
that may exist in the nation. The Mahratta soldier love war,
as affording opportunities for rapine in an enemy's country,
and marauding in a friend's. In battle, they seem to have
been always the same dastardly race; but they are active,
SATTARA.

hardy, vigilant, patient of fatigue and privations, and though timid in action, they show great boldness and enterprise in their incursions into distant countries; and on all occasions they appear to have the greatest confidence in their horses, though little or none in their swords. Their plan in a campaign is to avoid general engagements, to ravage their enemy’s countries, and to cut up convoys and detachments; in an action, it is to disperse when attacked, and to return to the charge when the enemy has broken, to plunder. By these means they are enabled to prevail against better troops than themselves.” Their martial prowess has, however, been effectually prostrated by the decisive success of the British arms against them. “Taking the whole as a nation,” it is said, “they will be found inferior to their Mahomedan neighbours in knowledge and civilization, in spirit, in generosity, and, perhaps, in courage; but less tainted with pride, insolence, tyranny, effeminacy, and debauchery; less violent, less bigoted, and (except while in armies on foreign service) more peaceable, mild, and humane.” Their claim, however, to the last-mentioned quality appears very questionable. In the hills adjoining the Ghats southward of Sattara, there are a considerable number of Ramooses, a predatory tribe, in physical aspect resembling the Bheels, but more subdued and civilized. They have no language of their own, and in dress and manners are more like the Mahrattas. The total population of Sattara has been returned at 1,005,771, which affords ninety to the square mile. Such assumed density may be regarded as ample for a mountainous tract, in general barren, and subject to frequently-recurring droughts. The principal towns—Sattara the capital, Punderpoor, and Beejapoor—are noticed under their respective names.

At the time of the settlement of the country, after the overthrow of the Peishwa and the elevation of the rajah, in 1819, the revenue of the raj was “estimated at 13,75,000 rupees of direct revenue, and about 3,00,000 rupees enjoyed by jagheerdars, besides 3,00,000 of alienations.” The British military force in the country (July, 1848) consisted of a small detachment of troops, amounting to thirty-six men, taken from the Poona division of Bombay army, and under the command of a European officer.
SATTARA.

During the administration of the country by the late rajah, a good carriage-road had been made from Sattara to Mahabulishwar, a distance of thirty³ miles, which was continued for twenty-seven miles to Mahar; on the navigable river Savitree. There was also a good road continued from the Neera bridge to Sattara, thus completing the communication between that city and Poona. Since the lapse of the territory to the British, many excellent roads have been added. Among them may be noticed one connecting Beejapore with Sattara; another from the town of Kurar, over the Koombarlee Ghaut, to the Concan; a third over the Pusurnee Ghaut, between the town of Waee and Malcolm Peth, on the Mahabulishwar Hills.⁴

Sevajee, who founded the state of Sattara and the Maharatta confederation, was the second son of Shahjee, a Mahratta leader⁵ of some note, under the Nizam Shah dynasty of Admednuggur, and subsequently under that of Beejapore. Sevajee began his predatory career⁶ about 1644, and in 1646 acquired his first stronghold, the hill-fort of Torna, by the treachery of the governor holding it on the part of the king of Beejapore, against whom he, in 1648, openly revolted. From that time his course of successful aggression against both Aurungzebe, then king of Delhi, and the king of Beejapore was rapid. In 1659 he, in person, assassinated the general of the army of Beejapore, and attacked the forces, which, thus surprised and deprived of a leader, were for the most part slain, the Maharrats among the survivors entering the service of their conqueror. In 1662 he had acquired a tract of country 250 miles in length northwards from Goa, and at its widest part 100 miles in breadth; and “in this⁷ small territory the hardiness and predatory habits of his soldiers enabled him to maintain an army of 7,000 horse and 50,000 foot.” In 1664 he extended his predatory expeditions so far that he plundered⁸ the rich city of Surat, and with his spoil returned unmolested to his fastnesses. In 1665 he collected a fleet, and commenced a course of piratical depredations against the Mussulmans, who were especially enraged by the capture⁹ of the ships which, according to annual usage, were conveying pilgrims from India to the Red Sea. In the same year, however, Sevajee accepted service in the army of Aurungzebe, by whom he was soon after placed in confinement. From this durance he escaped, and returned to his
fastness at Raeegurh, after an absence of nearly a year. He there became so formidable, that Aurungzebe admitted him to terms, or rather concluded with him a treaty, by which he was acknowledged as jaghirdar or subordinate proprietor of a territory much larger than that which he had formerly held. An attempt, made by order of Aurungzebe, to seize Sevajee, caused him to recommence hostilities, in which he was eminently successful, ravaging to a great extent the territories of the sovereign of Delhi, exacting\(^1\) the chouth or black-mail of a fourth of the revenues from such districts as were spared, and in a field action defeating an army of 20,000 men. In rivalry of the king of Delhi, he was, in 1675, crowned at Raeegurh, with great splendour, adopting, in all their extent, the ceremonies\(^2\) used by that gorgeous court on such occasions. He soon after marched towards the Coromandel coast, and, passing by Madras, took the strong fort of Jinji, one of the possessions of Beejapoor; but in the midst of his triumphs and greatness he was cut off by illness,\(^3\) in 1680, in the fifty-third year of his age. His son Sambajee succeeded to his possessions, but being devoid of talent, energy, and perseverance, and becoming incompetent from drunkenness and debauchery, was, in 1688, made prisoner\(^4\) by the Moguls, and in the following year cruelly put to death, by order of Aurungzebe. Notwithstanding, however, all the talents, resources, and perseverance of the emperor, the Mussulman cause rapidly waned, and that of the Mahrratas prospered: they "seemed\(^5\) to multiply as the Mogul armies decayed. After reducing the Deccan to a desert, they had spread over Malwa, and made a powerful inroad into Guzerat, leaving their traces everywhere, in pillaged towns, ravaged fields, and smoking villages." Aurungzebe, after many campaigns, in which he vainly attempted to retrieve his sinking affairs, died in 1707, at Ahmednugur, whither he had with difficulty led the shattered relics of his ruined host. The rapid decay of the kingdom of Delhi accelerated the progress of the Mahratta power: the officers of the king "left in charge\(^6\) of the Deccan, first faintly opposed and then conciliated the Mahrattas; a truce was concluded about 1710, by which they yielded the chouth; and this, or the confirmation of the agreement, together with a formal grant of their territorial possessions by the emperor (Padshah) in 1719, may be considered as
SATTARA.

the final establishment of the Mahratta government, after a struggle of at least sixty years." The office of Peishwa, "leader" or "prime minister" of the Mahratta empire, had always been a place of importance, and Balajee Rao, who attained that dignity,7 succeeded in 1749 in engrossing8 the whole powers of the state. Thenceforward the descendants of Sevajee were mere pensioned captives. From that humiliating state Pertaub Singh, the titular rajah, was released in 1818, when the army of the Peishwa, in its rapid flight, was surprised and routed by a British force at Ashti. On that occasion9 the rajah, with his mother and brothers, were rescued and set at liberty, after the family had been nearly seventy years in durance. To the rajah was assigned the territory of Sattara, producing1 an annual revenue of 137,500L., besides jaghires or feudal grants, and other alienations from the rent-roll, making in the aggregate about 200,000L. for the gross annual income of the raj. The sovereignty of the territory thus assigned was to be held2 by the rajah, "in subordinate co-operation with the British government," which engaged to defend the rajah's territories, and give him protection from all injury and aggression. The Mahratta prince having been always retained in a state of pupilage, it was apprehended that to invest him at once with the full measure of power which he was ultimately to enjoy, might be mischievous; the following stipulation therefore formed part of the treaty:—"The rajah shall ultimately have the entire management of the country now ceded to him; but as it is necessary, on account of the recent conquests of the country, that it should at first be governed with particular care and prudence, the administration for the present will remain in the hands of the British political agent. That officer will, however, conduct the government in the rajah's name, and in consultation with his highness; and in proportion as his highness and his officers shall acquire experience, and evince their ability to govern the country, the British government will gradually transfer the whole administration into their hands. He will, however, at all times attend, as above agreed, to the advice which the British political agent shall offer him for the good of his state, and for the maintenance of general tranquility." The management of the raj remained with the British political agent until April, 1822; and an official report of that

date records\(^{3}\) "the general prosperity and good order that prevailed throughout the rajah's districts, and the satisfaction which was shown by all classes of the people towards his highness's government and the existing system of management."

At this prosperous time the government was transferred to the rajah, then twenty-four years of age, and the British functionary, hitherto denominated political agent, was thenceforth styled Resident. Coolness, however, subsequently arose between the rajah and the government of Bombay, which soon increased to alienation. The rajah made demands which the government thought unwarranted by the treaty; and being led into proceedings inconsistent with the position which he occupied, he was, in 1839, deposed, and his brother elevated to his place. The deposed rajah was sent to Benares, where he died in the month of October, 1847. A treaty was concluded with the new rajah, under which a competent revenue was secured to Pertaub Singh, and certain modifications of the terms of the original treaty were effected in regard to certain jaghiredars of the Sattara raj, who, to obviate dispute, were formally declared under the direct control of the British government, though their contingents and pecuniary payments were reserved to the rajah, as previously fixed. Under this arrangement, capital sentences passed by those jaghirdars are made subject to confirmation by the British government.

Under the rule of the new rajah, the condition of the country was highly satisfactory. The British authorities, ever anxious for improvement, found in the prince a willing coadjutor. Not only were substantial reforms introduced, but matters little heeded for the most part by native rulers received some measure of attention. Steps were taken to repair and preserve the fine relics of Mahometan architecture at Bejapoor, while the great interests of humanity were advanced by the encouragement of vaccination, the abolition of suttee, and the suppression of trade in slaves.

The second rajah under the protection of the East-India Company died in 1848, without issue, but adopted, a few hours previously to his death, a boy distantly related to his family. It was obvious, however, that by the general law and custom of India, a dependent principality could not pass to an adopted heir without the consent of the paramount power; yet, plain
SATARA.

as this was, the decision of the British government was not
given without deliberation. That government was under no
pledge, direct or constructive, to give such consent, and it was
deemed expedient, in reference to the general interests com-
mited to its charge, to withhold it. The territory accordingly
lapsed, by the extinction of the race of Sevajee, to the power
which bestowed it, and was formally annexed to the British
dominions. The revenue derived from all sources in 1850
amounted to 271,304l.

SATARA.—The principal place of the British province of
the same name, in the presidency of Bombay. It is situate
amidst the highlands of the Deccan, east of the culminating
range of the Ghats, and where the country, though very rugged,
inclines generally to the eastward. The site of the fort is the
summit of a mountain having an area extending about 1,100
yards in its greatest length, and 500 in breadth. The moun-
tain is of no great height, but very steep. “Its defences
consist of a scarp, upwards of forty feet in perpendicular black
rock, on the top of which is a stone wall;” and besiegers of it
have suffered dreadfully from huge stones precipitated on them
from the fort above. Its most striking feature is “the north-
east angle, which assumes nearly the shape of a tower, and is
one of the strongest points, the rock being forty-two feet high,
and the bastion now on the top of it consists of twenty-five
feet of masonry, making a total of sixty-seven feet.” The
“town of Sattara lies immediately under the fort, in a deep
hollow, nearly surrounded on three sides by hills; cut off from
the west by the Syhadri Mountains (Western Ghats), and
from every other quarter by the Yena, Kistna, and Oormooree
rivers.” When the fort was attacked by the British at the
close of the war with the Peishwa in 1818, it mounted only
twenty-five guns, of various calibre, and was garrisoned by
400 men, who surrendered, having made scarcely any resis-
tance, after a few shells had been thrown into the place. The
British colours were immediately hoisted, but next day lowered,
and the standard of Sevajee raised in their place, proclamation
being made of the restoration of the titular chief to his dignity,
and a portion of the territory held by his ancestors. Previously
to the rise of Sevajee, this place had been held by the Mussul-
man government of Beejapoor; it was taken by that celebrated
chieftain in 1673, and made the seat of government by his successors in 1698. In 1700, being besieged by Aurunzgebe in person, it was taken\(^1\) by blockade after a vigorous resistance of about two months. In 1705 it was retaken\(^2\) by the Mahrattas by stratagem; and during the ascendency of the Peishwa, was used ostensibly as the state residence, but actually as the prison of the rajah. After the deposition of the Peishwa, the titular rajah continued to reside here, under the protection and control of the British authorities, till the race of Sevajee failed, by the death of his last descendant in 1848. A new church has been erected in the town by the British government.\(^3\) Distance from Bombay, S.E., 115 miles; from Poonah, S., 55. Lat. 17° 45', long. 74° 4'.

SATTAVADE.—A town in the British district of North Arcot, presidency of Madras, 33 miles N.W. of Madras. Lat. 13° 27', long. 80° 1'.

SATTENAPATTI.—A town in the British district of Guntoor, presidency of Madras, 21 miles W.N.W. of Guntoor. Lat. 16° 25', long. 80° 12'.

SATTENWARREE,\(^1\) in the territory of Bhopal, a fort on the northern frontier, towards the Gwalior territory. In 1818, it was held by a garrison on the part of the rajah of Nagpoor or Berar, and on the 8th of June was invested\(^2\) by a British force under Major Lamb, and on the 9th, the rampart having been breached, an attempt was made to storm, but the advancing party was received with so destructive a fire, that thirty-two men of those near the head of the advancing column were unhappily cut down. The rear thercupon fled in panic to seek shelter, and were of necessity followed by the rest. All efforts to bring the men to renew the attack were unsuccessful, and under cover of darkness the party retired from the spot, having suffered the loss of eighty-six of their number in killed and wounded. On the following night, however, the garrison evacuated the fort, somewhere about half their number effecting their escape, the remainder being killed or made prisoners. Sattenwarree appears to have been granted with other possessions by treaty\(^3\) of 1818 by the British government to the nawaub of Bhopal, "in order to mark its approbation of his conduct, and to enable him to maintain the stipulated contin-
gent." Distant N.W. of Bhopal 30 miles, N.E. of Ooein 95. Lat. 23° 36', long. 77° 10'.

SATTIYAMANGALAM.—A town in the British district of Coimbatoor, presidency of Madras, 40 miles N.N.E. of Coimbatoor. Lat. 11° 30', long. 77° 18'.

SATULA, in the British hill state of Kotgurh, a village on a mountain rising steeply over the left bank of the Sutlej. Elevation above the sea 6,771 feet. Lat. 31° 19', long. 77° 31'.

SAUBIE NULLA.—A river rising in lat. 27° 12', long. 76° 19', and flowing in a northerly direction for eighty miles through Alwar and Kot Kassim, and for thirty through the British district of Goorgan and the native territory of Juhjhor, falls into the Hansoutee river on the right side, in lat. 28° 28', long. 76° 38'.

SAUCKRA.—A town on the south-west frontier of Bengal, in the British district of Sumbulpoor, 84 miles W. by S. of Sumbulpoor. Lat. 21° 19', long. 82° 43'.

SAUERVEL.—A town of Bombay, in the territory of the Daung rajahs, 50 miles E. by S. from Surat, and 66 miles N.W. by W. from Malligaum. Lat. 21°, long. 73° 37'.

SAUEELA.—A town in the native state of Guzerat, or dominions of the Guicowar, 42 miles E.N.E. from Rajkote, and 83 miles W.S.W. from Ahmedabad. Lat. 22° 31', long. 71° 25'.

SAUGOR AND NERBUDDA TERRITORIES.—The country thus designated comprises an extensive tract, bounded on the north by Bundelcund and the British districts of Banda, Allahabad, and Mirzapore; on the east by Mirzapore and Korea; on the south by the territory of Nagpore or Berar, and the territory of the Nizam; and on the west by the territory of Gwalior, or the possessions of the Scindia family, and the territory of Bhopal. It lies between lat. 21° 16' and 25° 15', long. 76° 53' and 82° 51'; is 380 miles in length from east to west, and 190 in breadth from north to south, and has an area of 32,114\textsuperscript{1} square miles. Within these boundaries are comprehended the independent state of Rewah, whose rajah is bound to the British government by a treaty of alliance. The other native chieftains are mere feudatories of the East-India Company, under whose grants they hold their possessions; within

1 Parliamentary Return, April, 1831.
SAUGOR.

which, however, they exercise all the powers of government, subject to the interference, when necessary, of the paramount authority. Of the petty states thus situate, there are four—Kotsee, Myhir, Oocheyra, and Sohawal; but the larger portion of the country known as the Saugor and Nerbudda territory is directly British. This portion comprises the districts of Saugor, Jubbulpore, Hoshungabad, Seoni, Dumoh, Nursing-poor, Baitool, Ramghur, and Sohajapore. Its outline is very irregular, but it may be described generally as extending from lat. 21° 16' to 24° 30', and from long. 76° 53' to 82° 15', and comprehending an area of about 20,000 square miles.

The Saugor and Nerbudda is, with little exception, a con-considerably elevated tract, its limits embracing a portion of the ranges of the Vindhyas and of the Mahadeo Mountains. The eastern part is an elevated table-land, having at its south-eastern angle the summit of Amarakantak, 3,463² feet above the sea, but declining towards the west into the more depressed tract called the valley of the Nerbudda; that great river holding its course along it westward towards the Indian Ocean. The Mahadeo Mountains form the southern inclosing range of this valley; the Vindhyas, the northern. At the distance of about thirty miles south of the Nerbudda, the culminating ridge of the Mahadeo Mountains forms the line of water-heads, dividing the streams flowing northward towards the Nerbudda from those flowing southward and south-eastward towards the Godavery. The Mahadeo range appears to have an average elevation of about 2,000 feet above the sea; one summit is judged to rise as high as 2,500, and two or three others are vaguely conjectured to have a still greater altitude. The elevation above the sea of the Vindhyas forming the northern inclosing range of the valley of the Nerbudda, is but moderate. This range is little more than the southern brow of a sort of plateau, of very irregular surface, but for the most part declining northward, and sending off numerous streams in that direction. Few elevations exceed 2,000 feet; that of the Residency at Saugor, one of the most considerable ascertained, is only 2,050.³ Down this declivity, towards the north and north-east, flow the numerous feeders of the Betwa, the Cane, the Tons, and many others in their course towards the Jumna and the Ganges. The Sone, rising² two or three miles east of the
SAUGOR.

source of the Nerbudda, flows eastward; the Taptee, rising in the Mahadeo range, in the south-west of the territory, flowing westward, holds a course parallel to the Nerbudda, but on an average fifty miles more to the southward, and, like that river, it falls into the Arabian Sea. This remarkable table-land, or rather group of contiguous hilltops, though of no great elevation, and more remote from the ocean than most other parts of Hindostan, sends forth several rivers of great magnitude, and numerous tributary streams of less importance. Perhaps the lowest part in the territory is Garrels, on the Cane, at the point of its departure from this district, where it passes into Bundelcund. The estimated elevation of that point is 1,131 feet. The general aspect of the undulating table-land, extending northwards from the northern brow of the valley of the Nerbudda, is very pleasing, being “for the most part abundantly supplied with hill and dale; valleys with their rushing streams; forests of considerable extent and density, and, in fact, every desirable variety of surface.” The geology of the eastern part, towards Amarakantak, appears to have been very slenderly explored; but the scanty intimations given on the subject seem to show that the rock formation is generally sandstone, in many places overlaid with a rich mould, producing luxuriant vegetation. The lands “in the immediate vicinity of Amarakantak, within a range of thirty or forty miles, are in particular of surpassing beauty and richness, presenting noble plains of the most fertile virgin soil, wholly unbroken by forest, but adorned here and there by small picturesque ranges of hills.” From this tract the sandstone extends westward, forming the table-land bounding the valley of the Nerbudda on the north, and is intermixed with red marl, slate, and limestone. West of Pathariya, and about long. 79°, commences the volcanic tract, extending over the north-western part of the district, about the town of Saugor, which is situated on its highest part. This elevated tract of trap, with that of sandstone farther east, may be considered to belong to the great Vindhya range, which stretches across a great part of Hindostan from east to west. The southern part of the territory forms a portion of the Mahadeo and Satpura ranges, in which also trap predominates. In some places, granite, quartz, mica, schist, and other primitive formations, appear through

SAUGOR.

the overlying trap or sandstone, as at Jubbulpore, where granite and syenite occur in considerable quantities; and in the vicinity of Baitool, in the south-west, where quartz and mica-schist abound. The great valley of the Nerbudda is principally of alluvial formation, intermixed with sandstone, coarse conglomerate, limestone, dolomite or magnesian limestone, mica-slate, schists, clay-slate, and laterite. The mineral productions do not present many varieties, but they are highly important, consisting principally of iron and of coal. Iron-ore is found to the north-eastward of Sohagpoor and the eastward of the river Sone, but the most important site is a tract extending from twenty to thirty miles north-east of Jubbulpore, where it is largely raised and smelted. A considerable quantity is manufactured at Pannagar, Bareilly, and some other places in this district. At Tendukheri also, fifty miles south of Saugor, and ten miles north of the right bank of the Nerbudda, is abundance of iron-ore of excellent quality, which has been fully tested, as it is the material used in the construction of the excellent suspension-bridge over the Beosi, near the town of Saugor. The inexhaustible supply of iron-ore is the more important from there being abundance of excellent coal at many places in the vicinity; as in the Riwan pergunnah of Chandia-Kanria, which adjoins Kumbi on the north-east; and again in the Hoshungabad district, on the south bank of the Nerbudda; also about seven or eight miles below Jubbulpore, and at Sohagpoor, on the left bank of the Sone. Limestone abounds in many places, and the sandstone of the northern part of the district is remarkably fine-grained, strong, and may be quarried of any scantling desired. Little mention appears to be made of any other mineral produce in this district.

The climate appears to be better adapted to European constitutions than Bengal, or the greater part of the provinces bordering on the Ganges and the Jumna.

In the parts of the district where the volcanic formation prevails, the soil, a disintegrated trap, is remarkably fertile, producing almost every kind of crop. In the sandstone tracts and the alluvial soils of the valley of the Nerbudda, wherever there is an adequate supply of water, rice is very successfully and extensively cultivated. Into the midst of that crop, "as the rains approach their termination, the seeds of various
descriptions of leguminous crops are scattered, which spring up and ripen after the rice crop has been cut, thus yielding two crops per annum, with but one ploughing. In regard to timber, the Saugor and Nerudda territory seems to have shared in the great destruction of trees, which, within a few years, has taken place in many adjacent parts of India. The consequences of this it has been sought to remedy by holding out encouragement to planting.

Neat cattle are reared in great numbers, the larger and better kinds principally to supply oxen for draught, the small indigenous Gondi cow for milk, for which purpose it is well adapted. Buffaloes are also bred to a considerable extent for the purpose of the dairy. The breeding of horses is little attended to, and those bred are by no means remarkable for their good qualities; but, as in the contiguous territory of Bhopal, similar in physical circumstances, excellent horses are reared, probably a due degree of care and judgment would command the like success in this district. Sheep receive little attention, though there is abundance of pasture well suited to them.

Wild animals are numerous. The ravages of the wolf appear to be particularly dreaded, as may be inferred from a recent renewal of the practice of encouraging the destruction of the animal by pecuniary reward.

Manufactures are few and insignificant, being restricted in a great degree to those required for the use of the mass of the population; such as weaving, shoemaking, carpentry, and smithery. Good paper is made about Saugor and Jubbulpore; iron is worked at Bareilly and Kutungi, chiefly for guns, for which there is great demand among the wild tribes to the east and south-east. At Mandla, iron and brass are worked to a considerable degree of excellence, which is accounted for from the fact of the manufactories having been originally founded by a European deserter. Goldsmiths' work is executed at Saugor in great perfection, especially gold chains, usually called rose-chains.

A considerable portion of the population appear to be of the stock of the Ghonds, perhaps the aboriginal race of this part of India. Some of the Ghond tribes are nearly in what is called a state of nature, lurking in the gloomiest recesses of
SAUGOR.

the thickest forests, and subsisting for the most part on wild roots and fruits, wild honey, and game, which they kill with their arrows. It is even alleged that they are cannibals, cutting the throats\(^6\) of such of their number as they consider irrecoverably ill, and devouring their bodies. However this may be, it is beyond doubt that they offer human sacrifices to their idols.\(^4\) Notwithstanding their barbarism, they are, however, allowed to class themselves under the second caste of Hindoos. Allied in origin and habits to these savages are the Koles, Palis, and Panwars, inhabiting the eastern part of the district. The remaining Hindoo population are Brahmins, Bundelas, various tribes of Rajpoots, and Mahrattas. The Mussulman population, consisting of Patans and others, is not inconsiderable. This territory, belonging to what are called the non-regulation provinces, the statistical information regarding it is somewhat loose; but under the names of the several districts Saugor, Jubbulpore, Hoshungabad, Seonee, Dumoh, Narsingapore, and Baitool, will be found such as is available.

The British territory is under the superintendence of the lieutenant-governor of the North-West Provinces.\(^6\)

The principal towns are Saugor, Jubbulpore, Hoshungabad, Seoni, Baitool, Sohajpur, Belhary, Mandla, Dumoh and Dhamouni.

The principal routes are,—1. From north to south, from Agra to Saugor, and thence to Nagpore; 2. from north-east to south-west, from Allahabad to Saugor, and thence through Hoshungabad to Aseergur; 3. from north-east to south-west, from Allahabad, through Bellary and Garwara, to Nagpore; 4. from east to west, from Jubbulpore through Garwara, to Mhow; 5. from north-east to south-west, from Kalpi, through Saugor, to Mhow; 6. from north-west to south-east, from Nusserababad, through Saugor, to Garwara; 7. from north-west to south-east, from Saugor to Jubbulpore.

Of the earlier history of this territory little is known: it was probably long ruled by princes of the Ghond\(^6\) race. It seems to have been at least partially\(^7\) conquered by Akbar, about the year 1599. On the dismemberment of the empire of Delhi, this tract became nominally subject to the Peishwa; but in the latter part of the eighteenth century,\(^8\) Raghojee
SAUGOR.

Bhonsla, rajah of Berar or Nagpore, having received from that potentate grants of the greater part of the territory, made himself master of it. In 1818 this portion was ceded to the British government, in commutation of subsidy and contingent stipulated for by the treaty of 1816; and the cession was confirmed by the treaty of 1826. The claims of the Peishwa in Saugor had been previously surrendered, being included in the "rights, interests, and pretensions, feudal, territorial, and pecuniary," ceded by that prince to the East-India Company, under the thirteenth article of the treaty of 1817. Serious disturbances continued in several portions of these provinces after the termination of the Affghan war, which it was found necessary to quell by concentrating a military force in the disaffected territory.⁹

SAUGOR,¹⁰ the principal place of the British district of the same name, is situate in a hilly tract,² considerably elevated above the surrounding country. The town is built along the west, the north, and the north-east sides of a lake nearly a mile in length, and three-quarters in breadth, which occupies the lowest part of a valley, or rather a basin, surrounded by hills of trap³ formation, interspersed with a few of sandstone. Here are military cantonments, situate on an undulating plain north-east of the lake, and extending from north to south in a continuous line about a mile and a half. The ground, however, it is said, has been injudiciously selected, being in many places low, swampy, and consequently unhealthy. The parade-ground is in front of the lines, and adjoining it is the European burial-ground, the extent and crowded state of which give an unfavourable impression as to the qualities of the atmosphere. The mint occupied a handsome building, situate about a mile to the east of the lake; and here,⁴ formerly, 400 men were employed, but the establishment was some years since broken up, and its business transferred to Calcutta. There is a large fort here, which now serves as an ordnance depot.

In consequence of the considerable elevation of the site, the temperature at Saugor is rather moderate in proportion to the

* Sagur of Briggs's Index. The word is significant, meaning "sea," "lake," "piece of water;" and the town appears to have been so called on account of the contiguous lake.

SAUGOR.

latitude; "the thermometer rarely falls below 50° in the cold season, or rises above 95° in the hot."* "The quantity of rain which falls during the year, varies from thirty-four to forty-six inches."

Here is a sort of collegiate school, under the management of three members, a secretary, a head master, an assistant master, and a Hindoo master. There is an English and vernacular department. In the latter, instruction is given in Persian, Hindoo, and Mahratta.

The scenery of the beautiful lake, well suited for pleasure-boats, and the abundance of fish and wild-fowl on its waters, or on its shores, render it a great source of recreation to the European residents. Saugor is the station of the civil establishment. The European population of the town and its vicinity, vaguely stated as "numbering some hundreds," have the services of a chaplain; and a convenient church has recently been erected in the Gothic style. The total population of the town has been conjectured to amount to 50,000, the majority being Mahrattas.

Over the Bessi or Bes, a river running near the town, was constructed, in 1830, an iron suspension-bridge of the metal obtained at Tendukheri, about fifty miles to the southward. The bridge is 200 feet in span, and was erected by native workmen, at a cost of 4,800l., increased by a gratuity of 500l. to Major Presgrave, assay-master of the Saugor mint, under whose superintendence the work was carried on. Elevation above the sea 1,940 feet; distance N.W. from Jubbulpore 90 miles, N. from Nagpore 185, S.W. from Allahabad 223, S. from Agra 233, W. from Calcutta, by Allahabad, 808, N.E. from Mhow 215, N.E. from Bombay 500. Lat. 23° 50', long. 78° 49'.

SAUGOR ISLAND bounds the great entrance of the river Hoogly on the east side. It is seven or eight miles in length, and half that in breadth. On the east side "is an ancient pagoda, and a large tank of fresh water, held in great veneration by the Hindoos, who go there in great numbers once every year to sacrifice." The island is held under a lease of ninety-nine years from government by a company, which engaged at

* It has been suggested that this must refer to the state of the thermometer within doors only.
the end of twenty years to pay land-tax to the government on the cleared lands. It was subsequently found necessary to extend the term of rent-free tenure. The population in 1832 was estimated at 10,000. The system of manufacturing salt formerly carried on here by individuals under a system of excise, has been discontinued. An iron lighthouse, to be erected on Middleton Point, was shipped from this country some few years ago. Lat. 21° 42', long. 88° 8'.

SAUMUND.—A town in the British district of Ahmedabad, presidency of Bombay, 17 miles W. by S. of Ahmedabad. Lat. 22° 59', long. 72° 20'.

SAUNGI, in the district of Sultanpoor, territory of Oude, a town 90 miles S.E. of Lucknow. Butter estimates the population at 4,000, all Hindoos, of the military class, and cultivators. Lat. 26° 5', long. 81° 55'.

SAUNTE.—See SOAUTH.

SAUTNAIR, in the British district of Baitool, Saugur and Nurbudda territory, lieutenant-governorship of the North-West Provinces, a town on the route from Baitool to Ellichpoor, 22 miles S.S.W. of the former. Lat. 21° 38', long. 77° 50'.

SAUTURRA.—A town in the territory of Nagpoor, 166 miles E. from Nagpoor, and 135 miles S.S.E. from Ramgurh. Lat. 20° 59', long. 81° 41'.

SAVAN DROOG,* in the territory of Mysore, a celebrated hill-fort, situate on a vast and bare rock of granite, amidst dense forests and thickets. A small river rushing through a deep ravine, washes the south base of the rock, which is divided by an intervening chasm into two great summits, each surmounted by a fortress independent of each other, and both abundantly supplied with water. The circuit of the base is about eight miles, and the sides are so precipitous as to appear inaccessible when viewed from below. In the year 1791 it was invested by the British army under Lord Cornwallis, and the defences, though formidable by position, were soon breached. The garrison, also, appears to have been weak and pusillanimous, and both fortfs were carried by assault without the loss of a single life on the part of the British. After the final overthrow of Tippoo Sultan in 1799, it was garrisoned by a

* Gold Fort; from Savaran, "gold," and Durg, "fort." Buchanan denominates it Savanadurga, and considers Suvarndurga a corruption.

SAV—SAW.

small native force, which was subsequently withdrawn on account of the insalubrity of the place. Elevation above the sea 4,004 feet; distance from Bangalore, W., 19 miles; Seringapatam, N.E., 53. Lat. 12° 55', long. 77° 21'.

SAVANOOR.—A town in the British district of Dharwar, presidency of Bombay, 39 miles S. by E. of Dharwar. Lat. 14° 55', long. 75° 19'.

SAVANTANCUTTA.—A town in the native state of Mysore, 172 miles N.W. from Seringapatam, and 86 miles N. from Mangalore. Lat. 14° 6', long. 74° 51'.

SAVITREE, a river in the collectorate of Rutnagherry, Southern Concan, presidency of Bombay, rises on the western declivity of the Mahabulshevar range, about lat. 18° 17', long. 73° 27'. It flows west by the town of Mhar, and falls into the Arabian Sea at Bankote, in lat. 17° 58', long. 73° 5'; its total length of course being about seventy miles. It is navigable as far as Mhar, thirty miles from its mouth, and was formerly accessible at all times for large ships; but a sandbank at the mouth constantly increasing during the south-western monsoon, its facilities for navigation are greatly diminished. The bar has ten feet of water at low tide, and twenty-one at high water, spring tides; and ships may anchor inside in five fathoms. It swarms with fish, and abounds with alligators and other reptiles.

SAWA.—A town in the Rajput state of Oodeypoor, 55 miles E.N.E. from Oodeypoor, and 26 miles N.W. from Neemuch. Lat. 24° 45', long. 74° 39'.

SAWAN.—A river of the Damaun division of the Punjab, rising in lat. 31° 41', long. 69° 40', and, flowing easterly for fifty-five miles, loses itself in the desert, about lat. 31° 41', long. 70° 20'.

SAWAR, in the British district of Ajmeer, lieutenant-governorship of the North-West Provinces, a town on the route from Goona to Nusseerabad, 177 miles N.W. of former, 52 S.E. of latter. It is the principal place of a pargannah of the same name, having united with Kekri and Phuleya, a population of 67,080. The town of Sawar has a good bazar, and water is plentiful. Lat. 25° 49', long. 75° 21'.

SAWNAIL.—A town in the territory of Nagpoor, 21 miles N.W. from Nagpoor, and 91 miles E. by N. from Ellichpoor. Lat. 21° 23', long. 78° 57'.
SAWOTTEE.—A town of Burmah, situate on the right bank of the Irawady river, and 59 miles N. from Prome. Lat. 19° 37', long. 94° 55'.

SAWUNTGURH.—A town in the Rajpoet state of Boondee, 19 miles N.E. by N. from Boondee, and 94 miles S.E. from Ajmeer. Lat. 25° 39', long. 75° 52'.

SAWUNT WARREE. — A small state under the political management of the presidency of Bombay. It forms the southern part of the tract known by the name of the "Concan," or the territory lying between the Syadree range of ghauts and the sea. It is bounded on the north by the Gar river; on the east by the line of ghauts; on the south by the Tiracole creek and the Portuguese territory of Goa; and on the west by the Vingorla mehal and the Salsee mehal of the Malwan talooka, in the British collectorate of Rutnagherry. It lies between lat. 15° 38'—16° 15', long. 73° 40'—74° 22'; its greatest length from north to south is nearly fifty miles, its greatest breadth rather more than thirty, and it contains an area of 800 square miles.

The physical character of the country, like that of the Concan in general, is "remarkably rugged and broken, interspersed with huge mountains and thick jungles, intersected by rivers and numberless rivulets, rocky and clear until they descend on the level, where they are affected by the tide, when they are very deep and muddy." The more eastern part, consisting of a strip of land of no great width, extends along the western side of the Ghauts, and over their ridges into the Deccan. Of the scenery which presents itself from the summit of these passes, some idea "may" be formed by imagining mountains succeeding mountains, 3,000 or 4,000 feet high, covered with trees, except in places where the huge black barren rocks are so solid as to prevent the hardiest shrub from finding root in their clefts." The monsoon rains on the declivities and ridges of the Ghauts are heavier, perhaps, than in any other part of the world, and 297 inches of rain have been known to fall in this elevated region in one year. Tigers, leopards, hyenas, and other wild beasts lurk in the more fertile tracts, where the great number of torrents and brooks give rise to luxuriant vegetation. Snakes and other reptiles also abound; and the rivers near the sea swarm with alligators, which prey...
SAWUNT WARREE.

on the fish, that exist in vast numbers. The staple crops are rice and jowar (Holcus sorghum); but wheat, gram (Cicer arietinum), and other pulse, as well as esculent vegetables, thrive well in the milder season of the year. The soil is principally a light sand, full of stones and gravel, and incapable of yielding the superior kinds of produce, such as cotton, tobacco, and sugarcane. Cocoanuts are exported largely. The principal manufactures are gold and silver embroidery, worked on saddle-cloths and horse-appointments, native guns, swords, and spear-heads.

The inhabitants are chiefly cultivators: they are a warlike race, addicted to the use of arms from their childhood; and the British native army has been largely recruited from among the Mahratta Sawunts of this principality.

The principal road through this state is the great military route made by the British government from Belgaum down the Ram Ghaut to the port of Vingorla. Besides this, there are native roads from the Deccan, by the Tulkut Ghaut, to Banda and the Goa territory; down the Parpolee Ghaut, to Warree and Vingorla, with a branch road through Bowlut and Banda, into the Portuguese possessions; down the Hunmunt Ghaut, by Neroor, Waroos, and Mangaon, to Vingorla and Path; and by the Gotgha Ghaut to the port of Malwan. There are also cross-roads leading into the Goa territory on one side, and the Company's on the other; and numerous small passes in the line of ghauts from the upper to the lower country.

The chief rivers are the Gundnuddee, the Karlee, the Banda, the Tullowra, the Tillaree, called also Koodassee, and the Kulna. There are also a number of small streams, which in the rainy season swell into considerable rivers.

The annual revenues of the Warree state amount to about 2,25,000 rupees; the expenditure is fixed at something under 2,00,000 rupees; leaving a small surplus* revenue for the liquidation of debt. The Warree state is not tributary to the British government or to any foreign power; but in 1836, the customs leviable on the military road passing through this state

* The revenue is expected to exceed the expenditure by upwards of Rs. 20,000 per annum; but the large debt due to the British government for expenses occasioned by the rebellion, will probably absorb this surplus for many years.

1 Bombay Pol. Dsp. 15 Nov. 1846.
from the port of Vingorla to the Ram Ghaut, were transferred to the British government; and in 1838 an agreement was concluded with the chieftain, under which the whole of the customs of Sawunt Warree became the property of the British government, and the levy of transit-duties was abolished.

A corps was raised in 1839, by order of the British government, for service within the limits of this principality. It received the name of the "Sawunt Warree local corps," and is officered from the line. It is paid from the revenues of the state, and is not bound to serve in foreign territory. This levy consists of 520 rank and file, eighty native officers, and two European commissioned officers. It is disciplined, armed, and clothed in the same way as the Company's irregular corps, and is maintained at an annual cost of about 45,620 rupees, which forms a debit on the revenues of the state.

The maintenance of the general police of the country is also borne by its own finances. For police purposes, the state has been subdivided into three parts, each division being placed under a distinct district police officer, with a number of peons at his disposal.

A census of the population of Sawunt Warree state was taken in 1844. From this it appears that the total population of the district amounted to 148,738, in the proportion of 74,562 males to 69,171 females.

The Mahratta family Sawunt, from whom, as possessors of Warree, the name of the territory originated, appears to have first come into notice in the person of Sawunt Bahadur, the deshmook or chief of the town and district of Warree, under the Mussulman monarchy of Beejapoor, and a member of the Bosa family. In the year 1659, the Sawunt deshmook of Warree formed a treaty with the renowned Mahratta leader Sevajee, by which he agreed to transfer his allegiance from the monarch of Beejapoor to that chief, to whom he engaged to pay half the revenue of the district, and on his account to garrison the forts, and maintain a force of 900 infantry; but this treaty proving unsatisfactory to both parties, it was soon broken, and the deshmook resumed his allegiance to Beejapoor. In 1662, however, he was subjugated by the Mahratta chief, who subsequently restored to him his deshmookhee rights, and found in him a faithful ally.
SAWUNT WARREE.

In the reign of Phoud Sawunt, the first treaty with the East-India Company was negotiated. It appears to have been occasioned by the piracies on British commerce, committed by Kanojee Angria, and his successors on the guddée of Colaba, and bears date 13th April, 1730. It consists of seven articles; and after stipulating for perpetual peace and friendship between Phoud Sawunt Bhonalah, the Sir Dessayee, and the Company, and providing for their mutually assisting each other’s ships at sea, proceeds to conclude an offensive and defensive alliance against the son of Kanojee Angria, who is characterized as the mutual enemy of both powers, and engages on behalf of the East-India Company to give up all the conquests made during the war to the Sir Dessayee (the ruler of Sawunt Warree), with the exception of Gheriah (the fort of Vizadroog), and the island Kennery, which are to be retained by the British government.

British commerce having suffered much from the pirates of Sawunt Warree, an expedition was despatched from Bombay early in the year 1765, under the command of Major Gordon and Captain Watson, of the Bombay marine. They took the fort of Estwuntghur or Rairee, and changed its name to Fort Augustus; but on the 7th April of the same year, a treaty was concluded with the chieftain of Sawunt Warree, by which the British government agreed to restore the fort of Rairee, on conditions. These conditions do not appear to have been fulfilled; the result was the renewal of negotiation, terminating in another treaty, concluded 24th day of October, 1766, by which the restoration of the fort of Rairee was confirmed, subject to a certain payment. The consequences were natural and obvious: depredations continued to be perpetrated; and, as Duff⁹ observes, “it is no slight stigma on the British administration that this system of piracy was not finally suppressed until the year 1812.” In that year a treaty was concluded¹ between the chief of Sawunt Warree and the East-India Company, whereby the fort of Vingorla was surrendered to the latter, and very stringent clauses for the suppression of piracy were agreed to. The aggressive and predatory spirit of the rulers of Sawunt Warree was, however, not subdued. Remonstrance having failed, armed interference became necessary, and in 1819 the state was reduced² by a
SAWUNT WARREE.

British force, but given up again with certain exceptions, the forts of Estwunghur (Rairce) and Newteee, together with the lands round those forts and belonging to their jurisdiction, comprehending the districts of Panti and Ajgaum, and the whole line of seacoast from the Carlee river to Vingorla, and from Vingorla to the Portuguese territory, being ceded to the English. The treaty under which this cession took place was modified by another, concluded in 1820, by which the inland villages were restored, the British government retaining only the forts and villages forming the line of the seacoast. These two treaties proved equally inefficient with those formerly concluded, and a succession of blundering diplomacy* and unskilful military arrangements ensued, which appear to have left the country, as before, a thorough social and political chaos.

This state of things continued until 1838, when, on the breaking out of another formidable rebellion, it was considered inexpedient again to employ British troops in merely suppressing resistance to a chief* to whom like aid had already frequently been afforded, and who had proved himself utterly unfit to rule. The removal* of the Sir Dessayee from all authority was therefore considered to be an indispensable part of the new arrangement now rendered necessary. The country was temporarily placed under British management, to be hereafter restored to the Sir Dessayee or his family, when there should appear a sufficient prospect of good government. Two* invasions of the Warree territory, organized by certain malcontents who had found shelter in the Goa territories, followed; but on both occasions the disturbances were with little difficulty put down. But in 1844 a more formidable insurrection broke out, and Anna* Sahib, the heir-apparent, having joined the insurgents, his right to the succession was declared forfeited.† The country was taken under the permanent management of the British government, and upon the death of its chief will be at the disposal of the paramount power. Since this period, the tranquillity of this principality has not again been disturbed; suttee* has been abolished, and measures have

* Kheim Sawunt, more commonly called Bappoo Sahib, a weak and incompetent chief, had been invested with the chief authority in 1822, through the intervention of the British government.
been adopted to afford to all classes of the community protection from oppression, and the ready redress of grievances.

SAWUNTWARREE.—A town of Bombay, in the native state of Sawuntwarree, 38 miles W. by N. from Belgaum, and 22 miles E. by N. from Vingoorda. Lat. 15° 56', long. 74° 1'.

SAWUR, in the Rajpoot state of Jeypoor, a hill-fort and large populous village on the route from Agra to Neemuch, 147 miles S.W. of former, 182 N.E. of latter. Supplies and water may be had in abundance. Lat. 26° 8', long. 76° 9'.

SAWURDE.—A town in the British district of Rutnagerish, presidency of Bombay, 33 miles N.N.E. of Rutnagerish. Lat. 17° 24', long. 73° 34'.

SAWURGAUM.—A town in the British district of Ahmednuggur, presidency of Bombay, 47 miles E. by N. of Nassik. Lat. 20° 7', long. 74° 30'.

SAWUTSIR, in the Rajpoot state of Beekaneer, a village on the route from Rutungur to the town of Beekaneer, and 33 miles E. of the latter: it contains sixty houses. Lat. 27° 54', long. 73° 52'.

SAYGEWUN.—A town in the native state of Hyderabad, or territory of the Nizam, 61 miles N.W. by W. from Jaulnah, and 47 miles E. by S. from Malligaum. Lat. 20° 24', long. 75° 11'.

SEAL, a river of Sumbulpore, rises in lat. 21° 33', long. 84° 18', and, flowing south-westerly for twenty-six miles, falls into the Mahanuddy river, in lat. 21° 28', long. 84° 1'.

SEALKOTE, in the Beechna Doaab division of the Punjab, a town situated on the left bank of the Chenaub, 63 miles N.N.E. of the town of Lahore. Lat. 32° 29', long. 74° 33'.

SEATAKOOND.—A town in the British district of Sarun, presidency of Bengal, 36 miles S.E. by E. of Bettiah. Lat. 26° 30', long. 85° 4'.

SEBBEAN.—A town of Burmah, situate on the left bank of the Irawady river, and 79 miles S.W. by W. from Ava. Lat. 21° 13', long. 94° 59'.

1 E.I.C. Ms. Doc. SECROLE, in the British district of Benares, under the lieutenant-governorship of the North-West Provinces, a small town adjoining the city of Benares on the west. It contains the civil establishments, the military cantonments, and the residences of the British population whose avocations are connected
with the great city in the vicinity. The bungalows or lodges of the British engaged in civil pursuits are rather widely scattered outside the military cantonment, or to the west of it, and among numerous groves and gardens, the only ornaments of a scene otherwise not very attractive. The residences, however, are substantial, well finished, and well appointed, and rank among the best possessed by Europeans in this part of India. In the midst is the church, surmounted by a steeple, and well fitted up in the interior. There is besides a neat chapel, built by subscription, and open for divine service in Hindostanee. The residences, however, are substantial, well finished, and well appointed, and rank among the best possessed by Europeans in this part of India. In the midst is the church, surmounted by a steeple, and well fitted up in the interior. There is besides a neat chapel, built by subscription, and open for divine service in Hindostanee. The other principal establishments are the courts of justice, the treasury, and the jail, plain brick-built structures. The best of the government buildings is the Mint, erected under the superintendence of Mr. James Prinsep, formerly manager of that department at Benares. It was scarcely finished, however, when the process of coinage within it was stopped, and the entire business removed to Calcutta.

The military cantonment is traversed by the small stream the Burnah Nuddy, which, in the middle of the assemblage of lodges and regimental buildings, is crossed, by means of a bridge, by the route from Allahabad to the city of Benares. The cantonment is the head-quarters for the Benares division of the Bengal army. Lat. 25° 18', long. 83° 2'.

SECUNDERA, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Muttra to that of Agra. Here is an asylum for the children of natives who perished in the dreadful famine of A.D. 1837-1838. The number, originally 350, was in 1841 reduced by death to less than 300 boys and girls, in nearly equal proportion: the former are taught gardening and handicrafts; the latter, spinning, sewing, and similar pursuits suitable to their sex; and both are educated in the Christian faith. When of age, they intermarry, and are located in a contiguous village, formed of houses provided for their accommodation. Secundera is celebrated for containing the mausoleum of Akbar, who, with great prosperity and renown, reigned over India and Afghanistan from A.D. 1555 to 1605. The mausoleum is situate

* It was doubtless named from Sikandar Lodi, the Pathan sovereign of Hindustan, who reigned from A.D. 1488 to 1517, and who first made the neighbouring city of Agra a place of importance.
in the midst of a square embattled inclosure, said to contain forty acres, and entered by four vast and superb gateways, one being in the middle of each side of the square. They are built of red sandstone, each surmounted by four minarets, with numerous tablets, mouldings, and other ornaments of white marble, and inscriptions in black marble. That on the west side is in tolerable preservation, the rest are in ruins. The remains of Akbar lie in a deep vault, under the centre of the building, and beneath an unornamented slab of marble. This building is generally supposed to have been erected by Akbar for the reception of his own body. However, Akbar's son and successor Jahangir states that he himself built it, in honour of his father's memory. Lat. 27° 13', long. 78° 1'

SECUNDERA, in the Rajput state of Jeypore, a town on the route from Agra to Ajmeer, 93 miles W. of former, 135 E. of latter. It is situate on the right or south bank of the Bangunga, a torrent having a channel several hundred yards wide, devoid of water in the dry season, but having a wide and rapid stream during the periodical rains. The town is surrounded by a mud rampart. Lat. 26° 57', long. 76° 38'.

SECUNDERABAD, in the territory of the Nizam, a British military cantonment, advantageously situate on the north-east side of the Hoosain Sagur, a tank or artificial piece of water, about three miles in length from north to south, and two in breadth, lying amidst a number of smaller tanks, with which the surrounding country singularly abounds. To the west, and distant three miles, is a range of hills, consisting of granite rocks, heaped on each other in a variety of strange and fantastic shapes; and two miles to the north-east are two very remarkable and large granitic hills, of an hemispherical shape, each completely isolated. Their summits, which are considerably elevated above the adjacent country, are surmounted by the tombs of Mussulman ascetics regarded as saints, and hence numerous pilgrimages are annually performed to them. The cantonment extends in a line from east to west nearly three miles, forming a curved irregular street, having the officers' houses ranged on either side, in moderately-sized inclosures. This street is intersected in different parts by others, running northmost...
and south, which afford a facility of communication with the bazars, the sepoys' lines, and the parade-ground. The sepoys' lines face the north, and behind them are the bazars, extending three-fourths of the length of the cantonment. At the right, or eastern extremity of the cantonment, are the European infantry barracks, and a short distance to the north of Saint John's Church, a large and handsome building, situate on the highest ground in the cantonment; in consequence, however, of the unhealthiness of the spot, orders have been issued for the erection of new infantry barracks on a more eligible site. North of the sepoys' lines are the hospitals and arsenal. On the western extremity of the barracks are the horse-artillery lines, and north of it, and separated from it by the spacious parade, are the foot-artillery barracks. The cavalry lines are two miles north of the cantonment, at Bowenpilly, in an open country, on a rising ground, remarkably healthy. In the town, around the bazars of the cantonment, the streets are crooked, narrow, and irregular, and, the ground being uneven, pools of dirty water, and accumulations of filth are formed, causing during the hot season noisome and pestilential exhalations. Much attention, however, has latterly been given to remedy these evils by the formation of sewers, and the inhabitants are held responsible for the clearing and cleansing of the streets before their respective houses. There is an abundant supply of good water, from numerous wells and fountains. The south-west monsoon commences generally at Secunderabad in the beginning of June, and continues at intervals till about the middle of October. During November and December the sky is frequently cloudy, and the winds easterly; and sometimes also in the north-east monsoon a considerable quantity of rain falls. From the beginning of January to the end of May the sky is generally clear, and the weather dry. Dews are not unfrequent in January and the early part of February, and in some years light showers of rain occur during these months. The annual fall of rain is estimated at thirty-two inches, but in years when the monsoon fails, it does not amount to half that quantity. The mean temperature in the house for one year, deduced from observations made at sunrise, at two o'clock in the afternoon, and at sunset, was, in January, 74°; February, 76°; March, 84°; April, 91°; May, 93°; June, 88°; July,
SEC—SEE.

81°; August, 80½°; September, 79°; October, 80°; November, 76°; December, 74½°; giving as the annual mean 81¾°.” The most sickly times of the year are the wet and cold seasons. The prevalent diseases are fevers, dysenteries, and rheumatism. According to the latest accounts, there are in the town 5,000 houses, containing a population of 34,357. Elevation above the sea 1,837 feet. Distance from Mangalore, N.E., 498 miles; Bangalore, N., 375; Bellary, N.E., 229; Madras, N.W., 398; Masulipatam, N.W., 220; Bombay, S.E., 449; Nagpore, S., 312; Cuttack, S.W., 714; Calcutta, S.W., 962. Lat. 17° 26', long. 78° 33'.

SECUNDERPOOR, in the British district of Azimgurh, lieutenant-governorship of the North-West Provinces, a town on the route from Azimgurh to Mozufferpoor, 56 miles E. of the former. Lat. 26°, long. 84° 6'.

SECUNDERPOOR.—A town in the native state of Oude, situate on the left bank of the Ganges river, and 38 miles S.W. by W. from Lucknow. Lat. 26° 34', long. 80° 29'.

SEDASHEVAGHUR,1 in the British district of North Canara, presidency of Madras, a town on the north side of the Cauly Nuddy, and a mile east of its mouth. The Cauly Nuddy, descending from the Ghats, here discharges itself into an inlet of the sea opposite the town, about a mile wide, and twenty-five2 feet deep at high tide; but the entrance is hazardous and intricate, and ships frequenting this part of the coast anchor outside, in Carwar Bay, a roadstead sheltered by several islets, of which the principal are Karmaguda and that by the British sailors called3 Oyster Rock. Sedashevaghur, as the name indicates, has a fort, founded by Sedashwa Rao, one of the rajahs of Soonds, who grew into importance on the overthrow of the great kingdom of Vijayanagar at the battle4 of Talikote, in the year 1564. Distance N.W. from Mangalore 145 miles, S.E. from Bombay 290. Lat. 14° 52', long. 74° 12'.

SEEALPUNT, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a town on the route from Almora to Tibet, 60 miles E.N.E. of the former. Lat. 29° 58', long. 80° 39'.

SEEANUH,1 in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a town on the route from Boolundshuhur to Moradabad, 20 miles N.N.E.
of the former. It contains a population of 5,744 inhabitants.\(^2\) Lat. 28° 37', long. 78° 9'.

SEEKAUL KA GUR, in the Sinde Sagur Doab division of the Punjab, a town situated 10 miles from the right bank of the Chenaub, 53 miles N.N.E. of the town of Mooltan. Lat. 30° 54', long. 71° 50'.

SEEBGUNJE, in the British district of Bograh, presidency of Bengal, a town on the river Currattea, a considerable stream flowing from north to south, and navigable throughout the year for small craft, and during the periodical rains for those of great burthen. Lat. 25°, long. 89° 20'.

SEEBGUNJE.—A town in the British district of Mooltan, presidency of Bengal, 26 miles S. of Mooltan. Lat. 24° 40', long. 88° 10'.

SEEBPOOR.—A town in the British district of Midnapoor, presidency of Bengal, 46 miles S. by E. of Midnapoor. Lat. 21° 47', long. 87° 30'.

SEEBPOOR.—A town of Assam, in the British district of Seebpoor, presidency of Bengal, 46 miles S.E. by E. of Luckimpoor. Lat. 27°, long. 94° 40'.

SEEBSAQUR.—A town of Seebpoor, presidency of Bengal, two miles N. of Seebpoor. Lat. 27° 2', long. 94° 39'.

SEEDUM.—A town in the recently lapsed territory of Odeipoor, on the south-western frontier of Bengal, 20 miles N. from Odeipoor, and 72 miles S.W. by S. from Palamow. Lat. 22° 57', long. 83° 24'.

SEEHA, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village close to the western frontier, towards the jaghire of Jujhur. Lat. 28° 15', long. 76° 29'.

SEEINGHOU.—A town of Burmah, situate on the left bank of the Irawady river, and 109 miles S.W. from Ava. Lat. 20° 51', long. 94° 41'.

SEEKAR,\(^1\) in the Rajpoot territory of Shekawutee, a town, the residence\(^2\) of a thakoor or chief, one of the five principal leaders of that country. His revenue, according to Tod,\(^3\) amounts to 8,00,000 rupees annually. On the invasion by the British troops in 1885, it was occupied by them, having been surrendered without resistance. Distance S.W. from
SEEHREE, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a town on the route from Bareilly to Delhi, and 35 miles W. of the former. It has a bazar, and is supplied with water from wells. The road in this part of the route is good; the country open, with considerable cultivation, and in some places patches of jungle. Lat. 28° 26', long. 78° 59'.

SEELDHURUMPORE.—A town of Assam, in the British district of Nowgong, presidency of Bengal, 30 miles S.E. by E. of Nowgong. Lat. 26° 7', long. 93° 10'.

SEENA.—A river rising in the British collectorate of Ahmednuggur, in lat. 19° 8', long. 74° 37'. It flows south-east through this collectorate and that of Sholapore, and falls into the Beemah river in lat. 17° 22', long. 75° 58'.

SEENGURH, in the British district of Mozuffurnuggur, lieutenant-governorship of the North-West Provinces, a village on the route from Kurnal to Meerut, and 17 miles S.E. of the former. The road in this part of the route is good; the country open, and rather well cultivated. Lat. 29° 33', long. 77° 14'.

SEEPAH.—A town in the British district of Sarun, presidency of Bengal, 30 miles S. by W. of Bettiah. Lat. 26° 21', long. 84° 30'.

SEEPOW.—A town in the native state of Dholpoor, 13 miles N.W. from Dholpoor, and 33 miles S.W. by S. from Agra. Lat. 26° 47', long. 77° 50'.

SEEPRA.1—A river of Malwa,2 rising on the north side of the Vindhya range, 11 miles E. of the small town of Peepulda, and in lat. 22° 37', long. 76° 12'. It has a winding course, generally north-westerly, through a fertile country, and forty miles from its source receives on the left side the small river Kaud, and passing subsequently by the towns of Oojein and Mahidpoor, falls into the Chumbul on the right side, in lat. 23° 54', long. 75° 29', after a total course of 120 miles. So sinuous is its progress, that in a distance of twenty-six miles it is thrice crossed3 by the route from Mhow to Mahidpoor, by Oojein, being in each instance fordable in fair weather. At the

3 Garden, Tables of Routes, 594.

* Malcolm, in stating that the Seepra takes its rise three miles west of Tillore, has mistaken the Kaud for that river.
SEE.

point of passage, six miles north of Oojin, or lower down the stream than that city, and fifty-five miles from the source, the passage is made by “a rugged rocky ford, of about 100 yards in width.” Higher up the stream, and four miles south of Oojin, it is crossed on the route from Agra to Mhow, and there has “a bed rocky for 100 yards; banks steep, and cut into ravines at the ghat (ford); width of the stream in dry season twenty yards, and from one to one and a half feet deep.” Still higher, at Bowlee, about twenty miles from the source, it is crossed on the route from Mhow to Saugor, by a ford “fifteen yards wide, with little water, and a sandy bed.” Close to Mahidpoor, it is crossed, on the route from Neemuch to that town, “by ferry, or otherwise by a deep ford higher up.” During the rains, the river swells and overflows many places on its banks. In 1821, it rose to such a height as to wash away part of the town of Mahidpore. In the Ayeen it is gravely stated, “It is astonishing that sometimes this river flows with milk.” A similar belief, according to Jacquemont, is still entertained by devotees respecting the water of a small deep tank close to the bank of the river, at Oojin. “The water of this basin, notwithstanding its uninviting appearance, has, for devotees of competent faith, varied and delicious tastes, according to the various seasons of the year. In summer, the taste is that of sherbet; in autumn, of milk; in winter, of honey, &c. &c. It is not drunk unless it has passed through the hands of the Brahmins who frequent the place, and live by the credulity of the devotees.”

SEER, in Sinde, the mouth of the Goongroo or Pinyaree branch of the Indus, which in its lower part is, in consequence of the dam thrown across it at Maghribee, deserted by the stream, except during the highest state of the inundation. This estuary is navigable for boats of forty tons. The Seer mouth is in lat. 29° 46', long. 68° 7'.

SEERAMPOOR.—A town in the territory inhabited by the independent hill tribes of Orissa, 49 miles W. from Goomsoor, and 120 miles S. from Sumbulpoor. Lat. 19° 45', long. 83° 57'.

SEERHUTTEE.—A town in the native Mahratta jaghire of Sanglee, presidency of Bombay, 41 miles E.S.E. from Dharwar, and 90 miles W. from Bellary. Lat. 15° 13', long. 75° 39'.

SEERMOW, in the territory of Bhopal, a town on the

route from Hoshungabad to Saugor, 76 miles N.E. of former, 38 S.W. of latter. It is situate at the south base of a ghat or passage over a ridge of trap, amidst stupendous hills and cliffs of the same formation. It has a bazar, and is supplied with water from wells. Lat. 23° 24', long. 78° 34'.

SEERMOWA, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Allygurh to that of Futtugurh, and 14 miles N.W. of the latter. The road in this part of the route is heavy and bad for wheeled carriages; the country level, open, and cultivated. Lat. 27° 26', long. 79° 29'.

SEEROOEE.—See SEROHEE.

SEERPAHDEE.—A town in the native state of Mohur-bunge, on the south-west frontier of Bengal, 70 miles W. by S. from Midnapoor, and 57 miles S. from Burraboom. Lat. 22° 16', long. 86° 20'.

SEERPOOR.—A town in the native state of Hyderabad, or territory of the Nizam, 164 miles N.N.E. from Hyderabad, and 128 miles S.E. from Ellichpore. Lat. 19° 30', long. 79° 38'.

SEERPORE, in the British district of Patna, presidency of Bengal, a town on the right or south bank of the Ganges. It has about 1,000 houses, and a population of 5,000, and is the principal place of a police division of the same name, having an area of forty-four square miles, and a population of 30,200. The town is distant W. from Patna 15 miles, E. from Benares, by way of Ghazipoor, 140. Lat. 25° 40', long. 85° 2'.

SEERPORE.—A town in the British district of Moorsheadabad, presidency of Bengal, 18 miles W. by S. of Moorsheadabad. Lat. 24° S', long. 88° 1'.

SEERPORE, in the British district of Bograh, presidency of Bengal, a town near the south frontier, towards the British district of Pubna. It is situate on the right bank of the great river Curatteea, is of rather considerable size, and has a thana or police-station, the jurisdiction of which extends over 315 villages. Distant S. from the town of Bogra 12 miles, N.E. from Bumhampoor 82, from Calcutta 200. Lat. 24° 40', long. 89° 24'.

SEERSOONDEE.—A town in the territory of Nagpoor, 100 miles S.E. by E. from Nagpoor, and 122 miles S.E. by E. from Seuni. Lat. 20° 27', long. 80° 30'.
SEETABULDEE.—An eminence in the outskirts of the town of Nagpore, the chief place in the British territory of the same name. This spot has been rendered memorable by an action which took place there on the 26th November, 1817, when a treacherous attack upon the British, made by order of the rajah of Nagpore with a body of 20,000 men, was gallantly met and defeated by a force of not more than 1,400. A noble charge, made by Captain Fitzgerald with a small party of cavalry upon a large body of the enemy's horse, decided the fortune of the day. The resident, Mr. Jenkins,* was on the field throughout the day, as was also his assistant Mr. Sotheby, who was there killed. Distant 102 miles E. from Ellichpoor, and 90 miles S.E. by E. from Baitool. Lat. 21° 10', long. 79° 9'.

SEETA MOW, in Malwa, a town, the principal place of a small raj of the same name. It is held by a petty rajah, a descendant of a scion of the family of Joudpore. The annual revenue paid to the rajah is estimated at 90,000 rupees, out of which he pays 60,000 Salim Shye rupees, or 47,250 Company's rupees, to Scindia. The rajah some time since claimed a reduction of tribute, on the ground of the insufficiency of the resources of the country to meet the claim; and compliance with his requisition has been made dependent upon the result of a survey of his territory. Population of the town about 10,000. Distant N.W. of Oojein 66 miles, S.W. of Gwalior fort 230. Lat. 24° 3', long. 75° 27'.

SEETE LEKH, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a peak of the main range of the Himalaya, on the right bank of the Kali (Eastern), and forming part of the ridge separating the mahall or subdivision of Bians from that of Dharma. Elevation above the sea 15,833 feet. Lat. 30° 8', long. 80° 52'.

SEETULGUREE, in the British district of Muzuffurnugur, lieutenant-governorship of the North-West Provinces, a village on the route from Kurnal to Meerut, and 11 miles S.E. of the former. The road in this part of the route is indifferent, the country open and rather well cultivated. Lat. 29° 35', long. 77° 10'.

SEG—SEH.

nine miles S. of the left bank of the Loonee river, and 62 miles S.W. from Jodhpoor. Lat. 25° 40', long. 72° 29'.

SEGAON.—A town in the territory of Nagpoor, 58 miles S. from Nagpoor, and 123 miles S.E. by E. from Ellichpoor. Lat. 20° 20', long. 79° 13'.

SEGOR GUNGE.—A town in the jaghire of Rampoor, lieutenant-governorship of the North-West Provinces. Lat. 28° 40', long. 79° 1'.

SEGOWLEE, in the British district of Sarun, presidency of Bengal, a town on the route from Goruckpoor cantonment to that of Mulye, 98 miles E. of former, 51 W. of latter. Supplies and water are abundant. Lat. 26° 44', long. 84° 47'.

SEGU.—A village in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, 45 miles E. of Delhi. Lat. 28° 35', long. 78° 1'.

SEHAR, in the British district of Futtehpore, lieutenant-governorship of the North-West Provinces, a town on the right bank of the Ganges, nearly opposite Dalmau, and 18 miles N.E. of the town of Futtehpore. Lat. 26°, long. 81°.

SEHARI KA SARAE, in the British district of Agra, a village on the route from the city of Agra to Jeypore, and eight miles W. of the former. The road in this part of the route is good, the country well cultivated. Lat. 27° 9', long. 77° 58'.

SEHMBILL.—A town in the Rajpoot state of Oodeypoor, 88 miles N.W. from Oodeypoor, and 90 miles S. by E. from Jodhpoor. Lat. 25° 3', long. 73° 30'.

SEHOO.—A town in the native state of Hyderabad, or territory of the Nizam, 30 miles W.N.W. from Dowlutabad, and 68 miles N. from Ahmednuggur. Lat. 20° 3', long. 74° 50'.

SEHORE.—A town in the British district of Ahmedabad, presidency of Bombay, 103 miles S.S.W. of Ahmedabad. Lat. 21° 40', long. 71° 55'.

SEHORE, in Malwa, a town of Bhopal, on the route from Saugor to Asseergurh, 132 miles S.W. of former, 152 N.E. of latter. It is situate on a boldly-rising rock of quartz, and is a considerable town, the residence of the British political agent for Bhopal. Around it is a large grove of mangoes and other trees. There is a considerable manufacture of printed muslins. There is a good bazar, and water is abundant, the town being
SEH.

situated on the right bank of the Saven,* a small river tributary to the Parbutty. Distant S.W. of Bhopal 22 miles, N.W. of Hoshungabad 66. Lat. 23° 12', long. 77° 3'.

SEHRA.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situated on the left bank of the Pir Punjal river, and 57 miles S.W. by W. from Sirinagur. Lat. 33° 38', long. 74° 6'.

SEHUL, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to Almora, and five miles N. of the former. The road in this part of the route is in general good, though in one place sandy and heavy; the country is open, flat, and generally cultivated. Lat. 28° 54', long. 78° 53'.

SEHUREE, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Buraech, 62 miles N.W. by W. of the former. Lat. 27° 8', long. 82° 31'.

SEHWAN,¹ in Sinde, a town situated on an eminence at the verge of a swamp on the right or south-west bank of the Arul, which flows from the Lake Manchur into the Indus, and which abreast of the town is about 100 yards wide, and when lowest twelve feet deep. The Indus, a few years ago, flowed close to the town, but is now two miles distant from it. Ruined houses, mosques, and sepulchres cover here a wide space, and bear evidence of the greatness of this city before it was ruined by the Kalora princes of Sinde. The houses of the present town are of mud, often several stories high, and arched. They are superior to those usually to be seen in the towns of Sinde; but the bazaar, long, crooked, narrow, and covered with mats to exclude the scorching beams of the sun, is ill supplied with goods, and has little trade. The manufactures are inconsiderable, consisting of caps, shoes, and petty silk fabrics. The inhabitants are chiefly fishermen or beggars, which last class are supported by the pilgrims who flock to the shrine of Lal Shah Baz, whose memory stands high for sanctity, not only with Mussulmans, but also with Hindoos. The remains of this reputed saint, who was originally from Khorasan, lie in a tomb inclosed in a quadrangular edifice, covered with a dome and

Marmurdo, on Sinde, in Jour. Roy. As. Soc. 1854, p. 255.

Called by Hunter¹ the Rootah Seein.
lantern, ornamented with smaller domes and spires, and with glazed porcelain tiles, bearing numerous inscriptions in Arabic characters. The gate is of hammered silver, as is the balustrade round the tomb, which is covered with rich cloths. The sepulchre is reputed to contain a considerable treasure, and its keepers are endowed with the gardens of Sehwan and several villages. Great numbers of pilgrims flock to this spot from all parts of Sinde and the neighbouring countries; but neither the possession of so sacred a deposit, nor the example of so much devotion, has any beneficial effect on the morals of the population, who are remarkable for idleness and profligacy. North-west of the town, and separated from it by a deep channel, is an eminence about eighty feet high, having its sides cased with a brick wall. The summit is oval, and is 1,200 feet long and 750 wide. It is covered with ruins and fragments of pottery; the remains of towers are visible along the circuit of the wall, and two fine arched gateways are in tolerable preservation. The population of Sehwan is estimated by Burnes at about 2,000. Lat. 26° 24', long. 67° 55'.

SEIK STATES.—See SIRHIND.

SEILGOMNA.—A town in the native state of Korea, on the south-west frontier of Bengal, 68 miles E.N.E. from Sohagpoor, and 101 miles W. by S. from Palamow. Lat. 23° 40', long. 82° 26'.

SEIRSA.—A town in the British district of Midnapoor, presidency of Bengal, 61 miles W. by N. of Calcutta. Lat. 22° 40', long. 87° 30'.

SEKAYGAHDO.—A town of Burmah, situate on the left bank of the Irrawady river, and 66 miles S.W. by W. from Ava. Lat. 21° 22', long. 95° 8'.

SEKKAYBEEN.—A town in the British territory of Pegu, situate on the left bank of the Irrawady river, and 69 miles W. by N. from Pegu. Lat. 17° 48', long. 96° 16'.

SEKROBA, in the territory of Oude, a British cantonment three miles E. of the left bank of the Eastern Surjoo, a feeder of the Ghaghra, 56 miles N.E. of Lucknow, 115 N. of Allahabad. The Surjoo is crossed by a ferry: the road towards Lucknow is good in dry weather. Lat. 27° 7', long. 81° 44'.

SEKURBA.—A town in the native state of Nepal, situate
SEK—SEN.

on the left bank of the Arun river, and 101 miles E. by N. from Khatmandoo. Lat. 27° 54', long. 86° 55'.

SEKUNDRA, in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Cawnpoor to Jalloun, 46 miles W. of the former. Lat. 26° 22', long. 79° 41'.

SELA GUNGA, a river of independent Tipperah, rises in lat. 23° 55', long. 92° 3', and flowing first westerly for thirty-five miles, then south for eighteen, falls into the Goomtee river, in lat. 23° 34', long. 91° 37'.

SELIMABAD.—A town in the British district of Burdwan, presidency of Bengal, 11 miles S.E. by S. of Burdwan. Lat. 23° 4', long. 88° 1'.

SELLEEGOREE.—A town in the British district of Dinajepore, presidency of Bengal, 77 miles N. by W. of Dinajepore. Lat. 26° 39', long. 88° 23'.

SELON.—A town in the native state of Oude, situate on the right bank of the Sace Nuddee, and 68 miles S.E. by S. from Lucknow. Lat. 26° 1', long. 81° 31'.

SEMARA.—A town in the native state of Nepal, situate at the source of one of the branches of the Raptee river, and 153 miles W. from Khatmandoo. Lat. 27° 40', long. 82° 50'.

SEMABREEA.—A town in the territory of Nagpoor, 156 miles E.N.E. from Nagpoor, and 77 miles S.S.E. from Ramgurh. Lat. 21° 49', long. 81° 29'.

SEMBEW GHEWN.—A town of Burmah, situate on the right bank of the Irawady river, and 123 miles S.W. from Ava. Lat. 20° 38', long. 94° 36'.

SEMKEUR.—A town of Eastern India, in the native territory belonging to Toola Ram Senahputtee, 74 miles E. from Jyn-tesahpore, and 89 miles S.S.E. from Nowgong. Lat. 25° 12', long. 93° 14'.

SEMOWLEE.—A town in the native state of Gwalior, or territory of Scindia, situate on the right bank of the Asun river, and 19 miles N.W. from Gwalior. Lat. 26° 23', long. 78°.

SEMULBAREE.—A town in the British district of Purneelah, presidency of Bengal, 20 miles N.E. of Purneelah. Lat. 25° 57', long. 87° 47'.

SENDHAT.—A town of Burmah, situate on the left bank.
of the Irawady river, and 46 miles W. from Ava. Lat. 21° 54',
long. 95° 20'.

SEN-.SEO.-A town in the native state of Bhotan, situate on
the left bank of the Monas river, and 103 miles N. by W. from
Gowhatty. Lat. 27° 38', long. 91° 37'.

SENGE KHABAB, or INDUS RIVER.—See INDUS.

SENOWRA, in the British district of Mynpooree, lieuent-
governorship of the North-West Provinces, a village on
the route from the cantonment of Aligurh to that of Etawa,
and 40 miles N.W. of the latter. The road in this part of
the road is good; the country is open and well cultivated.
Lat. 27° 12', long. 78° 36'.

SENTULGURH, in the Rajpoot state of Jeypore, a small
town on the route from Delhi to the town of Jeypore, 29 miles
N.E. of latter. It is surrounded by a mud rampart, and is
situate in a sandy plain little capable of production, and con-
sequently scantily cultivated. Lat. 27° 5', long. 76° 23'.

SEOGURH.—A town in the native state of Oude, 83 miles
N.E. from Lucknow, and 120 miles E. from Shahjehanpoor.
Lat. 27° 43', long. 81° 55'.

SEOHARA, in the British district of Bijnour, lieutenant-
governorship of the North-West Provinces, a town on the
route from Dehra to Moradabad, and 29 miles N.W. of the
latter. The surrounding country is in general sandy, and
overrun with jungle: the road in this part of the route is
good. Altitude above the sea 701 feet; distance N.W. from
Calcutta 917 miles. It contains a population of 6,414 inhabi-
tants.2 Lat. 29° 13', long. 78° 39'.

SEONDA, in the British district of Banda, lieutenant-
governorship of the North-West Provinces, a small town on the
route from the town of Banda to Kalleenjur, 25 miles N.W. of
the latter. Lat. 25° 18', long. 80° 25'.

SEONDARA, in the British district of Moradabad, lieuent-
governorship of the North-West Provinces, a town on the
route from Moradabad to Budaoon, 19 miles S. by E. of
the former. Lat. 28° 33', long. 78° 56'.

SEOTIE.—A river rising in Mirzapoor, about lat. 24° 44',
long. 82° 15', close to the Bujlut Ghat, and at an elevation
above the sea of probably about 1,000 feet. It holds a
northerly course of about fifteen miles, and then turning to
the north-west, flows by the northern base of the Kutra Pass, and receiving several small streams, falls into the Bilund, on its left side, in lat. \(24^\circ 55'\), long. \(82^\circ 8'\), having flowed altogether a distance of about forty miles.

SEOULA,\(^1\) in the British district of Futtehpore, lieutenant-governorship of the North-West Provinces, a village on the route from Cawnpore to the town of Futtehpore, and nine miles N.W. of the latter. The road in this part of the route is good, the country level and partially cultivated. Lat. \(26^\circ 2'\), long. \(80^\circ 44'\).

SERA,\(^1\) in the British district Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from Moradabad to Hurdwar, and 43 miles N.W. of the former. The road in this part of the route is good, and passes through an open and partially-cultivated country. Lat. \(29^\circ 24'\), long. \(78^\circ 31'\).

SERA,\(^1\) in the territory of Mysore, a town\(^2\) situate on a tributary of the river Vedavati. It has a fort, well built of stone, of considerable size, and regular construction. Within are the remains of the residence of the former nawaub or Mussulman governor. There is likewise a large mosque, besides some others of less importance, this having been formerly a very populous place, the number of houses having been once estimated at 50,000, a large number of which were inhabited by Mussulmans; but it has suffered dreadfully from the predatory attacks of the Mahrattas; and Tipoo Sultan further urged its ruin, by taking away 12,000 families to replenish the town of Shahar Ganjam, which he built on the island of Seringapatam. It has, however, since the establishment of British supremacy, in some degree revived, and contains a few good streets, 2,000 houses having been built in the first year after the overthrow of Tipoo Sultan. Here are two extensive tanks, but in few years is the rain sufficient to replenish them, the climate of this part of Mysore being very dry. The overthrow of the monarchy of Vijayanuggur by a Mussulman confederacy, at the great battle of Talikote, took place in 1564,\(^3\) and about eighty years later Sera was subjugated\(^4\) by the king of Bejapoor, and granted in jaghire\(^5\) to Shahjee, the father of Sevajee. The town became the seat of an extensive provincial government. On the overthrow of the state

---

7. Duff, Hist. of Mahrattas, l. 121, 291.
of Beejapoor by Aurungzebe, it appears to have become part of the subah or province of the Deccan, and was held as a sort of fief, ostensibly subordinate to the Nizam, after that officer had attained independence. In 1757 it was captured by the Mahrattas; and though still in their possession, it was, in 1761, nominally conferred on Hyder Ali, the formidable adventurer of Mysore, by Basalut Jung, the brother of Nizam Ali. Hyder found little difficulty in making himself master of the place. In 1767 it came into the possession of the Mahrattas, but was immediately restored for a pecuniary compensation. In 1772 it was again wrested from that potentate by the Mahrattas, but retaken in the following year by his son Tippoo Sultan. In 1791, when Lord Cornwallis advanced into Mysore, it was occupied by the British. Its elevation above the sea has been estimated at 2,223 feet. Distance from Seringapatam, N., 92 miles; Bangalore, N.W., 73; Madras, W., 234; Mangalore, N.E., 150. Lat. 13° 45', long. 76° 57'.

SERAEN.—A town in the British district of Pooree, one of the divisions of Cuttack, presidency of Bengal, 17 miles N.W. by N. of Juggurnaut. Lat. 20°, long. 85° 45'.

SERAI, in the British district of Bundelkund, lieutenant-governorship of the North-West Provinces, a town on the route from Tehree to Saugur, 30 miles S. of the former. Lat. 24° 7', long. 78° 50'.

SERAI GUNGOH, in the British district of Suharunpoor, a village on the route from Kurnal to Suharunpoor, and 28 miles N.E. of the former town. It is situated in a level and highly-cultivated country, containing numerous groves of mango-trees. The road is good in this part of the route, except during heavy rains, when it is in many places under water. Distant N.W. from Calcutta 988 miles. Lat. 29° 46', long. 77° 20'.

SERAMPORI, in the British district of Hoogly, presidency of Bengal, a town on the right or western bank of the river Hoogly. Heber describes it as "a handsome place, kept beautifully clean, and looking more like a European town than Calcutta, or any of its neighbouring cantonments"; and, viewed from the opposite side of the river, it has a peculiarly pleasing appearance. Here are a court-house, and a large building which was the government house during Danish rule. The place acquired some celebrity as being the spot where, in the
latter part of the last century, the Baptist missionaries established themselves, and where they prosecuted their labours for the advancement of Christianity in India, and for the acquisition by Europeans of a knowledge of the languages of the East. The institution which they reared attracted to the place a degree of attention which otherwise it certainly would never have commanded.

Serampore was at one time the Alsatia of Calcutta, and afforded refuge to schemers, insolvent debtors, and reckless adventurers, who had found it prudent to disappear from that metropolis. It was in consequence a bustling, lively, gay, dissipated place; but the state of affairs has been changed by the loss of its immunities, which having been found very troublesome to the jurisdiction of the East-India Company, the place has been purchased from the Danes, and formally transferred to the British: the pecuniary equivalent was calculated at twenty-five years' purchase of the net revenue.

Serampore is noted for its manufacture of paper. The supply required for the impressions of the Calcutta Gazette is furnished from hence; and the coarser quality, denominated cartridge-paper, is said to be equal in every respect to that of England. Population of town, exclusive of that of the suburbs, 13,000; distant from Calcutta, N., 18 miles. Lat. 22° 46', long. 88° 24'.

Serampore.—A town in the British district of Ramgur, presidency of Bengal, 61 miles E. by N. of Hazareebagh. Lat. 24° 8', long. 86° 20'.

Seran.—A town in the native hill province of Koonawar, situate on the left bank of the Sutlej river, and 46 miles N.E. by E. from Simla. Lat. 31° 30', long. 77° 51'.

Serao, in Gurhwal, a small town in the valley of the Budeear, and on the left bank of the river of that name. It is situate amidst a large extent of terraces, formed on the declivity of the mountain rising behind it, and carefully cultivated. Serao is described by Jacquemont as having about eighty houses, amassed together in such a manner that they have a more compact appearance than towns of many thousand inhabitants in the plains of Hindooostan. The comparative affluence of the inhabitants exposes them to the marauding attacks of their neighbours. The arms used in those conflicts of attack and defence, are bows made of slips of bamboo, provided
SERGONG.—A town in the native state of Bhutan, 62 miles N. by E. from Durrung, and 73 miles N.W. from Bishnath. Lat. 30° 57', long. 78° 17'.

SERIEKALA.—A town in the British district of Singboom, on the south-west frontier of Bengal, 18 miles N.E. from Chaibassa, and 36 miles S.W. by W. from Burraboom. Lat. 22° 46', long. 85° 58'.

SERINAGUR.—See SIRENUGUR.

SERINGAPATAM, a celebrated fortress and town, formerly the capital of the territory of Mysore, is situate on the western extremity of an island in the river Cauvery. The island\(^2\) is about three miles in length and one in breadth, and the writer by whom these dimensions are furnished, describes it as having "a most dreary, ugly appearance, inasmuch as naked rock and dirty mud walls are its most predominant features." The town of Seringapatam is an ill-built, mean place, with narrow streets, and houses ill ventilated, hot, and excessively inconvenient for Europeans: it is described by the author already quoted\(^3\) as altogether "a sink of nastiness." Water is, however, abundantly supplied from the river Cauvery, which washes the walls on the northern and south-west sides. The ramparts rising from the banks on those sides were the weakest parts of the defences, Tippoo Sultan injudiciously confiding in the difficulties which the river presented to assailants, though it may be forded during the dry season. In the rainy season, however, it is a great torrent, utterly unfordable; and at all times, the rapidity of the current and roughness of the bed, filled with rocks and fragments of granite, render the fording it a matter of some difficulty. The ground-plan of the inclosed space is an irregular pentagon, measuring in diameter, from south-east to the north-west angle, about one and a half miles, and three-quarters of a mile in breadth. On the east and south sides, which are not washed by the river, Tippoo Sultan erected defences,\(^4\) very massive and heavy, and, though not skilfully planned, offering such resistance to an attack, that the final and conclusive one in 1799 was made across the Cauvery, in preference to an attempt to breach those enormous masses.

4 Id. i. 63.
SERINGAPATAM.

The palace of Tippoo Sultan is within the fort, and is a very large building, formerly surrounded by a strong and lofty wall of stone and mud. It is, however, of very mean appearance, but has some spacious apartments, which, after the place was taken, were used for barracks; but, in consequence of defective ventilation, they were but indifferently suited for the purpose. The inclosing rampart of this inner work has been destroyed, and the space has been planted with trees. Contiguous is the fine and lofty temple of Sriranga, the tutelar deity; and at no great distance the ancient palace of the Hindoo rajahs of Mysore. The Shehr Ganjam, a considerable suburb detached from the fortified town, and east of it, was demolished by Tippoo Sultan on the eve of the investment of the place, lest it might afford shelter to the besiegers, but after the capture it was rebuilt with considerable regularity. The population of the island in the reign of Tippoo has been conjectured to have amounted to 150,000, all supported by the court and army, scarcely any manufactures having been established. This estimate can hardly, however, be assumed as approaching to correctness, as in 1800, the population, exclusive of the garrison and its followers, was taken to be only 31,895. The number is now much less, the place "having been abandoned as a military station, in consequence of the deadly character of an endemic fever which prevailed there, and which for several years carried off vast numbers both of Europeans and natives; and it is now fast falling into decay, and becoming every year more and more deserted." Srirangapatna, the name of which has by British usage passed into Seringapatam, is said to have been founded by Sri Rang, an ancient prince, who called it Sri Rang Patna, or the town of Sri Rang; but, according to another account, it was founded as late as 1454, by a devotee, who named it the city of Sri Ranga, or the Holy Ranga, which is considered to be one of the names of Vishnu. Native legends again ascribe its foundation to the wives of Ravana, the giant tyrant of Lanka or Ceylon, who, foreseeing his approaching destruction by Rama, caused the females of his family to escape by flying northward. No historical records, however, trace its existence earlier than 1610, when it was acquired by the Raj Wadegar, a chief of Mysore, and made the seat of his government, though there is some reason to believe it to have

9 Az. Res. iii. 357—Wilford, on Egypt and the Nile.
1 Wilks, l. 43.
been previously the residence of the viceroy of the great rajah of Vijayanagar. In 1697 it was besieged by a tumultuary army of Mahrattas, who were repulsed with great slaughter. In 1755 it was besieged by the army of M. Bussy, acting on behalf of Salabut Jung, claiming to be soubhadar of the Deccan, whose hostility was bought off by the payment of a large sum as arrears of tribute. It 1765 it was chosen by the formidable adventurer Hyder Ali as the seat of his government. In 1772 it was again besieged by the Mahrattas, who departed on receiving from Hyder Ali 15,00,000 rupees, with the promise of a like sum at a future period. In 1791, the British government being engaged in war with Tippoo Sultan, son and successor of Hyder Ali, Lord Cornwallis, governor-general and commander-in-chief, after having, without opposition, ascended the ghats by the Mugh Pass, and stormed Bangalore, arrived before Seringapatam, but from want of provisions he was obliged to relinquish the siege, and retrace his course in the direction of Bangalore. Resuming his operations in the beginning of 1792 with an army better appointed and provisioned, he signally defeated the forces of Tippoo Sultan on the north bank of the Cauvery, and having succeeded in establishing a considerable force on the island, the town and fort were nearly invested on all sides, when further hostilities were averted by the arrangement of a treaty, under which the ruler of Mysore ceded one half of his dominions, paid 3,300,000l. to defray the expenses of the war, and gave up to the custody of Lord Cornwallis two of his sons, to be detained as hostages till the conditions were fulfilled. In 1798 Tippoo Sultan was so infatuated as to seek the aid of France to overthrow the British power in India. Thereupon, in the following year, a British army, amounting to 26,802 men, with the addition of the subsidiary force of the Nizam of 10,157, and 6,000 irregular horse in the service of the same potentate, proceeded to chastise the insolent contriver of this insane design. On the 5th April, Seringapatam was invested with an ordnance train of forty battering-guns, fifty-seven field-pieces, and seven howitzers. On the 3rd of May, the British batteries had made a practicable breach; and at one in the afternoon of the succeeding day, a storming-party of 4,376 men mounted the rampart, and wheeling, one party to
the right, the other to the left, after a long and desperate con-
flict, accompanied with dreadful carnage, became masters of the
place, Tippoo Sultan himself falling by the hand, it is believed,
of a private soldier. The territory of the fallen despot, already
greatly diminished by the results of the former war with the
English, was divided, and a portion allotted to the titular rajah
of Mysore, the representative of the race which Hyder Ali had
supplanted. The island, town, and fort of Seringapatam were
retained by the British as a military station, but, being found
unsuitable, the place was subsequently, on account of malaria,
abandoned for that purpose, but still remains a possession of
the British government. Elevation above the sea 2,412 feet;
distance from Madras, W., 248 miles; from Bangalore, S.W.,
70; Mangalore, E., 130; Bombay, S.E., 515; Hyderabad, S.,
360; Calcutta, S.W., 1,045. Lat. 12° 25', long. 76° 45'.

SERINGHAM.—A town on an island formed by the
division of the river Cauvery into two streams. The island is
eighteen miles long from east to west, and nearly two in
breadth; the town is one mile and a half N. from Trichinopoly.
Lat. 10° 51', long. 78° 46'.

SEURNAL, in Gurwhal, a village on the left bank of the
Budiar, a feeder of the Jumna. It is situate amidst groves of
mulberry and apricot-trees, on a fertile expanse rising gently
up the side of a mountain. Elevation above the sea 7,265
feet. Lat. 30° 54', long. 78° 18'.

SEROHEE.1.—A small raj or state of Rajpootana, named from
its principal place. It is bounded on the north-west by the
territory of Joudpore; on the north-east by Godwar; on the
east by the territory of Mewar or Odeypore; and on the south
by the dominions of the Guicowar. It lies between lat.
24° 23'—25° 16', long. 72° 10'—73° 12', and the area is esti-
mated at 3,024 square miles. The eastern and north-eastern
parts of the territory are hilly, extending over the north-
western slope of the Aravulli, and inclining towards the desert
of Marwar, towards which numerous streams flow in a north-
westerly direction, pursuing their course to the river Loni, by
the channel of which they find their way into the Gulf of
Cutch. The southern and south-eastern part is very moun-
tainous and rugged, containing the lofty mountain Aboo, and
the various ridges branching from it. The elevation of the

2 E.I.C. Ms. Doc.

3 Sutherland, Map accompanying Political Sketches.

4 Tod, Travels in Western India,
SEROHEE.

The summit of Mount Aboo has been estimated at nearly 5,000 feet above the sea. Many splendid ruins, especially at Chandravati and on Mount Aboo, indicate the former prosperity and civilization of this state, now greatly declined. An important commercial route lying through this country from Guzerat to the great mart of Palee, in the territory of Joudpore, contributes to its reviving welfare. The annual revenue of the rao or prince is estimated at 70,000 rupees, out of which a tribute has been claimed by the state of Joudpore. The military force consists of 200 cavalry and 600 infantry, exclusive of the feudal troops of the jaghiredars, but the whole population, consisting principally of the predatory tribes Minas, Grasias, and Bheels, are armed. The rao is of the Deora subdivision of the Chauhan tribe of Rajpoots.

This state was for some time considered a district of Joudpore. Tod says, “For a few thousand rupees annually paid to the British government by Serohee, who, however, protested against being a party to its ultimate disposition, which might otherwise at some future period have again involved her independence, she was enfranchised for ever from the claims of Marwar, and now looks to the British government alone.” A treaty was formally concluded, October 31st, 1823, between that government and the rao of Serohee.

SEROHEE.†—A town of Rajpootana, on the route from Nusseersbad to Deesa, 183 miles S.W. of the former, and 67 N.E. of the latter. The present town is supposed to have been founded in 1424, and to have been named originally Sheopooree. It superseded the original city of Serohee, the ruins of which are still observable at no great distance. Since taken under British protection, Serohee has become a place of some commerce and wealth, though not many years ago it was merely an expanse of ruins. The extent of the town is rather considerable; the houses are good, and built of brick, but many are still untenanted. The palace of the rao or chief, which stands on a slightly-elevated site, has no architectural beauty to attract notice. The sword-blades manufactured at Serohee

* At only 50,000 by Sutherland. Tod obviously exaggerates in stating the amount at 300,000 or 400,000. According to a parliamentary return made in 1851, the revenue had then increased to 74,060 rupees per annum.

† Sirohi of Ali Mohammed Khan.

are celebrated for their excellence now as formerly. On this point, Ali Mohammed Khan affirms that the swords of Sirohi are celebrated everywhere; and adds, there are no better reeds than such as are procured in this country; so that they are carried to Hindoostan, Persia, and other countries for the manufacture of arrows. Distance from Mhow, N.W., 243 miles; from Oojein, N.W., 220; from Neemuch, W., 130; Agra, S.W., 360. Lat. 24° 59', long. 72° 56'.

SEROHEE.—A town in the British district of Tirhoot, presidency of Bengal, 59 miles N.W. of Purneah. Lat. 26° 25', long. 86° 57'.

Seroncha.—A town in the native state of Hyderabad, or the Nizam's dominions, situate on the left bank of the Wein Gunja river, and 142 miles N.E. from Hyderabad. Lat. 18° 55', long. 79° 56'.

Seronge.—See Sirongi.

Seroon.—A town in the British district of Ahmednuggur, presidency of Bombay, 30 miles S.W. by W. of Ahmednuggur. A road connecting the two towns was constructed in 1836, at a cost of 1,200 rupees per mile. Lat. 18° 50', long. 74° 25'.

Serowlee, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a town on the route from Bareilly to Moradabad, 20 miles W.N.W. of the former. Lat. 28° 30', long. 74° 10'.

Serraw, in the peninsula of Kattywar, province of Guzerat, a town in the prant or subdivision of Rajkote, situate 41 miles N.E. by N. from the town of Rajkote, and 94 miles S.W. from Ahmedabad. Lat. 22° 47', long. 71° 10'.

Serruvial.—A town in the British district of Madura, presidency of Madras, 38 miles E. of Madura. Lat. 9° 58', long. 78° 48'.

Serryah, in the peninsula of Kattywar, province of Guzerat, a town with a fort, in the prant or division of Hallar, on a stream called the River of Serryah. The town and fort are two miles and a half from the mouth of the river, which not admitting large ships, they are compelled to anchor in a channel between two reefs about three miles off. Notwithstanding this unfavourable circumstance, it is a place of considerable traffic. Distance from Ahmedabad, S.W., 190 miles; Baroda, W., 220. Lat. 22° 18', long. 69° 47'.
SEWALIK MOUNTAINS.

about 155 miles; in breadth, where widest, about ten. In the northern part, towards the Sutlej, the range is little more than a succession of sandhills. According to Jacquemont, "the Pinjor valley is separated from the plains by a sort of downs, from sixty metres to eighty in height, and composed of sand scarcely consolidated." The highest part is about lat. 30° 17', long. 77° 50', between the Timli and Lal Derwaza passes, and in that vicinity some of the peaks have an elevation of about 3,500 feet above the sea. The Sewalik hills have a direction parallel to the great chain of the Himalayas, with nearly a similar dip, the slope being towards the north, and the abutment to the south. In this part they rise at once in an abrupt mural front from the plain, extending to the south-west, but slope gradually on the north-east side towards the Doons, or valley lying between them and the base of the Himalaya, the strata of which they are composed dipping in that direction at an angle of from 20° to 38°. As they run in a direction from south-east to north-west, the numerous gorges by which they are crossed have a direction generally from south-west to north-east. Those gorges cut the ranges into a succession of parallel ridges, the ends of which are steep towards the plain and sloping towards the Doons. They are thus described by Dr. Royle: "In many places each hill, if separated, might be represented by a right-angled triangle, the base resting on the pass, the perpendicular facing towards the south-west, and the hypothenuse sloping towards the north-east, and corresponding in dip with the strata. This side is sometimes continued to the level of the pass; at others, another hill, with its perpendicular side, seems to arise from the middle of the last, and is itself in like manner succeeded by a third, forming a succession of abrupt and sloping sides like the teeth of a saw." In the phraseology of geologists, they are of tertiary or alluvial formation, consisting of subordinate beds of clay, loose-grained sandstone, with much mica interposing, conglomerate cemented by calcareous matter, beds of gravel and rolled stones, consisting of various kinds of rock, granite, trap, limestone, clayslate, gneiss, micaceous schists, and all other formations which enter into the composition of the Himalayas; thus offering an explanation plausible at least of the origin of the range, in the supposition that it was originally the debris...
swept down from the Himalaya, and subsequently upheaved by an earthquake of great extent and force. Parallel in some degree to the Sewalik Mountains, and inclosed between them and the Himalayas, is a succession of valleys,—north-west the Pinjor Doon, south-east that of the Kyarda Doon, and south-east of this last the Dehra Doon. The line of direction of the range is crossed by the Ganges, the Jumna, the Markunda, an offset of the Soorsutty, the Gagur, and some other streams of less importance; but in general the drainage of the Doons is parallel to the direction of the range, and either to the north-west or south-east. Thus the Pinjor Doon is drained by the Sursa, flowing north-west; the Kyarda Doon by the Batta or Bhuta, flowing south-east; the Dehra Doon by the Asun, flowing north-west, the Suswa flowing south-east. The geology of the Sewalik is characterized by the occurrence of enormous quantities of fossil remains of animals, especially mammalia. Of those the most remarkable is the Sivatherium, an extinct ruminant of gigantic dimensions, exceeding those of the rhinoceros: it was horned, and provided, like the tapir, with a short trunk. Here also have been discovered fossil remains of the family of quadruped, the existence of which in a fossilized state had previously been generally denied. The Sewalik is in many places covered with forests of saul, fir, cotton-tree, and various other kinds. Jacquemont represents it as presenting a very varied field of research to the botanist, but of uninteresting appearance, being little more than an extensive copse, dense with underwood and herbage of large growth, above which timber-trees grow at considerable intervals.

SEWAR.—A town in the British district of Sarun, presidency of Bengal, 41 miles S. by W. of Bettiah. Lat. 26° 11', long. 84° 25'.

SEWARRA.—A town in the Rajpoot state of Jodhpour, 127 miles S.W. by S. from Jodhpour, and 42 miles N. from Deesa. Lat. 24° 50', long. 72°.

SEWEHUT, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a small town on the route from Allahabad cantonment to that of Purtabgurh, in Oude, eight miles N. of the former, 23 S. of the latter. The road in this part of the route is good; the country level, and partially cultivated. Lat. 25° 36', long. 81° 55'.
SEWNA.—A town in the British district of Poonah, presidency of Bombay, 24 miles N.W. by W. of Poonah. Lat. 18° 42', long. 73° 35'.

SEWNNEE,1 in Hyderabad, or territory of the Nizam, a town near the north-east frontier, towards Nagpoor, situate on a small river tributary to the Peingunga. Distance from the city of Hyderabad, N., 200 miles; from the city of Nagpoor, S.W., 80. Lat. 20° 15', long. 78° 28'.

SEWUNGAON.—A town in one of the recently sequestrated districts of the native state of Hyderabad, 86 miles E.S.E. from Ellichpoor, and 20 miles N.E. from Omraouttee. Lat. 20° 58', long. 78° 3'.

SEWUNWARRAH.—A town in the territory of Nagpoor, 111 miles E.S.E. from Nagpoor, and 145 miles S. from Barn-gurh. Lat. 20° 45', long. 80° 50'.

SEYHUJ.—A river of Dialwa, rising in lat. 24° 27', long. 78° 26', and, flowing through Scindia's territory for about forty miles, falls into the Betwa, on the right bank, in lat. 25°, long. 78° 23'.

SEYLOO.—A town in the territory of Nagpoor, 84 miles S.W. from Nagpoor, and 81 miles E.S.E. from Ellichpoor. Lat. 20° 50', long. 78° 45'.

SEYMREE,1 in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a village on the route from Muttra cantonment to Delhi, and 18 miles² N.W. of the former. The road in this part of the route is heavy. Lat. 27° 40', long. 77° 30'.

SEYNGUR,1 called also KUROON, a small river of the Doab, rises in the British district of Allygurh, lat. 27° 50', long. 78° 12'. As its source is on the south-western side of the crest or slightly-elevated tract which stretches down the middle of the Doab,² its course, though very tortuous, generally in a south-easterly direction, tends towards the river Jumna, into which it falls, on the left side, about fifteen miles below Calpee. About sixty miles from its source, it is crossed by the route from Etawah to Futtehgurh, and is there fordable.³ It is also fordable where it is crossed, about thirty miles lower down, by the route⁴ from Etawah to Cawnpoore; and also fifteen miles still farther down, where it is crossed⁵ by the route from Calpee to Futtehgurh, in lat. 26° 28', long. 79° 34'; and is also
fordable where crossed, thirty-six miles lower down, by the route from Calpee to Cawnpore. Its total length of course is about 210 miles.

SEYRAH, in Guzerat, or the territory of the Guicowar, a town on a small river tributary to the Muhi or Mhi. Distance from the city of Ahmedabad, E., 65 miles. Lat. 22° 55', long. 73° 37'.

SHABAZPORE RIVER.—One of the mouths of the Megna, flowing east of the island of Deccan Shabazpore into the sea, in lat. 22° 27', long. 91° 3'.

SHADATPOOR, in Sinde, a town on the route from Larkhana to Gundaara, and 25 miles N.W. of the former place. It is situated in a barren tract, nearly destitute of population, and described by Kennedy as “more like the bed of a salt lagoon, in an interval of spring tides, than an inland district.” To the north-west stretches the dreary tract called the Pat or desert of Shikarpooor, noticed by the same writer as “a boundless level plain of indurated clay of a dull earthen colour, and showing signs of being sometimes under water. At first a few bushes were apparent here and there, growing gradually more and more distant, until at last not a sign of vegetable life was to be recognised.”

SHADEEABAD, in the British district of Ghazeepore, a town from which is denominated the pergunnah of the same name, is situated on the Bisu, a small river tributary to the Ganges, distant 12 miles N.W. from Ghazeepore cantonment, 32 N.E. from Benares. Lat. 25° 40', long. 83° 22'.

SHADIPOOR.—A town within the dominions of Gholab Singh, the ruler of Cashmere, nine miles N.W. from Sirinagur. and 112 miles N.E. from Jhelum. Lat. 34° 7', long. 74° 53'.

SHADOWRA.—A town in the native state of Gwalior, or territory of Scindia, 117 miles S.S.W. from Gwalior, and 92 miles N.W. by N. from Saugur. Lat. 24° 37', long. 77° 40'.

SHAGURH.—A town of Sinde, in the territory belonging to Ali Moorad, 86 miles S.E. by E. from Bukkur, and 53 miles W. by N. from Jessulmeer. Lat. 27°, long. 70° 6'.

SHAHABAD, in Cashmere, a town formerly a favourite residence of the Mogul emperors, but now ruinous and neglected. It is situated in a long narrow valley, bounded on the south-west by the Panjial of Banihal, and on the north-east

2 E.I.C. Ms. Doc. Leech, on Ind. Army, 86.
3 Kennedy, l. 190.
Vigne, Kashm. ir., l. 237.
P. Von Hugel, Kashmhir, l. 251.
by a ridge of green hills several miles in length, dividing it from the valley of Bureng or Breng. The valley in some places has a width not exceeding 1,000 yards. It is watered by a stream flowing from the celebrated spring of Vernag, and which lower down, where increased by several small feeders, is called the river Sandeman. Accounts received by Vigne represented the valley to be very rich in mines of iron and copper.

The neighbourhood of Shahabad is celebrated for its fruits, especially apples, and for its wheat, considered the finest in Cashmere. The town, when visited by Moorcroft, had a bazar and a few shops, at which provisions, coarse cloth, and very fine honey were sold. It was formerly the residence of the most powerful of the seven hereditary maleks, or wardens appointed by the emperor Akbar to watch over the passes of Cashmere. The malek of Shahabad had charge of the pass of Banihal, and enjoyed a considerable income from lands held in jaghire. Shahabad has an elevation of 5,600 feet above the sea. Lat. 33° 32', long. 75° 16'.

SHAHABAD,\(^1\) in the Rajpoot territory of Jhallowa, a town on the route from Calpee to the town of Kotah, 225 miles S.W. of former, 96 E. of latter. It has a good bazar, and water and supplies are abundant. Lat. 25° 13', long. 77° 12'.

SHAHABAD,\(^1\) in Sirhind, a town on the left bank of the Sursooti, here nearly devoid of water in winter, but sometimes in summer a deep and violent torrent.\(^2\) It is described by Jacquemont as a heap of filth and ruins, amidst which lives a population of between 2,000 and 3,000 persons. There is, however, a bazar, and supplies are abundant, as the neighbouring country is fertile and well cultivated. Distant N.W. from Calcutta 1,002 miles.\(^3\) Lat. 30° 10', long. 76° 56'.

SHAHABAD.—A town in the jaghire of Rampoor, lieutenant-governorship of the North-West Provinces. Lat. 28° 34', long. 79° 4'.

SHAHABAD,\(^1\) in the territory of Oude, a town on the route from Lucknow to Shahjehanpoor, 15 miles S. of the latter, and 30 miles N.E. of Futtahgurh. Tieffenthaler\(^3\) describes it, about A.D. 1770, "of considerable circuit; and nearly in the middle is a palace of brick, strengthened with towers like a fortress, with a vestibule and spacious covered colonnade. Most of the houses are of brick, and there is a fine mosque built of the
same material, and inclosed by a wall. The town extends a mile from north to south, its breadth is something less, but of its flourishing state little remains.” When visited by Tennant,\(^4\) A.D. 1799, it was an expanse of ruins, “that appeared in the form of hills and broken swells crumbling to dust;” yet Heber\(^5\) found it, 1824, “a considerable town, or almost city, with the remains of fortifications, and many large houses.” According to Tieffenthaler, it was founded by Angot, the nephew of Rama, king of Oude; and if so, must be of high antiquity, as Rama is considered to have reigned\(^6\) 1,600 years B.C.: hence it is sometimes called Angotpur. It was renovated by Dilawar Khan,\(^7\) an Afghan chief contemporary with Aurungzebe. At present it has a bazar\(^8\) and encamping-ground, close to which are two tanks lined with brick. The road to the north, or towards Shahjehanpoor, is good; to the south-east, or towards Lucknow, very bad. Lat. 27° 39’, long. 80° 1’.

SHAHABAD,\(^1\) in the presidency of Bengal, a British district, bounded on the north by the British districts of Ghazee-poor and Sarun; on the south-east by the British districts of Patna and Behar; on the south by the British district of Behar; on the west by the British district of Mirzapore; and on the north-west by the British districts of Benares and Ghazee-poor. It lies between lat. 24° 30’—25° 46’, long. 83° 20’—84° 56’; is 106 miles in length from north-east to south-west, and fifty-six in breadth: the area is stated at 4,403 square miles.\(^2\) About a third of the entire district, situate in its south-western part, is rough and elevated, forming a sort of highland, rising on the surface into small detached hills, nearly equal in height. The average elevation of this irregular plateau is probably about 500 feet\(^3\) above the more depressed country on the banks of the Ganges or the Sone, or about 700 feet above the level of the sea. The declivity towards the low country is very abrupt, being in many places a perpendicular precipice, formed of rock stratified horizontally, and with great regularity. The outline of the plateau is exceedingly irregular, being indented with deep ravines, down the upper extremities of which vast cascades rush during the rainy season. Access to the plateau is gained by rugged paths winding up the sides of these ravines, but those are scarcely anywhere practicable for wheeled carriages; and oxen, the principal beasts of burthen here, find

\(^8\) Garden, 234.
much difficulty in making their way even with trifling loads. In former times, the nature of the country made it very important in a military point of view, as it contained many strongholds, and amongst them the celebrated fort of Botas. The geological formation of the rock is generally sandstone horizontally stratified, of close grain, hard, very durable, and well suited for building purposes. There is also much calcareous rock, compact, and well suited for sculpture or building, and which when burned furnishes excellent lime. In the most southern part of the district, on the banks of the Sone, are mines of coal of excellent quality: alum and sulphate of iron are extracted in other places in the hills.

The climate is very sultry in the latter part of spring and the early part of summer, and the succeeding rains are usually heavy. The winters are generally mild, yet frosts are not unknown. West winds prevail for half the year, from the middle of October to that of April. There are some peculiarities in parts of the district as to winds, the notice of which would require too much minuteness.

The Carumnaasa rises a few miles from the southern frontier of the district, of which it forms the western boundary for ten miles, and subsequently the north-western for sixty miles, dividing it from the districts Mirzapoor, Benares, and Ghazeefoot: it does not appear to be navigable. The Ganges forms the north-western and northern boundaries for eighty-eight miles, dividing the district from those of Ghazeepoor and Sarun. It is navigable for craft of considerable burthen, and in the lower part of its course in this district is generally a mile wide. The Sone, flowing eastward from the district of Mirzapore, touches on this district at its south-western extremity, and, taking a direction north-easterly, forms for 110 miles its southern and south-eastern boundary, dividing it from the district of Behar; and for twenty-five miles more its eastern boundary, dividing it from the district of Patna. In the rainy season, it is too rapid for navigation above the mouth of its tributary the Kiyul, 108 miles from its confluence with the Ganges; and in the dry season is too shallow in that part of its course for boats of any considerable burthen, though floats are then conveyed downwards, being pushed over the shoals.
SHAHABAD.

Below the mouth of the Kiyul it is navigable for boats of ten or twelve tons burthen. Thus the total river navigation of the district is about 200 miles. Those principal rivers receive numerous small streams and torrents, flowing during the rainy season, but dry in some parts at other times of the year. The low country, forming the greater part of the district, is very level, especially to the north and west; and parts are liable annually to be inundated. The portion of soil unfit for the plough is very trifling; close to the hills it is excellent. The soil may be divided into two kinds, one consisting of fine sand mixed with loose mould, the other of a tenacious clay intermixed with coarse sand: the latter, on the whole, is reckoned the most valuable, producing wheat, barley, and all winter crops, without irrigation. In the northern portion of the district the soil is of the utmost richness, and consists of land regularly flooded by the Ganges. It forms the most valuable part of the district, and the crops there never fail. The river deposits a fine mould, and scarcely ever covers a field with sand.

Of wild animals, there are the tiger, bear, kohiya or wild dog, jackal, otter, monkey, nylgau (Antilope picta), sambar or Indian stag, axis or spotted deer, hog-deer, black deer, common antelope, gaur (a wild animal of the kine character). There are also several herds sprung from domestic kine, which, during desolating wars, have been allowed to run wild, and are now altogether in a state of nature. Of birds of prey, there are the jinach (a small eagle), the falcon, crane, and some others; of feathered game, the partridge, quail, peafowl, jungle-fowl, parrot, and paroquet. Crocodiles infest the Ganges and the Carumnaasa in great numbers: they are less numerous in the Sone. In the Ganges are tortoises and porpoises, and that river abounds in good fish, as also the Sone. Serpents are very numerous and dangerous in the lower tracts, and nearly 200 persons on an average perish annually by their bites.

* Prinsep states that the Sone is not navigable higher than Daudnagar, twenty miles from its confluence with the Ganges. There is obviously some error in this statement (perhaps attributable to the printer), as the distance of Daudnagar from the confluence is about three times that which is therein assigned to it.

1 Steam Navigation in British India, 48.
The lands best suited for irrigation are cropped with rice, which is considered the staple crop where it can be successfully cultivated. It is both a rubbee, or crop sown at the commencement of winter and reaped in spring, and kurreef, or that sown in the beginning of summer and reaped in autumn. Besides those already mentioned, crops of various kinds are produced for aliment or condiment, as maize, millet, maruya (Eleusine corocanus), gram (Cicer arietinum), lentils, various sorts of kidney-beans or phaecoli, till or sesame, ricinus or castor-oil seed, and some other oil-seeds, melons and other cucurbitaceous plants; most of the European garden vegetables, which thrive well in the cool season; ginger, turmeric, and capsicum. Sugar is raised to considerable extent. Of commercial crops, an important one is cotton, though attempts to introduce the profitable culture of American cotton have not been successful. Of the rest, the chief are indigo, opium, tobacco, and betel-leaf. There are several hundred square miles of jungle and forest, but the trees are stunted; and Buchanan states that in the whole district there are not ten fine trees of natural growth. Hence, timber cannot be obtained of sufficient size for houses suited for accommodating Europeans; and in the large buildings constructed by the natives, stone is exclusively used. The principal manufactures are cotton cloths, threads, tapes, strings, fabric of silk, and of mixed silk and cotton, paper, spirits, oil, the extraction of salt from brine drawn from wells, sugar, and the extraction of sulphate of iron from native mineral. The exports are principally silk, paper, cotton, and cotton cloths, wheat, millet, rice, barley, pulse, bamboos, paper, oil-seeds, opium, and some other articles of less importance; the imports are tobacco, sugar, iron, copper, lead, tin, zinc, salt, coconuts, and betel-leaf.

The population, according to an official return, is 1,600,000, which nearly agrees with another official estimate, which makes the number 1,602,274.

The principal towns, Arrah, Sasseram, Jehanabad, Buxar, and Bhojpoor, are noticed under their respective names in the alphabetical arrangement.

* By Buchanan in one place it was estimated at 1,418,780; in another, at 1,419,520; of which number, one out of sixteen is said to be Mussulman, the remainder Brahminists.
The route from Calcutta to Allahabad traverses this district in a direction from south-east to north-west. The only other important route is from east to west, from Dinapoor to Ghazeepoor.

The district of Shahabad, formerly part of the great empire of Magadha, appears to have been subjected to the sway of the Patan Mussulmans towards the close of the twelfth century, as it is recorded that Shahabuddin Muhammad, sultan of Ghor, subdued the country as far as the confines of China; and his lieutenant, Muhammed Bakhtyar, consolidated the Mussulman power in Behar. Shahabad subsequently acquired some note in consequence of being the scene of the early military operations of Sher Shah, who wrested the empire of India from Humayun, the son of Baber. It afterwards became a part of the soubah of Behar, according to the division of the empire of Delhi laid down in the Ayeen Akbery. The right of the East-India Company to the southern part of this district is derived from Shah Alum, emperor of Delhi; to the northern part, from Azoof-ud-Dowlah, vizier of Oude, under a treaty dated 21st May, 1775. This treaty was the consequence of a memorable engagement which took place at Buxar, in the north-eastern part of this district, when a decisive victory was gained by the British forces, commanded by General Munro, over the combined armies of Cossim Ali and the Vizier.

SHAH ALUM, in the Sinde Sagur Dooab division of the Punjab, a town situated on the left bank of the Indus river, 176 miles W. by N. of the town of Lahore. Lat. 32° 2', long. 71° 17'.

SHAHAPoor.—A town in the British district of Poonah, presidency of Bombay, 32 miles W.N.W. of Poonah. Lat. 18° 40', long. 73° 26'.

SHAHBAZAR, in the British district of Hoogly, presidency of Bengal, a town near the north-west frontier, towards the British district of Burdwan, four miles from the right or east bank of the Damooda. Distance from Burdwan, S.E., 16 miles; Calcutta, N.W., 86. Lat. 22° 59', long. 88° 4'.

SHAHBAZGARH, in the district of the Peshawar division of the Punjab, a town situated 26 miles N.W. from the right bank of the Indus, 35 miles N.E. of the town of Peshawar. Lat. 34° 15', long. 72° 12'.
SHAH.

SHAH BUNDER, in Sinde, in the delta of the Indus, a small place on the east bank of the channel which discharges its water into the sea by the Mull mouth. Hither the English factory was removed from Aurungabunder or Dehrajamka, in consequence of this latter place being deserted by the water of the Indus. Previously to the dissolution of the factory here in 1775, its establishment for navigating the Indus consisted of fourteen small vessels, each of about forty tons burthen. Subsequently, this place also was deserted by the stream, and, on the re-establishment of the factory in 1799, Lahoreebunder, thirty-five miles north-west, on the Buggaur, or western branch of the Indus, was selected as its site. Shah Bunder is in lat. 24° 6', long. 67° 57'.

SHAHDEERA,¹ in the British district of Agra, a village and halting-place on the left bank of the Jumna, on the route from the city of Agra to Mynpooree, and five² miles N.E. of the former. "The whole³ of this spot, as far as the eye can reach, is one general scene of ruined buildings, long walls, vast arches, parts of domes." The name is derived from its having been the spot where the sovereign first pitched his tent in his annual progress from Agra through the eastern parts of the empire. Lat. 27° 12', long. 78° 8'.

SHAHDERAH,¹ in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town on the route from Delhi to Meerut, and six² miles E of the former. It is situate near the left or eastern bank of the Doab Canal, there crossed by a brick-built bridge. Lat. 28° 40', long. 77° 21'.

SHAAHEEB,¹ in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a small town on the route from the town of Bareilly to Almora, and 19 miles N. of the former. It is situate near the right bank of the river Bhagul, here having a bed 220 yards wide, with steep banks and a sandy bottom, and in the dry season a stream sixty yards wide, and two and a half to three feet deep. There is a bazar, with a market. The road in this part of the route is good; the country level, fertile, abundantly watered,² and well cultivated, principally under wheat and pulse. Lat. 28° 33', long. 79° 23'.

SHAHGARH, in the British district of Bareilly, lieutenant-

governorship of the North-West Provinces, a town on the route from the town of Pillibheet to that of Nugeenah, and 25 miles N.W. of the former. Lat. 28° 47', long. 79° 34'.

SHAHGUR. — A town, the principal place of a raj or petty native state in the province of Saugor and Nerbudda. The territory has an area of 676 square miles, and a population of 30,000. The chief maintains a military force, consisting of 150 cavalry and 800 infantry. Lat. of town 24° 19', long. 79° 10'.

SHAH GUNJ. — A town in the British district of Mirzapoor, N.W.P. of Bengal, 41 miles S.E. of Mirzapoor. Lat. 24° 41', long. 83° 1'.

SHAHGURH, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a town on the route from Bareilly to Almora, 80 miles N. of the former. Lat. 28° 49', long. 79° 35'.

SHAHJEHANABAD. — A name given to the city of Delhi by Shahjehan, its founder. — See DELHI.

SHAHJEHANPOOR, in the territory of Gwalior, or possessions of the family of Scindia, a town of Malwa, on the route from Goona to Mow, 114 miles S.W. of former, 72 N.E. of latter. Malcolm, who designates it a large city, mentions that a considerable degree of civilization, refinement, and domestic comfort has been introduced into this place from the European settlements in Guzerat, by the Borahas, an intelligent and wealthy class of Musulman merchants. It is situate on the left bank of the river Tilir, and just above the town is ground for encampment: supplies are abundant. The revenue of the town and of the district attached to it amounts to 2,50,000 rupees, a portion of which (about 70,000 rupees) has usually been assigned to one of the princesses of the Scindia family. It received its name from its founder Shahjehan, emperor of Delhi, who reigned from the year 1628 to the year 1658. Distance S.W. from Agra 285 miles. Lat. 29° 24', long. 76° 18'.

SHAHJEHANPOOR, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town on the route from the town of Meerut to Moradabad, and 21 miles S.E. of the former. It has a bazaar, and a small mud-built fort, now fallen to decay. The road in this part of the route is indifferent. Lat. 28° 52', long. 78° 1'.

5 Central India, II. 111.
6 Malcolm, Index to Map of Malwa, 200.
SHAHEJAHANPOOR,1 in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a town on the route from Calpee to Etawa, and 122 miles N. of the former. There is a bazar, and water is obtained from wells. The road is rather good in the dry season, the country cultivated. Lat. 26° 16', long. 79° 49'.

SHAHEJAHANPORE,1—A British district under the lieutenant-governorship of the North-Western Provinces, deriving its name from its principal place. It is bounded on the north-east, east, and south-east, by the territory of Oude; on the south by the district of Furruckabad; and on the west by the British districts Budaon and Bareilly. It lies between lat. 27° 15'-28° 45', long. 79° 23'-80° 30', and contains an area of 2,483 square miles.2 The shape is very irregular, but partially resembles a crescent, the concavity being towards the west. The north-eastern frontier is formed by the river Surju or Gogra, the south-western for a short distance by the Ganges; and the descent of both rivers towards the south-east proves the inclination of the surface in that direction, towards which also flow the intervening rivers, the Goomtee, Gurrah, Ramgunga, and some others of less magnitude. The greatest elevation is at the most northern point; Burindo, twenty miles above that point, and situate on the right bank of the Gogra, having an elevation above the sea of 798 feet, and Bilheri, about ten miles lower down, 741. The southern part of the district is considerably below this, being traversed by the Gurrah, the stream of which, at Pilleebeet, sixty miles higher up, has an elevation of only 517 feet. The elevation of the bed of the Ganges, where it washes the southern frontier, in all probability falls short of 500 feet.

The most northern part, adjoining the base of the Sub-Himalaya, forms a strongly characterized portion of the Terrai, or tract of marshy forest and jungle stretching along the foot of the mountains. Numberless small streams, oozing from the hills, or rising from beneath, stagnate,3 in consequence of the inclination of the surface being too slight to allow the escape of their waters, and their own want of force to cut channels. These, saturating the deep and fertile soil, give growth to gigantic trees, woven together by immense creepers, encumbered above with air-plants, and below with impenetrable underwood.

---

1 E.I.C. Ms. Doc.
2 Parliamentary Return, 1861.
Grasses, and other herbage, attaining a height of ten feet, overrun the more open parts, and are annually fired, to allow the spring of a more succulent growth, which is depastured by numerous herds of kine and buffaloes for about two months, after which they cease to be penetrable or suitable for grazing. Throughout the entire region broods a malaria, almost inevitably fatal to the human race and to domestic animals, but not incompatible with the constitution of the elephant, the rhinoceros, wild buffalo, stag, tiger, panther, leopard, and other wild creatures, which in the densest recesses of the forest and jungle attain extraordinary size and vigour. This tract gives rise to the Goomtee, a large river, which, pursuing a southerly course, crosses the frontier into the territory of Oude. As there is a general slope to the south-east, this “region of death” might obviously be made productive by drainage and cultivation; but the first steps in the operation would be marked by a frightful sacrifice of human life. At present the tract is available only for pasturage during a very brief period, as already mentioned, or to yield timber and other forest and jungle produce.

Bishop Heber states that, including the wooded part of the Terrai, there is “a large forest along the whole eastern, southern, and northern frontiers.” He found the southern part of the district to have a fine climate, little incommoded by the hot winds, with a well-wooded, fertile, and highly-cultivated soil, producing in profusion rice, maize, wheat, cotton, sugar, tobacco, pulse, mangoes, dates, plantains, walnuts, strawberries, grapes, apples, and pears. The people, though in general skilful and industrious agriculturists, are much annoyed by a set of “landless resolutes,” the descendants of Rohilla chiefs, and at once too lazy to work, and too proud to enlist in the East-India Company’s service. The land revenue of this district has been fixed for a term of years, which will expire in 1868. The latest official returns (1848) give to this district a population enumerated as follows:—Hindoo, agricultural, 436,166; non-agricultural, 124,420; Mahomedan and other classes, agricultural, 134,520; non-agricultural, 117,482: total, 812,588. The relative proportion of the two great divisions, therefore, is between three and four Hindoos to one of any other class. Of the whole population, 812,588, the
children numbered 279,392, leaving an adult population of 533,196; the children having been counted as such up to twelve or thirteen years of age, if unmarried; if married below that age, they were considered as adults. The number of houses was stated to be 150,481, which gives an average per house, on the total population, something above five persons.

The principal towns are Shahjehanpore, Powain, Tilher, and Jalalabad, which will be found noticed in their proper places. The following is a classification of the towns and villages in the district:—Number containing less than 1,000 inhabitants, 2,062; ditto more than 1,000 and less than 5,000, 108; ditto more than 5,000 and less than 10,000, 3;* ditto more than 50,000, 1.†

Shahjehanpore formed part of the possessions of the Rohilla Patans previously to 1774, when their dominion was overthrown by the signal defeat² which they received at Teseunah from the British army supporting the cause of Shooja-ud-Dowlah, the nawaub of Oude. The country about Shahjehanpore, with a much more extensive portion of Rohilcund, was then transferred to the nawaub, and ultimately, in 1801, ceded³ in commutation of subsidy to the East-India Company.

SHAHJEHANPORE.¹†—The principal place of the British district of the same name. It is situate on the left bank of the Gurrah, which, near the town in dry weather, may be forded,⁴ but in the rains can be crossed only by ferry. Bishop Heber describes⁵ this town as a “large place, with some stately old mosques and a castle. These are mostly

* Jullalabad, 5,031 inhabitants; Powain, 5,245; Pulleea, 6,507.
† Shahjehanpore, 62,785.
‡ Shahjehan, a renowned emperor of Delhi, and Pur, “town”;—Shahjehan Town.

§ Such are the present modes of passing the river, as given by Garden from the latest accounts. It appears to have been different at the time of Heber’s visit, 1824:—“At the entrance to the town I passed the river Gurrak (Gurrah), a quiet winding stream, over a little mean bridge, by the side of a much more splendid one, begun some months since at the expense of the ex-minister of Oude, the Hukeem Mendee, who has a house and considerable property within the British frontiers in this district. The bridge would, if completed, have been a very good and extensive one, but is now much dilapidated, a great part of the unfinished work having fallen in during the rains.”
ruinous, but the houses are in good plight. The bazaars show marks of activity and opulence." * The population, according to a recent census, amounts to 62,785.¹ Shahjehanpore is in lat. 27° 52', long. 79° 58'.

SHAHJUHANPOOR, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pergunnah of the same name, on the route from Goruckpoor to the Sarun collectorate, 30 miles E. of the former. Lat. 26° 40', long. 83° 53'.

SHAHJUHANPOOR, in the British district of Gooergaon, lieutenant-governorship of the North-West Provinces, a town, the principal place of a pergunnah of the same name, situate 62 miles S.W. of Delhi. Lat. 28°, long. 76° 32'.

SHAH JUMAUB, in the Daman division of the Punjab, a town situated on the right bank of the Indus, 56 miles S.W. of the town of Mooltan. Lat. 29° 37', long. 70° 49'.

SHAHJUHANPOOR, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pergunnah of the same name, situate 62 miles S.W. of Delhi. Lat. 28°, long. 76° 32'.

SHAH NUHUR CANAL flows out of the Ferozeshah Canal in lat. 29° 28', long. 76° 54', and joins it again in lat. 28° 50', long. 77° 4'.

SHAHPOOR, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on the left bank of the Jumna, 40 miles W. of the city of Allahabad. From this place the pergunnah or subdivision in which it is situate is called also that of Shahpoor. Lat. 25° 23', long. 81° 15'.

SHAHPOOR, in the Baree Dooab division of the Punjab, a

* Hamilton¹ says, "In 1813 this town was esteemed more wealthy and nearly as populous as Bareilly; so that probably an allowance of 50,000 inhabitants does not exceed the truth." From the official return given in the text, it will be seen that at present such an allowance would fall short of the truth.

¹ East-India Gazetteer, ii. 528.
town situated on the left bank of the Ravee, 16 miles S.S.W. of the town of Lahore. Lat. 31° 24', long. 74° 12'.

SHAHPOOR.—A town within the dominions of Gholab Singh, the ruler of Cashmere, eight miles E. of the left bank of the Jhelum river, and 93 miles S.W. from Sirinagur. Lat. 33° 5', long. 73° 53'.

SHAHPOOR, in Sirhind, a village on the route from Suhranpoor to Subathoo, and 31 miles N.W. of the former place. Here was a secondary station in the trigonometrical survey of the Himalaya. Elevation above the sea 1,228 feet. Lat. 30° 17', long. 77° 22'.

SHAHPOOR, or PADSHAHPUR, in the British collectorate of Belgaum, presidency of Bombay, a town situated on the river Gutpurba, 50 miles N.W. of the town of Dharwar. The population is estimated at between 6,000 and 7,000. Lat. 16° 8', long. 74° 45'.

SHAHPOOR.—A town in the native prant of Rajkote, in the peninsula of Kattywar, province of Guzerat, 54 miles N.E. by E. from Rajkote, and 42 miles W.S.W. from Ahmedabad. Lat. 22° 51', long. 71° 59.

SHAHPOOR, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Azimgurh, 25 miles S. by W. of the former. Lat. 26° 21', long. 83° 17'.

SHAHPOOR, in the British district of Ramgurh, lieutenant-governorship of the North-West Provinces, a town on the route from Ramgurh to Rewah, 18 miles N. by E. of the former. Lat. 23° 3', long. 81° 3'.

SHAHPOOAR, in the Rajpoot state of Jeypore, a town on the route from Delhi to Mhow, 125 miles S.W. of former, 882 N.E. of latter. It is of considerable size, and is surrounded by a rampart. Lat. 27° 25', long. 76° 12'.

SHAHPOORAH, in the British district of Ramgurh, lieutenant-governorship of the North-West Provinces, a town on the route from Ramgurh to Bijawur, 32 miles N.W. of the former. Lat. 23° 11', long. 80° 45'.

SHAHPOOR KUBRA, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Azimgurh, 12 miles S. of the former. Lat. 26° 31', long. 83° 23'.
SHAHRUH.—A town in the native state of Gwalior, or territory of Scindia, 100 miles S.E. by S. from Oojein, and 82 miles N.W. by W. from Ellichpoor. Lat. 21° 51', long. 76° 31'.

SHAHZADAHNU GAR, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a town on the route from Agra to Bareilly, and 34 miles S.W. of the latter. There is abundance of water from the river Yarwuffadar or Sot, and from wells. Supplies are plentiful from the bazar and from the neighbouring villages. The road in this part of the route is good; the country partially cultivated, but in some places overspread with jungle. Lat. 28° 7', long. 79° 7'.

SHAHZADPOOR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore, and 26 miles W. of the latter. The road in this part of the route is rather good. Lat. 26° 22', long. 80° 2'.

SHAILGAON.—A town in the native state of Hyderabad, or territory of the Nizam, 124 miles N.W. from Hyderabad, and 122 miles E. from Ahmednuggur. Lat. 19° 4', long. 76° 38'.

SHAIRMADAVY.—A town in the British district of Tinnevelly, presidency of Madras, 10 miles W.S.W. of Tinnevelly. Lat. 8° 40', long. 77° 36'.

SHAKAPORE, in Sinde, a town on the great route from Cutch to Hydrabad. About a mile north-east of the town are the ruins of a large city, built of excellent burnt brick, and still in such a state of preservation that the walls and bastions are plainly discernible. To the north-east of these ruins is the large bed of a great branch of the Indus, now completely devoid of water. Shakapore has, at this time, no pretensions to importance either in point of wealth or population. Lat. 24° 34', long. 68° 24'.

SHALKUR, in Bussahir, a fort near the northern boundary of Koonawar, where the valley of the Spiti river has a less inclination of slope. It is situate on the right bank of the Lee, or river of Spiti, the site being the summit of a diluvial deposit, and elevated 400 feet above the stream, which here, 92 feet wide, is crossed by a sango or rude wooden bridge, made of trunks of the fir-tree. The fort is 300 feet long in a direction from north to south, but very narrow, and is ill built of loose stones and unburnt brick; but the position is command-
SIIA.

ing, being on the very brink of the lofty bank, having a declivity of $35^\circ$ to the water; and to the north and west are similar natural scarpes to a rivulet; so that it is accessible easily only from the south, in which direction there are a few houses and fields. Inside are houses all round the walls, with a small space in the middle. The population consists of twenty Tartar families, and ten monks and five nuns of the Lamaic mode of belief, residing in their respective communities. The crops here are wheat, barley, buckwheat, millet, turnips, pulse; and there is a profusion of fine apricots. Elevation above the sea 10,413 feet.* Lat. $32^\circ$, long. $78^\circ 34'$.

SHALLEE, in the hill state of Bhuggee, a lofty peak about four miles south of the left bank of the Sutluj, is very difficult of access on account of its steepness. On the summit is a wooden temple, in which human sacrifices were formerly offered to the Hindoo goddess Kalee; and some maintain that the horrible rite secretly is continued, notwithstanding its prohibition by the British government. Elevation above the sea 9,623 feet.² Lat. $31^\circ 11'$, long. $77^\circ 20'$.

SHALWI, in the hill state of Joobul, a river having its sources on the south-eastern declivity of the great range stretching from the peak of Chur to that of Wartu, and in about lat. $31^\circ 3'$, long. $77^\circ 36'$. Holding its way in a south-easterly direction through an elevated and densely-wooded valley, and being swollen with numerous feeders right and left, it, after a course of about twenty-five miles, falls into the Tonse river, in lat. $30^\circ 48'$, long. $77^\circ 49'$. In the upper part of its course, where it is called the Koti Nala, it is described by Fraser as a fine copious stream.

SHAMGHUR, in Sirhind, a village on the route from Kurnal to Loodiana, and five miles N.W. of the former town. It is situate on the edge of a jungle, which stretches the whole distance to Kurnal.² Though the greater part of the population are Mussulmans, or Hindoos of the Jat denomination, the village with the surrounding country belongs to a chief of the

* According to Gerard, Table iii. No. 108, at the end of his work on Kunawur; 10,403 according to his map; 10,998 according to Herbert,¹ whose measurement is less to be trusted than that of Gerard: the former observed by the boiling-water point,¹ and in haste; the latter at greater leisure, and with excellent barometers.
protected Sikhs, to whom it yields an annual revenue estimated at 550l. sterling. Shamghur is distant N.W. from Calcutta 970 miles.\(^3\) Lat. 29° 45', long. 76° 57'.

SHAMGURH, in the British district of Mairwara, lieutenant-governorship of the North-West Provinces, a town on the route from Nusseerabad to Jallor, 24 miles S.W. by W. of the former. Lat. 26° 8', long. 74° 32'.

SHAMLEE,\(^1\) in the British district of Muzuffurnugur, lieutenant-governorship of the North-West Provinces, a town on the route from Muzuffurnugur to Jheend, 22 miles W. of the former. Shamlee has a population of 8,447 inhabitants.\(^2\) Lat. 29° 26', long. 77° 23'.

SHANDAMANGALUM.—A town in the British district of Salem, presidency of Madras, 24 miles S. by E. of Salem. Lat. 11° 19', long. 78° 18'.

SHAPOREE.—An island off the coast of Arracan, fronting the entrance of the Naaf river. The centre of the island is in lat. 20° 46', long. 92° 24'. This island in 1823 was in the occupation of the British, when the Burmese, who then possessed Arracan, demanded its surrender. The requisition was followed up by the despatch of troops under the rajah of Ramree, who attacked and captured the island on the 24th September. This, with other encroachments on the part of the Burmese, led to the first British war with that nation, in 1824.

SHAPORAH.—A town in the Rajpoot state of Oodeypoor, 104 miles N.E. from Oodeypoor, and 62 miles S.S.E. from Ajmeer. Lat. 25° 37', long. 75°.

SHABA.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the right bank of the Senge Khabab, or Indus river, and 192 miles N.E. by E. from Jamoo. Lat. 33° 50', long. 77° 57'.

SHARGODA.—A town in the British district of Ganjam, presidency of Madras, 32 miles W.N.W. of Ganjam. Lat. 19° 32', long. 84° 40'.

SHATUL PASS,\(^1\) in Bussahir, on the route from Chooara to Koonawar, over the most southern ridge of the Himalaya, here running in a direction from east-south-east to west-northwest. It is excessively dangerous,\(^2\) not only on account of the deep snow from which it is never free, but also the furious cold winds, which so refrigerate the surface of the body and the

\(^1\) Garden, Tables of Routes, 172. E.I.C. Ms. Doc.
\(^3\) E.I.C. Trigon. Surr.
\(^4\) Lloyd and Gerard, Tours in Himalaya, ii. 287. Transact. Roy. As. Soc. i. 344.
lungs, as to cause the death of many who attempt the passage. The formations at the summit are chiefly mica-slate, gneiss, and granite. Gerard, who encamped on the crest of the ridge, found the thermometer there at sunrise, on June 9th, eight degrees below the freezing-point. The snow was covered with a species of musquito, apparently dead, but restored to life and activity when exposed to the rays of the sun. The elevation of the pass is 15,554 feet above the sea. Lat. 31° 23', long. 78° 3'.

SHAWCOTTA.—A town in the British district of Madura, presidency of Madras, 44 miles E.N.E. of Madura. Lat. 10° 7', long. 78° 47'.

SHAWPOOR.—A town in the British district of Tannah, presidency of Bombay, 46 miles N.E. of Bombay. Lat. 19° 27', long. 73° 21'.

SHAWPOOR.—A town in the native state of Hyderabad, or territory of the Nizam, 119 miles S.W. by W. from Hyderabad, and 93 miles S.E. from Sholapoor. Lat. 16° 40', long. 76° 56'.

SHAYAK.—A town within the dominions of Gholab Singh, the ruler of Cashmere, 187 miles E. by N. from Serinagur, and 186 miles N.E. by N. from Kangra. Lat. 34° 13', long. 78° 17'.

SHAYLODE.—A town in the British district of Malabar, presidency of Madras, 50 miles E.S.E. of Cannanore. Lat. 11° 34', long. 76° 6'.

SHAZADAPoor, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on the route from the city of Allahabad to that of Futtehpore, and 352 miles N.W. of the former. It is half a mile from the right bank of the Ganges, and is described by Tieffenthaler, a century ago, as consisting of one long street, and having at its north-western extremity a serai or public lodging-house for travellers, strongly and well built, resembling a quadrangular fort, with a tower at each corner. The road in this part of the route is heavy and bad, the country level and well cultivated. Lat. 25° 40', long. 81° 28'.

SHAZADPORE, in the territory of Oude, a town on the route from the cantonment of Goruckpore to that of Sultanpoor, 732 miles S.W. of the former, 37 N.E. of the latter. It is situate on the river Tons (North-eastern), here crossed by a
brick-built bridge 400 yards long. Supplies are abundant here. The road in this part of the route is bad, the country well wooded and cultivated.* Lat. 26° 24', long. 82° 28'.

SHAZADPORE.—A town in the British district of Pubna, presidency of Bengal, 28 miles N.E. by E. of Pubna. Lat. 24° 12', long. 89° 36'.

SHEALBA, in Gurhwal, a village on the right bank of the Jumna, is situate near the confluence of the Budeear, a feeder of that river. The surrounding country, thinly covered with pine-trees, is moderately level and fertile, and bears traces that cultivation was formerly carried on to considerable extent. The present desolation is the result of the devastations of the Goorkhas. Lat. 30° 50', long. 78° 20'.

SHEALLY.—A town in the British district of Tanjore, presidency of Madras, 51 miles N.E. of Tanjore. Lat. 11° 15', long. 79° 48'.

SHEANKRA.—A town of Malwa, in the native state of Tonk, 11 miles S.S.W. from Tonk, and 81 miles E.S.E. from Ajmeer. Lat. 26°, long. 75° 54'.

SHEBEE, in Bussahir, a village of the district of Koonawar, is situate in the valley of Ruskulung, near the left bank of the river Darbung. Close to the village is a copper-mine, but it has not been worked for some years. The village is inhabited by a few monks and nuns of the Lamaic religion. Elevation above the sea 9,800 feet. Lat. 31° 47', long. 78° 29'.

SHEDBAL, one of the southern Mahratta jaghires, the centre of which is in lat. 16° 38', long. 74° 47'. Its chief derives from it a revenue of 12,359£, and maintains a force consisting of sixty-eight cavalry and 212 infantry. He was formerly bound to furnish a contingent of cavalry for the service of the British government, but has now commuted the obligation for a money payment.¹

SHEEKUR, in the Rajpoot state of Jessulmere, a village on the route from the town of Beekaneer to that of Jessulmere, and 75 miles N.E. of the latter place. It is situate in a wooded

* This place appears to be identical with Sahjadpur, of which a notice is given by Butter;¹ but as this writer omits to lay down the lat. and long. of the places which he describes, there must be some uncertainty on the point. "Sahjadpur,¹ a town in Aldemau. Population 3,000, of whom two-thirds are Musulmans, and a large proportion weavers."
undulating country, and contains fifty houses, supplied with water from a well 220 feet deep. The road in this part of the route is alternately stony and sandy. Lat. 27° 6', long. 72° 10'.

SHEELGANWA.—A town in the Rajpoot state of Jodhpoor, 58 miles N.E. by N. from Jodhpoor, and 70 miles W.N.W. from Ajmeer. Lat. 26° 56', long. 73° 42'.

SHEEMOGA,* or SIMOGA,1 in the territory of Mysore, a town on the left or north-west bank of the river Toonga, here broad and navigable2 downwards during the rainy season. In 1792,3 it was besieged by the Mahrattas, aided by an auxiliary force of the Bombay army, commanded by Captain Little. As a Mysorean force, commanded by Muhammed Reza, a relative of Tippoo Sultan, was posted in the vicinity ready to attack the besiegers as soon as engaged by active operations, Captain Little advanced against them at the head of 750 sepoys, and completely defeated them,4 though very strongly posted, and greatly superior in force, which was estimated5 at 10,000 foot, 1,000 horse, ten guns, and thirteen elephants. The Mysorean army was quite dispersed, having lost a great number of men and all their guns, ammunition, baggage, and a quantity of small arms, and in a few days the town and fort surrendered. At this period, the east side of the fort was during the rains washed by the Toonga, and the other three sides had an indifferent ditch, twenty feet wide and twelve deep, the other defences being likewise injudiciously constructed. The town was then estimated to contain 6,0006 houses, and, according to the usually-received ratio of inmates to houses, above 30,000 inhabitants. The town was destroyed by the Mahrattas. At the time of Buchanan’s visit, the town was estimated to contain 500 houses, and was said to be increasing fast.7 Distant from Bangalore, N.W., 150 miles; from Seringapatam, N.W., 130; Mangalore, N.E., 90; Madras, W., 325. Lat. 13° 56', long. 75° 37'.

SHEERGURH, in the British district of Muthra, lieutenant-governorship of the North-West Provinces, a town on the route from Muthra to Delhi, 20 miles N. by W. of the former. Lat. 27° 46', long. 77° 40'.

SHEERWUL.—A town in the British province of Sattara, * Shivamogay and Simoga of Buchanan.
presidency of Bombay, 32 miles N. of Sattara. Lat. 18° 9', long. 74° 1'.

SHEESGURH, in the British district Bareilly, lieutenant-governorship of the North-West Provinces, a small town on the route from the town of Bareilly to Almora, and 34 miles N. of the former. It is situate on an inconsiderable eminence, seen afar in this level country, and rendered more conspicuous by a ruinous fort on its summit. It is well supplied with water, and has a bazaar and market. The road to the north, or towards Almora, is bad; to the south, towards Bareilly, rather good; the country open and well cultivated. Lat. 28° 43', long. 79° 23'.

SHEEVAROY HILLS.—See Salem.

SHEIKHBUDEEN, in the Daman division of the Punjab, a town situated 15 miles W. from the right bank of the Indus, 130 miles S.S.W. of the town of Peshawar. Lat. 32° 18', long. 70° 58'.

SHEIKPOORA, in the British district of Monghyr, presidency of Bengal, a town situate at the foot of a hill, on the route from the city of Monghyr to that of Behar, 40 miles S.W. of former, 20 E. of latter. Here is a thana or station for a police-division of the same name. “It is a filthy, ugly place, inhabited by a very bad set of natives, who commit crimes and wickedness of every kind.” Lat. 25° 10', long. 85° 57'.

SHEKAWUTTEE, in Rajpootana, a state, or rather collection of small states, dependent upon Jeypore. It is bounded on the north-west by Bikaneer; on the north-east by Loharoo and Jhujhur; on the south-east by Jeypore and Patun; and on the south-west by Joudpore. It lies between lat. 27° 20'—28° 33', long. 74° 52'—76° 10'. It is ninety-five miles in length from north-east to south-west, and sixty-three in breadth in the direction of the opposite angles. The area is 3,895 square miles. It is an arid, barren tract, consisting, with little exception, either of sandy wastes, or rocky hills and mountains. The latter are in the south and south-eastern parts of the territory, being a continuation of the hills commencing a short

* Shekhawati of Busawun Lal; Shekhawuttee of Elphinstone; Shekhawatee of Boileau; Shekhavati of Tod.
distance south-west of Delhi. They are in some parts metaliferous, especially in the vicinity of Singhana, where copper-mines have been worked from time immemorial. The sands are not totally unproductive, being sprinkled with tufts of babul (Acacia vern), kuril (Capparis aphylla), and phok.* The Katuree, which is almost the only river, crosses the south frontier from the territory of Jeypore, traverses Shekawuttee from south to north, flowing into the territory of Bikaneeer, and is there lost in the sands. The most productive parts of the territory are the valleys among the rocky hills in the south-eastern part. There the soil is rather fertile, and the wells being of no great depth, the rubbee, or crop reaped in spring, is abundant. It consists of wheat, barley, and some other grain, pulse, red pepper, and bhang or hemp, yielding an intoxicating resin. The sandy part of the country produces so little vegetation suitable for human sustenance, that great numbers of the people are obliged to subsist occasionally on the seeds of bhurt, a species of strong bur.

The population, though of Rajpoot descent, appear to follow a mongrel religion, and to have engrafted some Mahomedan points of belief, or at least of observance, on their original Brahminism. Hog’s flesh is considered unlawful food, and on the birth of every male child the Mussulman profession of faith is repeated; but on the same occasion a goat is sacrificed, and the infant sprinkled with the blood. This hybrid and semi-barbarous population have been inveterate freebooters; and the avocation seems to have thriven with them, as, though their country is little productive, it contains several towns. The most important of these are Sikur, Khundhaila, Futtehpoor, Lutchmangah, Khetri, Goodah, Jhunjhuna, and Singana. The revenue of Shekawuttee, according to Todd,* was 23,00,000 rupees.

Before the firm and regulating influence of British authority

* A plant peculiar to these sandy wastes, where it is very serviceable.

It is “from four to five feet high, quite green, although it has no leaves. Its branches run into slender twigs, which terminate in bunches of the same material, but still softer and fuller of sap. It bears clusters of flowers, which are eaten by the natives, and has its seed in a pod. It is the favourite food of the camel, whom it in some measure indemnifies for the long privation of water which he is often obliged to suffer in the desert.”
was recognised here, there appears to have been little or nothing deserving the name of government. The territory was partitioned among many thakoors or petty chiefs, the highest influence being exerted by five, who claimed to be descended from Shekji, a scion of the Rajpoot family reigning at Amber. Shekji, about the beginning of the fifteenth century, succeeded in wresting the greater part of Shekawuttee from the ruler of Amber, to whom it had previously belonged; but in the early part of the eighteenth, it was recovered by the celebrated Jey Singh, founder of the city of Jeypore. Subsequently, the disturbed state of the country required the intervention of the British government, and after some movements of less importance, an adequate force was, in 1834, sent into the country, the most important forts and posts taken, and efficient means adopted for enforcing order. Towards the close of the year, the British force having effected its object, was withdrawn, but the freebooters again proving occasionally troublesome, further measures became necessary; and with a view to the preservation of order, as well as of providing honest employment for part of the predatory population, a body of irregular cavalry was raised, and for some time maintained at the expense of the chiefs. This body, known as the Shekawuttee brigade, is now a British force, and the native chiefs have been for some years relieved from any charge on account of it. Its cavalry and artillery branches have been disbanded.

SHEKHASIR, in the Rajpoot state of Jesulmeer, a decayed village on the route from the town of Beekaneer to that of Jesulmeer, and 95 miles N.E. of the latter. It is important merely on account of a good supply of water from a tank. The road in this part of the route is good, through an open country. Lat. 27° 12', long. 72° 14'.

SHEKHPOOR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Calpee to Etawa, and nine miles N. of the former. The road in this part of the route is rather good in dry weather, the country cultivated, though in some places cut up with ravines. Lat. 26° 13', long. 79° 48'.

SHEKOABAD,* in the British district of Mynpoorie, a

* Shikohabad of Tassie: "Town of Majesty," from Shukoh, "majesty," and Abed, "town." Hamilton states that this town was named after

town on the route from Agra to Etawa, and 82\(^2\) miles N.W. of the latter. It has a good bazar, and is supplied with water from wells. The road in this part of the route is good, the country in some places uneven from sandhills, but cultivated, and studded with small villages. Lat. 27° 6', long. 78° 39'.

SHEKUL.—A town in the British district of Madura, presidency of Madras, 60 miles S.E. of Madura. Lat. 9° 15', long. 78° 43'.

SHEMAR, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village on the route up the course of the Ramgunga (Eastern), from Petorahgurh to the Unta Dhura Pass, 14 miles N. of Petorahgurh, half a mile E. of the left bank of the Ramgunga. Lat. 29° 47', long. 80° 12'.

SHEM DEO, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a Hindoo temple on a summit of the Sub-Himalaya, or mountain system south of the main range, east of Almorah cantonment 11 miles. Elevation above the sea 6,760 feet. Lat. 29° 37', long. 79° 62'.

SHENCOTTA.—A town in the British district of Tinnevelly, presidency of Madras, 49 miles N.E. by N. of Tinnevelly. Lat. 9° 17', long. 78° 10'.

SHEO, in the Rajpoot state of Jodhpour, a town on the route from Jessulmere to Balmeer, and 36 miles N. of the latter. It is the capital of an extensive but barren district, subdivided among numerous thakoors or feudatories, who pay little deference to the rajah of Jodhpoor's governor, stationed here with four guns and a small detachment of soldiers. There are 200 houses, and a thanah or police-office. Water is obtained from a fine tank on the north-west side of the town, and from seven wells forty feet deep. The road in this part of the route is good. Lat. 26° 12', long. 71° 14'.

SHEOGANGUNJE,\(^1\) in the British district of Jounpoor, lieutenant-governorship of the North-West Provinces, a town on the route from the cantonment of Jounpoor to Purtab-gurh, 26\(^2\) miles W. of the former, 22 E. of the latter. It has

Dara Sheko, the eldest son of Shah Jehan, padshah of Delhi. Dara Sheko was excluded\(^3\) from the throne, defeated, and put to death by his younger brother Aurungzebe.

458
SHE.

a bazar, and is well provided with water. Lat. 25° 46', long. 82° 14'.

SHEOPPOOR, in the British district of Benares, a town on the route from Benares to Jounpoor, three miles N.W. of the former, 34 S.E. of the latter, five N.W. of the left bank of the Ganges. Lat. 25° 21', long. 88° 1'.

SHEOPPOOR, in the territory of Gwalior, or possessions of Scindia's family, a town near the western boundary, towards the Jeypore territory. It is the principal place of a pergunnah, the annual revenue of which is estimated at 3,25,000 rupees. It was formerly the capital of a small Rajpoot principality, but in the early part of the present century was subjugated by the forces of Doulut Rao Scindia. In 1816, when garrisoned by Scindia's general Baptiste with 200 men, it was surprised and taken by escalade by the celebrated Rajpoot chief Jey Singh, who had only sixty men. The captor seized a large amount of treasure, and made the family of Baptiste prisoners. Lat. 25° 38', long. 76° 48'.

SHEOPPOOR DEAR, in the British district of Ghazeeoor, lieutenant-governorship of the North-West Provinces, a town two miles from the northern bank of the Ganges, and five miles S.E. from Bulliah. Sheopoor2 contains a population of 6,382. Lat. 25° 40', long. 84° 18'.

SHEOPPORE, in the British district of Benares, lieutenant-governorship of the North-West Provinces, a town on the route from Benares to Jounpoor, three miles N.W. of the former. Sheopore contains a population of 8,093. Lat. 25° 21', long. 88° 1'.

SHEORAJPOOR, the principal place of the pergunnah of the same name, a small town, with a bazar, on the route from Cawnpore to Futehghurh, and 21 2 miles N.W. of the former. The road in this part of the route is indifferent. Lat. 26° 41', long. 80° 12'.

SHERADONE.—A town in one of the recently sequestrated districts of the native state of Hyderabad, 172 miles W.N.W. from Hyderabad, and 60 miles N. from Sholapoor. Lat. 18° 31', long. 76° 13'.

SHERBAL.—See SHERBAL.

SHHERECOTE, in the British district of Bijnour, division of Bohilcund, lieutenant-governorship of the North-West

SHE.

Provinces, a town, the principal place of a pergunnah or subdivision of the same name, is situated on the river Koh. Elevation above the sea 653 feet; distance N.W. from Calcutta 920 miles, from Moradabad 40. It contains a population of 11,244 inhabitants.\(^2\) Lat. 29° 20', long. 78° 38'.

SHEREGURH, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a town on the route from Bareilly to Almora, 20 miles N. of the former. Lat. 28° 40', long. 79° 27'.

SHERGOTTY,\(^1\) in the British district of Behar, a town, the principal place of a thana or police division of the same name. It lies on the route from Hazareebagh to Benares, 58² miles N.W. of former, 131 S.E. of latter. It is situated on a small island formed by a tributary* of the river Poonpun. There are several bungalows or lodges,\(^3\) formerly occupied by officers of the government when the place was a civil station. The number of houses is estimated at 1,019; and admitting the usually-received ratio of inmates to houses, the population may be assumed at 6,100 persons. The town is distant 20 miles S.W. of Gayah. Lat. 24° 33', long. 84° 51'.

SHERGURH.—A town in the Rajpoot state of Jeypoor, 74 miles S.E. by S. from Jeypoor, and 121 miles E. by S. from Ajmeer. Lat. 26° 2', long. 76° 35'.

SHERGURH (Fort of), in the British district of Shahabad, presidency of Bengal, 20 miles W.S.W. of Sisseram. Lat. 24° 50', long. 83° 49'.

SHERKHANWALA,\(^1\) in Sirhind, a village on the route from Lodiana to Ferozpoor, and nine² miles E. of the latter town. It contains a few shops, and has an abundant supply of good water from three brick-lined wells, each about thirty feet deep. The surrounding country is barren, wild, and overrun with jungle. The road in this part of the route is good, and practicable for carriages. Distant N.W. from Calcutta, by Delhi and Munuk, 1,159 miles. Lat. 30° 56', long. 74° 42'.

SHETTYKAIRA.—A town in the native state of Mysore, 62 miles S. by E. from Chittel Droog, and 66 miles N. from Seringapatam. Lat. 13° 21', long. 76° 38'.

SHEU, in Bussahir, a pass on a ridge projecting northwards from the most southerly range of the Himalaya, and subordinate

Voyages, iii. 312.
SHE—SHI.

to it. The route from the Burenda Pass, northwards, into Koonawur, lies over the Sheu. The extreme elevation at which birches were found to grow was 12,800 feet, and pines 12,000. The highest cultivation, which was that of buckwheat, was 10,650 feet above the sea. The elevation of the pass itself is 13,350 feet. Lat. 31° 24', long. 78° 13'.

SHEVAGUNGA.—A town in the British district of Madura, presidency of Madras, 26 miles E. by S. of Madura. Lat. 9° 51', long. 78° 33'.

SHEVLY.—A town in the native state of Hyderabad, or territory of the Nizam, 130 miles S.W. from Ellichpoor, and 111 miles E.N.E. from Ahmednuggur. Lat. 19° 46', long. 76° 18'.

SHEWAR,¹ in the British district of Benares, lieutenant-governorship of the North-West Provinces, a village on the left bank of the Ganges, 666 miles² by water N.W. of Calcutta, or 843 by the Sunderbund passage; three miles N. of the city of Benares, or lower down the stream. Lat. 25° 21', long. 83° 8'.

SHEWE ZUTO.—A town of Burmah, 18 miles W. from the right bank of the Irawady, and 151 miles S.W. from Ava. Lat. 20° 14', long. 94° 25'.

SHEWHUR.—A town in the British district of Sarun, presidency of Bengal, 28 miles N. by W. of Mozufferpoor. Lat. 26° 30', long. 85° 21'.

SHEWLIE, in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Cawnpoor to Mynpooree, 21 miles W.N.W. of the former. Lat. 26° 36', long. 80° 7'.

SHEYL,¹ in Bussahir, a village at the south-eastern base of the Wartu Mountain. Its site is very pleasant, amidst much cultivation, and surrounded by picturesque mountains, "having beautiful pine-forests upon their sides and along their crests; while greensward, dotted with elegant trees and luxuriant bushes, sweeps from wood to wood, broken here and there by the gray rifted rock."² Here is a mine of excellent iron-ore³ easily extracted and smelted with the charcoal of the surrounding forests. Elevation 8,000 feet⁴ above the sea. Lat. 31° 14', long. 77° 37'.

SHIAR, in Bussahir, a pass over a ridge proceeding south-

¹ E.I.C. Ms. Doc.

³ Lloyd and Gerard, "Tours in Himalaya, i. 206.
⁴ Id. ii. 255.
Towards the great range of the Himalaya bounding Koonawar on the south. On the highest part of the pass is a small piece of level ground about 100 feet across, consisting of a swampy turf yielding to the foot. The prospect from this spot is vast and magnificent, comprehending the Chur Mountain to the south-west; on the east the flanks of Boorendo, but not the pass itself; to the south-east the peaks of Jumnotri, rising one above the other in majestic disorder, and covered with perpetual snow; and beyond, the Goonass Pass, one of the huge Ruldung peaks, upwards of 21,000 feet high. Shiar Pass has an elevation of 13,720 feet above the sea. Lat. 31° 19', long. 77° 58'.

SHIKARPOOR.—A town in the native state of Mysore, 156 miles N.W. by N. from Seringapatam, and 102 miles N.N.E. from Mangalore. Lat. 14° 16', long. 75° 25'.

SHIKARPOOR, in the British district of Boolundshur, lieutenant-governorship of the North-West Provinces, a town on the route from Boolundshur to Mynpooree, 14 miles S.E. of the former: it contains a population of 9,838 inhabitants. Lat. 28° 16', long. 78° 6'.

SHIKARPOOR, in the British district of Muzuffurnuggur, lieutenant-governorship of the North-West Provinces, a town on the route from Muzuffurnuggur to Rohtuk, 14 miles W.S.W. of the former. Lat. 29° 22', long. 77° 39'.

SHIKARPOOR, in Sinde, a town, the most important in the country in a commercial point of view, and probably the most populous, though not possessing the distinction of being regarded as the capital. It is situate 20 miles due W. of the Indus, in a country so low and level, that, by means of canals from that river, it is, during the inundation, extensively flooded, and so completely is the soil saturated with moisture, that, by digging to the depth of twelve or fifteen feet, water may at any time be obtained in quantity almost without limit. A branch from the Sinde canal, dug from the Indus, passes within a mile of the town, and is navigable for large boats during four months of the year. Though the inundation leaves extensive tracts covered with stagnant water, and the heat is excessive, the climate is not considered insalubrious, except towards the end of September, when agues prevail. The soil is alluvial, being the deposit of the waters of the canals and channels. It
SHIKARPOOR.

is so rich as to require no manure, producing very great crops, in return of culture and irrigation. The town is surrounded by flourishing groves and orchards, yielding in abundance dates, mangoes, oranges, mulberries, and other fruits the usual produce of this country. Sugarcane is cultivated more with a view to its consumption as a sweetmeat than for producing sugar.

The wall by which Shikarpoor was once fortified is now in ruins, but eight gates may still be traced: the circuit of the wall is 3,831 yards. The approaches to the town are bad, and when reached, it exhibits nothing attractive. Much waste ground is interspersed among the houses in the inhabited part, the streets are narrow, and the houses in general small. The mansions of the opulent Hindoo merchants are large, massy, gloomy piles, inclosed and secluded by high brick walls. Shikarpoor contains no public edifice worthy of notice. The character of the place is thoroughly commercial, almost every house having a shop attached to it. The bazar extends for about 800 yards through the centre of the city, and is covered with rafters thatched with palm-leaves. This arrangement is intended to afford protection against the rays of the sun, but it renders the air stagnant, oppressive, and injurious to health. Improvements in the town are, however, about to take place, under the proposed application of the provisions of the Legislative Act of the government of India, No. 26 of 1850.

Trade meanwhile appears to thrive. Conolly observes, that "the shops seemed to be well filled with the necessaries of life and various merchandise, and the people had that busy air which characterizes men engaged in active trade." Burnes states the number of the shops in the bazar in 1837 at 884: Postans, in 1841, represents the number of Hindoo shops as 923. The laborious trades and handicrafts are followed exclusively by Mahometans. The transit-trade is important, as the town is situate on one of the great routes from Sinde to Khorassan and Afghanistan, through the Bolan Pass, and also on that which leads northward to the Derajat, by the western side of the Indus. There is likewise a route to Kurrachee, by way of Sehwan, and one to Hindostan and the eastern side of the Indus, by the ferry at Roree and Sukkur, besides others of less importance. "The direct trade of the town of Shikarpoor itself," Burnes observes, "is not extensive; its port is Kur-
rachee." The trade with Khorasan and Kandahar is considerable, but there is scarcely any with Northern Afghanistan, that being conducted through the Punjab and Bhawlpore. The transit-trade is principally that from Marwar and the adjacent parts of Hindostan to Khorasan and Persia; but banking and other branches of monetary traffic constitute the more important departments of the commercial operations of Shikarpore. There are several Hindoos possessing large capitals, which appear to have been accumulated under the supremacy of the Afghans. The improvidence of the latter left the management of money matters to these acute financiers, who, by farming the revenue, and exacting exorbitant interest on loans, public and private, have amassed immense wealth. These capitalists are represented as enterprising, vigilant, and ravenous for gain; living impersonations of heartless avarice, but at the same time specious, civil, and intelligent to an extraordinary degree. Their lingual acquirements are extensive, as they usually understand Persian, Belooche, Pushtoo, Hindostaneez, and Sindee. Their credit stands so high that their bills can be negotiated in every part of India and Central and Western Asia, from Astracang to Calcutta. In every important town throughout this vast extent they have agents, whose families remaining at Shikarpore are a sort of hostages for their fidelity. The commerce and general prosperity of the town, which had rapidly declined under the power of Scindian rulers, are reviving under the lately established supremacy of the British. So much disorganized had society become when Masson visited the place a few years ago, that to pass the walls was almost to incur the certainty of being robbed.

The population of the town is estimated at 30,000. Of these, 20,000 are Hindoos, characterized by great laxity in respect to their peculiar tenets. The remaining 10,000 are Mahometans, of whom 1,000 are Afghans. These share in the general bad character of the population, being considered ignorant, crafty, contentious, and cowardly. It may be hoped that the prevalence of evil is but the result of the long course of oppression, extortion, and cruelty to which the people have been subjected by their rulers, and that under better auspices

---

* Kennedy (ii. 168) states the amount at 50,000. It is probable that all the estimates are very far removed from correctness.

---
the tone of morals will be raised, while increased security will be afforded to life and property. Shikarpoo is the principal place of one of the three territorial divisions of Sinde, having an area of 6,120 square miles, and a population of 350,401. The town was founded in 1617. Lat. 28°, long. 68° 39'.

SHINGE.—A town in the British province of Tenasserim, presidency of Bengal, 116 miles S.E. of Moulmein. Lat. 14° 50', long. 98° 10'.

SHIPKEE, in Chinese Tartary, lies close on the northeastern boundary of Busahair, and is usually the limit of the exploratory travels of Europeans in the Celestial Empire, all beyond being guarded from intrusion with the most vigilant jealousy. In proceeding to it from Dabling, there is a choice of two routes; one by Peeming Ghat, having an elevation above the sea of 13,518 feet, the other, a little to the south of the former, by the Kungma Pass, having an elevation of 16,000 feet, but, notwithstanding its greater height, easier than the former. The village is situate a mile from the left bank of the Sutlej, and three miles south of its great flexure, where, having thus far from its source held a north-westerly course, it turns to the south-west. The ridge traversed by the passes just described, stretches in a direction from north to south about three miles west of the town, and forms not only the boundary between the British and Chinese empires, but also the physical limit between the craggy wilds of Koonawur and the more open waste of Chinese Tartary. "Here," observes Gerard, "the scene was entirely changed: a more marked difference can scarcely exist. The mountains to the eastward were quite of another nature from those we before met with; they are of granite, broken into gravel, forming regular slopes, and neither abrupt nor rocky. The country in that direction has a most desolate and dreary aspect, not a single tree or blade of green grass was distinguishable for nearly thirty miles, the ground being covered with a very prickly plant, which greatly resembled furze in its withered state. This shrub was almost black, seeming as if burnt; and the leaves were so much parched from the arid wind of Tartary, that they might be ground to powder by rubbing them between the hands. The brownish tint of the furze, together with the bleakness of the country, have the appearance of an extensive
heath, and would strongly remind a Scotch Highlander of his native land."

The wind, during the visit of the Gerards, blew a hurricane; and it is said to blow with almost equal violence throughout the year: its aridity is great, and everything exposed to its influence is dried up. The collection of dwellings called Shipkee, consists of six hamlets, scattered over the declivity of a bare and brown mountain, sloping northwards to the Sutlej, and presenting everywhere a surface of rocky barrenness, except in the immediate vicinity of the houses, where persevering industry has succeeded in establishing some extent of cultivation. The crops are wheat, barley, buckwheat, and turnips, besides the never-failing apricots. The houses are built of stone, flat-roofed, and have a neat appearance; gardens, hedged in with gooseberry-bushes, appear in front of each, and the scene is enlivened by herds of huge yaks, and of shawl-goats and flocks of Tartar sheep, unrivalled for size, beauty, and the fineness of their wool. These animals are guarded by large native dogs, which, like one of the objects of their charge, the shawl-goats, have fine wool under their coat of hair, affording a defence against the rigour of the climate. The Gerards found the Chinese officers determined to stop their further progress by withholding provisions, the most effectual mode that could be adopted; but they were courteous, either out of regard to the numbers which followed in the train of the travellers (nearly 100 persons), or from a better motive. Gerard says of the inhabitants, "The Tartars pleased us much. They have none of that ferocity of character so commonly ascribed to them. They have something of the Chinese features, and their eyes are small; they go bareheaded, even in the cold weather, and have their hair plaited into a number of folds, ending in a tail two or three feet long. Their dress consists of a garment of blanket, trowsers of striped woollen stuff, resembling tartan, and stockings or boots of red blanket, to which are sewed leather shoes; most wear necklaces, upon which are strung pieces of quartz or bone. They have also knives in brass or silver cases, and all carry iron tobacco-pipes, of the same shape as those used by labourers at home, and the higher classes have them ornamented with silver. In common with the inhabitants of Koonawur, the greater part of them

---

1 Journ. As. Soc. Beng. ut supra, 372.

6 Herbert, ut supra, 374.
have a flint and steel for striking fire, attached to their apparel by a metal chain. The women, whose dress resembles that of the men, were literally groaning under a load of ornaments, which are mostly of iron or brass, inlaid with silver or tin, and beads round their necks, wrists, and ankles, and affixed to almost every part of their clothes."

The elevation of Shipkee above the sea is 10,597 feet. Lat. 31° 48', long. 78° 48'.

SHIPOOR, 1 in Gurwhal, a lofty peak on the north-east frontier, towards Chinese Tartary, is situate six miles N.E. of Gangotri, and in the bifurcation between the rivers Bhageerettee and Jahnevi. Elevation above the sea 18,681 feet. Lat. 31° 1', long. 79° 4'.

SHITTABGURH, in the Baree Dooab division of the Punjab, a town situated 16 miles N.W. from the right bank of the Sutlej, 39 miles E. by S. of the town of Mooltan. Lat. 29° 57', long. 72° 8'.

SHIVANASUNDURUM.—An island in the British district of Coimbatoor, presidency of Madras, formed by the river Cauvery: it is three miles in length by one in breadth, and upon it are the ruins of an ancient city of the same name. Lat. 12° 17', long. 77° 14'.

SHIVILPUTUR.—A town in the British district of Tinnevelly, presidency of Madras, 55 miles N. of Tinnevelly. Lat. 9° 30', long. 77° 39'.

SHOEDOWN.—A town in the British territory of Pegu, situate on the left bank of the Irawady river, and 10 miles S. by W. from Prome. Lat. 18° 38', long. 95°.

SHOLANGHUR.—A town in the British district of North Arcot, presidency of Madras, 14 miles N.N.E. of Arcot. Lat. 13° 4', long. 79° 29'.

SHOLAPADI.—A town in the British district of Salem, presidency of Madras, 27 miles N.W. of Salem. Lat. 11° 53', long. 77° 56'.

SHOLAPOOR.—A town in the British district of the same name, in the presidency of Bombay, 124 miles E. of Sattara. Lat. 17° 40', long. 75° 58'.

SHOLAPORE, a British collectorate in the presidency of Bombay, is composed of three separate divisions, the two largest lying north and south of each other, and the smaller division situate to the north-east of the other two. These districts
SHOLAPORE.

are bounded on the north by the collectorate of Ahmednuggur and the dominions of the Nizam; on the south by Sattara and the Belgaum collectorate; on the east by the Nizam's dominions; and on the west by the collectorates of Ahmednuggur, Poona, and by Sattara. The collectorate extends from lat. 16° 10' to 18° 34', and from long. 75° to 76° 28': its greatest length, from north-west to south-east, is 170 miles; its greatest breadth, from east to west, fifty miles. In 1838, this district, then a portion of the principal collectorate of Poona, was formed into a separate collectorate.\textsuperscript{1}

The general face\textsuperscript{2} of the district is described as undulating, and presenting a succession of upland and valley, and, with the exception of some mango-topes and other plantations in the talooks of Barsee, Mungolee, and Moodebahill, the country is stated to be nearly devoid of trees. The Kistna forms the southern limit of the district, which is also traversed by the Beema, and its confluent the Seena. The climate is dry and healthy; the average fall of the monsoon rains averaging twenty-two inches.

Cotton is the staple product. The experimental cotton-farms are stated to have succeeded beyond expectation, and the soil to be admirably adapted to the growth of the New Orleans species;\textsuperscript{3} but the district is represented as suffering from the want of roads. There is no metalled or made road through any part of this collectorate: all traffic and communication are carried on by means of the ordinary country mads, which are nothing more than tracks, hardened by long use to a degree that, especially in the hot season, renders them quite sufficient to answer all the purposes of the best cross-roads. There is a cleared road from Sholapore through Wyrag, Barsee, and Kurmulla, to Patus, within forty miles of Poona, which has been rendered passable for all kinds of carriage since 1844; and a continuation of the whole line to Poona, as a fair-weather road, was sanctioned by the home authorities in 1847;\textsuperscript{4} but a more substantial road from Sholapore to Poona is highly desirable. The amount of traffic which passes in this direction is exceedingly large; and as the produce of the whole of the western part of the Nizam's dominions is brought to Barsee for transmission to Bombay, there are few lines where a good made road would be more desirable. There are no passes or

\textsuperscript{1} Bombay Rev. Disp. 26 Feb. 1840.

SHOLAPORE.

ghauts in this collectorate. The two rivers, Seena and Bheema, are the only natural obstacles to regular internal communication, and it is only during the monsoon that they offer any serious impediment. The population is returned at 675,115; it is stated to have materially improved. Compared with their former condition, the people are said to possess a larger amount of competence among them; great wealth is more rare than formerly, but a medium degree of easy circumstances is also much more common. Many attempts have been made to introduce European implements of husbandry in this collectorate, but with little success. Agricultural skill is by no means at a low standard, and many estates give proof of the greatest care having been taken in their cultivation; but the means of performing many of the most ordinary operations are exceedingly defective; and the same may be said of the mechanical arts, in which the productions are out of all proportion superior to the means of producing them.

The lands of this collectorate have been surveyed, classified, and assessed, and the government demand thereupon fixed under the new settlement for a term of thirty years. The district was acquired by the East-India Company in 1818, on the fall of the Peishwa.

SHOLAPORE, in the British collectorate of the same name, presidency of Bombay, a town in the level tract at the eastern extremity of that collectorate. Its ground-plan is an oblong of a considerable area, with a wall and fausse-braie of substantial masonry, flanked by capacious round towers. A broad and deep wet ditch surrounds the place, and the north and east sides are covered by an extensive pettah or exterior town, surrounded by a good wall, and divided in the same manner into two parts. To the southward, communicating with the ditch, is a tank, surrounded on three sides by a mound, which, on occasion of the attack by the British force, formed a good breastwork to the Peishwa's army, posted outside the place. Sholapore, though having no natural strength, was early a fortress of importance in the Deccan, being mentioned in 1478 as one of the principal strongholds of the Bahmani sovereigns. Long afterwards, its possession was a frequent subject of contest between the sultans of Ahmednuggur and Bijnipoor, and so continued until it was taken by Aurungzebe
in 1685. During the dismemberment of the empire of Delhi, in the early part of the eighteenth century, Sholapore fell into the hands of the Mahrrattas, and after the defeat of the Peishwa and his flight from Poona, in 1818, was invested by a British force under General Pritzler. At that time the number of guns in the fort amounted to thirty-seven, including eleven field-guns; besides which, there were thirty-nine wall-pieces. The defending force consisted of 850 horse and 5,550 foot, stationed in the town, outside the fort, besides the garrison, estimated at 1,000 men. The town was taken by escalade, and the defences of the fort being breached, the place surrendered in four days. A church has been erected in the town.

Distance from Poona, S.E., 165 miles; from Sattara, E., 125; from Bombay, S.E., 220. Lat. 17° 40', long. 76°.

SHOLAVANDAN.—A town in the British district of Madura, presidency of Madras, 12 miles N.W. of Madura. Lat. 10° 2’, long. 78° 2’.

SHOOMOONG.—A town of Eastern India, in the native state of Muneepoor, situate on the left bank of the Nankatha Khyoung river, and 39 miles S. from Muneepoor. Lat. 24° 15', long. 93° 59’.

SHOOJUL.—A town in the Rajpoot state of Jodhpoor, situate on the left bank of the Bairee river, and 46 miles S.E. by E. from Jodhpoor. Lat. 25° 56’, long. 73° 44’.

SHOOK.—A town in the native state of Nepal, 146 miles N.W. by W. from Khatmandoo, and 145 miles N. from Goruckpoor. Lat. 28° 47’, long. 83° 18’.

SHOOKRABAD.—A town within the dominions of Gholab Singh, the ruler of Cashmire, situate 43 miles W. from Sirinagur, and 78 miles N.N.E. from Jhelum. Lat. 33° 59’, long. 74° 14’.

SHORAPORE.—A small subordinate raj situate in the south-west angle of the territory of the Nizam. It is bounded on the south by the river Kistnah, separating it from the Baichoor Doab, and on the north by the territories of Hyderabad. In 1842, the rajah of Shorapore having fallen into pecuniary difficulties, found himself unable to fulfil his engagements to the Nizam, his superior. This necessitated the interference of the paramount power, by whose authority an arrangement was effected, under which the rajah ceded certain

1 India Pol. Disp. 15 Nov. 1843.

6 Elphinstone, Hist. of India, ii. 516.
6 Blacker, Mem. of Operations of British Army in India, 290-305.
7 Bombay Public Disp. 15 March, 1843.
possessions south of the Kistna, in commutation of the Nizam's tribute. Rajah Kistnapah Naick dying shortly after, an arrangement was made by the British government for the conduct of the administration during the minority of his successor, by his uncle, Pid Naick. It was, however, unsuccessful, and the British government found it necessary to assume the direct management of the raj. Through their agency, a thorough reform was effected in every department of the previous vicious system of administration, and the country has just been handed over to the young chief in a flourishing condition. Its revenue in 1843 was estimated at five lacs of rupees. The withdrawal of the British agency took place in 1853. Shorapore, the principal place, is in lat. 16° 32', long. 76° 52'.

SHORE KOTE, in the Punjab, a small town situate on the route from Jung to Tulumba, and 26 miles N.W. of the latter town. Here are some ruins, which Burnes states to be similar to those of Sehwan, but more extensive. The most remarkable object is a mound of earth, surrounded by a brick wall, and so high as to be seen for a circuit of six or eight miles. Native tradition represents it to have been the capital of a rajah of the name of Shor, who was conquered by a king from the west, considered by Burnes to have been Alexander the Great. In the Ayeen Akber, mention is made of Syalkote and of Shoor, two towns in this part of the Punjab; and Shorkot may, perhaps, be the ruins of one of these. Lat. 30° 50', long. 72° 7'.

SHOREPUR CHOKI, in the British district of Dehra Doon, lieutenant-governorship of the North-West Provinces, a halting-place on the route from Dehra to Suharunpoor, and seven miles S.W. of the former town. It is situate on the crest of the Khera Pass, across the Sewalik Mountains. Water can be obtained at all times by digging in the bed of a mountain torrent, as well as from two wells in the vicinity. The road is excellent in the direction of Dehra, but stony and difficult for carriages towards Suharunpur. Distant N.W. from Calcutta 1,040 miles. Lat. 30° 14', long. 78° 1'.

SHORON, in the British district of Muzaffurnagar, lieutenant-governorship of the North-West Provinces, a town on the route from Muzaffurnagar to Rewaee, 13 miles S.W. of the former. Lat. 29° 19', long. 77° 39'.
SHOULAH, or BURA SHOULAH, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to Mozuffurnuggur, and 31 miles N.W. of the former place. It is situated in an open country, partially cultivated, and supplies and water are plentiful. The road in this part of the route is sandy and heavy for wheeled carriages. Distant N.W. from Calcutta 918 miles. Lat. 29° 3', long. 78° 26'.

SHOYLAGOODY.—A town in the British district of Madura, presidency of Madras, 57 miles S.S.E. of Madura. Lat. 9° 10', long. 78° 30'.

SHUBERNAGHERRY.—A town in the territory inhabited by the hill tribes of Orissa, 51 miles W. from Goomsoor, and 113 miles S. from Sumbulpoor. Lat. 19° 50', long. 83° 54'.

SHUBUDIR, in the Peshawar division of the Punjab, a town situated on the right bank of the Lundye river, 18 miles N. of the town of Peshawar. Lat. 34° 15', long. 71° 40'.

SHUFEEBAD, in the British district of Pameepat, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Delhi to Kurnaul, and 18 miles N.W. of the former. The road in this part of the route is good in dry weather. Lat. 28° 53', long. 77° 8'.

SHUHUR,1 in the Rajpoot state of Jeypore, a town on the route from Agra to Nusseersabad, 92 miles S.W. of former, 129 N.E. of latter. It has a hill fort; water is plentiful, as well as supplies of all kinds except wood. Lat. 26° 37', long. 76° 47'.

SHUJAGANJ,1 in the territory of Oude, a town on the route from Goruckpore cantonment to Lucknow, 110 miles W. of the former, 56 E. of the latter. Provisions and water are plentiful and good, but firewood rather scarce. The road eastward, or towards Goruckpore, is generally good, though in a few places heavy; westward, or towards Lucknow, it is very good. Lat. 26° 50', long. 81° 35'.

SHUJANPOOR.—A town in the Jullunder Doab of the Punjaub, situated 74 miles N.E. by N. of Loodhianah. Lat. 31° 50', long. 76° 33'.

SHUJAWULPOOR.—See Soojawulpoor.

SHUKURPOOR, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town on
SHU.

the route from Meerut to Rewaree, 38 miles S.W. of the former. Lat. 28° 37', long. 77° 21'.

SHULPEEA, in Bussahir, a halting-place on the south-western declivity of the Charung Pass over the great range dividing the valley of the Buspa from that of the Tidung. The formation of the mountain here is slaty gneiss, nearly bare, much disintegrated by the influence of the weather, and riven by frost. The halting-place is situate just above the highest limit of vegetation, at the elevation of 14,300 feet above the sea. Lat. 31° 22', long. 78° 32'.

SHUMSABAD.—A town in the native state of Gwalior, or territory of Scindias's family, 29 miles N.W. from Bhilsa, and 81 miles W. by S. from Saugur. Lat. 23° 49', long. 77° 31'.

SHUMSGURH.—A town of Malwa, in the native state of Bhopal, 12 miles W.S.W. from Bhopal, and 37 miles N.W. from Hoosungabad. Lat. 28° 5', long. 77° 20'.

SHUMSHABAD,1* in the British district of Furruckabad, the principal place of the pergunnah of the same name, is situate in the marshy tract on the right of the Ganges, and eight miles from its western bank. It must have been formerly more important than at present, as Baber,2 who wrested it from the Patans, estimated the annual revenue derived from it at nearly 20,000l. In the Ayeen3 Akbery the revenue derived from it is estimated at 7,138,453 dams, or 1,78,660 rupees. Distant N.W. from Furruckabad 12 miles, N.E. from Agra 88 miles. A recent return4 gives Shumshabad a population of 6,920 inhabitants. Lat. 27° 32', long. 79° 30'.

SHUMSHUR NUGGUR.—A town in the British district of Bebar, presidency of Bengal, 41 miles N.N.W. of Sherghotty. Lat. 25° 4', long. 84° 31'.

SHUNKERNACOIL.—A town in the British district of Tinnevelly, presidency of Madras, 32 miles N. by W. of Tinnevelly. Lat. 9° 10', long. 77° 37'.

SHUNTHAPA.—A town in the British district of Tinnevelly, presidency of Madras, 10 miles N.E. by E. of Tinnevelly. Lat. 8° 47', long. 77° 53'.

SHUPIEN.—A town within the dominions of Gholab Singh,

* Sun's Town; from Shams, "the sun," and Abad, "town." In the surveyor-general's map of the North-Western Provinces, it is erroneously denominated Shumsherabad, "Sword's Town."
the ruler of Cashmere, situate 26 miles S. from Srinagar, and 84 miles N.E. by E. from Jhelum. Lat. 33° 48', long. 74° 56'.

SHUREEARE.—A town in the Rajpoot state of Jodhpoor, 62 miles S.E. from Jodhpour, and 78 miles S.W. from Ajmeer. Lat. 25° 40', long. 73° 58'.

SHURUFOODEENPOOB.—A town in the British district of Tirhoot, presidency of Bengal, nine miles E. of Mozufferpoor. Lat. 26° 5', long. 85° 35'.

SHUSHABAD, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a town 14 miles S.E. of the city of Agra. Lat. 27° 1', long. 78° 12'.

SHUTENEE, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to that of Calpee, and 14 miles N.E. of the latter. The road in this part of the route is good, the country well cultivated, and studded with villages. Lat. 26° 16', long. 79° 57'.

SHWAYGEEN.—A town in the British province of Pegu, situate on the left bank of the Sittang river, and 44 miles N.E. from Pegu. Lat. 18° 6', long. 96° 46'.

SHWELY, a river of Burmah, rises in lat. 28° 51', long. 98° 30', and flowing westerly for about 180 miles, falls into the Irrawady, in lat. 23° 59', long. 96° 10'.

SIAM.—An independent kingdom of Eastern India, bounded on the north by Laos; on the east by Laos, Camboja, and the Gulf of Siam; on the south by the Gulf of Siam and the Malay peninsula; and on the west by the Bay of Bengal and the Tenasserim provinces. It extends from lat. 6° 30' to 18° 2', and from long. 98° 25' to 103° 46'; is about 800 miles in length from north to south, and 370 in breadth. The principal rivers are the Menam and the Me-Ping, flowing north and south. The chief products are rice, sugar, pepper, tobacco, and teak-wood. The earliest connection between this state and the British government appears to have taken place towards the close of the seventeenth century, when the Siamese envoys who had been deputed on an embassy to Louis XIV., visited London, and concluded a commercial treaty with the government of Charles II. This treaty was superseded by one dated in 1715; and from this time to the year 1821, little intercourse seems to have subsisted between the two governments. During
this long interval, Siam had been subjected to frequent revolutions, and had carried on constant war with Burmah. In the last-mentioned year (1821), Mr. John Crawfurd was deputed from India by the Marquis of Hastings on a mission to Siam, the chief object of which was the establishment of commercial intercourse, but it was received with distrust. On the breaking out of the Burmese war in 1824, the Siamese volunteered their alliance against their hereditary enemies, but substantially rendered little assistance. The war being terminated, a new treaty was concluded with Siam, in June, 1826, and an arrangement agreed to for the regulation of British trade with its ports. An amicable understanding between the two countries has been the result. In the year in which the treaty was concluded, the Siamese had invaded Queda, and expelled the rajah, who took refuge in Penang, where his residence was permitted, on condition of his abstaining there from any hostile proceeding against Siam. The condition was violated, and on the failure of all attempts to effect a reconciliation between the parties, an article was inserted in the treaty above mentioned, binding the English government to exclude the ex-rajah from his place of refuge, and from certain other localities. By the same article, the English government engaged to prevent any attack upon Queda, or any part of the Siamese territory, from the exiled rajah or his followers; and it was compelled twice to interfere for this purpose. In 1842, however, the king of Siam reinstated the rajah, on his submission; and at the request of the king, the clause of the treaty relating to the rajah was annulled. The death of the king of Siam occurred in 1851. Favourable expectations are entertained of his successor, who is represented as a "friend of foreigners," and as "writing letters in the English language."  

SIANEYGUÁ.—A town in the British district of Tavoy, one of the Tenasserim provinces, presidency of Bengal, 139 miles N.N.W. of Tenasserim, and eight S. of Tavoy. Lat. 13° 59', long. 98° 21'.

SIAPRI.—A town in the native state of Nepal, situate at the foot of the Himalaya Mountains, and 64 miles N.N.E. from Khatmandoo. Lat. 28° 35', long. 85° 37'.

SICKINDRÁBAD, in the Barée Doaab division of the Punjab, a town situated on the left bank of the Chenaub, 13
SID.

miles S.S.W. of the town of Mooltan. Lat. 29° 58', long. 71° 26'.

SIDDAPoor.—A town in the British district of North Canara, presidency of Madras, 31 miles E. of Honahwar. Lat. 14° 21', long. 74° 58'.

SIDDAWATTAM.—See SIDIOUT.

SIDHAM, or SIDIHUAH, in Sirhind, a small town on the route from Loodianah to Ferozpoor, and 30 miles W. of the former place. It is situate in a level fertile country, partially cultivated, and about half a mile from the left bank of the Sutlej, crossed here by a ferry. It is within the British district of Loodianah. Population about 1,500. Distant N.W. from Calcutta 1,105 miles. Lat. 30° 55', long. 75° 26'.

SIDHOUT,1 in the British district of Cuddapa, presidency of Madras, a town on the north or left bank of the Northern Penna or Pennar river. Here are the remains of the fort, which, though of inconsiderable2 strength, was the place of refuge of the Patan chief of Cuddapa, who was here obliged to surrender to Hyder Ali, the adventurer who succeeded in acquiring the sovereignty of Mysore. It subsequently was the locality of a British civil establishment; on the removal of which to the town of Cuddapah, this place sank into insignificance. Distance from the town of Cuddapah, E., 10 miles; Madras, N.W., 130. Lat. 14° 28', long. 79° 2'.

SIDHPOOR,1 in Guzerat, or the territory of the Guicowar, a town on the route from Mhow to Deesa. It is eligibly2 situated on the river Saraswati, which being esteemed a sacred river, many rich Brahmans and Gossaeans have fixed their dwelling-places here. There is a math or sacred college, where instruction is given to disciples and hospitality afforded to travellers qualified to receive it. Weaving is carried on extensively; many Mussulman merchants of the denomination called Bora are engaged in trade here. Distance from Deesa, S.E., 32 miles; from Ahmedabad, N., 58; from Baroda, N.W., 125; from Mhow, N.W., 230. Lat. 23° 50', long. 72° 20'.

SIDNOWAH, in the jaghire of Loharoo, lieutenant-governorship of the North-West Provinces, a village on the route from Hansee to Churu, and 31 miles S.W. of the former. Lat. 28° 42', long. 75° 49'.

SIDOWRA,1 in Sirhind, a town on the route from Booreah

1 E.I.C. Ms. Doc.
2 Wilks, Historical Sketches, ii. 109.
3 Transact. of Med. and Phys. Soc. of Bombay, i. 82—Gibson, Sketch of Guzerat.
SIKHUR, in the British district of Benares, the principal place of the pargannah of the same name, a small town with fort on the left bank of the Ganges, nearly opposite Chunar, but a little higher up the stream. In A.D. 1781 it was garrisoned by the refractory rajah of Benares, Cheyt Singh, with 2,000 matchlockmen and 150 cavalry, but was stormed by the British under Lieutenant Polhill. Distant N.W. from Calcutta, by water, 693 miles, or 870 taking the Sunderbund passage; 23 S.W. of Benares by water, 17 by land. Lat. 25° 8', long. 82° 53'.

SIKKIM, a petty native state in North-Eastern India, is bounded on the north and east by Thibet; on the south-east by Bhotan; on the south by Darjeeling; and on the west by Nepal. It extends from lat. 27° 5' to 28° 3', and from long. 88° 2', to 89°; it is sixty-six miles in length from north to south, fifty-two in breadth, and contains an area of 1,670 square miles, with a population of 61,766. Sikkim became tributary to the Goorkhas in 1789. During the Nepal war in 1814, the rajah co-operated with the British, and upon the termination of hostilities, his safety and independence were guaranteed by the treaty of Segoulee, and his dominions increased, in acknowledgment of his attachment, by the grant of certain tracts which had been ceded to the British by the Nepalese. In 1838, the rajah made an unconditional cession to the British of the territory of Darjeeling, but shortly after an annual grant of 6,000 rupees was agreed to be made to him as compensation. This, however, he has recently forfeited, together with the territory bestowed on him at the close of the Nepaul war, in

* Garden states it to be "a large open town;" but the authority of Mundy, an eye-witness, is preferable.
consequence of outrages committed by him against British subjects.2

SIKLEBUN.—A town in the native state of Nepal, situate on the left bank of a branch of the Taptee river, and 104 miles W. by S. from Khatmandoo. Lat. 27° 30', long. 88° 38'.

SIKREE,1 in the British district of Ghazeeapore, lieutenant-governorship of the North-West Provinces, a town on the route from Ghazeeapore cantonment to Azimgurh, situate on the river Munghée, 80 miles S.E. of the latter. Lat. 25° 43', long. 83° 29'.

SIKREEGULEE,1 in the British district of Purneeah, presidency of Bengal, a town on the route from Berhampore to Dinapore, 97 miles N.W. of former, 197 E. of latter. It is situate on the right bank of the Ganges, in a difficult3 pass, where the Rajmahal hills close upon the river. The eminence above the town is surmounted4 by the picturesque tomb of a Mussulman, regarded by his co-religionists as a saint. In the town are the ruinous barracks of the corps of the Rajmahal Highlanders. Distant N.W. from Calcutta, by Berhampur, 215 miles; by the course of the river, 288. Lat. 25° 10', long. 87° 43'.

SIKRI,1 within the territory of the British district of Goorogoon, lieutenant-governorship of the North-West Provinces, a small town on the route from Delhi to Muttra, and 31 miles S. of the former. It is the principal place of a small jaghire containing ten villages,8 the owner of which, a Mussulman, styled Nawaub, received this recompense for his military services during Lord Lake's campaigns against the Mahrattas in this neighbourhood. The surrounding country is well cultivated, containing populous villages, situate on small artificial eminences a few feet above the plain, which is laid under water during the rainy season; at other times the road in this part of the route is good. Lat. 28° 17', long. 77° 21'.

SIKUNDERPOOR,1 in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town 62 miles W. of Goruckpore cantonment. Buchanan2 states the number of its houses at 100, which, if six persons be allowed to each, will consequently give a population of 600. Lat. 26° 51', long. 82° 21'.

SIKUNDERABAD,1 in the British district of Boolundshuhur,
SIR—SIL.

A town, the principal place of the pergunnah or subdivision of the same name, on the route from Bareilly to Delhi, and 36 miles S.E. of the latter. It is of considerable size, has a bazar, and supplies and water are abundant. The road in this part of the route is good; the surrounding country level, with considerable cultivation, intermixed with patches of bush-jungle. Elevation above the sea 792 feet; population 14,843. Lat. 28° 27', long. 77° 46'.

SIKUNDARIW, in the British district of Allygurh, lieutenant-governorship of the North-West Provinces, a town on the route from Coel to Mynpooree, 28 miles S.E. by E. of the former. Lat. 27° 40', long. 78° 29'.

SIKUNDIPOOR, in the British district of Suharunpoor, lieutenant-governorship of the North-West Provinces, a village on the route from Suharunpoor to Hurdwar, and 13 miles E. of the former town. There is a small bazar, and water and supplies for troops are procurable. The road in this part of the route is tolerably good. Distant N.W. from Calcutta 1,000 miles. Lat. 29° 57', long. 77° 60'.

SIKWADANRA.—A town in the native state of Nepal, 184 miles W. by N. from Khatmandoo, and 40 miles N.W. from Khachi. Lat. 28° 26', long. 82° 26'.

SILCHAR.—A town of Eastern India, in the British district of Southern Cachar, presidency of Bengal, 63 miles E. by S. of Silhet. Lat. 24° 48', long. 92° 51'.

SILDAH.—A town in the British district of Midnapoor, presidency of Bengal, 39 miles W.N.W. of Midnapoor. Lat. 22° 40', long. 86° 51'.

SILHET.¹—A British district in the presidency of Bengal, named from its principal place. It is bounded on the north by the hilly jungly tract inhabited by the wild Garrows, and by Jynteah; on the east by the British district of Cachar; on the south by independent Tipperah; on the west by the British districts Mymensing and Tipperah. It lies between lat. 24° 9'—25° 12', long. 91°—92° 38'; is 102 miles in length from east to west, and eighty in breadth. The area, according to official² report, is 3,582* square miles. In the northern part the country is rugged, rising into jungly eminences towards the Cossya hills, which farther north, beyond the limits

* 4,500 according to Fisher.¹

of the district, attain an elevation of from 4,000 to 6,000 feet. 1
On the east, the country rises in a similar manner towards the
mountains of Cachar, and on the south towards those of
Tipperah. The district is described as a vast semi-basin, enclosed by mountains on the northern, eastern, and much of the southern side. The part of this hollow to the westward, extending nearly to the Brahmapootra, is in most parts always marshy; and the whole is subject to periodical inundations of long duration, being in general under water from April to the middle of November. The towns and villages, which in some parts, more especially to the southward, are numerous, are built on mounds raised with earth dug during the dry season. The houses are in clusters; huts, temples, mosques, and sheds for cattle being huddled together in a manner that gives them the appearance rather of the temporary abode of fugitives than the settled residence of a people. "The eastern division is on a higher level, and rises gradually towards the mountains on either side. Notwithstanding this, the marshes which occasionally occur might lead to a different belief; but these are very limited in extent, and occupy distinct hollows; and the fact of general rise is proved by the course of the rivers, which without it could never exhibit those strong currents for which they are remarkable." In this semi-basin, however, there is considerable irregularity towards the mountains, in consequence of numerous alluvial ridges, having elevations of from 100 to 300 feet above the adjacent country. The valleys between those ridges, and the alluvial tracts along the courses of the rivers, are the most fertile, and best suited for cultivation of any parts of the district. The principal river is the Soormah, which, formed in Cachar by two mountain-streams, the Jeeree and Barak, flows westerly, and touches on the eastern boundary of this district in lat. 24° 50', long. 92° 39'. The Soormah, a few miles below this point, where it first touches the frontier, divaricates into two branches, one retaining its westerly direction and the name of Soormah; the other turning south-westward, is called the Kusia or Kusiori, and subsequently the Barak. The Soormah, taking a direction generally westward and north-westward, forms for the distance of forty miles the boundary between this district and those of Cachar and Jynteah, until near Rajagunge, at a point about ten miles

---

1 Fisher, ut supra, 811.
2 Id. 816.
SILHET.

east of the town of Silhet, it crosses into this district, which it traverses for the distance of 120 miles, passing from the district in a nearly southerly direction, and subsequently forms the boundary between the British districts Mymensing and Tipperah. The Kusia, taking a direction generally south-west, but very sinuously, for about 110 miles, falls into the Soormah on the left or south-eastern side, fifteen miles above its passage from this district. Except in the driest part of the year, the Soormah is navigable as high as Silhet for craft of considerable burthen. The climate of Silhet is damp and cool in proportion to its latitude. During the spring months, which in most parts of India constitute the dry season, the weather is variable, and violent thunder-storms are frequent: the periodical rains set in about the beginning of June, and continue until the middle of September, inundating a great extent of country; so that river craft, instead of being obliged to keep the regular channels, are enabled to hold their course right across the country, as it is deeply under water. The extreme dampness of that season gives rise to cholera, dysentery, agues, and fevers, which are peculiarly fatal to those visiting the district from other quarters. Europeans, however, suffer less from such unfavourable circumstances than Hindoos not natives of the district. There is much jungle in the hilly parts on the eastern, northern, and southern frontiers, but the valleys and banks of the rivers are very fertile and beautiful. "Vast sheets of cultivation, extending for miles along the banks of the Soormah and other streams, intersected by splendid groves of trees and bamboos, forming shelter for extensive villages, and occasionally by low ranges of wooded hills, and backed always by mountains, either near or distant, form an endless succession of gratifying scenes." It appears, however, that the soil, from its low and swampy nature, is not calculated for the production of cotton or tobacco of superior quality. The cultivation of wheat, oats, and indigo, has been tried, but considered to have failed; that of the sugarcane, it is believed, might be increased and improved, if plants of superior quality could be procured. The pastures, which are luxuriant in the low tracts, are the chief resource of the rural population, as they support great numbers of cattle, yielding large quantities of butter, cheese, and hides, for exportation,
and bullocks for burthen and draught. Grain is also extensively exported, especially to places eastward and northward. Of fruit-trees, there are the mango, lime, orange, lemon, plantain, apricot, betelnut. The manufacturing industry is insignificant, producing only a few coarse cotton cloths, mats, baskets, and some other articles too insignificant to enumerate. The population is returned officially at 380,000; an amount which, compared with the area, indicates a relative density of about 100 to the square mile. Of this number it is conjectured that three-fifths are Brahminists; the remainder are Musulmans, as there are scarcely any Christians. Silhet, the locality of the military cantonment and of the civil establishment, is the only place in the district which can be considered a town; it is described in its place in the alphabetical arrangement. The routes are,—1. From south-west to north-east, from Calcutta through Dacca to Silhet; 2. from west to east, from Silhet to Marajpoor; 3. from south to north, from the town of Silhet to Chirra Poonjee.

1. Garden, Tables of Routes, 109, 143.
5. Id. 1841, vol. ii. part Iii. Append. xav.

SILHET,1 the principal place of the British district of the same name, presidency of Bengal, is situate at the southern base of the Cossya hills, and on the river Soormah, a tributary of the Brahmapootra. It is described to be a mean place, merely a large straggling village, having a bazar, where only the most common articles of native use are to be obtained. The civil establishment of the district is located here. Silhet is the head-quarters of the eastern division of the Bengal army. Distance from Jumalpoor, E., 110 miles; Dacca, N.E., 120; Calcutta, N.E., 260. Lat. 24° 54', long. 91° 50'.

SILLAY MEW.—A town of Burmah, situate on the left bank of the Irrawady river, and 116 miles S.W. from Ava. Lat. 20° 45', long. 94° 38'.

SILLEE.—A town in the British district of Chota Nagpoor, presidency of Bengal, 71 miles E. of Lohadugga. Lat. 23° 23', long. 85° 53'.

SIMBOLONG.—A town of Eastern India, in the native state of Muneeoor, 37 miles W. from Muneeoor, and 40 miles E. from Silchar. Lat. 24° 48', long. 93° 28'.

SIMBULKET, in the British district of Kumaon, lieutenan
t-governorship of the North-West Provinces, a village in the Patlee Doon, on the route, by the course of the Ramgunga
SIMERIA, or SIMRIA, in the territory of Gwalior, a village on the route from the fort of Gwalior to Saugor, 29° miles S. of former, 184° N.W. of latter. Lat. 25° 55', long. 78° 21'.

SIMIRREEAH, in the raj or principality of Rewah, a town on the table-land surmounting the mountain styled by Franklin the "second or Panna range," and 62 miles S.E. of Allahabad. It is the principal place of a jaghire held under the rajah of Rewah, on annual payment of a tribute of 2,500 rupees. The jaghiredar, considering himself obnoxious to the persecution of the British authorities, they guaranteed his possessions to him. The benefit of this guarantee was spontaneously relinquished in 1828, by the jaghiredar, who was immediately expelled by the rajah, and his nephew placed in his stead; but the British government subsequently interfered so far as to have a provision made for his widow. Elevation above the sea 1,009 feet. Lat. 24° 45', long. 81° 16'.

SIMLA.—A British station in the lower or more southern part of the Himalayas, between the rivers Sutlej and Giree, celebrated as a retreat for those seeking renovation of health, or relief from the oppressive heat of the plains of Hindostan. It is situate on the route from Soobathoo to Kotgurh, 22 miles N.E. of the former post. The houses built for the accommodation of residents or visitors at this place, are irregularly scattered over a narrow ridge of mountain, advantage being taken of every level spot, or moderate slope, for building. A few dwellings are erected on a spur of hills running north at right angles to the Simla range. The eastern extremity of what may be properly called the Simla ridge, is abruptly terminated by the peak of Jako, rising about 400 feet above it. At the western base of this eminence is the bazaar of the settlement. The sides of the Jako Peak were originally thickly clothed with wood, and the quantity is still considerable; but the demands for the purposes of building may be expected to cause a rapid diminution. At the western extremity of the ridge of Simla is another eminence, inferior in height to Jako, and
SIMLA.

devoid of timber, the summit crowned by a mouldering ruin. The scenery within view from the town is very noble. Immediately south is a dark, deep, precipitous valley, which, as well as the neighbouring mountains, is thickly covered with pine-forests; beyond, to the south-west, are seen the mountains about Soobathoo; and still farther, the vast plain of Hindostan, traversed by the meandering Sutlej. To the north, successive mountain-ranges rise in proportion as the distance increases, and are terminated with surpassing grandeur by the snowy crescent of the Himalaya, the peaks of which, in fine weather, have so distinct an outline against the dark-blue sky, that their real distance of sixty or seventy miles seems not more than eight or ten. The following description of this scene, and of its impressions on the observers, occurs in a modern work.

"The general appearance of this mass of snow is that of a wide undulating plain, from which peaks rise in every imaginable shape. Upon reaching the crest of the ridge at Simla, the vastness of the scene became oppressive. The lofty snowy range shone from the dense azure of the heavens: its giant flanks were broken with black mural precipices and profound ravines, which were purple from their depth: below was heaped a shattered mass of mountains, peaks and glens, ridges and valleys, some aridly bare, others luxuriantly rich."

The trees in the neighbourhood are, the deodar or Himalaya cedar, pine, oak, and rhododendron; the last named glowing with bunches of rich scarlet blossoms. Of four-footed animals, the most commonly occurring are the kacker or barking deer (Cervus muntjac), so called from its cry resembling a short bark; the antelope, the wild goat, and the marmot: there are also the wild hog, the flying squirrel, musk and other kinds of deer, and monkeys, both the hanuman or langoor (Semnopithecus entellus), and the bundur (Simia rhesus). The carnivorous quadrupeds are leopards and leopard-cats, bears, jackals, hyænas, and foxes: sometimes, though rarely, a tiger makes its way to these elevated regions. There is no great variety or abundance of game: the principal of the feathered kind are pheasants, chukars and black partridges, quails, and woodcocks. Eagles, vultures, and crows are very numerous. The fruits and esculent vegetables of Europe in general thrive well here; potatoes especially are grown in great abundance.

SIMLA.

and excellence, and are sent in large quantities to the plains. The climate is considered highly salubrious, and in consequence of its lower temperature, appears in favourable contrast with that of the plains.* The winter is sometimes very severe. In 1836 snow lay in the month of February to the depth of six or eight feet, and did not melt away in shady places until the end of May.8

In 1841 there were at Simla upwards of 100 houses built in the English style, and varying in rent from 40l. to 150l. a year. The position and habits of those resorting to the place cause it to be abundantly supplied with the luxuries as well as the necessaries of life, though most sorts of provisions have to be borne three or four days’ journey over mountain-roads. The population is very fluctuating. In a recent publication9 it is thus prospectively estimated: “Should the Governor-General and the Commander-in-Chief come up next season, it will consist of British subjects, 200; natives, 8,000; and when the tributary chieftains and followers come in, it will be nearly 20,000. Again in winter, when but few remain, it will probably not exceed, British subjects, 20; natives, 2,000.” Measures have been taken for providing funds for the purpose of carrying out public improvements.1 The first British dwelling erected in this place was that of Lieutenant Ross, in 1819.2 It was thatched over, and its walls were composed of spars, grass, and mud. In 1822, the first permanent cottage of the usual materials, stone and timber, roofed with pinewood shingles, was erected by Captain Kennedy. Simla is the seat of an observatory, at which a series of magnetical and meteorological observations were made.

* In the Journ. As. Soc. Beng. No. 141, 1843, p. 749, appears a rifacimento of "Observations on the Climate of Soobathoo and Kotgerh," published by P. Gerard in As. Res. xv. 469. In the conclusion of the notice, it is stated that the temperature of Kotgerh "will give a very fair notion of that which may be generally experienced at Simla; as in subsequent years, on comparison, the average temperature of the former place (Kotgerh) proved only to be a trifle lower than that observed, and recorded at the latter."1 The mean temperature of the year at Kotgerh is 55°;2 the highest temperature registered is 86°, and that was on June 18th.3 The temperature diminishes during the rains of July and August, in some instances as low as 51°—July 14th.4 Simla lies within the influence of the rainy monsoon, which prevails during the latter part of June, and through the whole of July and August.
logical observations were commenced on the 19th January, 1841. A church has been provided, at an expense of 16,000 rupees; of which amount the government contributed 5,000 rupees, the remainder being raised by private subscription.

The district known as Simla is composed of territory acquired partly from the rajah of Putteala, and partly from the rajah of Keonthul; in both cases by exchange. It is under the civil jurisdiction of the board of administration in the Punjab. Elevation of encampment above the sea 7,866 feet. Distance N.W. from Calcutta, via Kurnal and Soobathoo, 1,097 miles. Lat. 31° 6', long. 77° 14'.

SIMMURIA, in Bundelcund, a village or small town on the route from Allahabad to Saugor, 230 miles S.W. of the former, 83 N.E. of the latter. It is situate in the depressed tract or basin of Lohargaon. Lat. 24° 16', long. 79° 58'.

SIMONBONG.—A town in the British district of Darjeeling, presidency of Bengal, six miles N.W. by W. of Darjeeling. Lat. 27° 4', long. 88° 13'.

SIMONG.—A town of Eastern India, in the territory inhabited by the Bor Abar tribe, 46 miles N.W. by N. from Sudiya, and 105 miles N.E. from Luckimpoor. Lat. 28° 22', long. 95° 20'.

SIMONGELPOOR.—A town in the British district of Silhet, presidency of Bengal, 45 miles S. by W. of Silhet. Lat. 24° 18', long. 91° 42'.

SIMPOOLBARIA.—A town in the British district of the Twenty-four Pergunnahs, presidency of Bengal, 40 miles S. by W. of Calcutta. Lat. 22°, long. 88° 21'.

SIMOWNEE, in the British district of Banda, lieutenant-governorship of the North-West Provinces, the principal place of the pargunnah of the same name, a small town on an insignificant stream tributary to the Jumna, eight miles S. of the right bank of the latter, 20 N.E. of the town of Banda, 78 W. of Allahabad. Lat. 25° 36', long. 80° 40'.

SIMRA, or SIMORE, in the British district of Goruckpore, lieutenant-governorship of the North-West Provinces, a small town in the pargunnah of Sidhoa Jobhuna, which contains no

* According to Hodgson and Herbert, 7,486; Lloyd and Gerard, 7,400; Hutton, 7,200.
other, except the principal place, Paraona. It contains about 100 wretched dwellings. Buchanan does not state its precise position, but it must be about forty-five miles east of the town of Goruckpore, and is perhaps the Simore of Garden, who states that it is 93 miles N.W. of Dinapore. Lat. 26° 35', long. 84° 7'.

SIMRABAS.—A town in the native state of Nepal, 44 miles S.W. by S. from Khatmandoo, and 85 miles N.E. from Bettiah. Lat. 27° 10', long. 84° 56'.

SIMRAUTA, in the district of Salon, territory of Oude, a town 50 miles S.E. of Lucknow. It belongs to a brother of the Tiloi rajah, a reputed descendant of the ancient Hindu monarchs of Oude. The proprietor is styled by courtesy rajah, and resides in a mud fort, having in the interior buildings of masonry, and defended by 500 of his armed followers. Tieffenthaler, describing its condition about eighty years ago, states it to be a large populous village, very strongly situate amidst swamps and dense jungle, extremely difficult to be penetrated. The population is estimated by Butter at 8,000. Lat. 26° 17', long. 81° 20'.

SIMRAW.—A town in the native state of Nepal, 141 miles S.E. by E. from Khatmandoo, and 66 miles N.N.W. from Purneah. Lat. 26° 40', long. 87° 18'.

SIMREE.—A town in the British district of Behar, presidency of Bengal, 36 miles W. of Sherghotty. Lat. 24° 82', long. 84° 19'.

SIMTOKA.—A town in the native state of Bhotan, 73 miles E.N.E. from Darjeeling, and 120 miles N.W. from Goalpara. Lat. 27° 25', long. 89° 25'.

SIMULEA.—A town in the British district of Dacca, presidency of Bengal, 21 miles N.N.E. of Dacca. Lat. 24° 2', long. 90° 40'.

SINAWUD.—A town in the native state of Indore, or territory of Holkar, 48 miles S.E. by S. from Indore, and 112 miles N.W. by W. from Ellichpoor. Lat. 22° 8', long. 76° 10'.

SINCHUL.—A mountain of Sikhim, having an elevation of 9,000 feet, upon a spur of which stands the British settlement of Darjeeling.
SINDE.

SINDE, a river rising in Malwa, "from the small range of mountains about 12 miles S.W. of the town of Seronge," and in lat. 24° 1', long. 77° 29'. It first has a course north for about 130 miles to Narwar, at the north-west corner of Bundelcund, and thence turning north-east, generally forms, for about 130 miles, the boundary between that district and Gwalior, and falls into the Jumna on the right side, in lat. 26° 26', long. 79° 18', flowing altogether about 260 miles. It right and left receives during its course many small streams, the principal being the Parbati and the Pohooj, the first falling into the Sinde on the left side, about twenty-five miles below Narwar, and the other on the right side, four or five miles above its mouth. The Sinde is crossed twenty miles from its source by the route from Nusserabad to Saugor, and is there 100 yards wide, rocky bottom, low banks, and depth of water two feet in fair season." About 150 from its source, and in lat. 25° 50', long. 78° 28', it is crossed by route from Agra to Saugor, and there the bed is about 200 yards wide and sandy, breadth of stream, in dry season, about forty yards, and from one and a half to two feet deep; banks steep, and cut into ravines." It is subject to great inundations during the periodical rains.

SINDE.—An extensive and important province of Western India, so called probably from the river Sinde or Indus. Others consider that the name both of the river and the country is derived from the word Sindhi, synonymous with Hindi, as the inhabitants from the first dawn of recorded knowledge have principally been of the great Hindoo family. It is bounded on the north by Beloochistan, the Daman, and Bhawlpour; on the east by Jessulmere and Marwar; on the south by Cutch and the Indian Ocean; on the west by Beloochistan; and is situated between lat. 23° 37'—28° 32', and long. 66° 43'—71° 3'. It is 360 miles long, from north to south, 270 miles in its greatest breadth, from east to west, and contains

* Sindh of Tassyin.

† According to the native Sindian history, in the usual style of national vanity—"Sindh is so called from Sindh, the brother of Hindb, the son of Noah, whose descendants for many generations ruled that country."—Potsans, Extracts from Töbfat ul Kiram and the Chach Nameh. (Transactions of As. Soc. of Bengal, 1838, p. 298; and 1841, p. 184.)
SINDE.

a surface of 52,120 square miles.² Its seacoast, washed by the
Indian Ocean, extends a distance of 150 miles in a north-west
direction, from the Koree or greatest mouth of the Indus (long
deserted by the stream), situate in lat. 28° 38', long. 68° 25',
to Cape Monze,³ or Ras Mooarree, in lat. 24° 51', long. 66° 43'.
This whole extent of coast, except the part intervening between
Kurrachee and Cape Monze, which are distant from each other
about fifteen miles, is very low, being merely a series of mud
banks deposited by the Indus, or, in a few places, low sand-
hills,¹ blown in from the sea-beach. Exclusive of those few
sand-hills, "the shore," observes Carless, "is low and flat
throughout, and at high water partially overflowed to a con-
siderable distance inland. With the exception of a few spots
covered with jungle, it is entirely destitute of trees or shrubs,
and nothing is seen for many miles but a dreary swamp.
Whenever this occurs, the land is scarcely discernible two miles
from the shore." Wood⁵ also observes—"The coast-line is
submerged at spring tides, when the delta of the Indus resem-
bles a low champagne tract of verdure." Burnes, too, states
that the coast of Sinde is not distinguishable a league from the
shore. Westward of the Garrah estuary, and between it and
Kurrachee, the southern extremity of the Hala⁶ or Pubb
Mountains approaches the shore, the point of Munoooa, which
forms the southern shelter of the harbour of Kurrachee, being
rocky;⁷ but with the exception of this point, the coast itself is
like that eastward, low⁸ and alluvial, and so continues west-
ard to Cape Monze or Ras Mooarree, which rises from the
sea to a moderate height. The capability of the coast of Sinde
for the purposes of navigation is thus summed up by Wood:⁹
—"It is plain to all who are conversant with nautical affairs,
that Kurrachee is the only safe seaport for the valley of the
Indus. When the season is favourable, the merchant may
indeed send his goods direct to the mouth of the Indus; but
everything here is subject to such constant change—the
weather, the depth of water, the channels, and the very em-
bouchure itself—that this voyage, even in February, is not
without hazards." He then observes, that as the danger of
entering the river is greater than of leaving it, exports may be
sent from the mouths in November, December, and January,
but that all imports should be brought by Kurrachee. It
SINDE.

should be observed, however, that though sea-going ships of 400 or 500 tons can at no time safely enter the river, yet smaller vessels, if their draught do not exceed six or seven feet, may do so. An inland navigation, or even a ship canal, could probably be easily made from Kurrachee to the deepest and most navigable part of the Indus below Hyderabad, as the Garrah, a small stream communicating with the Indus, falls into the sea at that port, and is navigable from it for boats as far as Garrah Kot, a distance of forty miles.

Kurrachee, the only port in Sinde for sea-going ships of burthen amounting to 400 or 500 tons, has, at high water, a depth of two fathoms and a half, and at spring tides of three fathoms; but, during the south-west monsoon, the swell is so great on the bar, that it is highly dangerous to cross. The Kookewarree, called the Gorah by Burnes, was formerly the principal mouth of the Indus, having a width of 1,100 yards, but it is now blocked up by a sandbank; the Kedewarree has a well-defined channel, with seven or eight feet water at low spring tides; the Hojamree and Joaa, during the low-water season, are safe roads for ingress and egress for vessels drawing not more than six feet water; the Pitee is the largest, deepest, and best-defined mouth. The Koree mouth is the most eastern, forming the boundary of Sinde towards Cutch; it has long been deserted by the stream, except in very great inundations, when sometimes the Poorana and Fulaillee branches pour their waters into it. Burnes states its breadth at Cotasir, twenty miles from the sea, to be seven miles, and that it increases, proceeding downward, until neither shore can be seen. He, however, adds, very justly, that it is nothing more than an arm of the sea.

The base or seaward line of the delta of the Indus measures, from the Garrah mouth, in lat. 24° 43', long. 67° 12', to the Koree mouth, in lat. 23° 38', long. 68° 25', about 125 miles. If it be regarded as having the shape of a triangle, to which it in some degree approximates, the perpendicular, measured from the seashore to the vertex, near Tatta, where the great branches of the Indus—the Sata or eastern, the Buggaur or western—divaricate, is about fifty miles, and its surface is about 3,000 square miles; but as the river has in some degree deserted a considerable portion of the south-eastern part, the present

delta proper does not probably contain more than 2,500 square miles. Unlike the densely-wooded delta of the Ganges, it is nearly destitute of timber, resembling in this respect that of the Nile. It is almost level, of alluvial soil, apparently brought down by the Indus, and consisting of vegetable mould, clay, and sand, which becomes hard soon after being deposited,¹ even in the channels of the river. There are, however, even within the limits of the delta proper, and eastward of the Buggaur, or western branch of the Indus, some rocky hills,² known by the name of the Mukali Hills. Near the Pittee,³ or western mouth of the river, is a dangerous rock, the only point in the delta south of the range just described which is not alluvial. In some degree similar to the delta, but superior to it in scenery, soil, cultivation, and climate, is the alluvial tract extending on each side of the Indus for a distance varying from two to twelve miles. One of the finest parts is a long, narrow island, extending from north to south a distance of about 100 miles, with an average breadth of about eight, inclosed by the Indus on the east, and on the west by the Narra. The greatest extent of this alluvial land in the upper part of Sinde appears to be about Khyerpoor, Shikarpoo, and Larkhan,⁴ where canals and watercourses, communicating with the Indus, during inundation cover the surface to a wide range with water, which both irrigates the ground and deposits on it a fertilizing slime. According to Postans,⁵ the soil is so rich, that no manure of any kind is used, though it regularly produces two crops every year, and sometimes three; and Macmurdos⁶ states, that “the fertility of this province in those parts which are exposed to the floods of the Indus is exceeded by that of no tract of country on the earth.” Throughout the alluvial tracts of Sinde, the soil contains saltpetre in great abundance, and it is largely extracted both for home consumption and for exportation.

An extensive alluvial region stretches eastward of the fertile tract along the Indus, but having been generally deserted by the water of the river, it became a desert,⁷ yielding a scanty pasture to camels or horned cattle, and in the less-frequented parts occupied only by the fleet goorkhor,⁸ or wild ass. Through it, however, flows the Eastern Narra during the height of the inundations of the Indus, for a distance of 300

miles, and a project has just been sanctioned for securing to its channel a permanent supply of water by means of a cutting near Roree. The great doab contained between this branch and the Indus is on an average about seventy or eighty miles wide, the soil consisting generally of a hard sun-baked clay, like the rest of the alluvial soil of Sinde where devoid of water. In this doab are two low ranges of recent limestone; the more southern, that of Hyderabad, about 100 feet high, and on one part of which that city is situated; the more northern running north-westward from the vicinity of Jessulmure, and towards the Indus attaining an elevation of 150 feet, and abounding in flint, which forms, almost exclusively, the rocks on which Roree and Bukkur stand. These ranges are not, however, completely continuous, being cut by valleys, through one of which the Narra, already mentioned, holds its course; through another, the Fulailee branch, insulating Hyderabad.

The stiff nature of the deposit of the river is probably owing to its course in the upper part generally lying through a very mountainous region, principally of primitive formation. In the more southern part of Sinde, the soil has a very large admixture of sand, and is sometimes so impregnated with common salt, that, as Lord observes, “it is not uncommon to see the same soil which, during the season of irrigation, had yielded crops of grain, transferred afterwards to the salt-pan, and furnishing, by the simple process of pouring water over it, which is subsequently evaporated, an abundant supply of salt.” The moisture, so indispensable to the productiveness of the soil, is altogether supplied by the water of the Indus, rain in Sinde being very scanty and uncertain. In consequence, the country, where destitute of the means of irrigation, becomes a desert. Of this nature, on the north-east, is the Pat, or desert of Shikarpoor, lying between that town and the Bolan Pass, and apparently consisting of the clay deposited by the Bolan, the Nari, and other torrents which flow down from the Hala Mountains, and which are all lost in this dreary tract. It is about ninety miles across, and, according to Kennedy, in some places resembles “the dry bed of a salt lagoon in an interval between spring tides;” in others, it is a level plain of indurated clay, of a dull earthy colour, and having the appearance of being occasionally under water; but during the dry season

2 Lord, 61.
exhibiting, at long intervals, a few wretched, parched, and stunted shrubs, but without a single blade of grass or other herbage. In the eastern part, and in general reaching to within twenty miles, or even a less distance of the river, is a region called the Thur, or desert, having considerable resemblance to that just described, except that it is much more sandy, extensive tracts being covered with sand-hills, varying and shifting under the influence of the tempests of the wilderness; yet, in many places, there is a considerable growth of low shrubs, coarse herbage, and prickly, saline, or aromatic plants, affording pasturage for camels, buffaloes, kine, sheep, and goats, all in continual motion in search of water, or its concomitant, vegetation. Numerous beds of rivers long dried up intersect this arid tract, appearing to indicate that the waters of the Indus, or of some of the Punjab rivers, once found their way through it. Vestiges of ancient towns also may be observed, in great quantities of fragments of bricks and pottery in some places strewed over the surface. That the Indus, which now finds its way through the limestone rocks at Roree, might at one time have poured its waters in many branches over this waste, at present parched, is by no means improbable, as there are unequivocal indications that it formerly flowed fifty feet above its present level, in the channel between Sukkur and Roree, and that the country on both sides of the river along the base of the limestone range was at that time under water. The old course of the river may also be traced along the northern base of that rocky range, which, stretching nearly 100 miles to the south-eastward, must have sent the water of the Indus over the surface of the country now become the Eastern Desert, since it has been deserted by the stream.

The climate of Sinde is remarkably sultry and dry. As Lord observes,—"Situated on the verge of two monsoons, it is unrefreshed by the waters of either. The south-west monsoon," he proceeds, "terminates at Lucput Bunder (on the western coast of Cutch), as accurately as though it covened not to violate the Sindh frontier." At Kurrachee, the annual fall of rain does not exceed six or eight inches: at Hyderabad, the rain of an entire twelvemonth amounted only to 2·55 inches; and farther north, at Larkhana, three years had elapsed continuously without rain, at the time of Hamilton's visit in 1699.  

---

SINDE.

The consequence was a pestilence, which cut off one-half of the population. But Burnes, in travelling through the delta on the 10th of April, experienced very heavy showers and a severe fall of hail; and in June, 1809, during the visit of the British mission, the rain\(^1\) fell so heavily there, that the streets frequently resembled rivulets, and none could stir abroad. In the following August, the rains were again excessively heavy during the stay of the mission at Hyderabad. But, notwithstanding the discrepancy in our information on the subject, there can be little doubt that, throughout Sinde, the climate is generally too dry for the purposes of agriculture, except in the parts irrigated by means of the river. On this subject, the ameer of Khyerpour remarked to Burnes,\(^2\) that rain always brought disease, and that they were better without it. The temperature is very high in summer. Lord\(^3\) states the mean maximum of the temperature of the atmosphere at Hyderabad, during the six hottest months, to be 98.5° in the shade, and considers it the greatest hitherto registered in an authenticated form. The water of the Indus at that time attains the temperature of 92° or 93° when highest, and consequently very nearly blood-heat. There appears reason for concluding that the temperature is still higher in Northern Sinde, where the cooling influence of the ocean cannot extend. Burnes\(^4\) states it at 96° at Khyerpour in the beginning of April. In Northern Sinde, however, frost is not unknown, and ice has been observed in February.\(^5\)

In January, the difference of the temperature at night, and during the day, has been found as much as 40°, the thermometer ranging to 84° and upwards. So high, however, in general, is the temperature in Lower Sinde, that there is, in fact, no winter.\(^6\)

The natural history of Sinde is only now receiving the attention due to so important a subject. An extravagant addiction to field-sports characterized the ameers of Sinde, who sacrificed to it the welfare and even the existence of their subjects, laying waste and inclosing extensive cultivated tracts to form their shikaryaks, or hunting-jungles. One of the ameers, some years ago, depopulated, near the capital, an extensive tract of fertile ground, and converted it into a shikargah, though this foolish and monstrous act of tyranny caused a loss of revenue equal to 20,000l. or 30,000l. a year.\(^7\) Another

razed a village to the ground, because the noise of the population and domestic animals was considered to disturb the game of a neighbouring preserve.

There are generally two harvests in Sinde; the rubbee, or spring harvest, reaped from seed sown in autumn, and the kureen, or autumn harvest, which is sown in spring. The rubbee crops in general consist of wheat, barley, oil-seeds, millet (Holcus sorghum), the durra of the Arabsians, and called here bajra, opium, hemp, tobacco; the kureen crop consists of those productions which require considerable heat to bring them to maturity; such as rice, sugarcane, cotton, indigo, maize. The results of the experiments made for the cultivation of the American cotton and Mauritius cane were not encouraging. Pulse and pumpkins, cucumbers, melons, and succulent vegetables, are sown for both crops, and some products are sown indifferently for either. Rice appears to be the staple crop, and, with maize and wheat, forms the principal article of diet, besides being exported in great quantities. Much importance is attached to the culture of flax. The fruits are dates, mangoes, plantains, pomegranates, limes, citrons, figs, apricots, apples, plums, tamarinds, mulberries, pistachio and some other kinds of nuts, and melons. They, in general, are of inferior quality; the grapes especially are small and sour. The plantations of date-palms are very general and extensive, and the fruit is used largely for food and for distillation; by which process a strong spirit is drawn from it. As food, it is found to be of a very heating nature.

Camels are bred in great numbers in the salt-marshes of the Indus; and though such tracts might seem very ungenial to the nature of that animal, those reared there are considered very hardy, strong, and enduring, especially of thirst, in consequence of the scanty supply of fresh water in their original soil. The value of the camel is not confined to its virtues as a beast of burden: its milk is a favourite article of diet (though it spoils if not used very fresh), and its hair is woven into coarse cloths. Buffaloes are kept in great numbers in the swampy tracts, where they may be seen wallowing in the mud with their heads only above water. Their flesh is excellent, and their milk is preferred to that of cows, yielding better butter, which, when clarified, forms, under the name of ghee, a

SINDE.

great article of commerce. A considerable trade is also driven in the hides of these animals. Sheep and goats abound in Upper Sinde, especially on the borders of the Pat of Shikarpur, and of the Thar, or Eastern Desert. The former district, called Boordgah, produces the best wool in Sinde, both of goats and sheep; and both animals are kept throughout Upper Sinde, as well for their flocks as for their milk and flesh. The wool is taken from the carcass of the animal only when alain for food, as the heat would cause its death after losing its fleece. The coarser wool is manufactured into bags, ropes, and strong cloths; the finer might be obtained in such quantities as to be an important branch of commerce, for which, however, there has been hitherto but little encouragement. The horses of Sinde are small and of mean appearance, but hardy, active, and enduring. They are mostly used for the saddle, the beasts of burden being the camel, the mule, and the ass. The camel is the dromedary or one-humped variety, and the finer descriptions are used for the saddle, carrying generally the rider and his attendant. The breed of asses is small, but they are neatly made, strong, active, capable of enduring great fatigue, and of living and thriving on the coarsest fare. The mules are large, strong, handsome, and quick in pace.

The Sindians of the present day are a mixed race, consisting partly of the Juts, probably aboriginal Sindians, of Hindoo extraction (many of whom have been converted to Mahometanism), and the Belooches, who have settled here in recent times. Those Hindoos who have adhered to their original religion and manners are divided into Bhattias and Lobannas, with their respective gurus or pastors, and the Pokarna and Sarsat Brahmans. They deviate much in their mode of life from the Hindoos of Hindostan proper, and this laxity is more particularly observable in the Lobannas, who are the most numerous. These last decline no means of subsistence, and readily entered into the service of the ameers, in which case they were obliged to wear their beards like the Mahometans. Compulsory conversions to Mahometanism were not unfrequent, the helpless Hindoo being forcibly subjected to circumcision on slight or misconstrued profession, or the false testimony of abandoned Mahometans. It is still more remarkable, that this forcible conversion was sometimes inflicted.
as a punishment, and in all instances operated as an irreparable loss of caste. The Mahometan population sprung from the converted Hindoos are a peaceable race, generally engaged in agriculture, and are despised by the Belooches, who affect a bold and martial character. In this, the latter have been encouraged by the ameers, of the same descent as themselves. Besides these distinctive races, there is a large part of the population the offspring of their intermarriages. The Hindoos, however, in many places, form a very large proportion of the population; at Shikarpoo, for instance, they are estimated at two-thirds. There are likewise a few Afghans, especially in the north-western part of the country. The Sindians, collectively, are described as handsome, though of dark complexions, well limbed, but inclined to corpulency, and above the middle size. The beauty of their women is proverbial, and Pottinger remarks, that among the numerous sets of dancing-girls whom he saw, there was not one who did not display loveliness of face or symmetry of figure. The Belooches, and the mixed race between them and the Hindoos, are considered the finest part of the population. Sinde is supposed by Sir William Jones to have been the original country of the gipsies, who, according to Adelung, fled from India to escape the massacres of the ruthless Tamerlane. The Sindian language is a branch of the Sanscrit or Indo-Germanic stock, merely a little differing in spelling and inflexion from the pure Hindi of Upper India, and is by some considered the elder of the two, being more elaborate and regular in the inflexions of its nouns and verbs. Macmurdo states, on the authority of native scholars, that "it has fewer modern innovations, and a greater number of Sanscrit words, than the Gujarati, which is a pure Hindoo dialect." It has a character peculiar to itself, which is written from left to right. Beloochee, another of the Indo-Germanic tongues, is of course largely spoken, especially in the hilly country; and Persian may be regarded as the language of the court and of the higher order of the people.

From the period when Sinde was visited by the Greeks

* Besides the older work of Grellman on this subject, see "Harriot on the Oriental Origin of the Gipsies," in Transact. of Royal As. Soc. vol. ii. 518—558; also Richardson on the Bazaergurs, vol. vii. 467, of As. Res.; and Kinnoroth (Asia Polylogue) on the branches of Sanscrit.
SINDE.

under Alexander, its history is in a great degree a blank. Native annalists appear to be magniloquent in regard to the grandeur, power, and resources of some of its princes; and, on the event of a revolution, brought about through the criminal passion of a queen for a young Brahmin, who was enabled by her favour to ascend, first to the office of chief minister, and subsequently to the throne, the historian who records the facts indulges in the following burst of mingled grief and admiration: 2—"Such was the close of the race of Rajah Sazee, which had governed the kingdom of Sinde for upwards of 2,000 years; whose princes at one period received tribute from eleven dependent kingdoms, and who had set the threats of the greatest monarchs of the world at defiance." In the sixth century of the Christian era, the country was invaded by the Persians, and to this invasion probably refers the allusion of the enthusiastic chronicler above quoted to the defiance offered by the royal house of Sinde to "the greatest monarchs of the world." The result, however, was disastrous to the reigning prince, though unproductive of any permanent change in the relation of the two countries. The Persians defeated the rajah in a pitched battle, in which the prince fell. But the object of the invaders appears to have been not so much conquest as plunder, and, having secured as much booty as they had the means of carrying away, they departed. Among the spoils which they bore from Sinde were some thousands of its most beautiful women.

At an early period of the Khalifate, the reputed wealth of Sinde seems to have excited the cupidity of the representatives of the Prophet; but their attempts, for a time, were unsuccessful. A subsequent invasion was attended by a different result. The Khalifs were in the habit of importing slave-girls from Sinde, and a party of the followers of the Khalif Abool Mulik, in charge of a selection of Hindoo beauties, destined for the harem of their master, were attacked by the rajah's troops, some of them killed, and the remainder made prisoners. This occurrence provoked a hostile visit from a Mahometan army. The rajah was permitted to remain quiet in his capital while the enemy were ravaging his dominions with fire and sword; and when, at last, he left the city with his army, it was but to
SINDE.

encounter disaster, defeat, and death. The events of the battle transferred the kingdom to Mahometan rule. *

Some centuries later, Sinde became a tributary to the empire of Ghuznee. On the dissolution of that empire, the Sindian chiefs asserted their independence against the Ghorian during many years, and with various success. Ultimately they were compelled to yield, and Sinde became a constituent part of the imperial dominions. In the time of Baber, it was invaded and conquered by the prince dispossessed by that emperor at Kandahar. The invader was subsequently compelled to yield the larger portion of his conquest. His son made an effort to regain what his father had lost, but found new enemies, to whom he was compelled to make large sacrifices. Sinde then, for a time, maintained a claim to independence, but was the scene of great disorders, two successive princes being afflicted with insanity in its most outrageous form. Late in the sixteenth century it yielded to the emperor Akbar, and for about 150 years it remained in the usual condition of Oriental dependencies; its chiefs usually professing unqualified submission to the emperor, paying tribute when they could no longer

* The victory gained by the Mahometans was followed by a remarkable instance of Oriental revenge. Among the captives were two daughters of the rajah, esteemed, it is said, the most beautiful women in Asia, and who, in conformity with Eastern custom, were reserved to grace the harem of the khalif. The princesses meditated vengeance on the general whose success deprived their father of his throne and life, and reduced them to captivity in a foreign land; and, on their arrival at Bagdad, effected their object, by accusing him of conduct which involved a breach of duty to his master, as well as an outrage on the feelings of his illustrious prisoners. The khalif, enraged at the alleged insult, ordered the supposed offender to be sewn up in the raw hide of a cow, and in this manner brought into his presence. The sentence was inflicted, and the unfortunate general, thus ungratefully recompensed for his success, died on the third day after being subjected to the punishment. The tale was subsequently discovered to have been fabricated, and the vengeance of the khalif, then directed towards the beautiful, but vindictive princesses, was manifested in a mode not less characteristic of Eastern cruelty, than was the punishment inflicted on their victim. He ordered them, after being totally divested of clothing, to be tied by the hair of their heads to the tails of horses, and in this manner dragged through the streets of Bagdad till they were dead. The horrible sentence was executed, and the mangled remains of the sufferers then ignominiously cast into the river. 1

1 Pott. 369, note.
SINE.

postpone it, but scrupulously evading that acknowledgment of supremacy whenever their fears were not sufficiently active to prompt to a different course. In 1739, Sinde fell to the Persian conqueror Nadir Shah. On his death, and the consequent dismemberment of his empire, it seems to have reverted to its nominal subjection to the imperial throne of Delhi. In 1756, Sinde was included in certain territories forming part of a dowry bestowed by the reigning emperor upon Tymur, son of Ahmed Shah Durani. It is thenceforward to be regarded as an appendage of Kabool, the new relation being maintained precisely in the same mode as that previously existing with the sovereign of Delhi. In 1779, a rebellion was raised by the Talpoor tribe of Belooches against the reigning nawaub, of the Kuloora tribe, who was defeated and forced to fly. He was reinstated in his dominions by the aid of the ruler of Kabool, and the insurgents retired. They soon, however, returned, deposed the Kuloora prince once more, and took possession of his throne and power. The ruler of Kabool again advanced to maintain the rights of his dependent, but the usurpers had collected an army superior to that of the Afghans, which they totally defeated. This was in 1786. Fortune being against the Afghan prince, it only remained for him to make the best terms he could. The battle was followed by negotiation; in virtue of which, the Talpoor chief engaged to discharge all arrears of tribute, and to meet the accruing payments in future with punctuality. Within little more than three years, presuming on the inability of the nominal emperor to coerce them, the rulers of Sinde signified their indisposition to paying tribute at all, and the weakness of the Duranic government insured to them for a time impunity. Zeman Shah approached their frontier in 1794, to enforce the demand of his house, but was prevailed on to return with a small portion only of the arrears due. A similar result attended the advance of Shoojah-oool-Moolk in 1809: he received a sum equal to something more than one-third of the amount which had accumulated, and returned, perhaps not altogether indisposed to congratulate himself on his good fortune in obtaining anything. The disturbances which subsequently prevailed in Afghanistan were admirably calculated to gratify the dislike of the ameers to dispensing any part of their treasures in the shape of tribute.
SINDE.

The government of Sinde, under the Talpoor dynasty, has been quaintly described by Kennedy as "a tailor-like personification of royalty, requiring precisely nine ameers or princes to make up one sovereign." In 1786, when Meer Futtuh Ali, the Belooche chief of the Talpoor tribe, succeeded in expelling the Kulora dynasty, and was recognised by the Durani monarch, he assigned large tracts of country to those of his relatives who had aided his enterprise; to Sohrab, Khyrpoor and Northern Sinde, to Thara, Meerpoor in the south-east, with the adjoining country, at the same time investing them with independent powers. He reserved Hyderabad and the greater part of the country for himself and his three brothers, residing with them in the same palace, and publicly administering the government with them in the same common durbar (hall of audience). Thus the country became divided into three states—Hyderabad, Khyrpoor, and Meerpoor—each having their little knot of ameers or rulers. In 1839 there were four ameers of Hyderabad, the sons of the first who enjoyed the dignity. There were, at the same time, three ameers at Khyrpoor, and one, or according to Kennedy two, at Meerpoor.

The government under the Talpoor ameers appears to have been a military despotism, uncheck'd, except by a regard to the dogmas of Islam. The ameers held courts of justice every Friday, and reserved to themselves the right of deciding in cases of life and death. Those potentates, in time of peace, had no more standing army than was sufficient to guard their persons and treasury, to collect the revenue, and retain the forts. Their avarice made them keep the regular military force so low in point of number, that it probably did not exceed 1,500 men. For great and important occasions of national warfare, the army consisted of a feudal soldiery, maintained by the respective chieftains, to whom had been allotted jaghires or grants, on condition of bringing into the field a proportionate number of men, for whom they were responsible, incurring forfeitures in cases of serious misconduct.

The relation of the British government with Sinde was at no time very close or very friendly. It was always characterized by coldness and suspicion on the part of the Scindian authorities, and sometimes by stronger marks of dislike. The agents
SINDE.

of the East-India Company resorted thither for the purposes of trade; but early in the present century the commercial resident of the Company was violently expelled, and a large amount of property in his custody seized. According to Pottinger, an attempt was made to murder the Resident. That author deems it matter for regret that on that occasion the ameers were not "made to feel the force of our arms within their dominions: had that been the case," he continues, "their conduct would doubtless have been of a very different nature towards the late missions to their court." Those missions were treated in various instances with great indecorum, and attempts were made to cast indignity on them in matters of etiquette and ceremony. In 1809, however, a treaty was concluded, the most important article of which was the following:—"The government of Sinde will not allow the establishment of the tribe of the French in Sinde;" it being then an important point to exclude from the vicinity of our Indian possessions an enemy who had long been desirous of attacking them. In 1820, another treaty was concluded, the chief object of which seems to have been the exclusion of European and American adventurers from the dominions of the ameers. A new treaty was formed in 1832, the most important provisions of which are those relating to the opening of the roads and the river of Sinde to the merchants of India. This privilege is stipulated for by the third article; and by the fifth, fixed and moderate duties are to be levied; but the concession was shackled by three conditions: First, that no military stores should pass; second, that no armed vessel or boat should come by the river; and third, that no English merchants should settle in Sinde, but should come as occasion might require, transact their business, and return to India. The third restriction was a step in retrogression, it having been stipulated in the treaty of 1820, that "if any of the subjects of either of the two states [the British and the Sindian] should establish their residence in the dominions of the other, and should conduct themselves in an orderly and peaceable manner in the territory to which they may emigrate, they will be allowed to remain in that situation." The change sufficiently marks the jealous feeling of the ameers towards the British government; while the first and second of the restrictions operated materially to diminish the value of the
opening of the Indus. A commercial treaty was concluded in the same year, and thus rested the relations of the Anglo-Indian government and Sinde till 1836, when Runjeet Singh prepared to carry into effect a design which he had long meditated, of reducing Sinde to subjection to himself. By the interposition of the government, however, he was prevailed upon to suspend his progress, and the opportunity being thought favourable for establishing a closer connection with Sinde, Colonel Pottinger was despatched to negotiate for the purpose. After a measure of delay proportioned to the practice of Eastern courts, a treaty was concluded in April, 1838, which possessed at least the merit of brevity. It contained only five articles; by the first of which the British government engaged its good offices to adjust the differences between the ameers and Runjeet Singh; by the second, it was stipulated that an accredited British minister should reside at the court of Hyderabad, and that the ameers should be at liberty to depute a vakeel to reside at the court of the British government.

The British government was now engaged in a series of measures designed to erect a barrier to the Anglo-Indian empire, by settling Afghanistan under a prince believed to be friendly to British interests, and an invasion of that country was meditated, for the purpose of restoring Shoojah-oool-Moolk to the possession of the dominions then held by Dost Mahomed Khan and his relations. With a view to this, a tripartite treaty was concluded in July, 1838, the parties thereto being the British government of India, the exiled Shah Shoojah-oool-Moolk, and the Sikh chieftain Runjeet Singh. Preparatory to carrying out its object, it became necessary to establish some more satisfactory relation with Sinde, and measures were taken accordingly, on which the treaty above mentioned was signed. A copy of it, with other papers illustrative of the existing policy of the British government, was transmitted to Colonel Pottinger, who was instructed to the following effect:—He was to apprise the ameers of the conviction of the Governor-General, that a crisis had arrived at which it was essentially requisite to the security of British India that the real friends of that power should unequivocally manifest their attachment: he was to inform them of the intentions of the British government with regard to the westward, and to point out articles in

2 Corresp. 1. 40, 42.
the tripartite treaty, by which that government engaged to arbitrate on the claim of Shoojah-ool-Moolk, as sovereign of Afghanistan, upon the ameers of Sinde; and proposed to bring also to a final settlement the claims of Runjeet Singh, as connected with the Shah and with the territories along the course of the Indus, formerly included within the dominions of the Afghan kingdom. Colonel Pottinger was also to intimate the approach of Shah Shoojah, supported by a British force, to express a hope, on the part of the Governor-General, in the friendly dispositions of the ameers, and to warn them that the disappointment of that hope would render necessary the temporary occupation of Shikarpour, and of as much of the adjacent country as might be required to afford a secure basis to the contemplated military operations, while, by neglecting to avail themselves of the proffered mediation in regard to the claim of Shoojah, they would become exposed to the full effect of any measures which he might deem proper for the enforcement of his claim, which, under such a supposition, the Governor-General could not interfere to control. The instructions advert to some other points, but the above are the chief.

Colonel Pottinger, in the discharge of his duty, had to encounter a full share of the impediments usual in oriental diplomacy, and the general conduct of the ameers of Hyderabad was such as to lead to an unqualified suspicion of their hostile feelings; the British army, however, passed without molestation, and the members of the British mission were compelled to take their departure. Alexander Burnes's was somewhat less difficult, though here a great obstacle to the conclusion of terms existed in the demand of the British government for the surrender of the fortress of Bukkur. The ameers at length gave way, and signed a general treaty of alliance, together with the most unpalatable article, conveying to his ally the right of occupying the strongest hold in his dominions. The Hyderabad ameers also finally gave way, and after various unsuccessful attempts at agreement, ratified a treaty originally consisting of twenty-one articles, but which had been cut down by the Governor-General, Lord Auckland, to fourteen. Among the articles expunged were several prescribing the manner in which intercourse should be carried on with the port of Kurrachee. Hostile possession of that place had previously been taken by
a British force, and the Governor-General regarded this fact as placing in the hands of the captors the power of dictating the terms on which intercourse with the port should be carried on. The general effect of the treaty was to place the territory of the ameers of Hyderabad in a state of subsidiary dependency on the British government. A treaty, nearly corresponding with that entered into with the Hyderabad chiefs, was subsequently concluded with Mere Shere Mohamed Khan, ameer of Meerpoor.

These arrangements did not prevent the recurrence of disputes. The disasters encountered by the English in Afghanistan were calculated to call forth the latent particles of enmity to that power wherever that might lurk, and some of the ameers at last were confidently believed to have passed beyond hostile wishes, and to have committed themselves to acts inconsistent with their relations of perfect amity and alliance with the British government. These circumstances were thought to call for some considerable changes in the existing treaties, and Sir Charles Napier was intrusted to negotiate new treaties, his diplomatic functions being sustained by a considerable military force, to act against the ameers in case of necessity. The ameers hesitated, but ultimately the treaty was signed by those of Lower Sinde, amidst the clamours of a host of infuriated Belooches, who openly insulted the officers of the British residency, and their servants. On the following day the residency was attacked, and its inmates were obliged to seek safety elsewhere. Sir Charles Napier immediately advanced, gave battle to the enemy on the 17th February, 1843, and though the Belooches fought bravely, succeeded in achieving the signal victory of Meeanee—a result greatly aided by the superiority of the arms of the British forces over those of their opponents. Triumph continued to attend the career of the victorious general. He was again successful in defeating the army of the ameer of Meerpoor, and the result was the complete subjugation of Sinde. Of the conquered territory, a small portion was added to Bahawulpore; a tract far more considerable was conferred upon Ali Moorad, of Khyrpoor; but of this the ameer has been recently dispossessed, under circumstances which will be found narrated in the article KHYRPOOR; and he now retains only the territory which he had inherited. With these
exceptions, the province has been annexed to the British dominions; stipends have been granted to the ameers, amounting in the aggregate to 46,614l. of which the sum of 18,264l. is allotted to the Khyrpoor branch; 25,290l. to the Hydabad branch; and 8,060l. to the Meerpoor branch.

Since its annexation to the British dominions, Sinde has been distributed into three collectorates; those of Shikarpore, Hydabad, and Kurrachee. The last census gives a population of 1,087,762. A new system of revenue administration has been introduced; annual fairs have been established at Kurrachee and Sukkur, and customs duties, previously levied on the land frontier and on the river Indus, have been altogether abolished. The country is represented as rapidly improving; according to official report, lands which have lain waste for half a century are now under cultivation; old canals, long choked up, are reopened, and fresh ones are constructed; new villages are springing up; and people go about everywhere unarmed and in perfect safety.

SINDE CANAL, flowing from the Indus, at lat. 27° 50', long. 69°, through the British district of Shikarpore.

SINDE SAGUR DOOAB.—A division of the Punjab, situated between the river Indus to the west, and the Chenaub and Jhelum rivers to the east. Its limits are from lat. 23° 27' to 34° 39', and from long. 70° 31' to 73° 39'.

SINDKHAIID.—A town in the native state of Hyderbad, or territory of the Nizam, 54 miles E. from Aurungabad, and 111 miles N.E. by E. from Ahmednuggur. Lat. 19° 55', long. 76° 11'.

SINDOODROOG.—See MALWAN.

SINDOORNEE.—A town in the British district of Candeish, presidency of Bombay, 72 miles E. of Malligaum. Lat. 20° 38', long. 75° 37'.

SINDOUSI, in the British district of Etawa, lieutenant-governorship of the North-West Provinces, a fort* and village

* The existence of a fort is alleged on the authority of Hamilton, who describes "Siadouse, a fort and pergunnah in the province of Agra, district of Etaweh, bounded on the north by the Jumna river, and inhabited by a singularly turbulent race of people. The pergunnah of Sindouse is so much intersected by ravines, as wholly to preclude cavalry from acting with effect, and to render it a dangerous and difficult service even for
in the pergunnah or subdivision of Burpoora. The river Chumbul forms the north-eastern boundary of the pergunnah to the confluence with the Jumna. The eastern and south-eastern boundary is formed by the Jumna as far as the confluence of the Sindh, and the latter river forms about one-half of the southern boundary, the remaining half abutting on the Mahratta frontier. It is a wild and barren tract, traversed by the river Kohari, and intersected in every direction by deep and steep ravines, very intricate and difficult to be explored. The uplands are sterile, and only at all cultivable by being arranged into terraces, overlaid with earth; the very limited extent of lowland along the courses of the rivers is of poor quality. It was until lately a fearful den of thieves, the inhabitants, who are Rajpoots, intermixed with a few Brahmins, being a wild race, and until roughly handled by the British authorities, the principal harbourers of thugs in that part of India; and "it was at Murna, adjoining Sindouse [Sindousi], that Lieutenant Maunsell was killed, on duty with Mr. Halbed, then in pursuit of the thugs." This enforced honesty has been more beneficial to the neighbouring districts than to the lawless occupants of the wilds of Sindousi, since "the resources of the zameendars have been greatly straitened by the expulsion of the thugs, and they have since much declined in prosperity." It contains nineteen mouzahs or hamlets. Sindousi, the principal place, is eight miles W. of the right or west bank of the Jumna, 22 miles S. of the cantonment of Etawa. Lat. 26° 20', long. 79° 10'.

SINDRAPA.—A town in the native state of Pallera, on the south-west frontier of Bengal, 53 miles S.E. by E. from Sumbulpoor, and 90 miles N. from Goomsoor. Lat. 21° 9', long. 84° 44'.

SINDREE, in the Rajpoot state of Jodhpoor, a town on the left bank of the river Sonee, and 90 miles S.W. of the town of Jodhpoor. Boileau, who passed near Sindree, states merely that it is "a place of some consequence;" and nothing infantry, which can act only in small parties, liable to be cut off by the superior knowledge of the country possessed by their opponents. The zemindary being almost wholly surrounded by the Mahratta territories south of the Chumbul, offenders have a facility of escape not common in other districts."
SIN.

more appears to be known about it. Lat. 25° 32', long. 71° 59'.

SINDUNOOR.—A town in one of the recently sequestrated districts of the native state of Hyderabad, 28 miles S.E. by E. from Moodgul, and 43 miles W. from Bellary. Lat. 15° 46', long. 76° 50'.

SINDWA,¹ in the presidency of Bombay, a village with a fort on the route from Mow to Bombay, 90² miles S.W. of former, 274 N.E. of latter. It is situate nine miles outside and north of the Sindwa Ghat, or pass across the Satpoora range of mountains. The ghat is a descent moderately steep from the highlands, amidst the Satpoora range, to the valley of the Taptee, in Candish; and being traversed by the Bombay and Agra road, it has become a much-frequented channel of communication and trade. The fort, which is of masonry, about a mile in circumference, was, with a glacis of 2,000 yards, ceded in 1818 to the British government by Holkar, by the treaty of Mundeesor.³ Lat. 21° 40', long. 75° 20'.

SINDWAH,¹ in the British territory of Saugor and Nero-budda, a small town on the route from Tehree to Oojin, 20² miles S.W. of former, 246 N.E. of latter. It has a fine tank, embanked with masonry, and is situate in a remarkably fine country. Lat. 24° 30', long. 78° 40'.

SINDWARA.—See CHINDWARA.

SINGA, in Bussahir, a pass crossing the range of Himalaya, bounding Kunawur on the south. This pass, and three others, traverse the crest of the ridge within a space of little more than a mile. It is open during May, June, July, and the first half of August, but nearly impracticable at other times, on account of the snow, which either sinks under the traveller, or parts into deep fissures. Its elevation above the sea is between 16,000 and 17,000 feet. Lat. 31° 15', long. 78° 29'.

SINGAPORE.—A town in the Rajpoot state of Jeypoor, situate on the left bank of the Lalglah river, and 71 miles E.N.E. from Jeypoor. Lat. 19° 30', long. 83° 23'.

SINGAPORE.—An island situated in the Straits of Malacca, at the southern extremity of the Malay peninsula, from which it is separated by a narrow strait, which, though not exceeding half a mile in breadth at some points, was formerly the channel.

¹ E.I.C. Ms. Doc. Transacts. Geol. Soc. 2nd series, i. 156 — Fraser, Journ. from Delhi to Bombay. ² Garden, Tables of Routes, 242. ³ Treaties with Native Princes, 621. ⁴ As. Res. vi. 27 — Hunter, Narrat. of a Journey from Agra to Oojin.
SINGAPORE.

of navigation between India and China, now carried on by a more southward course. According to a statistical report, prepared by order of the government, the island appears to be twenty-six miles in length, and thirteen in its greatest breadth, and to contain an area of 275 square miles. The physical aspect of the island is characterized by a low and undulating surface, rising in parts into rounded hills. "From a view taken from one of the most elevated spots about the town, the whole island appears to be pleasingly diversified with hill and dale, and covered with luxuriant foliage to the water's edge, presenting to the eye a scene that has repeatedly excited admiration. There appears to be only one hill of any considerable elevation in the island, namely, Buket Temah, which is situated near the old straits, and which seems to be about 500 feet in height." The climate of Singapore, though hotter than that of Malacca, is noted for its salubrity; the thermometer ranges from 71° to 89°; frequent tropical showers tend to keep vegetation in a state of perpetual verdure, and the island continues to attract invalids seeking the removal of the prejudicial effects of the sultry climate of Hindostan. The soil, except on the hills, is generally alluvial, producing fine crops of sugar, cotton, coffee, nutmegs, and pepper. Attempts have been made to cultivate the clove, but these have proved unsuccessful. For rice the island is dependent upon external commerce. The population of Singapore has rapidly increased from the date of its occupation by the British in 1819. At that period it consisted only of about 150 fishermen and pirates, living in a few miserable huts. In 1824, when the first regular census was taken, the number of inhabitants amounted to 10,683. Twelve years later they numbered 29,984, and according to the latest return (1848), the total population of the island, inclusive of military and convicts, had then increased to 57,421.

Singapore owes its prosperity to the freedom of its port, which has rendered it the great entrepôt for the goods of Europe and Asia. The number of European or American vessels arriving or departing from its port amounted in one year (1852-53) to 1,058, of which 733 were British; the aggregate tonnage was 273,955 tons. The arrivals and departures of native vessels in the same period numbered 2,107, with
SINGAPORE.

a tonnage of 70,194 tons. The value of the trade for the same year was as under:

Singapore is one of the penal settlements for India. Setting aside the cost of its convict establishment, the revenues of the island are represented as nearly equaling the expenditure; and thus, at a trifling cost, this great commercial depot is maintained, with an annual commerce valued at from six to seven millions sterling. Singapore has no fortress, and its defenceless state has recently occupied the attention of the government. It has been well observed, however, that in the event of a European war, the only defence upon which reliance could be placed would be a British fleet, and that any other should be calculated only for the repulse of privateering attacks, or for resistance against assault, in the event of the temporary absence of men-of-war. In accordance with this view, it has been determined to limit the fortifications of Singapore to one or two batteries, to be erected on commanding positions within the island. The harbour affords a safe anchorage to vessels at all seasons; its position is also favourable for commanding the straits; and from the great and growing importance of the settlement, the eligibility of the locality as a naval rendezvous has been strongly urged.

In regard to the promotion of commercial interests, the British government in 1818 were desirous of establishing a settlement in the Eastern Archipelago. Its accomplishment was confided to Sir Stamford Raffles, and the result was an arrangement, made in 1819, with the tumongong or governor of Johore, for the transfer of Singapore to the British, in consideration of a pecuniary equivalent. Subsequently, the absolute cession of the island in full sovereignty was effected by a formal treaty with the sultan of Johore, dated August, 1824, and the territory was recognised as part of the British empire, under the twelfth article of the treaty concluded with the king.

The government of Johore is vested in the tumongong, who, though residing usually at Singapore, administers the country and appropriates the revenue. His sanction is necessary to the succession of a sultan.

SINGHANA, in the Rajpoot territory of Shekawutee, a
town near the eastern frontier, towards Jhujur. Elphinstone
describes it as a handsome town, built of stone, on the skirts
of a hill of purplish rock about 600 feet high. In a rocky hill
two miles S.W. of the town is abundance of copper-ore, which
is worked to considerable extent, the subterraneous galleries
being in the aggregate nearly two miles in length. The
miner's occupation, in every case painful, here is peculiarly so,
from deficient skill and capital; and most sink under their
labours before they have attained forty years of age. The ore
is of very poor quality, yielding from two to seven per cent.;
and the miners pay to the Ketri raja, the proprietor, a sixth of
the produce, besides a fixed rent of 14,000 rupees annually.
There are two kinds of ore,—a sulphate and a sulphuret. The
scoriæ or khangar, that have been accumulating for ages, form
a line of small hills several hundred feet in length, and from
thirty to sixty feet high. There are four isolated stone bastions,
built on those artificial hills. Distance of Singhana from Agra,
N.W., 148 miles; S.W. from Delhi 95, N. from Jeypoor 80.
Lat. 28° 6', long. 75° 55'.

SINGHAPPOOR, in the British district of Shahjehanpoor,
lieutenant-governorship of the North-West Provinces, a village
on the route from Bareilly to Seetapoor, and 41 miles S.E. of
the former. The road in this part of the route is good; the
country level, cultivated in some places, in others overrun with
jungle. Lat. 28° 9', long. 80° 4'.

SINGHAPPOOR, in the British district of Agra, a village
on the route from the city of Agra to Jeypore, and 17 miles W. of the former. The road in this part of the route is good,
the country fertile and highly cultivated. Lat. 27° 7', long.
77° 48'.

SINGHBHOOM,—A district of British India, under the
superintendence of the political agent for the south-west
frontier, comprehending within its limits Colehan, Surakella,
Khursawa, and another petty native state bearing the name of
the district. It lies between lat. 22°—22° 58', long. 85° 7'—
86° 12'; is sixty miles in length from east to west, and fifty in
breadth from north to south. The area of the portion strictly
British is stated to be 2,944 square miles. The population of
the British part is returned at 200,000. The only place
probably to which the name of town can justly be applied is
Chaibassa, where the civil establishment is located. There
also a detachment of the Ramgurh light infantry, and some
local horse, are stationed, and there is a jail for criminals. The
rajah of the petty state called Singhbhoom pays a tribute of
107 rupees, the computed annual value of the estate being only 4,000. The other small states comprehended within this district will be found noticed under their respective names in the proper places in the alphabetical arrangement.

SINGHEASUR.—A town in the British district of Bhagulpoor, presidency of Bengal, 51 miles N. by W. of Bhagulpoor. Lat. 25° 55', long. 86° 51'.

SINGHLA, in Sirhind, a village on the route from Hansee to Lodiana, and 34 miles S. of the latter town. It is situate in a country with a slightly undulating surface, moderately fertile, and partially cultivated. The road in this part of the route is generally good, but in some places miry during rain. Distant N.W. from Calcutta 1,055 miles. Lat. 30° 27', long. 75° 59'.

SINGHPOOR.—In the British district of Sohagpoor, territory of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Sohagpoor to Ruttunpoor, 10 miles S.S.E. of the former. Lat. 28° 11', long. 81° 30'.

SINGIMABEE.—A town of North-Eastern India, in the British district of Goalpara, presidency of Bengal, 56 miles S.W. by W. of Goalpara. Lat. 25° 41', long. 89° 53'.

SINGOLA, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a village on the route from Allygurh to Moradabad, and 36 miles S.W. of the latter. The road in this part of the route is bad; the country low, level, and partially cultivated. Lat. 28° 27', long. 78° 28'.

SINGON.—A town in the native state of Indore, or territory of Holkar, 52 miles S.S.W. from Indoor, and 122 miles N.E. from Malligaum. Lat. 21° 59', long. 75° 34'.

SINGORAE.—A town in the native state of Phooljer, on the south-western frontier of Bengal, 50 miles W.S.W. from Sumbulpoor, and 96 miles S. from Odeipoor. Lat. 21° 18', long. 83° 15'.

SINGOWLEE.—A town in the Rajpoot state of Odeypoor, 100 miles E.N.E. from Oodeypoor, and 46 miles N.E. by N. from Neemuch. Lat. 25°, long. 75° 20'.

SINGPOOR, in the British district of Mirzapoor, lieutenant-governorship of the North-West Provinces, a town on
the route from Mirzapoor to Sirgoojah, 73 miles S. by E. of the former. Lat. 24° 7', long. 82° 55'.

SINGPOOR, in the British territory of Saugor and Ner-budda, lieutenant-governorship of the North-West Provinces, a town on the route from Saugor to Seuni, 68 miles S.S.E. of the former. Lat. 22° 58', long. 79° 13'.

SINGPOOREAH, in Sirhind, or the Cis-Sutlej territory, an estate formerly held by one of the protected Seik chiefs. Upon the decease of Umur Singh, in 1848, a collateral branch of the family was admitted to the inheritance; but the chief no longer exercises independent powers within his possessions. Lat. 31° 2', long. 76° 40'.

SINGRAMOW, in the British district of Jounpore, lieutenant-governorship of the North-West Provinces, a town on the route from Jounpore cantonment to that of Sooltanpoor, in Oude, 25 miles N.W. of the former, 33 S.E. of the latter. Supplies are scarce, and must be collected from the surrounding country; water is also of indifferent quality. The road in this part of the route is tolerable. Lat. 25° 57', long. 82° 28'.

SINGROUR, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on the left bank of the Ganges, 27 miles above the city of Allahabad by the river, and 835 miles from Calcutta by the same way. Lat. 25° 35', long. 81° 42'.

SINGROWLEE.—A tract of country, of which a portion (termed the Saipore or Shahpore division) now belongs to the rajah of Rewah, and the remainder (styled Singrowlee Proper) to the British government, forming a pergunnah of the district of Mirzapore. The boundaries of the entire tract are as follow:—North, the Mirzapore pergunnah of Agoree; east, the British district Palamow; south-east and south, Sirgoojah, in Gundwana, subject to the British; west, Rewah; and north-west, Burdee. It lies between lat. 23° 44'—24° 24', long. 82° 18'—83° 17'; its length from east to west is seventy miles, and its breadth from north to south thirty-five. The British portion consists of the tract lying eastward of long. 82° 49', and comprises about one-half of the whole territory. The rajah of Singrowlee was dependent upon the British government for one part of his zemindary, termed Singrowlee Proper, and upon the Rewah rajah for the remaining portion,
named Shahpoor. Of this last, however, he was, in 1840, dispossessed by the rajah of Rewah; and the rest has been since incorporated with the district of Mirzapore, of which, as above stated, it forms one of the pargunnahs.*

SINGUR, in the Rajpoot state of Jodhpour, a village on the route, via Nagor, from Jessulmeer to Nusserabad, and 101 miles N.W. of latter. The only water obtainable is from a very brackish well, and from a tank, which becomes dry in hot weather, when the inhabitants have recourse to a well four miles distant. The road is good, passing over a large plain. Lat. 27° 10', long. 73° 40'.

SINGURH, in the British collectorate of Poona, presidency of Bombay, a fort among the mountains south of Poona. It was originally called Konaneh, and received its present name from Sevajee, the founder of the Mahratta sway, who, in 1647, obtained it by bribing the commandant. In A.D. 1665, Sevajee, hoping to make his peace with Aurungzebe, surrendered this place to his general Jai Singh, but subsequently revolting, recovered it by surprise in the year 1670. After a lapse of more than thirty years, Singurh again appears as an object of contention between the Mahrattas and the Mahomedans. Between 1701 and 1705, Aurungzebe laboured incessantly to annihilate the Mahratta power, and in that period was successful in reducing many of their forts, of which Singurh was one. The emperor did not long retain his prize, it being retaken by one of the Mahratta leaders, to the great annoyance of Aurungzebe, who forthwith despatched one of his generals to recover possession of the place; a mission in

* In the paucity of official information on this tract, it may be observed that Hamilton, writing before it was embodied in the district of Mirzapur, states, from “MS. of J. Blunt, &c.”—“The Singhrowla rajah's territories commence on the north-west, at a narrow defile in the Bickery hills, called Bulghaut. In this tract, between the hills, are extensive valleys, but wild and uncultivated, and frequently covered with forests. A few small villages are scattered over the face of the country, in the vicinity of which some cultivation is seen, but the territory in general is very desolate. Iron is found in abundance, the price being from 1½ to 2½ rupees per 80 lbs. In this miserable region several Hindoo mythological excavations and images have been discovered, but of very inferior description to those in the Deccan. Singhrowla is still possessed by various petty and independent native chiefs, the principal of whom is the rajah of Shawpoor.”

1 India Pol. Disp. 19 March, 1840. 2 India Rev. Disp. 2 Oct. 1850. 3 Statistics of N.W. Prov. 147. Garden, Tables of Routes, 300. 4 E.I.C. Ms. Doc. 5 Duff, Hist. of Mahrattas, i. 62. 6 Id. l. 134. 7 Id. l. 200. 8 Id. l. 241, 242.
which he succeeded, from the failure of supplies in Singurh. From the same cause it was almost immediately retaken by the Mahrattas, who continued to hold it during the remaining period of their ascendancy. In 1817 it was surrendered by the Peishwa to the British troops, and restored to him at the close of the same year. After the expulsion of that chieftain from Poona, in 1818, it was invested by a considerable British army, and having suffered much from shells and shot, the garrison, at the end of ten days, capitulated. This took place on the 1st of March. The natural strength of Singurh is very great, from its situation among the Western Ghauts. With these hills it only communicates on the east and west, by very high, narrow ridges, while on the south and north it presents a huge rugged mountain, with an ascent of half a mile, in many parts nearly perpendicular. After arriving at this height, there is an immense craggy precipice of black rock, upwards of forty feet high, and surmounting the whole there is a strong stone wall, with towers. The fort is of a triangular shape, its interior upwards of two miles in circumference, and the exterior presents on all sides the stupendous barrier already mentioned, so that, except by the gates, entrance seems impossible. Elevation above the sea 4,162 feet. Distant from Poona, S.W., 11 miles; from Bombay, by Poona, S.E., 70 miles. Lat. 18° 24', long. 73° 50'.

SINGWARUH, in the British district of Sohagpoor, territory of Saugor and Nerbuddah, lieutenant-governorship of the North-West Provinces, a town on the route from Sohagpoor to Dumoh, 28 miles W. by N. of the former. Lat. 23° 26', long. 81° 1'.

SINGY.—A town in the native state of Oude, situate on the left bank of the Ghogra river, and 101 miles N. from Lucknow. Lat. 28° 19', long. 80° 57'.

SINNUR.—A town in the British district of Ahmednuggur, presidency of Bombay, 73 miles N.W. of Ahmednuggur. Lat. 19° 51', long. 74°.

SION.—A village in the island of Bombay, situate at its northern extremity, and near the point where the island of Salsette is united with that of Bombay by a causeway, and also by the railway bridge. Lat. 19° 2', long. 72° 56'.

SIPOON, a river of Bussahir, rises at an elevation of
SIP—SIR.

15,000 feet, in lat. 31° 24', long. 78° 6', on the southern declivity of the Yusu Pass, whence it is sometimes called the Yusu River. In the upper part of its course, it is a violent torrent, making its way, with difficulty, under snowbeds, and amidst huge masses of rock. "The further we went," observes Gerard, "the glen became more contracted, till at last it was bounded by mural rocks of granite, with the Seepon forcing its passage between them in impenetrable obscurity, under immense solid heaps of indestructible ice, running in ridges, and studded with tumuli of snow, shaped like inverted bottles. The fall of the torrent here appears to be above 20°." After a precipitate course of about five miles in a south-west direction, it receives a considerable torrent, flowing from the north-east, and about two miles below falls into the Pabur, the confluence having an elevation of 8,300 feet, and being in lat. 31° 18', long. 78° 4'.

SIPREE, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Calpee to Kotah, 162 miles S.W. of former, 159 E. of latter. It is now much decayed, but eighty years ago, according to Tieffenthaler, it was, after Narwar, the principal town in the district of that name. East of Sippee, and between it and the town of Narwar, the Sindh was traversed by a good bridge of squared stone, now ruined by the monsoon floods. Distant 65 miles S. of Gwalior fort. Lat. 25° 24', long. 77° 46'.

SIRA, in the Baree Dooab division of the Punjab, a town E.I.C. Ms. Doc.

* In the surveyor-general's map this torrent is erroneously styled the Sipun, and that corresponding in locality with the stream called by Gerard the Sipun, is denominated the Durban.

† Lloyd's account of this confluence deserves notice as a striking description of Himalaya scenery.—"We came to the confluence of the Seepun and the Pubburr. Here the enormous gneiss rocks rise sheer several hundred feet into mural precipices, over which many cascades, formed from the melting of the snows, tumble into the gulf below, which has been riven asunder by the uncontrollable cataracts. The ravines through which they dash are deep; that of the Pubburr, skirted by quivering crags, splintered into sharp pinnacles, and both darkened into abysses of gloom, filled with the whirlwinds of the whitest mists, and re-echoing the hollow thunders of the eternally-vexed torrents, which seem like the revelling laughter of desolation."

‡ In Franklin's great MS. map of Bundelkhand, this structure, however, is noted as "brick bridge broken down."
SIR.

situated on the left bank of the Ravee river, 49 miles S.W. of the town of Lahore. Lat. 31° 7', long. 73° 41'.

SIRAKOT, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a fort with a Hindoo temple, nine miles N.W. of the confluence of the Goree and Eastern Kalee. It is situate on a rocky ridge, projecting from the northern slope of a mountain, and having two of its sides craggy scarps to the depth of about 2,000 feet, and the part most remote from the mountain terminated by a chasm 700 feet deep. The point where it joins the mountain is traversed by five trenches of considerable depth, cut in the body of the ridge, and formerly crossed by drawbridges, but now in some degree obliterated. The path from Almora to Nepal winds round one of the steep sides, and is so narrow and broken, that it might be rendered impassable in an hour. The temple is situate on a conical rock, which rises nearly perpendicularly from the crest of the ridge, along which the decayed fortifications extend. Water can be obtained only from a small spring and reservoir, three-quarters of a mile distant from the fort, the garrison of which could readily be reduced by cutting off the supply; and accordingly, on its investment by the Gorkha invaders, it at once surrendered, since which time it has remained unoccupied, and has gradually fallen to ruin. Elevation above the sea 6,924 feet. Lat. 29° 49', long. 80° 17'.

SIRAWUH, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town on the route from Meerut to Boolundshuhur, 16 miles S. of the former. Lat. 28° 47', long. 77° 49'.

SIRC1,1 in the subdivision of Soonda, in the British district of North Canara, presidency of Madras, a town with a small mud fort, situate on the declivity of a ridge, one of the undulations of the rugged plateau into which the Ghats expand in this latitude. It is the station of the teshsildar or collector for the district. Though not centrically situated, Sirci, according to Buchanan, appears to have been selected for that purpose in consequence of its great thoroughfare and large custom-house. Distance from Mangalore, W., 120 miles; from Bombay, S.E., 320; from Madras, W., 885. Lat. 14° 36', long. 74° 54'.

1 Buchanan, Journey from Madras, through Canara and Malabar, iii. 217.
SIR.

SIRDARNUGUR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Calpee to Etawa, and 52½ miles S.E. of the latter. The road in this part of the route is rather good, the country partially cultivated. Lat. 26° 20', long. 79° 43'.

SIRDHANA, in the subdivision of the same name, district of Meerut, lieutenant-governorship of the North-West Provinces, a town on the route from Kurnal to the town of Meerut, and 11 miles N.W. of the latter. It is surrounded with a weak mud wall, and has within it a citadel, built of the same material, but latterly allowed to fall to decay. The principal building is the palace of the late Zeb ul Nissa, more generally known by the name of the Begum Sumroo, a spacious and handsome structure, profusely ornamented with paintings. At no great distance is the church, built by the same personage, who professed herself a proselyte to the Roman Catholic faith. It is, on a small scale, an imitation of St. Peter's at Rome, and has an altar ornamented with a beautiful piece of mosaic, enriched with precious stones. The population amounts to 12,481, about 1,200 of whom are professed Christians, having become proselytes, to recommend themselves to the favour of the Begum, and notoriously an idle, profligate race. The remarkable woman of whose petty dominion this small town was the capital, is generally reported to have been a native of Cashmere, originally a dancing-girl, subsequently concubine of Walter Summers, a desperate adventurer, of German origin, and ultimately, by a course of unscrupulous intrigue and fearless sanguinary measures, possessor of three considerable jaghireshr principalities, one immediately around Sirdhana, another fifty miles south of it, and a third a few miles southwest of Delhi. In 1808, when Doulut Rao Scindia ceded to the East-India Company the Doab, and some adjacent tracts, the claims of the female adventurer to the jaghiresh above mentioned were recognised by the supreme government, and confirmed by convention in 1805; and on her death, in 1836, all her territory having lapsed, was embodied into the adjacent British districts, Sirdhana and the contiguous country being made a pergunnah of Meerut. Sirdhana is situate in an open level country, and has water and supplies for troops in abun-
SIR.

dance. The road in this part of the route is good; the encamping-ground is on the east side of the town, near the church. Elevation above the sea 882 feet. Distance N.W. from Calcutta 897 miles. Lat. 29° 9', long. 77° 40'.

SIRDURPOOR.—A town in the native state of Oude, situate on the left bank of the Ganges river, and 49 miles W. from Lucknow. Lat. 26° 56', long. 80° 12'.

SIRDILLA.—A town in the British district of Behar, presidency of Bengal, 41 miles S. by W. of Behar. Lat. 24° 39', long. 85° 29'.

SIREENNUGGUR, in British Gurwhal, under the lieutenant-governorship of the North-West Provinces, a town now much decayed, though once the capital of Gurwhal. It is situate on the south or left bank of the Aluknunda, a great feeder of the Ganges, and in the midst of a valley about four miles long in the direction from east to west, and two miles broad. Viewed from above, the hollow in which the town is situate has the appearance of a double valley, one on a level with the river, the other on its banks, elevated above the water about forty or fifty feet, and extending along the base of the inclosing mountain. The lower valley, in which the town is situate, has apparently been excavated by the river, and left dry by the stream flowing further to the northward, and leaving between its present margin and the original bank a space of land stretching three or four furlongs south of the town, and now laid out in small fields and inclosures, among which mango-trees are thinly scattered. The aspect of the surrounding mountains is very barren, and in the dry season their scanty vegetation is soon parched up, with the exception of a few trees. On an island in the Aluknunda, close to the town, are ruins of buildings formerly connected with it; and on the opposite side are several hamlets, situate along the base of the mountain. The city has somewhat the shape of the segment of a circle, of which the river's bank is the chord. The principal street, which contains the bazar, is about half a mile long, and tolerably broad, but the others are so narrow that two persons can scarcely pass abreast. The houses are built of large rough stones, laid generally in mud instead of mortar, and are usually two stories high, with shelving roofs, covered with slates or shingles. The lower stories are allotted for
stores or shops, the families occupying the upper. The houses of the higher orders are little distinguished from those of others, except by a narrow balcony. A gloomy air is given to the town from this uniformity, which probably resulted in former times from the desire of the wealthier inhabitants to avoid attracting the notice of extortionate rulers. The palace of the rajah must have once displayed architectural pretensions and extent, wonderful in a community so rude and poor. It was built of large blocks of black stone laid in mortar, and had three grand fronts, each four stories high, with projecting porticos, and profusely ornamented in the lower part with elaborate sculptures. The porticos still remain, but the rest of the building has been laid in ruins by earthquakes. There are many Hindoo temples, none, however, meriting much notice. At one time the town was in a very flourishing condition, being the residence of the rajah of Gurwhal, and the channel of a brisk trade between the highlands and Tartary on the one side, and the plains on the other. The larger portion of this trade is now conducted through the eastern part of Kumaon, and the place has ceased to be the residence of the rajah since 1803, when he was expelled, and subsequently slain by the Goorkha invaders. In the same year an earthquake nearly destroyed the town, so that when Raper visited it in 1808, not above one house in five was inhabited, the rest being heaps of ruins. At the time of Moorcroft's visit in 1820, it had a few manufactures of coarse linens and woollens. The number of the houses in 1821 was 562, of which 438 were inhabited by Hindoos, ninety-six by Doms or outcasts, and twenty eight by Mussulmans. The number of inhabitants is probably about 3,000. The native establishments for the revenue and police of the western part of the province have been stationed at this place, and caused some improvement. The Aluknunda has here a channel 250 yards wide, but the breadth of the stream in the dry season does not exceed 100 yards. At the western extremity of the valley in which the town is situated, the current strikes with violence against the rocky base of the mountain. Near that part it is crossed by a jhula, or rude suspension-bridge of ropes, and in the immediate vicinity of the town is a ferry. The river, according to Hardwicke, is navigable for rafts or canoes. On the right bank of the
SIR.

river, and opposite to the town, is the village of Ranibath, containing a temple sacred to Rajah Iswara, at which the dancing-girls, who form the majority of the population, devote themselves to prostitution, by abjuring their kindred and anointing their heads with oil from a lamp placed before the altar. At a short distance beyond it is the fane of an idol, styled by Raper Rasee Devi, or "the god of love." In the hot season the temperature at Sireennuggur is high, as the elevation is not considerable, being probably little more than 2,000 feet above the sea. Distance N.W. from Calcutta, by Lucknow, Bareilly, and Almora, 1,007 miles. Lat. 30° 13', long. 78° 49'.

SIREENUGUR, in the British district of Ajmeer, lieutenant-governorship of the North-West Provinces, a town on the route from Ajmeer to Tonk, 10 miles E. by S. of the former. Lat. 26° 27', long. 74° 52'.

SIREY,1 or SIRSA, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a small town on the route, by the Kutra Pass, from the cantonment of Allahabad to Rewah, and 252 miles S.E. of the former. It is situate on the right bank of the Ganges, close to the confluence of the Tons, and on the right bank of the latter, which has here a bed 400 yards wide, and in the dry season a stream 150 yards wide, running under the left bank. The road in this part of the route is a good deal cut up by ravines, the country cultivated. Distant N.W. from Calcutta by land 490 miles, by the river 785,3 Lat. 25° 16', long. 82° 10'.

SIRGOOJAH.1—A raj of British India, named from its principal place, and under the control of the political agent for the south-west frontier of Bengal. It lies between lat. 22° 34' —23° 54', long. 82° 40'—84° 6'; is 90 miles in length from north to south, and 85 in breadth: the area is 5,441 square miles. The surface is rugged and mountainous, rising2 from 500 to 600 feet above the table-land of the adjoining district of Chota Nagpore. It is drained by the rivers Kunher and

* The bed of the Aluknunda, at its confluence with the Bhageeretsee, fifteen miles lower down, has an elevation of 1,9531 feet above the sea. As the Aluknunda is, according to Hardwicke, navigable, its fall is not probably more at the utmost than twenty feet in the mile; so that Sireennuggur is perhaps not more than 300 feet above the confluence, or 2,253 above the sea.

1 Garden, Tables of Routes, 33, 50, 52.
2 As. Res. xiv. 327—Hodgson and Herbert, Trigon. Surv. of Himalaya.
3 Ut supra, 504.
SIRGOOJAH.

Bhern, with its feeder the Mohan, flowing in a direction generally northerly. These rivers are mostly shallow, except during the rains, when they become rapid torrents.

Besides the ruined town of Sirgoojah, giving name to the district, the only place of the least importance is Sarnuda, and this is little more than a village. The population of the district is stated at 316,252.

The forests contain elephants, leopards, tigers, deer, and hogs: buffaloes come down in large numbers from Benares and Mirzapore to graze here. The timber is of the same species which abounds in Chota Nagpore.

The tract called Sirgoojah was nominally part of the possessions of the Bhoosla sovereign of Berar or Nagpore, but in 1802, in consequence of the frequent predatory inroads made by its insubordinate population into the British territory, Major Jones proceeded at the head of a detachment to the residence of the petty rajah or local chief; and the awe produced by this measure appears to have in a great degree checked further attempts at annoyance. By treaty with the rajah of Nagpore in 1818, the supreme control of this district was ceded to the East-India Company, with some other territorial rights. The country, a few years since, was reported by the Governor-General’s agent to be worth annually four or five lacs, and to be in an improving state. The tribute was paid with regularity: it amounted originally to 3,200 rupees per annum; but upon the lapse to the British of the small raj of Odeipoor, a deduction was made of the amount which had previously been annually credited to Sirgoojah from the revenues of that petty state. On the death of the rajah in 1851, the elder son and successor being of infirm intellect, an arrangement was made, by which the administration was placed in the hands of his younger brother, Bindaseree Pershaud. For the relation of the state to the British government, see SOUTH-WEST FRONTIER OF BENGAL.

SIRGOOJAH,1 the place giving name to the district so called, is a ruined town 140 miles S. of Mirzapore, and 340 W. of Calcutta. Hamilton states that in 1822 scarcely a vestige existed of it. Lat. 23° 8', long. 83° 8'.

1 Sarguja of Tassin; Sirgooa of Prinsep; 2 Sirgoojah of Rennell; 3 Sirgoojah of British official documents. This place is also styled Joona Nuggur.
SIRHIND.

SIRHIND.—An extensive territorial division of Hindostan, bounded on the north by the Punjab; on the east by Sirmoor and other hill states, and by the British districts of Saharanpore, Paniput, and Rohtuck; on the south by Rohtuck and Hurreana; and on the west by the state of Bahawulpore. It is about 220 miles in length from east to west, and 160 in breadth; and lies between lat. 29° 3'—31° 24', and long. 73° 50'—77° 39': the superficial extent is probably about 17,000 square miles. Sirhind in nearly its whole extent is a level plain, except where the surface, at the north-east, rises into the lower ranges of the Himalaya. This small extent of elevated surface terminates at the north-east frontier in a low range, which stretches seventy-five miles in a south-east direction, from near the left bank of the Sutlej, a little above Bopur, to the right bank of the Jumna, close to its efflux from the Dehra Doon. This range consequently extends from about lat. 30° 22', long. 77° 38', to lat. 31° 2', long 76° 40'. It is the lowest step of that hill tract described by Dr. Royle in the following passage: “The low range of hills, frequently separated from the true Himalaya by diluvial valleys or doons, such as that of Deyra, seldom attains an elevation of more than 3,500 feet, or 2,500 above the plains of Northern India. The principal passes across this range were 2,339 and 2,985 feet before they were cut down.”

The plain which forms the rest of Sirhind, slopes very gradually from north-east to south-west, and is unbroken except by depressions swept by watercourses, or sandhills, especially in the more barren tract which extends over the west and adjoins the territory of Bahawulpore, and of that of Bbutteana. A few years ago, a survey was made by order of government, and a line of levels taken for ascertaining the practicability of connecting the Sutlej and Jumna by canal, at the points on those great rivers where the downward naviga-

* Wilford asserts that the word “Sirhind” is neither Sanscrit nor Hindoo, but is an Indo-Scythian compound, and signifies the limits or borders of Hind. Jacquemont (whatever his opinion on the subject may be worth) considers it of Persian origin, and translates it “Head of India.”

† The Sewalik Mountains.
‡ The Sub-Himalaya, as it is well styled by Baker.
SIRHIND.

tion commences for vessels of any considerable burthen. The south-eastern extremity of the line contemplated is on the right bank of the Jumna, six miles east of Kurnaul, and at an elevation of about 1,000 feet above the sea; and it held a course in a right line nearly due north-west to Loodiana, on the left bank of a navigable channel of the Sutlej. This line, 112 miles long, crosses all the watercourses flowing from the Himalaya, and probably traverses the roughest part of the country. The inequalities result either from ridges rising to small elevation above the average level of the country, or from shallow valleys, apparently formed by the numerous streams. The country, however, in proceeding westward, has a general and gradual rise, which attains its maximum elevation of sixty-seven feet at Kuddoo, ninety miles from the Jumna, whence, in twenty-two miles, it falls to the Sutlej, the level of which is two feet lower than that of the Jumna. Thus the whole of Sirhind may be regarded as a low ridge, rising between the Jumna and the Sutlej, as the bed of every watercourse between these two rivers is invariably several feet higher than that of either. In the course of the survey, the depth of 156 wells was taken. By this, the surveyor wished to ascertain whether, as some supposed, measurements of the level of springs would give data for an approximate calculation of the profile of the country. In this respect, the author remarks, "my present observations, as well as those made with the same view in other localities, show that the level of springs is too much affected by the vicinity of streams, the degree of permeability of soils, and other local circumstances, to admit of any accurate conclusion being drawn from them regarding the profile of the surface." The water drawn off from the projected canal by the expenditure for lockage, or by evaporation or absorption, could be replaced on the eastern slope at the highest level, by means of a feeder from the Delhi Canal, communicating with the Jumna, and on the western, by one from the Sutlej, above Ropur. Such a canal would connect the extensive and highly important navigation of the Ganges and its tributaries with that of the Indus.

The Jumna, where it issues from the mountains, touches on this territory, in lat. 30° 25', long. 77° 39', and forms its south-eastern boundary for about seventy miles. The Sutlej, from the

---
point of its egress from the mountains, about thirty-five miles above Ropur, forms the northern and north-western boundary of Sirhind; the course of the river being for the upper part, first from north to south, then from east to west; for the lower, from north-east to south-west. The country between the Jumna and the Sutlej is traversed by above a dozen considerable torrents. Of these the principal are the Sursooty, the Markanda, the Gagur or Cuggur, the Putteeala Nullah, and the Khan-poorkee-Nuddee. These torrents generally communicate with each other during the season of inundation.

On this subject a recent accurate observer says: "From near Thanesur to Konaheree the whole tract of country (with the exception of village sites) is liable to inundation from the Sub-Himalayan torrents, diffused over its surface by means of a network of natural and artificial watercourses, of which some are supplied from more than one of the rivers above named; others again flow from one river into another, and during great floods (as I was given to understand) all three are frequently united. The inhabitants avail themselves largely of the inundation for rice-cultivation, though, during the present season at least, little advantage appeared to have been taken of the facilities afforded for irrigating rubbee (spring) crops, which, where they existed, were generally watered from wells. I had not leisure to ascertain by personal examination whether the first diffusion of these rivers (which I have myself seen nearer the hills in single and separate streams) were caused by natural or artificial means, but it is probably attributable to both. The slope and evenness of the country are calculated to favour even the rudest attempts to divert the streams from their original beds; and the same circumstances would also render it easy, were it desirable, to confine them again to one or two principal channels." Far more important than those streams is a system of artificial watercourses, which in the eastern extremity of Sirhind run in some measure parallel to the Jumna, but to the west of it, and conveying a volume of water nearly equal to that of this river. This great work originated with Firoz Toghluk, Tartar king of Delhi, who ascended the throne 1351, and died 1388.¹ He commenced it at the right bank of the Jumna, in lat. 30° 19', and turning into

¹ Ferishta, 1. 445, 461.

SIRHIND.

it several of the torrents which traverse Sirhind, conducted it 100 miles in a south-westerly direction to Dhatrat, where, according to the opinion of Colvin, he took advantage of the natural bed of the Chittung torrent, flowing in the same direction thirty-five miles farther to Hansi; beyond which the watercourse is continued about eighteen miles, in a direction a little north of west, to Hissar. The total length, consequently, of the canal of Firoz to this place is 150 miles. A few miles beyond Hissar all traces of excavation cease, but a natural channel in time of inundation conveys the redundant water westward, until lost in the sands of Bikanir, or probably, in case of very great floods, discharged into the Gagur, and ultimately into the Sutlej. The canal of Firoz having, after the death of its constructor, been allowed through neglect to become choked up, was, early in the seventeenth century, cleared out by Ali Murdan Khan, who, at Mudloda, about eighty miles from its commencement, formed a channel proceeding due south, and consequently diverging there from the original watercourse. This new channel has a south-easterly direction for about as it is completely corroborated by the minute and skilful survey of Colvin. In the year 757 [A.D. 1356], he [Firoz] constructed another canal between the hills of Mundvy and Surmore, from the Jumna, into which he led seven other minor streams, which, all uniting, ran in one channel through Hansi, and from thence to Raiseen, where he built a strong fort, which he called Hissar Firoza. Firoz also made a canal a hundred miles long, from the Jumna to that just described; another from the Gagur, conveyed by aqueduct across the Sursooty, to a town, called by him Firozabad, which does not appear at present to exist, but was probably situate somewhere near Jheend. He also made a canal from the Sutlej to Gagur, a distance of about seventy miles. This statement of Ferishta has been questioned because no trace of the work described can now be found on the bank of the Sutlej; but much greater changes than the obliteration of such a channel continually take place under the powerful agency of inundations in this alluvial soil. The second of the canals just described is mentioned in the Ayeen Akbery. “Hissar was founded by Sultan Feroor; he dug a canal, which brings the water of the Jumna near the city. A dervish predicted his accession to the throne; and at the instance of the dervish he dug the canal. This canal passes near the town of Siras, and loses itself in the lake Bhedar in a wonderful manner, and of which many strange stories are related.”

The lake of Bhader, according to Ferishta, was formed by Firoz near Hissar. It does not seem at present to exist; it at least is not laid down in the reduced map of Colvin, in the Journal of the Asiatic Society of Bengal.
SIRHIND.

seventy miles, to Delhi, whence it is generally known by the name of the Delhi Canal, sometimes by that of Ali Murdan Khan, and sometimes is styled Shah Nahr (King’s River), probably in honour of the royal master of the projector, or perhaps of Ahmed Shah Dooranee, who, during his brief possession of Delhi, expended a lac of rupees in repairing the work. Both those canals were by command of the supreme government put into adequate repair, in the years intervening between 1817 and 1826. The extent of the Firoz Canal, with its various branches, is 240 miles.

The territory is held by native chieftains, with the exception of such portions of it as have escheated to the East-India Company, in virtue of its paramount authority over the country. The descent of the three principal chieftainships, of Putteala, Jheend, and Nabbah, has been formally determined to be to heirs male only; and on failure of such in a direct line, the estate passes to the next of kin. In the minor possessions, the right of inheritance, as established by the custom of each family, so far as it can be ascertained, is invariably respected by the superior government. The customs are not only widely different, but appear to be in their origin and character exceedingly capricious. Captain Murray, formerly superintendent of the hill territories, thus speaks of them:—“The rules of succession to landed property in the Sikh states are arbitrary, and are variously modified, in accordance to the usages, the interests, and prejudices of different families; nor is it practicable to reduce the anomalous system to a fixed and leading principle.” Among some tribes female succession is recognised; by others it is disallowed. Succession by adoption has never been practised; and in one or two instances in which attempts were made to obtain the sanction of the British government to the adoption of an heir, it was, with reference to the utter want of precedent, refused.

The Sikhs in general, in obedience to an injunction of their religion, eschew smoking tobacco; but considering the use of fermented drinks not forbidden, they exercise the liberty sup-
SIRHIND.

posed to be allowed them, by indulging in the copious use of ardent spirits; insomuch that sobriety\(^8\) is rare among these people, and numbers shorten their days by excess in this indulgence. They also use opium freely, as well as bang, the intoxicating drug extracted from hemp. Every sort of food is allowed by their religion, except the flesh of the cow, the slaying of which is punished with cruel death.\(^9\) The Sikhs, however, may, on the whole, be considered tolerant, though they treat both Hindoos and Mussulmans with contempt, and prohibit the latter from delivering from their mosques the azan,\(^1\) or solemn call to prayers.

The establishment of the Sikh modification of Brahminism, in many respects a highly important event, is especially so as being perhaps a step to the abrogation of a vast system of superstition, probably the most influential, as well as the most tyrannical and mischievous, that has ever enthralled and depraved human nature. Nanac, the founder of this faith, was born 1469,\(^2\) at Talwandi, a village on the river Beas. Being of a contemplative disposition, and it is said devout and benevolent, he became an ascetic, remarkable for his austerities, even among the Hindoos. Subsequently he is said to have preached the unity and omnipresence of God, the necessity of good works, of peace and of good-will towards men. His successors, however, have greatly departed from the first principles of their faith, if the above statement of the tenets of their founder be correct. He was a very moderate innovator, according to the following account, in which, however, the original purity of the Hindoo creed seems rather needlessly and groundlessly assumed. He "made," it is said, "no material invasion of either the civil or religious usages of the Hindoos; and as his only desire was to restore a nation who had degenerated from their original pure worship into idolatry, he may be considered more in the light of a reformer than of a subverter of the Hindoo religion; and those Sikhs who adhere to his tenets, without admitting those of Guru Govind, are hardly to be distinguished from the great mass of Hindoo population, among whom there are many sects who differ much more than that of Nanac from the general and orthodox worship at present established in India."\(^3\) His followers were called Sikhs, or "disciples;" himself, Guru, or "spiritual guide." He died at
SIRHIND.

seventy years of age, having bequeathed his spiritual supremacy to a favourite disciple. Ram Das, the third guru in exclusive succession from Nanac, formed a celebrated tank, which he called Amritsar, or "lake of ambrosia;" and the great city which has grown up about it bears the same name. Arjunmal, the fourth guru, compiled the Adi Granth, one of the sacred books of the Sikhs, from the various effusions of his predecessors. This last guru having fallen a victim to the persecution of the Mahomedans, his successor, Har Govind, ordered his followers to arm and take vengeance on their persecutors; he also permitted his adherents to eat the flesh of all animals except kite, whereas Nanac had prohibited that of hogs. Guru Govind, the ninth in exclusive succession from Nanac, was a bold innovator, and a brave but ferocious soldier, who, furiously exasperated at the fate of Tegh Bahadur, his father and predecessor, executed by order of the Mogul emperor Aurungzebe in 1675, took up arms, and, mustering his followers, gave them institutions calculated to inspire fierce nationality and unconquerable military ardour. They were to bear the name of Singh, or lion, which had hitherto been exclusively arrogated by the Rajpoots; were always to have steel in some form about their persons, as an emblem of their devotion to war and its duties; while, as external marks of distinction, they were to allow their beards and the hair of their heads to grow in undiminished luxuriance, and to wear blue clothes. At the same time all distinctions of caste were abolished, and every one was invited to receive the initiatory rite, and, becoming a member of the Singh Khalsa or commonwealth, to participate in its advantages. These institutions of Guru Govind caused the division of the Sikhs into two great sects,—the Khalsa, or those who rejected these innovations, and the

* Called by Ward "Nanuku-shaktrees." Of this division of Sikhs, according to Wilson, the principal subdivision is the "sect of the Udasis. These may be regarded as the genuine disciples of Nanak, professing, as the name denotes, indifference to worldly visitations. They are purely religious characters, devoting themselves to prayer and meditation, and usually collected in sangats, colleges, or convents. They also travel about to places of pilgrimage, generally in parties of some strength." The Udsai sect was founded by Dharmachana, the grandson of Nanak. According to Malcolm, Khalsa is said by some to come from Khalis, "pure," or "select," and to mean the purest or the select; by others, from Khalas,
SIRHIND.

Singhs, who adopted them, and are actually the great influential body of the nation. Initiation into the community of the Singhs is celebrated by five of their number, who administer to the candidate five draughts of sugar and water, making him at the same time repeat a rhyming liturgy. According to Prinsep, the sacred beverage is made with the water in which the initiators and the neophyte or candidate have washed their feet. Forster, however, states that it is merely touched with the toe. Wilson says, "The Sikhs are still to a certain extent Hindoos. They worship the same deities as the Hindoos, and celebrate all their festivals; they derive their legends and literature from the same sources, and pay great veneration to the Brahmins. The impress of their origin is still, therefore, strongly retained, notwithstanding their rejection of caste, and their substituting the Das Padshah ki Granth, the compilation of Guru Govind, for the Vedas and Puranas." This view of the doctrines and practices of the Sikhs is obviously inconsistent with that which assigns to them the belief in a creed of pure theism, and the practice of a spiritual and benevolent devotion. Probably this palmy state never existed; if it ever did, it is certain that it did not continue long.

Guru Govind, at the head of his followers, whom he had succeeded in transmuting into a host of sanguinary and desperate fanatics, gained repeated victories over the armies of the Mogul emperors; but being at length overpowered, he was obliged to flee, leaving his mother and his two children in the hands of the Mahomedans, who cruelly put them to death at the town of Sirhind. He sank under the weight of his misfortunes, and died in obscurity. He was the last of the gurus, and thus was luckily fulfilled a prophecy which limited their number to ten. Such prophecies are easily manufactured.

"free," and to "mean the freed or exempt, alluding to the tribe being exempt from the usages imposed on the other Sikhs." It is obvious, however, that between the names of the Khalsa, or public body of the Singhs, and of the Khoolasas, or primitive votaries of Nanak, there is a confusion which requires to be cleared up, especially as both words are from the same etymological root, Khalsa, which is by Malcolm explained to mean the state or commonwealth, is by the Sikhs supposed to have a mystical meaning, and to imply that superior government, under the protection of which they live, and to the established laws and rules of which, as fixed by Guru Govind, it is their civil and religious duty to conform."
SIRHIND.

Sometimes they follow the event; and when they precede it, they conduce to their own fulfilment. After the death of Govind, the military force of the nation was successfully wielded by Banda, a brave but ferocious leader, who, in revenge for the slaughter of the wife and children of Guru Govind, stormed the town of Sirhind, demolished the mosques, exterminated the inhabitants, tore the bodies of the dead from their graves, and cast them forth to birds and beasts of prey. He then overran the whole of the district of Sirhind, and threatened to conquer all Hindostan, until, being defeated in a decisive engagement, he was made prisoner, and about the year 1710 put to death with studied cruelty at Delhi. The Sikhs continued prostrate and obscure until the power of the Mogul empire was broken up by the invasion of Nadir Shah, whose army they harassed and plundered in his return homewards. Subsequently, in their predatory expeditions they overran the Punjab, and on the flight of Timur, the son of Ahmed Shah, in 1758, made themselves masters of Lahore.\(^1\) In 1762, Ahmed Shah Dooranee, after the battle of Paniput, razed Amritsar to the ground, filling up the sacred tank with the ruins, and moreover polluting it with the blood of kine; erected pyramids of the heads of the slain Sikhs, and washed the walls of the mosques with their blood, in revenge for their previous desecration of those edifices.\(^2\) In the following year, when Ahmed Shah had marched home to Cabul, the Sikhs made themselves masters of both Lahore and Amritsar, and retaliated on the Mussulmans the disgrace and cruelties which they had endured. “During the year 1764 they had overrun and seized on an extent of territory reaching from the borders of the Indus to the districts of Delhi;”\(^3\) and throughout this extensive region firmly established their power and religion.

The British power first came into collision with the Sikhs in 1805, when Lord Lake marched into the Punjab in pursuit of Jeawunt Rao Holkar, the Mahratta potentate, who, discomfited by the wily Runjeet Singh, then in an early stage of his career, was constrained to make peace with his conquerors.\(^4\) In 1809, the aggression of Runjeet Singh on the Sikh chiefs on the left bank of the Sutlej exciting the apprehension of the Anglo-Indian government, a British force was marched across the Jumna, whereupon the ambitious but
SIRHIND.

politic adventurer speedily, and with a good grace, concluded a treaty, by which he restricted himself from all hostile operations in the country lying left of the Sutlej; the number of his troops there being limited to so many as should be required for government purposes in the districts over which his supremacy extended. The British government then issued and circulated, among the remaining sirdars or chiefs, a general declaration that they were under its protection.

Several portions of this territory have at different periods lapsed to the Company’s government, from failure of heirs; and when that government was forced into war with Lahore, further alienations took place, from a different cause. The penal measures which it became just and expedient to inflict on several of the Sikh chiefs, for acts of hostility or non-performance of their feudatory obligations during the Lahore war, led to considerable changes in the state of territorial possessions in the Cis-Sutlej territories. In addition to the territory of Ladwa, that of Roopur was wholly confiscated; and the chief having been pensioned, resides at Saharanpore. The Cis-Sutlej possessions of the Allowalleea chiefs were also confiscated, and Nabah, one of the principal of the protected states, has been mulcted of one-fourth of its territory. The British government availed itself of these acquisitions to reward the fidelity of the rajahs of Putteela, Jheend, and Furreedkote, to each of whom an addition of territory was granted. New sunnuds were granted to the rajahs of Putteela and Jheend, in which clauses have been inserted, binding them to renounce all transit-duties, to make and keep in repair a military road, and to abolish suttee, infanticide, and slave-dealing. The British police jurisdiction has been introduced into most of the protected Sikh states, and the levy of customs has been abolished in the whole, compensation being granted to the chiefs.

The British possessions in the Cis-Sutlej Sikh territory have been divided into four districts,—Ferozepore, Loodianah, Umballah, and Kythul: the aggregate revenue is between eighteen and nineteen lacs of rupees (180,000l. to 190,000l.).

* The excepted chiefs, who still conduct the internal administration of their territories, are those of Putteela, Furreedkote, Jheend, Nabha, Mulair Kotela, Raekote, Booreah, Mundote, Chickrowlee.
SIRHIND.

A civil and sessions judge for the Cis-Sutlej territory has been appointed, and also a commissioner.

Sirhind, situate between the Himalaya on the north and the desert of Bikaner on the south, has repeatedly been traversed by armies advancing to the invasion of India, and hence has been the scene of many conflicts and other memorable events. As it was saved from the threatened invasion of Alexander by the mutiny of his troops, probably the first great military operation recorded to have taken place on its soil was the capture of Thanesur, in 1011, by Mahmud of Ghuznee, who plundered the city, broke the idols, and carried the fragments of that called Jugasoma to Ghuznee, to be trodden under the feet of Mussulmans. After the death of Mahmud, the Hindoos, in 1043, recovered possession of this place and the rest of Sirhind. In 1191, Mahomed, the Afghan prince of Ghor, attempting to recover the Mussulman conquests in Sirhind, received a severe defeat near Thanesur, and fled to Ghuznee, but returned in the following year, and having on the same field routed a great Hindoo army, made himself master of the whole country, which continued subject to the Mussulmans until the Sikh outbreak. It escaped the horrors of the invasion of Tamerlane in 1397, as the route of that prince in marching from Batnir, which he had laid in ruins, to Delhi, only touched the southern frontier; and having proceeded to Cupeli or Koupelah, to exterminate the Hindoos assembled there, he returned to Khorasan, through the Sewalik Mountains, by Jamoo and the southern boundary of Cashmere, probably crossing the Indus above Attok. In 1525, Baber, in his advance against Ibrahim, the Patan king of Delhi, overran and seized the greater part of Sirhind. In 1554, the vicinity of the town of Sirhind was the scene of an action, in which Humayon, the son of Baber, gained a decisive victory over the far more numerous army of his Patan rival, and gave peace to the Mogul empire. Sirhind appears from that time to have tranquilly enjoyed the imperial favour, until the outbreak of the Sikh insurrection, of the progress and result of which a sketch has been given under the article PUNJAB.

SIRHIND.—A town in the native state of Patiala, 23 miles N. from Patialah, and 27 miles N.W. from Ambala. Lat. 30° 38’, long. 76° 29’.
SIR.

SIRHOOBPOOR,¹ in the territory of Oude, a village on the route from Azimgurh to Sultanpoor cantonment, 46² miles W. of the former, 32 S.E. of the latter. Lat. 26° 15', long. 82° 43'.

SIRINAGUR, "the town of Surya or the Sun," the capital of Cashmere, and at present more generally known by the same name as that of the valley at large. The town extends¹ about four miles along both banks of the Jhelum or Behut, which here, deep and sluggish, winds in a very picturesque manner through the town, and adds much to the prospect, by the enlivening effect of the numerous and variously constructed vessels by which it is navigated. The north-west part of the town is the principal, and is situate on the right bank of the river; on the south-east and south is the suburb of Sher-Gehr, which has fortifications of no great strength, and contains the usual residence of the governor. This seat of government has two stories overtopping the ramparts, and a principal entrance communicating with the river by broad wooden stairs.² On the north of the city rises a hill, called the Kohi Maran, Hari Parbat, or Hirney Parvat, of trap formation, and having an elevation of about 250 feet above the Jhelum: on the summit is an ill-constructed fort of slight strength, though, according to Hügel,³ it might easily be made impregnable. According to the statement of Vigne, the Mogul emperor Akbar caused a wall to be built round the base of the hill, a circuit of about 4,000 paces. Of the five gates in this wall, one bears an inscription, stating that the tower Naginagur, thus inclosed, was built A.H. 1006, cost 11,000,000 of rupees,⁴ and that 200 master-builders were employed on it. Of this great undertaking nothing remains but a handsome mosque; the rest has been reduced to a vast extent of shapeless ruins, at present totally uninhabited. Moorcroft⁵ draws a very repulsive picture of the city of Sirinagur. "The general character of the city of Cashmere is that of a confused mass of ill-favoured buildings, forming a complicated labyrinth of narrow and dirty lanes, scarcely broad enough for a single cart to pass, badly paved, and having a small gutter in the centre, full of filth, banked upon each side by a border of mire. The houses are in general

¹ According to Hügel,¹ the Hindoos call it Sirinagur; the Mahometans,¹ Kashmir.

535
SIRINAGUR.

two or three stories high; they are built of unburnt bricks and timber, the former serving for little else than to fill up the interstices of the latter. They are not plastered, are badly constructed, and are mostly in a neglected and ruinous condition, with broken doors or no doors at all, with shattered lattices, windows stopped up with boards, paper, or rags, walls out of the perpendicular, and pitched roofs threatening to fall. The roofs are formed of layers of birch-bark covered by a coating of earth, in which seeds, dropped by birds or wafted by the wind, have vegetated, and they are constantly overrun with grass, flowers, and seeds. The houses of the better class are commonly detached and surrounded by a wall and gardens, the latter of which often communicate with a canal. The condition of the gardens is no better than that of the buildings, and the whole presents a striking picture of wretchedness and decay.

The public buildings of this city are not in much better style than the private dwellings. The oldest structure is the tomb of the mother of a Cashmirian king, who reigned in the middle of the fifteenth century. It is built, in an octagonal form, of brick, the walls being seven or eight feet thick, and surmounted by a dome constructed with great strength and solidity, but altogether devoid of architectural beauty. The Jama Musjid, or "great mosque," is the most celebrated building of the city; and native estimate, which is probably exaggerated, represents it capable of containing 60,000 persons. The foundation and lower part of the walls are built of stone, the upper of brick. The whole is surmounted by a dome and spire rudely constructed of timber, and partly supported on pillars of the same materials; and of these there are 384.* Every pillar is a pile of square deodar logs, each about a foot thick, and laid one over another, as beams are usually stored in a timber-yard, so that each face presents a succession of butts

* There is a most extraordinary and unaccountable variance between this account and that of Vigne. The foundations are of stone, but the roof of the surrounding cloister, or interior, is supported by two rows of pillars, three hundred and ninety-two in all, on plain stone bases, each pillar being formed of a single deodar-tree, about thirty feet in height." In attempting to decide between such discordant statements, it should be borne in mind that Vigne was an eye-witness, and that the work styled Moorcroft's Travels is a compilation from materials which the learned rédacteur was "compelled to compress unmercifully."
and sides. These pillars are about ten feet high, and seem to have been devised with a precautionary view against earthquakes, which are here of frequent occurrence, and have damaged the rest of the structure without shaking them, or causing them to deviate from the perpendicular. The deodar is a timber so durable, that though these pillars have stood nearly two centuries, they exhibit no symptoms of decay. The ground-plan of this spacious building is a square of about 400 feet. The mosque of Shah Hamedan is built of deodar, in a singular style of architecture, resembling the Chinese, but less fantastic and meretricious. The Jhelum is crossed by seven bridges. The piers of these are formed of deodar logs, arranged as in the pillars of the great mosque, the road being formed by beams of the same timber stretching from one pier to another. There are no parapets, nor side-rails of any kind, and as the beams are in most places some distance asunder, the passage of these singular bridges is not altogether free from danger. So durable is the material, so gentle the current of the Jhelum, and so exempt the climate of Cashmere from storms, that some of these apparently frail structures have lasted for several centuries. Houses are built on some of them, and in many places trees have spontaneously grown up. Close to the east of Sirinagur is the city Dal or lake, described by Vigne as five miles in length from north to south, and two and a half miles in breadth from east to west. The water is very clear and not deep, in few places exceeding eight or ten feet. The lake is divided into two nearly equal parts by an artificial causeway, made across it in the direction from south-west to north-east. This is covered with rushes, and has the appearance of a green lane traversing the water. A single opening, bridged over, admits the passage of boats from one part of the lake to the other. Various tongues of land divide the Dal into inlets or basins, which have distinctive names. It is supplied with water by a stream called the Tybul, but which descends from the mountains bounding the valley on the north-east. This beautiful lake communicates with the Jhelum by a canal having floodgates, which remain open when the current sets from the lake towards the river. During inundations of the Jhelum, the floodgates are closed by the first rush of water towards the lake, which is thus prevented from over-
SIRINAGUR.

flowing the lower part of the city. That part of the city situate between the Jhelum and the lake is in several places intersected by canals, which, with proper care, would serve important commercial purposes, and contribute to salubrity and cleanliness, but in their present neglected state they must rather be classed amongst the deformities and disadvantages of this fallen city.

The Mar Canal is described by Vigne\(^1\) as a singular monument of the ancient prosperity of the city. "Boats pass along as at Venice. Its narrowness, for it does not exceed thirty feet in width; its walls of massive stone; its heavy single-arch bridges and landing-places of the same material; the gloomy passages leading down upon it, betoken the greatest antiquity, whilst the lofty and many-storied houses that rise directly from the water, supported only by thin trunks of deodar, seem ready to fall down upon the boats with every gust of wind. It could not but remind me of one of the old canals in Venice, and although far inferior in architectural beauty, is perhaps not without pretensions to equal singularity." The verdant and level margin of this beautiful piece of water was the favourite resort of the Mogul emperors and their courtiers, and is still in many places overspread with the relics of their pleasuregrounds and palaces. Of these, the most celebrated is the Shahlimar, where Moore's imagination has pictured the closing scene of Lalla Rookh. This pleasure-ground, laid down by the emperor Jehan Gir, is shaded by noble chunars or plane-trees, now, from age, verging to decay. It is, according to Vigne,\(^2\) 700 or 800 yards in length by 280 in breadth.\(^*\) The principal building is placed at the upper end of this inclosure, and is thus described by Vigne in rather singular terms:—"It is of polished black marble, and consisting of two rooms on either side of a passage, which runs through the centre of the building. On the east and west sides of it there is a corridor, six and a half yards wide, formed by a range of six polygonal pillars, about thirteen feet in height, and of the same material. They are said to have been taken from the ruins of a Hindoo temple, but the capitals and bases appear to have been the work of a Mahomedan architect, and the latter in particular are most beautifully scalloped and polished. The building

\(^{*}\) According to Hügel,\(^4\) 376 paces long, and 220 broad.
SIRINAGUR.

itself is twenty-four yards square, the north and south sides being ornamented with Saracenic reliefs. It stands in the centre of a square reservoir, which is also lined with black marble, whose sides are about fifty-four yards long, and in its whole circumference contains 147 fountains, which are made to play on holidays, the reservoir being filled by the stream, which enters it in the shape of a cascade. The height from the stone floor to the roof is about twenty feet. The latter may originally have been pointed like the Tuscan roof, but as it is now covered with thatch, its original shape cannot be determined. The stream thence descends from the reservoir by a shallow canal cut through the centre of the gardens, and lined with marble, and it falls over an artificial cascade at each of the three lodges through which it passes in its way to the lake. A broad causeway or walk runs on each side of it, overshadowed by large chunar-trees, and here and there a few turfed walks branch off at right angles into the shrubberies, in which are little else than wild plum-trees, planted for the sake of their white blossoms. At the end of one of these is a decayed bath, built of brick, and the walls around are covered with ivy.” The view of the lake from the vicinity of the city is very beautiful, the entrance lying between two striking eminences—Huri Parbut on the west, and on the east the Tukhti Suliman, of greater elevation and more imposing aspect. Between these, a magnificent crescent of mountains rises on the north, the east, and south-east, and on the north-west the huge summit of Haramuk towers in the distance with great grandeur. The foreground is formed by the expanse of the clear water of the lake, in many places mantled with the rich green leaves and brilliant blossoms of the water-lily (Nelumbium speciosum), and studded with green islets, in many instances tufted with trees. The beauty of this delightful scene is heightened by the appearance of the shore, teeming with the richest verdure, and ornamented with groves of noble plane-trees and poplars. The floating gardens, formed of matted reeds, weeds, and sedge, overlaid with earth, and bearing abundant crops of melons and cucumbers, though on account of their singularity attracting the notice of the traveller, form no feature in the landscape, being at a short distance nearly undistinguishable from the contiguous bank. The scene is, however, enlivened by the numerous boats
employed in taking the fish with which the lake abounds. Formerly many persons lived by taking the countless waterfowl which frequent the lake, but these are now unmolested, in consequence of the strictly enforced orders of the Sikh rulers. The appearance of the antique city falling piecemeal into ruin, when viewed at some distance, is no unpleasing feature in the prospect. "The aspect of the city itself is curious, but not particularly striking." It presents an innumerable assemblage of gable-ended houses, interspersed with the pointed and metallic tops of musjids or mosques, melon-grounds, sedgy inlets from the lake, and narrow canals, fringed with rows of willows and poplars. The surface of the lake itself is perfectly tranquil, and the very vivid reflections which cover its surface are only disturbed by the dabbling of wild-fowl, or the rippling that follows the track of the distant boat." In the more prosperous ages of Cashmere, this lake was the scene of the frequent pleasure-parties of the volatile and voluptuous Cashmirians. According to Forster, "when a Kashmirian, even of the lowest order, finds himself in the possession of a few shillings, he loses no time in assembling his party, and, launching into the lake, solaces himself until the last farthing is spent." This fondness for festive pleasures is especially displayed at the "Feast of Roses," which flowers are produced in Cashmere of unrivalled beauty and fragrance. "The season when the rose first opens into blossom is celebrated with much festivity by the Cashmirians, who resort in crowds to the adjacent gardens, and enter into scenes of gaiety and pleasure rarely known among other Asiatic nations." As oppression and consequent misery have "frozen the genial current of the soul" in the Cashmirians, that romantic festival has degenerated into the feast of Singaras or water-nuts, celebrated on the 1st of May, by ascending to the summit of the Tukhti Suliman, and feasting there, "eating more particularly of singaras." Sirinagur was formerly much celebrated for its manufacture of shawls, paper, leather, firearms, and attar of rose; but these have nearly disappeared under the oppression which has long crushed the energies of a people naturally ingenious, industrious, and persevering. Moorcroft, who visited the city in 1828, estimated the population at 240,000; the judicious and cautious Elphinstone, in the early part of
SIR.

the present century, at “from 150,000 to 200,000.” By another authority the population of Sirinagar was subsequently computed not to exceed 40,000. Vigne, as well as Cunningham, estimates the population at 80,000. This appalling reduction of the population in so brief a period has been the combined effect of oppression, pestilence, and famine. Sirinagar is generally considered to have been founded by Pravarasena, who reigned in Cashmere from A.D. 128 to 176. It is supposed to have succeeded to a more ancient city of the same name, the ruins of which are conjectured by some to be observable at Wentipur, by others at Matan. The elevation of Sirinagar above the sea has been the subject of much controversy, though stated by several intelligent Europeans who have resided at the city for a considerable time, and made this point the specific object of their notice. There can be little doubt that it exceeds 5,000 feet, and falls below 6,000, and 5,500 may be taken as the mean and probable amount. Lat. 34° 5', long. 74° 57'.

SIRKUN FORT, in the district of British Gurbwal, lieutenant-governorship of the North-West Provinces, a town on the route from Almora to the native state of Gurbwal, 43 miles N.W. by N. of the former. Lat. 30° 10', long. 79° 20'.

SIRMOUR, a hill state under British protection, is bounded on the north by the hill states of Bulsun and Joobul; on the east by the Jhaunsar Bawur purgennah of the Deyra Dhoon, from which it is separated by the rivers Tons and Jumna; on the south and west by Sirhind, the territories of the rajah of Putteals and Keonthul. It lies between lat. 30° 25'—31° 2', long. 77° 5'—77° 53', and has an area of 1,075 square miles. Except a very small tract about Nahun, on the south-western extremity, where a few streams rise, and flow south-westward to the Sooreutti and the Gagur rivers, the whole of Sirmour lies in the drainage or basin of the Jumna, which receives from this tract the Giree, and its feeders the Jalal and the Paloor. The river Tons, the great western arm of the stream, called lower down the Jumna, flows along the eastern boundary of Sirmour, and on the right side receives from it two small streams, the Minus and the Naee. The surface generally, though irregularly, declines in elevation from the north
SIRMOUR.

to the south; the elevation of the Chur Peak and station, on
the northern frontier, being respectively 12,150\textsuperscript{2} and 11,689
feet above the sea, and that of the confluence of the Giree
and Jumna, on the southern, being 1,516.\textsuperscript{3} From that con-
fluence the Kyarda Doon stretches westward, forming the
southern part of Sirmour, and extending about twenty-five
miles in length from east to west, and six in breadth, termin-
ating to the west at the eastern base of the Nahun ridge. Its
surface rises gradually to the westward from the Jumna to the
Ghatusun Pass, a distance of fourteen miles. From Ghatusun,
having an elevation of 2,500\textsuperscript{4} feet above the sea, the country
falls both eastward, as already stated, and westward, the
streams in the former direction flowing to the Jumna,\textsuperscript{5} in the
latter to the Markunda and other streams holding their course
to the Soorsutti and Gagur. The Kyarda Doon is bounded on
the south by the Sewalik range. These are of recent\textsuperscript{6} formation,
and abound in fossil remains\textsuperscript{6} of animals, marine and terrestrial.
They have probably an average elevation of about 2,500 feet\textsuperscript{†}
above the sea, and are crossed by the river Markunda at the
pass of Maginund. On the north, the Doon is bounded by the
Sub-Himalaya, the formation of which is thus described by
Fraser:7—"Apparently of a hard stone, very apt to crack and
break in sharp irregular ridges, which, on exposure to the air,
easily bursts in small fragments, and then falls into dust. It
consists, I think, of clay and sand, and is generally of a dusky
brown colour, or of a brownish grey." The formation is prob-
ably the same as that in the vicinity of Bahr, a short distance
farther north, and described with more precision by Jameson,\textsuperscript{8}
as consisting of "sandstone, slate, clay, and trap." Govan\textsuperscript{9}
describes this portion of the Sub-Himalaya as from 4,000 to
5,000 feet above the level of the sea, and consisting principally
of a very compact and hard sandstone of light bluish-gray colour,
and spotted with dark purple. In some places the formation
becomes slaty, or rests on clay-slate; in others, limestone of an

\textsuperscript{9} Nat. Hist. of Himalaya

\textsuperscript{*} Herbert\textsuperscript{1} states the Kyarda Doon to be "the debouch of the Jumna
and Ganges." The latter river is forty-five miles from any part of that
valley. Probably the error is a clerical one, and the Giri should have
supplied the place of the Ganges.

\textsuperscript{†} Herbert\textsuperscript{1} states the height of the ridge, a short distance to the north-
west, at 2,402 feet.
SIRMOUR.

earthy fracture, graywacke, and graywacke slate. The Sain ridge rises to the north-west of the range bounding the Kyarda Doon; on the north, it stretches along the right bank of the river Giri, and has a massive contour, rising at its south-eastern extremity into the summit of Thundu Bhawanee, having an elevation of 5,700\(^1\) feet above the sea; at its north-western, into that of Sursu Debi, of 6,299.\(^2\) Its formation is of limestone,\(^3\) which extends generally to the bed of the Giri, where the slate rock commences. Beyond the Giri, and at the northern extremity of Sirmour, is the remarkable peak of Chur,\(^4\) 12,150 feet above the sea, connected by a transverse ridge with the outer Himalaya, and itself a central point, from which subordinate ranges ramify in every direction. Of the subordinate ridges, some summits attain a considerable height: Rajgarh and Chitirow Debi, west of the Chur, have respectively elevations of 7,115\(^5\) and 7,048\(^6\) feet above the sea; the elevation of Jamu Peak, to the south-east of these, is 6,852\(^7\) feet; that of Chundpore, near the right bank of the Tons, 8,561;\(^8\) and that of Kangra, a little farther south, 6,600.\(^9\) The summit is composed of vast tabular masses of granite,\(^6\) which, though compact, is readily decomposed by the weather. Sirmour, though its rocks consist of formations usually metaliferous, at present yields little mineral wealth. At Kalai a copper-mine\(^7\) was formerly worked, but has been for some years abandoned. A lead-mine is worked profitably, and gives employment to above 100 men. Iron-ore is abundant, and smelted with charcoal on the spot, where it is sold at the rate of about a penny a pound. The extensive slate strata are in some places worked to supply roofing,\(^8\) and in situations admitting of easy transport to the plains, might be found a source of great wealth. The climate varies, from that of Chur, where the surface is under snow the greater part of the year, to the stifling malaria of the Kyarda Doon, of which the greater part is a mere desert, untroudden by human beings, except by woodcutters\(^9\) and collectors of gum catechu, yielded in great abundance by the mimosa, which flourishes there. The shape of the Kyarda Doon, resembling a deep narrow trench, shut in on every side except to the east, where it opens to the Jumna, and having a deep alluvial swampy soil, teeming with rank vegetation, confers on it an aspect and climate

SIRMOUR.

similar to those in most intertropical tracts. The air is from these causes fatal to the human constitution, so that in 1815 there were only 600\(^1\) inhabitants in a tract which, if fully cultivated, would probably maintain thirty times that number. Prior to the Ghorka invasion, however, the Kyarda Doon is said to have contained eighty-four populous villages. At present, extensive thickets of bamboos\(^2\) indicate the character of the climate. So dense are the forests, that the sportsman finds difficulty in making his way through them in search of wild elephants,\(^*\) tigers, leopards, bears, and hyenas, with which they abound.\(^\dagger\) Wild peafowl\(^3\) are in many places very numerous, being unmolested, in consequence of the superstitious regard of the natives. Rice, cotton, tobacco, opium, capsicum, turmeric, ginger, and all the pulse and esculent vegetables of the plains, are cultivated in the Kyarda Doon, and in the lower valleys along the banks of the rivers, where the heat\(^4\) is sometimes as great as in the lowlands of Hindostan, and to which the periodical rains\(^5\) of the monsoons extend. In the northern part, according to Blane,\(^6\) “it is said that rain never falls;” but as the rainy monsoon is in some degree felt in Koonawur,\(^7\) so much farther north, and behind the lofty barrier of the outer Himalaya, such a statement seems extraordinary. Wheat and barley are successfully cultivated, but the principal crop is marwa, a small black seed produced by the Eleusine corocana (Cynosurus corocanus of Linnaeus, or “thick-spiked dog-grass”), a most prolific vegetable, as, according to Dr. Royle,\(^8\) the ordinary produce is 120 fold, and in one variety 500. Bang or hemp, for narcotic intoxication, is also cultivated.

\(^*\) Jacquetont\(^1\) states that neither elephants nor rhinoceroses are found so far west as the Doons; but Mundy,\(^2\) a high authority on such points, relates that he heard the wild elephants trumpeting and crashing in the distant forests (of the Kyarda Doon), as they commenced their descent to the valley to drink at the nullahs, and that they attacked the tame elephants which carried his baggage. Jacqumont is on this subject chargeable with another inaccuracy, in stating that Forster mentions elephants above the thirty-first degree of lat. (au dela du 81° degré); but the traces of those animals were observed by Forster\(^3\) close to Hardwar, in lat. 29° 57'.

\(^\dagger\) For the vegetable productions of the Doons, see, in the alphabetical arrangement, the notice on the Dehra Doon; and for those of the mountains, that on Bussabir.
SIRMOUR.

In many places there are two crops in succession annually; the first of wheat, barley, poppy, oil-seeds, or marwa; the second of rice, cotton, and tobacco. The rice is very fine, and cultivated in situations suited for irrigation, the ground being arranged in terraces. The natives are indefatigable, repeatedly turning up with the plough their naturally sterile soil, and aiding its productive powers by manuring or fallowing. The grain is trodden out by kine in inclosures floored with slate slabs: the straw is used for fodder, and, being insufficient in quantity, is eked out with dried grass gathered from the jungles, and the leaves of trees, especially pines, oaks, and mulberries. Men and women share the labours of agriculture with equal industry and perseverance. The kine are humped, generally black, and for the most part well tended, fat, handsome, and larger than those of the plains. They are kept for their milk, most of which is used to yield butter or ghee: the Hindoo superstition of the natives preserves them from slaughter. The houses are frequently three stories high, built of stone, bonded with timber, of which there is great abundance, as forests of fine firs, oaks, rhododendrons, horse-chestnuts, and some other trees, overspread the mountains. The roofs are generally of slate, but sometimes of shingles. The family inhabits the upper story, which is surrounded with an inclosed balcony six or eight feet beyond the wall, and the villages, usually situate on the slopes or tops of hills, have a picturesque and pleasing effect in the landscape. Sometimes the houses are slender and lofty, so as to have the form of towers fifty or sixty feet high. These, like the others, are formed of uncounted stone, bonded with wood, on the decay of which, the whole fabric becomes ruinous and untenable; and as the natives find it less costly to build new houses than repair the old ones, the country abounds with the relics of former habitations in every stage of decadence.

The manufactures of this poor territory are limited to the smelting of a trifling quantity of iron, and the working up of wool and other raw native produce for home consumption. There is no commerce, unless a very trifling carrying-business be considered as such. The state of the roads, or rather paths, as described by Blane, is incompatible with any considerable transit. "The communications through the country are im-
SIRMOUR.

perfect, and totally unfit for the marching of troops exceeding a few companies. A path of a foot and a half in width, with the mountain rising precipitously on one side, and a deep glen on the other, if not very rugged, is esteemed by the natives a good road. Beasts of burthen are never used beyond Nahun, or Kalsi; and it is with difficulty that a led horse, even of the indigenous breed, accompanies the traveller." The natives of Sirmour are of the physical type called Caucasian by physiologists, and obviously of a race allied to the Hindoos of the plains: on the north-east there is an admixture of the Mongolian race. Goitre is very prevalent amongst all classes, and is sometimes extirpated by the knife. The stature of these mountaineers is low; but they are active and strong, carrying over their rugged roads loads of sixty or seventy pounds weight twelve or fifteen miles in the course of the day. The dress of the middling classes consists of a simple tunic or frock, reaching down to the knees, trousers, and a scarf usually worn across the shoulders, but when the sun is hot thrown over the head: the lower orders content themselves with a blanket girt round the waist: the higher classes dress after the fashion of Hindoostan, and wear the Sikh turban. The women enjoy an unfortunate notoriety for indelicacy and total want of chastity. Polyandry is universal, several brothers cohabiting by a sort of legalized union with the same woman. As this hateful practice leads to what political economists would term a "surplus female population," the occurrence of an inconvenient excess is staved off by the provident arrangement of selling the superfluous stock to the inhabitants of the plains, where they are held in esteem. The price of the "help-meet" of man varies from five to twenty pounds, the rate rising or falling according to the degree of beauty or other attraction possessed by the object of sale. The British government has prohibited this traffic, which is, however, still covertly practised. The general character of these mountaineers has been variously delineated. Fraser's picture is a dark one. He says, "All are bad. They are revengeful and treacherous, deficient in all good qualities, abandoned in morals, and vicious in their habits. Female chastity is here quite unknown; and murder, robbery, and outrage of every kind, are here regarded with indifference." It is to be remarked, that the juncture at which Fraser visited
SIRMOUR.

the country was likely to give scope to the worst passions of a people long subject to the cruel oppression of the Goorkhas, and then at once given up to anarchy, in consequence of the expulsion of that people by the success of the British arms. Gerard, writing fifteen years later, describes the people as liberal and obliging. "Private stealing," he says, "is almost unknown; and of all the many Europeans who have visited the part of the hills of which I am treating, none of them ever lost a single article. I have often travelled over this tract without a guard, and had I occasion to go through it again, I would never take a single sepoy." Possibly the statements of all travellers as to the moral characteristics of a strange people should be received with caution, as their stay is rarely of sufficient length to enable them to perceive and appreciate either all the good or all the evil which longer and closer acquaintance might detect. The religion prevailing in Sirmour is mainly Brahminism, to which is added the superstitious adoration and dread of innumerable local divinities, with which the imagination of the natives has peopled every hill, dell, or grove. The lives of kine are sacred. The people are divided into two castes, as in the plains, and Brahmins abound. The suttee, or practice of burning women alive with the dead bodies of their husbands, was formerly frequent; and in the instances of the death of men of rank, not only the favoured wife, but a whole host of females, were doomed to blaze on the pyre of their deceased lord. The strong disapprobation of the British government has caused the diabolical rite to disappear throughout the hill states. The language of the natives is a dialect of Hindostanee.

Sirmour is governed by a rajah, who claims Rajpoot descent: indeed, nearly all classes make the claim, except the lowest, who style themselves either coolies or labourers, or chumars, persons who flay cattle and work in leather. The rajah holds his possessions by a grant made on the expulsion of the Goorkhas by the British government, and dated 21st September, 1815. The Kyarda Doon was granted by the same power on the 5th September, 1833: the rajah, however, ill repaid this liberality by fomenting in Kuhloor an insurrection against the East-India Company, who, in consequence, punished him by fine. The annual revenue is estimated at 10,000l. by Moorcroft.

SIRONJ.

at 4,000l.; but this was before the annexation of Karda Doon. Nahun, at the western extremity of the Karda Doon, is the residence of the rajah, and the only town in his dominion, as Karda is a mere village, and Kalsi has latterly so dwindled as to be no better. The whole territory is divided into twenty-seven pergunningahs or districts: the aggregate population is estimated at upwards of 62,000. According to Francis Hamilton, the ruling family has held Sirmour fifteen generations since its acquisition by the first rajah, a scion of the house of Jessulmeer. In 1379 it was made tributary by Firoz Shah, of Delhi, and that prince and several of his successors frequently visited it in their hunting excursions. In 1809 the Goorkhas conquered the country, and in 1815 were conquered by the British, who restored the rajah, as has been already mentioned. His military force is not great: it appears to consist of about 400 infantry and two guns.

SIRONJ, in Malwa, a town lying within the territory possessed by the noted Patan freebooter Ameer Khan, is situate on the route from Nusseerabad to Saugor, 272 miles S.E. of the former, 78 N.W. of the latter. It is built at the base of a ghat or descent from the elevated table-land farther north. The country towards the east, south, and west, is open, fertile, and well cultivated. Sironj, though still a large town, is much decayed from the prosperity in which Tavernier found it in the seventeenth century, when it was crowded with merchants and artisans, and famous for its fine muslins and chintzes, the highly-prized objects of an extensive traffic. The walls which surrounded the town in the time of Tieffenthaler have disappeared, but the fine bazar which he describes remains. There are two caravanserais and many mosques, but no Hindoo temples; though outside the town is the huge black head of an idol, which the Hindoos anoint with oil and butter. West of the town is a rectangular fort, with a square tower at each angle, and to the south a tank of good water. Water of good quality is also supplied in abundance by a small stream flowing from an eminence west of the town: that obtained from wells is brackish. Sironj, with the appertaining pergunnah, was, in

1798, granted to Ameer Khan, by Jeswunt Rao Holkar; in 1809, the threatening attitude assumed towards Nagpore by Ameer Khan led to the advance upon Sironj of a British force under Colonel Close: subsequently, in 1817, this town and district, with other territories, were guaranteed by the British government to the ameer. The territory is estimated to yield an annual revenue of 2,00,000 rupees, or 20,000l: its area is 344 square miles. The estimate of its population is included in that of the entire possessions of Ameer Khan, for which see the article on Tonk. Distance of the town from Oozein, N.E., 140 miles; S.W. from Allahabad 280, S. from Agra 213, S. from Delhi 310. Lat. 24° 6', long. 77° 42'.

SIROTE, in the Rajput state of Jeypore, a town on the route from Agra to Mow, 62 miles S.W. of former, 350 N.E. of latter. It is inclosed by a mud rampart, and has within a square mud fort with double wall and ditch. There is a bazar here, and supplies and water are abundant. Lat. 26° 49', long. 77° 12'.

SIRPOOR.—A town in the British district of Candiaish, presidency of Bombay, 64 miles N.N.E. of Malligaum. Lat. 21° 20', long. 75°.

SIRPOORUH.—The principal place of the pargannah of the same name, in the British district of Mynipoorie, a small town or village on the route from Allygurh to Futteghur, and 57 miles S.E. of the former. It has a small bazar, and is supplied with water from wells and tanks. The road in this part of the route is bad; the country is level, partly cultivated and partly overrun with bush-jungle. Lat. 27° 38', long. 78° 56'.

SIRBINUGGUR, in the British territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Dumoh to Seuni, 63 miles N. of the latter. Lat. 22° 57', long. 79° 40'.

SIRRUD, in the Rajput state of Jessulmeer, a group of villages on the route from the town of Beekaneer to that of Jessulmeer, and 70 miles S.W. of the former. It is situated in a woody plain, and has an abundant supply of good water from a tank, and from wells about ninety feet deep. The road in this part of the route is in some places hard and good, in others sandy and deep. Lat. 27° 25', long. 72° 33'.

SIR.

Pillibheet, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Petoragurh, and 86 miles N.E. of the former. The road in this part of the route is bad; the country level, fertile, and well cultivated. Lat. 28° 40', long. 79° 52'.

SIRSAH, in the British district of Bhutteana, lieutenant-governorship of the North-West Provinces, a small town on the route from Hansee to Bhutnair, and 60 miles N.W. of the former. The surrounding country is arid and unproductive; the road in this part of the route is firm and good. Lat. 29° 31', long. 75° 5'.

SIRSALLA.—A town in the native state of Hyderabad, or territory of the Nizam, 179 miles N.W. by W. from Hyderabad, and 111 miles E. from Ahmednuggur. Lat. 18° 59', long. 76° 28'.

SIRSAWA, in the British district of Suharunpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Suharunpoor to Ambala, 10 miles W.N.W. of the former. Lat. 30° 2', long. 77° 29'.

SIRSEE, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a town with a bazar, on the route from Allygurh to the town of Moradabad, and 16 miles S. of the latter. It is situate near the small river Sote, in a level, open, cultivated country. The road in this part of the route is good. Lat. 28° 38', long. 78° 42'.

SIRSEEAH, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Nepal, 46 miles N. by E. of the former. Lat. 27° 20', long. 83° 32'.

SIRSEEGHURREE, a small fortified place in the jaghire of Dadree, lieutenant-governorship of the North-West Provinces. Lat. 28° 40', long. 76° 20'.

SIRSOO, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Jounpoor, 22 miles S.W. of the former. Lat. 26° 29', long. 88° 9'.

SIRSOUL,¹ in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a town on the route from the cantonment of Cawnpore to Futtipoor, and 16² miles S.E. of the former. The road in this part of the route

¹ Garden, Tables of Routes, 122.
² Garden, Tables of Routes, 122.
SIR—SIT.

is indifferent; the country level, and partially cultivated. Lat. 26° 18', long. 80° 33'.

SIRSOUL, in the British district of Allyghur, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Allyghur to that of Delhi, and three¹ miles W. of the former. The road in this part of the route is in many places very heavy, and confined between hillocks of drifted sand; the country open, with a sandy soil partially cultivated. Lat. 27° 55', long. 78° 6'.

SIRZA, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a town situate in lat. 27° 21', long. 77° 43'.

SISAHEE.—A village in the British district of Hurriana, lieutenant-governorship of the North-West Provinces. Lat. 29° 10', long. 76° 6'.

SISSANDY.—A town in the native state of Oude, 18 miles S. from Lucknow, and 49 miles N. by E. from Futtehpore. Lat. 26° 37', long. 80° 56'.

SISSERY,¹ in the district of Bainswara, territory of Oude, a town 15 miles S. of Lucknow. It was lately purchased by the chukledar, or governor of the district, who expended considerable sums on the repairs of the defences. The chukledar pays to the government of Oude an annual quit-rent of 1,32,000² rupees, which sum is only six-tenths of what he himself collects from his ryots or tenants. Lat. 26° 38', long. 80° 50'.

SISSORAH,¹ in the territory of Oude, a village on the route from Bareilly to Lucknow, 59² miles S.E. of the former, 96 N.W. of the latter. The road in this part of the route is good, but not much frequented; the country open, and highly cultivated. Lat. 28° 2', long. 80° 13'.

SISWAL, a village in the British district Hurriana, division of Delhi, lieutenant-governorship of Agra, presidency of Bengal. Lat. 29° 12', long. 75° 25'.

SITAKUND,¹* in the British district of Bhagulpore, presidency of Bengal, a celebrated hot well, four miles S.E. of the city of Mongheer. It is much revered by the Brahmins, in consequence of a legend concerning Sita, the wife of Rama, the

* Sitakund, or well of Sita; from Sita, the wife of Rama, and Kund, "a well."
renowned legendary king of Ayodhya. Sita had been abducted by Ravan, tyrant of Lanka or Ceylon; but when restored to her husband, she asserted that her conjugal purity had remained inviolate. The gods, however, insisted on her undergoing the fiery ordeal; whereupon, at the spot where the spring now is, she threw herself "into a pit filled with fire, and when she came pure from its flames, warm water flowed from the rock, as it continues to do at this day." The water rises in the bottom of a basin inclosed with masonry, and is too hot to admit the immersion of the person uninjured. It is perfectly tasteless, and when cold is esteemed remarkably fine, and conveyed to very great distances for the use of wealthy and fastidious water-drinkers. The temperature varies from 92° to 138°. Lat. 25° 20', long. 86° 31'.

SITLAH.—A town in the British district of Bankora, presidency of Bengal, 14 miles N.E. of Bankoora. Lat. 23° 22', long. 87° 15'.

SITOONDA.—A town in the native state of Hyderabad, or territory of the Nizam, 48 miles N. by E. from Aurungabad, and 62 miles E. from Malligaum. Lat. 20° 32', long. 75° 29'.

SITTANG.—A town of Burmah, situate on the left bank of the Sittang river, and 72 miles N.N.E. from Rangoon. Lat. 17° 42', long. 96° 49'.

SITTANG, a navigable river, rises in lat. 21° 40', long. 96° 50', and, flowing south for 230 miles through Burmah, and for about 190 miles forming the boundary between the Tenasserim provinces and Pegu, falls into the sea, in lat. 16° 50', long. 97° 15'.

SITURWALA, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from Moradabad to Hurdwar, and 40 miles S.E. of the latter. The road in this part of the route is good, and passes over an open and cultivated country. Lat., 29° 30', long. 78° 28'.

SIVAGANGA, in the territory of Mysore, a town inclosed with a rampart, situate at the east base of a lofty mountain. Distance from Bangalore, N.W., 28 miles; Seringapatam, N.E., 65. Lat. 13° 11', long. 77° 18'.

* Bacon states that the temperature varies from 90° to 135° of Fahrenheit.
SIW—SOA.

SIWANEE, in the British district of Hissar, lieutenant-governorship of the North-West Provinces, a town on the route from Hissar to Jhoonjnoo, 19 miles S.S.W. of the former. Lat. 28° 53', long. 75° 44'.

SLICKEEALLEE, in the Jetch Doob division of the Punjab, a town situated 12 miles from the right bank of the Chenaub, 51 miles N.N.W. of the town of Lahore. Lat. 32° 33', long. 73° 52'.

SOAMWARPETT.—A town in the British district of Coorg, presidency of Madras, 70 miles E.S.E. of Mangalore. Lat. 12° 34', long. 75° 53'.

SOANG, in Bussahir, a village of Koonawar, situate near the left bank of the Buspa. The vicinity is pleasant, abounding in apricot and walnut-trees, and producing pines of great size; one of them, measured by Gerard, was thirty feet in girth. The crops are poor, and consist of wheat, barley, buckwheat, amaranthus or cockscomb, pease, and some other pulse. The climate has little to recommend it: snow lies for five months, and, during summer, the periodical rains prevail, though not so heavy as in Hindooostan. Elevation above the sea 9,100 feet. Lat. 31° 26', long. 78° 15'.

SOANGIER.—A town in the British district of Candeish, presidency of Bombay, 40 miles N.N.E. of Malligau. Lat. 21° 3', long. 74° 45'.

SOAUTH, or SAUNTE, a small district of the Rewa Caunta, in the province of Guzerat, presidency of Bombay, bounded on the west by Loonawarra; on the north by the Myhee Caunta; on the east by Jhalioe, belonging to Scindia, and by Baneswarra; and on the south by Barrea. It is situate between lat. 22° 55' and 23° 38', long. 73° 45' and 74° 10'. It is sometimes called Soauth Rampoor, from a village of the latter name on the Sookee, which unites with the Cheboota, a tributary to the Myhee. The fort and town of Soauth stand three or four miles from the open country to the westward, from which it is separated by a continuance of jungly hills of moderate elevation. The fort is built on the western face of a high rocky hill, which it crowns, but the lower walls commence from the base, where there are some tolerably well-built small houses, forming a village, in which the rajah's palace is situated. The country of Soauth is strong, difficult to penetrate, trouble-
some to subdue, and but indifferently productive, yielding only
a revenue of about 70,000 rupees.

In the year 1803 the chief entered into an alliance with the
British government, and agreed, in lieu of the tribute paid to
Dowlut Row Scindia, to maintain at its own expense, devoid of
every claim to remuneration, a military force for the defence
of his territories, and to oppose any attempt of a hostile power
to effect a passage of troops through it. This treaty was
similar to that made with the neighbouring state of Loonawarra,
and it continued in force only for a similar period, viz. till the
year 1806. In 1819 Soauth was included in the arrangement
made with Scindia, and it is now one of the protected states.
It is subject to a tribute of 7,000 rupees to Scindia, the pay-
ment of which is guaranteed by the British government.

Soauth was formed, like its neighbour Loonawarra, into a
raj by usurpation or grants from other states. The present
rajah, named Bhowan Sing, was born in the year 1838. During
his minority, the affairs were conducted by his mother, the
Baece, whom it was found necessary to assist in the administra-
tion of affairs by stationing a thannadar to report all matters
of importance, and carry into effect the orders of the Rewa
Caunta agency, under whose political superintendence this
state has been placed. Under this arrangement, tranquillity
has been preserved, the audacity of the Bheels checked, and
the feudatory chiefs reduced to obedience.

The father of Bhowan Sing was Kullian Sing, the uncle of
his predecessor Kesree Sing. The rana derives descent from
the ancient Powars of Dhar, who, beyond all others, are cele-
brated in the ancient history of Central India. They were
subdued by the Mahometans in the general conquest of the
country, when this family took refuge in the wilds of Soauth,
and are now represented by the petty rajahs of that district.
Soouth, the principal place, is in lat. 23° 10', long. 73° 47'.

SOBADAH.—A town of Eastern India, in the British dis-
trict of Northern Cachar, presidency of Bengal, 73 miles S. by
E. of Nowgong. Lat. 25° 20', long. 92° 59'.

SOBORAH.—A town in Scinde, situate in the territory
belonging to Ali Moorad, 61 miles E.S.E. from Bukkur, and
74 miles W.N.W. from Jessulmeer. Lat. 27° 21', long.
69° 51'.
SOB—SOH.

SOBRAON.*—The name of a small village on the left bank of the Sutlej, and within the country under the management of the commissioner and superintendent of the Cis-Sutlej territories, near which, on the 10th of February, 1846, an obstinate battle was fought between the British army, under Sir Hugh Gough, and a Sikh force of great strength, formidabley intrenched. By the exercise of extraordinary courage and perseverance on the part of the assailants, the intrenchments were in succession forced, and the enemy ultimately driven across the river with immense slaughter. The Sikh army was estimated at 30,000 strong; the British force did not exceed half that number. The event of the battle entirely cleared the left bank of the Sutlej of the Sikh force, and the victors immediately afterwards crossed the river and entered the Punjab. Lat. 31° 8', long. 74° 54'.

SODAKHOR, in the Rajpoot state of Jessulmeer, a village on the route from the town of Beekaneer to that of Jessulmeer, and 34 miles N.E. of the latter. It has a small fort, fifty houses, four shops, and a well yielding a good supply of water. The road in this part of the route is tolerably good. Lat. 27° 3', long. 71° 31'.

SOEGAUM.—See SOORGAUM.

SOFAHUN, in Cashmere, a small town at the south-eastern extremity of the valley. Here are the only iron-mines in the province; and the works have greatly fallen away. The iron is considered inferior to that obtained from Bajour and Chinese Tartary. Sofahun is in lat. 33° 32', long. 75° 12'.

SOGAM.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the left bank of the Jhelum river, and 37 miles N.W. from Sirinagur. Lat. 34° 30', long. 74° 35'.

SOHAGI GHAT,¹ in the tract of Bogheleund, in the territory of Rewa, a pass on the route from Allahabad to the town of Rewa, and 36 miles² S.W. of the former. The village of Sohagi is situate five miles from the right bank of the Tons. “At² five furlongs from the village of Sohagi, the ascent com-

* The villages¹ are said to have been inhabited by a subdivision of a tribe called Subrah, or, in the plural, Subrah, which became applied to their place of residence.

¹ E.I.C. Ms. Doc.
² Garden, Tables of Routes, 35, 36.
mences, and continues for about a quarter of a mile very steep and rugged, path winding, and practicable for laden cattle with difficulty; remainder of the road rugged and rocky, but comparatively level, passing through jungle. Two easy ascents of about 100 yards each, near the end of the stage; no village; water from tank in the jungle." This pass is an indentation in the brow of the Kutra range, forming the north-eastern buttress of the second plateau, by which the elevated region of Bundelcund rises above the valley of the Ganges, lying to the north-east. The village of Sohagi, situate at the base or northern extremity of the pass, has about 130 houses, including twelve shops, and is supplied with water from a never-drying tank and a pucka or brick-lined well. Four miles north-west of the village, the river Tons falls over a rock the depth of 200 feet; and as the elevation above the sea of the waterway at that point is 890 feet, that of the crest of the pass probably exceeds 900. Lat. 24° 58', long. 81° 45'.

SOHAGPOOR.—A town in the British district of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces. Little more than the name and locality have been made public respecting it, though it is the principal place of a large district, and the station of a small civil establishment. Sohagpoor, originally possessed by a Gond chief tributary to the rajah of Garha Mandla, was, after a long period of anarchy and devastating warfare, subjugated, A.D. 1798, by Ragojee Bhonsla, rajah of Nagpore, and subsequently ceded by that state to the British government, in 1818, by the eleventh article of the treaty of Nagpore. Sohagpoor is distant E. from Saugor 170 miles, E. from Jubulpoor 90, S. from Allahabad 150. Lat. 23° 20', long. 81° 28'.

The territory of which this town is the chief place, forms a subdivision under the jurisdiction of the political agent for the Saugor and Nerbudda provinces: it has an area of 2,896 miles, and a population of 78,225.

SOHAGPOOR, in the British district of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Hooghlybad to Goona, 32 miles E. of former, 75 W. of latter. It has a bazar, and supplies and

* On the road to Rewa.
water are abundant. Elevation above the sea 1,515 feet.\(^3\) Lat. 22° 40', long. 78° 15'.

SOHAWUL\(^1\), in the Saugor and Nerbudda territory, lieutenant-governorship of the North-West Provinces, a town, with bazar, in the jaghire of the same name. It is situate on the route, by Rewah, from Allahabad to Saugor, 168 miles S.W. of Allahabad, and on the river Sutni, here crossed by ford fifty yards wide. It was formerly defended by a fort,\(^3\) of massive proportions but rude construction, and now in ruins. Elevation above the sea 1,059 feet.\(^4\) The jaghire of which this town is the chief place, contains an area of 179 square miles, with a population of 80,000. With the view of relieving its chief from pecuniary embarrassment, the British government has consented to undertake the management\(^5\) of the raj. Lat. of town 24° 35', long. 80° 50'.

SOHERPUR\(^1\), in British district Banda, lieutenant-governorship of the North-West Provinces, a village on route, by Chila Tara Ghat, from Cawnpore to town of Banda, 18\(^2\) miles N. of the latter. Lat. 25° 44', long. 80° 32'.

SOHNPOOL.-See SONPEPOO.

SOHOLA.—A town in the British district of Sumbulpoor, on the south-west frontier of Bengal, presidency of Bengal, 40 miles W. by S. of Sumbulpoor. Lat. 21° 18', long. 83° 28'.

SOHROH.—A town in the British district of Balasore, one of the divisions of Cuttack, presidency of Bengal, 22 miles S.W. of Balasore. Lat. 21° 16', long. 86° 46'.

SOHUREEA.—A town in the British district of Sarun, presidency of Bengal, 53 miles N.W. of Bettiah. Lat. 27° 20', long. 84°.

SOKINDA, one of the Cuttack mehals, situate on the western border of the British district of Cuttack, presidency of Bengal. Sokindagur, the chief town, is in lat. 20° 54', long. 85° 50'.

SOLAGEEBY.—A town in the British district of Salem, presidency of Madras, 71 miles N. of Salem. Lat. 12° 40', long. 78° 7'.

SOLANI.\(^1\)—A river rising at the south-western base of the Sewalik range, in about lat. 30° 13', long. 77° 55'. It is crossed by the route\(^3\) from Dehra to Suharunpore, in lat. 30° 4', long. 77° 51'. It holds a course of about fifty-five miles, generally

SOL—SOM.

south-westerly, and falls into the Ganges on the right side, in lat. 20° 3', long. 78° 1'.

This river is crossed by the Ganges Canal, and to effect the passage, works of extraordinary character became necessary. Across the valley through which the river flows, the canal is conducted generally by means of an earthen embankment, protected by walls of masonry. But this could not be continued throughout, as no provision would have existed for passing the waters of the Solani. To provide this, the river has been bridged by an aqueduct of stone, the bed of which affords transit to the canal. This magnificent work rests upon fifteen arches, each having a span of fifty feet; thus giving a clear waterway of 750 feet for the passage of the river. The strength of this work is enormous, and its duration almost appears destined to be co-existent with that of the earth on which it rests. It is supported by a series of blocks of masonry, sunk twenty feet below the bed of the stream, most of them measuring twenty feet also in length and breadth, the full depth (twenty feet) being never departed from. Vast masses of piles and stones protect every part from being injured by the force of the current; and a full description of all the contrivances, multiform and ingenious almost beyond conception, by which it has been sought to secure the fabric from every accident which the imagination could anticipate, would fill a moderate volume. The expense of the aqueduct has been great,—not less than thirty lacs of rupees (300,000£); but the work is not only the greatest on the line of the canal, but probably the greatest of its kind in the world. A section of the canal of which this noble aqueduct forms part, was recently opened, and is now diffusing fertility throughout its course.

SOLEGONG.—A town in the native state of Hyderabad, or territory of the Nizam, 16 miles S.W. from Aurungabad, and 52 miles N.E. by N. from Ahmednuggur. Lat. 19° 44', long. 75° 10'.

SOMADGANJ,1 in the British district of Jounpore, lieutenant-governorship of the North-West Provinces, a village on the route from Allahabad cantonment to that of Jounpore, 49 miles N.E. of the former, 17 S.W. of the latter. It has a bazar, and supplies may be obtained from the surrounding

---

2 Garden, Tables of Routes, 33.
country, which is partially cultivated. The road in this part of the route is heavy. Lat. 25° 42', long. 82° 32'.

SOMANHULLY.—A town in the native state of Mysore, presidency of Madras, situate on the left bank of the Chittravutty river, and 114 miles N.E. from Seringapatam. Lat. 18° 39', long. 77° 53'.

SOMAWARRUM.—A town in the native state of Hyderabad, or territory of the Nizam, 124 miles E. by S. from Hyderabad, and 61 miles N. from Guntoor. Lat. 17° 10', long. 80° 25'.

SOMESIR.—A town in the Rajpoot native state of Jodhpour, 63 miles W. by N. from Jodhpour, and 78 miles E.S.E. from Jassulmeer. Lat. 26° 31', long. 72° 10'.

SOMEREA PASS.—See KOMULMAI.

SOMIEEGOOL.—A town of Eastern India, in the native state of Muneepoor, 63 milea W.S.W. from Muneepoor, and 86 miles S.E. by S. from Silchar. Lat. 24° 23', long. 93° 9'.

SOMNAGANJ,¹ in the British district of Allynghur, lieutenan-governorship of the North-West Provinces, a town on the route from the cantonment of Allynghur to that of Delhi, and 16 miles N.W. of the former. It is supplied with water from wells, and has a bazar and market. The road in this part of the route is in many parts heavy, and confined between hillocks of heavy sand. The country is in general open, with a sandy soil, partially cultivated. Elevation above the sea 752 feet.² Lat. 28° 3', long. 78°.

SOMNATH PATTAN,¹* in the peninsula of Kattywar,

¹ Somanath Pattan; from Soma,¹ "the moon," Nath, "lord," and Pattan, "town." According to Professor Wilson,² "Sonnath was a Linga, or columnar emblem of Siva or Mahadeva, such as may still be seen in every part of India." Nath, as is familiarly known, is not an uncommon member of a compound name of a Hindoo divinity; as in Juggernath, the lord of the world, a name of Krishna or Vishnu. When applied to a Siva-linga, however, the word that precedes it implies the person by whom it was originally set up, and consequently, Somanath is "the divinity set up by Soma: he is the regent of the moon, or the moon personified, and he is fabled to have come down upon earth, and engaged in a course of austerities to propitiate the favour of Siva, who having appeared, and granted the lunar lord his wishes, the latter, in gratitude, set up, on the spot where he had performed penance, the usual emblem of Mahadeva, which thenceforward went by his name, Soma-nath, the lord or Siva of

² Cautley, on Prolongation of Ganges Equal, sec. II. App. II. 6. ¹ E.I.C. Ms. Doc. ³ Garden, Tables of Routes, 44. ¹ Wilson, Sanscrit Dict. in v. 945. ² Asiatic Journal, 3rd series, May to October, 1843, p. 46.
province of Guzerat, a town situate on the south-west coast, washed by the Arabian Sea. The ground-plan of the town is an irregular quadrangle, inclosed by a wall nine feet thick, one mile and six furlongs in circuit, with two gateways, thirty-six square towers, and two round towers. The defences are on three sides strengthened by a ditch: on the west, the base of the wall is washed by the sea. The walls and towers are constructed of uncemented square stones, and are throughout massive and of great solidity and strength. They are everywhere adorned with Brahminical sculptures on mythological subjects, though much decayed by time and the defacing hands of zealous Mussulmans. The site of the place is fine, commanding the view of the Arabian Sea, of a beautiful bay, and of the headland and seaport of Billawul, fortified as a defence against pirates. The population of the town is at present chiefly Mussulman, and there are many mosques, among which the most remarkable is the Jooma Musjid, described by Burnes as "in the Jain style of architecture, of an oblong square figure, with pillars on the great sides, and four domes, resting on pillars at the end which faces the entrance; the shafts of all these pillars are low." The great temple of Somnath is finely situate on an eminence at the north-west of the town, so advantageously, that it can be seen at the distance of twenty-five miles. The accounts of this celebrated temple are numerous, but very confused, and in many instances discrepant. According to Postans, it "consists of one large hall, in an oblong form, from one end of which proceeds a small square chamber or sanctum. The centre of the hall is occupied by a noble dome over an octagon of eight arches, the remainder of the roof terraced and supported by numerous pillars. There are three entrances; the sides of the buildings face the cardinal points, and the principal entrance is on the eastern side. These doorways are unusually high and wide, in the Egyptian style, decreasing towards the top: they add much to the effect of the building. Internally, the whole presents a scene of complete destruction; the pavement is everywhere 

Soma. The legend is told in the Kasi Khanda of the Skanda Purana, a book of standard authority among the Saivas." "Soma-nath was in fact one of the twelve celebrated emblems of Siva, which in various parts of India were held in especial veneration by the Hindoos."
SOMNATH PATTAN.

covered with heaps of stones and rubbish, the facings of the walls, capitals of the pillars, in short every portion possessing anything approaching to ornament, having been removed or defaced. "Externally the whole of the building is most elaborately carved and ornamented, with figures single and in groups of various dimensions. Many of these appear to have been of some size, but so laboriously was the work of mutilation carried on here, that of the larger figures scarcely a trunk has been left, whilst few even of the most minute remain uninjured. The front entrance is ornamented with a portico, and surrounded by two slender minarets." The dimensions are stated ⁶ to be—extreme length inside (not including the small chamber or sanctum) ninety-six feet; extreme width sixty-eight feet; extreme height twenty-eight and a half feet.

If the subject be cleared from the clouds of grandiloquent verbiage with which it has been so profusely overcast, it must appear that the structure, of which the ruins are still to be seen at Pattan, was a gloomy, massive, and rather rudely-built temple, of diminutive size, overlaid externally with a prodigious quantity of mythological sculptures. Of the linga, ⁷ of historical celebrity, there does not appear to remain a trace, and scarcely a tradition; but near the temple is a multiform symbol ⁸ of Siva, called Koteswara, meaning "with a million of lingas." It is a huge cylinder of red freestone, covered with miniature lingas. The splendour of Somnath, when greatest, is described (no doubt with much exaggeration) by Mirkhond ⁹ "Somnath was an idol in a temple situate on the seaside; which idol the Hindoos worshipped, especially at times of eclipse. More than a lakh of people used to come to it on nights when the moon was under eclipse; and they believed, too, that the souls of the deceased came to Somnath on first leaving the bodies they had occupied, and were there assigned fresh bodies. They also believed that the sea worshipped Somnath, and the rise and fall of the tides were considered to be proof of this. From the most distant parts of India pilgrims used to come to worship at this shrine; 10,000 villages were assigned for its support, and there were so many jewels

⁶ Postans, ut supra, 868.
⁸ Tod, ut supra, 333.

* According to Tod, ¹ "the outer circumference is 336 feet, its length 117, and the extreme breadth 74 feet."
belonging to it as no king had ever one-tenth part of it in his treasury: 2,000 Brahmans served the idol, and a golden chain of 200 muns supported a bell-plate, which being struck at stated times, called the people to worship; 300 shavers, 500 dancing-girls, and 300 musicians were on the idol's establishment, and received support from the endowment and from the gifts of pilgrims.”

This temple was taken by storm by Mahmood of Ghuaznee, after repeated attacks, it being desperately defended by its fanatical guardians. It has been said, and the assertion has obtained pretty general belief, that the celebrated “destroyer of idols” carried away as a trophy of his success a pair of gates, which subsequently adorned his own tomb. Ferishta, however, makes no mention of this; and for various reasons, the truth of the story seems open to question. On the retirement of the British army, however, from Affghanistan, in 1842, this reputed trophy was considered of so much importance that its recovery, and consequent restoration to Hindostan, were announced in a proclamation distinguished by remarkable elevation of language, as avenging “the insult of 800 years;” and the chiefs and princes of Sirhind, Rajwarra, Malwa, and Guzerat, were invited to transmit the gates, “with all honour,” to the place from which they had been violently removed.

That destination, however, they never reached: the home authorities altogether disapproved of the intended re-erection of the gates in their original place, if such it were, regarding such a proceeding as calculated to stimulate religious animosity, to identify the British government with one of the two great parties of religionists into which India is divided, and to give deep offence to the other. The gates were said to be composed of sandal-wood; but less costly materials have been named as more probable; and even an opinion has been expressed that they were nothing better than “rotten old deal.”

Ahelia Bhae, a superstitious old lady of the Holkar family, has recently caused a temple to be built for Somnath, in the vicinity of the ancient edifice. The present town contains about 900 houses and 5,000 inhabitants; Billawul, or Vairawull, two miles west of Somnath Pattan, is its seaport, and is a good haven for trading vessels, the traffic being considerable. Distance from Ahmedabad, S.W., 210 miles;

SOM—SON.

Baroda, S.W., 210; Surat, W., 183; Bombay, N.W., 210. Lat. 20° 55', long. 70° 23'.

SOMURA.—A town in the Rajpoot state of Jodhpoor, 89 miles N.E. from Jodhpoor, and 70 miles E. by S. from Beekaneer. Lat. 27° 12', long. 74° 4'.

SONADAH.—A town in the British district of Nuddia, presidency of Bengal, 80 miles N. of Calcutta. Lat. 23° 43', long. 88° 30'.

SONANEE.—A town in the British district of Ahmednuggur, presidency of Bombay, 22 miles N. by E. of Ahmednuggur. Lat. 19° 24', long. 74° 50'.

SONAHAUT.—A town in the British district of Chota Nagpoor, presidency of Bengal, 66 miles E. by S. of Lohadugga. Lat. 23° 13', long. 85° 45'.

SONAKHODA.—A town in the British district of Purneoa, presidency of Bengal, 58 miles N.E. of Purneoa. Lat. 26° 18', long. 88° 16'.

SONAMGUNJE.—A town in the British district of Silhet, presidency of Bengal, 30 miles W.N.W. of Silhet. Lat. 26° 3', long. 91° 24'.

SONAPUSSEE.—A town in the native state of Mohur-bunge, on the south-west frontier of Bengal, 100 miles W.S.W. from Midnapoor, and 98 miles N. from Cuttack. Lat. 21° 51', long. 85° 58'.

SONARA.1—A river rising in the Saugor and Nerbudda territory, about lat. 23° 23', long. 78° 46', and at an elevation of 1,950 feet above the sea. It holds a north-easterly course of 110 miles, and receives the Bearma on the right side, and eight miles lower down falls into the river Cane, on the left side, in lat. 24° 22', long. 79° 59'. The fall of its channel from its source to the confluence is about 950 feet.2

SONARA,1 in the territory of Indore, or possessions of Holkar's family, a town on the route from Neemuch to Kota, 70 miles2 N.E. of former, 52 S.W. of latter: it is of considerable size, and has a good bazar. It was on his march3 to this place, whither he had despatched his baggage and stores, that the ill-fated Colonel Monson, in July, 1804, received intelligence that the irregular horse under Lieutenant Lucan, who had been left to watch and report the motions of Holkar, had been attacked4 by that chieftain with his entire cavalry;
the communication being almost immediately followed by the still more afflicting news, that the party thus assailed was beyond the reach of succour, having been totally routed, their gallant commander wounded and made prisoner. Colonel Monson, who was preparing to support them, consequently pursued his march to Sonara. Lat. 24° 34', long. 75° 55'.

SONDWARA,¹ in Malwa, a district lying between lat. 23° 10'—24°, long. 75°—76° 15', is a fine, fertile, well-watered tract of diversified surface: it has received the denomination from its inhabitants, the Sondis. "They² are often called Rajpoots, but are a mixture of all classes, or rather descendants of a mixed race. In their origin they were probably outcasts, and their fabulous history (for they consider themselves as a distinct people) traces them from a prince who, in consequence of being born with the face of a tiger, was expelled to the forests, where he seized upon women of all tribes, and became the progenitor of the Sondes, or, as the term implies, mixed race." At the conclusion of the treaty between the British government and Holkar, at Mundissor, in 1818, the Sondis were estimated in number at 1,249 horn, 9,250 infantry, all subsisting by plunder. They were, however, quickly reduced to obedience by a force formed of the troops of the East-India Company, of Holkar, and of the rajah of Kota; and at present the territory belongs partly to the last-mentioned chief and partly to Scindia.

SONE,³ a river rising in Gondwana, in the territory of Nagpore, and on the elevated table-land of Ummurkuntuk, in lat. 22° 41', long. 82° 7', and four or five miles E. of the source of the Nerbudda.⁴ Flowing north for thirty miles, it crosses

³ Ut supra, 235.
⁴ Index to Map of Malwa, 302.

* Sons of Wilson's Sanscrit Dictionary; the word, as a common adjective, signifying "crimson;" Soane of Briggs's Index, and of Rennell.
† According to Rennell,¹ these rivers "do literally flow from the same lake;" and the same statement is in the Ayeen Akbery; but Malcolm² states that the Nerbudda has its source in the high table-land of Gondwana, "near Omerkuntuc, from a well, at which is built a small Hindoo temple of great sanctity;" and adds, that the Sone "rises also near Omerkuntuc." The account³ which Blunt obtained from intelligent natives who had visited the place, is essentially the same. In a recent work, Omerkuntuc is stated to be 5,000' feet above the sea; but no authority is given for this estimate, which appears to err greatly in excess. Perhaps 3,000 would be nearer the truth.
the frontier into the British district of Saugor and Nerudda, through which it holds a course sinuous, but generally north-west, for fifty miles, after which it constitutes the boundary between that territory and Rewa for thirty miles, passing into the latter at the confluence of the Jobila, which joins it on the left side. Thence pursuing its course in a northerly direction for forty miles, it receives the Mahanuddee, which falls into it on the same side, in lat. 24° 5', long. 81° 6'. From this point it turns north-east, and flowing along the south-eastern base of the Kymore range, through the territory of Rewa, or that of its dependencies, for 125 miles, crosses the eastern frontier of the raj in lat. 24° 37', long. 82° 51', into the British district of Mirzapoor. At the town of Burdhee, it on the right side receives the small river Goput. Its course through the district of Mirzapoor is east for thirty-five miles, to the east frontier, in lat. 24° 31', long. 83° 33'; and in this interval it on the right side, near Agoree, receives the Behund, and twelve miles lower down, on the same side, the Kunher. From the place where it leaves the district of Mirzapoor, it forms the south-east frontier of the British district of Shahabad, being for 120 miles the boundary between it and the British district of Behar, and for fifteen more the boundary between it and the British district of Patna. Its tributaries of any importance in this part of its course are all on the right or south-east side. Of these, the greatest is the Kiyul, Koel, or Koyl, joining nearly opposite the celebrated fort of Rohtas, and in lat. 24° 31', long. 83° 54'. The Sone falls into the Ganges on the right or south side, ten miles above Dinapore, and in lat. 25° 37', long. 84° 55', after a total length of course of 485 miles. There appears reason to think that it formerly joined the Ganges by some other channels besides the present one. A nearly effaced channel may be still traced opening on that of the Ganges at Bankipoor, below Dinapore, and another still farther down the stream, below Patna. In the time of Abulfazl, in the commencement of the seventeenth century, and in that of Baber, a century earlier, it flowed near to Munir. Blunt, who viewed the stream in lat. 24° 35', long. 83°, about 280 miles from its source, found that there "the bed of the river was about half a mile wide and full of quicksands, but the stream was not more than a hundred yards broad, and flowed

6 Memoirs, 419. 7 As. Res. vii. 61—Narrat. of a Route from Chunarghur to Yerasingoodum.
SON.

rapidly, with about three feet of water in the deepest part." It rapidly increases in size, as, forty or fifty miles lower down, after it has entered the British district Shahababad, the width of the channel is nowhere less than 600 yds, and in many parts is 1,000. In the end of December the stream is 300 or 400 yards wide, not rapid, but rather clear, generally deep, and scarcely anywhere having fords, though in spring these are numerous; yet even then, when lowest, though boats of burthen can scarcely pass, vast quantities of bamboos are conveyed down in floats. Below the mouth of the Koel, the width of channel increases variously from 600 to 2,000 yards, which great extent is during the periodical rains filled for several days together, and the stream is at such junctures navigable for craft of ten or twelve tons, though the passage is intricate, precarious, and tedious: altogether, it may be regarded as a vast torrent. In lat. 24° 52', long. 84° 15', and seventy miles above its mouth, it is traversed by the route from Hazareebagh to Benares; and in that part, according to Jacquemont, its bed, two miles wide, is during the periodical rains filled by the stream; but in early spring, or the dry season, there were only two streams, each as large as the Seine at Paris, one near the left bank, the other half a mile nearer the right. The passage was made by ferry, but Garden states that it may also be forded. With the view of testing the feasibility of throwing a bridge over this river, the construction of a causeway has been intrusted to the superintendent of the grand trunk road, and the effect of the stream during the rainy season will be thus ascertained. The navigation of the river is not considered available for purposes of important utility higher than Daudnagar, sixty miles from the confluence with the Ganges. In the Ayeen Akbery, it is stated that fossilized ammonites or salgrams, regarded sacred by the Brahminists, are found in the upper part of its course, and that its water has a petrifying quality.

SONEGURH, in Guzerat, or the territory of the Guicowar, a town 45 miles E. of Surat. Lat. 21° 8', long. 78° 33'.

SONEPORE.—The name of a native raj subject to the political agent for the south-western frontier of Bengal: its centre is in lat. 21°, long. 84°, and it contains an area of 1,467 square miles. The country is generally flat and pretty well
SON.

cultivated, but when last visited by the political agent, the people complained greatly of oppression. The heat here is intense. The southern part of the raj is inhabited by Khoonds, and human sacrifices are represented as of frequent occurrence. The country was estimated by the agent to be worth about six lacs, and the annual tribute (6,400 rupees) was regularly paid.

The population is believed to be about 66,000.

SONEPOOR.—A town in the raj of the same name, subject to the political agent for the south-west frontier. It is situated on the right side of the Mahanuddy river, navigable by large river-craft from the sea to this place, a distance of 200 miles. It is distant 39 miles S. from the town of Sumbhulpore. Lat. 20° 55', long. 84° 8'.

SONEYEE, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a town on the route from Muttra to Buddhaoon, 13 miles E.N.E. of the former. Lat. 27° 33', long. 77° 58'.

SONEYRA, in the territory of Gwalior, or possessions of the family of Scindia, a small town in Southern Malwa, on the route from Goona to Mow, 107 miles S.W. of former, 78 N.E. of the latter. It has a bazar, and supplies may be obtained. Lat. 23° 33', long. 76° 23'.

SONG, a river of the British district of Gurhwal, rises on the southern declivity of the Surkanda peak, and in lat. 30° 24', long. 78° 22'. It first flows in a south-westerly direction for about twenty miles, to Nalapani, and washes its eastern base, from which it takes a southerly course of about twenty miles to the confluence of the Sooswa, where it turns south-east, and after a further course of about eight miles, falls into the Ganges, in lat. 30° 2', long. 78° 19', and at an elevation of 1,200 feet above the sea. Its volume of water is in winter inconsiderable, as Moorcroft, who saw it in the middle of February, styles it a rivulet.

SONGDEE.—A town in the native state of Hyderabad, or territory of the Nizam, situate on the right bank of the Payne Gunga river, and 166 miles N. from Hyderabad. Lat. 19° 42', long. 78° 53'.

SONHAT, in the native state of Korea, on the south-western frontier of Bengal, a town among the mountains of Gondwana, 50 miles N.W. of the ruined town of Sirgoojah,
SON.

120 S. of Mirzapoor, 420 W. of Calcutta by Hazarebagh. Lat. 23° 20', long. 82° 23'.

SONK, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a town on the route from Kombher, in Bhurtpoor, to the cantonment of Muttra, and 15 miles S.W. of the latter. Lat. 27° 23', long. 77° 34'.

SONKUTCH, in the territory of Gwalior, or possessions of Scindia's family, a large and populous town, the principal place of a pergunnah of the same name, is situate on the east or right side of the river Kalee Sindh. This pergunnah, with Ouchod united to it, yielding an annual revenue of 90,000 rupees, was by treaty, 1844, placed under British management, for the maintenance of the augmented Gwalior contingent. Distant 40 miles S.E. of Oojeein. Lat. 23°, long. 76° 21'.

SONMEANEE, properly SOUMEANEE, in Beloochistan, a small town on the shore of the Arabian Sea. It is situate at the northern extremity of an inlet, called the Bay of Sonmeaney, and described, probably in too favourable terms, by Pottinger, as "a very noble sheet of water, said to be free from rocks or shoals, and is capable of affording anchorage to the largest fleet." This bay is formed by the projection of Cape Monze on the east. According to the competent authority of Carless, "the harbour, which has been formed by the Poorally river, is a large irregular inlet, spreading out, like that of Kurrachee, in extensive swamps, and choked with shoals. The channel leading into it is extremely narrow, and has a depth of sixteen or seventeen feet at high water in the shallowest part; but it shifts its position every year, and vessels of any size could not navigate it without great difficulty until it has been buoyed off inside. There are six or seven, or even ten, fathoms in some places; but towards the town the channels become shallow, and the trading boats cannot approach it nearer than a mile. At the spot where they anchor, they are always aground at low water. During the south-west monsoon the harbour cannot be entered, for the bar at the entrance is exposed to the whole force of the swell, and the breakers on it are heavy." This bar, according to Horsburgh, has two fathoms of water when the tide is out, but the depth is every year diminishing, and will probably be soon too little to admit vessels; at the same time the sea is encroaching on the land,
and threatens soon to sweep away the present site of the town. Sea-going vessels in general anchor outside the bar, at the distance of about two miles from the town, and are much exposed to the sea and the weather. The cargoes are discharged into small boats, and so landed; horses for exportation are made to swim to the vessels. The town is mean and dirty, and has about 500 houses, built of mud, and each surmounted by a _badger_, or small turret or flue, open on one side to the sea-breeze, which it sends downwards in the interior of the building, for the purpose of mitigating the excessive heat. It was formerly surrounded by a mud wall, which is now so decayed that scarcely a vestige of it remains. Water can be obtained only by digging in the sand a little above high-water mark, and is so brackish as to be scarcely drinkable, insomuch that the British vessels, when stationed here, were supplied from Kurrachee. The inhabitants live principally by fishing, and are extremely poor, except a few Hindoos, who have the whole trade in their hands. The imports from Bombay are silk, cloths, iron, tin, steel, copper, pepper, sugar, and spices; from the Persian Gulf, dates and slaves; from Sinde, coarse cotton cloths. The exports are horses, butter, wool, hides, oil, grain, dried fruits, and gum. In 1808 this place was burned by Arabian pirates, and the trade has much decayed since that time. Its traffic is at present much injured by the predatory Belooches, who interrupt the communication with the interior. The population is estimated by Carless at about 2,000. 

SONNEL, in the territory of Gwalior, or possessions of Scindia's family, a town on the route from Oojeein to Kotah, 85 miles N. of former, 55 S. of latter. It is of considerable size, of square outline, and has a rampart of stone. There are two broad streets, which cross each other at right angles, and at their intersection is a chauk or market-place. 

SONOREE.—A town of Bundelkund, in the native state of Dutfteah, 13 miles N. from the town of that name, and 30 miles S.E. by S. from Gwalior. 

SONUH, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a town on the route from Delhi to Alwar, by Ferozpore, and 39 miles S.W.
SON—SOO.

of the former. It is situate in a long valley, stretching from south-west to north-east, the bottom of which is quite level, and inclosed3 by chains of hills of quartzose or sandstone formation, and from 300 to 400 feet high. Here is a hot sulphureous spring, of the temperature of 108° Fahrenheit.4 The water is received into a reservoir: it gushes from a shaft cut out of the solid rock, and about thirty feet deep, in the centre of a basin, also cut in the rock, and sixteen feet square, with steps leading down to the water, for the convenience of bathing. The whole is covered by a beautiful dome of ancient architecture, and surrounded by apartments with open verandas, occupied by thirty or forty Brahmins, who levy small contributions on those who have recourse to the reservoir, which is used as a warm bath, the inhabitants, Mussulmans and Hindoos, every morning remaining immersed in it for several minutes. This bath is found very sanative in leprosy and other cutaneous affections, in scrofula, chronic rheumatism, and liver complaints, and is much frequented by the afflicted with such disorders; but Jacquemont considers its habitual use by the inhabitants of Sonah as highly injurious to their health, as, notwithstanding the purity and salubrity of the air, they have all a thoroughly cachectic look. On a hill above the town is a sort of fortress,5 large enough to contain the inhabitants and their moveable property, and built by them as a place of refuge from freebooters, who much infested the country previously to its conquest by the British. There is a bazar in the town, which is well supplied with water. The road in this part of the route is good: the population amounts to 6,103.6 Lat. 28° 14', long. 77° 7'.

SONUND.—A town in the British province of Sattara, presidency of Bombay, 81 miles E.S.E. of Sattara. Lat. 17° 15', long. 75° 13'.

SOOA, in the British district Bareilly, division of Pillibheet, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Petoragurh, and 76 miles N.E. of the former. It is situate on the right bank of the Gogra or Surju, about five miles below its exit from the mountains. Lat. 29° 4', long. 80° 10'.

SOOAL, in the British district of Kumaon, lieutenant-governorship of Agra, presidency of Bengal, a small river
rising close to Shem Deo Temple, at an elevation of 6,760 feet above the sea. Lat. 29° 37', long. 79° 52'. It takes a south-westerly direction, flowing at the south-eastern base of the mountain on which Almora stands, four miles below which place it falls into the Kosila, on the left side, in lat. 29° 33', long. 79° 39', after a course of about twenty miles. Webb, who crossed it in lat. 29° 36', long. 79° 46', and about ten miles from its source, found it between fifty and sixty feet wide and two feet deep, with a stony bed.

SOOBATHOO.—See Subathoo.

SOOBHAGDESIR.—A town in the Rajpoot state of Beckaneer, 87 miles E. by S. from Beckaneer, and 89 miles N. from Ajmeer. Lat. 27° 44', long. 74° 44'.

SOOBRAMUNNY.—A town in the British district of South Canara, presidency of Madras, 55 miles E. by S. of Mangalore. Lat. 12° 40', long. 75° 40'.

SOOBU SHEREE.—A river rising in Thibet, in lat. 28° 47', long. 92° 57', and, flowing through Thibet, the territory of the Abor tribes, and Luckimpoor, falls into the Booree Lobit river, in lat. 27° 10', long. 94° 16'.

SOOE, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village in a fine deodar-grove, on a ridge in the Sub-Himalaya, or mountain system south of the main range, on the route from Champawut to Askoth, seven miles N. of the former. Lat. 29° 26', long. 80° 7'.

SOOEQEAUM.—See Soogaeum.

SOOGANHULLY.—A town in the British district of Bellary, presidency of Madras, 18 miles N.W. by W. of Bellary. Lat. 15° 17', long. 76° 46'.

SOOJABAD, in the Punjab, a town about four miles from the east bank of the Chenaub, and 20 miles S. of Mooltan. Its size is considerable, and at a distance, with its lofty and irregularly-built fortifications, it has a striking and picturesque appearance. There is a good and well-supplied bazar. Its principal manufactures are cottons and wood-turnery; the excellence of the latter is much celebrated. The gardens belonging to the town are extensive and luxuriant, and the surrounding country is fertile, as well as highly cultivated, yielding great crops of sugarcane, cotton, grain, and indigo. Lat. 29° 53', long. 71° 21'.
SOO.

SOOJAWULPOOR, in the territory of Gwalior, or possessions of Scindia's family, a town situate on the right or east bank of the river Jamneir. It is of considerable size, and consists of a walled post or fort, and, outside the rampart, of a suburb, having a bazar and many good houses. There is a considerable market for muslins and other cotton fabrics, and for opium. The annual revenue, stated at 2,55,000 rupees, has been transferred to the British authorities, for the maintenance of the increased Gwalior contingent. Distant 62 miles, S.W. of Gwalior fort.

SOOKEIT.—See SUKHEE.

SOOEY SIR, in the Sinde Sagur Doob division of the Punjab, a town situated 27 miles S.E. from the left bank of the Indus, 96 miles S. by E. of the town of Peshawar.

SOOKHER, in Gurchwal, a village on the right bank of the Bhageeretee, as the Ganges is called near its source. It is situate on the western declivity of a lofty mountain, and surrounded on all sides by rocky precipices of the Himalayas, crowned with snow. At the depth of about 1,000 feet below, the river rushes along, foaming in a narrow channel. The village is now nearly ruined, and contains few inhabited houses. The scenery along the course of the river in this part of the route is very striking, "wall-like precipices of compact granite bounding the river on both sides, to the immediate height of 2,000 or 3,000 feet." The elevation above the sea, of the mountain-top, is 12,000 feet; of the village, 8,869; of the bed of the river below it, 7,608. Lat. 21° 21', long. 76° 42'.

SOOKLEIT.—See SUKHEE.

It is of considerable size, and consists of a walled post or fort, and, outside the rampart, of a suburb, having a bazar and many good houses. There is a considerable market for muslins and other cotton fabrics, and for opium. The annual revenue, stated at 2,55,000 rupees, has been transferred to the British authorities, for the maintenance of the increased Gwalior contingent. Distant 62 miles, S.W. of Gwalior fort.

SOOKHER, in Gurchwal, a village on the right bank of the Bhageeretee, as the Ganges is called near its source. It is situate on the western declivity of a lofty mountain, and surrounded on all sides by rocky precipices of the Himalayas, crowned with snow. At the depth of about 1,000 feet below, the river rushes along, foaming in a narrow channel. The village is now nearly ruined, and contains few inhabited houses. The scenery along the course of the river in this part of the route is very striking, "wall-like precipices of compact granite bounding the river on both sides, to the immediate height of 2,000 or 3,000 feet." The elevation above the sea, of the mountain-top, is 12,000 feet; of the village, 8,869; of the bed of the river below it, 7,608. Lat. 21° 21', long. 76° 42'.

SOOKLEIT.—See SUKHEE.
Canara, presidency of Madras, 44 miles S.E. by E. of Mangalore. Lat. 12° 34', long. 75° 27'.

SOOLGAUNA.—A town in the native territory belonging to the Daung rajah, 56 miles W. from Malligaum, and 65 miles S.E. from Surat. Lat. 20° 38', long. 78° 39'.

SOOLOO.—An island in the Malay Archipelago, situate in lat. 6°, long. 121°. A treaty has been recently concluded by Sir James Brooke on the part of the British government with the sultan of this place.

SOOLOON.—A town in the native state of Mysore, 25 miles W.N.W. from Bangalore, and 58 miles N.E. from Seringapatam. Lat. 13° 4', long. 77° 17'.

SOOLOON.—A town in the native state of Mysore, 25 miles W.N.W. from Bangalore, and 58 miles N.E. from Seringapatam. Lat. 13° 4', long. 77° 17'.

SOOLGAUNA. — A town in the native territory belonging to the Daung rajah, 56 miles W. from Malligaum, and 65 miles S.E. from Surat. Lat. 20° 38', long. 78° 39'.

SOOLOO.—An island in the Malay Archipelago, situate in lat. 6°, long. 121°. A treaty has been recently concluded by Sir James Brooke on the part of the British government with the sultan of this place.

SOOLOON.—A town in the native state of Mysore, 25 miles W.N.W. from Bangalore, and 58 miles N.E. from Seringapatam. Lat. 13° 4', long. 77° 17'.

SOOLGAUNA.—A town in the native territory belonging to the Daung rajah, 56 miles W. from Malligaum, and 65 miles S.E. from Surat. Lat. 20° 38', long. 78° 39'.

SOOLOO.—An island in the Malay Archipelago, situate in lat. 6°, long. 121°. A treaty has been recently concluded by Sir James Brooke on the part of the British government with the sultan of this place.

SOOLOON.—A town in the native state of Mysore, 25 miles W.N.W. from Bangalore, and 58 miles N.E. from Seringapatam. Lat. 13° 4', long. 77° 17'.

SOOLGAUNA. — A town in the native territory belonging to the Daung rajah, 56 miles W. from Malligaum, and 65 miles S.E. from Surat. Lat. 20° 38', long. 78° 39'.
SOONAMOOKEE, in the British district of Bancoora, presidency of Bengal, a town on the route from Berhampoor to Bancoora, 91² miles S.W. of former, 24 N.E. of latter. Lat. 23° 18′, long. 87° 31′.

SOONA MUDAN.—A town in the native state of Nepal, situate on the right bank of one of the arms of the Gunduck river, and 126 miles N.W. by W. from Khatmandoo. Lat. 28° 37′, long. 83° 33′.

SOONDA, in the British district of North Canara, presidency of Madras, a town, the principal place of a tallook or subdivision of the same name. It is situate on the Soonda Nulla, a small river tributary to the Baidli Nulla, and was formerly a place of great extent, the outermost wall being forty-eight² miles in circumference. Within it are two other lines of fortifications; the innermost, being a square of three miles, was once fully occupied by dwellings, and even when taken by Hyder Ali, of Mysore, in the middle of the last century, contained 10,000 houses. In the spaces between the inner and middle inclosures, and between the middle and the outer, the houses were formerly dispersed in small groups, with gardens, groves, and orchards between them. The surrounding country is rather rugged, being intersected by many deep valleys and gorges, drained by rivulets. The entire tallook or subdivision of Soonda is rough and mountainous, extending over the summit of the Ghats, here expanding into a sort of rugged table-land, traversed by the Baidli Nulla, the Cauly Nuddy, and numerous small torrents. Those well-watered dells are in the lower part fertile, producing, in great perfection, betel-nut, betel-leaf, black pepper, cardamoms, and plantains, and capable of yielding a much greater quantity of these commodities, but that the country has not yet recovered from the desolation to which it was reduced by the Maharrattas and the troops of Mysore. The climate in the western part, towards the brow of the Ghats, is extremely wet during the monsoon; but this excessive moisture diminishes as the country recedes towards the east.

Besides Soonda, the only places within the tallook which can be denominated towns, are Sersi, Banawssi, and Yelapur.

Soonda, called by the natives Sundha, and in Sanscrit Sudhapura, appears to be a place of very remote antiquity. Within the territorial division to which it gives name, there are traces
of three several languages having followed each other in a succession commencing with a very early period. The tract formed part of the possessions of the Cadumba dynasty, which ruled as far as the eastern coast of the Peninsula, or that washed by the Bay of Bengal. Its subversion has been conjectured to have occurred in the second century of the Christian era, but neither history nor conjecture furnishes a cause. Thenceforward centuries of total darkness succeed. Probably the irruptions of the Patan sultans of Delhi extended hither; but ultimately the territory formed part of the vast realm of Vijayanagar, remaining so until its total overthrow7 in A.D. 1565, by a great Mussulman confederacy, when its fate was decided under the general partitioning process8 that followed. In 1763 it was conquered by Fuzzul Oolla Khan,9 an officer of Hyder Ali, of Mysore; and the rajah, flying to the Portuguese at Goa, surrendered1 to them his possessions below the Ghats, in consideration of a fixed stipend: these possessions still form part of the Portuguese territory. The territory of the rajah of the country east of the culminating ridge of the Ghats, which became the prey of Hyder on the overthrow of Tippoo, in 1799, was incorporated with the dominions of the East-India Company.

The town of Soonda is distant from Mangalore, N., 130 miles; from Bombay, S.E., 318; from Bangalore, N.W., 220; from Madras, N.W., 390. Lat. 14° 45', long. 74° 52'.

SOONDERBUNDS.—See SUnderbunds.

SOONDERPOOR.—A town in the British district of Silhet, presidency of Bengal, 57 miles S.S.W. of Silhet. Lat. 24° 11', long. 91° 24'.

SOONDICOOPA.—A town in the native state of Mysore, 13 miles W.N.W. from Bangalore, and 63 miles N.E. from Seringapatam. Lat. 13°, long. 77° 27'.

SOONDOO RIVER, a feeder of the Mahanuddy, rises in lat. 20° 12', long. 82° 6', and, flowing northerly through Nowagudda and Berar for seventy-three miles, falls into the Mahanuddy, in lat. 21° 4', long. 81° 56'.

SOONDOOR.—See Soudoor.

SOONDRA.—A town in the Rajpoot state of Jodhpoor, 182 miles W. by S. from Jodhpoor, and 71 miles S.W. from Jessulmeer. Lat. 26° 9', long. 70° 15'.

SOONDRAPANDYPATAM.—A town in the British dis-
strict of Madura, presidency of Madras, 69 miles E. of Madura.

Lat. 9° 51', long. 79° 10'.

SOONDURSEE.—A town of Malwa, in the native state of Dewas, situate on the right bank of the Kallee Sinde river, and 61 miles W. from Bhopal. Lat. 23° 16', long. 76° 28'.

SOONDY.—A town in the British district of Nellore, presidency of Madras, 81 miles S.W. of Ongole. Lat. 15° 11'; long. 79° 48'.

SOONEYRUH, in the British district of Mynpoorie, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Aligurh to that of Futtehgurh, and 50 miles N.W. of the latter. The road in this part of the route is bad, the country level, partly cultivated, and partly overrun with bush-jungle. Lat. 27° 37', long. 78° 57'.

SOONKERODEPETTA.—A town in the British district of Vizagapatam, presidency of Madras, 106 miles S.W. of Ganjam. Lat. 18° 15', long. 84° 8'.

SOONPUT, in the British district of Paneeput, lieutenant-governorship of the North-West Provinces, a town on the route from Paneeput to Delhi, 27 miles S. of the former. Soonput contains a population of 16,870 inhabitants. Lat. 29°, long. 77° 4'.

SOONTH.—See SOOUTH.

SOOPA, in the tallook or subdivision of the same name, in the British district of North Canara, presidency of Madras, a town on the rugged plateau formed by the expansion of the Ghats towards the east. The tallook of which it is the principal place, has an average elevation of from 1,000 to 1,500 feet above the sea, and though in many places rugged and rocky, has several well-sheltered and watered valleys, producing rice, pepper, betel-nut, sugarcane, gram (Cicer arietinum), raggi (Cynosurus coronanus), and sesame; and the uncultivated parts are overgrown with noble forests of teak, palms, and various other trees. Those forests may be easily traversed, in consequence of being free from underwood; but they are generally avoided, the atmosphere being very unhealthy, and tigers and leopards being numerous and ferocious. The torrents swell during the monsoon rains, so that timber can be floated down to Karwar and other places on the coast. The tallook has an area of 2,052 square miles, and a population of 36,254,
indicating a relative density of eighteen to the square mile; but this is incredibly low, and so much less than that of the adjacent tallooks, under similar physical circumstances, that doubtless some error must have entered into the return. The town of Soopa is distant direct from Mangalore, N., 170 miles; Bombay, S.E., 280; Bangalore, N.W., 260; Madras, N.W., 410. Lat. 15° 16', long. 74° 35'.

SOOPEH.—A town in the British district of Poonah, presidency of Bombay, 38 miles E.S.E. of Poonah. Lat. 18° 20', long. 74° 26'.

SOOPOLE.—See CHANEE SOOPE.

SOORADAH.—A town in the British district of Ganjam, presidency of Madras, 48 miles N.W. by W. of Ganjam. The zemindarry of which this town is the principal place having long continued in a state of violence and disorder, was excepted, in 1836, from the operation of the general regulations, and its civic and criminal administration intrusted to an agent of the governor of Fort of St. George.¹ Lat. 19° 45', long. 84° 30'.

SOORAHEE, in the British district of Hurriana, lieutenant-governorship of the North-West Provinces, a village on the route from Delhi to Hansee, and 11 miles S.E. of the latter. The road in this part of the route is good. Lat. 29° 3', long. 75° 12'.

SOORAJGUNG,¹ in the British district of Mymensing, presidency of Bengal, a town on the right or south-western bank of the Konaic, a great offset of the Brahmapootra. It is the principal mart of the district, between 1,000 and 2,000 river craft of considerable size being usually anchored² here, to receive or discharge cargoes. The principal exports are rice, butter, cattle, hides, and timber. Distance from the town of Nusseerabad, S.W., 45 miles; Dacca, N.W., 69; Calcutta, N.E., 153. Lat. 24° 26', long. 89° 43'.

SOORAJGURH,¹ in the British district of Monghyr, presidency of Bengal, a town on the right or south bank of the Ganges, on the route from Dinapoor to the city of Monghyr, 90 miles³ N.E. of former, 20 W. of latter. It is the principal place of a thana or station of a police division, but otherwise is

¹ E.I.C. Ms. Doc.
² Acts of Govt. of India, No. xxiii. of 1836, and xxiv. of 1839.
⁴ Garden, Tables of Routes, 97.
insignificant. Distant N.W. from Calcutta, by Burhampoor and Patna, 318 miles, by the course of the Ganges 390.3
Lat. 25° 12', long. 86° 19'.

**SOORAPOROOR.**—See SHORAPORE.

**SOORAOONA.**—A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Soorkee river, and 97 miles S.W. from Jodhpoor. Lat. 25° 20', long. 72° 10'.

**SOOREE.**—A native state on the south-west frontier of Bengal. It is bounded on the north by the British district of Sumbulpore and by Berar; on the east by Burgurh; on the south by Sarunghur; and on the west by Boota. It is fifteen miles in length from north to south, and ten in breadth: its centre is about lat. 21° 53', long. 82° 58'.

**SOOREE.**—A town in the British district of Beerbhoom, presidency of Bengal, 109 miles N.W. by N. of Calcutta. Lat. 23° 53', long. 87° 31'.

**SOORGAUM.**—A petty district of Chooan Rajpoots, in the north-western part of the province of Quzerat. It is bounded on the west by the Runny of Cutch; on the east by Baubier; on the north by Mow; and on the south by Charchat. It is ten miles long and ten broad, and contains an area of sixty-four square miles. The country is flat and open; the soil is both sandy and saline, producing but poor crops, and those of the commoner grains. Ghussya salt is produced on the Runny side in large quantities: the water is brackish, and not plentiful. The great road from Nuggur Parkur and Sinde, across the Runny, passes through the district. The cold weather lasts during the months of November, December, January, and February: the heat is excessive during the months of April, May, and June: the rains in July, August, and September, are generally very light. No tribute is paid to any government. The population amounts to about 4,500.

The connection of Soorgaum with the British government first occurred in 1819, upon the expulsion by the latter of the numerous bands of plunderers from Guzerat; and a subsequent engagement was entered into in 1826. The policy observed towards it is that of non-interference with its internal affairs, but of control in its external relations. The district is divided amongst five petty chiefs, of the Chooan Rajpoot caste, the principal of whom are Bugwanjee and Fezmuljee, who succeeded
their fathers in the authority which they possess, and which they will probably transmit to their sons. The town of Soorgeum is in lat. 24° 9', long. 71° 18'.

SOORQUL, in the hill state of Bulsun, a lofty peak on a range connected with that of Chur. It is stated by Lloyd to have an elevation greater than that of Wartoo, which is 10,673 feet above the sea. Lat. 31° 5', long. 77° 33'.

SOORLA, a river of Bombay, rises in lat. 19° 54', long. 73° 24', and flowing through the British collectorate of Tannah west for thirty-five miles, and south for thirty-three, falls into the sea at lat. 19° 30', long. 72° 55'.

SOORNAMOOKY, a river of Madras, rises in lat. 18° 26', long. 79° 11', and flowing north-east for seventy-eight miles through North Arcot, and twenty-one through Nellore, falls into the sea at lat. 14° 8', long. 80° 11'.

SOOBODONGUR. - A town in the territory of Nagpoor, 66 miles N.N.W. from Bustur, and 176 miles E.S.E. from Nagpoor. Lat. 20° 5', long. 81° 35'.

SOOBOUL, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by the Sohajee Pass from Allahabad to Jubbulpore, and 27 miles S.E. of the former city. The road in this part of the route is to the north, or towards Allahabad, a good cattle-track, practicable for carts; to the south, or towards Sohagi Ghat, for the most part a bad winding path, never frequented by carts: the country is open and cultivated. Lat. 25° 7', long. 81° 48'.

SOOROW. - A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Sookree river, and 87 miles S.W. by S. from Jodhpoor. Lat. 25° 20', long. 72° 20'.

SOORSAH. - A town in the native state of Oude, 57 miles N.W. by W. from Lucknow, and 34 miles E. from Futtehgurh. Lat. 27° 20', long. 80° 14'.

SOORSUTTY. - A river rising in Sirmour, a short distance south-east of Nahun, and about lat. 30° 30', long. 77° 29'. It takes a south-westerly direction, and after a course of about thirty miles it joins another torrent, the Kharakee, holding nearly the same direction, and then divides into two branches, the more easterly being called the Chittung, the more westerly the Soorsutty. In consequence of the evenness of the surface,
SOORUJ GURH.

and the great body of water sent over it in heavy rains, it sometimes unites with the Markunda, and even with the Guggur. "The whole tract of country," observes Baker, with the exception of village sites, is liable to inundation from the Sub-Himalayan torrents, diffused over the surface by means of a network of natural and artificial watercourses, of which some are supplied from more than one of the rivers above named; others again flow from one river into another, and during great floods all three (the Guggur, Markunda, and Soorsutty rivers) are frequently united." Having held a south-westerly direction for about thirty-five miles, as far as Thanesur, it there turns to the west, and seventeen miles lower down receives the Markunda, and after a farther course of about forty miles, joins the Guggur, in lat. 29° 52', long. 76° 10'. Like the other streams of Sirhind, it is, unless during inundation, merely "a small thread of running water." It is regarded with great veneration by the Hindoos, being in their extravagant mythology considered identical with the Sarasvati, the consort of Brahma, and goddess of wisdom, fabled to pass under ground to the confluence of the Jumna and Ganges, and there to mingle her stream with theirs. "It is the famous Sarasvati, which comes out of the hills to the west of the Yamuna [Jumna], passes close to Thaneser, loses itself in the great sandy desert, and reappears at Prayag, humbly oozing from under one of the towers of the fort, as if ashamed of herself. Indeed she may blush at her own imprudence, for she is the goddess of learning and knowledge, and was then coming down the country with a book in her hand, when she entered the sandy desert, and was unexpectedly assailed by numerous demons with frightful countenances, making a dreadful noise. Ashamed of her own want of foresight, she sank into the ground, and reappeared at Prayaga or Allahabad."  

SOORUJ GURH, in the hill state of Hindoor, a height on the ridge of Malown, and four and a half miles S.E. of that fort. During the war with the Goorkhas, it was surmounted by a fort occupied by a garrison of that nation, until Colonel Thompson having established himself at the intermediate post of Deontul, and cut off the communication with Malown, the fort of Sooruj Gurh was evacuated, and fell into the hands

SOO.

of the British, by whom it was subsequently demolished. Elevation above the sea 4,927 feet. 1 Lat. 31° 9', long. 76° 54'.

SOORUJGURH.—A town in the Rajpoot state of Jeypoor, 95 miles N. from Jeypoor, and 97 miles W.S.W. from Delhi. Lat. 28° 17', long. 75° 49'.

SOORUJPOORE.—A town of Bundlecund, in the native state of Punnah, 57 miles W.S.W. from Punnah, and 61 miles N.E. from Saugur. Lat. 24° 30', long. 79° 26'.

SOORUNG.—See Soang.

SOORUTGURH.—A town in the Rajpoot state of Beekaneer, 101 miles N.N.E. from Beekaneer, and 108 miles W. by N. from Hissar. Lat. 29° 19', long. 74° 3'.

SOOSNEER, 1 in the territory of Gwalior, or possessions of Scindia's family, a considerable town, with a good 2 bazar, 200 miles S.W. of Gwalior fort, 55 miles N. of Oojein. Lat. 23° 55', long. 76° 6'.

SOOSWA. 1—A river in the British district of Deyrah Dhoon, formed by the confluence, in lat. 30° 15', long. 78° 5', and at an elevation of 2,148 feet above the sea, of two mountains, the Ruspunna and the Bindhal Rao, flowing from the south-western declivity of the mountains of Gurwhal. It takes a south-easterly direction, and, receiving several feeders, joins the Song Nuddy in lat. 30° 4', long. 78° 14', having previously parted with an offset, which, retaining the name of Sooswa, falls into the Ganges a little below the confluence with the Song.

SOOTEE, 1* in the British district of Moorshedabad, presidency of Bengal, a town on the route from Berhampore to Dinapore, 42 2 miles N.W. of the former, 251 S.E. of the latter. Here, in July 1763, was fought a battle between a British army and the troops of Meer Cossim Ali, 3 nawaub of Bengal, in which, after a contest of extraordinary severity, the former totally routed their opponents, taking all their cannon 4 and 150 boats laden with grain. The thana or police-station of Sootee has jurisdiction over a small tract containing 5 128 villages, 4,816 houses, and a population of 34,662; of which the Mussulman proportion is 28,499, the Brahminist 6,163. Sootee is distant N. from Calcutta by land, by way of Berhampore, 160 miles, by water 210. Lat. 24° 35', long. 88° 6'.

* Sooty of Rennell, 1 and of Lord Valentia. 2
SOOURPOUR.—A town in the British district of Chota Nagpoor, presidency of Bengal, 48 miles S.E. of Lohadugga. Lat. 22° 59', long. 85° 18'.

SOOWURNDROOG,1 in the presidency of Bombay, a fort on a small and slightly-elevated island2 close to the coast of the collectorate of Rutnagherry (South Concan). It was made defensible3 in 1662, by Sevajee, the Mahratta chief; in 1713 it passed by treaty from Shao,4 rajah of Sattara, to Kanhojee Angria, who had originally been a commander in the Mahratta fleet, and acquired great power and wealth by piracy; in 1755 Tulaji, a successor of Kanhojee, having carried on a prolonged and destructive course of piracy against British commerce, a small force, consisting of "a forty-four-gun ship,5 a ketch of sixteen guns, and two bomb-vessels," was despatched, under the command of Commodore James, against the fort, which was captured6 after a feeble resistance of a few hours, and without the loss of a man on the side of the captors. On this success Duff observes,7 "An achievement which, from the previous idea entertained of the pirate Angria, and the strength of the fortifications, was a matter of surprise even to those who accomplished it." It was transferred to the Mahratta government in exchange for Bankote and Fort Victoria, and acquired finally by the East-India Company on the overthrow of the Peishwa in 1818. Distance S. from Bombay 78 miles. Lat. 17° 50', long. 73° 8'.

SOPUR.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the left bank of the Jhelum river, and 23 miles W.N.W. from Sirinagur. Lat. 34° 15', long. 74° 40'.

SORAON, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a town on the route from Allahabad to Oude, 14 miles N. of the former. Lat. 25° 38', long. 81° 55'.

SORAWN, in the British district of Allahabad, the principal place of the pargannah of the same name, is situate on the route from the city of Allahabad to Partabgarh, and 12 miles N. of the former. Lat. 25° 36', long. 81° 55'.

SORON,1 in the British district of Budaon, lieutenant-

* Suwarnadurg of Tasein; perhaps more properly Subaranadurg,1 Golden Fort; from Subaran, "golden," and Durg, "fort."
governorship of the North-West Provinces, a town on the route from Coel to Budaon, 25 miles S.W. of the latter. Population 10,395.\(^2\) Lat. 27° 53', long. 78° 49'.

SORUBA.—A town in the native state of Mysore, 178 miles N.W. from Seringapatam, and 45 miles E. by N. from Honahwar. Lat. 14° 28', long. 75° 9'.

SORUTH,\(^1\) in the peninsula of Kattywar, province of Guzerat, a district, the most southern of the peninsula. It is bounded on the north by the district of Hallar; on the north-east and east by that of Kattywar; on the east by Babriawar; on the south and south-west by the Arabian Sea; and on the west by the district of Burda; and lies between lat. 20° 41'—21° 50', long. 69° 58'—71° 12'. There is no official return of the area, but by probable approximation it may be stated at 3,300 square miles. From Kunkasa, in lat. 21° 10', long. 70° 6', the shore extends about sixty-five miles south-easterly, to Diu Head, and from that point takes a direction a little north of east for twenty-eight miles, as far as the estuary of the river Bhun, at Rajpoot. The land along the shore is in general of moderate height and the soundings bold, so that in most parts the coast is safe to approach. There is, however, about four miles west from Diu Head and two miles off shore, "a rocky\(^2\) bank, which extends about four miles in a west-north-west direction parallel to the coast, having three and a half fathoms water on it, and eight or nine fathoms between it and the opposite shore." The seaports which occur in proceeding south-eastward from Madhapoor, near Kunkasa, are Mangroal, at the distance of ten miles, a bad\(^4\) haven, but having extensive traffic; at the distance of ten miles farther, Chorwaur, for boats only; fifteen miles beyond, Somnath Pattan; thence eighteen miles distant, Korynaur; fifteen miles beyond which is Diu Head, the most southern point of the peninsula. Adjacent to this is Diu Island, extending seven miles from east to west, and separated from the mainland by a narrow channel, navigable by fishing-boats only; but at the eastern extremity of the island is a small bay, landlocked, and commanded by the fort on its west side. Abreast of the fort "there was formerly

\(^1\) Soruth appears to be a corruption of Surashtra,\(^1\) which it is said was formerly the name of not only this tract, but of the whole of the peninsula.\(^2\)
SORUTH.

depth for a seventy-four-gun ship within five or six hundred yards of the wall, by taking care to avoid a rock above water, which joins a line of rocks stretching from the castle; but the depth seems now to have decreased."

The eastern and north-eastern parts of the district are rugged and hilly, rising in the summit of Girnar, a peak of granite, to an elevation said to be 2,500 feet above the sea. From those highlands numerous torrents stream down in a direction from north-east to south-west, and fall into the Arabian Sea. Of these, the principal is that formed by the river Ujit, draining the northern face of the Girnar group, and the Sabhi, draining the southern face. The Bhadur, the largest stream of the peninsula, touches on the north-eastern corner of this district, and flowing westerly for about twenty-five miles, forms the northern boundary between it and Hallar. The Bhadur subsequently enters this district, and taking a direction south-west for twenty-five miles, turns south, and forms the boundary between Soruth and Burda for a short distance, falling into the Arabian Sea near Madhupoor. The Kutni, the Mohandarya, the Vriddi, and some others of less importance, also hold a south-westerly direction. The lower part of the district, between the hills and the sea, may, it is said, "vie in fertility" with any part of Guzerat. A black soil is watered by numerous streams, whence irrigation is easily carried on, the water being sufficiently near the surface to admit of its being raised by the Persian wheel. This division of the province consequently suffers comparatively little from droughts, which too frequently cause devastation and famine in other parts of Kattywar. From the continued and abundant supply of water from those rivulets, the want of rain is not so severely felt as elsewhere. The crops are chiefly sugarcane, wheat, and jowar; the mango-tree flourishes in great luxuriance, and the fruit is excellent. The district is rendered the more valuable and pleasing from being pretty well wooded. Nearly the whole of this fine district is held by a Mussulman, the nawaub of Joonagurh, so called from his capital of that name, situated among the hills in the north-east part.

The principal places—Joonaghur the capital, Somnath Pattan, Mangroal, Korynaur, Chorwaur, as well as Diu, the Portu-

* According to Jacob,1 about 3,500 feet.
SOS—SOU.

guinea island and seaport lying off the coast—are described under their respective names in the alphabetical arrangement.

SOSILLA.—A town in the native state of Mysore, 21 miles S.E. by E. from Seringsapatam, and 88 miles N. from Coimbatooor. Lat. 12° 16’, long. 76° 59’.

SOTEE, or YARWUFADAR.—A river rising in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, about lat. 28° 54’, long. 78° 33’. It holds a south-easterly course of about 130 miles, and falls into the Ganges on the left side, in lat. 27° 41’, long. 79° 29’. About thirty miles from its source, it is crossed by the route from Bareilly to Meerut, and is in that place fordable in the dry season, but during the rains becomes so swollen as to be passable only by ferry. A little lower down, the route from Bareilly to Delhi crosses it by a bridge of fascines, and there it is ten yards wide, and very deep. Forster describes its waters as salubrious, and flowing in a beautifully winding course, and mentions that the name Yarwafadar, or “trusty friend,” by which it is generally known in the lower part of its course, was given by Mohammed Shah, of Delhi, in enthusiastic recognition of the advantages derived from it by his army during his invasion of Rohilcund in 1745.

SOTEH.—A town of Eastern India, in the native state of Muneeepoor, 28 miles E. by S. from Muneeepoor, and 102 miles E. from Silchar. Lat. 24° 41’, long. 94° 27’.

SOUAR, in the jaghire of Rampoor, lieutenant-governorship of the North-West Provinces, a village on the north-eastern route from the town of Rampoor to Nugeena, and 18 miles N. of the former. Lat. 29° 2’, long. 79° 6’.

SOUADAPULLY.—A town in the British district of Cuddapah, presidency of Madras, 72 miles S. by W. of Cuddapah. Lat. 18° 26’, long. 78° 45’.

Soudra, in the Rajpoot state of Jessulmeer, a village near the route from Roree, in Sindh, to the town of Jessulmeer, and 11 miles N.W. of it. There are a few shops, and water is obtainable from wells. The road in this part of the route is stony. Lat. 26° 57’, long. 71° 7’.

Sumb, or SUMBE, a mountain torrent rising at the southern base of the Sewalik Mountains, in lat. 30° 24’, long.

* From Yar, “friend,” and Wafadar, “trusty.”
77° 28', and described by Colvin\(^1\) as "nearly dry, except in rains, when it receives the drainage of the mountains south-east of Nahun; and of the plains east of its course nearly to the Jumna; from which, and a strong fall, its floods are most violent and sudden in their effects."

SOUND, or SEUNDA,\(^1\) in the native state of Dutteea, province of Bundecund, a town on the route by Kooneh from Gwalior to Calpee, 72\(^2\) miles W. of the latter. It is situate on the right bank of the river Sindh, which here has "steep\(^3\) banks, sandy bottom, and usual depth of water during the dry season two feet." Here, in the beginning of November, 1817, were the head-quarters\(^4\) of the British army under the Marquis of Hastings, Governor-General, advancing towards Gwalior to intimidate Scindia. Lat. 26° 9', long. 78° 50'.

E.I.C. Ms. Doc.

SOUND.—A town of Bundecund, in the native state of Dutteah, 40 miles N.N.E. from Dutteah, and 36 miles W. from Jaloun. Lat. 26° 10', long. 78° 51'.

E.I.C. Ms. Doc.

SOUNDS.—A town in the British district of Bellary, presidency of Madras, 24 miles W. by S. of Bellary. A small portion of the district of which this town is the principal place, belongs to a native chief, styled the rajah of Soundoor.\(^2\) Lat. 15° 5', long. 76° 36'.

E.I.C. Ms. Doc.

SOURJPOOR.—A town in the native state of Nepal, 113 miles W. by S. from Khatmandoo, and 56 miles N. from Goruckpoor. Lat. 27° 30', long. 83° 29'.

E.I.C. Ms. Doc.

SOUZA, in the British district of Mutttra, lieutenant-governorship of the North-West Provinces, a town on the route from Mutttra cantonment to Kombher, in Bhurtpore, and 15 miles N.E. of the latter. Lat. 27° 27', long. 77° 37'.

SOUTHERN MAHRATTA JAGHIREs.—By this name are indicated the following petty territories in the Southern Mahrratta country:—Hablee, Jhumkunde, Koonwar, Meeruj (under two chiefs), Moodhole, Nurgoond, Sanglee, Savanore, and Shedbal. They are under the protection of the British government, and locally are within the limits of the Bombay presidency. The area of the whole is returned at 3,700 square miles, and the entire population is stated at 410,700.\(^1\)

The Sattara jaghires, dependencies of the late raj of Sattara, and included within it, are named Akulkote, Bhore, Juth, Ounde, Phultun, and Wyhee. With the state to which they
belonged, they have passed under the British government. Most of the jaghires above mentioned are noticed separately in the alphabetical arrangement.

SOUTH-WEST FRONTIER OF BENGAL.—This agency comprehends a large tract of country under the administration of an officer called the Political Agent for the South-West Frontier, and who is also commissioner of Chota Nagpore. He is aided in the discharge of his duties by several European assistants. In addition to these, there is a native judicial establishment, consisting of a sudder aumeen and nine moonsiffs. The tract of country subject to the commissioner of Chota Nagpore, comprises that province called also Lohardurga, Maunbhoom, Ramgurh or Hazareebagh, and Sumbhulpore; but the authority of that officer as political agent extends over several native states subject to British control, in most of which the government of the chiefs is of a very loose character, the land but imperfectly cultivated, and the people but slightly reclaimed from natural wildness. The principal of these native domains are Sirgooja, Patna, Sonepore, Korea, Nowagurh, Bora Samba, Sarungurh, Phooljee, Bombra, Bonei, Gangpore, Jushpore, Sucktee, Ryegurh, Burgun, Keriall, Serickala, Kursava, and Colehan. In these states the administration of civil justice rests with the chiefs, subject to an appeal to the political agent. In criminal matters, the rajahs may pass sentence to the extent of fourteen years’ transportation, under the approval of the agent; but sentence of death cannot be passed until the case comes before the British agent for trial. In minor cases, the rajahs and chiefs may carry out their own orders at once; but they are expected to make monthly reports, and transmit copies of all proceedings.

The places named in the course of this article will be found noticed in the alphabetical arrangement.

SOWARA.—See Nusserabad.

SOWDA.—A town in the British district of Candeish, presidency of Bombay, 108 miles E.N.E. of Malligaum. Lat. 21° 8’, long. 76°.

SOWLEEGURBH, in the British territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Baitool to Indoor, 34 miles N.W. by W. of the former. Lat. 22° 7’, long. 77° 31’.
SOW—SRA.

SOWNEE,¹ in the British district of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town, the principal place of the pargannah of the same name. It is situate on the route from Hoshungabad to Asseerghur, 30³ miles S.W. of former, 111 N.E. of latter. It is described as one of the best-looking and cleanest towns in Central India, with one very wide street of new and well-built houses. There are several wealthy mahajans or merchants, who carry on trade with Hoshungabad and Boorhanpoor, chiefly in grain. Lat. 22° 28', long. 77° 30'.

SPANZEIK.—A town of Burmah, situate on the left bank of the Irawaddy river, and 134 miles S.W. from Ava. Lat. 20° 19', long. 94° 43'.

SPITI.—A valley so called, forming the north-eastern angle of the Punjab: it extends from lat. 31° 40'—32° 40', and from long. 77° 43'—78° 33', and is seventy miles in length from north to south, and forty-seven in breadth. The valley is traversed throughout by the river of Spiti, a feeder of the Sutluj. The mean elevation of the inhabited parts is stated to be 12,986¹ feet. In 1846, the district was leased by the British for three years to the rajah of Bussahir, and after the expiration of that period a revenue settlement was made with the cultivators, which is still in force.²

SPITI RIVER.—See Li.

SRAVANA BELGULA,¹ in the territory of Mysore, a village, one of the few places in which the Jain tenets and worship, formerly so prevalent over India, continue to hold their place. Here is a colossal image of Gomuta Raya, one of the great pastors or coryphaei of the Jains, being regarded by them as deified on account of his merits. The statue repre-
SRE—SRI.

senta* the personage naked; it is of very massive proportions, being seventy feet three inches in height, and consisting of one solid stone. Hence it is supposed to have been formed by hewing8 away the original mass of rock, until the statue alone remained.

Though the Jains have been nearly exterminated in this part of India, by the persecution of the Brahmins, the votaries of their faith in other quarters regard this place with high reverence, and lately an opulent Jain merchant of Seringapatam evinced his devotion by the construction here of a fine tank. Distance N.W. from Seringapatam 33 miles. Lat. 12° 51', long. 76° 33'.

SREE MUTTRA, or SARMATHURA, in the Rajpoot territory of Kerowly, a town† near the western frontier, towards territory of Jeypore, 35 miles W. of the town of Dholpoor, 62 S.W. of Agra. Lat. 76° 31', long. 77° 29'.

SREEVURDHUN, in the presidency of Bombay, a town in the territory occupied by the Hubsies, 62 miles S.W. by W. from Poonah, and 62 miles S. by E. from Bombay. Lat. 18° 3', long. 73° 5'.

SRIGARTH.—A town in the north-eastern quarter of the Punjaub, in the small raj of Kullu, situate 43 miles S.E. by S. of Sultanpoor. Lat. 31° 24', long. 77° 30'.

SRI KANTA,† in Gurwhal, a lofty peak of that part of the Himalaya in the space lying in the great flexure of the river Bhageerettere, where it changes its direction from north-west to south-west. Fraser, who had a transient glimpse of this summit while temporarily free from clouds, designates it as "an enormously lofty and sharp peak." It is visible from Suharunpoor, in the plains of Hindooostan, though many lofty ranges intervene, and the distance in a direct line is 105 miles. The summit of Sri Kanta is 20,296 feet above the sea. Lat. 30° 57', long. 78° 51'.

* The engraving given by Buchanan of this colossus bears some resemblance to that given by Burnes of the huge figures cut out of the cliff at Bandian.

† Hamilton states it to be a town of considerable size, situate on a naked rock of red sandstone, by working and selling which the greater part of the inhabitants are supported.

‡ The point or peak of Sri or Lakshmi, the wife of Vishnu, and goddess of prosperity; from Sri, and Kanta, "a thorn, or point."
SRI—SUB.

SRI-NAGAR, 1 in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Allahabad to Calpee, and 21 miles E. of the latter. The road in this part of the route is in general good, though in some places much cut up. Lat. 26° 9', long. 80° 6'.

SRI-NUGUR, 1 in the British territory of Jauloun, in Bundelcund, lieutenant-governorship of the North-West Provinces, a town on the route, by the Hirapoor Pass, from Sauraj to Banda, 47 miles S.W. of the latter. It has a large bazar, and water and supplies are abundant. Lat. 25° 11', long. 79° 50'.

SRI-RAMAPURAM.—A town in the British district of Vizagapatam, presidency of Madras, 54 miles S.W. by W. of Vizagapatam. Lat. 17° 19', long. 82° 39'.

STEEMMUNGTURGH.—A town in the Southern Mahratta jaghire of Sanglee, 47 miles S.E. by E. from Dharwar, and 89 miles W. from Ballary. Lat. 15° 7', long. 75° 40'.

STREEVY GOONDUM.—A town in the British district of Tinnevelly, presidency of Madras, 17 miles E.S.E. from Tinnevelly. Lat. 8° 59', long. 77° 59'.

STRIMUSTRUM.—A town in the British district of South Arcot, presidency of Madras, 31 miles S.W. of Cuddalore. Lat. 11° 24', long. 79° 28'.

SUAGARHI, 1 in the petty hill state of Kothar, the remains of a fort on a high ridge shutting in the Gumbur river. The supply of water is from a tank supplied merely by rain, as there is no spring within a considerable distance. Elevation above the sea 5,620 feet. 2 Lat. 30° 56', long. 77° 2'.

SUBANIRIKHA, 1—A river rising in the British district of Chota Nagpore, about lat. 23° 9', long. 84° 50'. It takes a direction north-east for fifty miles, and subsequently turning due east, becomes the boundary for thirty miles between the district of Chota Nagpore and that of Ramgurh. At the end of that distance it takes a direction south, and for a like distance forms the boundary between the districts Chota Nagpore and Pachete, and, entering this last-named district, traverses it in a direction south-east for a distance of about twenty-five miles. Continuing in the same direction, it for about six miles forms the boundary between the last-named district and Singbhoom, and then for nine miles the boundary between Barrabhoom and Singhboon, and for twelve miles between Barrabhoon and

SUBATHOO.

Pooralia, through which it flows for fifty miles, and subsequently forms the boundary between it and the territory of Orissa for twenty-five more. Finally entering the district of Midnapore, it holds its course for eighty miles to the sea, disemboguing a few miles below Peepley, in lat. 21° 35', long. 87° 28'. Its direction after entering district Midnapore is south-east: its total length of course is about 317 miles. Stirling styles it a "respectable river," but its mouth is obstructed by a dangerous bar. It is called Peply or Pipili river by Horsburgh, who mentions that Peply sand stretches three leagues from the shore, and in some part, four miles from land, is nearly dry at low water; and that there is on the east side of the bank a road where ships may anchor in five fathoms water.

SUBATHOO.—A fort and cantonment, the principal place of a small pargannah of the same name, reserved by the East-India Company, on the settlement of the hill states at the conclusion of the Ghookas war, in 1815; previously it was within the thakoorai or lordship of Keunthal. The district is bounded on the west by Kothar, and surrounded on all other sides by Burroulee. It is a sort of table-land, having in its vicinity mountains varying in height from 4,600 to 8,000 feet above the sea, but southwards, or towards the plains, it is rather open, and exposed to the winds blowing from them, though overtopped by some highlands in that direction. The fort is situate on an eminence rising about 1,100 feet from the right bank of the river Gumbur. The surrounding country is populous, being studded with many villages, the number of which has continually been on the increase since the establishment of British supremacy, in consequence of the refuge afforded to persons oppressed in the neighbouring hill states, and the extended demand for labour and produce to supply the consumption of the British troops stationed there. Agriculture is carried on with great industry and skill, the sides of the mountains being formed into successive terraces, like huge steps. The level spots on the banks of the streams are irrigated and cultivated for rice, which is produced in great abundance, and of a quality superior to that of the adjacent plains. The other crops are wheat, barley, maize, millet of various kinds, ginger,
cotton, opium, tobacco, oil-seeds, red pepper, hemp, and a variety of esculent vegetables. The fruits are generally excellent; and among them are apricots, peaches, walnuts, a few apples, wild pears, raspberries, and melons; the strawberries are small and without flavour. The high grounds in the immediate vicinity of the station are almost destitute of wood, except on their northern declivities, which are covered with pines. The climate is altogether agreeable, and very healthy, the mean temperature of the whole year being from $65\frac{1}{2}$° to $66°$: the heat in May and June is considerable, but not oppressive. The periodical rains are heavy, commencing about the 20th of June and continuing to the close of September: hoar frosts commence in November, and cease about the beginning of March. During December and January, in severe seasons, ice of considerable thickness is produced on standing water. Snow sometimes falls to the depth of four or five inches, but seldom lies above three or four days, as the direct rays of the sun are powerful. The supply of water for the cantonment appears to be sufficient only in ordinary seasons. During periods of drought, recourse must be had to springs three-quarters of a mile distant, and 400 feet below the level of the barracks.

The old fort has been converted into a jail for delinquents convicted at the cantonment and at Simla. Subathoo is in the Cis-Sutlej division of the territories subject to the jurisdiction of the commissioner of the Punjaub. The fort is distant N.W. from Calcutta 1,075 miles; elevation above the sea 4,500 feet.

Subathoo was some time since selected as the site for a sanatorium for troops. Its salubrity has been satisfactorily tested; the special committee appointed to inquire into the relative healthiness of different stations, having arrived at the conclusion that at least two soldiers die at stations on the plains for one on the hills. Lat. 30° 58', long. 77° 3'.

SUBBULGARH, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a ruinous town and fort on the route from Nujeebabad to Hurdwar, and 10 miles N.W. of the former. It is described by Captain Hardwicke as "a very extensive line of fortification, inclosing the town; both which exhibit little more than naked walls

Gerard gives it as 4,205; but the statement in the text rests on official authority.
SUBHAPUR, in the British district of Futtehpore, lieutenant-governorship of the North-West Provinces, a village on the route from Banda to the town of Futtehpore, and 10 miles S.W. of the latter. The road in this part of the route is good; the country level, well cultivated, and studded with small villages. It is probably identical with that called by Rennell Shahbazpoor,* or falcon's town. Lat. 25° 56', long. 80° 36'.

SUBTERMOOKEE RIVER.—One of the mouths of the Ganges, discharging itself into the sea in lat. 21° 34', long. 88° 26'.—See Sunderbunds.

SUBULKA SAREE, in the British district of Delhi, lieutenant-governorship of the North-Western Provinces, a town on the route from the city of Delhi to Bewaree, and 14 miles S.W. of the former. There is a good bazar, and water is abundant. The road to the north-east, or towards Delhi, passes over a rocky range of hills, and is indifferent, yet practicable for wheeled carriages. Lat. 28° 33', long. 77° 10'.

SUBZULCOTE.—A town in the native state of Bahawulpore, situate 14 miles S.E. from the left bank of the Indus, and 76 miles N.E. by E. from Bukkur. The town and district of Subzulcote were conferred upon the khan of Bahawulpore in 1843, in reward of the support afforded by him to the British troops during the war in Sinde and Affghanistan. Lat. 28° 12', long. 69° 57'.

SUCHANA.—A town in the peninsula of Kattywar, province of Guzerat, situated in the prant or subdivision of Hallar, on the southern shore of the Gulf of Cutch. Distance from Ahmedabad, S.W., 150 miles. Lat. 22° 34', long. 70° 22'.

SUCHEEN.—A town with a small territory included within the limits of the British district of Surat, presidency of Bombay, though in a great measure independent of the British government. It contains an area of 300 square miles, with a population2 of 22,260. The chief, styled the Nawaub

---

* From Shabaz, "falcon," and Pur, "town."

2 From Shabaz, "falcon," and Pur, "town."
of Sucheen, possesses, it is stated, seventeen villages and an annual income of 89,000 rupees. Loans to the nawaub, to enable him to discharge his Arab mercenaries and for other purposes, have been granted by the British government. These debts have not yet been liquidated; and it has been suggested that certain villages should be sold to relieve the chief from his embarrassments. The town of Sucheen is distant from Surat city, S.E., 10 miles. Lat. 21° 4', long. 72° 58'.

SUCHIENDEE, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a town on the route from Calpee to the caoutnment of Cawnpore, and 14 miles W. of the latter. It has a bazar, and supplies and water are abundant. The population amounts to 5,517. The road in this part of the route is bad, the country partially cultivated. Lat. 26° 25', long. 80° 14'.

SUDDASHEEPET.—A town in the native state of Hyderabad, or territory of the Nizam, situate six miles S.W. from the right bank of the Manjera river, and 41 miles W.N.W. from Hyderabad. Lat. 17° 37', long. 78°.

SUDIYA.—A town of Assam, in the British district of Sudiya, presidency of Bengal, 84 miles N.E. of Seebpoor. The district, of which this town is the chief place, forms one of the divisions of Upper Assam, and contains (inclusive of Mutruck) an area of 6,942 square miles, with a population of 30,000. Lat. 27° 50', long. 95° 42'.

SUDJUN.—A town in the British district of Tannah, presidency of Bombay, 86 miles N. of Bombay. Lat. 20° 10', long. 72° 50'.

SUDULPUR JEHUR, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Shahjehanpoor, and nine miles S.E. of the former place. It is situate near a large piece of water, in an open, level, cultivated country. The road in this part of the route is good. Lat. 28° 15', long. 79° 35'.

SUDURKHANKAKOT, in Sirhind, a village on the route from Loodiana to Ferozpoor, and 44 miles W. of the former town. It is situate seven miles from the left bank of the Sutlej, in a level open country, partially cultivated. The road in this part of the route is generally good, but in some places
SUF.

heavy and sandy, yet not so much so as to have serious difficulties for guns or carriages. Distant N.W. from Calcutta 1,146 miles.\(^2\) Lat. 30° 56', long. 74° 39'.

SUFDARGANJ,\(^1\) in the territory of Oude, a town on the route from the cantonment of Goruckpoor to Lucknow, 137 miles W. of the former, 29° E. of the latter. Here is encamping-ground on an extensive plain. Provisions and wood may be obtained on previous notice. The road eastward, or towards Goruckpoor, is good; westward, or towards Lucknow, heavy. Lat. 26° 56', long. 81° 15'.

SUEFID KOH, or "THE WHITE MOUNTAIN," is a lofty range bounding the valley of the Kabool river on the south, as the Hindoo Koosh does on the north. These two ranges are about seventy miles apart, and this distance may be considered as the extreme breadth of the valley of the Kabool river. The Sufeid Koh range runs nearly east and west along the parallel of lat. 33° 50', commencing eastward near Attock in long. 72° 16', and terminating westward in long. 69° 36'. Its western extremity sinks into a maze of hills, stretching like network to the Kohistan of Kabool. The Sufeid Koh is generally of primary formation, consisting of granite, quartz, gneiss, mica, slate, and primary limestone. There are three ranges running nearly parallel, and rising in height as they recede from the river: the two lower are covered with pine forests; the highest and most distant has a very irregular outline, is steep and very rocky, yet furrowed by many beautiful and fertile vales. The highest part is between the meridians of 69° 40' and 70° 30', and attains the elevation of 14,100 feet, being covered with perpetual snow. The Soorkh Rood, the Kara Su, and many other shallow but impetuous streams, rush down its northern face, and are discharged into the river of Kabool, which conveys their water to the Indus. The Khyber mountains connect the eastern extremity with the Himalaya, as the Kurkutcha do the western; and between them lies the plain of Jelalabad.

SUFFEEDUN,\(^1\) in Sirhind, a small town on the right bank of the canal of Ferozshah, where it changes its direction from south-west to west. The vicinity, formerly but slightly cultivated, has been much improved, in consequence of the irrigation introduced by the repair and cleansing of the canal.

\(^2\) Garden, Tables of Routes, 173, 205.
which, previously nearly useless, has now become a channel for conveying a large body of water from the Jumna to the south of Sirhind. Distant N.W. from Calcutta 960 miles.\textsuperscript{2} Lat. 29° 24', long. 76° 44'.

SUGEN.—A town in the native state of Bamra, on the south-western frontier of Bengal, situate on the right bank of the Braminny river, and 61 miles N.E. by N. from Sumbulpore. Lat. 22° 12', long. 84° 30'.

SUGGUR.—A town in the native state of Hyderabad, or territory of the Nizam, 124 miles S.W. by W. from Hyderabad, and 95 miles S.E. from Sholapoor. Lat. 16° 36', long. 76° 51'.

SUGLA, in Bussahir, a pass over the outer range of the Himalaya, forms a communication\textsuperscript{1} between Koonawar and Gurnwal. The road through it is bad, but has the advantage of being practicable for six months of the year, and is passable for loaded sheep and goats: Gerard estimates its elevation above the sea at 16,000 feet. Lat. 31° 13', long. 78° 29'. A peak about three miles north-east of this pass was, in the great trigonometrical\textsuperscript{2} survey of the Himalaya, ascertained to have an elevation of 21,178 feet above the sea.

SUGREE, in the British district of Azimgurh, lieutenant-governorship of the North-West Provinces, a town on the route from Azimgurh to Goruckpoor, 13 miles N.E. of the former. Lat. 26° 7', long. 83° 28'.

SUHAR, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a town on the route from Muttra to Delhi, 15 miles N.W. of the former. Lat. 27° 38', long. 77° 33'.

SUHARUNPORE,\textsuperscript{1} a British district under the lieutenant-governorship of the North-West Provinces, is bounded on the north-east by the Sewalik range, dividing it from the British district of Dehra Dhoon; on the east by the Ganges, dividing it from the British districts of Gurnwal and Bijnour; on the south by the British district of Mozuffurnuggur; and on the west by the Jumna, dividing it from Sirhind. It is about sixty-eight miles in length from north to south, and sixty in breadth from east to west, with an area of 2,165 square miles; and lies between lat. 29° 28'—30° 26', long. 77° 13'—78° 15'. The surface is in general remarkably uniform, sloping gently towards the south; the numerous torrents which rush
from the Sewalik range flowing generally in that direction, and ultimately finding their way either to the Jumna or the Ganges. There is little elevation towards the base of the Sewalik hills, which rise precipitously from the plain, the level of which is scarcely broken, except by two long ranges of sandhills running from north to south, in some degree parallel with the Ganges and with each other, and by another similar range near the western frontier, running in like manner from north to south, in a line corresponding generally with that of the Jumna. Between the most easterly of these ranges and the Ganges, lies the Khadir or marsh-land of that river, amounting probably to one-sixth of the whole area of Suharunpore. It is thus described by Cautley: 2—"The low tract of country lying at the foot of the Sewalik hills, and receiving the drainage which ultimately falls into the Ganges river, is that which is designated by the natives the Ganges Khadir. It consists of a triangular portion of the country, bounded on the north-east by the chain of hills called the Sewalik; on the south-west and south by a high steppe or bank; and on the south and east by the Ganges river. The Sewalik on the north, and the high bank which lies on the south, terminate in an acute angle at the Shahjehanpore pass, in the former range, the bank increasing in abruptness up to this point, near which it is lost entirely. The Khadir receives the whole of the hill drainage from Hurdwar up to this angle, which may be considered as the water-head separating the valley of the Jumna from that of the Ganges." The extent of depression of the surface of the Khadir below the highlands of Suhrarunpore, it is said, "varies, decreasing in depth from the south-eastern angle upwards, the extreme depth being eighty-four feet. This depression, however, is not universal: in the northern portion there is an isolated tract considerably elevated, on which are situated the towns of Kheri, Imli, and numerous villages. This tract is much intersected and cut up by channels, and is separated, or nearly so, in its centre, by a large ravine, receiving a portion of the Shah Munsoor drainage. In addition to this main insular tract of high land, there are other smaller mounds, upon which villages are built." The entire drainage of this tract is into the Ganges, by means of the Solani and Rutmu, the Putthri, and some torrents of less importance. The two
ranges of sandhills already mentioned as rising to the west of the Khadir, form the high land dividing the valley of the Ganges from that of the Jumna. The drainage of the latter is effected principally by the Hindon and its tributaries, the discharge of which is into the Jumna, on the left side. An approximate estimate of the elevation of the northern part above the sea may be formed from the ascertained elevations of the Padshamahal, at the north-western extremity, where the Jumna enters the plains; of Hurdwar, at the north-eastern extremity, where the Ganges enters the plains; and of Suharunpore, lying between them. Those elevations are respectively 1,276, 1,024, and 1,013 feet. Baira, on the south-eastern frontier, and probably the lowest part of the district, is 940 feet above the sea. The climate is cooler than that of the plain Himalaya in general, in consequence of the higher latitude and greater elevation. From November, the weather becomes progressively colder until Christmas; in March, a rapid rise takes place in the temperature; and about the beginning or middle of April the hot winds begin to blow. Their effects are thus described by Jacquemont: the country, which I had left two days before verdant and smiling, had become covered with dust; in a week the herbage will be entirely withered, and the trees have already a uniformly dull hue. Very near objects appear through the dusty air as if by the false and lurid light of the sun penetrating through storm-clouds, and also seen nearer than they actually are; but at no great distance their outlines are quite effaced.

The soil is generally clayey, with a proportion of sand, having in many places a substratum of hard retentive clay, and not unfrequently kankar, or lime in nodules, is imbedded in the earth. The very wide range of temperature gives a corresponding extent to the botany of Suharunpore, which, according to the season of the year, matures in the cooler the productions of the temperate; in the hotter, of the intertropical climes.

The elephant, common in the Dhoons north of the Sewalik range, may probably be found; and there are certainly tigers, leopards, lynxes, bears, the piju, a species of viverra (Ratelus...
SUHARUNPORE.

mellivorus), otters, jackals, stags, hog-deer, spotted deer, antelopes, wild hogs, monkeys. 3

The crops consist of wheat, 4 barley, oats, millet, peas, beans, vetch, tares, lentils, mustard and rape as oil-seeds, carrot, coriander, cumin, tobacco, flax, safflower, and succory. Almost all the esculent vegetables of Europe succeed well in the cold season: hemp grows wild in great abundance and luxuriance. The autumnal crop consists of rice, cotton, indigo, maize, different kinds of millet. The government demand on the lands of this district has been fixed for a term of years, which will expire on the 1st July, 1867. 5

The means of extensive irrigation are supplied by the Doab Canal, which has its head-water from the Jumna on the left side, a short distance above the Padshahmahal, in lat. 30° 22', long. 77° 39'. 6 The construction of this canal is attributed to Ali Mardhan Khan, minister of the emperor Shah Jehan, a nobleman to whose wealth † and public spirit the execution of various great works is ascribed by popular tradition. The canal is conducted, with considerable knowledge of hydraulics, along the crest of the high ground between the Jumna and the Hindon, so as to admit of its water being thrown, for the purposes of irrigation, over the country on both sides. There are, however, scarcely any traces of lateral offsets or of bridges; whence it has been supposed that the great difficulty of preserving it from the ruinous effects of torrents in the upper part of the course, caused it at an early period to be allowed to lapse into ruin. Its general course is in a southerly direction, nearly parallel to the Jumna, and, on an average, about fifteen

* According to Hamilton, 1 the lion, which was long supposed to be unknown in India, has been recently ascertained to exist in vast numbers in this district [Suharunpore]; but Dr. Royle, whose means of information were of the best description, and whose character for accuracy is unquestionable, says, "The lion is, I believe, only found to the west of the Jumna, especially on the edge of the desert near Hansi." It is stated by Bernier, 2 that the country about Agra and Delhi, and along the upper course of the Jumna, as well as in many places traversed by the road to Lahore, had extensive waste tracts abounding in wild beasts; and that, among others, the lion was frequently hunted and slain by the monarchs of Delhi.

† The property in money and jewels left by this powerful minister at his decease, was estimated at a sum equal 1 to 1,800,000L.

SUHARUNPORE.

miles east of it. Near Delhi it flows into the valley of the Jumna, and passing partly through the grounds of a royal preserve, rejoins the Jumna opposite the city. The length of the main branch is 135 miles. It was, by direction of the supreme government, cleared out, put in thorough repair, and reopened in the beginning of 1830, for the various purposes of irrigation, of affording water-power, and of navigation. Rafts of timber can thus be conveyed from the forests about the base of the Sewalik to Delhi, and boats of from four to eight tons burthen, and drawing two feet water, can also be navigated for the same distance. Another work of a similar character, but on a much larger scale, is in course of completion, with a view to the benefit of the eastern part of the Doab. It consists in the formation of a canal for purposes of irrigation, from the right side of the Ganges, at Kunkhul, about three miles below Hurdwar, to flow through the Doab.

The chief rivers of Suharunpore—the Ganges, Jumna, Hindon, Rutmoo, Solani—are separately described in the alphabetical arrangement.

The population of the district is returned at 547,353. The following official return distinguishes the towns and villages of the district into classes according to their population:

| Number with less than 1,000 inhabitants | 1,370 |
| Ditto with more than 1,000 and less than 5,000 | 72 |
| Ditto with more than 5,000 and less than 10,000 | 3† |
| Ditto with more than 10,000 and less than 50,000 | 2‡ |
| Total | 1,447 |

On the dismemberment of the Mogul empire, subsequently to the victory gained by Ahmed Shah Durani, the circar of Suharunpore was, about the year 1757, given by the conqueror to Najib-u-doula, a Rohilla chief. He was succeeded by his son Zabetakhan, on whose death, in 1785, the territory devolved to his son Gholani Kaudir, infamous for his cruelties at Delhi, when, a few years afterwards, he obtained possession of that

* Doab signifies the tongue of land between two rivers, and proceeding upwards from their confluence. The name is applied emphatically to that between the Ganges and the Jumna.
† Juwallapore, 8,862 inhabitants; Munglour, 5,959; Gungoh, 6,260.
‡ Suharunpore, 34,294; Deobund, 11,634.

city and of its miserable sovereign, whom, after subjecting to every insult which malice and insolence could devise, he deprived of sight by the point of his dagger; thus consummating a series of excesses, which a cautious historian\(^2\) has pronounced to be "almost without parallel in the history of the world." The Mahratta chief Scindia subsequently dispossessed the wretch of his conquest, and avenged the wrongs of the unhappy ruler of Delhi upon the person of his brutal enemy; for though Gholam sought safety in flight, he was not destined to find it, being pursued and taken by the Mahrattas, loaded with irons, and exposed in a cage. Subsequently he was deprived of his eyes, nose, ears, hands, and feet, and thus horribly mutilated was ordered to be sent back to Delhi. He, however, never reached the scene of his atrocities, having died on the road. Scindia could scarcely add to the calamities of the imperial prisoner, but he still retained him in durance, making use of the emperor's name for his own purposes, till the English, by the capture of Delhi, deprived him of the custody of the pageant prince. With the British government Scindia continued obstinately, though vainly, to contend. The vigorous policy of the Marquis Wellesley, enforced by the extraordinary military ability which that profound statesman had at his disposal, ultimately left the Mahratta no choice but submission; and in the sweeping cessions made by him to the British in 1808, by the treaty of Surjee Anjengaum, the district of Suharunpore was included.

SUHARUNPORE.\(^1\)—The principal place of the British district of the same name, under the lieutenant-governorship of the North-West Provinces. It is situate on the small river Dumoulao, and about a mile E. of the Doab Canal, in an open level country, rendered fertile by the irrigation derived therefrom, though naturally rather sandy.\(^2\) The immediate environs are rendered pleasing by numerous groves of mangoes and palms, and inclosures of cactus and euphorbia. Altogether the scene displays the results of care and intelligence not usual in this part of India; and those agreeable features, with the dwellings of the British residents arranged about the town, give the place a European air. Jacquemont styles it one of the handsomest English stations in India. Here is a celebrated botanic garden\(^3\) belonging to the East-India Company, arranged

SUHARUNPORE.

and matured by the successive care of two eminent botanists, Dr. Boyle and Dr. Falconer. The former thus describes the success attained in acclimating and cultivating the productions of various countries:—"We have collected in one place and naturalized in the open air the various fruit-trees of very different countries; as of India, China, Cabul, Europe, and America." This variety of vegetation is attributed by Dr. Royle to the great range of temperature, which extends from the freezing-point to about 100°, combined with the influence of the periodical rains; and from those causes he considers the botanical capability of this locality "as being nearly the northern limit of the flora of India, as well as the southern boundary of that which is called the oriental or Persian region." The choice of situation for the purpose of forming the garden was made with great judgment. The tropical situation of a botanical garden maintained at Calcutta was found, as might have been expected, very unfavourable for realizing many of the advantages which it was established to promote. Suharunpore offered a more temperate locality; and the comparative proximity of the Himalaya Mountains added greatly to the strength of its claims to selection, while an old endowment afforded means for making so hopeful an experiment at a reduced rate of cost. The garden was formed in 1817; in 1826 a medical garden was annexed to it, and a nursery in connection with it was formed in the adjoining hill district of Mussoorie; but a few years afterwards the charge for the medical garden was abolished, and sundry other reductions enforced, by the minute frugality of Lord William Bentinck. The effect of this cutting down was subsequently found to be a diminution of the utility of the establishment. Lord Auckland manifested great anxiety for the success of the institution, and a strong desire to restore its efficiency; deeming this important, as well because the garden was an object of great interest to the inhabitants, as on the ground of its obvious tendency to the extension of knowledge, and to the promotion of the benefit both of Asia and Europe. Steam navigation was at this period beginning to display its advantages as a connecting link between Great Britain and her possessions in India, and thus were opened facilities previously unknown for the interchange of the seeds, plants, and trees of the two
quarters of the world; to the advancement of agricultural, horticultural, and botanical science, and to the probable increase of the comforts and gratification of the tastes of the inhabitants of countries widely separated by distance; thus making them mutually contributory to the wants of each other, and co-labourers in diffusing the elements of enjoyment, physical and intellectual. To effect the necessary improvements involved a small additional expense, but the representations of the Governor-General were effectual, and in 1840 the Court of Directors gave their sanction to the requisite measures for placing the establishment of the garden in such a state as should insure its efficiency for the purposes for which it was maintained. By this, and by retaining at home the services of Dr. Boyle, to attend to the promotion by all practicable means of the development of the vegetable resources of India, an impetus was given to the very important objects in view, which cannot fail to issue in a large amount of benefit.

The garden of Suharunpore, 680 yards\(^6\) in its greatest length, and 470 in its greatest breadth, is an object of much beauty as well as utility, being tastefully laid out with many delightful walks and carriage-roads.

At Suharunpore is a fort, and also a military cantonment: it has also been selected as the locality\(^6\) for a government stud depot. Here, in the great trigonometrical survey of the Himalaya, was the principal station, where all the most valuable observations, whether of latitude, longitude, or azimuth, were made.

The population of the town\(^7\) is 34,294, as shown by official return prepared in 1848; elevation above the sea 980 feet; distant N.W. from Calcutta 1,007 miles.\(^8\) Lat. 29° 58', long. 77° 36'.

SUHAWAR, in the British district of Mynpooree, lieutenant-governorship of the North-West Provinces, a town on the route from Mynpooree to Moradabad, 40 miles N. of the former. Lat. 27° 48', long. 78° 55'.

SUHEELA, in the British district of Goruckpool, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpool to Khachi, 38 miles N. by W. of the former. Lat. 27° 13', long. 83° 16'.

SUHESPOOR, in the British district of Bijnour, lieutenant-
SUH—SUH.

governorship of the North-West Provinces, a town on the route from Bijnour to Pilleebheet, 33 miles S.E. by E. of the former. Lat. 29° 8', long. 78° 41'.

SUHESPOOR, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a town on the route from Moradabad to Hurdwar, and 22 miles N.W. from the former. It is a very filthy place, remarkably crowded with hogs. Davidson remarks, "Pork ought to be cheap, for the neighbouring fields, roads, ravines, and pools, were covered with these filthy untutored animals." There is a bazar, and water is plentiful. The road in this part of the route is rather good, and passes through a country in some places cultivated, but generally overrun with jungle infested with tigers. Suhespoor contains a population of 6,414 inhabitants. Lat. 29° 7', long. 78° 41'.

SUHESPOORA, in the British district of Mirzapoor, lieutenant-governorship of the North-West Provinces, a town on the route from Mirzapoor to Patna, 27 miles E. of the former. Lat. 25° 9', long. 83° 2'.

SUHPOO, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a town on the route from Muttra to Futtygurh, 30 miles E. by N. of the former. Lat. 27° 27', long. 78° 13'.

SUHUSWAN, in the British district of Budaoon, lieutenant-governorship of the North-West Provinces, a town on the route from Budaoon to Rewaree, 23 miles W. of the former. Lat. 28° 4', long. 78° 50'.

SUJNAIR.—A river rising in the British district of Saugor and Nerbudda, in lat. 24° 22', long. 78° 35', a few miles south of the town of Sindwah, and, flowing about sixty miles through the territory of Scindia, falls, on the left side, into the Jamnie, a feeder of the Betwa, in lat. 25° 8', long. 78° 42'.

SUKEET, in the British district of Mynpoorie, the principal place of the pergunnah of the same name, a town on the route from Allygurh to Mynpoorie, and 24 miles N.W. of the latter. There is a bazar, and water and supplies are abundant: the country is flat, open, and but partially cultivated. Immediately north and east of the town is an extensive waste plain, which would form an excellent exercising-ground for 20,000 men.
SUK.

The road in this part of the route is good. Lat. 27° 26', long. 78° 50'.

SUKHET.—A native state on the north side of the Sutlej, which separates it from the Cis-Sutlej hill states. It is about fifty-two miles in length from east to west, and twenty in breadth, having an area of 17½ square miles, containing a population of 25,926, and yielding to the rajah a revenue of 80,000 rupees. Sukhet, the principal place, is in lat. 31° 33', long. 76° 56'.

SUHK RUND.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 50 miles N. of Hyderabad. Lat. 26° 7', long. 68° 24'.

SU K KUR,¹ in Sinde, a decayed town on the west or right bank of the Indus, and opposite Roose, on the eastern bank, the island fortress of Bukkur lying between them. It is situate where a low limestone range slopes down to the river's bank, clothed in the neighbourhood of the town with luxuriant groves of date-palms. These groves, combined with the ruined but picturesque town of Sukkur, the river, the huge fortress of Bukkur, and the town of Roose, situated on the bold precipice opposite, form a very noble landscape. In 1839, a British cantonment was made at Sukkur, which became converted from a scene of desolation and wretchedness to one of activity and prosperity. Sukkur has still several towers, mosques, and minarets standing. One minaret is in a state of considerable preservation, and, according to Kennedy,² is 100 feet high, and may be ascended by a winding stone staircase, affording access to the summit, whence is a noble prospect. It is a heavy, ill-proportioned column,³ without ornament. In a commercial point of view, Sukkur is a position of some importance. With the view to the promotion and encouragement of trade, the British government, in 1851, resolved to establish commercial fairs in Sinde. Sukkur was selected as the site of one of these, which is appointed to take place annually on the 1st of January, and to continue for the space of forty-five days.⁴ Lat. 27° 40', long. 68° 54'.

SU KRANEH, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town on the route from Furruckabad to Jaloun, 30 miles S.S.W. of the former. Lat. 27°, long. 79° 29'.

SUKULDEAH,1 in the British district of Benares, lieutenant-governorship of the North-West Provinces, a town on the route from Chunar to Dinapore, 282 miles N.E. of the former, 118 S.W. of the latter. Supplies and water are abundant. The road in this part of the route is rather good, the country highly cultivated. Lat. 25° 21', long. 83° 20'.

SUKULPUR.—A village on the right bank of the Goulab, in the British district of Bareilly, division of Pillibheet, lieutenant-governorship of the North-West Provinces. Lat. 29° 4', long. 79° 38'.

1 E.I.C. Ms. Doc.
SUKURTAL,1 in the British district of Muzaffurnugur, lieutenant-governorship of the North-West Provinces, a small fort2 and assemblage of dwellings, about half a mile from the right bank of the Ganges, which is navigable3 from the sea to this point, where, according to Forster,2 the channel shoals so as to become fordable. Adjoining the place on the west are ruined fortifications, erected by Zabitah Khan, a Pathan chief. Lat. 29° 20', long. 78° 3'.

2 Journ Beng. Eng. l. 139, 149.
SUK—SUL.

SUKEPOOR, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town on the route from Furruckabad to Jaloun, 31 miles S. by W. of the former. Lat. 26° 57', long. 79° 36'.

SULANA, in the territory of Indore, or possessions of Holcar's family, a town, the principal place of a district in the immediate possession of a petty Rajpoot rajah, descendant of a scion of the Jodhpour family, who, about the middle of the seventeenth century, received an extensive grant of lands in this part of India from Shahjehan, the padshah of Delhi. The rajah is tributary to Scindia. In 1819, some disputes respecting tribute having arisen between the parties, the British government interposed, guaranteeing an annual amount of 42,000 rupees to Scindia, and non-interference and freedom from molestation to the rajah. The administration of the territory has been intrusted to a regency during the minority of the present chief, and the country is said to be improving. Distant N.W. from Oojain 60 miles, S.W. from Gwalior fort 286. Lat. 23° 28', long. 74° 55'.

SULE.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 136 miles E.S.E. from Sirinagur, and 95 miles N.E. by N. from Kangra. Lat. 33° 14', long. 77° 8'.

SULEMPPOOR, in the British district of Paneeput, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Delhi to Jheend, and 40 miles N.W. of the former. Lat. 29° 5', long. 76° 56'.

SULEEMPOOR, in the British district of Boolundeshwur, lieutenant-governorship of the North-West Provinces, a village on the route from Khasgunj to Meerut, and 58 miles S. of the latter. The road in this part of the route is good for carriages; the country open and partially cultivated. Lat. 28° 20', long. 78° 1'.

SULEMPOOR, in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Cawnpoor to Futtehpour, 11 miles S.E. of the former. Lat. 26° 21', long. 80° 32'.

SULEMPOOR, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a small town in the pergunnah of Selempoor Majhowli, situate on the
right bank of the Little Gunduck. Its original denomination was Nagar, which was changed to Islamoor, in honour of a rajah who, on his conversion to Mahometanism, took the name of Islam Khan, and subsequently, by corruption, the name became Sulempoor. It contains only eighty houses; but Majholi, on the opposite or left side of the Gunduck, contains 200; and the two places are usually considered as forming one town, the former being the Mahomedan, the other the Hindu part. Distant S.E. from Guruckpoor cantonment 45 miles. Lat. 26° 15', long. 83° 57'.

SULEYMPOOR, in the British district of Budoon, lieutenant-governorship of the North-West Provinces, a town on the route from Budoon to Shahjahanpoor, 18 miles E. of the former. Lat. 28° 1', long. 79° 30'.

SULIMAN MOUNTAINS.—An extensive and lofty range, forming the western boundary of the British empire in India. They may be considered to commence in lat. 33° 50', and from that quarter stretch due south, in nearly the seventieth meridian of longitude, to the mountains about Hurrund and Kahun, and to lat. 29°, attaining their greatest height in lat. 31° 35', where the Takht-i-Suliman, or “Suliman's seat,” called also Khaisa Ghar, is 11,000 feet above the sea. This summit does not enter within the limit of perpetual congelation, being devoid of snow during the height of summer. Of its geological structure scarcely anything is known: Vigne only states that “it consists of recent formations, principally sandstone and secondary limestone, abounding in ammonites and other marine exuviae, the strata being much shattered and contorted, and often overlaid by shingle.” The eastern declivity dips rather steeply to the valley of the Indus, giving rise to numerous watercourses, which fertilize the Deraçat, and are expended by absorption or irrigation. The western declivity is much more gradual, to the desert table-land of Sowestan. It is remarkable that no stream rising in this range is known to reach the sea in any direction, or by any channel, except the Kurum, which discharges a

* More probable is the etymology of Wilford:—“Sulempoor is really a Sanscrit name of a place—Sailapooor or Sailamoor, for both are grammatical, and are synonymous with Sailagram; and the obvious meaning, and we may say the only one of both, is the town of Sails, which signifies a rocky hill.”
scanty volume of water into the Indus, above Kala Bagh. The
greatest dimension of the range is from north to south, and is
a little more than 350 miles. The Suliman range is generally
considered the peculiar seat of the aboriginal Afghans.
Nowhere is vegetation more vigorous and varied. The sides
of the mountain nearly to the summit are clothed with dense
and lofty forests, and the valleys overgrown with a great variety
of indigenous trees, shrubs, and flowers.

SULKEA.—A populous suburb of Calcutta, situate on the
opposite or western side of the river Hooghly. The govern-
ment have here extensive godowns or warehouses for the recep-
tion of salt. Lat. 22° 34', long. 86° 24'.

SULLAN, in the Jetch Doob division of the Punjab, a
town situated 13 miles S. from the left bank of the Jhelum,
60 miles W.S.W. of the town of Gujerat. Lat. 32° 23', long.
73° 07'.

SULLIVAN'S ISLAND.—One of the group forming the
Mergui Archipelago, situate about 12 miles W. of the coast of
Tenasserim. It is thirty-six miles in length and three in
breadth. Lat. 10° 50', long. 98° 20'.

SULOOMBUR,1 in the territory of Oodeypore or Mewar, a
town on the route from Neemuch to Baroda, 94² miles S.W.
of former, 176 N.E. of latter. It is of considerable size, is
walled, and has a bazar. Elevation above the sea 8763 feet.
Lat. 24° 07', long. 74° 09'.

SULTANGUNDJ,1 in the territory of Oude, a small town on
the route by Shahabad from Lucknow to Shahjehanpoor, 58²
miles N.W. of the former. Tennant,³ who saw it at the close
of the last century, states, "The village of Sultangunge consists
of mud houses wholly, but all neat, and in full repair. It is
one of the few towns in India which does not exhibit marks of
decay. Even here, however, are the ruins of far more durable
and extensive cities, whose only vestige is to be traced by large
mounts of brick-dust." It has a small bazar, and is well
supplied with water. Lat. 26° 58', long. 80° 15'.

SULTANKHANWALA,1 in Sirhind, a small town on the
route from Ferozpoor to Simla, and 11 miles W. of the former
place. It is abundantly supplied with water from three good
wells; the surrounding country is level, and has a rich soil, bear-
ing luxuriant crops of grain in the few cultivated places. It

SUL.

belongs to a Sikh chief under British protection and control. The road in this part of the route is good. Distant N.W. from Calcutta, by Loodiana, 1,157 miles.\(^2\) Lat. 30° 55', long. 74° 42'.

SULTANPOOR, or KULU, in the north-east of the Punjab, and on the southern slope of the Himalaya, is the capital of the raj, or small state, of Kulu. It is situate on a triangular tongue of land between the river Beas and a feeder flowing into it on the right side. The southern, or lower part, which is next the river, contains the residence of the rajah; and north of this, and separated from it by a small bazar, is the upper part of the town, consisting of the houses of traders, shopkeepers, and artificers. The principal imports are chintzes, coarse cottons, and woollens, and the returns are made in opium and musk, the traffic being conducted by wandering mendicants, of whom great numbers arrive here on their route to various places of pilgrimage in the mountains. The place is, as Moorcroft observes, "of no great population or extent." Lat. 31° 57', long. 77° 9'.

SULTANPOOR,\(^1\) in the British district of Agra, a village on the route from the city of Agra to Jeypore, and two miles W. of the former. The road in this part of the route is rather heavy, the country well cultivated. Lat. 27° 10', long. 78° 3'.

SULTANPOOR,\(^1\) or SULTANPOOR-OUDE, in the kingdom of Oude, so named in contradistinction from Sultanpoor-Benares, the principal place of the district of the same name, is situate on the left bank of the Goomtee river. It was formerly the capital\(^2\) of the Bhars, a tribe of low caste, who once possessed "the whole tract\(^3\) from Goruckpore to Bundelcund and Saugor, and the large pargunnah of Bhudoe, in Benares." At that time it was named Kosobbhanpur; was situate amidst an immense jungle, harbouring tigers and wild elephants, and had a rampart eight\(^4\) miles in circumference, strengthened by bastions. It was taken by one of the early Ghorian invaders of India, supposed by Butter to have been Kai Kubic, who reigned\(^5\) from 1286 to 1289. The city, with its walls, was destroyed; on the ruins, now forming a shapeless heap of bricks, the conqueror constructed a fort, still remaining, but partially ruined, though containing habitable residences, occupied by the foujdar, or commandant of police, and his followers. North-west of the fort is an antique mosque, built by the

\(^{2}\) Princep, India Tables, ii 147.
sultan; and there are a few smaller mosques, built by Saiyids, or reputed descendants of Mahomet, the founder of Islam. The town having neither trade nor manufactures, is decaying, and consists for the most part of old brick houses, though there are a few new ones; among others, a large residence built by the vakeel or envoy of the Lucknow durbar. The population is estimated by Butler at 1,500, including 1,000 Mussulmans. The British cantonment is on the right of the river, and communicates with the left bank by ferry, being, even in the dry season, 100 yards wide, four feet deep, and navigable for large boats. Remote hydraulic action of the stream has excavated a small valley, extending along its course, from ten to 100 feet in breadth, on each side from the present banks, and with brows rising about ten feet above the height of the present stream when lowest, and half that height during the rains. The site of the cantonment is sixty feet above the brow of the valley, and preserved from malaria east and west by dry, barren, and undulating ground. On the north is the river; on the south cultivated ground, set off by a range of stone pillars. The station has the inestimable advantage of perfect drainage, occasioned by its proximity to a great stream, that never overflows the brows of the narrow valley down which it holds its course. There are, consequently, no marshes in the immediate vicinity, and none of any considerable size within such distance as to contaminate the atmosphere. The climate is generally characterized by dryness, comparative coolness and salubrity, with the exception of epidemic and contagious affections. In persons recently arrived from damper places, the excessive dryness produces catarrhs, toothache, earache, acute rheumatism, chapped hands and feet, and elephantiasis; still, the station is free from all endemic diseases of an important nature, and altogether is one of the healthiest localities in the plains of Hindoostan. The westerly winds, which prevail from November to June, produce dryness, accompanied by considerable cold, until March, and increasing in temperature for the remaining period of their prevalence, towards the close of which they are so sultry as to resemble the blast from a powerful furnace. Easterly winds prevail during the rainy season, from the latter part of June to the early part of October, and are always loaded with damp, disagreeable to the

6 Butler, 177, 178.

7 Id. 180.
sensations and oppressive to the spirits. For a few days at the close of the rainy season, the air is so clear, that Dhoulagiri, one of the highest summits of the Himalaya, is visible, though at the distance of nearly 200 miles to the north. The wells of the cantonment, from forty to seventy feet deep, are cut through firm kunkar at little expense, and yield good water, notwithstanding the calcareous nature of the soil, and the copious efflorescence of nitrate, carbonate, and sulphate of soda, which appears on the surface. Snakes are numerous, particularly the two deadly species karait and cobra di capello; but the effects of their bites are generally found to yield to prompt treatment by brandy and laudanum. The communication by water, by the course of the Goomtee, is easy, though tedious, with Lucknow, Ghazaeeapore, Juanpore, and Benares. The roads in every direction are very bad. The cantonment, originally built to contain an entire brigade, was occupied at the date of the last returns by a regiment of irregular cavalry. Distant S.E. from Lucknow 92 miles, N. from Allahabad 59, from Calcutta, by Allahabad, 562. Lat. 26° 16', long. 82° 8'.

SULTANPOOR SIVALA, in the British district of Suharunpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Saharanpoor to Simla, 10 miles N.N.W. of the former. Lat. 30° 5', long. 77° 32'.

SULTANPORE.—A town in the British district of Purneath, presidency of Bengal, 30 miles N. by W. of Purneath. Lat. 26° 10', long. 37° 23'.

SULTANWAH GAM.—A town in the Rajpoot state of Jessulmeer, 41 miles N. from Jessulmeer, and 126 miles E. by S. from Bukkur. Lat. 27° 29', long. 70° 56'.

SUMBAKAAH, or SUMALKA, in the British district of Paneeput, lieutenant-governorship of the North-West Provinces, a small town on the route from the city of Delhi to Kurnal, and 45 miles N.W. of the former. It has a small bazar, and a large caravanserai, once a fine structure, but now much dilapidated. Water is obtained from wells. The road to the south-east is heavy; to the north-west, good. Lat. 29° 14', long. 77° 5'.

SUMBULHUL, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a town on the route from Moradabad to Allygur, 22 miles S.W.
SUM.

of the former. Population 10,356.² Lat. 28° 35', long. 78° 39'.

SUMBULHERUH, in the British district of Muzufurnugur, lieutenant-governorship of the North-West Provinces, a town on the route from Muzufurnugur to Moradabad, 18 miles S.E. by E. of the former. Lat. 29° 19', long. 77° 59'.

SUMBULPORE,¹ the chief place in the district of the same name, is situate on the left bank of the Mahanuddy, in lat. 21° 29', long. 84°. Little information is available as to this place; but it is stated to extend for about two miles along the bank of the river, and to contain some pagodas and other buildings of solid character. There is a fort, which, when the place was visited by the British agent in 1844, was in ruins. There is little or no trade, though the river, affording the means of water-carriage to Cuttack and the sea, is open for small boats throughout the year, and for large ones during six or eight months. The climate is said to be most fatal to the European constitution.

SUMBULPORE,¹ formerly a raj, now a British district, within the range of territory subject to the control of the political agent for the south-west frontier of Bengal. With the exception of two small detached portions, it is bounded on the north by the native states of Ryghur and Gangpooor; on the east by Bonei and Bombra; on the south by Somepoor and Patta; and on the west by those of Phooljee, Sarungher, and Burgurh. It extends from lat. 21°—22° 5', long. 88° 6'—84° 51'; is 112 miles in length from east to west, and sixty in breadth; and it embraces an area of 4,698 square miles.² The river Mahanuddy flows through it, and divides it into two unequal parts, the larger lying on the right bank of the river. The eastern portion of this district is mountainous and woody, the northern and western parts generally of a more level character, and at some places greatly depressed. The valley of Sumbulpore, according to Dr. Boyle's observations, is only 410 feet above the level of the sea. The soil of this valley is alluvial, and produces in great abundance and perfection, rice, wheat, and sugarcane. The first of these productions is reported to be of the finest quality, and the latter two grow with a luxuriance not surpassed in any part of India. According to the natives, the soil is well suited to the cultivation of the
poppy, and they allege that it was formerly grown with advantage. Indigo, it is believed, might be cultivated with success, as the wild plant abounds. Swamps and jhils exist in this district, as in others within the limits of the agency to which it belongs. These become dry in April or May, and fill again on the commencement of the rains. Stagnant water is not by the natives deemed injurious; and so far from making drains for the purpose of carrying it off, they reserve it carefully for irrigation, and seem quite insensible to the disagreeable effluvia which it sends out. It is said that they do not suffer to any great extent from its effects; and it has been suggested, that the surface, being generally covered with plants, which give out a large proportion of oxygen, this provision of nature may tend to counteract the results which might otherwise arise from such deliterious accumulations. The hot winds begin to blow about the 20th March, and continue till the commencement of the rains, which in this district is usually about the 1st July.

The animal and vegetable productions of Sumbulpore are similar to those of the adjacent districts. Extensive forests of teak furnish an abundant supply of that valuable wood. In minerals, the district does not appear to be rich, except in that production, which in popular estimation ranks as the most valuable. Sumbulpore has universally been celebrated for the finest diamonds in the world. These gems are occasionally found in the bed of the Mahanuddy, and at the mouths of other rivers which terminate in it. Gold, but not in large quantities, is also found in the same situations. The quality of the diamond is characterized by a classification bearing the names of the four chief Hindoo castes, the most valuable being called a Brahmin. The diamond-searchers are employed in their occupation from the month of November to the rainy season. They are said to be a very dissipated race.

The population of Sumbulpore, including that of the hill forts, is estimated at 800,000. The great mass is composed of Hindoos of the lowest castes, but the chiefs and principal landholders claim the dignity of Rajpootts. There is no commerce worth notice. The raj was gratuitously conferred by the British government on a chief named Sahi, without "words of inheritance." It was, however continued to two
successors; but on the death of the latter of them without
male issue, in 1849, it was annexed to the British dominions. Measures were immediately taken for the abolition of the
transit-duty, and for effecting other improvements.

SUMBUR.—See SAMBUR.

SUMBURPUR, in the British district of Cawnpore, lieute-
nant-governorship of the North-West Provinces, a village on
the route from the cantonment of Futtehgurh to that of Cawn-
pore, and 18² miles N.W. of the latter. The road in this part
of the route is bad; the country level, with a soil which, though
sandy, is highly cultivated, and abounds in groves of mango-
trees. Lat. 26° 39', long. 80° 18'.

SUMDO, in Bushair, a village in the district of Koonawar,
is situate on a small level space near the south-eastern base of
the Manerung Pass, and six miles distant from it. The village
has been formed here in consequence of the pasture yielded by
the ground, irrigated from the snows above, and the abundant
fuel from a forest of birches, the highest in locality to be met
with on the vast mountain-range rising to the north-west.
Elevation above the sea 12,915² feet. Lat. 31° 52', long.
78° 25'.

SUMDUN, or SUMJUN, in the British district of Fur-
ruckabad, lieutenant-governorship of the North-West Provinces,
a small town on the route from Cawnpore to the cantonment of Futtehgurh, and 18³ miles S. of the latter. The road in
this part of the route is good, the country level and cultivated.
Lat. 27° 7', long. 79° 46'.

SUMJOK.—A town of Burmah, 13 miles W. from the right
bank of the Khyendwen river, and 206 miles N.W. by N.
from Ava. Lat. 24° 28', long. 94° 40'.

SUMMAHN.—A town of Burmah, situate on the left bank
of the Irrawady river, and 70 miles N. from Prome. Lat.
19° 48', long. 94° 56'.

SUMMEE, in Guzerat, a town near the left bank of the
river Saraswati. Its chief, a Mussulman, and member of the
influential family of Babi, being also chief of Radunpoor, is
styled Nawaub of Radunpur and Summee. His annual
income has been stated to be 1,50,000 rupees; and he yearly
tenders a horse and clothes as acknowledgment of fealty to the
Guicowar. Lat. 23° 40', long. 71° 40'.

615
SUM—SUN.

SUMMEI-KOUM.—A town of Burmah, situate on the left bank of the Irawady river, and 61 miles W. by S. from Ava. Lat. 21° 44', long. 95° 5'.

SUMNAPOOR.—A town in the territory of Nagpoor, 91 miles N.E. by E. from Nagpoor, and 39 miles E. from Seuni. Lat. 22°, long. 80° 15'.

SUMODUTTEE.—A town in the British district of Belgaum, presidency of Bombay, 41 miles E. by S. of Belgaum. Lat. 15° 46', long. 75° 11'.

SUMPTER, in Bundelcund, a small raj or principality under the political superintendence of the lieutenant-governor of the North-West Provinces. It lies between lat. 25° 42'—25° 57', long. 78° 51'—79° 11': it is estimated "to comprise 175 square miles, and was supposed in 1882 to contain seventy-two villages, with a population of 28,000 souls. The revenue was then estimated at five lacs (50,000l.), and in 1837 at 4,50,000 rupees (45,000l.)." This state maintains a disproportionate force; namely, 300 horse, forty-five artillerymen, and 4,000 infantry. It was originally severed from the territory of Oorcha or Tehree, but the time and causes of the event do not appear to be ascertained. The rajah, in compliance with his repeated solicitations, was in 1817, by treaty, placed under British protection. The town of Sumpter is situate in lat. 25° 51', long. 78° 58'.

SUMROO BEEGUM.—See SIRDHANA.

SUMSER, or SONAIR, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a village on the route from Delhi to the town of Meerut, and 152 miles N.E. of the former. The road in this part of the route is good. Lat. 28° 44', long. 77° 28'.

SUNA, in the British district of Allygurh, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Aligurh to that of Mynpooree, and 42 miles N.W. of the latter. The road in this part of the route is good; the country level, open, and partially cultivated. Lat. 27° 36', long. 78° 40'.

SUNASSEE COTTAH.—A town in the British district of

Dinajepore, presidency of Bengal, 70 miles N. of Dinajepore. Lat. 26° 33', long. 88° 23'.

SUNDEEP.—An island at the mouth of the Megna river: it is fertile, abounding with cattle, but free from tigers and other wild beasts which infest the neighbouring continent. Its length is about eighteen miles, and six broad. Lat. 22° 30', long. 91° 32'.

SUNDELLA, in the kingdom of Oude, a town on the route from Lucknow to Shahjehanpoor, 30 miles N.W. of the former, 65 S.E. of the latter. It is situated on a level expanse, half a mile in length, and has many brick-built houses, and a small mud fort, little capable of resisting attack. The inhabitants are principally Patans. Lat. 27° 4', long. 80° 34'.

SUNDERBUNDS.—A maritime tract of British India, within the jurisdiction of the government of Bengal. This tract may be described as a crowded cluster of small marshy islands, separated by narrow channels, in some places containing brackish, in others fresh water, and generally under the influence of the tide. These islands have obviously been formed by the deposition of the enormous quantity of earth swept down by the Ganges during its periodical inundations. This alluvial archipelago, measured from the mouth of the river Hoogly, the most western of the estuaries of the Ganges, in lat. 21° 40', long. 88° 3', to the island of Rabanabad, in lat. 22°, long. 90° 30', extends about 158 miles; and, thus defined, the Sunderbund district is bounded on the south by the Bay of Bengal; on the east and north-east by the British district of Backergunge; on the north by the British districts Jessore and Baraset; on the north-west by the British district of the Twenty-four Pergunns; and on the west by the estuary of the Hoogly. It is about seventy-five miles in breadth; the area is 6,500 square miles. The principal channels by which the water of the Ganges at present reaches the Bay of Bengal, occur in the following order, from west to east, from the Hoogly towards the Meghna:—1. The Moree Gunga, or channel creek; 2. the Subternookhi or Surseni; 3. the Thakooran, Hulluri, or Jumerah; 4. the Mutwal; 5. the Bangadooni; 6. the Guasuba; 7. the

* From Sundar, "beautiful," and Ban, "forest:" on account of the luxuriant growth of the trees with which it is covered. Sunderbunds of Rennell.1
SUNDEBBUNDS.

Roymungal; 8. the Mollinchoo; 9. the Baypunga; 10. the Murjatta or Kagga; 11. the Pussur; 12. the Bangarah; 13. the Hooringottah; 14. the Rambabad channel. Though these channels are navigable for the largest craft used for inland navigation, they are in many parts so narrow, that the rigging of the vessels plying through them is entangled in the branches of the trees growing on the banks. Though there is some fine timber, the greater part of the wood is of small growth, suitable only for building boats, or for firewood, and for making charcoal for the supply of Calcutta. As the islands are everywhere covered with woods, they afford covert to numerous tigers, wild buffaloes, wild swine, monkeys, and deer. Tigers are peculiarly numerous and daring, preying on the woodcutters and the Molunjees, or those employed in extracting salt from the sea-water. The quantity of salt obtained in this way is very great, and supplies the demand of the lower provinces of Bengal. A large portion of these wastes is totally irreclaimable, the soil being a loose sand, and the surface liable to be overflowed either by unusually high tides or the periodical inundations of the river. In 1823 the extensive island of Saugor was totally submerged by the effects of a prolonged and violent gale. However, notwithstanding many great obstacles, improvement is making a steady though slow progress. The tract has been divided into estates to the number of 264, with an aggregate area of 1,800,000 acres, which, on certain conditions, are granted to applicants by government. The first scheme for bringing the waste lands under cultivation was promulgated in 1825: this was superseded in 1830 by one more favourable to the grantees; but in 1853 the government came to the conclusion that “the paramount object in devising rules for the disposal of lands in the Sundebunds is to effect a clearance of that pestilent jungle in the shortest possible period, and to remove the stigma which most justly attaches to the existence of such a nuisance almost within sight of the capital. Lying,” the Governor-General adds, “between the Bay of Bengal and the inhabited parts of the delta, its accumulated and perpetually exhaling malaria, urged by the south-west monsoon, spreads disease and death

8 Prinsep, Steam Navigation in British India, 90.
4 Friend of India, 1853, p. 409.
1 Erdkunde, vi. 1198.
* Ritter mentions that the rhinoceros harbours in the Sunderbund.
over the whole country; the tract swarms with tigers and
other wild beasts, whose ravages cause wide destruction both
of life and property. The improvement of the revenue is an
object of secondary importance." The home authorities con-
curred with the local government in regarding the clearing of
the Sunderbunds as a most desirable object, irrespective of the
improvement of the revenue; and a revised scheme is under
consideration. The importance attached by government to the
improvement sought, and the liberality which it is disposed to
exercise, are shown by its renunciation of almost all immediate
or proximate revenue; it being proposed, on the conditions of
clearance being duly fulfilled, to subject the land to payments
little more than nominal, for a period extending to within one
year of a century. Rice is the staple article, but one crop only
in the year can be obtained. Besides this, the sugarcane and
the indigo-plant have been introduced by the grantees; and
mulberry-trees, for feeding silkworms, have been planted to
some extent. Wild honey is produced in great quantities in
this tract, and the markets of Calcutta are abundantly supplied
with fish from the numerous channels and watercourses. The
occupation of the fishermen is, however, not devoid of danger,
from the vast number of large and fierce alligators.

SUNDLEE.—A town in the Rajpoot state of Jodhpoor,
situate on the left bank of the Loonee river, and 76 miles
W.S.W. from Jodhpoor. Lat. 25° 49', long. 72° 5'.

SUNDLEEPORL, in the territory of Indore, or posses-
sions of Holkar's family, a small town on the route from
Baitool to Mow, 96 miles N.W. of former, 89 S.E. of latter.
It has a good bazar, is provided with water from a well and a
small stream, and supplies are abundant: population about
1,500. Lat. 22° 32', long. 76° 57'.

SUNDLIPUR, in the British district of Moradabad, lieu-
tenant-governorship of the North-West Provinces, a village on
the route from the town of Moradabad to Hurdwar, and
10 miles N.W. of the former. Supplies for troops are obtain-
able, and water from wells. The road in this part of the route
is good. Elevation above the sea 690 feet. Lat. 28° 58', long.
78° 45'.

SUNDOOA, in the British district of Hurriana, lieutenant-
governorship of the North-West Provinces, a village close to
SUN.

the southern frontier, towards Shekhwatee. Lat. 28° 45',
long. 75° 54'.

SUNDRU, in Koonawar, a pass across the Himalaya range,
extending from east to west, in the southern part of that dis-

SUNDUN SERAI, in the British district of Moradabad,
lieutenant-governorship of the North-West Provinces, a village
on the route from Aligurh to the town of Moradabad, and
32 miles S.W. of the latter. The road in this part of the route
is good, the country open and partially cultivated. Lat. 28° 32',
long. 78° 30'.

SUNEH, in the district of Salon, territory of Oude, a
town near the right bank of the river Sae, 65 miles S.E.
of Lucknow. The population is estimated by Butler at
6,000, of whom half are Mussalmans. Lat. 26° 5', long.
81° 24'.

SUNERAMPOOR.—A town in the British district of
Tipperah, presidency of Bengal, 46 miles N. by W. of Tip-
perah. Lat. 24° 6', long. 91° 2'.

SUNEYA MUNDI, in the British district of Bareilly, divi-
sion of Pilibheet, lieutenant-governorship of the North-West
Provinces, a village on the route from Bareilly to Petoragurh,
and 64 miles N.E. of the former. There is a bazar here in the
cool season, between November and April, in which interval
the mountaineers descend to exchange the products of the
more elevated regions for those of the plains. The road in this
part of the route is rather bad, the country is generally over-
run with grassy jungle. Lat. 28° 54', long. 79° 58'.

SUNGLA, in Koonawar, a small town on the right bank
of the Buspa. It has a fine appearance, and is built on a slope,
with the houses rising one above the other, the scene being
closed by the gigantic Buldung peaks towering behind. The
town has about fifty families, and is a place of some business,
being the mart for traders from Gurwhal and Chooara, which
districts send grain of various kinds, and receive in return salt
SUNGNUM, in Bussahir, a small town of the district of Koonawar, is situate on the left bank of the river Darbung, at the confluence of a torrent (the Bonkeeo) running from the north-east. Those streams yield water for the abundant irrigation of the fertile dell in which the town is situate, and which, in consequence, is for the length of three miles one cultivated area, enlivened with groves and rows of apple, walnut, and apricot trees, and vineyards yielding the finest grapes. The grape does not ripen farther north on this side the Sutluj, and its maturity here is owing to the summer's heat, caused by the reverberation of the sun's rays from the mountains inclosing the dell on every side, except towards the south-east, where it is open, and slopes down to the Sutluj. Apricot-trees bear a profusion of fruit, which is, however, poor and acid, in consequence of the neglect of grafting. They are, however, collected in great quantities, and, being dried in the arid air on the housetops of the villagers, form a considerable article of their winter stock of provisions, and the kernels yield, by expression, a large quantity of fragrant oil. Sungnum is 9,350 feet above the sea.

nuggur, presidency of Bombay, 49 miles N.W. of Ahmednuggur. Lat. 19° 35', long. 74° 14'.

SUNGURTH.—A valley in the Daman division of the Punjab, about ninety miles W.N.W. of the town of Mooltan. Lat. 30° 44', long. 70° 6'.

SUNJA.—A town in the Rajpoot state of Jodhpoor, situate eight miles W. from the right bank of the Loonee river, and 92 miles S.W. by W. from Jodhpoor. Lat. 25° 42', long. 71° 51'.

SUNJA1T,1 in Malwa, a town in the native state of Jowra, situate on the small river Bithum. It is the principal place of a pergunnah containing forty-nine2 villages, held in jaghire by Nawwab Ghuffur Khan. Distance N. from Indore 115 miles, N.W. from Oojsein 85, S.E. from Neemuch 27. Lat. 24° 18', long. 75° 18'.

SUNJULEE.—A town in the British district of Purneah, presidency of Bengal, 12 miles S.E. of Purneah. Lat. 25° 39', long. 87° 41'.

SUNK RIVER.—The name given to the Byeturnee river during a portion of its course.

SUNKAR, a river of Arracan, rises in lat. 22° 10', long. 92° 40', and, flowing seventy miles through the district of Chittagong, falls into the sea in lat. 22° 10', long. 91° 58'.

SUNKAR NARAIN.—A town in the British district of South Canara, presidency of Madras, 51 miles N. of Mangalore. Lat. 13° 36', long. 74° 56'.

SUNOUT.—A town in the British district of Behar, presidency of Bengal, 39 miles S.W. of Behar. Lat. 24° 50', long. 85° 10'.

SUNPOOB.—A town in the British district of Ramgur, presidency of Bengal, 17 miles N. of Hazareebagh. Lat. 24° 13', long. 85° 29'.

SUNTA1,1 in Sirhind, a small town on the route from Kurnal to Putteeala, and 39 miles N.W. of the former place. It is pleasantly situate on the Umla nuddi or torrent, in a level, fertile country, but imperfectly cultivated, and consequently much overrun with jungle. The road in this part of the route, notwithstanding the level nature of the country, is very bad, and scarcely practicable for guns or carriages. Distant N.W. from Calcutta 1,0042 miles. Lat. 30° 10', long. 76° 44'.

622
SUNTOUR GURH, in the British district of Dehra Doon, lieutenant-governorship of the North-West Provinces, a town on the route from Dehra to Koonawar, eight miles N. of the former. Lat. 30° 25', long. 78° 5'.

SUNWARBA, in the British district of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Jubulpur to Baitool, 18 miles S.W. by W. of the former. Lat. 23°, long. 79° 49'.

SUPI, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, an extensive village on the route up the course of the river Surjoo, from Almorah fort to the Unta Dhura Pass, 88 miles N.E. of Almorah. Abreast of the village is a ford over the river, the elevation of the bed of which in that place is 5,659 feet above the sea. Lat. 30° 4', long. 80° 1'.

SUPPAHA, in the British district of Aligurh, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Aligurh cantonment, and 271 miles N. of the former. The road in this part of the route is excellent, and the country highly cultivated. Lat. 27° 30', long. 78° 7'.

SUPUHEE, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Bettiah, 47 miles E. of the former. Lat. 26° 42', long. 84° 9'.

SURAGONG. — A town in the British district of Sumbulpoor, presidency of Bengal, 97 miles W.N.W. of Sumbulpoor. Lat. 22° 3', long. 82° 40'.

SURAJA, in the Reechna Dooab division of the Punjab, a town situated on the right bank of the Ravee, 90 miles S.W. of the town of Lahore. Lat. 30° 50', long. 73° 3'.

SURAJPUR, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a town on the route from Aligurh to Delhi, and 222 miles S.E. of the latter. It has a bazar, and is abundantly supplied with water from wells. The road in this part of the route is heavy. Lat. 28° 31', long. 77° 32'.

SURAJPUR, in the British district of Futtehpore, lieutenant-governorship of the North-West Provinces, a town with bazar, on the right bank of the Ganges, 1172 miles by the river.
above Allahabad, and 925 above Calcutta. It is described by Lord Valentia as "pleasingly situated on the right bank of the river, with several Hindoo temples and ghats to the edge, for ablution, some of which were in ruins, but others were building." Viewed from the river, it has a pleasing yet ruinous appearance, resulting not so much from actual decay as from the irregular style of building and finishing usual in many Indian towns. Distant 22 miles N.W. from the town of Futtehpore. Lat. 26° 9', long. 80° 39'.

SURAKELLA, or SERIEKALA, a raj situate within Singhbhum, and subject to the political agent for the southwest frontier of Bengal. Its centre is in lat. 22° 46', long. 85° 55'. It was lately, during the minority of the rajah, in charge of one of the agent's assistants. The country is reputed to yield 10,000 rupees; the people are said to be wild; and, beyond this, little is known.

SURANDEE.—A town in the British district of Sarun, presidency of Bengal, 38 miles S. of Bettiah. Lat. 26° 14', long. 84° 37'.

SURANEE.—A town in the British district of Hydrabad, province of Scinde, presidency of Bombay, 67 miles S.S.E. of Hydrabad. Lat. 24° 30', long. 68° 58'.

SURAT,* the principal town of the British collectorate of the same name, presidency of Bombay, is situate on the left or south side of the river Taptee, here fordable when the tide is out, but at high tide navigable for boats of forty or fifty tons burthen. Sea-going vessels can only anchor off the bar, fifteen miles lower down. The road outside the bar is very dangerous in the spring, when southerly and westerly winds prevail; and when such set in violently, it is expedient to run up the river, should the draught be sufficiently small, or otherwise to stand out towards the west of the Gulf of Cambay, where shelter may be obtained from the reef and island of Perim. The outline of the town is an arc nearly semicircular, the river forming the chord, and the circuit being about six miles. The castle is situate about the middle of the chord, and though small, has bastions, covered way, and glacis. Surat is an ugly town, with narrow winding streets and high houses,

* Surat of Tassin; Surat on the Bombay rupee, also of Richardson in v. 855, and of Ali Muhammad Khan; Surat of Busawun Lal.
SURAT.

constructed with frames of timber filled in with brick, and having the upper stories projecting beyond the base. It is surrounded by a wall in good repair, with semicircular bastions and battlements. The house formerly occupied by the nawaub of Surat is a plain building of moderate size. Most of the houses of the British inhabitants are in the vicinity of the fort, and are usually of good size, with spacious inclosures. Without the walls of the city is the site of the old French factory, containing some handsome and commodious buildings, now quite deserted: such also is the state of the ancient Dutch factory, once the most regular and best-built mansion about Surat.

Surat, in the latter part of the eighteenth century, stood high as a commercial, and, though in a less degree, as a manufacturing place. Then the bazars were "filled with costly merchandise; picturesque and interesting groups of natives on elephants, camels, horses, and mules; strangers from all parts of the globe in their respective costumes; vessels building on the stocks, others navigating the river; together with Turks, Persians, and Armenians, on Arabian chargers; the European ladies in splendid carriages, the Asiatic females in hackeries, drawn by oxen." That vivid and bustling scene has faded away before the great superiority which Bombay has attained, alike in a political, commercial, and maritime point of view, and the competition of British wares, cheaper than those of India; and the commerce of the port is now in a great measure confined to the export of cotton, and of grain for the supply of the less-productive Concan, lying further south. Even now, however, Surat is a place of some importance, being the station of a considerable force, and of the civil establishment of the collectorate. Hence the British society is unusually numerous, and its tone agreeable. There is a very neat and convenient church, as well as an extensive and picturesque burial-ground.

* Tavernier, in his usual vivid and graphic style, describes Surat as he found it in the seventeenth century: — "Surat," he says, "is a town of moderate size, with a wretched fort, below which it is necessary to pass in going either by land or water. It has four towers, one at each angle; and as the ramparts have not sufficient room for guns, they are placed on scaffolds. The ramparts are of mud, and the private dwellings resemble barns, except that in lieu of walls, they are shut in by reeds dabbed with cowdung mixed with mud; and in the whole town there are not more than nine or ten good houses."
full of large ruinous tombs of the former servants of the East-India Company.

The city of Surat has suffered occasionally from the inundations of the river Taptee. In 1837, two of these visitations occurred, causing great damage to the city walls, public and private buildings, and bridges. Some immediate preventive steps were taken to defend the town from the recurrence of such irruptions, which were attributed to the combined effects of a supposed gradual elevation of the bed of the river, an alteration in its channel, and the obstruction of its mouth by a bar of sand. But the more recent reports of the engineer officers throw doubt upon this opinion, and the selection of final measures for affording to the town security from injury by inundation, has been postponed until more complete information shall have been attained. The irruptions drew attention to the general state of the town, and on the occasion last referred to, authority was given for an annual expenditure of 40,000 rupees on the streets, draining, and public works connected with the health and convenience of the inhabitants. The population of the town in 1838 was 133,544.

Surat has been conjectured to be a place of great antiquity; but this conclusion perhaps results from confounding the name of Sorath or Sourashtra, a district of Guzerat, with Surat, the name of the town which is the subject of the present article. The earliest authentic notice respecting this town is probably the mention of its discovery and sack by the Portuguese in 1530, at which time it is described as containing 10,000 families, mostly handicrafts. An army attempted defence outside the town, but quickly took to flight, and then the city was entered without any further resistance, and nothing left in it that had life, or was of value. Then the city and some ships that lay in the arsenal were burned." In 1531, the town having in some measure recovered from this calamity, was again burned by the Portuguese.

In 1612, permission was granted by Jehangir to establish an English factory at Surat, and in 1657 all the possessions of the Company in the East Indies were placed under the control of the president and council of Surat; but from the subsequent acquisition of Bombay, the importance of Surat progressively declined until 1892, when the seat of the pre-
SURAT.

Residency was transferred. In 1664, Sir George Oxenden being governor, Surat was plundered by Sevajee, the Mahratta leader, but the English successfully defended their factory, and having also afforded protection to many of the citizens and their property, Aurungzebe, in recognition of that assistance, granted the East-India Company exemption from the duties levied on others trading at Surat.

During the early part of the eighteenth century, while the empire of Delhi was crumbling into ruins, Surat fell into a state of utter confusion, there being within it a number of conflicting authorities,—Mogul, Mahratta, and others. The Bombay government, greatly interested in the restoration of order at Surat, were zealous to effect this object, either with or without the co-operation of the Mahrattas; but their designs were frustrated, sometimes by the feebleness and vacillation of their own counsels; sometimes by the difficulty of securing the fidelity and stimulating the exertions of the wayward and treacherous people to whom they looked for co-operation. At length taking courage to act vigorously for themselves, they in 1759 attacked the castle of Surat, and succeeded in gaining possession of it. Thenceforward, though order was preserved, a divided authority continued to exist in Surat, the English being charged with the defence of the place, while a portion of the civil power was in the hands of a nawaub, both parties professing to act under the authority of the emperor, though that authority soon became but a name; and the nawaub, in fact, held his office at the pleasure of his British coadjutors. After a continuance of about forty years, a favourable opportunity occurred for terminating a state of things productive of many evils. On the death of the nawaub, in 1799, the British government, with the earnest wishes of the inhabitants of Surat, assumed the entire administration, civil as well as military, conceding to a relative of the deceased the title of nawaub, with a large pensionary provision. This arrangement was settled by treaty concluded in 1800. In 1822 the titular dignity of nawaub became extinct, by the death of its last possessor without male heirs; but certain privileges have been continued to his family. An attempt, made on the part of the government, in 1847, to introduce a uniform system of weights and measures into this city, resulted in failure. The

7 Id. Ill. 104.
8 Duff, Hist of Mahrattas, i. 100.
9 Id. i. 100.
2 Act of Gort. of India, xviii. of 1842.
government directed that only mild and conciliatory means should be employed to overcome the aversion of the shopkeepers to the measure, and remove the obstacles to its introduction. Surat is distant from Bombay, N., 150 miles; from Ahmedabad, S., 130. Lat. 21° 10', long. 72° 52'.

The district of Surat, of which this town is the principal place, is bounded on the north by the collectorate of Broach; on the east by Guzerat; on the south by Guzerat and the British collectorate of Tannah; and on the west by the Portuguese territory of Damaun and the Arabian Sea. It extends from lat. 20° 15' to 21° 11', and from long. 72° 45' to 73° 24'; and contains an area of 1,629 square miles, with a population of 492,684. Its boundaries were formerly more extended, and comprised within their limits the contiguous collectorate of Broach, which, in 1843, was placed under a separate jurisdiction. The two districts bear a close resemblance to each other, no less in their chief physical characteristics than in their statistical and social circumstances; and as minute details on these points are given in the article Broach, which are generally applicable to Surat, the reader is referred to the former head for further information.

SURA WALA, in the British district of Bhuttiana, lieutenant-governorship of the North-West Provinces, a village on the route from Hansee to Bhutnair, and 14 miles E. of the latter. The surrounding country is sandy and barren, and the road in this part of the route heavy and bad. Lat. 29° 35', long. 74° 38'.

SURA WUL, in the British district of Mynpoorie, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Aligurh to Futtoghur, and 40 miles N.W. of the latter. The road in this part of the route is bad; the country level, and partly cultivated, partly overrun with bush-jungle. Lat. 27° 36', long. 78° 69'.

SURBURI SUIOREE, in the Rajpoot state of Jodhpoor, a village on the route from Balotra to the city of Jodhpoor, and 21 miles N.E. of the former. The road in this part of the route is good, and passes through a level country, rather fertile and cultivated. Lat. 25° 54', long. 72° 48'.

SURDA, in the British district of Rajeshaye, presidency of Bengal, a town situate on a ridge of clay and kunkur, or
calcareous conglomerate, on the left bank of the Podda, or great eastern branch of the Ganges, in a country "very populous, well cultivated, and as beautiful as verdure, shade, water, and the splendid variety of Indian shrubs and trees can make it." Here was formerly an extensive filature, or silk establishment, belonging to the East-India Company. Distance N. from Calcutta, by Berhampore, 153 miles. Lat. 24° 18', long. 88° 42'.

SUR DEOTA. —A peak near Subathoo, so called because sacred to Sur or Mahadeo. Elevation above the sea 5,419 feet. Lat. 31° 3', long. 77° 6'.

SURDHAUR, in the peninsula of Katteewar, province of Guzerat, a town belonging to a Rajpoot thakoor or chief, who once resided here, but removed to Rajkote, another town belonging to him. Distance from Ahmedabad, S.W., 118 miles; Baroda, W., 140. Lat. 22° 8', long. 71° 1'.

SUREELA, in Bundelcund, a small raj or principality, named from its principal place, is inclosed on all sides by the British district of Humeerpoor, and lies between lat. 25° 43'—25° 51', long. 79° 41'—79° 48'. It is "stated to comprise thirty-five square miles, and to contain only eleven villages, with a population of 4,500 souls. Its revenue is estimated at 45,000 rupees (4,500£) per annum, and it maintains a force of twenty-five horse and seventy-five foot." The town is 25 miles S. of Calpee, 45 N.W. of Banda. Lat. 25° 46', long. 79° 48'.

SUREYA, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a village on the route from Goruckpoor cantonment to Lucknow, eight miles W. of the former, 158 E. of the latter. Supplies may be obtained here from the surrounding country. The road in this part of the route is indifferent during the dry season, and under water in the rains. Lat. 26° 45', long. 83° 15'.

SURGONG.—A town in the territory of Nagpoor, 47 miles N.N.E. from Ryepoor, and 91 miles S.E. from Ramgurh. Lat. 21° 50', long. 81° 58'.

SURGOOR.—A town in the native state of Mysore, situate on the right bank of the Cauvery river, and 36 miles S.W. by S. from Seringapatam. Lat. 12°, long. 76° 26'.

SURHA, in the British district of Banda, lieutenant-
government of the North-West Provinces, a village on the route from Allahabad to Kalleenjur, 104 miles S.W. of former, eight N.E. of latter. Water is plentiful, and supplies are procurable from neighbouring country. Lat. 25° 6', long. 80° 36'.

SURHUCHEEA.—A town in the British district of Tirhoot, presidency of Bengal, 14 miles N.N.E. of Mozufferpoor. Lat. 26° 17', long. 85° 33'.

SURHUD.—A town of Sinde, in the presidency of Bombay, situate seven miles S.E. of the left bank of the Indus, and 46 miles N.E. from Bukkur. Lat. 28° 5', long. 69° 29'.

SURJOO (EASTERN).—A river tributary to the Ghogra. It rises in the kingdom of Nepaul (where it is known by the name of the Relang), in lat. 28° 15', long. 81° 57', and flowing in a direction north-westerly for forty miles, it, in lat. 28° 26', long. 81° 24', enters the plains of Oude. Its course is then generally from north to south for about 120 miles, when it falls into the great river Ghogra, on its left side, in lat. 26° 58', long. 81° 46'. At its mouth it expands† into a sort of morass; at Burraech, forty-five miles from its mouth, and in lat. 27° 34', long. 81° 40', it is described, rather indefinitely, by Tieffen-thaler, as "a stone's throw in breadth, and in December [season of low water] two Indian ells deep;" but he adds that it occasionally becomes fordable.

SURJOO, or SURJU (WESTERN), a considerable tributary of the great river Ghogra, rises in the British district of Kumaon, in a gorge on the southern face of the main range of the Himalaya. Eight miles from the source, according to Webb, "the breadth of the Surjoo below Soopee is about fifteen yards, and at this time [early in May] may be forded in twenty inches water. The hills across [beyond] the river, [or to the eastward,] rise gradually to a lofty chain, the summit of which is yet covered with snow, and its eastern base is washed

* Buchanan mentions this river under the name of the Sarayu of the eastern mountaineers and lowlanders, as well as of Danville and Rennell.

† According to Tieffen-thaler, "Aqua exundans et extra ripam egrediens, vix non jungitur Gagre." He adds that the doab, or tongue of land extending upwards from the confluence between the two rivers, is extensively inundated during the rains:—"Tota haei peninsula confluentibus vicina aquis inundatur tempore pluviarum."
SURJOO.

by the [Eastern] Ranguna river.” The great elevation of the source is indicated by the snow, which lies about it so late in the year. At Soo, already mentioned, the bed of the river is 5,659 feet above the sea. A few miles lower down, Webb forded it in two feet of water, with a breadth of twelve yards; and a few miles still lower, or about fifteen miles from its source, the same traveller found it, in the middle of May, forty-five yards wide, and twenty-seven inches deep. It holds a south-westerly direction, receiving many streams; and one of considerable volume (the Phoongur) falls into it on the left side, thirty-one miles from the source, and in lat. 29° 52', long. 79° 49'. Flowing five miles further in the same direction, it, at Bagesar or Bageswar, receives, on the right side, the Gaomutee, a considerable stream running from the north-west. From that point it takes a south-easterly direction, receiving several small streams, and thirty-five miles below the confluence of the Gaomutee it receives, on the right side, the Punar, a considerable river flowing from the south-west. About ten miles above this confluence, sixty miles from the source, and in lat. 29° 36', long. 80° 3', Webb found “the average breadth about fifty yards, the drift four and a half to five miles per hour. The depth at present [probably in May] is about eight feet, but it becomes fordable about December.” Flowing from the confluence with the Punar still in a south-easterly direction, it at Ramesur, three or four miles farther down, receives, on the left side, its greatest feeder, the Ramgunga (Eastern), flowing from the north. This confluence is 1,500 feet above the sea; and as the elevation of the source of the Surjoo may with probability be assumed to be 7,000 feet, its average fall throughout its course to Ramesur, a distance of seventy-four miles, will be above seventy feet in the mile. It is accordingly there “a most impetuous and rapid torrent, dashing over the rocks with the greatest force, causing a deafening noise, and casting the spray about in all directions.” Below the confluence it is indifferently called the Surjoo or the Ramgunga. Near the confluence it is crossed by an iron suspension-bridge 180 feet in span. Continuing to flow in a south-easterly direction for twelve miles farther, it, at Puchesur, in lat. 29° 27', long. 80° 18', falls into the Kalee (Eastern), or principal headwater of the great river Ghoghra. Six furlongs above this confluence,
Webb found the river fordable in the season of low water; “the breadth of the stream about eighty yards; transparent, bed stony, depth of the ford about four and a quarter feet; drift of current four miles per hour or more.” The total length of course is between eighty and ninety miles. Herbert reckons the continuous courses of the Surjoo and Kali or Ghogra, from the source of the former river to the entrance of the latter on the plain of Hindoostan, at Bhirm-Deo, to be 143 miles. The united stream, more generally called the Ghogra, but also known by the name of the Surjoo throughout the whole length of its course to its junction with the Ganges, and under the kindred names of Siru, Sirwu, or Sirjoo, is repeatedly mentioned by Baber. In this river is found the highly esteemed fish the mahasur.

SURKANDA, in Gurwhal, a high mountain near the southern frontier, and overlooking the Dehra Doon. It forms part of the ridge separating the Jumna from the Bhageerettee, as the Ganges is called in the upper part of its course. There is a Hindoo temple on the summit, the formation of which is characterized by Hodgson and Herbert as “composed of a dull greyish stone, coarsely granulated, and having a conchoidal fracture. It is semi-hard.” It was a station of the large series of triangles in the trigonometrical survey of the Himalaya. Elevation above the sea 9,271 feet. Lat. 30° 25', long. 78° 21'.

SURKARA, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Allahabad to Futtehpore, and 2½ miles N.W. of the former. The road in this part of the route is heavy in wet weather, the country well cultivated. Lat. 25° 34', long. 81° 35'.

SURKUNDA, in the British district of Futtehpour, lieutenant-governorship of the North-West Provinces, a town on the left bank of the Jumna, 18 miles S. of the town of Futtehpore. Lat. 25° 42', long. 80° 53'.

SURMALEE.—A town and stockade in the native state of Nepal, 80 miles W. from Jemlah, and 46 miles E.S.E. from Almora. Lat. 29° 21', long. 80° 23'.

SURMOTE.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 54 miles S. from Sirinagur, and 81 miles E.N.E. from Jhelum. Lat. 33° 23', long. 74° 45'.
SUR.

SUROLI, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village on the route from Alwar, by Ferozpoor, to Delhi, and 16 miles S.W. of the latter. Lat. 26° 28′, long. 77° 8′.

SURREY KONDAH.—A town in the native state of Hyderabad, or territory of the Nizam, 31 miles S.S.E. from Hyderabad, and 88 miles N.E. by N. from Kurnool. Lat. 16° 56′, long. 78° 41′.

SURROOL,¹ in the British district of Bheerbhoom, presidency of Bengal, a town on the route from Burhampoor to Bancoora, 55 miles S.W. of former, 60 N.E. of latter. It is situated two miles N. of the north or left bank of the Aji river. Lat. 23° 40′, long. 87° 42′.

SURRUKPOOR, in the Reechna Doob division of the Punjab, a town situated on the right bank of the Ravee river, 18 miles S.W. of the town of Lahore. Lat. 31° 27′, long. 74° 4′.

SURRUNGURH.—See SARUNGHUR.

SURSAWA.—A town in the British district of Sumbulpoor, on the south-west frontier of Bengal, 88 miles W. of Sumbulpoor. Lat. 21° 30′, long. 82° 40′.

SURSEEA.—A town in the British district of the Twenty-four Pergunnahs, presidency of Bengal, 26 miles S.S.W. of Calcutta. Lat. 22° 15′, long. 88° 16′.

SURSODA.—A town in the British district of Balasore, presidency of Bengal, 54 miles S.W. of Balasore. Lat. 20° 56′, long. 86° 26′.

SURSU DEBI, in Sirmoor, a summit of the Sain range, near its north-western extremity, rises from the right bank of the river Giree. It is surmounted by a small white temple, a secondary station in the great trigonometrical survey of the Himalaya. Elevation above the sea 6,299 feet. Lat. 30° 61′, long. 77° 16′.

SURTOONA.—A town in the native state of Guzerat, or territory of the Guicowar, 90 miles N.N.E. from Baroda, and 81 miles N.E. from Kaira. Lat. 23° 30′, long. 73° 39′.

SURUGTHAL, in the British district Bijnour, lieutenant-governorship of the North-West Provinces, a village on the route from Moradabad to Hurdwar, and 34 miles N.W. of the former. The road in this part of the route is good, and
passes through a country in some places cultivated, but generally overrun with thin jungle. Lat. 29° 16', long. 78° 36'.

SURUMNAGAR, in the territory of Oude, a small town on the route from Lucknow to Shahjehanpoor, 103 miles N.W. of the former. It is situate on the left bank of the lesser Goomtee, and has an old fort, described by Heber as "pretty much like a large serai, surrounded by a high brick wall, with round towers at the flanks, and two Gothic gateways opposite to each other;" within is "a narrow street of mud houses, some looking like warehouses, and the whole having more the air of a place where the peasantry of a small district were accustomed to secure their stores, than the usual residence of any considerable number of people." Outside are a little straggling bazaar and a few huts, with a Hindoo temple, but no mosque. Lat. 27° 33', long. 80° 2'.

SURWANNEE SURAE, in the British district of Benares, lieutenant-governorship of the North-West Provinces, a town with a bazaar on the route from the city of Benareas to Jounpoor, nine miles N.W. of the former, 29 S.E. of the latter. Supplies and water may be had in abundance. The road in this part of the route is good. Lat. 25° 25', long. 82° 57'.

SURWAR, in the Rajpoat state of Kishengurgh, a town on the route from Goona to Nusserabad, 204 miles N.W. of the former, 25 S.E. of latter. It has a good bazaar, and water is abundant. Lat. 26° 5', long. 75° 8'.

SURWUN.—A town of Malwa, in the native state of Rutlam, 20 miles N.W. from Rutlam, and 70 miles S. by W. from Neemuch. Lat. 23° 29', long. 74° 40'.

SURWUN.—A town in the British district of Mongheer, presidency of Bengal, 60 miles S. of Mongheer. Lat. 24° 30', long. 86° 20'.

SUSOLAR, in the British district of Humeerpore, lieutenant-governorship of the North-West Provinces, a town on the route from the town of Banda to that of Humeerpore, 15 miles N. of the former. Lat. 25° 40', long. 80° 19'.

SUSRAL, in the Sinde Sagur Dooab division of the Punjab, a town situated 13 miles W. from the right bank of the Jhelum, 118 miles N.N.W. of the town of Lahore. Lat. 33° 12', long. 73° 32'.
SUS—SUT.

SUSTWAR, in Bussahir, a village in the pergunnah of Pekha, and hence sometimes called by that name. It is situate in a delightful country, in many places well wooded, and in general carefully and successfully cultivated. Lloyd observes, “Many of the women were very handsome; their complexions are fair and blushing.” Elevation above the sea 8,759 feet. Lat. 31° 15', long. 78° 2'.

SUTGARH, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village on the route from Petoragurh to Askoth, six miles N.E. of the former. Lat. 29° 40', long. 80° 19'.

SUTI.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the right bank of the Kishengunga river, and 57 miles N. from Sirinagar. Lat. 34° 55', long. 75° 1'.

SUTJORA.—A town in the British district of Sarun, presidency of Bengal, 30 miles N. by E. of Chupra. Lat. 26° 10', long. 84° 56'.

SUTLUJ.—The most easterly of the rivers of the Punjab, “the rise of which in the holy lakes of Manasarovara and Rawan Hrad, has been satisfactorily ascertained by the adventurous journeys of Captain H. Strachey and Lieut. R. Strachey.” Its most remote sources are the eastern feeders of the lakes, in lat. 30° 8', long. 81° 58'. Moorcroft, in his journey to Manas Sarovara, seems to have approached near to the source, having come upon the Suloodra or Sutluj. It subsequently issues from the north-western extremity of this lake, being there in the dry season thirty feet broad, and takes a north-westerly course of about 188 miles, through a country of awful and even terrific sublimity, as far as Khab, in lat. 31° 48', long. 78° 40'. Close to this it receives the river of Spiti from the north-west. Above the confluence, the Sutluj is seventy-five feet wide; its bed 8,600 feet above the level of the sea. Gerard observes, “It is not easy to form an estimate of the water contained in the Sutluj; for although the breadth can be determined, yet within the mountains there is scarcely a possibility of sounding it, on account of its great rapidity.” The depth at this spot must be very great, as the volume of water is considerable even eighty miles further up, where, at Ling, the river is too broad to admit of a rope-bridge, and is
crossed by one of iron chains; the breadth thereabouts being 120 yards; the depth, at the lowest season, one foot and a half; the rapidity seven or eight miles an hour; the impetus of the stream such as that it can be forded only by yaks or Tartarian kine, if the depth exceed two feet. The bed of the river, a short distance below Ling, is 10,792 feet above the sea. Here the river is by the natives called Langzhing-Khampa, or the river of Langzhing; lower down, Muksung; then, Sanpoo; lower still, Zeung-tee; lower down, Sumeedrung; in Buschar, Sutoodra, or "hundred-channelled," whence the names Zada-

6 Lloyd and Gerard, Map.

trus and Hesudrus of the classical writers; lower down, it is generally called the Sutluj, by which name it is also known up to its source. Though the river is in the upper part of its course a raging torrent, falling in several places 100 or 150 feet per mile, with a clamorous noise, and displaying heaps of white foam, yet so severe is the climate, that for 200 miles it is completely frozen for two months every winter. Where not fordable, it is crossed either by a sango, or wooden bridge; by a jhoola, or rope-bridge, which the traveller passes on a seat suspended by a loop made to slide along the rope, by means of a long string, pulled by men stationed on the further bank; or by means of a suzem, or foot-bridge, formed of cables, stretched parallel to each other. These frail suspension-bridges sometimes give way, and the passengers are dashed to pieces. There are also a few chain bridges. At the confluence of the Spiti and Sutluj, the scene is described as awfully sublime; according to Lloyd and Gerard,"the character of the gulf is certainly one of the wonders of the world." The Lee, or river of Spiti, issues forth from a rocky channel, so narrow and deep as almost to seem subterranean, with a calm, blue, deep current. The Sutluj is muddy, and breaks violently on the rocks with a tremendous roaring. The Spiti has probably a larger body of water than the Sutluj. The former river averages from 250 to 300 feet in breadth; the latter, a short distance above the confluence, is seventy-five feet broad. Below the confluence, the stream is so deep and rapid that no bottom could be found with a ten-pound sounding-lead. From this remarkable point its general course is south-west, with a very rapid declivity. At Namptoo the height of its bed is 8,220 feet, its breadth 106; at Wangtoo (lat. 31° 32', long. 636
SUTNA.

78° 1') the height of its bed is 5,200 feet, the breadth is ninety-two; at Rampoor (lat. 31° 26', long. 77° 40'), the height of the bed is 3,360, the width 211. These measurements were made at the narrowest places, where bridges have been constructed; but in other places it is 150 yards wide. From Rampoor to Bilaspoor, in lat. 31° 21', long. 76° 48', its course is generally west-south-west. Forster, who crossed it here, describes it as a very rapid stream, about 100 yards broad. A short distance below this it makes a sudden sweep to the north-west, and then back again to the south-east to Ropur, in lat. 30° 58', long. 76° 35', where it makes its way through the low sandstone range of Jhejwan, and enters the plain of the Punjab. It is here thirty feet deep, and more than 500 yards wide in its season of greatest fulness, and is crossed either in boats or on floats of inflated buffalo-hides. As is the case with all the rivers descending from the Himalaya, it is far fullest in June, July, and August. At the ferry of Filor or Faloor, in lat. 31° 1', long. 75° 50', it was found, in the season when lowest, to be 250 yards wide, seven feet deep, and moderately rapid. Burnes, who crossed it here in August, when fullest, found it 700 yards wide, with a depth, where greatest, of eighteen feet, but on an average of only twelve. Up to this point it is navigable at all seasons for vessels of ten or twelve tons burthen. Its confluence with the Beas is a little above Hurekee, and in lat. 31° 11', long. 75° 4'. According to Macartney, the Beas has the larger body of water. The whole length of the river, from the point where it issues from Lake Manassarovara to its junction with the Beas, is 550 miles. Below this confluence, as far as the confluence with the Chenaub, a distance of 300 miles, the united stream bears the name of Ghara. Thenceforward the aggregate body of water, until its confluence with the Indus, bears the name of Punjnad, a name derived from its conveying the accumulated waters of the Beas, Sutluj, Ravee, Chenaub, and Jhelum. As before mentioned, the Sutluj is considered to be the Zaradrus, Zadadrus, or Hesudrus of the ancients, and the Hypauni mentioned by Strabo.

SUTNA, or SUTANI, a small river rising in Bundelcund, on the southern declivity of the Panna range of hills, about eight miles south-east of the town of Panna, and in lat. 24° 42',
SUT—SWA.

long. 80° 28'. The elevation above the sea, of its source, cannot be much less than 1,100 feet; as at Shawul, forty miles to the east, or down the stream, the elevation is 1,069 feet. About that place the course turns rather to the south-east, and twelve miles lower down it falls into the Tons, on the left side, in lat. 24° 30', long. 80° 56'. The route from Allahabad to Saugor crosses "the Sutnee" close under Shawul-Bed, fifty yards wide; stream two and a half feet deep, banks rather steep." The passage here was formerly defended by a fort, now in ruins.5

SUTRALI, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village with a temple on the route from Almora fort to Juwahir Pass, or Una Dhura, and 17 miles N. of Almora. Supplies must be collected from the surrounding country. Lat. 29° 46', long. 79° 44'.

SUTTAL, a town of Bundelkund, in the native state of Punnah, 39 miles W. from Punnah, and 84 miles N.E. from Saugur. Lat. 24° 42', long. 79° 40'.

SUTTALUBE.—A town in the British district of Backergunj, presidency of Bengal, 126 miles E. of Calcutta. Lat. 22° 40', long. 90° 11'.

SUTTEHGEERE.—A town in the British district of Belgaum, presidency of Bombay, 39 miles N.E. of Belgaum. Lat. 16° 1', long. 75° 7'.

SUTTICUL.—A town in the British district of Coimbatoor, presidency of Madras, 89 miles N. by E. of Coimbatoor. Lat. 12° 15', long. 77° 13'.

SUTULANU.—A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Loonee river, and 24 miles S.S.W. from Jodhpoor. Lat. 26°, long. 73°.

SUTWARAH.—A town in the native state of Indore, or territory of Holkar, 65 miles S.by E. from Indore, and 16 miles S.E. from Kurgoon. Lat. 21° 44', long. 75° 59'.

SUTWAS.—A town in the native state of Gwalior, or territory of Scindhia's family, 70 miles S.E. from Oojeein, and 76 miles W.S.W. from Hoosungabad. Lat. 22° 28', long. 76° 37'.

SWALL,1* in the collectorate of Surat, presidency of Bombay,

* Swallow Point of Horsburgh;1 Swally of Bruce.2

SWA—SYD.

a small town at the entrance of the river Taptee. A spot
denominated by our sailors Swallow Point, and projecting south
from the town, is the northern point of the entrance of the
Tappee, or road of Surat, from which city it is distant by water
18° miles west. During the early part of the seventeenth cen-
tury, when Surat was the seat of the presidency for managing
the affairs of the East-India Company in Western India,
Swali was a place of considerable importance, and the roads
the scene of some actions between the ships of the English
company and those of their rivals the Dutch. Distance N.
from Bombay 150 miles, S. from Baroda 90, S. from Ahmed-
abad 135. Lat. 21° 4', long. 72° 44'.

SWAN, a river of the Punjab, rises in a subordinate range
of the Himalaya, west of Cashmere, and in lat. 33° 45', long.
73° 7'. It holds a south-westerly course of 120 miles, and
falls into the Indus on the left side, about ten miles below
Mukkud, and in lat. 33° 1', long. 71° 46'. Elphinstone, who
crossed it in lat. 33° 37', long. 73° 3', and about thirty miles
from its source, describes it to be, where forded, "a large
rivulet, which, though only up to our horses' girths, was so
rapid as to be scarcely fordable. Several of our camels were
swept down by the stream." Hough, who crossed the Swan
when the water was low, describes it as having "a stony bed,
not broad, and one foot of water." Burnes, who crossed this
stream in lat. 33° 6', long. 72° 12', found it there "rapid, red,
and swollen," and stirrup-deep.

SYARA.—A town in the Rajpoot state of Jodhpoor, 42
miles E.N.E. from Jodhpoor, and 59 miles W. from Ajmeer.
Lat. 26° 29', long. 78° 48'.

SYDABAD, in the British district of Allahabad, lieutenant-
governorship of the North-West Provinces, a town on the
route from the city of Allahabad to that of Benares, and 18°
miles S.E. of the former. It is four miles from the left bank
of the Ganges, has a bazar, and water and supplies are abun-
dant. The road in this part of the route is excellent; the
country level, and in general well cultivated, but in some
places swampy during rains. Lat. 35° 22', long. 82° 10'.

SYDAPURUM.—A town in the British district of Nellore,
presidency of Madras, 25 miles S.W. of Nellore. Lat. 14° 11',
long. 79° 42'.

SYD—SYR.

SYDOPRE, in the British district of Ghazeepoor, lieutenant-governorship of the North-West Provinces, a town with a bazar on the route from Benares to the cantonment of Ghazeepoor, 23² miles N.E. of the former, and as many W. of the latter. It is situate on the left bank of the Ganges, near the confluence of the Goomtee, which last river is traversed by the route from Benares by means of ferry during the rains, and during the rest of the year by bridge of boats. Sydpore has a population of 8,200 inhabitants; distant N.W. from Calcutta, by water, 641⁴ miles. Lat. 25° 30', long. 83° 18'.

SYJERAH, in the Baree Dooab division of the Punjab, a town situated nine miles from the right bank of the Sutlej, 35 miles S.E. by S. of the town of Lahore. Lat. 31° 6', long. 74° 30'.

SYLHET.—See Silhet.

SYMBRAMKUM, in the British district of Chingleput, presidency of Madras, a town close to a tank² twenty miles in circuit, formed by an embankment between two natural ridges of ground, and irrigating an extent of land giving employment to 5,000 cultivators. Distance from Madras, W., 17 miles. Lat. 13° 4', long. 80° 3'.

SYNJUNA, in the British district of Shahjehanpoor, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to the cantonment at Futehgurh, and 43 miles S.E. of the former. The road in this part of the route is good; the country open, level, and cultivated. Lat. 27° 48', long. 79° 43'.

SYREE, in that portion of the hill state of Koonear bestowed upon the rajah of Putteela, is the name of a pass over a ridge between Subathoo and Simla, and 12 miles N.E. of the former post. Here is a small village with a good house, built for the accommodation of travellers by the British authorities. Elevation above the sea 4,971²feet. Lat. 31° 6', long. 77° 6'.

SYRIAM.—A town in the British province of Pegu, situate on the right bank of one of the branches of the Irawady river, and 11 miles E.N.E. from Rangoon. Lat. 16° 50', long. 96° 26'.

* According to Gerard, 5,083.
TAANKLY.—A town in one of the recently sequestrated
districts of the native state of Hyderabad, or dominions of the
Nizam, 52 miles S.W. from Ellichpoor. Lat. 20° 33', long. 77° 8'.

TAHNAO.—A village of Gurwhal, on the right bank of the
Jumna, here about 100 feet wide, and crossed by a sango or
wooden bridge. It is situate in a considerable expanse of
level and fertile ground, producing good crops, especially of
rice, which is carried on the backs of human beings to Dehra,
and there exchanged for salt, brought in return by the same
means of conveyance, as beasts of burden are not in use here.
The houses, narrow, gloomy, and covered with slabs of schist,
reminded Jacquemont of those of the Upper Alps. He con-
sidered that he could trace a resemblance between the archi-
tecture and sculpture of some ruined temples in the village and
those of the sacred buildings of Benares. Tahnao is 4,752
feet above the sea. Lat. 30° 49', long. 78° 19'.

TAHNOOT.—A town in the native state of Kareal, on the
south-west frontier of Bengal, 41 miles N.W. by N. from Kareal,
and 109 miles W.S.W. from Sumbulpoor. Lat. 20° 49', long. 82° 30'.

TAHURPOOR, in the British district of Moradabad, lieu-
tenant-governorship of the North-West Provinces, a village on
the route from Allygurh to the town of Moradabad, and eight
miles S.W. of the latter. The road in this part of the route is
good; the country level, open, and cultivated. Lat. 28° 44',
long. 78° 47'.

TAIMBAH.—A town in the territory of Nagpoor, situate
on the left bank of the Wurda river, and 62 miles S. by W.
from Nagpoor. Lat. 20° 16', long. 79° 1'.

TAINGAPATAM, in the territory of Travancore, under
the political superintendence of the presidency of Madras, a
town on the coast of the Indian Ocean. It is situate on the
mouth of a river of the same name, which, in consequence of a
bar, can be entered only by small boats, and by those only during
the rainy season. The population here and in the neighbour-

TAJ—TAK.

hood comprises many native Christians of the Syrian church, or that of St. Thomas; and some of these ancient churches may be observed at intervals along the shore from this place to Cape Comorin. Lat. 8° 14', long. 77° 14'.

TAJPOOR, in the territory of Gwalior, or possessions of Scindia's family, a small town on the route from Goona to Oojain, 140 miles S.W. of former, 11° 11' N.E. of latter. It has a bazar, and water is plentiful. Lat. 29° 12', long. 75° 56'.

TAJUL.—A town of Sind, in the state of Ali Moorad, 52 miles S. from Bukkur, and 118 miles W. from Jessulmeer. Lat. 26° 55', long. 69° 4'.

TAK, in the Daman division of the Punjab, a town situated 34 miles from the right bank of the Indus, 150 miles S.S.W. of the town of Peshawur. Lat. 32° 7', long. 70° 30'.

TAKAL, in the Peshawar division of the Punjab, a town situated on the left bank of the Bahreh river, three miles W.S.W. of the town of Peshawar. Lat. 33° 59', long. 71° 35'.

TAKALLY.—A town in the territory of Nagpoor, situated on the left bank of the Wurda river, and 60 miles S.S.W. from Nagpoor. Lat. 20° 21', long. 78° 50'.

TAKAM.—A town in the native state of Nepal, situated on the right bank of one of the branches of the Gunduck river, and 166 miles W.N.W. from Khatmandoo. Lat. 28° 36', long. 82° 49'.

TAKEA.—A town in the British district of Silhet, presidency of Bengal, eight miles S. of Silhet. Lat. 24° 48', long. 91° 51'.

TAKEE, in the British district of Baraset, presidency of Bengal, a village with thanna or police-station on the right bank of the Isamutti, a large offset from the Ganges, and close to the southern frontier towards the Sunderbunds. Distance E. from Calcutta, by Baraset, 50 miles. Lat. 22° 35', long. 89°.

TAKMHALL.—A town in the native state of Hyderabad, situated on the left bank of the Manjera river, and 51 miles N.W. from Hyderabad. Lat. 17° 58', long. 78° 6'.

TAKWARAH, in the Daman division of the Punjab, a town situated 26 miles from the right bank of the Indus, 155 miles S.S.W. of the town of Peshawar. Lat. 32°, long. 70° 36'.
TAL.

TALABURA, in the British district of Budaun, lieutenant-governorship of the North-West Provinces, a village on the route from Aligarh to Moradabad, and 36 miles S.W. of the latter. The road in this part of the route is bad; the country low, level, and partially cultivated. Lat. 25° 29', long. 78° 28'.

TALAK.—A town in the British district of Aracan, presidency of Bengal, situate 68 miles S.E. of Aracan, on the banks of the river of the same name, navigable thus far for boats of considerable burthen. Lat. 20° 2', long. 94° 6'.

TALA KHAR, in Bussahir, a river of Koonawur, falls into the Sutlej on the left side, in lat. 31° 40', long. 78° 32'. It rises in Chinese Tartary, about lat. 31° 36', long. 78° 54', and has a course of about thirty miles, generally westerly. It is described by Gerard as a large stream.

TALAMANCHI.—A town in the British district of Nellore, presidency of Madras, 11 miles N. of Nellore. Lat. 14° 37', long. 80° 3'.

TALCHEER.—A town giving name to a Cuttack mehal on the south-west frontier of Bengal: it is situate on the right bank of the Braminy river, and 61 miles N.W. from Cuttack. Lat. 20° 56', long. 85° 9'.

TALGRAM,¹ or TALIGRAM, in the British district of Furruckabad, the principal place of the pergunnah of the same name, a small town on the route from the cantonment of Etawa to that of Futtehgurh, and 24² miles S.W. of the latter. Supplies and water are abundant here: the road in this part of the route is good; the country well wooded and well cultivated. Lat. 27° 2', long. 79° 43'.

TALIKOTE.—A town in the British district of Sholapoor, presidency of Bombay, 89 miles S.S.E. of Sholapoor. This place obtained celebrity from the battle fought in its vicinity in 1564, when the power of the Brahminical realm of Bijayanagar was destroyed by a confederacy of the Mussulman kings of the Deccan. Lat. 16° 27', long. 76° 22'.

TALKHAIR.—A town in the native state of Hyderabad, 2 to 2

¹ E.I.C. Ms. Doc.
² Garden, Tables of Routes, 111.
or territory of the Nizam, 19 miles N.E. from Bheer, and 90 miles E. by N. from Ahmednuggur. Lat. 19° 11', long. 76° 7'.

TALKONAH.—A town in the British district of Mymunsing, presidency of Bengal, 31 miles N.N.W. of Jumalpoor. Lat. 25° 17', long. 89° 51'.

TALLOONDEE.—A town on the south-west frontier of Bengal, in the native state of Bomra, situate on the left bank of a branch of the Braminy river, and 45 miles E. from Sumbulpoor. Lat. 21° 30', long. 84° 41'.

TALL,1 in the territory of Jowra, in Malwa, a town, the principal place of a pergunnah containing forty-two villages, a population of 12,308, and yielding an annual revenue of 5,328 rupees to the nawaub of Jowra, son of the Patau chief Ghufur Khan, to whom it was in 1818 secured by the British government, by treaty2 with Mulhar Rao Holkar. It is well supplied with water from a perennial stream on the side of the town. The town contains 6413 houses and 2,648 inhabitants. Distance N.W. from Oozein 44 miles, N.W. from Indor 74, S.E. from Neemuch 60, S.W. from Gwalior 252. Lat. 23° 42', long. 75° 22'.

TALLAJA,1 in the peninsula of Kattywar, province of Guzerat, a town in the district of Gohilwar. It is situate at the base2 of a conical hill, on the river Setroonjee, called also the river of Sultanpoor, from a seaport distant six miles south-east from Tallaja. This river has at its mouth a channel of the depth of from two to three fathoms, with soft bottom; but the entrance is difficult, in consequence of a dangerous bank opposite to it, and nearly level with the surface of the water. Distance from Surat W. 60 miles. Lat. 21° 20', long. 71° 69'.

TALLAKAD.—A town in the British district of Malabar, presidency of Madras, 79 miles S.S.E. of Cannanore. Lat. 10° 53', long. 78°.

TALLAMALLA.—A town in the British district of Coimbatoor, presidency of Madras, 45 miles N. of Coimbatoor. Lat. 11° 38', long. 77° 4'.

TALLAPOOLA.—A town in the British district of Cuddapah, presidency of Madras, 42 miles W.S.W. of Cuddapah. Lat. 14° 13', long. 78° 18'.

TALMONDA.—A town on the south-west frontier of
TAL—TAM.

Bengal, in the British district of Sumbulpoor, 42 miles N.E. by N. of Sumbulpoor. Lat. 22°, long. 84° 20′.

TALENERE.—See THALNEIR.

TALWUNDEE NOUBAHAR, in Sirhind, a village on the route from Lodiana to Ferozpur, and 45 miles W. of the former place. It is a small place, situate in a level, open, and well-cultivated country: water can be obtained in abundance from ten brick-lined wells, each about twenty-five feet deep. The road in this part of the route is in general good, though occasionally otherwise, in consequence of heavy sand. Distant N.W. from Calcutta 1,147 miles. Lat. 30° 57′, long. 75° 13′.

TAMBA.—A town in the British district of Sholapoor, presidency of Bombay, 48 miles S. of Sholapoor. Lat. 16° 59′, long. 76° 3′.

TAMBARAVARI,* in the British district of Tinnevelly, presidency of Madras, a river rising on the western frontier, on the eastern declivity of the Eastern Ghats, and in lat. 8° 52′, long. 77° 20′. It holds a tortuous course, in some parts eastwards, in others south-eastward, for eighty miles, and falls into the Gulf of Manar in lat. 8° 38′, long. 78° 10′, close to the small town of Punnakoil. It has a bar at its mouth, preventing the entrance of shipping; and thirty-five miles higher up it is crossed by a fine bridge, connecting the towns of Tinnevelly and Palamkottah. It receives on the left side, in lat. 8° 48′, long. 77° 5′, the Chetura torrent, of considerable size.

TAMBUR.—A river of Nepal, rising on the southern face of the Himalayas, and flowing first in a southerly direction for about sixty-five miles, during which course it receives the Yangma, Kumbachen, Yallooug, Khabili, and Hinwa rivers, and afterwards in a westerly direction for thirty miles, falls into the Coosy, in lat. 26° 57′, long. 87° 1′.

TANOILAH.—A town in the British district of Burrahboom, presidency of Bengal, 143 miles W. by N. of Calcutta. Lat. 22° 52′, long. 86° 13′.

TAMPEE.—A town in the Rajpoot state of Jodhpoor, situate on the right bank of the Loonee river, and 150 miles S.W. from Jodhpoor. Lat. 24° 52′, long. 71° 23′.

* This river is called Chundinthara in the Trigonometrical Survey, and Pambouri in Walker’s large map of India.
TAMSA.—A town in the native state of Hyderabad, or territory of the Nizam, 40 miles S.W. by S. from Mahur, and 153 miles N.N.W. from Hyderabad. Lat. 19° 28', long. 77° 39'.

TANASSERIM.—An island forming one of the Mergui Archipelago. In coming from the sea, the hills upon it have the appearance of separate islands. Its centre is about lat. 12° 35', long. 97° 57'.

TANBENGOONG.—A town of Burmah, situate on the left bank of the Khyendwen river, and 174 miles N.W. by N. from Ava. Lat. 24° 2', long. 94° 47'.

TANDA, or TARAH, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a station on the route from Bareilly to Almora, 62² miles N. of the former, and 58 of the latter. It is situate close to a brook, and in a small cleared place in the Terai or marshy forest, the air of which, during the hot season, is so deadly as to cause a fearful loss of life among travellers, as well as those more permanently located in connection with the police-station here. The increase of malaria, strikingly observable of late years in this tract, is by Heber attributed to the depopulation caused by the invasion of Amir Khan in A.D. 1805. The dignitary just quoted, who visited it at the close of November, when the malaria is less dreaded, "saw nothing appalling or menacing in the valley of death. The grass was high, and jungle thick, so thick that it was sometimes with difficulty that even on the raised causeway we could force our way through it; but there was nothing of that dark, dank, deadly-looking vegetation which we had seen at Ruderpoo; and the majestic trees, which from time to time towered over the underwood; the songs of the birds, and the noble hills [Himalaya] which we were approaching, made me think I had passed very many days in India more unpleasantly." The supply of water here appears to be the only inducement to retain it as a station. The road in this part of the route is good. Lat. 29° 5', long. 79° 30'.

TANDAH, in the territory of Oude, a town on the route from the cantonment of Goruckpore to that of Sultanpoo, 57² miles S.W. of the former, 53 N.E. of the latter. It is situate three miles from the left bank of the Ghaghra. Supplies are abundant here, and the road in this part of the route is good.
TAN.

Butter states the population at 6,000, of whom 4,000 are Mussulmans, chiefly weavers, this being the seat of the largest manufactories of cloth in Oude. A faujdar, with 100 men and two guns, is stationed here. Lat. 26° 34', long. 82° 49'.

TANDAULI,¹ in the district of Aldemau, the territory of Oude, a town near the north-eastern frontier, towards the British district of Goruckpoor. It has a fort with two guns, and garrisoned by 500 men. The population, according to Butter, is 3,000, but was formerly double that amount, until diminished by the flight of inhabitants, through dread of the oppression of the government. Lat. 26° 34', long. 82° 26'.

TANDENKY.—A town in the British district of Masulipatam, presidency of Madras, 22 miles N.W. by W. of Masulipatam. Lat. 16° 21', long. 80° 57'.

TANDI, in the Punjab, a village of the district of Lahoul, is situated at the point where a considerable feeder of the Chenaub falls into that river, which, immediately below the confluence, is 200 feet wide,¹ with a steady current. The vicinity is wooded, producing pines, yews, and willows. Buckwheat is the principal crop, though barley and wheat are cultivated; but the great elevation, probably exceeding 8,000 feet, and consequent lowness of temperature, frequently render the crops of these two last sorts of grain abortive.² Lat. 32° 35', long. 77°.

TANDOOR.—A town in the native state of Hyderabad, or territory of the Nizam, 24 miles W. from the right bank of the Wein Gunga river, and 141 miles N.N.E. from Hyderabad. Lat. 19° 11', long. 79° 29'.

TANDOOR, a river of Hyderabad, rises in lat. 17° 3', long. 77° 58', and flowing westerly for eighty-five miles, falls into the Beemah river, in lat. 17° 1', long. 76° 58'.

TANDUH, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a village on the left bank of the Jumna. Lat. 29° 16', long. 77° 13'.

TANGAN,¹ in the district of Bainswara, kingdom of Oude, a town nine miles N.E. of the left bank of the Ganges, 55 S. of Lucknow. Butter estimates the population at 8,000,² all Hindoos. Lat. 26° 3', long. 81° 20'.

TANGNO, in Bussahir, a valley on the south side of the great range of the Himalaya, bounding Koonawur on the south. * Officer of police.

TAN.

It is well wooded with pines and oaks, and contains five villages. Elevation above the sea 5,800 feet. Lat. 31° 20', long. 78° 3'.

TANGON RIVER.—One of the numerous watercourses traversing the district of Dinajepore: it rises in lat. 26° 43', long. 88° 31', and flowing in a southerly direction for 140 miles, falls into the Mahananda, in lat. 24° 57', long. 88° 14', having in its course thrown off numerous offsets right and left.

TANGREAH.—A town in the native state of Keunjur, on the south-west frontier of Bengal, 80 miles W. by N. from Balasore, and 118 miles E. by N. from Sumbulpoor. Lat. 21° 44', long. 85° 49'.

TANJORE.—A British district in the presidency of Madras, named from its principal place. It is bounded on the north-west by the Coleroon, separating it from the British districts of South Arcot and Trichinopoly; on the east and south-east by the Bay of Bengal; on the south-west by the British district of Madura; and on the west by the British district of Madura, the native state of Poodocottah, and Trichinopoly. It lies between lat. 9° 52' and 11° 23', long. 78° 55'—79° 55'; is 120 miles in length from north-east to south-west, and seventy-five in breadth: the area, according to official return, is 3,900² square miles. Its seacoast extends 165 miles, from lat. 9° 52' to 11° 23'; but from its southern extremity to Point Calymere, in lat. 10° 16', long. 79° 54', a distance of seventy-five miles, the coast cannot be visited by ships of any considerable burthen, in consequence of the shoalness and dangerous nature of Palk's Bay, which washes it. There is, however, much coasting-trade carried on by the small craft of the country. The coast, which from its southern extremity to Calymere has a direction either north-east or east, at that point turns due north, which direction it continues to hold to the northern extremity of the district. Point Calymere is low, sandy, and covered with cocoanut-trees, but from projecting so far into the sea, has much of the advantage of an insular situation; and the air being refreshed and cooled by the sea-breezes, it is frequented as an agreeable retreat during the hot season. Further north, in lat. 10° 45', long. 79° 55', lies Negapatam: it has no port capable of receiving ships, being situate at the mouth of a small branch of the Cauvery, admitting only country boats of inconsiderable burthen.
TANJORE.

Negapatam to the mouth of the Coleroon, the great northern branch of the Cauvery, the shore of the delta of that river extends; and though there are many estuaries and inlets, there is no haven capable of receiving ships of any considerable burthen. The best is Nagore, which, having eight feet of water on its bar at spring tides, has belonging to it vessels of from 200 to 300 tons, which ply to the Eastern Archipelago, and to places on the eastern shores of the Bay of Bengal. At Tranquebar (formerly a Danish, now a British possession), in lat. 11° 1', long. 79° 55', ships must anchor in the open sea in six or seven fathoms water, the inconsiderable branch of the Cauvery, at the mouth of which it is situate, admitting only small coasting-craft. Through its whole extent, the coast is low and sandy, the sea shoaly, and the difficulty of communicating with the shore heightened by the violent surf which incessantly beats on it. The Coleroon river, the principal estuary of the Cauvery, and terminating the coast-line of this district towards the north, has at its entrance a bar, dry at low water, from which proceeds a shoal, projecting four or five miles into the sea south-eastward; an impediment which is not, however, without use, sheltering from the southerly winds the anchorage of Porto Novo farther north. The extensive delta of the Cauvery is almost entirely comprised within this district, of which it forms the northern and larger part. In general, "the surface of the country is a low, level, and highly cultivated plain, devoid of mountains, hills, or any considerable elevations, and covered nearly through its whole extent with paddy [rice] fields, interspersed with topes [groves] of cocoanut-trees." This district, besides the moisture derived from the rains of the north-east monsoon, receives the benefit of the superfluous waters of the river Cauvery, which, swelled by the heavy rains precipitated by the south-west monsoon on the remote ghats and the table-land of Mysore, rolls down an abundant volume of water, to irrigate and fertilize the low, level, alluvial region of Tanjore. The inundation of this great torrent is at its height about the middle of July, when it is a mile wide above the head of the island of Seringham, where it parts into two great branches: the northern and larger branch, called the Coleroon, forms the north-western boundary of Tanjore for eighty miles, falling into the sea by an estuary of

6 Report, East India Directory, 1. 269.

6 Horshurgh.
no great size, near Chillambarum, in lat. 11° 22', long. 79° 48'; the other branch, continuing to be denominated the Cauvery, takes a south-east direction, and is subdivided into a great number of watercourses, traversing and fertilizing the district, until most of them disappear, from the effects of absorption and evaporation, a few only reaching the sea by small and nearly imperceptible outlets. The principal of these channels is the Vennar, which sends off several large watercourses to the southern part of the district; the next in importance are the Kodamurti and Verashalen. The channel of the Coleroon becomes in its progress far more depressed than that of the Cauvery, and vast embankments have been formed to prevent the water of the more elevated channel from deserting it, and making its way into the lower. At various intervals there are vents, that allow the water of the Cauvery to escape into the lower parts of the delta, and, if redundant, to pass into the Coleroon.

Considerable expense has been incurred, and much ingenuity shown, in the construction of the works requisite for dispensing this extensive and intricate system of irrigation.

The whole surface of the district is nearly one expanse of rice-fields; and two, and in many parts three, crops of that grain are obtained in the year. The other crops, which are comparatively unimportant, are principally maize, millet, coriander, castor-oil and some other oil-seeds, ragi (Eleusine corocana), gram (Cicer arietinum), and other pulse; cumin, capsicum, cucumbers, and various other cucurbitaceous plants; onions, and sundry esculent vegetables; betel-leaf, indigo, and tobacco. The soil is not in general well suited for cotton, but about 5,000 acres are said to be employed in its cultivation. Altogether, probably, this district is excelled in fertility and productiveness by none in India, and equalled by few, except some rich tracts in the valley of the Ganges. The population is returned at 1,676,086; and this amount, compared with the area, shows a relative density of 429 to the square mile. By far the larger portion of the population are Brahminists; amongst whom the horrible practice of burning women with the corpses of their husbands was frightfully prevalent, until abolished by British authority. The city of Tanjore and its vicinity were especially remarkable for the prevalence of
TANJORE.

this detestable rite; and a magistrate, writing in 1813, states that in a short period of time not fewer than 100 unhappy victims were immolated there. In 1800 two of the wives of the rajah of Tanjore were burned with his corpse. In the year 1824 four women are said to have been murdered in the like manner within this district.

Two systems of revenue management, totally different in principle, prevail in this province: under the one, payment is regulated only by the extent of land taken into cultivation; while under the other, the claim of government fluctuates according to the price of grain. In this case, the amount is fixed on the assumption of a standard produce and a standard price. If the amount of actual produce, combined with the actual price, fall in any year below the data upon which the assessment is framed, the claim is proportionally reduced; if the amounts vary in the other direction, the government demand is increased. The government give to the cultivators the benefit of a reduction upon a fall of five per cent., but do not claim the advantage of increase, except under a rise of ten per cent.

Little appears to be known concerning the political existence of Tanjore before the middle of the seventeenth century. About the year 1678, Vencajee, a Mahratta chief, and brother of the famous Sevajee, obtained possession of the province; and it is from him that the present rajah is descended. From this period a tolerably connected history of the country can be obtained; but it is barren of any information concerning its political relations with other states, its strength, and comparative importance. In 1749 a British expedition was despatched into this principality; and this was the first instance in the Carnatic of the English being engaged against the forces of a native prince. The object of the expedition was the restoration of a deposed rajah of Tanjore, who had applied for assistance to the governor of Fort St. David, promising as a reward the absolute possession of Devi-Cottah, exempt from the payment of tribute. The attempt to restore the exiled rajah proved unsuccessful; but the British government, thinking it dangerous to lie under the reproach of defeat, undertook a second expedition, which was attended with better results. The reigning prince consented to buy off
the invaders by confirming them in the possession, and granting the immunity which his rival had promised; and engaged to make a small provision for the person whose real or supposed wrongs had given rise to the war, the English undertaking for his peaceable behaviour. From the time of the conquest of the country by Vencajee, to the reign of Rajah Pretaub Sing, in 1764, the descendants of the former personage appear to have exercised authority uncontrolled by the nabob of the Carnatic, and altogether independent of him. During the reign of Tooljajee, the son and successor of Pretaub Sing, Mahomed Ali, the nabob of Arcot, laid claim to tribute from the state of Tanjore. In the prosecution of this claim he was supported by the Madras government, who commenced hostilities on his behalf, took the fort of Tanjore in 1772; and having removed the reigning prince from the throne, delivered over the country to the management of the nabob. The home authorities did not approve the measures adopted by the Madras government, and directed the reinstatement of Tooljajee on the throne of his ancestors, on the condition of his engaging to pay the tribute claimed by the nabob, together with a stipulated sum of money for the maintenance of a subsidiary British force in the fort of Tanjore. On his undertaking to comply, a treaty was concluded between the British government and the rajah in 1781, by which the latter was bound to pay annually the sum of 114,286 star pagodas, as a tribute, and 400,000 as subsidy. This was the first alliance entered into by the British with the rajah of Tanjore. On the death of Tooljajee, there were two claimants to the throne,—the one Ameer Sing, the half-brother of the deceased rajah; the other Serfojee, the son of a distant relative, who had been adopted by Tooljajee a short time before his death. The governor of Madras thereupon proceeded in person to Tanjore, and there laid the claims of the rival candidates before twelve pundits versed in Hindoo law. They unanimously gave it as their decision, that the adoption of Serfojee, to the exclusion of Ameer Sing from the throne, was at variance with that law, and that the claim of Ameer Sing was just. The British government determined to act on this decision; and in April, 1787, Ameer Sing was placed on the throne, and invested with regal authority. A treaty was concluded between him and the
British government, augmenting the tribute and subsidy, and containing provisions for securing a regular payment of the same. After a reign of twelve years, it was said to be discovered that the decision given in 1787, by the assembled pundits, was wrong; that the claims then urged by Serfojee, the adopted son of Tooljajee, were supported by the principles of Hindoo law, and consequently that Ameer Sing had no right to the throne. Thereupon, in 1798, he was deposed, and Serfojee elevated in his place. In the following year another treaty was concluded, by which Serfojee gave up the country to the permanent possession of the East-India Company, on condition of receiving annually the sum of a lac of star pagodas, or 3,50,000 rupees (which was to be considered the first charge on the net revenues of Tanjore), and a proportion of one-fifth, to be calculated on the remainder of the net revenue. The reasons for the new arrangements under this treaty, were the misgovernment of the country, the inability of the state to liquidate the enormous debts contracted by Ameer Sing, which were therefore transferred to the Company, with the territory on the security of which they were contracted. Under the treaty, the rajah had no right of interference with the revenue, or judicial administration of the country: he possessed sovereign authority only in the fort of Tanjore, though, by sufferance, it was subsequently extended to a small degree. Serfojee died in 1832, and was succeeded by his only son Sevajee, the present rajah, whose conduct has manifested little of either prudence or regularity. The extent of Tanjore was formerly greater than at present, parts of the original kingdom having been alienated from it at dates long antecedent to that at which the larger portion of the remainder was transferred to the British.

Negapatam, with Nagore, ranked among the possessions of the Portuguese, from whom they passed to the Dutch in 1660, and were held by the latter till 1781, when they were taken by the British. The transfer of Devi Cottah to the British has been already noticed. The small seaport of Tranquebar, formerly a part of the Tanjore state, and four villages adjacent to it, were purchased from the reigning rajah in the year 1616, by the Danish East-India Company, subject to the payment of an annual tribute of about 4,000 rupees. In 1624 this terri-
TANJORE.

The district of Karikal, situated between Tranquebar and Negapatam, was purchased by the French in 1739 from the rajah, and still remains in their possession free from tribute.

TANJORE, a town, the principal place of the British district of the same name, under the presidency of Madras, is situated in an extensive plain, and on the banks of a branch of the river Cauvery. It consists of two forts, the greater and the less, and several suburbs: the greater "fort, which is about four miles in circumference, is surrounded by a lofty fortified wall, and a ditch, in some parts dry, in others half full of stagnant water. The streets within this fort are irregularly built, and there are various alleys and courts in every direction, without any regard to arrangement: a wide space has, however, been left between the ramparts and the houses. The fort contains also numerous pagodas, elevated considerably above the surrounding buildings. The houses of the respectable portion of the inhabitants are substantially built of brick and chunam, and in many cases are tastefully decorated. Those of the poor are built of mud, which, from the tenacious quality of the soil, is well adapted for the purpose, and are tiled. The villages outside the fort are, with but few exceptions, built of mud, and thatched, the streets being narrow and irregular."

Adjoining is the smaller fort, a mile in circuit, very strong, with lofty walls built of large stones, a broad ditch excavated out of the solid rock, and a well-formed glacis. Within it is the great pagoda, considered to be the finest of the pyramidal temples of India. In the front is a colossal figure of a bull in black granite, regarded as being "one of the finest specimens of the arts as practised under the direction of the Brahmins."

A fine view of the pagoda and image is given by Daniell, who, however, is alleged in some particulars to have deviated from perfect accuracy. Within the old fort is the palace of the rajah, a spacious structure, inclosed by a high wall, and though of ancient date, never finished. The durbar, or "hall of audience," of the Chola family, the primitive dynasty, which preceded that at present ruling, is in good preservation: being, however, held to be unlucky, it is now never used for
the purpose for which it was destined; but, though unoccupied, it far exceeds in splendour the actual residence of the rajah. The roof, formed of vast slabs of black stone, is supported by lofty massive pillars of the same material. The musnud, or throne, is a huge mass of black granite, eighteen feet long, sixteen feet broad, and two feet thick. It is elevated three feet above the floor of the apartment.

The barracks for the small force of native infantry stationed here, are situate on an open, dry, and elevated piece of ground, a mile south-east of the fort. The population of the town of Tanjore is estimated at 80,000 persons. The inhabitants for the most part use water from wells, that from the river being so impregnated with iron as to be unfit for domestic purposes. Tanjore is a place of considerable business, having manufactures of silk, muslins, and cottons. Distance from the town of Trichinopoly, E., 30 miles; from the town of Madura, N.E., 90; from the town of Coimbatoor, E., 150; from Bangalore, S.E., 180; from the city of Madras, S.W., 180. Lat. 10° 47', long. 79° 12'.

TANK POORBEEA, in the territory of Gwalior, or possessions of the family of Scindia, in the ancient province of Malwa, a small town on the route from Goona to Mow, 137² miles S.W. of former, 48 N.E. of latter. It is situate on the south-west or left bank of the river Lukunda. There are a few shops, and supplies may be had. Lat. 23° 7', long. 76° 11'.

TANKARIA.—See TUNCARIA.

TANKTSE.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 163 miles N.E. from Chamba, and 188 miles E. from Sirinagur. Lat. 34° 2', long. 78° 19'.

TANLADY.—A town in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 20 miles E.N.E. of Moulmein. Lat. 16° 37', long. 97° 59'.

TANNAH.—A collectorate of the presidency of Bombay. Including its sub-collectorate of Colaba, it is bounded on the north by the Portuguese territory of Daman, the collectorate of Surat, and the territory of the Guicowar; on the south by the collectorate of Rutnagberry; on the east by the collectorates of Ahmednuggur and Poona, and the territory of Satara; and on the west by the Arabian Sea. It extends from N. lat. 17° 56' to 20° 20', and from E. long. 72° 42' to 73° 48';
its greatest length from north to south is 175 miles, and its greatest breadth from east to west sixty-five miles: the area comprises 5,477 square miles. ²

This collectorate is peculiarly adapted by nature for the production of grain, especially rice. The subjoined statement of the quantity of land applied to the production of the various articles grown within its limits, shows that all other cultivation is carried on only upon a very restricted scale:—

Of the land cultivated with sugarcane, about 3,200 beegas are in the island of Bassein: it is all of the common red variety. The Mauritius cane, of which some years ago cuttings were widely distributed by government, has not been found to answer. A small quantity of sugar is manufactured. The Bassein plantains, which are of excellent quality, are largely exported to Bombay, as are also those of Mahim. There is a large species called Rajela plantains, cultivated both at Bassein and Mahim, which are dried in the sun like figs, and exported to different parts. The cultivation of ginger is nearly confined to the gardens about Mahim, and would be a most profitable crop, were it not for the very expensive oilcake manure, which is deemed indispensable. The ginger is exported, chiefly to Bombay and Surat, for consumption, in the green state. The produce of the indigenous plant (Crotalaria juncea), cultivated as a substitute for hemp, is consumed in the country for the manufacture of fishermen's nets. The reduction of the assessment on land cultivated with this crop, made some time since, with the view of encouraging the cultivation, appears to have failed in producing the desired effect. This may be partly attributed to the scarcity of water in the Northern Concan.

The great Bombay and Agra road intersects this collectorate from Colsette ferry, opposite the island of Bombay, to the
TAN—TAO.

Tull Ghaut, a distance between sixty and seventy miles; as does likewise the road from the north, connecting the capital of Bombay with Surat and Baroda. The district will also be traversed by the Indian Peninsular Railway, now under construction, from the city of Bombay, in the direction of the Western Ghats: the first section, extending to the town of Tannah, was opened on the 16th April, 1853. The collectorate comprises a population of 815,849, which number, being compared with the extent of the area in square miles (5,477), shows a relative density of 149 inhabitants to the square mile.

The district in 1844 was the scene of extensive gang-robberies and daring outrages. Vigorous measures were rendered necessary for their suppression; and these being taken by the government, the country has now for some years continued in a state of order and tranquillity. Tannah, the chief town, is distant 24 miles N.E. from Bombay. Ten years ago, its population was estimated at about 9,000, but an increase has doubtless taken place since the completion to this town of the railroad from the city of Bombay. Lat. 19° 10', long. 73° 3'.

TANNOOR, in the British district of Malabar, presidency of Madras, a town and seaport at the mouth of a small river† falling into the Arabian Sea. In the year 1782, the British army, under the command of Colonel Humberstone, acting against the forces of Hyder Ali, took refuge here from a storm and rain of five days' continuance, which dispersed the boats, spoiled the provisions, and damaged the ammunition of the expedition. It was formerly a prosperous place, but is now much decayed. Distance from Calicut, S.E., 22 miles; Mangalore, 170; Bombay, 546. Lat. 10° 58', long. 75° 56'.

TANWAS, in the jaghire of Jujhur, lieutenant-governorship of the North-West Provinces, a village on the route from Hansee to Neemuch, and 98 miles S. of the former. There are a few shops here; supplies for a corps may be obtained after due notice, and there is good water from wells. Lat. 27° 62', long. 76° 16'.

TAOOBOO, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a town on the

*Tanore of Horsburgh.† No such river is, however, laid down in the trigonometrical survey.
route from Bewaree to Boolundshuhur, 20 miles E. of the former. Lat. 28° 12', long. 77°.

TAPOO.—A town in the Rajpoot state of Jodhpoor or Marwar, 40 miles N. by E. from Jodhpoor, and 80 miles S. from Beekaneer. Lat. 26° 53', long. 73° 13'.

TAPTEE.—A river rising within the Saugor and Nerbudda territory. Its source is near Mooltaee, 22 miles S.E. of the town of Baitool, in about lat. 21° 46', long. 78° 21'. It takes a circuitous but generally westerly direction of 120 miles, to the western boundary of the district, where, in lat. 21° 27', long. 76° 50', it passes into the territory of Gwalior, or the possessions of Scindia. Following a south-westerly course along the southern base of the Satpoora range, it flows by the city of Boorhaunpoor, where it has a mean width of 800 feet, and during the periodical rains acquires a great volume of water, but in winter and spring it is easily fordable, the depth seldom exceeding one foot. At that season, the alligators, with which it sometimes swarms, take refuge in the deep pools in the river channel. At the distance of about 161 miles from its source, and in lat. 21° 17', long. 76° 20', it passes from the territory of Gwalior, and forming for forty miles the boundary between the Nizam's dominions and the district of Candeisb, through which it pursues a westerly course, and subsequently flowing through the southern portion of the Guicowar's dominions and the British district of Surat, it falls into the Bay of Cambay, in lat. 21° 3', long. 72° 42', having a total length of course of 441 miles. It can scarcely be deemed a navigable stream, as at Surat, seventeen or eighteen miles above its mouth, it is fordable when the tide is out, and only small craft of about forty or fifty tons burthen can ascend so far from the sea. It is said to be navigable in the dry season for boats of light draught throughout its whole extent in Candeish. The mouth is obstructed by numerous shifting sands and a bar, through which, according to the latest accounts, there is but one channel, which at low water spring tides is so shallow as to allow the passage of only small boats; and even they frequently touch the bottom. Outside the bar is the anchorage, called Surat Roads, at no time very safe, but particularly dan-
TAR.

dangerous in April and May, when south winds prevail. Serious loss of life and property has sometimes been occasioned by the overflow of the river. In 1837, sixty-nine villages are stated to have been ruined, the majority of them being entirely swept away, 2,204 houses destroyed, 112 lives lost, and agricultural stock and property carried off to the value of 2,19,622 rupees, or 21,962l. 7

TARA, in the Rajpoot state of Jodhpoo, a village on the route from Pokhurn to Balmeer, and 29 miles N. of the latter. The road in this part of the route is good, lying over a level though barren country. Lat. 26° 8', long. 71° 12'.

TARA, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to Almora, and 30 miles N. of the former. The road is bad for wheeled carriages, and passes over a low, level country, partially cultivated. Lat. 29° 12', long. 79°.

TARA.—See CHILLAHTARA.

TARAGARH,1 in the hill state of Hindoor, a hill fort on the ridge which, rising from the left bank of the Sutlej, has a south-easterly direction until it joins the Sub-Himalaya. During the Goorkha war, in the operations preparatory to the investment of Malown, Lieutenant Lawtie succeeded, after vast toil and perseverance, in bringing battering-guns over the rugged surface; and the defences being quickly demolished, the Goorkha garrison evacuated the fort, which was found to be one of the strongest places in the country. Distant N.W. from Calcutta 1,0903 miles. Lat. 31° 10', long. 76° 50'.

TARA GHAT,1 in the British district of Mirzapoor, lieutenant-governorship of the North-West Provinces, a pass on the route from the town of Mirzapoor to Rewa, and six miles S.W. of the former. Here an excellent road, made under the superintendence of British engineers, crosses the brow of the Tara, a low range2 of sandstone hills rising above the alluvial valley of the Ganges, and forming in that direction the first or lowest buttress of the succession of plateaus constituting the elevated tract of Bhogelcund. Elevation of the crest above the sea 5103 feet. Lat. 25° 5', long. 82° 34'.

TARAGURH, in the Baree Dooab division of the Punjab, a town situated on the right bank of the Chakki river, 110
TAR.

miles N.E. by E. of the town of Lahore. Lat. 32° 25', long. 75° 59'.

TARAGURH.—See Ajmere.

TARAKOTE.—A town in the British district of Cuttack, presidency of Bengal, 42 miles N.E. by N. of Cuttack. Lat. 20° 59', long. 86° 15'.

TARAPPOOR,1 in the collectorate of Tannah, presidency of Bombay, a town situate on the south side of a small bay, and north-west of a mountain called the Peak2 of Terrapore, which is surmounted by rugged rocks, resembling at a distance a huge fortress. North-west of the town is anchorage, but not very good, the bottom being full of rocks. It was strongly fortified by the Portuguese: in 1739 it was stormed3 by the Mahrattas, who, having blown up the defences by mines, encountered a desperate resistance until nearly the whole garrison was slaughtered, the few who remained asking and receiving quarter. Distant N. from Bombay 60 miles. Lat. 19° 50', long. 72° 45'.

TARAPPOOR, in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town on the route from Meerut to Bijnour, 27 miles N.E. by E. of the former. Lat. 29° 14', long. 78° 8'.

TARAPPOOR.—A town in the British district of Sholapoor, presidency of Bombay, 27 miles W. of Sholapoor. Lat. 17° 40', long. 75° 33'.

TARECHER,1 in Bundelcund, a small town in the district of Tehree, on the route from Banda to Gwalior, 1102 miles W. of former, 94 S.E. of latter. It has a bazar, and supplies may be procured; but water, which is from a tank and wells, is rather scarce. Lat. 25° 25', long. 78° 58'.

TARGAON.—A town in the British province of Sattara, presidency of Bombay, 16 miles S.E. of Sattara. Lat. 17° 30', long. 74° 13'.

TARIWALA,1 in Sirhind, in the British district of Ferozapore, a village situate on the left bank of the Sutlej, which at this point divides itself into two channels, the main stream making a great circuit to the north-west, and sending a branch to the left, nearly west; thus insulating a space of ground about eight miles long and two wide. Tariwala is distant N.W. from Calcutta 1,1452 miles. Lat. 31° 2', long. 75° 14'.

TAR—TAT.

TARKAGHAT.—A town in the native state of Nepal, situate on the right bank of the Marachangdi river, and 71 miles W.N.W. from Khatmandoo.  Lat. 28°, long. 84° 13′.

TARLA.—A town in the British province of Sattara, presidency of Bombay, 13 miles S. of Sattara.  Lat. 17° 30′, long. 74° 1′.

TARLA.—A town in the native state of Kolapoor, 23 miles S.W. from Kolapoor, and 53 miles N.W. from Belgaum.  Lat. 16° 27′, long. 74° 4′.

TAROLI.—A town in the native state of Jhansee, territory of Bundelkund, situate on the right bank of the Betwa river, and 26 miles E.N.E. from Jhansee.  Lat. 25° 34′, long. 79° 3′.

TAROOR.—A town in the native state of Hyderabad, or dominions of the Nizam, situate on the left bank of the Godavery river, and 150 miles N.E. by E. from Hyderabad.  Lat. 18° 39′, long. 80° 20′.

TARSA, in the north-east of the Punjaub, a town in the British district of Lahoul, presidency of Bengal, 72 miles N.E. of Kangra.  Lat. 32° 43′, long. 77° 13′.

TASGAON.—A town in the British district of Belgaum, presidency of Bombay, 85 miles N. of Belgaum. This town was the chief place of a jaghire of the same name, which a short time since lapsed to the British government.  Lat. 17° 2′, long. 74° 40′.

TASSANGSEE.—A town in the native state of Bhotan, situate on the right bank of a branch of the Monas river, and 145 miles N.W. by N. from Durrung.  Lat. 27° 34′, long. 91° 17′.

TASSISUDEN.—A town with citadel in the native state of Bhotan, situate on the right bank of the Goddada river, and 127 miles N.W. from Goalpara. Tassisuden is the capital of Bhotan, and the residence of the Deb rajah.  Lat. 27° 30′, long. 89° 22′.

TATARPOOR, in the British district of Aligurh, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, and 421 miles N.E. of the former. The road in this part of the route is good, the country well wooded and cultivated.  Lat. 27° 34′, long. 78° 33′.

TATTA, in Sinde, a town formerly very famous, but now

661
much decayed, is situated about three miles west of the right or western bank of the Indus, and four miles above the point where the Buggaur or western, and the Sata or eastern, branches of the river separate. Its site is consequently close to the vertex of the delta of the Indus, the channel of which is here about a mile and a quarter wide, with a muddy stream, in the low season occupying only a third of this space. The present city is built on a slight eminence, composed of the rubbish of former buildings, in an alluvial valley at the foot of the Mukali hills. It is in consequence exceedingly unhealthy. The British troops stationed here in 1839 suffered dreadful loss from diseases, resulting from the pestilential air and bad water, which last is not only unwholesome, but fetid and offensive to the senses. The town appears to have been formerly insulated by the water of the Indus, and is still nearly so during the season of inundation: when this passes away, it leaves numerous stagnant pools which infect the air. Dr. Burnes states that it was once thirty miles in circuit, judging no doubt from the vast space in the vicinity overspread by tombs and ruins; but these are with much probability considered by Wood to be the relics of successive cities, built on various but contiguous sites, to avoid the ravages, or take advantage of the navigation, of the shifting currents of the Indus. These extensive ruins are scattered from Peer Puttah, about ten miles south of Tatta, to Sami-Nuggur, three miles north-west of it. The ruins of the great fortress of Kulancote show it to have been constructed with much labour and skill, in a massive style of building. “The vast cemetery of six square miles,” observes Kennedy, “may not contain less than a million of tombs — a rude guess; but the area would admit of four millions.” In these ruins the masonry and carving, both in brick and stone, display great taste, skill, and industry; the bricks especially are of the finest sort, nearly equalling porcelain. Kennedy observes, “The finest-chiselled stone could not surpass the sharpness of edge and angle, and accuracy of form.” Tatta, viewed at some distance from the outside, presents a very striking and picturesque appearance, as its lofty houses rise over the numerous acacias and other trees, everywhere interspersed, and which, says Kennedy, “formed altogether as fine a picture of city scenery as I remember to have seen in India.”

TATTA.

But the illusion is dissipated on entering the town, where the houses are everywhere falling into ruin, to which they are prone, being constructed for the most part of a timber framework, on the outside of which are nailed laths, which are plastered over with mud of a grey colour, so as when new to have the appearance of a solid wall of masonry. These structures are sometimes three or four stories high, and covered with flat roofs of earth. From the fragility of the materials, they can last but a short time; and this work of ruin is continually in progress in the town. All the houses are surmounted by badgeers, a sort of ventilator, built somewhat in the shape of a windsail, and conveying, even in the most sultry weather, a current of cool and refreshing air. The streets are deserted, the bazars in ruins, and everything indicates depression and poverty: the inhabitants are dirty, squalid, and of unhealthy appearance. The only building worth notice is the brick-built mosque of Shah Jehan, itself crumbling into ruins. Of the decayed manufactures of Tatta, the principal is that of loonies, a thick, rich, and variegated fabric, having a warp of silk and a woof of cotton, with (in the more costly kinds) much gold thread interwoven. The silk is imported from Persia, Kabool, and Turkestan; the cotton from Eastern India. Coarse cotton fabrics, both plain and coloured, were formerly manufactured in considerable quantity, but have lately been superseded by those of England. British woollens are greatly prized. It is said that in 1742, when Nadir Shah entered this city at the head of his army, there were 40,000 weavers, 20,000 other artisans, and 60,000 dealers in various departments. Alexander Hamilton, who visited Tatta in 1699, calls it a very large and rich city, about three miles long, and one and a half broad; and states that 80,000 persons had, within a short time previously, died of the plague, and that one-half of the city was uninhabited. This would lead us to the conclusion, that previously to that calamity the population was above 150,000.†

† Pottinger mentions that Hamilton states that the citadel of Tatta could contain 50,000 men and horses. This is indeed the number, as given in the London reprint of his work (1774), but in the original Edinburgh edition (1727), the number is stated with more probability at 5,000.
The present population is variously estimated—at below 2,000, at less than 10,000, at 12,000, 15,000, 18,000, 20,000, and 40,000. The number of artisans and traders ascertained (as mentioned above) by Wood, affords grounds for estimating the population at about 10,000. Tatta has been supposed to be the Pattala of the ancients. Pottinger states that the earliest mention he has found of it is in the ninety-second year of the Hegira, but he does not give any reference to the place of such mention: Burnes says, "the antiquity of Tatta is unquestioned;" Outram assigns its foundation to 1445, but does not cite his authority: Macmurdo states, from native authorities, that it was founded 900 of the Hegira, or A.D. 1522. In 1555 it was pillaged and burned by some Portuguese mercenaries: in A.H. 1000, it was, according to this last authority, again destroyed in the Mogul invasion by Akbar, and never completely recovered. In 1758 a British factory was established there, and withdrawn in 1775: in 1799 an abortive attempt was made to re-establish it. In the beginning of 1839, the house belonging to the factory was occupied by a British garrison. Tatta is in lat. 24° 44', long. 68°.

TAUDAMURRY.—A town in the British district of Bellary, presidency of Madras, 79 miles S.E. by E. of Bellary. Lat. 14° 33', long. 77° 57'.

TAUDAPURTEE.—A town in the British district of Bellary, presidency of Madras, 79 miles E. by S. of Bellary. Lat. 14° 54', long. 78° 5'.

TAUNDLA, in the territory of Jaboohah, in Malwa, a town near the west frontier, towards Guzerat. It is represented as a considerable place, distant 80 miles W. of Oojein, 320 S.W. of Gwalior fort, 300 N.E. of Bombay. Lat. 23°, long. 74° 32'.

TAUNGINE.—A town in the British district of Amherat, in the Tenasserim provinces, presidency of Bengal, 16 miles N. of Moulemein. Lat. 16° 42', long. 97° 41'.

TAUNSA, a river of the British district of Tannah, rises on the western face of the Western Ghats, in lat. 19° 41', long. 78° 29', and flowing westerly for fifty-eight miles, falls into the sea at lat. 19° 30', long. 72° 50'.

TAURSA.—A town in the territory of Nagpoor, 19 miles...
TAU—TAV.

E.N.E. from Nagpoor, and 57 miles S. by W. from Seuni. Lat. 21° 15', long. 79° 26'.

TAUSRAH, in the British district of Kaira, presidency of Bombay, a town on the route from Neemuch to Baroda, 38 miles N. of the latter. It has been stated to have a population of 6,000. Distance S.W. of Neemuch 156 miles, E. of Kaira 40. Lat. 22° 48', long. 73° 18'.

TAVOY.—One of the Tenasserim provinces. It is bounded on the north by Amherst; on the south by Mergui; on the east by Siam; and on the west by the Bay of Bengal: it extends between lat. 12° 44' and 14° 50'; has an average breadth of about fifty miles, and an area of about 4,920 square miles. Its general character is mountainous, intersected by valleys, through which flow numerous streams. Some of the mountains attain considerable height: the range which separates the low lands round Tavoy from the interior in some parts reaches a height of 3,000 feet: the highest range is about thirty or forty miles from the coast. Thick forest and impenetrable brushwood cover the mountains, and jungle exists over a great part of the province.

The soil is generally good, and only requires attention to make it highly productive. A strong clay exists near the banks of the river, which, skirting the hills, is in some places loamy, in others light. There are great alluvial plains round the town of Tavoy, extending south some distance, which are well adapted for rice-cultivation. This part, says Dr. Helfer, "is the less cultivated, the best peopled, and the most prosperous in the provinces." To the north of Tavoy is a large plain, consisting of loose sand, combined with a good quantity of argillaceous matter, which at no very remote period was probably covered by the sea: it would afford good pasture-land for sheep.

Rice is the staple production of the province, and the country is well calculated for its cultivation. A failure in the crops is unknown. By more care and attention than is at present given to the subject, and by converting the swamps and overgrown wilderness into paddy-lands, that commodity might be made an important article of export, and a source of revenue. The cotton-plant is cultivated, but not to any considerable extent. The same may be said of tobacco and indigo, both of
TAVOY.

which are of good quality. Yams are in great abundance, also potatoes: red pepper, ginger, oranges, limes, citrons, tamarinds, pine-apples, plantains, are good, but scantily produced: the teak, the mango, the papaya, and palms of all kinds, are found in great abundance.  

Tavoy is the most valuable of all the Tenasserim provinces in regard to mineral productions. "Of all the iron-ores," says Dr. Helfer, "that of Tavoy is the most important." It is found in many parts of the province, but the best, in point of quantity and quality, is that a short distance to the north of the town. It occurs there in two forms: "Octahedral, common magnetic iron-ore; massive, in granular concretions, crystallized, splendid, metallic, highly magnetic, with polarity." Though the existence of the ore has been long known to the Burmese, it had not been worked. The locality of these mines is unrivalled with respect to advantageous situation, being a few miles from a part of the river which is accessible to vessels of 200 tons burthen. The province is also rich in tin-ore, which is found generally in hills, or at the foot of mountains.

The wild animals which inhabit the forests of the province, are the elephant, rhinoceros, and tiger: there are also cats, wolves, bears, hogs, deer, goats, otters, squirrels, and monkeys. Tigers, though numerous, are seldom known to commit ravages on the human species, though a poor solitary woodman or traveller has been occasionally carried off by them. The wild cat commits much havoc in the poultry-yard. The domestic animals consist of a few horses, oxen, buffaloes, dogs, and cats. Snakes are common; and alligators and lizards of different species abound. There are a great variety of birds: peacocks, parrots, birds of Paradise, pheasants, snipes, partridges, vultures, crows, doves, and sparrows.

The trade is not very extensive, and what there is, exists principally between Penang, Rangoon, and Martaban. The imports are chiefly cotton and tobacco; the others consist of piece-goods, cutlery, iron bars, china-wares, gunpowder, muslins, sugar, and spices. The principal export is rice; and to this may be added edible birds-nests, tin, bees-wax, ivory, and other less-important articles.

The population in 1847, of the province and town inclusive,
TAV.

amounted to 37,354 souls; the greater part consisting of Burmese and Talains, the remainder being Siamese, Chinese, Malays, &c.

TAVOY, the principal place of the province, is situated on the eastern bank of the river of the same name, about thirty-five miles from its mouth, and though inaccessible for vessels of large burthen within some miles of the town, its course being obstructed by shoals and sandbanks, it can be reached by ships of 120 tons. It is in the midst of a rich alluvial plain, which is bounded on the west, three miles distant, and on the east at six miles, by a range of precipitous and thickly-wooded hills, varying in height from 200 to 400 feet. The valley is subject to inundations during the wet season, and rice is cultivated extensively in the vicinity of the town. Notwithstanding, however, this great moisture, which is in most other cases the frightful cause of disease, the place is considered very healthy, and is proved to be so by the few deaths which occur among the troops stationed here, as well as the natives. The shape of the town is that of an irregular square. It is surrounded on three sides by a ditch, the other facing the river: a deep nullah runs through the midst. The town consists of two parts: the inner, which is inclosed by a wall fifteen feet high; and the outer, which is surrounded by one eight feet high, and now partially in ruins. There is a good bazar, from which any description of provision may be procured at a cheap rate. The streets are open, and in good order. The population in 1847 was upwards of 10,000 souls; consisting chiefly of Chinese, Malays, Malabars, and Burmese. There is a trade carried on between this place and the ports on the Mergui Archipelago. Lat. 14° 7', long. 98° 18'.

TAVOY ISLAND extends from lat. 12° 55'—18° 15', long. 98° 23', twenty miles south of Tavoy Point. It is of moderate height, six leagues in length, and two miles in breadth: it is the most northern of the chain of islands forming the Mergui Archipelago. There is a pagoda at the south end. In the driest weather, fresh water is procurable on its eastern shore.

TAVOY RIVER has its source in some hills about lat. 14° 50', long. 98° 30', and runs in a southerly direction for a course of about 100 miles, entering the sea in lat. 13° 30', long. 98° 20'. The upper part is much interrupted, but it is
navigable for boats of large burthen fifty miles above the town of Tavoy, and at that place ships of 120 tons burthen can approach. It is here 300 yards broad, but in its further progress is swelled by so many streams that at its mouth it exceeds a mile in width. In its lower course it is studded with numerous islands, which, however much they may add to the beauty of the scenery, greatly detract from its commercial advantages, as they materially impede the navigation. There is a good harbour ten miles from the entrance, but the approach to this is rendered intricate from the above-named causes.

TAWURUGERRI.—A town in one of the recently sequestrated districts of the native state of Hyderabad, or territories of the Nizam, 17 miles S. from Moodgul. Lat. 15° 46', long. 76° 29'.

TEBBHEE, in the Baree Doob division of the Punjab, a town situated on the right bank of the Sutlej river, 131 miles S.W. by S. of the town of Lahore. Lat. 30° 6', long. 72° 55'.

TECTOVA.—A town in one of the recently sequestrated districts of the native state of Hyderabad, or dominions of the Nizam, 52 miles S.E. from Ellichpoor. Lat. 20° 36', long. 76° 4'.

TEEGOOLA.—A town in the native state of Hyderabad, or territory of the Nizam, 37 miles N.E. by N. from Hyderabad, and 152 miles N.W. from Guntoor. Lat. 17° 48', long. 78° 50'.

TEEGURM, in the territory of Nepal, on the eastern boundary of the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village on the left bank of the river Kalee, on the route from Askot to the Beans Pass, 18 miles N.E. of Askot. Lat. 29° 55', long. 80° 38'.

TEEKREE, in the British district of Delhi, a village on the route from Delhi to Hansee, and 16 miles W. of the former. The road in this part of the route is good. Lat. 28° 40', long. 77° 1'.

TEEKREE.—A town in the British district of Meerut, lieutenant-governorship of the North-West Provinces, a town situate 27 miles N.W. of the city of Meerut. Population 9,882. Lat. 29° 14', long. 77° 25'.

TEEMBA.—A town in the native state of Guzerat, or dominions of the Guicowar, situate on the left bank of the Taptee river, and 73 miles S. from Baroda. Lat. 21° 11', long. 73° 10'.
Tee.

TEENJINNA.—A town in the British district of Chota Nagpoor, presidency of Bengal, 55 miles S. of Lohadugga. Lat. 22° 40', long. 84° 46'.

TEENMOHONEE.—A town in the British district of Jessore, presidency of Bengal, 53 miles E.N.E. of Calcutta. Lat. 22° 54', long. 89° 10'.

TEERA, in the Daaman division of the Punjab, a town situated 21 miles from the right bank of the Indus, 46 miles S. by W. of the town of Peshawar. Lat. 33° 21', long. 71° 29'.

TEERAH.—A town in the native state of Cutch, situate 25 miles S.W. from the Great Western Bunn, and 50 miles W. by N. from Bhooj. Lat. 23° 21', long. 69°.

TEEREE, in Gurhwal, the principal place of that raj, and residence of its rajah. It is situate on the left bank of the Bhageerettee, as the Ganges is called in the upper part of its course, and just below the confluence of the Bhilling,* which falls into it on the left or eastern side. Webb, who visited this locality in 1808, describes Teeree as a village; and when Moorcroft passed, in 1819, it contained only the residence of the rajah, a very humble mansion, and the dwellings of his followers. The Bhilling abounds in a sort of fish called a trout by Moorcroft, which is snared in great numbers. Elevation above the sea, of the town, 2,328 feet; of the level of the Bhageerettee, below it, 2,278. Lat. 30° 23', long. 78° 31'.

TEERNEE, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the road, by Rajapoor ferry, from the cantonment of Allahabad to Banda, and 22 miles W. of the former. The road in this part of the route is bad, the country level and well cultivated. Lat. 25° 24', long. 81° 38'.

TEESGAUM.—A town in the British district of Ahmed-nuggur, presidency of Bombay, 23 miles E.N.E. of Ahmed-nuggur. Lat. 19° 11', long. 75° 6'.

TEESTA, a great river traversing part of Bengal, rises, according to the account of the Nepaulese, in Tibet, and, as it conjectured, in about lat. 27° 59', long. 88° 50'. Flowing westward for twenty miles through Tibet, and southward through Sikkim for ninety-seven miles, it then forms for ten miles the

* Called by Moorcroft the Bilangra.
boundary between Bhotan and Sikkim, and for twenty-three miles that between Bhotan and Darjeeling, passing eastward of the sanatarium of the latter place. Subsequently dividing the British district of Dinajepoor from Bhotan for ten miles, it enters Dinajepoor, and thirty miles below that point divides into two branches of nearly equal size; one, proceeding south-westerly, is denominated the Atree; the other, flowing south-easterly, continues to be called the Teesta. About five miles below the point of divarication, it passes into a projecting portion of the territory of Cooch Behar, through which it flows eight miles farther; and then passing into the district of Bungpoor, proceeds through it in a south-easterly direction for 110 miles, to its confluence with the Brahmapootra, on the right side, in lat. 25° 14', long. 89° 41'; its total length of course being 313 miles. The gorge east of Darjeeling, by which the Teesta flows from the mountains, is one of the two passes from Bengal into Sikkim, and is denominated the Sabuk Gola Pass. The river is deep enough in this gorge to be navigated upwards five or six miles. The body of water is very great, and on reaching the plain, the channel is 700 or 800 yards wide, but the navigation is difficult and precarious, from the rapids, and from numerous rocks and large stones in the bed; so that it is available only for floating timber, and for canoes, used for guiding it. However, as high up as Puhar-pore, fifteen miles above the divergence of the Attree, it is at all times navigable for craft of six or seven tons, and during the monsoon rains for those of forty or fifty tons. Though the Teesta, or south-eastern branch of this great stream, is now the larger, formerly the Attree, or south-western branch, had a much superior volume of water, and discharged the great drainage of the Snowy Mountains of Sikkim and of Bootan, as well as of the plain at their base, into various tributaries of the Ganges. For the last fifty years, however, the drainage has taken an easterly direction to the Brahmapootra, into which it is discharged principally by the channel of the Teesta.

**TEETABURHAUT.**—A town of Assam, in the British district of Seebpoor, presidency of Bengal, 40 miles S.W. of Seebpoor. Lat. 26° 36', long. 94° 10'.

**TEETLAKOT,** in the British district of Kumaon, lieutenant governorship of the North-West Provinces, a stockade.
formerly held by the troops of Nepal. It is situate two miles W. of the right bank of the Kali, on a spur of mountain running southwards from the main range of the Himalaya, on the route from Askot to the Beans Pass, 24 miles N.E. of Askot. Lat. 29° 53', long. 80° 40'.

TEETROUN, in the British district of Suhanunpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Suhanunpoor to Paneeput, 26 miles S.W. by S. of the former. Lat. 29° 40', long. 77° 23'.

TEGHOOR.—A town in the British district of Dharwar, presidency of Bombay, 13 miles W.N.W. of Dharwar. Lat. 15° 32', long. 74° 54'.

TEGRA.—A town in the British district of Mongheer, presidency of Bengal, 33 miles W. by N. of Mongheer. Lat. 25° 27', long. 86°.

TEHARA, in Sirhind, a small town on the route from Looidiana to Ferozpoor, and 29 miles W. of the former. It is situate close to the left bank of the Sutlej, and exhibits evidence of former importance, its present mud houses being built amongst numerous ruins of edifices constructed substantially of burnt brick. Native authorities mention its being inhabited so long ago as the time of Secander Shah's expedition. It, with the adjacent territory, was conquered by Runjeet Singh, who conferred it on the Allowalla chief, by whose deflection during the Lahore war it has passed into the possession of the East-India Company. Distant N.W. from Calcutta 1,133 miles. Lat. 30° 57', long. 75° 25'.

TEHER, in the Baree Dooab division of the Punjab, a town situated 10 miles from the right bank of the Sutlej, 86 miles S. of the town of Lahore. Lat. 30° 26', long. 73° 51'.

TEHREE, in Bundelcund, a town of late years generally the residence of the rajah of Oorcha, thence frequently styled the rajah of Tehree. It is on the route from Agra to Saugor, 201 miles S.E. of former, 72 N.W. of latter. Garden styles it "a large walled town," but according to Sleeman, it "is a wretched town, without one respectable dwelling-house tenanted, beyond the palace, or one merchant, or even shopkeeper, of capital and credit. There are some tolerable houses unoccupied and

* Tehari of Tassin; Tehri of Franklin; Tehree of Garden, Sleeman, De Cruz.
in ruins; and there are a few neat temples, built as tombs or cenotaphs, in and about the city." On an adjoining height is a fort. Water and supplies for troops are abundant here. Lat. 24° 42', long. 78° 52'.

TEHRWARA.—See THERWARA.

TEIMBOORNEE.—A town in the British district of Sholapoor, presidency of Bombay, 53 miles W.N.W. of Sholapoor. Lat. 18° 1', long. 75° 15'.

TEINGHA,1 in the territory of Oude, a village on the route from Lucknow cantonment to Purtabghur, 95 miles S.E. of the former, 15 N.W. of the latter. Water and supplies are abundant; the road in this part of the route is very good. Lat. 26° 7', long. 81° 45'.

TEKEAH,1 in the territory of Oude, a small town on the route, by the Nanamau Ghat or ferry, from Futtehgurh to Lucknow, 66 miles S.E. of the former, 45 W. of the latter. It has a bazaar, and is well supplied with water. The road in this part of the route is good. Lat. 26° 51', long. 80° 24'.

TEKERAPURRA.—A town in the Rajpoot state of Jeypoor, 86 miles N.E. by E. from Jeypoor, and 103 miles W. by N. from Ganjam. Lat. 19° 88', long. 83° 34'.

TEKKREE.—A town of Malwa, in the native state of Dhar, situate six miles S. of the left bank of the Nerbudda river, and 37 miles S. from Dhar. Lat. 22° 18', long. 75° 27'.

TEKMAH,1 in the British district of Azimgurb, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Azimgurh to that of Jounpoor, 21 miles S.W. of the former, and 22 N.E. of the latter. It has a small bazaar, and water is plentiful. The road in this part of the route is heavy, over an open country very partially cultivated: distant 40 miles N. of Benares. Lat. 25° 58', long. 83°.

TEK MYO0.—A town in the British district of Aracan, presidency of Bengal, 50 miles S.W. by W. of Aracan. Lat. 20° 16', long. 92° 46'.

TEK NAAF.—A town standing on a low point of land at the entrance of the Naaf river, in the British district of Aracan, presidency of Bengal, 68 miles W. by N. of Aracan. Lat. 20° 49', long. 92° 23'.

TEKRA, in the Rajpoot state of Jesulmeer, a village on the route from the town of Bekaneer to that of Jesulmeer,
TEL.

70 miles N.E. of the latter. The inhabitants are notorious for their marauding propensities, making frequent forays on their neighbours for the purposes of plunder. The road in this part of the route is indifferent, passing over grassy plains. Lat. 27° 10', long. 72° 2'.

TELIAPUR, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Moradabad to Muzafarnagar, and 16 miles W. of the former place. It is situate in an open, level country, partially cultivated, and in which supplies and water may be obtained. The road in this part of the route is sandy, and heavy for wheeled carriages. Distant N.W. from Calcutta 902 miles. Lat. 28° 54', long. 78° 36'.

TELL RIVER rises in lat. 19° 54', long. 82° 41', and flowing north-west for 130 miles, through the native states on the south-west frontier of Bengal, falls into the Mahanuddy river, in lat. 20° 55', long. 84° 9'.

TELLICHERY, in the British district of Malabar, presidency of Madras, a seaport town and British military station. Breast of the fort is a ledge of black rocks, between which and the land small craft may anchor, being in some degree sheltered from the sea; but large ships touching here, when there is a chance of unsettled weather, should anchor well out in seven or eight fathoms; for H.M.S. Superb, of seventy-four guns, was lost at Tellicherry in November, 1781. The fleet having anchored in five and five and a half fathoms, a heavy sea began to roll, which made that ship strike on the Sultan's anchor, she being moored inside the Superb." A double light is exhibited from the flagstaff all night throughout the year. For moderate-sized vessels the anchorage is one and a half or two miles off the town, with a bottom of soft mud. The site of the town is very beautiful, open to the sea on the west, and on the opposite side backed by wooded hills interspersed with valleys, and watered by a fine river. The

* According to official report, however, "the existence of a natural breakwater at Tellicherry, formed by a reef of rocks, extending about 472 yards in length, and running parallel to the shore at the distance of about 614 yards, deserves notice, there being sufficient depth of water within it for a ship of 500 or 600 tons to ride at anchor."
TELlicheRry.

neighbouring country is highly productive, the low lands producing annually two, and in some places three, crops of rice in the year. The coconut-tree also grows in great abundance and perfection, and is applied to various uses: the trunks are worked up for small boats, and frames and rafters for houses; the leaves are used for thatch, mats, and baskets; the nut affords food and oil, and in its unripe state an agreeable beverage; and the sap drawn off by incision into the trunk, on fermentation, is converted into the intoxicating beverage toddy, which when distilled yields the spirit called arrack. "The citadel or fort, in which are situated the jail and hospital, is built on a rising ground close to the sea, and about forty feet above its level. It is of an oblong shape, being 117 yards in length and thirty-four in breadth; its length runs parallel to the seashore. The whole of the north-west side of the citadel is occupied by a lofty building, the upper part of which is appropriated to the criminal court and offices, and the lower part forms the jail," which is calculated to contain 300 persons.

The climate, though very wet during the monsoon, the average annual fall of rain being from 120 to 140 inches, is found healthy. On account of its salubrity, it has been denominated the Montpelier of India. The houses of the majority of the population are of unbaked brick, and thatched; but those of a better sort are built of laterite, of which there are great quantities in the neighbouring hills. The population is estimated at 20,000, the majority of whom are Moplahs or Mussulmans; the rest Brahmins, with a few Christians. In the year 1782 it was besieged by the forces of Hyder Ali, and relieved upon the arrival of a British force under Major Abington. At that time it was a place of much importance. In the year 1790 it is described by Bartolomeo as "a city belonging to the English, where they have a considerable settlement, a council, and an arsenal. They employ this city as a military post, where they collect troops brought from Bombay, in order to keep in subjection the inhabitants of Malayala. A brisk trade is carried on at Tillicherry: pepper forms one of the

* Hamilton mentions: "In the year 1683 the presidency of Surat established a factory here for the purchase of pepper and cardamoms, and in 1708 the East-India Company obtained a grant of the fort of Tellicherry from the Colastry raja."
principal articles of commerce; the other exports consist of cardamoms, ginger, arrow-root, cinnamon, sandalwood, and other Malabar productions, which they transport to Bombay, and thence to England." Distance from Seringapatam, S.W., 95 miles; Madras, S.W., 340. Lat. 11° 45', long. 75° 33'.

TELTAREE.—A town of North-Eastern India, in the E.I.C. M. D. British district of Goalpara, presidency of Bengal, 44 miles W.S.W. of Goalpara. Lat. 25° 52', long. 90°.

TEMI.—A town in the native state of Sikhim, situate on the right bank of the Teesta river, and 18 miles N.E. from Darjeeling. Lat. 27° 14', long. 88° 30'.

TENASSERIM.—The provinces of Tenasserim, comprehending Amherst, Tavoy, Ye, and Mergui, extend along the eastern coast of the Bay of Bengal, between lat. 10° 48'—18° 25', long. 96° 35'—99° 30'. The length is about 500 miles; the breadth is very irregular, varying as the seacoast approaches the range of mountains forming the landward boundary of the territory, or recedes from it: probably it nowhere exceeds eighty miles. The area may be estimated at 30,000 square miles. The area of these provinces has been recently enlarged by the annexation of that portion of the territory acquired from the Burmese in 1852, which lies to the east of the Sitang river; and their northern frontier has thus been extended from the Salween river to the Sitang: on the east they are bounded by the Siamese range of mountains, whose height varies from 3,000 to 5,000 feet; on the south by the river Padshahan, and on the west by the sea.

The seacoast, though of great extent, presents little variety of character: it is generally bold and rocky, and in many places bordered by numerous islands. Towards the south, opposite Mergui, are a cluster, differing in size, shape, and height, bearing the name of the Mergui Archipelago. The coast is indented by numerous creeks and small streams; several rivers of some magnitude also empty themselves into the bay, affording good anchorage and harborage for ships of large burthen. With the exception of the deltas of such rivers, which furnish many acres of alluvial soil, peculiarly fit for rice-cultivation, the coast vegetation is confined in a great degree to vast forests and almost impenetrable jungle. Between Ye and Tavoy the coast consists of large tracts of swampy
TENASSERIM.

land, called Sunderbunds, where the mangrove, and other trees which thrive in brackish water, grow luxuriantly and in abundance.

The physical aspect of this territory is much diversified: it may be characterized generally as a mountainous country, but having also large plains or valleys, intersected by many fine and fertilizing rivers. The mountains are clothed from the base to the summit with thick forests and brushwood; the valleys are appropriated to the cultivation of the various productions raised within the provinces. Towards the north, the country is more level, consisting of vast alluvial plains, highly fertile, being watered by the Salween and the Sitang; further to the south, the aspect changes to that of a more elevated country. Here the mountains run in three parallel ridges, in a direction from north-north-west to south-south-east, varying in height from 3,000 to 4,500 feet, and gradually diminishing as they approach the shore, till their elevation does not exceed 500 feet. In the lower parts of the province, the interior still continues mountainous, but less elevated, and towards the shore terminates in low plains or swamps; and the only communication here is by boats, which navigate the nullahs and creeks.

The principal rivers have tides flowing a considerable distance up the country: they are all wide, and generally deep at their mouths; and though their navigation is sometimes intricate and interrupted, all can be safely traversed. They are subject to annual inundations, which render the proximate soil amazingly fertile. But besides fertilizing the soil, these rivers afford great facilities for foreign and internal trade; and the villages in the provinces being for the most part situate on their banks, the transit of merchandise from one to another is easily effected by canoes. The chief rivers are the Salween, Sitang, Attaran, and Tenasserim, which will be found described under their respective names.

Almost all the ground that is not subject to inundations is occupied by dense forests, containing gigantic and valuable timber. They occupy, it is said, two thirds of the whole extent of the province: one fifteenth only is under cultivation; and when the British first became possessed of the country, it presented a complete wilderness. Rules for the grant of

---

TENASSERIM.

uncleared lands, framed with the utmost moderation and liberality, were in due time drawn out.

The soil of Tenasserim may be described as almost universally alluvial, and that of the best description. On the deltas of rivers vast deposits are formed, which nourish a dense barrier of mangroves, as already noticed: in some localities a soil to the depth of three feet is formed by decayed vegetation. Some parts Dr. Helfer supposes at no very remote period to have been covered by the sea; and this view is supported by the fragments of limestone rocks and stones which frequently occur, and the saline matter with which the soil is impregnated.

It might be apprehended that the dense jungle or impenetrable forests with which the surface of the greater portion of the province is clothed, would form an insurmountable obstacle to the attainment of information upon its geological structure; the only means of investigation being found in the steep banks of rivers, and in the fissures created by mountain-torrents. From these sources Dr. Helfer has, however, gained valuable information, the result of great and indefatigable research, which he has communicated to the world in his valuable reports on the Tenasserim provinces.

One of the most important mineral productions is coal: the quality has been described as excellent, and the quantity considerable. The localities in which it exists, it has also been said, present advantages of transport. "Iron," says Helfer, "is found in one or the other form almost everywhere." It occurs in beds, in veins, and in rocks: it is most abundant between Ye and Tavoy, approximating the seacoast. In the territory between the Salween and Gyne rivers, it is found in sandstone hills, which vary from forty to 200 feet in height. Its quality improves towards the south, near Tavoy; and this situation would be very advantageous for works, being only four-and-twenty miles from the river, which distance might be traversed by a canal or railroad. The ore found here would, Dr. Helfer asserts, furnish from seventy-four to eighty per cent. of raw iron. Mines are nowhere at present worked; in several places, however, are to be found the remains of furnaces and pits long neglected. Next to iron, tin is the metal most generally diffused through the province. It is confined, however, in a great degree, to the southern parts. The richest

---

1852.
mines exist near the Packshan river, which forms the southern boundary of the provinces. The range of mountains in which the tin-ore is found is a continuation of the Siamese tin territory of Rinowng. The tin is found in the debris of primitive rocks, like in all other parts of Tenasserim; but the grains or crystals are much larger, and the soil in which they are buried yields eight to ten feet of tin, while at Tavoy the utmost is seven feet.” At Mergui also tin is very prevalent, the hill on which the town stands containing much ore in the form of black sand and oxide. At some remote period, it is evident that the ore has been extracted in considerable quantities, as a large extent of surface remains upturned in the localities where it exists. The Burmese method of working is very rude and unscientific. “They either dig canals, or rather small drains, intersecting the surface; or they form a perpendicular wall of ten or twelve feet high, with a drain on its basis; or they excavate pits, varying from six to forty feet in depth. The water during the monsoon washes out a considerable part of the earth from the sides: the lighter earth is carried away, and the tin, on account of its specific gravity, remains at the bottom of the drains or pits. After the monsoon, the mass remaining at the bottom is collected, and in small flat wooden vessels, turned by manual labour, washed out. The tin grains obtained by this method are pretty well cleaned from the earthy substance.”

This mode of working has, however, now become quite obsolete, and the only method at present employed is that of collecting the ore from the streams and rivulets where it exists. This operation is performed by men walking in the middle of the stream, and filling a small vessel in the shape of a basin with the sand and gravel found in the bed of the river; when, after a little time, the sand and lighter particles become separated from the tin, which sinks to the bottom of the vessel. Like the former, this mode is inartificial and clumsy: better methods would undoubtedly be rewarded by better success, for tin-ores are abundant and very rich. Gold is frequently to be met with in various parts of the province, but nowhere in any considerable quantities. When found, it is generally in the sands of rivers; but its primary source has not been discovered. It is supposed to lie on the foreign side of the mountain-chain, as it is most prevalent in the streams which flow into
Tenasserim from the eastward. An analysis of sundry particles found in the streams of the Tavoy district was considered so satisfactory as to induce the government to order an examination of the rocks in the vicinity of the auriferous streams. Copper has lately been discovered in two islands of the Mergui Archipelago, viz., Sullivan's Island and Callagkiuk; in the former in veins of quartz, in the latter in gneiss. Lead and antimony have been met with in some parts of the Amberst territory, but in very small quantities.

The only manifestation of the existence of volcanic agency appears in the numerous hot springs to be met with in many parts of the country. On the Attaran river, and near Amherst, these exist in great numbers; they are sometimes as much as fifty feet in circumference, and near their banks thirty-five feet deep. The quality of the water is that of a sulphureous mineral, tinged slightly with chalybeate.

The year is divided into the wet and dry season; the former commencing with the approach of the south-west monsoon, about June, and lasting till October, when the latter sets in. The natives on the coast divide the year into three seasons; viz., the hot, the rainy, and the cold; the first commencing in February, the second in June, and the third in October. The temperature, however, hardly varies sufficiently to justify the adoption of this division. The greatest heat prevails during the month of April, and then the thermometer is sometimes above 100°, and the weather very oppressive. Notwithstanding these provinces extend over a distance of seven degrees of latitude, there is little diversity of temperature throughout; and when a difference is perceptible, it is occasioned more from disparity in the fall of rain than any other cause. In the northern parts, the monsoon makes its appearance with great violence, and continues till the end of October or beginning of November. During the five or six following months, no rain takes place. In Mergui, on the contrary, the monsoon comes in mildly, and though it rains more at one time than at another, showers are common all the year. The climate was considered a subject of such importance, that, by order of government, a report was made to parliament concerning

* Entitled—Statistical Reports on the Sickness, Mortality, and Invaliding among Her Majesty's Troops serving in the Tenasserim Provinces,
the health and mortality of her majesty's troops serving in these provinces; and this investigation has led to the knowledge of the fact that there is less sickness and fewer deaths here, among both Europeans and sepoys, than in almost any other part of the territories of the East-India Company. This appears the more remarkable, from the prevalence of that active generator of disease, excessive moisture, caused by the abundance of marshes, jungle, and dense forests which exist in the vicinity of the most populous districts. But clear and undeniable facts are adduced in proof of the healthfulness of the provinces; and it is said that the exhalations, instead of proving pernicious consequences, tend to cool the atmosphere, and promote its salubrity. "So beneficial," says this report, "has the climate of this coast been deemed for invalids, that in November, 1826, in consequence of the favourable result of some previous experiments, the commander-in-chief gave instructions to the medical board at Madras for the establishment of a sanatorium either at Moulmein or at Amherst." The complaints that are most common and dangerous are fevers of the intermittent type, inflammation of the lungs and liver, catarrh, and dysentery. These at times prove fatal, but in the majority of cases are subdued by timely care and attention; and from a table appended to the above-mentioned report, it is shown, that during the ten years from 1827 to 1836 inclusive, out of 10,819 admissions into the hospitals at Moulmain, 305 deaths only occurred.

It has before been stated that the lands under cultivation constitute only a limited portion of the province; but the soil is found capable of yielding rich and varied productions. Rice is the most important; but its cultivation is confined in a great measure to the northern districts, where the alluvial soil is so general. The most valuable rice-grounds are found at the deltas of rivers; and these yield an increase unrivalled in any part of India. The annual inundations supersede the necessity of employing artificial means for fertilizing the soil: the crops which follow are most luxuriant; the quality excellent. Notwithstanding these advantages, and the thinness of the population, it is stated that the price is much higher than in the prepared from the records of the Army Medical Department and War Office Returns: presented to both Houses of Parliament by command of Her Majesty. London, 1841.
TENASSERIM.

neighbouring province of Arracan; this, no doubt, arising from the inconsiderable breadth of cultivation.

Cotton is grown to a small extent, but it is not indigenous, and was probably introduced from the continent of India. The plantations are generally situated on the banks of rivers; but little attention is paid to the culture, and the quality of that produced is not high: Dr. Helfer\(^1\) thinks that the Manilla plant, and also the Egyptian, might succeed better. Sugarcane, though it thrives well throughout the provinces, is cultivated to a very limited extent, being almost confined to gardens; but there is every reason to suppose, from the character of the soil and climate, that an extension of this branch of agricultural industry would amply remunerate any person undertaking it. Tobacco is in very common use among the natives; and not only men, but women and children, either smoke or chew it. Much care is bestowed upon its culture, but it is raised only for home consumption: it is also imported from Cheduba. The betel flourishes in some parts, especially about Mergui, where it is extensively produced. The plantations resemble those of hops in England: the young plants require to be placed in a rich soil, where they must be treated with much care, and be screened from the scorching rays of the sun. The planting takes place in March, April, and May; and five or six months after, the leaves may be gathered continuously for fifteen months: fifty from each vine can be collected monthly. The production of the areca-nut is confined to the southern provinces, commencing about the latitude of Tavoy, and flourishing vigorously in Mergui. The coconut is found to thrive well, especially near the seacoast, and yet its cultivation is not carried to the extent which its importance would justify; and "the natives," Dr. Helfer observes, "have a great reluctance to plant it." This reluctance may be attributed to the circumstance of its not yielding fruit for eight years after it is planted; or, perhaps, the people may suspect, that as the Burmese considered coconut-trees the property of government, the English would take the same view. It is largely imported from the Nicobar Islands. Coffee is not grown, but the soil and climate are both suited for it. The \(\text{N} N\text{u}c\text{l}e\text{a} \text{Gambir}, \text{or Terra Japouica}, \text{occurs chiefly on the banks of the Tenasserim river, where it attains the height of\text{}}\)
six feet. It is uncertain whether or not it is indigenous: the natives chew it, as well as the betel.

The fruits are the pineapple, mango, orange, shaddock, lime, citron, melon, gourd, and guava. There is also the darian, which is esteemed a great luxury even by the higher classes: its growth is confined to the southern parts; and about the fourteenth degree of latitude it exists in abundance. It has a peculiar flavour, which is at first not generally relished by Europeans; but when the taste is once acquired, the fruit is very much liked: the husk is employed by the Chinese for bleaching silk. All vegetables of a tropical climate thrive admirably.

The vast forests which cover the greater part of the provinces, and clothe the mountains from their base to their summit, contain an immensity of trees. Dr. Helfer estimates the number of trees in the province at 638,000,000. The same author says that there are no less than 377 different species, each at least attaining a diameter of seven inches. The heights are greater in proportion to the circumference than those in Europe. The wood has the character of being firm and elastic. Teak forests abound in the upper course of the Attaran river, and yield an inexhaustible supply of timber, which is exported in large quantities. On these possessions coming into the hands of the British, prompt steps were taken for rendering the forests a source of revenue; licenses to cut timber were offered, but private speculators appeared to decline engaging in the business; government thereupon led the way by an experiment upon a very small scale. As a pecuniary speculation it failed, as such matters in the hands of government usually do; but the object probably having been rather to call attention to the forests than to realize profit, it may be considered as having been to some extent successful. Private parties took up the trade, which it was clear government could not pursue beneficially; many tons of teak-wood were exported within a few years; and by 1883 shipbuilding had made some progress at Moulmein. In that year the receipts of government from the forests were 13,457 rupees; in 1845–46, they had risen to 1,07,048 rupees. The advance, however, had not been regularly progressive, but had fluctuated considerably. Great abuses, moreover, had existed; and various plans for their
suppression had been adopted with more or less of success. Numberless disputes and squabbles grew out of the attempt to enforce rules on the one hand, and the desire to evade them on the other; and even yet it cannot be said that they are at an end.

Besides the teak, there are several other forest-trees. Bamboo grows naturally, and in great profusion, the best occurring between Tavoy and Ye, in the interior, and on the slopes of the elevated ridges. The jack grows both to the north and south: it is one of the most valuable trees in the province. Every part is applied to some use: the fruit for food, the wood is excellent for furniture, the leaves wholesome for cattle; from the bark exudes a species of caoutchouc; the sawdust, when boiled, yields a yellow dye; and from the kernel oil can be extracted. The sapan-tree is also very valuable, but its growth is confined to the country east of Mergui, near the Siamese frontier: it is felled in August, and floated down the river in rafts. Sandal-wood occurs in the southern parts, and on some of the islands on the Mergui Archipelago. The wood-oil tree grows to a good size. There are other oil-yielding plants: the sesamum is the most common, which all classes use for culinary purposes. Caoutchouc is produced from many trees in the country, and ought to become a source of revenue, as the quality is good, and it exists in abundance. The camphor-plant, the gamboge, and the castoroil-plant all occur. Spices of all descriptions — cloves, cinnamon, nutmegs, peppers — grow in abundance.

From the extensive forests which abound throughout the province, and the vast tracts of land uninclosed and uncultivated, it might be expected that the number of wild animals would be large, and their variety great. Elephants are numerous, and of great size, occupying more particularly the tracts near the eastern frontier. The inhabitants but seldom hunt them, but a few gain a livelihood by catching these animals. This operation is performed by two men, mounted on a trained elephant, and carrying a spear and a lasso. The work is attended with much danger, not only from the elephant sought to be ensnared, but also from tigers, who frequently carry off the elephant-hunters while watching in the jungle. Several species of the rhinoceros exist, and these are hunted by

TENASSERIM.
TENASSERIM.

the natives for their horns, which form an article of exporation.

The manufactures of Tenasserim are of very small extent, being confined to an inferior kind of cloth, which the women weave for home supply, and to the preparation of dyes, which are obtained from the plants found in the province. Yellow dyes are procured from the sawdust of the jack-tree; red dyes are manufactured from the sapanwood, sandalwood, and others. A blue dye might be well produced from indigo, but its cultivation is neglected.

From the large extent of seacoast, and the favourable situation of the ports on rivers possessing safe and commodious harbours and commanding a good inland communication, the Tenasserim provinces present many advantages for a commercial emporium. It must, however, be the work of some time and much perseverance to establish a regular and extensive trade. Some trade is now carried on between these provinces and England, China, Madras, the Isle of France, Rangoon, Cheduba, and the Straits of Malacca; but it is very limited, and of comparative insignificance. As, however, the population increases, and the social condition of that population improves, a further taste and demand for foreign manufactures will no doubt ensue. All the ports are free, and trade is in every way unfettered. The principal imports are cotton piece-goods, cloth, spirits, and wines; iron, cutlery, sugar, opium, tobacco, cocoanuts, betel-nuts, and gunpowder. The exports are at present confined to timber, rice, ivory, edible birds-nests, buffalo-horns, and bees-wax.

At the period when the British became possessed of Tenasserim, the population, it has been said, did not exceed 30,000 souls; it has been estimated indeed as low as 10,000. More recently, these numbers have been regarded as greatly below the fact, and the people at the time of the British conquest estimated at 90,000. It is probable that all these estimates err, though the more liberal may be regarded as being nearer the truth; but however that may be, the numbers certainly increased under the occupation of the British, and in 1839 exceeded 112,000. In 1847 the population was given at 150,415; and by the latest returns it appears to be 191,476. The people who were the first inhabitants has not been clearly

8 Friend of India, 1854, p. 239.
ascertained. The Taliens, according to a recent authority, now form the larger portion of the population. This, however, seems open to doubt. Another portion, sometimes supposed to be the original occupants of the country, are called Kareans. "To judge from the Kareans inhabiting the interior," says Mr. Helfer, "who seem to have outlived all revolutions of the successive conquests, and following analogy, whatever inhabitants there were, they seem to have belonged to Mongolic races. Burmah, as well as Siam and Cambogia, seem to have been originally peopled from the north; and it is very improbable that the inhabitants of Tenasserim were ever mixed with Malay blood. The comparatively late arrival of that race from Menamcaboo, in Sumatra, in the Malay peninsula, in the districts of Jabor, Malacca, and Queda, where they formed colonies, is now almost universally adopted as a fact approaching to certainty; and if so, they had no time to disperse themselves towards the north." The province has undergone many changes with regard to its inhabitants, each conqueror being followed by new settlers. All the villages are built either on the seashore or on the banks of rivers. There is a headman to each, whose duty it is to collect the revenue, to superintend the police force, and to decide all petty disputes. The language adopted in the courts of law, and in all public transactions, is the Burmese; but that of the Talian inhabitants (sometimes said to form a majority) is their own vernacular tongue, and which is very different from the language of Burmah.

The natives have the character of being robust and healthy, but they unfortunately destroy their good appearances by tattooing, a custom which, however, it is hoped civilization is now eradicating. The legs, hips, and arms, are all subjected to the tattooing instrument; and the principal colours employed are lamp-black and vermilion: the devices burnt in the skin consist of birds, pagodas, and fabulous animals. They further disfigure their persons by wearing large plugs in the lower part of the ear. Like all people of colour, they are very fond of finery; but, contrary to the taste of the Hindoos, they have a greater predilection for dresses than ornaments or jewellery. They live on rice, vegetables, fruits, and leaves, seasoned with curries; but the first-mentioned is the principal source of nourishment: they do not scruple, when opportunity offers, to
TENASSERIM.

eat fish and the flesh of animals. In character and disposition these people are represented as different from and superior to the majority of East Indians. They are said to be quiet and conciliatory, very hospitable, respectful without being servile to their superiors, grateful for benefits conferred, and attached to their friends, cheerful, good-humoured, and honest. They are credulous and superstitious. The chief pursuits of the people are hunting and husbandry: the women weave a species of cloth, and assist in beating out the rice, by means of mills, for daily use. Both men and women are fond of music and dancing; and a species of stage performance somewhat resembling the earlier attempts of Europe in the drama, is highly popular. Athletic games and amusements are also practised; as football, wrestling, pugilistic encounters, and boat-races. In the month of April, which is the commencement of the year by their computations, there are great festivities and rejoicings. The most popular amusement consists in throwing water from vessels over each other. Marriage is considered quite a civil contract, and can be annulled without much difficulty: the ceremony observed is that employed by the Burmese. The parents of a youth desirous of forming an alliance employ friends to gain the consent of the girl's relations, who then fix upon the time, and the parties are allowed to see each other. On the day of the ceremony, the bridegroom goes to the house of his intended with his relations and friends, and takes his seat on the right of the party there assembled, the bride being on the left. The ceremony is then performed, which is thus described by Captain Low:—"The elder now gives the bride a nosegay, and makes her repeat some Bali sentences, first directed to her father, again to her mother, next to the parents of the bridegroom, and lastly to her husband. The bridegroom goes through the same ceremony, beginning with his parents and relatives, but does not address the bride. The elder then takes the flower from the bride and places it on the wall of the house; she takes a little rolled-up betel-leaf and presents it to the bridegroom, who exchanges the flower for it. They then both sit on one mat, the bridegroom on the right; a feast ensues, and they finish the ceremonies by eating out of the same dish." A newly-married couple do not proceed to the husband's house, but remain for a period of from one to three
TENASSERIM.

years in that of the father and mother of the bride. The results are said to be protective of the rights of the wife, but rather unfavourable to the authority of the husband. The dead are generally burned, with the exception of persons under seventeen years of age, who are buried. It is the custom, if a woman die in childbirth, to burn the body on the bank of a river. The obsequies of a phoongee or priest are attended with much display: the corpse, clothed in finery and placed upon a richly-ornamented coffin, is laid on the pile, which is fired by rockets, and utterly consumed.

The Bhuddhist religion is the faith universally held by the Burmese and by the Talians, but they are not such faithful or rigid observers of its precepts as the Peguans and Siamese. The priests are numerous; they live generally in monasteries, and employ a portion of their time in teaching the children to read and write. The Kareans have no prescribed form of worship: they entertain a faint idea of the existence of one supreme being, but do not seem to have any notion of a future state. They are said to have some traditions of the creation of man, his fall, the deluge, the subsequent peopling of the earth, and the growth of idolatry amongst its inhabitants, which appear to have a Mosaic origin. They have a strong dread of a set of supernatural beings somewhat resembling fairies, a belief in whose existence and powers extends also to other classes. The habits of this race are said to be extremely filthy, and they have an almost superstitious aversion to the use of water for the purpose of ablution. Another tribe, called Toungthooes, are found in Amherst: they differ in many respects from all the other classes of inhabitants; but little appears to be known of them, except that they are the best cultivators in the province. The attempts made to introduce Christianity have not been altogether without success. A great difficulty existed from the indifference of the natives on the subject of religion generally; but the American Baptist Missionary Society have built churches and established stations throughout the province, through which they have been able to effect considerable improvement in the moral condition of the people.

The courts of justice, which, during the sway of the Burmese, were open to corruption and bribery, and tended more to the...
perversion than the administration of justice, are now under
the jurisdiction of officers appointed by the government of
Bengal, who are under the control and superintendence in
civil cases of the court of Sudder Dewanny Adawlut, and in
criminal cases of the court of Nizamut Adawlut. These
functionaries consist of a commissioner, two assistant-commis-
sioners, and some other officers.

The history of Tenasserim till the commencement of the
eighteenth century is involved in obscurity. The country
appears always to have been in a state of disorder and agitation,
and subject to frequent changes in its possessors; at one time
belonging to the Siamese, at another subject to Pegu, and at
another to the Burmese. In the year 1760, the last-mentioned
nation gained a firm, and, comparatively speaking, lasting
possession, retaining it under their harsh and imperious yoke
until the termination of hostilities with the British, when, by
the treaty of Yandaboo, it was ceded to the last-named power.

When first occupied, the province presented a truly deplorable
aspect. The inhabitants were few; it yielded no revenue, and
in every respect offered nothing but discouragement. Its
rapid growth to its present improved condition, therefore, is in
the highest degree satisfactory, and calculated to awaken the
deepest interest for its future welfare. The fact, however, is
unquestionable, that there is still great room for improvement.
The advantages which these provinces enjoy over many others
of the British possessions in the East are manifold. Nature,
with overflowing bounty, has bestowed on the land vast and
varied powers of production; the rice-fields yield an increase
unrivalled in India; the rivers, besides fertilizing the soil by
the periodical inundations, and offering great advantages for
commerce, afford large supplies of fish, which furnish an
article of food for the inhabitants: the climate is salubrious.
The vast amount of physical capabilities, then, are manifest;
but with all these advantages the population is so scanty, that
it is clear, for the proper development of these resources, an
increase is necessary. It is also requisite that such increase
should comprise men of vigour and enterprise, possessed of
capital, and able to command labour. The greater part of the
land is in the hands of government; and from the progress
which has already been made, it may be anticipated, that by
its judicious efforts,1 the country may be brought to the condition which it evidently is capable of attaining.

TENASSERIM TOWN.—Formerly the capital of the province so called, but now a place of no importance, containing only 100 houses and 400 inhabitants. It is situate on the river of the same name, at the confluence of the Little Tenasserim. The river is navigable up to the town for vessels of 120 tons burthen. The town was once surrounded by a brick wall, which is now so much in ruins that its remains can be traced only at intervals; it also had two or three pagodas. It is about forty miles from the town of Mergui by the river, and in lat. 12° 6', long. 99° 5'.

TENASSERIM RIVER.—The most considerable and important river in the province so called. Its source is supposed to lie in the mountains to the north-east of Tavoy, between the fourteenth and fifteenth degree of latitude. For some distance it has a course due south: it here bears the name of the Kamaun-Khiaung river. Upon arriving at the village of Metamio, in lat. 14° 18', it is joined by the Baing-Khiaung, and the united streams are called the Tenasserim River, which then takes a south-easterly direction, but turns afterwards to the south again, till it reaches the old town of Tenasserim, where it receives the Little Tenasserim. From this it takes a north-westerly direction, and empties itself into the sea by two mouths, which form an island, on which the town of Mergui is situated. The upper part of its course is through a wild and uncultivated tract, sometimes between high and perpendicular banks, at others through a low and barren country. It afterwards opens upon extensive alluvial plains, which are in some places highly cultivated. On many parts of its banks exist forests of fine teak, and the valuable sapan-wood; and some districts have been found to contain minerals and coal. It receives many feeders, but they are generally insignificant, with the exception of the Little Tenasserim, the Baing-Khiaung, and Kamaun-Khiaung. There are few villages on its banks, and none of the slightest importance but Metamio and Tenasserim.

TENDUKHERI,1 in the British district of Saugor and Nerbudda, a town situate at the base of a remarkable conical2 hill of trap, the summit of which was once crowned by a

---

1 Bengal Revenue Disp. 5 April, 1854.
cluster of greyish-green basaltic columns, which now lie overthrown about the base, shattered probably by the shock of an earthquake. Close to this place are rich mines of iron-ore, which are worked to considerable extent, and furnished the metal of which a suspension-bridge 200 feet span was constructed at Saugor cantonment. In the vicinity is an extensive forest, in which lions have been recently killed. Distant S. from Saugor 50 miles, N. from Nagpoor 108. Elevation above the sea 1,338 feet. Lat. 23° 10', long. 78° 58'.

TENDWARRA, in the British district of Banda, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Banda to Rewah, four miles S. of the former. Lat. 25° 25', long. 80° 25'.

TENGA PANEE, a river of Upper Assam, rises in lat. 27° 38', long. 96° 20', and flowing westerly for forty-five miles through the district of Sudiya, falls into the Brahmaputra river, in lat. 27° 46', long. 95° 49'.

TENERICOTTA.—A town in the British district of Salem, presidency of Madras, 29 miles N.E. by N. of Salem. Lat. 12° 1', long. 78° 20'.

TEPEILN.—A town in the British district of Amherst, in the Tenasserim provinces, presidency of Bengal, 42 miles N. of Moulmein. Lat. 17° 6', long. 97° 40'.

TERDUL.—A town in the Southern Mahratta jaghire of Sanglee, situate on the right bank of the Kistnah river, and 59 miles N.E. from Belgaum. Lat. 16° 30', long. 75° 9'.

TEREBEN TAREN, in the Baree Dooab division of the Punjab, a town situated 25 miles from the right bank of the Beas river, 35 miles E. by S. of the town of Lahore. Lat. 31° 28', long. 74° 57'.

TEREPUNYTHORAY.—A town in the native state of Travancore, presidency of Madras, 110 miles N.N.W. from Trivandrum, and 84 miles S.W. by S. from Coimbatoor. Lat. 9° 50', long. 76° 25'.

TERHA, in the district of Bainswara, kingdom of Oude, a town five miles N.E. of the left bank of the Ganges, 40 S.W. of Lucknow. Butter estimates the population at 6,000, including 100 Mussulmans. Lat. 26° 24', long. 80° 35'.

TERHA, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a village on the route
from the city of Agra to that of Gwalior, and 122 miles S. of the former. It has a bazar, water is abundant from wells, and supplies may be obtained from the surrounding country. The road in this part of the route is in general very good, though in some places sandy and heavy; the country level and well cultivated. Lat. 27°, long. 78° 1'.

TERIKOT.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 47 miles E.S.E. from Jamoo, and 44 miles N.W. by W. from Kangra. Lat. 32° 26', long. 75° 43'.

TERRAON.—See TIROWAN.

TERRUVUMPET.—A town in the British district of Madura, presidency of Madras, 47 miles E. by S. of Madura. Lat. 9° 51', long. 78° 51'.

TESSUNAH.—See TISSOOA.

TETOWLEE, in the British district of Muzuffnurugur, lieutenant-governorship of the North-West Provinces, a village on the route from Kurnaul to Meerut; and 25 miles S.E. of the former. The road in this part of the route is good; the country open, and rather well cultivated. Lat. 29° 28', long. 77° 20'.

TEWAREEPOOR,1 in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to Futtehpoor, and 182 miles S.E. of the former. The road in this part of the route is indifferent; the country level, and partially cultivated. Lat. 26° 15', long. 80° 34'.

TEWREE, in the Rajpoot state of Jodhpoor, a small town on the route from Pokhurn to the town of Jodhpoor, and 24 miles N.W. of the latter. The road in this part of the route is very good. Lat. 26° 33', long. 73°.

TEZGONG.—A town in the British district of Dacca, presidency of Bengal, five miles N.N.W. of Dacca. Lat. 23° 46', long. 90° 23'.

TEZPORE.—A town of Assam, in the British district of Durrung, presidency of Bengal, 46 miles E. by N. of Durrung. Lat. 26° 35', long. 92° 45'.

THADGAON.—A town in the territory of Nagpoor, 41 miles S. from Nagpoor, and 118 miles E.S.E. from Ellichpoor. Lat. 20° 35', long. 79° 16'.

2 y 2 691
THADZENG.—A pass through the range of mountains separating the district of Aracan from the province of Pegu, 16 miles W.S.W. of Bassein. Lat. 16° 38', long. 94° 38'.

THAIMAH, in the British district of Seuni, territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Seuni to Ramghur, 51 miles E.N.E. of the former. Lat. 22° 20', long. 80° 22'.

THAIR.—A town in one of the recently sequestrated districts of the native state of Hyderabad, or dominions of the Nizam, 50 miles N.E. from Sholapoor. Lat. 18° 20', long. 76° 18'.

THAIRNA.—A river of Hyderabad, rising in lat. 18° 29', long. 75° 54', and flowing easterly for 100 miles, falls into the Manjera river, in lat. 18° 4', long. 77° 2'.

THAKIL,¹ in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a mountain in the bifurcation formed by the rivers Kalee and Surjoo, and about five miles N.W. of their confluence. Its summit consists of bluish-black slate rock,² in some places fissile, in others compact, and cropping out from beneath limestone, with which the acclivities are covered. Elevation above the sea 8,221 feet.¹

THAKOOR.—A town of Assam, in the British district of Durrung, presidency of Bengal, 62 miles E.N.E. of Durrung. Lat. 26° 44', long. 92° 59'.

THAKOORDWARA.—A town in the British district of Moradabad, lieutenant-governorship of the North-West Provinces. Lat. 29° 12', long. 78° 55'.

THALNEIR.—A town with fort in the British district of Candeish, presidency of Bombay, 64 miles N.E. by N. of Malligaum. The place was ceded to the British by Holcar in 1818, under the treaty of Mundisore; but resistance being offered by the killedar upon receiving a summons for its surrender, the fort was taken by storm by a force under Sir Thomas Hislop.² Lat. 21° 15', long. 75° 6'.

THALO0.—A pass through the range of mountains which

¹ For 1819—On Height of the Himalaya Mountains, 57.

* Webb, in his survey of Kumaon, in As. Res. xiii. 306, lays it down by the name of Thacil Peak, in long. 80° 2', and with an elevation of 8,148 feet. The misstatement of longitude may be a typographical error, but is copied in a table inserted in Brande's Journal¹ by Colebrooke.
THA.

separate the Aracan and Pegu districts, 48 miles S.S.W. from Prome. Lat. 18° 6', long. 94° 50'.

THALWAN, in the Julinder Doab, a village on the right bank of the Sutlej, which is here crossed by a ferry affording a much-frequented communication from Sirhind with the Punjab. It is distant 21 miles W. from Loodiana, and 1,119 N.W. from Calcutta. Lat. 31°, long. 75° 33'.

THAMBA, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route, by Rajapoor ferry, from the cantonment of Allahabad to Banda, and 292 miles W. of the former. The road in this part of the route is good, the country well cultivated. Lat. 25° 26', long. 81° 30'.

THAMEIN.—A town of Burmah, situate on the left bank of the Irawady river, and 196 miles N. by E. from Ava. Lat. 24° 38', long. 96° 53'.

THAN.—A town of Burmah, situate on the left bank of the Irawady river, and 33 miles N. from Ava. Lat. 22° 20', long. 96° 4'.

THANA, in the state of Boondee, in Rajpootana, a village on the route from Nussarabad to Boondee, 742 miles S.E. of former, 18 N.W. of latter. Here is the fortress of the feudatory of the place, a small but strong structure of masonry, on the crest of a low hill. Lat. 25° 34', long. 75° 29'.

THANA BAOHAN, in the British district of Suharunpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Suharunpoor to Delhi, 28 miles S.S.W. of the former. Lat. 29° 35', long. 77° 30'.

THANA CHOWKEE, a police-station in the British district of Shahabad, presidency of Bengal, 31 miles S.S.W. of Sasseram. Lat. 24° 33', long. 83° 50'.

THANAPOOR, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Etawa to that of Cawnpore, and 382 miles W. of the latter. The road in this part of the route is indifferent, the country cultivated. Lat. 26° 21', long. 79° 53'.

THAN-MAU.—A pass through the range of mountains separating the district of Aracan and the province of Pegu, 37 miles S.W. by S. of Bassein. Lat. 16° 20', long. 94° 30'.
THANNESUR.—See Thunnesur.

THANOT, in the Rajpoot state of Jesulmeer, a small town in the desert, 54 miles N.E. of the city of Jesulmeer. Lat. 27° 41', long. 70° 41'.

THARET KONG.—A town of Burmah, 48 miles S.E. from the left bank of the Irawady river, and 26 miles E.S.E. from Ava. Lat. 21° 46', long. 96° 24'.

THAUT, in the Rajpoot state of Jodhpour, a village on the route from Nusserabad to Bekaneer, and 41 miles N.W. of former. It contains twenty houses and ten wells. The road in this part of the route is sandy, lying over a bleak, barren country. Lat. 20° 34', long. 74° 22'.

THEE BO.—A town of Burmah, 88 miles E. from the left bank of the Irawady river, and 94 miles E.N.E. from Ava. Lat. 22° 20', long. 97° 26'.

THEKA VULLIOR.—A town in the British district of Tinnevelly, presidency of Madras, 25 miles S. by W. of Tinnevelly. Lat. 8° 22', long. 77° 40'.

THELLAB.—A town in the British district of North Arcot, presidency of Madras, 70 miles S.W. of Madras. Lat. 12° 24', long. 79° 36'.

THENKAUSHEE.—A town in the British district of Tinnevelly, presidency of Madras, 30 miles N.W. by W. of Tinnevelly. Lat. 8° 58', long. 77° 22'.

THEOG.1—A small fort on the route from Simla to Kotgurh, and by the winding mountain road 14 miles E. of the former post. During the occupation of the country by the Goorkas, this post was held by one of their garrisons.2 It gives name to a small thakoorai or lordship tributary to the state of Koenthal, containing eight pargonnahs, and having a population estimated at 3,5003 persons. Elevation above the sea 8,0184 feet. Lat. 31° 6', long. 77° 26'.

THERAI, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a town 10 miles S. of the city of Agra. Lat. 27° 3', long. 78° 7'.

THERWARRA.—A small district inhabited by Coolies, on the north-western part of the province of Guzerat. It is bounded on the north by Deodur; on the south by Bahdunpore; on the east by Kankrej; and on the west by Baubier. It is about ten miles long and eight broad; the country is flat and generally
open, but with patches of low jungle: the population is about 800. Therwarra pays no tribute to any state, but looks for protection to the British, with which government its connection commenced in 1819, upon occasion of the expulsion of the bands of plunderers from Guzerat. A subsequent agreement was entered into in 1826. The policy observed towards it is that of non-interference with its internal affairs, but the maintenance of control in its external relations. The town of Therwarra is in lat. 24° 3', long. 71° 38'.

THINDO0A.—A town in the native state of Oude, situate on the right bank of the Chowka river, and 87 miles N. by W. from Lucknow. Lat. 28° 6', long. 80° 50'.

THOBA.—A town in the Rajpoot state of Jodhpour or Marwar, 30 miles N. from Jodhpur, and 100 miles W. by N. from Ajmeer. Lat. 26° 44', long. 73° 10'.

THOBAL.—A town of Eastern India, in the native state of Muneepoor, 13 miles S.S.E. from Muneepoor, and 81 miles E. by S. from Silchar. Lat. 24° 39', long. 94° 7'.

THOBAON.—A town in the territory of Nagpoor, 106 miles S. by E. from Nagpoor, and 176 miles N. by W. from Hyderabad. Lat. 19° 41', long. 79° 34'.

THONGHOO.—A town of Eastern India, in the British district of Aracan, presidency of Bengal, 139 miles S.S.E. of Aracan. Lat. 18° 55', long. 94° 18'.

THOOMBIEOLKHOOLEL.—A town of Eastern India, in the native state of Muneepoor, 22 miles N. from Muneepoor, and 81 miles W.S.W. from Silchar. Lat. 25° 9', long. 94° 4'.

THOREE.—A town in the native state of Nepal, 47 miles S.W. by W. from Khatmandoo, and 40 miles N. from Bettiah. Lat. 27° 20', long. 84° 40'.

THORLA.—A town in the British district of Tipperah, presidency of Bengal, 18 miles N.W. of Tipperah. Lat. 23° 40', long. 90° 59'.

THOUNG YIN MYIT.—A river rising in lat. 16° 10', long. 99° 9', and flowing north-west for 160 miles, separates the British district of Amherst from the native state of Siam, and falls into the Thaluayn Myeet river in lat. 17° 35', long. 97° 43'.

THOUREE.—A town in the native state of Oude, situate on the right bank of the Goomtee river, and 60 miles E.S.E. from Lucknow. Lat. 26° 28', long. 81° 50'.
THREE PAGODAS, in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 92 miles S.E. by E. of Amherst. Lat. 15° 20', long. 98° 48'.

THULASEEREE.—A town in the British district of Tanannah, presidency of Bombay, 79 miles N. of Bombay. Lat. 20° 4', long. 73°.

THULENDI,1 in the district of Bainswara, territory of Oude, a small town on the route from Allahabad to Lucknow, 86 miles N.W. of the former, 42 S. of the latter. It has a bazar, supplies and water may be obtained in abundance, and the road is good to the south-east, or towards Allahabad, though indifferent to the north-west, or in the direction of Oude. Lat. 26° 25', long. 81° 1'.

THULLEE.—A town in the Rajpoot state of Jeypoor, 24 miles S. from Jeypoor, and 79 miles E. from Ajmeer. Lat. 26° 35', long. 75° 57'.

THUNDOO BHAWANI,1 in Sirmor, a summit of the Sain range, and near its south-eastern extremity. It is crowned by a small Hindoo temple, which was a secondary station in the great trigonometrical survey of the Himalaya. Elevation above the sea 5,700 feet.2 Lat. 30° 40', long. 77° 26'.

THUNNESIR,1* in Sirhind, a town on the route from Kurnal to Loodiana, and 23 miles N. of the former place. It is situated on the left bank of the Sursooty, in a level, fertile, well-cultivated country,2† abounding in groves of mango-trees. The site is a great irregular mound,3 formed of the ruins of the former city, over which, amidst crumbling walls, are scattered the present habitations. Most of these are wretched huts; but the natives in easy circumstances have hansome houses, on the walls of which are depicted, in gaudy colours and of large dimensions, the grotesque figures of their monstrous idols. The place is surrounded by a ruinous wall, formerly of considerable height: connected with it is a dilapidated fort with numerous towers; there is also a large tank, and a temple of Mahadeo. Outside the town is a ruinous Mussulman tomb, of considerable height and octagonal form, having a turret at

---

1 E.I.C. Ms. Doc.
2 Garden, Tables of Routes, 27.
each angle, and being surmounted by a large and very elegant cupola of white marble. Its appearance is rendered more striking by its picturesque situation amidst palm-trees, embosomed in a thick mango-grove. Notwithstanding the ruinous state of the buildings, the environs are represented as very pleasing. "We had our tents pitched," says Lloyd, to the north of the town, upon a green turf shaded by lofty trees. It was a delightful spot, and the tanks, mausoleums, and ruins formed a beautiful picture before us." At a short distance from the town is the lake of Khoorket, famous and revered among the Hindus on account of a great battle, which, according to the Mahabarat, was fought on its banks in the mythological period of the Hindoo records. This lake is thus described by Lloyd:—"As well as I can judge, it is about one mile in length, and half a mile in width. In the centre is an island 235 paces in breadth, connected with the shore on each side by two ancient bridges 235 paces in length each, which, I was informed, are during the rainy season covered with the water of the flooded lake. There is a third bridge also, which leads to the island, said to have been built by Aurungzebe; but it is now useless and broken. There are no temples here, but at the most hallowed spots flights of steps run down to the water's edge, for the convenience of those desirous of performing the usual ablutions." The district of which Thunnesir is the chief town, contained ninety-nine and a half villages, and was estimated to have an annual revenue of 7,600l. sterling. A moiety of the territory escheated to the British government in consequence of the failure of heirs in 1833 and in 1851, and the remaining portions have been confiscated, in consequence of the failure of the chiefs in their allegiance.

In 1011, Mahmood of Ghuznee crossed the Indus, with the avowed intention of destroying Thunnesir, though his ally, the rajah of Lahore, offered, in case the town were spared, that

---

* According to the Ayeen Akbery, in its vicinity is a lake called Koorkhet, to which people come from far to pay their adoration, and to bestow charity. This was the scene selected for the war of the Mahabarat, which is alleged to have been carried on in the latter end of the Duaper Jowg.

† In Sirhind it was not uncommon for towns and villages to be divided among several sirdars, and subject to distinct jurisdictions.
the amount of its revenues should annually be paid to the invader, in addition to all the expenses of the expedition, besides fifty elephants and a large amount of jewels.\(^9\) Regardless of the intercession and the proffered gifts, Mahmood continued his march, and took and sacked Thunnesir, and, destroying the idols, sent the fragments of Jugsoma, the principal one, to Ghuznee, to be there trodden under foot. Ferishta\(^1\) relates that on this occasion "the Mahomedan army brought to Ghuznee 200,000 captives and much wealth; so that the capital appeared like an Indian city, no soldier of the camp being without wealth or without many slaves." Thunnesir is distant N.W. from Calcutta 988 miles.\(^2\) Lat. 29° 58', long. 76° 54'.

THURORA.—A town in the territory of Nagpoor, 58 miles E.N.E. from Nagpoor, and 46 miles S.E. by S. from Seeni. Lat. 21° 27', long. 80°.

THUROWLEE, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to Khachi, 42 miles N.N.W. of the former. Lat. 27° 14', long. 88° 9'.

THURRAUD.—A petty independent state on the north-western frontier of Guzerat, bordering on the Bunn, north of the river Bunnas. It extends from north to south about thirty-five miles, and from east to west about twenty-five, and has an area of 600 square miles. It is bounded on the north by the Marwar district of Sachore; on the south by that of Baubier and that of Therwarra; on the east by Pahlunpore; and on the west by the petty state of Wow. Thurraud pays no tribute.\(^1\) The territory appears to have been badly administered, and at the request of its chief it has been taken under British management. The chief town is in lat. 24° 23', long. 71° 30'.

THUTHIA, in the Sinde Sagur Doob division of the Punjab, a town situated 18 miles S.E. from the left bank of the Indus river, 52 miles S.E. of the town of Peshawar. Lat. 33° 34', long. 72° 23'.

THUTTEE,\(^1\) in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town near the southern frontier towards Cawnpore, and on the right bank of the river Esun, a short distance to the left\(^2\) of the route.
from Etawa to Lucknow, by Nanamow Ghat. Lat. 26° 55',
long. 79° 58'.

THYLOOSA.—A town in the British district of Northern
Cachar, presidency of Bengal, 60 miles E. of Jynteahpore.
Lat. 25° 11', long. 93°.

TICACOTAY.—See Aikota.

TIAOUR.—A town in the British district of South Arcot,
presidency of Madras, 46 miles W. of Cuddalore. Lat. 11° 43',
long. 79° 8'.

TIBEE, in the Daman division of the Punjab, a town situated
11 miles from the right bank of the Indus, 77 miles N.W. of
the town of Mooltan. Lat. 30° 57', long. 70° 39'.

TIBEE, in the British district of the Bhuttiana, lieutenant-
governorship of the North-West Provinces, a village on the
route from Hansee to Bhutnair, and nine miles E. of the
latter. It is a poor place, being scantily supplied even with
water. Lat. 29° 33', long. 74° 32'.

TIDONG,1 in Bussahir, a river, or rather large torrent, of
Koonawur, rises on the south-east frontier, towards Gurwhal,
and about lat. 31° 23', long. 78° 42', and holding a north-
westerly course along the north-eastern base of the huge
Ruldung range, falls into the Sutlej in lat. 31° 35', long.
78° 29'. The valley, or rather ravine down which it flows, is a
singular scene of savage grandeur, being inclosed generally by
mountains of slate, of a vast height, bare, and of shattered
outlines. A fearful pathway proceeds along the course of the
river. "In some2 parts of the road there were flights of steps,
in others framework of rude staircases, opening to a gulf below,
and embracing ruin from above. In one place is a construction
still more dreadful to behold; it is called a rapeea, and is made
with great difficulty and danger. I never saw anything of the kind
to such an extent. It consisted of six posts, driven horizontally
into the clefts of the rocks, about twenty feet distant from each
other, and secured by wedges: upon this giddy groundwork a
staircase of fir spars was formed, of the rudest nature; twigs
and slabs of stone connected them together, just as in the
sangas. There was no bar or support of any kind on the pre-
cipice side, which was deep and perpendicular to the Tidong, a
perfect torrent." For six or seven miles the fall of the stream
is 300 feet a mile, and in some places nearly double, where it
TIE—TIJ.

displays an entire sheet of foam and spray, thrown up and showered upon the inclosing rocks with loud concussions, echoed from one side to the other with a noise like thunder.

TIERRO, in the Sinde Sagur Dooab division of the Punjab, a town situated nine miles from the left bank of the Indus, 69 miles S.W. by S. of the town of Mooltan. Lat. 29° 20', long. 70° 53'.

TIGGAREAH, or TIGGREA.—One of the Cuttack Mehal's, on the south-west frontier of Bengal: it pays a tribute of 826 rupees to the British government, and the rajah maintains a force of 300 cavalry and infantry. Its centre is in lat. 20° 30', long. 85° 25'.

TIGHURA,¹ in the district of Punna, in Bundelcund, a village on the route from Allahabad to Saugor, 225³ miles S.W. of former, 88 N.E. of the latter. It is situate on the river Cane, here crossed "by a rocky ford, bed 160 yards wide, stream thirty, and two and a half feet deep; banks steep." Elevation above the sea 1,093³ feet. Lat. 24° 17', long. 80° 1'.

TIGREE LUTTERA, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Meerut to that of Moradabad, and 34 miles S.E. of the former place. It is situate near the left bank of the Ganges, in an open and partially cultivated country. The road is in general bad, and in some places liable to be overflowed during the rainy season. Distant N.W. from Calcutta 888 miles. Lat. 28° 50', long. 78° 14'.

TIHANAGANJ, in the British district of Azimgurh, lieutenant-governorship of the North-West Provinces, a small town on the route from the town of Azimgurh to that of Ghazeepoor, 10 miles S.E. of the former, 34 N.W. of the latter, 50 N.E. of Benares. Lat. 25° 57', long. 83° 14'.

TIHLURA, in the British district of Jounpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Jounpoor to Futtehpoor, 27 miles W. of the former. Lat. 25° 46', long. 82° 20'.

TIJARA,¹ in the territory of Alwar, under the political superintendence of the Governor-General's agent in Rajpootans, a town 55 miles S.W. of Delhi. The district within which it is situate was overrun by the Mahrattas at the close of the last century, and by one of their chiefs conferred on the adven-

turer George Thomas, who burned the town, to chastise some predatory aggressions of the inhabitants. In the course of the Mahratta war, the town and district came into the possession of the British government, by which power, in 1803, they were, with other pergunnahs, granted to the rao-rajah of Alwar. On the death of that prince in 1815, the succession was contested, the competitors being Benee Singh, a nephew, and Bulwunt Singh, an illegitimate son of the deceased rajah, both minors. The difficulty was temporarily evaded by an extraordinary arrangement, under which the nephew was to enjoy the dignity of rajah, and the son to possess the power and resources of the state. A few years afterwards, on the approach of the nephew, Benee Singh, to manhood, he seized the entire authority, and made his cousin a prisoner. An attempt to assassinate the guardian of Bulwunt Singh, while on a visit to the British Resident at Delhi, was attributed to the instigation of the rival party at Alwar; and by the interference of the British government, the clumsy arrangement by which it had been sought to reconcile the pretensions of the rival claimants was brought to an end. The nephew of the late rajah was permitted to retain the authority of which he had possessed himself, but he was compelled to provide for Bulwunt Singh, partly in territory, and partly in money, an equivalent for Tijara and other districts bestowed by the British government on that person's father; the territory and property thus ceded, to descend to the heirs of the body of Bulwunt Singh only, and not to any adopted son; but to revert to the principality of Alwar on the failure of natural descendants. Tijara is reported to have been badly administered since its severance from Alwar. The town is situated in lat. 27° 56', long. 76° 55'.

TIKAPAR, in the territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Hoosungabad to Jubbulpore, 66 miles E. by N. of the former. Lat. 22° 58', long. 78° 44'.

TIKAREE.—A town in the British district of Behar, presidency of Bengal, 24 miles N. of Sherghotty. Lat. 24° 54', long. 84° 54'.

TIKERI, in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route by the Kutra Pass from Allahabad to Rewa, and 35° 3 miles

TIK—TIL.

S.E. of the former city. The road in this part of the route is rather good; the country level, well cultivated, and studded with small villages. Lat. 25° 10', long. 82° 17'.

TIKHUR, in Bussahir, a small fort on a mountain projecting eastward from the ridge connecting Wartu with the Chur. It is garrisoned by a British detachment from the cantonment of Kotgarh. Elevation above the sea 7,735 ft. Lat. 31° 11', long. 77° 41'.

TIKOOREE, in the British district of Budaon, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to Bareilly, and 29 miles S.W. of the latter. It is situate in a well-watered, fertile, and well-cultivated country. Lat. 28° 11', long. 79° 9'.

TIKOORI FORT, in the native state of Rewah, in Bundelcund, 46 miles S.W. by S. from Rewah, and 51 miles N.W. by N. from Sohagpoor. Lat. 23° 57', long. 81° 1'.

TIKREE, a village in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, on the route from Pillibheet to Beesulpoor, and 16 miles S. of the former. Lat. 28° 23', long. 79° 51'.

TIKREEALA JILL.—A town in the native state of Cutch, situate on the Great Western Runn, and 36 miles N. from Bhooj. Lat. 23° 42', long. 69° 52'.

TILBEGUMPOOR, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a town on the route from Boolundshuhur to Delhi, 14 miles W.N.W. of the former. Lat. 28° 29', long. 77° 42'.

TILCHEE, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Seetapoor, and 39 miles S.E. of the former. The road in this part of the route is good; the country level, in some parts cultivated, in others overrun with jungle. Lat. 28° 11', long. 80° 2'.

TILHUR, in the British district of Shahjehanpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Shahjehanpoor to Bareilly, 12 miles W.N.W. of the former. Lat. 27° 58', long. 79° 49'.

TILJUGA.—A river of Nepal, rising in lat. 26° 51', long. 86° 30', and, flowing in an easterly direction for forty miles, falls into the Coosy on the right side, in lat. 26° 40', long. 87° 12'.

762
TILLAURAH.—A town in the native state of Nepal, 129 miles W. by S. from Khatmandoo, and 54 miles N. by W. from Goruckpoor. Lat. 27° 28', long. 83° 15'.

TILOI,¹ in the district of Salon, kingdom of Oude, a town 55 miles S.E. of Lucknow. It is the property and residence of a Hindoo chieftain, styled rajah of TiloI, the lineal representative of the ancient kings of Oude, and the head of a family which, as late as the middle of the last century, held the whole of the south-eastern part of Oude, from Fayzabad to Manickpoor. His present possessions are very extensive, and well managed, so that 7,50,000 rupees are annually paid by him to the king of Oude, without any oppressive exactions from the cultivators, who enjoy greater security and ease than those of any other part of the kingdom. The rajah lives in the town, in an ancient mud fort, having within its inclosure many good buildings of masonry. Butter estimates the population at 10,000, of whom a third are Mussulmans. Lat. 26° 8', long. 81° 30'.

TILOTHOO,¹ in the British district of Shahabad, presidency of Bengal, a town a mile N.W. of the left or north-west bank of the river Sone. It is described by Buchanan² as a good country town, containing 700 houses; and assuming the usual average of inmates to each, the population appears to be about 3,500. It was formerly the principal place of a pargannah of the same name, nearly conterminous with that denominated, under recent arrangements of the British authorities, that of Rohtas.³ The previous pargannah of Tilothoo contained 560 square miles, and a population of 44,960 persons. Tilothoo is in lat. 24° 47', long. 84° 3'.

TILWARA, in the Rajpoot state of Jodhpoor, is situate on the left bank of the Lonee, between Balmeer and the town of Jodhpoor, and 65 miles S.W. of the latter place. Boileau, who was ferried over the river here in the beginning of July, during the rainy season, found the Lonee "rushing down with a fierce turbid stream a quarter of a mile wide, but not very deep." The raft on which he passed "was made of a common charpae or bedstead, under which five earthen pots were lashed, giving it sufficient buoyancy to float." This was guided and impelled by four or five strong men, holding on and swimming with it, being themselves rendered buoyant by dried calabashes.

³ Survey, i. 481.
strapped round their waists. Notwithstanding the shortness of the distance, the perilous passage occupied two hours. Annually, about the time of the vernal equinox, a great fair is held here, principally for the sale of live stock, and on such occasions it is said that 8,000 people are collected. Very good horses are sold for from 40l. to 60l. each, baggage-camels for 6l., riding-camels for 12l. The maharaja receives a duty of ten shillings for each camel sold, six for each horse, one for each bullock. The road in this part of the route, between Balmeer and Jodhpooor, is overflowed in the rainy season, and becomes unsafe for travelling. Lat. 25° 52', long. 72° 8'.

TILWARA, in Sirhind, a village on the route from Lodiana to Ferozpoor, and 30 miles W. of the former town. It is situate on the left bank of the Sutlej, in a level open country, with a sandy soil partially cultivated. The road in this part of the route is sandy and heavy, and in consequence with difficulty practicable for guns and carriages. Distant N.W. from Calcutta 1,132 miles. Lat. 30° 57', long. 75° 23'.

TILWUN.—A town in the British district of Candeish, presidency of Bombay, 30 miles W. of Malligaum. Lat. 20° 34', long. 74° 3'.

TIMBOONREE.—A town in Malwa, in the native jaghire of the same name, 59 miles N.W. by W. from Baitool, and 43 miles S.W. from Boosungabad. Lat. 22° 21', long. 77° 14'.

TIMBOORNEY.—A town in one of the recently sequestered districts of the native state of Hyderabad, or dominions of the Nizam, 66 miles S.E. from Ellichpoor. Lat. 20° 23', long. 76° 10'.

TIMERY.—A town in the British district of North Arcot, presidency of Madras, six miles S. of Arcot. Lat. 12° 48', long. 79° 23'.

TIMLA FORT, in the British district of Almora, lieutenant-governorship of the North-West Provinces, a town on the route from Almora to Khyreegurh, 43 miles S.E. of the former. Lat. 29° 9', long. 80° 10'.

TIMLA GURHI, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a stockade, now in ruins, on the most southern or outer range of the Himalayas, rising over the plain of Pilleebheet. Elevation above the sea 3,821 feet. Lat. 29° 9', long. 80° 9'.
TIM—TIN.

TIMLI, a village of the British district of Dehra Doon, is situate on the north-eastern declivity of the Sewalik range. A mile south-west of it was a station of the series of small triangles in the great trigonometrical survey of the Himalayas. Elevation above the sea 2,509 feet. Lat. 30° 21', long. 77° 46'.

TIMLI PASS,1 so called from the village of that name about a mile north of it, leads from Suharunpoor to Dehra, over the Sewalik Mountains, bounding the Dehra Doon on the south-west. It is practicable for wheeled carriages. Elevation above the sea 2,339 feet.2 Lat. 30° 20', long. 77° 46'.

TIMMAPOORAM.—A town in the native state of Hyderabad, or territory of the Nizam, 112 miles E.N.E. from Hyderabad, and 122 miles N. by W. from Guntoor. Lat. 18° 1', long. 80° 5'.

TIMMERYCOTA.1—A town in the British district of Guntoor, presidency of Madras, 69 miles W. by N. of Gun- toor. Population about 3,000.2 Lat. 16° 33', long. 79° 30'.

TIMMEROWN.—A town in the native state of Bhopal, situate on the right bank of the Nerbudda river, and 88 miles E. by S. from Bhopal. Lat. 23° 3', long. 78° 42'.

TINARA, in the British district of Seuni, territory of Saugur and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Jubbulpoor to Seuni, 20 miles N.E. by N. of the latter. Lat. 22° 15', long. 79° 50'.

TINDEVANUM.—A town in the British district of South Arcot, presidency of Madras, 38 miles N.N.W. of Cuddalore. Lat. 12° 14', long. 79° 41'.

TINNEVELLY,1 in the presidency of Madras, a British district, named from its principal place. It is bounded on the north, north-east, and north-west, by the British district of Madura; on the east and south-east by the Gulf of Mannar, dividing it from Ceylon; and on the west and south-west by the raj or territory of Travancore. It lies between lat. 8° 9' and 9° 56', long. 77° 15'—78° 26': its greatest length from north to south is 122 miles, its greatest breadth from east to west seventy-four miles: the area is estimated at 5,700 square miles.2 Its seacoast commences at Cannakapoor, lat. 8° 9', and proceeds, in a direction generally north-east, for about ninety-five miles, to Vaimbaur, "forming the north-west side of the

2 A. Res. ziv. 325°—Hodgson and Herbert, Trigon. Surv. of Himalaya.
5 Parliamentary Return, April, 1851.
6 Horsburgh, East-India Directory, i. 542.
TINNEVELLY.

Gulf of Mannar. It is little frequented, except by small vessels from the neighbouring coasts, especially from Colombo and Negombo, which trade with it." It has few places of any note in a maritime point of view. The coast is generally low and level; the sea near the shore is shoaly and unsafe, and in the north-east part abounds in dangerous reefs and rocks. Proceeding north-east, the navigator discerns, seventeen miles from Cape Comorin, a headland, called East Cape, having on its east side the Bay of Kovolam; and twenty-seven miles farther north-east, Munabpaudd, a point on which is site a town, at the south side of the estuary of the river Naut, but in a situation dangerous for shipping. Farther north-east is the small town of Pinnacoil, the approach to which from the south is also dangerous, from an extensive reef stretching from it in that direction, but affording shelter to small vessels between the town and the reef. North-east of Pinnacoil twelve miles is Tutioorin, the most considerable place on the coast: abreast of it, with a channel between them and the mainland, are several islets, forming a petty archipelago, extending from north to south about eight miles, and there is "a safe roadstead, with good anchorage, in which vessels can ride at all seasons of the year." A pearl-fishery is carried on along this part of the coast, but it is not very productive. The western part of Tinnevelly is the most elevated, as the surface rises there towards the Ghauts, attaining in the vicinity of Courtallum an elevation of 4,800 feet above the sea. At the base of the mountains, the elevation of the country is estimated at 800 feet, and eastward it descends to about 200, the average elevation of the plain of Tinnevelly. The mountains are stated to consist of hypogene schists, penetrated and broken up by outbursts of plutonic and trappean rocks. The general slope of the surface is eastward, as indicated by the courses of the rivers. The Tambaravari rises on the eastern declivity of the Ghats, in lat. 8° 53', long. 77° 20'; holds a course generally either east or south-east for eighty miles, and falls into the Gulf of Mannar. The Chittaur rises in the same tract with the Tambaravari, but about sixteen miles north-west of the source of the latter, flows in a direction south-east for sixty miles, and joins the Tam-

1 Engraved by Walker, 63.
baravari on the left side, in lat. 8° 47', long. 77° 52'. The river of Vypar, the largest in the district, rises, like those already mentioned, on the east side of the Ghats, in about lat. 8° 45', long. 77° 44', and holding a course south-east for about eighty miles, it falls into the Gulf of Managar. These principal streams are joined right and left by numerous feeders during the monsoons, when the country is in many parts laid under water, and everywhere in the plains contains innumerable small lakes or ponds. That part of the district to the north of the river Tambaravari is the more level and fertile, and is very productive, being extensively irrigated by canals from that river: the south-eastern part is barren, having a light stony soil. The soil throughout the district is generally of a deep red or rusty colour, from the presence of iron, and contains a large quantity of sand, forming a friable mould. In the maritime tract on the south-eastern coast, are extensive salt-marshes, liable to spread greatly during the rainy season. The climate along the seacoast, and generally in the eastern and southern part, is characterized by aridity and heat, the thermometer having been registered at 115°, "some say that they have observed it at 130°." This state of weather prevails in the latter part of summer and throughout autumn, when the coast of Malabar experiences all the violence of the south-west monsoon, which is intercepted by the Ghats, and thereby prevented from affecting the Coromandel coast or the plains of Tinnevelly. During the north-east monsoon, "that is, from October to March," the wind blows from the Bay of Bengal, and moderates the temperature; and at that season Trichinopoly, on the seacoast, is found to be remarkably salubrious. Courtallum, on the western frontier, towards Travancore, presents perhaps greater advantages in point of climate than any part of the Carnatic. There the mountains are of much less elevation and breadth than in other parts, and the chain being divided quite across by a narrow pass, leading from the Carnatic to Malabar, the south-west monsoon finds admission through the opening, and agreeably modifies the climate of Courtallum, and of the neighbouring parts. Early in June, when the south-west monsoon sets in, it brings with it to this tract thick clouds and strong winds, so that the rays of the sun are intercepted, and the air put in violent motion; from which causes, combined with

2 2 2

707
the heavy fall of rain, the temperature is lowered much below the standard in the adjacent tracts.

In regard to the zoology of Tinnevelly, little information is on record. Wild elephants appear sometimes to occasion annoyance, as in 1842 the collector was authorized to grant rewards to persons assisting in the destruction of a large herd of these animals which infested the district.

The natural vegetation in this favoured tract comprises timber-trees of enormous size, date-palm and sago-palm, various twiners, such as the Cocculus indicus, pepper-vine, ferns of enormous magnitude, comprehending the total number of species within the indigenous flora. Many valuable intertropical productions, such as clove, nutmeg, cinnamon, have been introduced, and have thriven well, though it does not appear that in a commercial point of view they have afforded any adequate return. Of all the products of the district, cotton is the most important; but the cultivation is restricted to the native plant of India. The government experiments for the introduction of the American species commenced in Tinnevelly, but the planters were not satisfied with the soil and climate, and in the following year they were removed to Coimbatore. Rice is the principal alimentary crop, but it sometimes fails to a considerable extent, when the amount of rain is below the usual average.

The whole population of the district of Tinnevelly is returned at 1,269,216, and appears to be rapidly on the increase, as in 1823, according to official return, it was only 564,957. By comparison of the area with the larger of the above-mentioned amounts, the relative density of the population appears to be 221 to the square mile. It consists in the larger degree of Hindoos, there being few Mussulmans, and no Europeans except those in the civil or military service of government; but there is an unusually large proportion of native Christians.

Tinnevelly, the principal town, Pallamcottah, and Tuticorin, the only places of note in the district, are described under their respective names in the alphabetical arrangement.

TINNEVELLY, the principal place of the British district of the same name, is situate near the left bank of the river Chindithoora, over which is a good bridge, forming a communication
with the town and military station of Pallamcottah, near the opposite bank. Here were formerly a jail and an hospital, which have been removed to Pallamcottah; but this place is still the station and residence of the revenue collector. The population, according to the official return, is about 20,000.
Distance from Madura, S., 86 miles; from Madras, S.W., 350.
Lat. $8^\circ 44'$, long. $77^\circ 45'$.

TIOKLA.—A town in the British district of Amherst, in the Tenasserim provinces, presidency of Bengal, 23 miles N. of Moulmein. Lat. $16^\circ 50'$, long. $97^\circ 41'$.

TIPPACANDRA.—See MOYAAH RIVER.

TIPPACHATRAM.—A town in the British district of Nellore, presidency of Madras, 29 miles S.S.E. of Nellore. Lat. $14^\circ 4'$, long. $80^\circ 11'$.

TIPPERAH, including Bulloah, a British district of Bengal, bounded on the north-west by the Megna river, separating it from the British districts Dacca and Mymunsing; on the east by those of Sylhet and Chittagong, and by the native territory of Tipperah; on the south by the Bay of Bengal; and on the west by the British districts Backergunge and Dacca. Excluding the islands at the mouth of the Megna, it is 110 miles in length from north to south, and sixty-eight in breadth; it contains an area of 4,850 square miles, with a population of 1,406,950.

TIPPERAH.—A town in the British district of Tipperah, presidency of Bengal, 48 miles E.S.E. of Dacca. Lat. $23^\circ 28'$, long. $91^\circ 10'$.

TIPPERAH (Independent).—An extensive tract of mountainous country, bounded on the north by the British districts Silhet and Cachar; on the east by the territory of Burmah; on the south by Burmah and Chittagong; and on the west by the British district of Tipperah. It is 180 miles in length from east to west, and eighty in breadth, and contains an area of 7,632 square miles. In 1850 daring outrages were reported to have been committed by the hill tribes upon the British population occupying the frontier of this state. It was proved, however, upon inquiry, that these affrays occurred within the territory of the rajah, and that the violence offered was to persons not subject to the British government. The late rajah dying in 1850, was succeeded by his son, who has declined to
accede to the decision of the arbitrators appointed to fix the boundary-line between independent and British Tipperah.3

TIRA, or SHAH JEHANPUR, a town and stronghold, in the north-east part of the Punjab, is situated on a rock of sandstone, several miles in circumference and flat at top. The Beas flows along its base on one side, and on every other it is surrounded by precipices eighty or 100 feet high. It contains about 1,200 or 1,500 houses, and 5,000 inhabitants. It was formerly the residence of Sansar Chand, the independent rajah of Kotoch, who at one time had a revenue of 350,000l., and was so powerful as to rival Bunjeet Singh. After the death of Sansar Chand, his descendants were dispossessed by Bunjeet Singh, who took possession of Tira, and annexed it to the Punjab. Lat. 31° 36', long. 76° 26'.

TIRHOOT.—A British district in the presidency of Bengal, bounded on the north by the dominions of Nepaul; on the east by the British district of Bhaugulpore; on the south-east by Monghyr; on the south by the Ganges, dividing it from Patna; on the south-west and north-west by the district of Sarun. It lies between lat. 25° 26'—26° 42', long. 84° 58'—87° 11'; is 140 miles in length from east to west, and ninety-five in breadth: the area is 7,402 square miles. Though containing no mountains, the surface of the country is considerably varied by undulations, and its general aspect beautiful, from the groves, orchards, and woods "which abound," especially on the banks of the lakes and rivers. The drainage of that part of the Himalayas situate to the north, passing through this district in its course to the Ganges, gives rise to numerous rivers and watercourses." Of these, the principal are the Ganges, Gunduck, and Bagmuttee.

The climate of Tirhoot is characterized by mildness and moisture.3 In December, 1882, the mean of the maximum of temperature through the first half of the month was found to be 72°, through the second half 68°; the mean of the minimum during the first half 57°, during the second 48°. In the succeeding June, the mean of the maximum for the first half of the month was 102°, for the second half 95°; the mean of the minimum for the first and second divisions of the month was 79°. The average means for the whole year were, maximum 87°, minimum 69° 1': the general mean for three years was 75°.
TIRHOOT.

"For Europeans, the climate is undoubtedly one of great salubrity, which is attributed to the moderate range of the thermometer, and to exemption from the extreme and sultry moisture of Bengal, and the parching dry heat of the upper provinces." For natives, however, who have not the same sanative means at command, the climate is unhealthy, from malaria, especially in the vicinity of jhils. The northern part of the district, in the vicinity of the Terrai, or swampy forest at the base of the Sub-Himalaya, is the most unhealthy. The results of the malaria are usually dysentery, cholera, fever, ague, biliary affections. The soil is rich, especially in the low grounds, when the inundations have retired; but in some parts it is so saturated with muriate of soda or culinary salt, sulphate of soda, salt-petre, and some other mineral salts, as to be barren and white, as if covered with snow. Those salts are extracted through the means of simple but effectual processes by the natives, who drive a considerable trade in them; and the application of European capital and skill would doubtless greatly increase the beneficial results from this source of commerce. The natives are industrious and persevering cultivators, though not remarkable for skill: they, however, raise good crops of wheat, rice, barley, maize, millet, ginger, turmeric, sweet potato, yam, oil-seeds; and in the cool season the esculent vegetables of Europe. Sugarcane, tobacco, and cotton are produced to considerable extent, and indigo so largely, that it may be regarded as the staple commercial crop of the district. The following are enumerated as the fruits:—"Mango, grapes (green and black), lichi, loquat, citron, shaddock, lemon, lime, guava, plantain, custard-apple, koranda, wampee or Brazilian currant, love-apple, melon, pine-apple, strawberry, cocoanut, jaik, baila, tamarind, sola or soap-nut, pumpkin."

The manufacturing industry is rude and of small extent: it is principally directed to producing fabrics of coarse cotton and woollen, sacking, ropes, earthen utensils, extraction of salt-petre and other mineral salts, indigo, sugar-boiling, and lime-burning. The district is stated to contain 7,656 towns and villages, eighty-eight pergunahs or subdivisions, and sixteen thannas or police divisions. The population amounts to 2,400,000. In a respectable work, the Hindoos are stated to be to the Musulmans as about seven to one.
TIR.

Tirhoot, at a period\(^1\) of remote antiquity, was denominated Maithala, and probably formed part of the kingdom of Magadha or Behar, the monarchs of which are said to have been paramount rulers of India long previously to the Christian era.

The towns—Muzuffurpoor the capital, Karnal, Durbunga, Hajeepore, Mowah, and Singgah—are noticed under their respective names in the alphabetical arrangement.

The principal routes are, 1st, from south-east to north-west, from Monghyr, through Muzuffurpore, to Bettiah, in the district of Sarun; 2nd. from north to south, from Mullye, through Muzuffurpore and Hajeepore, to Gya. According to Stewart, it was first invaded by the Mussulmans about 1225\(^6\) under the command of Ghiyas-ood-deen Bulbun, sovereign of Delhi. The same writer mentions\(^2\) that about 1240 it was invaded by Toghan Khan, who ruled Bengal under Massud, sovereign of Delhi, and adds\(^3\) that in 1324 it was, by Ghiyas-ood-deen Toghlak, sovereign of Delhi, subjugated, and incorporated with that realm. During the weakness of the empire of Delhi, consequent on the inroad of Tamerlane, Nusrith\(^4\) Shah, an ephemeral sovereign of Bengal, seized Tirhoot; but it was again, in 1538, subdued, and brought under the rule of Humayon, padshah of Delhi. The right of the East-India Company appears to have accrued from the grant which, in 1765, Shah Alum made\(^5\) of the provinces of Bengal and Orissa.

TIRIPUNAITORAI,\(^1\) in the raj or state of Cochin, a town about two miles N.E. of the Backwater, an extensive shallow lake, the reservoir of numerous streams flowing from the Western Ghats. Bartolomeo states,\(^3\) in A.D. 1787, that it was the residence of the rajah of Cochin; and it probably continues to be so at present. Distant from Cochin, S.E., seven miles; from Calicut, S.E., 105; Bangalore, S.W., 303. Lat. 9° 57', long. 76° 24'.

TIRIT.—A town within the dominions of Gholab Singh, the

6. Voyages to the East Indies, 154 (Translation).

* Stewart's account is, however, probably erroneous, as, according to the best authorities,\(^1\) Ghiyas-ood-deen Bulbun did not ascend the throne until the year 1265 or 1266.

† This statement is supported by the weightier authority of Elphinstone:\(^1\) "He [Toghlak] reduced Tirhoot (formerly Mithila), and took the raja prisoner."

‡ Of the Trigonometrical Survey;\(^1\) the Tripontary of Hamilton.\(^3\)
TIR.

ruler of Cashmere, situate 158 miles E. by N. from Sirinagar, and 167 miles N.E. by N. from Chamba. Lat. 34° 34', long. 77° 42'.

TIRJOOGA RIVER, rising in lat. 26° 39', long. 86° 38', in the Terai of Nepal, through which it flows for eighteen miles, to the boundary of the British district of Tirhoot, and thence pursuing a course generally southerly for sixty miles, during which it bounds or intersects the districts of Tirhoot, Bhagulpore, and Mongheer, falls into the Gogaree on the left side, in lat. 25° 41', long. 86° 29'.

TIRMIUM.—A town of Madras, in the native state of Poodooocottah, or Rajah Tondiman's country, situate 40 miles S. from Trichinopoly, and 50 miles N.E. by E. from Madura. Lat. 10° 15', long. 78° 50'.

TIROHA.—See TIROWAN.

TIROOA, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town on the route from Furruckabad to Cawnpoor, 33 miles S.S.E. of the former. Population 5,865. Lat. 26° 59', long. 79° 51'.

TIROURI, in Sirhind, or territory of the protected Sikh states, a town on the route from Kurnal to Thunesur, eight miles N. of former, 15 S. of latter. In A.D. 1193, Muhammad Shahabuddin, sultan of Ghor and of Ghuznee, invading India, was here encountered by Pritwi Rajah, sovereign of Delhi and Ajmer. After a desperate conflict, the Hindoos were defeated with great slaughter, and Pritwi Rajah being made prisoner, was put to death after the battle. Lat. 29° 47', long. 77°.

TIROWAN, or TURBOON, in Bundelcund, a small state, or rather jaghire, granted by the East-India Company to a Chaube, descendant of one of the proprietors of Callunger, who received it by treaty, on the surrender of the last-named place, in 1812. It is situate within the district of Banda, its centre being in lat. 25° 12', long. 80° 55', and is estimated to comprise only twelve square miles, five villages, and a population of 2,000. The annual revenue is given at 10,000 rupees (1,000£), and the native force amounts to about fifty men. Tirowan, the principal place, is situate on the river Pyzonne, on the

* Tirowry of Briggs's Index; Turaoee of Elphinstone.
† Chaube means a Brahmin skilled in the four Vedas, but by courtesy is used as an honorary title to the descendants of such.
route from Allahabad to Callinger, 38 miles N.E. of the latter, 74 S.W. of the former. It is rather a considerable place, has a large bazar, supplies are abundant, as is also water from the Pysonce. Lat. 25° 14', long. 80° 52'.

TIROWAN.—A town in the British district of Banda, in Bundelcund. In 1816, a tract of land situate near this town, was granted by the British government to Maharajah Imrit Rao, as an independent jaghir. Benaik Rao, son of Imrit Rao, died in 1858, and the jaghir lapsed to the paramount authority. The town is in lat. 25° 12', long. 80° 58'.

TIROPAVAUNIUM.—A town in the British district of Madura, presidency of Madras, 10 miles S.E. by E. of Madura. Lat. 9° 50', long. 78° 17'.

TIRRUPUR.—A town in the British district of Coimbatore, presidency of Madras, 28 miles E. by N. of Coimbatore. Lat. 11° 6', long. 77° 24'.

TIRSOON, in the British district of Boolundshuhur, lieutenant-governorship of the North-West Provinces, a village on the route from Khasgunj to Meerut, and 49 miles of the latter. The road in this part of the route is rather good for carriages, the country open and partially cultivated. Lat. 28° 21', long. 78°.

TIRUKOVALUR.—A town in the British district of South Arcot, presidency of Madras, 38 miles W.N.W. of Cuddalore. Lat. 11° 57', long. 79° 20'.

TIRU VADI.—A town in the British district of South Arcot, presidency of Madras, 13 miles W.N.W. of Cuddalore. Lat. 11° 47', long. 79° 39'.

TIRUVALUR.—A town in the British district of Tanjore, presidency of Madras, 34 miles E. of Tanjore. Lat. 10° 47', long. 79° 41'.

TISAR, in the British district of Muttra, lieutenant-governorship of the North-West Provinces, a town near the southeast frontier, towards the British district Mynpooree. Lat. 27° 26', long. 78° 29'.

TISSOOA, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Futehgurh, and 18 miles S.E. of the former. Here, in 1774, the British army under Colonel Champion, and supporting the cause of Shujahuddawlah,
nawab of Oude, utterly defeated a far more numerous force of Rohilla Pathans, and broke the power of that people. A village four miles south-east of this place was named Futehgunjje, or "Victory Market," by the nawab, who kept aloof during the action, and was then probably posted there. The engagement is also sometimes called the battle of Cutterah or Kuttra, from a small town of that name a few miles to the south-east; and sometimes, "the battle of St. George." Tissoom is in lat. 28° 8', long. 79° 40'.

TITALIYA, in the British district of Dinajpoor, presidency of Bengal, a small town on the route from Purnaah to Darjeeling, 72 miles N.E. of former, 45 S. of latter. It is situate on the left bank of the river Mahanunda, here having a channel 300 yards wide, but with a small body of clear water in the dry season, and during the rains navigable only for canoes, in consequence of its varying depth. Craft, however, of from twenty to thirty tons burthen can ascend to within a few miles of the town. The site of the town is a level country, about twenty-five miles south of the south base of the Sub-Himalayas, or first range of mountains. Here was formerly a British cantonment, abandoned in 1829 in consequence of the alleged insalubrity, attributed to malaria from marshes situate east, south, and south-west of the place. The country to the north is, however, salubrious, and provisions are abundant and excellent; population 2,500. An annual fair is held at this place, the establishment of which is officially stated to have been eminently successful. Elevation above the sea 275 feet; distance from Dinajpoor, N., 66 miles; from Burhampoor, by Dinajpoor, N., 359; from Calcutta, by Burhampoor and Dinajpoor, 477. Lat. 26° 27', long. 88° 20'.

TITULLA.—A town in the British district of Sumbulpoor, on the south-west frontier of Bengal, 59 miles W.N.W. of Sumbulpoor. Lat. 21° 44', long. 83° 10'.

TOCHEE, or GOMBELA.—A river rising on the eastern slope of the Suliman Mountains, in lat. 82° 53', long. 70° 1', and, flowing through the Damaun for ninety miles, falls into the Indus river, in lat. 32° 36', long. 71° 20'.

Such is the statement of Buchanan; but according to Lloyd, "it is navigable in the rains for boats of 500 maunds [about eighteen or twenty tons] as far as six miles north of Titaliya."
TODA.—A town in the Rajpoot state of Jeypoor, 63 miles S. by W. from Jeypoor, and 65 miles E.S.E. from Ajmeer. Lat. 26° 4', long. 75° 39'.

TODDICOMBIT.—A town in the British district of Madura, presidency of Madras, 39 miles N.N.W. of Madura. Lat. 10° 27', long. 78° 1'.

TOGA, in the district of Peshawar, division of the Punjab, a town situated 11 miles from the right bank of the Indus, 36 miles S.S.E. of the town of Peshawar. Lat. 33° 30', long. 71° 38'.

TOHANUH, in the British district of Hurriana, lieutenant-governorship of the North-West Provinces, a town on the route from Hisar to Loodiana, 42 miles N. by E. of the former. Lat. 29° 41', long. 75° 58'.

TOHREE FUTTEHPOOR,1 in Bundlecund, a town on the route from Banda to Jhansi, 86 miles W. of the former, and 40 E. of the latter. It is the principal place of a jaghire or feudal grant, which contains an area of thirty-six square miles, fourteen villages,2 and a population of 6,000 souls. It yields a revenue of 3,680l., and the chief maintains twenty horse3 and 250 foot, with a few artillerymen. This jaghire was made "subject to a tributary payment of 2,650 rupees, or 265l.4 conditionally on relinquishment by Jhansi of the village Kesirpoora, resumed by that state." It is held of the East India Company by sunnud or grant, dated April, 1823. Tohree Futtehpoor is in lat. 25° 27', long. 79° 10'.

TOKA.—A town in the British district of Ahmednuggur, presidency of Bombay, 41 miles N.N.E. of Ahmednuggur. Lat. 19° 37', long. 76° 2'.

TOKSELGHAT.—A town in the native state of Nepal, situate on the left bank of the San Coos river, and 61 miles E.S.E. from Khatmandoo. Lat. 27° 24', long. 86° 12'.

TOLA,1 in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village in the Bhotia subdivision of Juwahir. It is situate on the left bank of the river Gori, 400 feet above the stream, and on the route to Hiundes by the Juwahir Pass, from which it is distant 20 miles S. Elevation above the sea3 11,122 feet. Lat. 30° 20', long. 80° 15'.

TOLJAPPOOR.—A town in one of the recently sequestrated
TOL—TON.

districts of the native state of Hyderabad, or dominions of the Nizam, 28 miles N.E. from Sholapoor. Lat. 18°, long. 76° 10'.

TOLTA.—A town in the British district of Jessore, presidency of Bengal, 30 miles S.S.E. of Jessore. Lat. 22° 44', long. 89° 20'.

TOMOKEU, in Bussahir, a halting-place in the district of Koonawar, is situate on the route from Sungnum to the Manerung Pass, and near the left bank of the river Darbung. Elevation above the sea 13,547' feet. Lat. 31° 49', long. 78° 26'.

TONDIMAN'S COUNTRY.—See POODOOCCOTTAH.

TONGANUR.—A town in the British district of South Arcot, presidency of Madras, 61 miles W.N.W. of Cuddalore. Lat. 12° 6', long. 79°.

TONGDE.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 124 miles E.S.E. from Sirinagar, and 88 miles N.E. by N. from Chamba. Lat. 33° 32', long. 77° 3'.

TONGHO.—A town of Eastern India, in the British territory of Pegu, and formerly the capital of an independent kingdom, which was subdued by the Peguers, and subsequently annexed to Ava. It is situate on the right bank of the Sittang river, 83 miles E. by N. from Prome. A British officer, describing the place upon its acquisition by the English in 1852, observes, "A few ruined pagodas, scattered over a vast quadrangle, inclosed by a massive wall, and surrounded by a broad ditch, are all that now remain to tell of the former magnificence of ancient Tongbo." Since its occupation by the British, great improvements have been made, and there is every prospect that in a few years "Tongho will surpass in wealth and importance all the glories of a barbaric age." Lat. 19°, long. 96° 18'.

TONGLO.—A mountain of Sikhim, having an elevation of 10,000 feet. Lat. 27° 3', long. 88° 8'.

TONGSO.—A town in the native state of Bhotan, situate on the left bank of the Champamuttee river, and 100 miles N.N.W. from Goalpara. Lat. 27° 30', long. 90° 9'.

TONK, in Rajpootana, a town in a small district forming one of the possessions of the family of the Patan freebooter Ameer Khan. It lies on the route from Delhi to Mhow, 2182

TONK.

Miles S.W. of the former, 289 N. of the latter, and on the right bank of the river Bunaae, here crossed by ford, the water being usually only about two feet deep. The town, which is of considerable size, is surrounded by a wall, and has a mud fort. A mile south of it was the site selected for his residence by Ameer Khan, noted during the latter part of the eighteenth century, and the early part of the present, for his restless activity, and distinguished no less by talents for intrigue and war than by treachery and disregard of human life and suffering. Born in an humble station at Sumbhiul, in Rohilcund, this notorious freebooter commenced his career in the service of the state of Bhopal, about the year 1794. Soon after he joined the ex-chiefs of Bagoogurh, who were subsisting by plunder, and subsequently he attached himself to the fortunes of Jeurwunt Bao Holkar, who, in 1806, granted to him Tonk, with its territory, wrested from the rajah of Jeypore. Having made it his place of abode, the ameer embellished it with various public buildings: he had previously, in 1798, received from Holkar the grant of Seronje. In 1817, he held, in addition to these territories, Perawa and Chapra, in Malwa, with Nimbera and some other pargunnahs in Mswar. All those possessions were in that year by treaty guaranteed to Ameer Khan by the East-India Company, and the fort and district of Rampoora were added as a free gift by the British government. The area of the whole amounts to 1,864 square miles. The population has been estimated at 182,672; the revenues at 8,20,000 rupees, or 82,000l., derived from six provinces, in the following proportions:—Tonk, including Rampoora, 2,00,000 rupees; Chapra, 1,00,000; Perawa, 1,00,000; Allygour, 80,000; Seronje, 2,00,000; Nimbera, 1,40,000. Total, 8,20,000. Those scattered territories are separated from each other, at distances varying from 100 to 250 miles. The reigning chief, who succeeded his father Ameer Khan in 1884, has contracted debts of large amount, for the payment of which he has mortgaged several districts, together with an annuity of 15,000l., granted to Ameer Khan by the British government as indemnity for the revenue of Pulwul, a district which had been conferred upon the ameer for two generations. The town of Tonk is in lat. 26° 10', long. 75° 56'.

TONRWUTTEE.—See TOORAWUTTEE.
TONS.

TONS, (SOUTH-WESTERN), a river rising in the native state of Myher, in the territory of Saugor and Nerbuda, lat. 24°, long. 80° 30'. The elevation of the source must considerably exceed 900 feet, as at a cascade ninety-five miles to the north-east, or down the stream, the elevation of the waterway is 890² feet. Here the river, flowing through a ravine in the Kutra range, is precipitated over a fall 200² feet in depth: it continues its course north-easterly over the more depressed tract in that direction. Fifty miles below the fall, it passes through the Tara range into the valley of the Ganges, and twenty miles farther, in the same direction, falls into that river on the right side, between the village of Punasa and that of Sirsa, in lat. 25° 15', long. 82° 8', having held a total course of 165 miles. The route from Jubbulpore to Allahabad lies along its left bank for a distance of twenty-six miles from its source, and then crosses the stream at the town of Myher, lat. 24° 16', long. 80° 50'. Garden⁴ says of this point, "Cross the Tonse by an indifferent ferry; bed 250 yards wide; stream, in dry season, sixty yards wide, and from one to two feet deep; right bank steep, left shelving." At a place twenty-four miles north-east of this, fifty from the source of the river, and in lat. 24° 30', long. 80° 55', it on the left side receives a small stream, called the Satni or Sutna, and five miles lower down, the route by the Kutra Pass from Allahabad to Saugor crosses it, "close under Puttrahut," by a bad rocky ford, bed 200 yards wide, and stream, during the dry season, about thirty yards wide, and knee-deep." Jacquemont assigns to the bed the inferior width of 150⁶ or 180 feet, but adds (on this point corroborating the former account), that it was not without water even when he passed, in the latter part of January, the driest season of the year. Below this sixty miles, still to the north-east, in lat. 25° 2', long. 81° 44', the river is crossed by the route leading from Allahabad to Jubbulpore by the Sohagi Pass, the passage being made by ford;⁷ and here the bed is rocky, and the banks

---

* According to Wilford, from Tamas, "darkness."—"The dark river, from its being skirted, at least formerly, with gloomy forests, is called Tonsa or Tonso in the spoken dialects." According to Jacquemont, the natives pronounce its name "Tonmoss," but a Frenchman’s report of the mode of pronouncing a foreign language is not perhaps to be implicitly trusted.

9. Voyages, i. 399.
steep. Its course from this point to its junction with the Ganges is very sinuous, but generally in a north-eastern direction: it is about fifty miles in length. About a mile above the mouth, it is crossed, between the villages of Punassa and Sirsa, by the route from Allahabad to Mirzapore, and, according to Garden, "the bed of the Tons at the Punassa ferry is about 400 yards wide, and the stream in the dry season usually runs under the left bank, and is 150 yards wide." He describes the left bank as steep, and the right as sloping. Besides the Satni, falling into it on the left side, the Tons receives on the right side the following tributaries, in the order down the stream in which they are here enumerated:—the Beher, Mahana, Seoti, and Belun.

In the march from Allahabad to Chunar, the Tons was crossed, probably at Punasa, by the army of Baber, who describes it, under the name of Tous;¹ as "a muddy, swampy river," which it doubtless is near its mouth. It is the Tounse of Rennell's map.

TONSE¹ (NORTH-EASTERN), a stream of the territory of Oude, is a large offset of the Ghogra or Deoha: leaving that river on the right side, about ten miles above the city of Oude, and in lat. 26° 47', long. 82° 1', it takes a south-easterly direction, and about twenty-five miles from its commencement sends northward an offset, by which it communicates with the original stream. During the dry season, the stream is in many places embanked, to collect the water for irrigation; and the stagnation thus produced causes extensive malaria. Proceeding in a south-easterly direction, it passes the town of Azimgurh, and uniting with the Surjoo, another offset of the Gogra, the joint stream falls into the Ganges on the right side, in lat. 25° 41', long. 84° 11'; its total length of course being about 240 miles. It is navigable upwards from its mouth as far as the town of Azimgurh, a distance of about 120 miles, but its volume of water is represented as on the decline. By Buchanan,² it is called the Sota, or "branch;" by Baber, Tousin.³

TONSE,⁴ or SUPIN, a river of Gurhwal, rises in lat. 31° 2', long. 78° 33', at the north of the Jumnotri peaks, and but a few miles from the source of the Jumna, flowing from the southern base of the same mountains. The source of the
TONSE.

Tonse appears to have been first ascertained in October, 1819, when it was visited by Herbert, who found the stream to issue, thirty-one feet wide and knee-deep, from a snow-bed 12,784 feet above the sea, and extending as far as the eye could reach. The course of the river is generally westerly for thirty miles, to the confluence of the Roopin, on the right side, in lat. 31° 3', long. 78° 10', and at an elevation of 5,300 feet. The declivity of the channel in that distance must be above 250 feet per mile; so that the stream is almost a cascade. It is from its source to this confluence with the Roopin called the Supin; but downwards the united stream is called the Tonse. The Supin is the larger of the confluent streams, though the Roopin is described by Jacquemont as deep, nearly fifty feet wide, furiously rapid, and rushing along with a tremendous roaring. The united stream called the Tonse is about 120 feet wide; it holds a south-westerly course of about nineteen miles to the confluence of the Pabur, on the right side, in lat. 30° 56', long. 77° 54'. The Pabur is a large stream, though somewhat inferior in size to the Tonse. From the confluence, the united stream, still called the Tonse, leaves Gurchwal and takes a generally southerly direction, forming for the rest of its course the line of division between the British pergunnadh of Jaunsar and the hill states of Joobul and Sirmoor. Thirteen miles below the confluence of the Pabur, the Tonse receives the Shalwee, a considerable stream, which flows into it on the right side, in lat. 30° 48', long. 77° 49'. It thence flows about forty miles, in a course generally southerly, but very tortuous, through a succession of rugged ravines of limestone, to its junction with the Jumna, in lat. 30° 30', long. 77° 53', and at an elevation of 1,688 feet above the sea. As its total course is about 100 miles, it has the enormous fall of above 110 feet in a mile. Though below the junction the united stream bears the name of the Jumna, the volume of the Tonse is much the greater, as, when surveyed by Hodgson and Herbert, it discharged 2,827 cubic feet in a second of time, while the amount discharged by the other river was only 1,045.

* Jacquemont states the elevation of the confluence above the sea to be 4,456 feet, deduced, however, from what he allows to be "une médiocre observation du baromètre."

† In the Atlas of India this distinction is not observed, as the stream is called the "Supin or Tonse" both above and below the confluence.
TOOKEBAUGRA.—A town in the British district of Bulloah, presidency of Bengal, 30 miles N.W. of Bulloah. Lat. 23° 10', long. 90° 37'.

TOODURPOOR, in the British district of Bareilly, division of Pilleebheet, lieutenant-governorship of the North-West Provinces, a village on the route from Bareilly to Petoragurh, and 45 miles N.E. of the former. The road in this part of the route is good; the country level, fertile, and cultivated. Lat. 28° 47', long. 79° 55'.

TOOLA RAM SENAHPUTTEE'S COUNTRY, bounded on the north by the British district of Nowgong; on the south-east by the territory inhabited by the wild Naga tribes, and by that of the Munneepoor raja; on the south by Cachar; and on the west by Cachar and Nowgong. It is seventy-three miles in length from north to south, fifty in breadth; contains an area of 2,000 square miles, with a population of 30,000: its centre is in lat. 25° 35', long. 93° 18'. Upon the recovery, in 1834, by Rajah Govind Chunder, of the throne of Cachar, of which he had been deprived by the princes of Munneepore, Toola Ram resisted the authority of the restored prince. In order to terminate the contest and secure the pacification of the country, Govind Chunder was induced to bestow upon Toola Ram the hill territory of which the latter held possession. Subsequently, when Cachar was annexed to the British dominions, the hilly tract assigned to Toola Ram formed an exception, and a small stipend was assigned to its chief. The government having been badly administered both by Toola Ram and his successors, an intimation has been made to the present chiefs, that unless the conditions of the treaty be fulfilled, they must not expect to retain the country.

TOOLAVA.—See CANARA.

TOOLSEA.—A town in the British district of Bhagulpore, presidency of Bengal, 41 miles N. of Bhagulpore. Lat. 25° 46', long. 87° 2'.

TOOLUMBA, in the Baree Dooab division of the Punjab, a town situated on the left bank of the Ravee, 50 miles N.E. by E. of the town of Mooltan. Lat. 30° 32', long. 72° 18'.

TOOMADY.—A town in the British district of Masulipatam, presidency of Madras, 18 miles N.N.E. of Masulipatam. Lat. 16° 24', long. 81° 19'.
TOO.

TOOMBGEE.—A town in the British district of Sholapoor, E.I.C. Ms. Doc. presidency of Bombay, 81 miles S.E. of Sholapoor. Lat. 16° 34', long. 76° 21'.

TOOMBUDRA.—See TUMBUDRA.

TOOMCOOR.—A town in the native state of Mysore, 70 E.I.C. Ms. Doc. miles N.N.E. from Seringapatam, and 44 miles N.W. by W. from Bangalore. Lat. 13° 20', long. 77° 9'.

TOOMSUR.—A town in the territory of Nagpoor, situate E.I.C. Ms. Doc. on the right bank of the Wein Gunga river, and 43 miles E.N.E. from Nagpoor. Lat. 21° 23', long. 79° 46'.

TOOMULLAGOODIUM.—A town in the native state of E.I.C. Ms. Doc. Hyderabad, or territory of the Nizam, 38 miles E. from Hyderabad, and 118 miles N.W. by W. from Guntoor. Lat. 17° 20', long. 79° 7'.

TOONEE.—A town in the British district of Rajahmundry, E.I.C. Ms. Doc. presidency of Madras, 33 miles N.E. of Samulkottah. Lat. 17° 21', long. 82° 35'.

TOONGA, in the Rajpoot state of Jeypore, a town situate E.I.C. Ms. Doc. 22 miles S.E. of the city of Jeypore. Lat. 26° 41', long. 76° 16'.

TOONGA,1* or TUM.—A river of the Mysore territory, rising2 in lat. 18° 16', long. 75° 14'. It holds a tortuous but generally northward course for forty-five miles to Hallamutta, in lat. 13° 40', long. 75° 16', whence it flows north-east fifty miles to its confluence with the Budra, in lat. 14°, long. 75° 43'. Below the confluence, the united stream bears the name of Toongabudra.3 It is merely a great torrent, having a scanty stream during the dry season, and in the monsoon rushing along with vast volume and great rapidity.

TOONGABUDRA.—See TUMBUDRA.

TOONGHAWALA, in the Beechha Dooba division of the E.I.C. Ms. Doc. Punjab, a town situated 40 miles from the right bank of the Ravee, 40 miles N.W. by N. of the town of Lahore. Lat. 32° 7', long. 73° 55'.

TOONGLA.—A town in the native state of Bhotan, six E.I.C. Ms. Doc. miles from the right bank of the Monas river, and 80 miles W.N.W. from Durrung. Lat. 26° 55', long. 90° 54'.

TOONGROO,\(^1\) in Bussahir, a peak in the range stretching between the Wartu and Chur mountains. From its western side the river Giri takes its rise, and from its north-eastern feeders pass off to the Pabur. It was one of the stations of the large series of triangles in the trigonometrical survey of the Himalaya. Elevation above the sea 10,102 feet.\(^2\) Lat. 31° 8', long. 77° 41'.

TOONOOR,\(^1\) in territory of Mysore, a city, once of great extent,\(^2\) subsequently reduced to a few temples and a small number of dwellings, and now again growing into importance. Here is a vast tank or reservoir, called the Yadavi Nadi, formed by damming up the lower extremity of a rocky valley, by means of a mound seventy-eight cubits high, 150 cubits long, and 250 thick at the base. The superfluous water is let off by a channel, which has been cut with great labour through one of the hills forming the lateral boundaries of the valley; and this passage is at such a height as to allow the drainage through it to irrigate a considerable extent of the subjacent plain. When the reservoir is full, it contains a sufficient quantity of water to supply the cultivators for two years; but owing to the failure of rain, the supply is often inadequate. This useful and grand work was executed by a Brahmin, with the spoils of his Jain antagonists, whom, by means of his intrigues with the local prince, he had succeeded in overthrowing, and the ruins of their temples were his principal materials. In A.D. 1798, Tippoo Sultan caused an opening to be made in the mound, and the great rush of water so enlarged the passage as to sweep away a large portion of the mound, and drain the whole reservoir. As the final and successful invasion of the British was then imminent, it has been supposed that he was impelled to this extraordinary act by a desire to deprive\(^3\) the invaders of this supply of water: others attribute the step to an ebullition of bigotry, which was his ruling passion. The lake is generally by Mussulmans called Moteetalab, or Pearl-tank, a name which, on account of its beauty, it received\(^4\) from Nasir Jung, when, in A.D. 1746, he advanced to Mysore to enforce payment of arrears of tribute. After the overthrow of Tippoo Sultan, the reservoir was repaired\(^5\) by order of the British authorities. Distance from Seringapatam, N.W., 10 miles. Lat. 12° 33', long. 76° 42'.

TOO—TOW.

TOORAVAKIRA.—A town in the native state of Mysore, 1 E.I.C. Ms. Doc. 51 miles N. from Seringapatam, and 63 miles W. by N. from Bangalore. Lat. 13° 10', long. 76° 44'.

TOORAVANOOR.—A town in the native state of Mysore, 1 E.I.C. Ms. Doc. 136 miles N. from Seringapatam, and 60 miles S.W. by S. from Ballary. Lat. 14° 22', long. 76° 30'.

TOORAWUTTEE, or BUTEESEE.—A district of the Rajpoot state of Jeypore, the management of which during the distracted state of Jeypore was assumed by the British, who, however, in 1837, again restored it to the rajah of Jeypore. Its centre is in lat. 27° 42', long. 75° 58'.

TOORKEIRA.—A town in the British district of Candeish, E.I.C. Ms. Doc. presidency of Bombay, 64 miles N. by E. of Malligaium. Lat. 21° 27', long. 74° 43'.

TOOSHAM, in the British district of Hurriana, lieutenant-governorship of the North-West Provinces, a town on the route from Hissar to Rewaree, 22 miles S.E. by S. of the former. Lat. 28° 51', long. 76°.

TOOTOO, in the Rajpoot state of Jessulmeer, a village on the route from the town of Bekaneer to that of Jessulmeer, and 55 miles N.E. of the latter. The road in this part of the route is heavy, lying among sandhills. Lat. 27° 12', long. 71° 49'.

TORA, in the district of Peshawar, division of the Punjab, a town situated 20 miles from the right bank of the Indus, 30 miles N.E. of the town of Peshawar. Lat. 34° 9', long. 72° 8'.

TORAGUL.—A town in the British district of Belgaum, presidency of Bombay, 48 miles E. by N. of Belgaum. Lat. 15° 56', long. 75° 17'.

TORBELA.—A small town in the north of the Punjab, and on the left or eastern bank of the Indus, a little below where it issues from the mountains and flows over the plain in a broad and shallow, yet still very rapid current. Below Torbela, and between it and Attock, are the five fords of the Indus. These are dangerous at all times, from the icy coldness and extraordinary rapidity of the stream; and in summer they are, in consequence of the swell of the stream, totally impracticable. The river is here smooth, rapid, and about 200 yards wide. Lat. 34° 7', long. 72° 50'.

S.S.W. from Jeypoor, and 56 miles E. by S. from Ajmeer. Lat. 26° 16', long. 75° 34'.

TOREE.—A town in the British district of Ramgur, presidency of Bengal, 46 miles W.S.W. of Hazareebagh. Lat. 23° 40', long. 84° 46'.

TOREESHA RIVER rises in lat. 26° 57', long. 89° 14', in the territory of Bhotan, and, flowing south thirty-eight miles through Bhotan, and forty miles through Coosh Behar, falls into the Durah river, in lat. 25° 56', long. 89° 31'.

TORIORE.—A town in the British district of Trichinopoly, presidency of Madras, 23 miles N.N.W. of Trichinopoly. Lat. 11° 9', long. 78° 39'.

TORRA.—A town in the territory of Nagpoor, 152 miles E. from Nagpoor, and 122 miles S.S.E. from Ramghur. Lat. 21° 8', long. 81° 30'.

TORRES.—Two islands in the Mergui Archipelago, situate 72 miles from the coast of Tenasserim. They are about lat. 11° 47', long. 97° 36'.

TOUDAN.—A town of Eastern India, in the British territory of Pegu, situate on the right bank of the Irawady river, and 30 miles N. by W. from Prome. Lat. 19° 12', long. 94° 56'.

TOUNGHOO.—See Tongo.

TOUTOULI.—A village in the British district of Rohtuk, lieutenant-governorship of the North-West Provinces. Lat. 28° 55', long. 76° 37'.

TOUVERAMCOORCHY.—A town in the British district of Madura, presidency of Madras, 20 miles N.E. by N. of Madura. Lat. 10° 20', long. 78° 27'.

TOWANG.—A town in the native state of Bhotan, situate on the left bank of the Demree river, and 77 miles N. by E. from Durrung. Lat. 27° 30', long. 92° 19'.

TOWARUM.—A town in the British district of Madura, presidency of Madras, 58 miles W. of Madura. Lat. 9° 55', long. 77° 20'.

TOWRA,¹ in Sirhind, a village in the British district of Umballa, on the route from Kurnal to Patiala, and 46 miles N.W. of the former place. It is situate in a level, fertile country, imperfectly cultivated, and in consequence overrun with jungle. The road in this part of the route, notwithstanding—
TOW—TRA.

ing the level character of the country, is scarcely practicable for guns or carriages. Distant N.W. from Calcutta 1,011\ 2 miles. Lat. 30° 14', long. 76° 40'.

TOWRAJ, a river of Hyderabad, rises in lat. 18° 22', long. 76° 18', and, flowing easterly for thirty-five miles, falls into the Manjera river, a feeder of the Goudavery, in lat. 18° 22', long. 76° 44'.

TRANDA, or TURANDA, in Bussahir, a village in the district of Koonawar, is situate near the left bank of the Sutluj, and at the confluence of the Chonda torrent. It lies on the route from Rampoor upwards, ascending the left bank of the Sutluj. Tranda is pleasantly situate, and is a neat village of substantial, well-built houses, embosomed in a wood of lofty deodars: it contains about twenty families.\ 2 Elevation above the sea 7,089\ 3 feet. Lat. 31° 38', long. 77° 55'.

TRANQUEBAR.—A town within the limits of British district of Tanjore, presidency of Madras. There is a slight curvature in the shore here, concave towards the sea, so that a small bay is formed, causing the surf to be less violent here than in the more exposed part of the coast. It is surrounded by walls, and protected by the fort called Dansborg, which, being white, as well as most of the houses, the place is conspicuous when viewed from the sea. Besides the defence of the fort, the town is surrounded by a wall with bastions. Of public buildings, the most remarkable are a few Lutheran churches, a Roman Catholic place of worship, and the fort, containing the offices of government. The territory extends six miles from north to south, and three miles inland, and has an area of fifteen square miles. The soil is in general under cultivation, though in some places marshy, and throughout impregnated with salt. The greater part produces rice, and much of the remainder is planted with fruit-trees, especially the cocanut-palm, and other species of palm, the mango, and jak. The climate is considered healthy, in consequence of the prevalence of sea-breezes, which moderate the temperature, so that the thermometer is stated not to range higher than 100\°, its lowest limit being about 70\°. The settlement of Tranquebar was ceded to the British government in 1845 by the king of Denmark, for a pecuniary consideration.\ 5 The town, with its district, was stated in 1844 to contain 23,426\ 6 inhabitants, of

TRAVANCORE.  

A native state in the south of India, under the political superintendence of the presidency of Madras. It is bounded on the north by the territory of Cochin and the British district of Coimbatore; on the east by the British districts of Madura and Tinnevelly; and on the south and west by the Indian Ocean. It lies between lat. 8° 4’—10° 21’, long. 76° 14’—77° 38’: it has an area of 4,722 square miles. The most marked physical feature of the country is furnished by the Western Ghats, or Sukhein, as that great range is called in its southern part. Divided from the northern part by the great gap or valley of Palghat, it expands into a mazy group, overspreading the country to the eastward, and attaining in some places an elevation of 7,000 feet above the sea. The formation of these mountains is such as is referred by geologists to the earliest periods: “Hygrogene schists, penetrated and broken up by prodigious outbursts of plutonic and trappean rocks.” With these occur occasionally granite, gneiss, and hornblende, the primitive rocks being in some places overlaid extensively with laterite. The termination of the Western Ghats in the bold hill near the Amboli Pass, a little above Cape Comorin, is stated to be of granite. The line of water-heads forms, with little exception, the boundary to the east and north-east, and the drainage is effected by a great number of torrents, passing to the south-west, the west, and the north-west, which discharge their contents either into the Indian Ocean or into the Backwaters, as the British denominate an extensive series of shallow lakes running parallel with the coast, and communicating with the sea at certain places. The Perryaur, the most considerable of the torrents above mentioned, rises on the eastern frontier of Travancore, in a deeply secluded and nearly unexplored part of the Western Ghats, and about lat. 9° 15’, long. 77° 20’. Its course is very tortuous, but generally in a direction north-west, and ultimately expanding.
TRAVANCORE.

into a broad estuary communicating with the Backwater, it is discharged into the sea, in lat. 9° 58', long. 76° 18'; its total length of course being about 140 miles. After it has reached the plain country, it is called the Alwye, and is subject to enormous floods; so that though the channel is broad, it has been known during the monsoon to rise sixteen feet in twenty-four hours, and continue at that height for some months. Its mouth, called by seamen Cranganore river, or Aycotta river, flows between the south-west boundary of the territory of Cochin and north-west boundary of Travancore. The latter state has here a very short line of seacoast detached from the remainder, lying further southward. This detached piece of coast extends about four miles, to lat. 10° 10', where commences the seacoast of a detached portion of the territory of Cochin, which continues towards the south-east for about twenty-five miles, to Undarally. There the seacoast of Travancore recommences, and stretches in a south-easterly direction for 155 miles, to Cape Comorin, where it turns to the north-east for six miles, and then terminates at Cannakapoor. Throughout this whole extent of coast, there is no safe harbour for ships of any burthen; the shore is in general low, sandy, and covered with trees; but there are several roads having safe anchorage in favourable weather. The principal resorts of shipping along the coast are Aulapolay or Aleppi, which, though a small place, carries on a considerable trade in teak, 1 cocoanuts, coir or coconat-fibre, betel-nut, and pepper; but there being no harbour, ships of any considerable burthen must anchor in the open sea, four miles from the shore: Porca or Poracaud, a town exporting timber, coir, and pepper, where ships may anchor two miles from the shore, in six fathoms water: Iviker or Aibika river, an estuary by which the Backwater communicates with the sea, but so shallow (there being but five or six feet on the bar at high water) that only boats can pass, large ships being compelled to anchor three miles off shore: Quilon, a town on the north side of a small bight open to the south and south-west, but on other points sheltered by land and a projecting reef: Anjengo, where there is merely an open road, in which ships may anchor two miles off shore; but their boats are seldom available, on account of the violent surf, and consequently communication with shore is effected by means of the country boats: Pondera,
TRAVANCORE.

a small town, where the land is bold to approach, so that large ships can anchor near the shore: Taingaputnum, at the mouth of a river of the same name, which, in consequence of a bar, is accessible to none but small boats, except in the rainy season; but within the bar the navigation is practicable at all times, and is of considerable extent: Cuddeaputnum, having an unsafe anchorage between the shore and two rocky islets, a short distance from the shore. Cape Comorin is the next place deserving notice, but it is entitled to this distinction only as being the most southern point of India: it is a low, sandy spot. The whole extent of coast is indeed generally low, nowhere presenting anything more aspiring than a few cliffs of slight elevation; and this adds to the striking effect which the Ghats, about fifteen or twenty miles inland, must under any circumstances produce, from their extent and grandeur. The trading stations along this coast are little frequented during the south-west monsoon, which commences late in May, or early in June, and prevails till September. During June and July, there is a succession of severe squalls, accompanied with heavy rain, and on the coast by high seas; but the weather rather moderates towards the end of the latter month. The violence diminishes in August, and still more in September, though the weather in that month is often cloudy and threatening, and heavy showers of rain sometimes descend. The fair season succeeds, when the weather is occasionally rather close. In November, the north-east monsoon sets in, with far less intensity than that from the south-west, but still bringing rain, and cooling the air. March, April, and May are the hottest months of the year, and also the most unhealthy. In December, January, and February, the nights are comparatively cool, and the dews are heavy: exposure to them is dangerous, being apt to produce fever.

Notwithstanding the nearly equatorial position of Travancore, the high lands, in consequence of their great elevation, enjoy a moderate temperature, and even the lower part of the territory is cooled by the great fall of rain, and by the proximity of the mountains and of the sea. The thermometer at Trivandrum seldom rises above 90° in any season, nor above 75° during the south-west monsoon. In a series of observations made at Quilon during the years 1835 and 1836, the highest range of
the thermometer was 88°, and the lowest 69°; the former in
April and May, in the afternoons; the latter in December and
January, immediately before daybreak. The climate is moist,
and the average fall of rain considerable. Though to European
constitutions somewhat enervating, it is not considered posi-
tively unhealthy. As there is never any cold bracing weather,
the recovery of invalids is usually slow; and in rheumatic
cases, or where there exists a tendency to pulmonary disease,
the dampness of the atmosphere is decidedly injurious.

Notwithstanding the great mountain masses, and the pre-
valence of primary or early rock formations in Travancore, its
mineral resources appear to be very scanty, no metal of
importance except iron being reported to be found in it. Its
zoology is varied and important. Elephants are very numerous
among the wooded valleys and table-lands of the Ghats, where
tigers of enormous size are also common: bats as large as
chickens abound: the wild buffalo, the wild swine, the elk,
the leopard, the black leopard, and the ant-bear are found:
monkeys exist in great numbers and variety: the antelope, the
civet cat, the jackal, the hare, the ichneumon or mongoose, the
otter, and a seal of diminutive size, are also to be reckoned
among the animals known in Travancore. Of birds, there are
the hawk, the raven, the vulture, the peafowl, the jungle-fowl
(Gallus gallinaceus), the pied bird of Paradise (Picus orientalis),
parrots and paroquets innumerable, and extremely destructive
to the crops; and lastly, aquatic birds of divers species and in
great numbers. Of reptiles, there are snakes, various in kind
and numerous in quantity, many of them of deadly venomous
character; scorpions and centipedes: alligators of great size
swarm in the rivers and lakes, and are very voracious and
destructive; human beings, as well as inferior animals, occasion-
ally becoming their prey. Their principal food, however,
is fish, of which there is great abundance in the rivers and
lakes, in addition to that afforded by the sea.

The soil on the more elevated surfaces is light and gravelly,
but in the low grounds it is a deep black mould, formed either
by deposits from inundations or decayed vegetation. In such

* For minute information respecting the meteorology of Travancore,
see Madras Journal of Literature and Science, vol. v. 318; vi. 161, 339;
vii. 145, 413; ix. 199, 454; x. 202, 448.
soils rice of excellent quality is produced in great plenty; the sago-palm thrives well, and yields an excellent product. Many plantations of mulberry have recently been made by the rajah, in the hope of producing silk on a large scale. A great variety of vegetables congenial to the climate are cultivated; and many European esculents may be brought to maturity.

The communication between the lower parts of the territory is much facilitated by inland navigation through the Backwaters; and a trifling outlay in their improvement would open a channel from Trivandrum, the capital, to Trichoor, a distance of 200 miles. The rajah of Travancore some years since formed on his eastern frontier, towards Tinnevelly, a double line of works, extending from a place on the seashore, about half a mile to the west of Cape Comorin, in a northerly direction, to a point where the Western Ghats become impassable for an army. Horsburgh viewing this work, thus notices it:—"The low country seems divided by a wall or trench stretching from the shore to the mountains, and fortified by mounds of earth." The same rajah also constructed a line of works on his north-western frontier, "as a northern boundary towards Calicut, running east and west from a point of the hills [the Western Ghats] deemed inaccessible, chiefly behind or south of a river which discharges itself into the estuary" falling into the India Ocean between Kodungaloor and Ayacotta. In 1789 "this miserable wall," as it is styled, by a military writer, was forced and partially destroyed by Tippoo Sultan; and as the rajah was under British protection, the aggression gave rise to the war with Mysore in the same year. As the whole country is now subject to British supremacy, those feeble defences have been left to the natural but speedy progress of decay.

The population of Travancore consists of Brahmins, Mussulmans, and Christians, besides a few Jews. Its amount is returned at 1,011,824. Brahmins are very numerous, and are either settlers from other countries or Namburis, considered to be aboriginal Brahmins, highly regarded by the rest of the Brahminist population, over whom they have a more powerful influence than even in other parts of India. The most numerous and important class are, however, the Nairs, who, although of the Sudra or labouring caste by descent, are at present found...
engaged in various occupations, and from among whom the rajah's troops are recruited. As is the case with the Nairs elsewhere, they do not marry, but select a young girl, and having performed the idle ceremony of tying a band round her neck, and making her some small present, send her back to reside in the house of her father or brother, where she is at liberty to live in licentious intercourse without restraint. The Namburis are said to be the most favoured lovers of the women placed in these extraordinary circumstances. The male portion of the Nair population live in a course of profligacy similar to that followed by the women; and as none know their own offspring, they regard their sisters' children as their heirs. The rajah appears to belong to this singular class. The Mussulmans comprise the Moplahs, descendants of Arabs settled on this coast, and the Lubbis, a mixed race between the Arabs and Hindoos, besides a few of Pathan descent. Christians probably form a more numerous proportion of the population here than in any other part of India, if the Portuguese dominion of Goa be excepted. They are of three classes: first, the ancient Christians of St. Thomas, or of the Syrian or Jacobite church, who regard the patriarch of Antioch as their spiritual head. These Christians are perpetually at war among themselves, and have appealed to the British government, which has, however, declined to interfere in their disputes: second, Romanists, descendants from Christians of the last-mentioned denomination, but forcibly made to acknowledge the supremacy of the pope: third, Portuguese Romanists, and descendants of heathen natives, converted by missionaries of that nation. The pope is of course acknowledged as the head of the followers of the Church of Rome, the chief local authority being exercised by a vicar-apostolic residing at Verapoli. The Christians in the aggregate are stated to amount to an eighth of the whole population; and in sailing close to land, their churches may be observed occurring at short intervals along the shore of Travancore. Besides the denominations of Christians already mentioned, there are a few Protestants, descendants of converts made by the Dutch, and now under the spiritual care of a British missionary. According to a clerical authority, who appears to have given much attention to the subject, the number of Syrian Christians in Travancore is about 70,000;
TRAVANCORE.

that of the Romish or Papal Christians about the same; and the entire number of professed Christians, including the Protestants, about 150,000.

In the secluded parts of the mountains is a wild race, extremely rude and savage in their habits, but not ferocious, living on game or the spontaneous produce of the forest. Slavery exists in Travancore, and the slaves are described as "in the lowest possible state of degradation." Not only are they held by private persons, but some are the property of the government, which derives a small revenue from letting out their services to such cultivators as require them. The British Resident has recently pressed upon the minister the manumission of the children of these slaves; in addition to which, the home authorities have suggested the emancipation of the parents also; and the subject of predial slavery generally, with a view to its entire abolition at an early period, has been recommended to especial attention. In consequence of this pressure, a proclamation was issued in 1858, declaring free the children of slaves of the state who may be subsequently born; forbidding the seizure of private slaves in satisfaction of debts; recognising the right of slaves to possess property, and to enjoy the protection of the law; directing the emancipation of slaves connected with property lapsing to the state; prohibiting without consent the sale and separation to a greater distance than fifteen miles of slave parents and children; and prescribing regulations intended to preserve that unhappy class from oppression. How far these rules will be effective against the opposition of both prince and people remains to be seen; but it is something to have obtained a recognition of the right of slaves to be dealt with as human beings.

The higher ranks of the people of Travancore are stated to be intelligent, especially the Nairs, "who have a quick apprehension, are admirable accountants, and perform the operation of writing with a rapidity and adroitness quite peculiar to themselves." They are, however, in general a listless, unimpassioned race, little characterized by atrocious criminality (except in regard to one branch of the moral code), but addicted to lying; and from their depraved notions respecting the union of the sexes, steeped in the grossest licentiousness. Such a course of life is, as might be expected, attended by

THE DISEASES WHICH ARE ITS USUAL PENALTIES, AND WHICH NOWHERE ARE MORE GENERAL OR MORE VIRULENT THAN IN TRAVANCORE.

There are two passes through the hills to Tinnevelly, lying to the east of the Western Ghauts. Of these, the Arungol Pass, situate in lat. 8° 55', can be traversed only during the rains, from June to December, without incurring great hazard of contracting deadly fever. The Arambooli Pass, seventy miles farther south, is considered to be perfectly safe at all times. The principal places, Trivandrum the capital, Quilon, Aibika, Aulapolay or Alippee, and Anjengo, are noticed under their respective names in the alphabetical arrangement.

The early history of Travancore is too obscure and too unimportant to justify the bestowal of any notice upon it except in a work purely antiquarian. Its first political or commercial relation with the East-India Company was in 1678, when that great corporation, by permission from the government of Travancore, established a factory at Anjengo, on the seacoast. During the prolonged warfare waged by the British with Hyder Ali and his son Tippoo Sultan, the British invariably found the rajah of Travancore a steadfast ally; and in that relation he was, in 1784, included in the treaty between the East-India Company and the sultan of Mysore. In 1789, Tippoo Sultan, under the double impulse of resentment and ambition, attacked the rajah of Travancore, and after a smart repulse, forced the lines which had been erected for the defence of the country on its northern frontier, towards Cochin, over-running and cruelly devastating the Travancore territory. Lord Cornwallis, then Governor-General, regarding this attack on an ally as an act of hostility against the British government, commenced military operations, which ended in Tippoo Sultan being deprived of half his dominions, and compelled to restore all that he had wrested from the rajah of Travancore. In 1797, the rajah concluded with the East-India Company a treaty, by which he engaged to pay an annual subsidy adequate to maintain three battalions of native troops, with proportionate artillery, to be stationed within his territory. By a subsequent treaty in 1805, the rajah agreed to pay annually, in addition to such subsidy, a sum adequate to maintain one regiment of the East-India Company's native infantry; and in case an additional force should be required for the defence of his
territory against attack or invasion, to contribute jointly with
the Company towards the discharge of the increased cost such
a sum as should appear, on an attentive consideration of the
rajah's means, to bear a just and reasonable proportion to his
net revenues. It was further agreed, that in case the Governor-
General in Council should consider that there were grounds
for apprehending failure of funds to defray the expense of the
permanent military force, or the extraordinary charges that
might arise under the terms of the treaty, he was to have the
power to introduce at his discretion such regulations and
ordinances, fiscal or otherwise, as might appear necessary for
the due administration and government of the state under the
management of the servants of the East-India Company; and
after due notice, such portions of territory as might be required
were to be placed under the exclusive authority and control of
the said officers. It was, however, provided that the rajah's
actual receipt from his territorial revenues should not be less
than two lacs of rupees, together with one-fifth of the net
revenues of the whole of his territories; the Company en-
gaging to secure the said amount, and cause it to be paid for
the rajah's use at all times and in every possible case. The
rajah was to hold no communication with any foreign state
without the previous knowledge and sanction of the Company,
not without such to admit any European foreigner into his
service; nor to suffer any European to remain within his terri-
tories. This treaty, although declared to be binding on the
contracting parties "as long as the sun and moon shall
endure," failed in securing permanent amity and good faith:
the ill government of Travancore was extreme, and the
financial position of the state deplorable: retrenchment was
indispensable; and to relieve the treasury during the time
necessary for performing it effectually, the payment of half the
additional subsidy was remitted for two years. No adequate
reform, however, took place; the rajah would take no effective
steps for reducing his expenditure; a part of the arrears of
subsidy was tardily liquidated, but a very large portion still
stood undischarged: all power was centered in the hands of
a corrupt minister, and the remonstrances of the British
Resident were unheeded alike by him and his master. At
length it became evident that something more than what, in
more modern times, has been called "passive resistance," was intended. Preparations for direct hostility were made, almost without an attempt at concealment; and so serious did the state of affairs appear to the government of Madras, that two bodies of troops were ordered to be put in motion for Travancore. These vigorous measures were, however, suddenly suspended, in order to try the effect of negotiation, which proceeded in the usual style of oriental diplomacy, till broken off by an attack on the house of the British Resident, and an attempt to murder him. That functionary succeeded in escaping on board a British ship, which fortunately arrived just in time to afford the means of his deliverance. Nearly coincident in time with the attack on the Resident, was an atrocious outrage committed on a small party of British soldiers, who being on board a vessel which put into Alleppey for water, were treacherously induced to land, and then brutally murdered. An attack on the subsidiary force stationed at Quilon seems to have determined the Madras government to substitute arms for negotiation, which latter had been persevered in even after the attempt to assassinate the Resident. The war thus tardily commenced, was, however, vigorously carried on, and consequently was but of brief duration. The dewan fled, and after wandering for some time, subjected to much privation and suffering, terminated his life by his own hand. His brother, who was involved in the guilt of the murders at Alleppey, was apprehended and publicly executed. This took place early in 1809. On the restoration of peace, the British Resident, at the solicitation of the rajah, assumed the entire management of the state, as provided in the treaty of 1805, and exercised the power so judiciously, that in a few years its finances were freed from embarrassment, and various useful reforms effected. A feeble attempt to destroy the British authority was made in 1812, but immediately suppressed. Soon afterwards an infant rajah succeeded to the throne, to the full enjoyment of the rights of which he was admitted on the completion of his sixteenth year. The country being surrounded by British possessions, excepting that portion bounded by the sea, was considered safe from external attack; and internal peace appearing to be firmly established, the continued presence of the subsidiary force was deemed unnecessary. It was accordingly
withdrawn, and in 1832 the entire responsibility of preserving the peace of the country was intrusted to the raja; but the British government is still bound to afford protection and assistance, should occasion demand its interposition. The raja died in 1846. During the last few years of his administration the country was allowed to deteriorate, notwithstanding the vigorous remonstrances of the British Resident. Extravagance wasted the accumulations of former years of careful management; and a decreasing revenue, coincident with a lavish expenditure, led to the neglect of nearly all public works, however important or necessary. The roads and bridges were left to go to decay, and even the works for irrigation, so essential to the prosperity of the people, and so closely connected with the immediate interests of the revenue, were not kept in repair. The raja last mentioned was succeeded by his brother, the Eliha raja, who, under the able administration of his dewan, corrected the improvident expenditure of his predecessor. This improved system, however, prevailed only for a time: a passion for expense of an alleged religious character seized the mind of the prince, and has been indulged to an extent which has called forth repeated remonstrance from the Resident.

TRAVANCORE, or TERAVANKODE, in the territory of Travancore, a decayed town, formerly the capital of the state, and giving name to it, but nearly deserted since the raja has transferred his residence to Trivandrum, on the seacoast. Lat. 8° 14', long. 77° 19'.

TRIBENNE.—A town in the British district of Jessore, presidency of Bengal, 40 miles N. of Jessore. Lat. 23° 42', long. 89° 9'.

TRICHANGODE.—A town in the British district of Salem, presidency of Madras, 29 miles S.W. of Salem. Lat. 11° 22', long. 77° 58'.

TRICHINOPOLY.—A British district under the presidency of Madras, named from its principal place. It is bounded on the north and north-east by the collectorate of South Arcot; on the south-east by the river Coleroon, which separates it from Tanjore; on the south by the native state of Pooodocottah (Rajaah Tondiman's territory), and by the British district of Madura; on the west by Madura and Coimbatore;
TRICHINOPOLY.

and on the north-west by the British district of Salem. It lies between lat. 10° 37'—11° 31', long. 78° 13'—79° 37', and is ninety-four miles in length from north to south, and sixty in breadth: the area is, according to official² return, 3,243 square miles. It is a flat tract, the surface being diversified only by some high ground to the south of the town of Trichinopoly, and in many places by granite rocks,³ some tabular, others with rounded summits, which seldom rise to any considerable height. The rock on which the fort of Trichinopoly stands is an exception, rising to an elevation of between 500 and 600 feet,⁴ and in the same part of the district there are some other large rocks of similar character. Besides those of granite, there are rocks⁵ of secondary trap and greenstone. "The granite has externally a dark or dull earthy colour; internally it is variegated, and contains a large proportion of felspar, with some quartz and mica. It is a hard and very durable stone, forming an excellent building material. Quarries of it are worked by the natives. It is hewn out into pillars and steps for staircases, and the walls of the forts and gateways are built of it." In the high tract to the south of the town of Trichinopoly the soil is sandy or gravelly, and generally barren and uncultivated; but with this exception, the cantonment is surrounded by rice-lands several square miles in extent. In the low grounds along the courses of the rivers, the sub-soil is a stiff, tenacious, red-coloured clay, with an intermixture of sand, from which excellent bricks and tiles are made. The overlying cultivable soil is a deep black mould, very fertile, and, under proper management, producing two crops annually. The mean annual fall of rain is considerable, though not excessive, amounting to from thirty to forty inches; still the district is characterized by aridity, and without the irrigation effected by means of the rivers and torrents flowing from the Ghauts and Mysore, the country would be a parched desert. "A steady high temperature, cloudless sky, a dry and close sultry atmosphere, with much glare and intense radiation of heat, are the characteristics of the climate of Trichinopoly. The heat, drought, and glare are often very intense for months together; the hot weather is, however, a good deal broken and varied by high westerly winds; and whirlwinds, often accompanied by clouds of sand and dust, recur at short intervals, often for a

⁵ Report, ut supra, 190.
TRICHINOPOLY.

week or two at a time. The high winds and dusty weather, which prevail chiefly during May, June, and July, render those months the most disagreeable part of the year, the atmosphere being obscured during the day by clouds of dust. The monsoons are not well marked, except by a change in the direction of the wind. The climate of this part of the southern division may, with tolerable accuracy, be divided into three seasons, viz., the hot and dry, the hot and windy, and the cool and showery; or more simply, into eight months hot and dry, and four showery. March, April, and May are always exceedingly sultry, with much thunder and lightning, and occasionally heavy thunder-showers occur; but from nine A.M. until four P.M. it is always disagreeably hot: June and July are also hot, although in a less degree, the heat being generally at its maximum about the middle of May. When the westerly wind sets in, the heat is moderated, but when accompanied by dust, it is, as already remarked, particularly unpleasant. Thunder-showers occasionally occur during a week or two in the months of August, September, October, and November, which are cool, cloudy, and pleasant. December, January, and the greater part of February are dry, cold in the mornings and evenings, but sultry and close during the forenoon. Fogs and dews are rarely known in the months of March, April, and May, when the country presents the appearance of a vast desert. The rivers and tanks become dried up; the trees shed their leaves, and vegetation is completely at a stand; the respiration of animals at this time panting and oppressed,—in short, all nature, both animal and vegetable, seems to droop and shrink from the raging mid-day heat. When the rains succeed, nature soon revives; vegetation bursts forth with new life and vigour, and the eye is relieved from the oppressive glare and barrenness. The soil being so arid and sandy, there are scarcely any fogs, vapours, or noxious exhalations; and in this respect the climate is salubrious, the atmosphere being seldom damp or humid."

The Cauvery, the principal river, enters the district at its western extremity, in lat. 10° 58', long. 78° 15', and flows through it in an easterly direction to Seringham, three miles north of the town of Trichinopoly, in lat. 10° 52', long. 78° 44', near which locality it divides into two branches; the northern,
TRICHINOPOLY.

called the Coleroon; the southern retaining the name of the Cauvery. The principal feeders of the Cauvery are the Bhavani, the Noyel, and the Ambravutty, flowing from the Western Ghauts, the Nilgherry group, and the table-land of Mysore; and the Jyaur, which, descending from the eastern declivity of the Eastern Ghauts, falls into the principal stream on the left side, just at the head of the island of Seringham. The Cauvery, having its principal feeders close to the Western Ghauts, is fully under the influence of the south-west monsoon, and conveys, to fertilize the Carnatic, an abundant portion of the rains driven from the ocean by that vast aërial current. The Cauvery is generally nearly empty during March, April, and the early part of May, towards the close of which a scanty stream frequently comes down; about the middle of June, the regular periodical inundation, caused by the south-west monsoon, reaches Trichinopoly; and by the beginning of July, the volume of water is sufficient not only to fill all the tanks and canals, but to afford a redundance of water, which finds its way to the sea by the two channels, the Coleroon and the Cauvery. At the height of inundation, the Cauvery is a vast torrent, for miles wide. The river continues to have a considerable quantity of water during August, but in the two months succeeding becomes very low, until replenished in the course of November by the rains of the north-east monsoon. During winter, it continues to fall, and by March, as already observed, is generally nearly dry. After the divergence of the Coleroon, the Cauvery sends forth on its right or south side a great number of branches, which traverse and intersect the delta of Tanjore. Of those branches, the most important is the Vennar, which diverges about eight miles below the town of Trichinopoly. The Cauvery is used to a considerable extent at certain seasons, as a means of communication and traffic, when cotton piece-goods, saltpetre, and some other wares are floated down from the British districts Coimbatore and Salem, and conveyed to the towns on the seacoast. The communication, however, is only practicable during the inundations; even then it is hazardous and uncertain, and can be effected only by means of circular baskets, ten or fourteen feet in diameter, and covered with buffalo-hides. As soon as those rude craft have reached their destination, the wicker is abandoned, having been pre-
vously stripped of the hides, which are transported back either by human labour or on bullocks.

Of the zoology of this district there is scarcely any authentic information. Its general aridity and barrenness are probably unfavourable to the multiplication of animals. The dry ground is infested with great swarms of white, black, and red ants, and other destructive insects, which commit great ravages both in the fields and in houses: water-snakes are very common in rice-fields, and scorpions; the cobra de Manilla and cobra de capella are occasionally met with: common striped squirrels are very numerous, noisy, and troublesome, frequenting the roofs of houses, and plundering the gardens: frogs swarm in the pools and tanks after heavy showers, and at night cause great annoyance by their loud and incessant croaking: eye-flies and musquitoes abound, especially after rain.

There are plantations of cocoanut-trees, made principally on account of the oil obtained from their fruit; but the chief alimentary crops are rice, ragi (Eleusine corocana), various kinds of millet, maize, and plantains. Sugarmc is little cultivated, but tobacco is grown in considerable quantities and of very fine quality. Everything in husbandry depends on irrigation, manure being scarcely used. Cotton is a product of some importance.

The population is returned at 709,196; a number which, compared with the area, indicates a relative density of 219 to the square mile. By much the greater part of the people are Hindoos, about a fifth part only being Mussulmans, and a very small proportion ostensibly Romish Christians. The language spoken in the district is the Tamul. The military station of the district is at the fort of Trichinopoly, the force stationed at which furnishes detachments to Negapatan, Tanjore, Combaconum, and Coimbatore. The district is divided into eight talooks. The principal routes are—1st, From north-east to south-west, from Madras, through the town of Trichinopoly, to Madura and Palamcott; 2nd, from east to west, from Tanjore, through the town of Trichinopoly, to Coimbatore; 3rd, from east to west, from Coombaconum to Trichinopoly. The principal places (Trichinopoly and Seringham) are described under their respective names in the alphabetical arrangement. Trichinopoly was included in the territory styled the Carnatic,
TRICHINOPOLY.

the civil and military government of which was vested in the British government, under the provisions of the treaty with the nabob, dated in 1801.

TRICHINOPOLY.—The principal place of the British district of the same name, under the presidency of Madras, a town, with a celebrated fort. The rock on which the fort is built is of sienite, estimated to be 600 feet above the alluvial plain,* from which it rises, and is a very striking object viewed from a distance at any point of the compass, and commands a very extensive and fine prospect over the surrounding country, including the island of Seringham, with its numerous pagodas, and the meanderings of the Cauvery, and its branch the Cole-roon. The fort is situate on a part of the rugged declivity of the rock, and two furlongs from the right bank of the Cauvery, which is embanked; but from want of skill, or of adequate expenditure on the works, they sometimes give way, thus admitting the inundation to lay the neighbouring country under water. The fort, with its strong and massy walls, constructed of solid masonry (which are in general still in a good state of repair, though in some parts rather dilapidated), bears the appearance of having been strongly and regularly built. The walls, which are in some places double, are from twenty to thirty feet in height, of very considerable thickness, and upwards of two miles in circumference. Within them is a very extensive petta or native town. The houses and huts are generally of the ordinary Indian construction, being low, small, and very closely huddled together, with small courts in front of them. They are without windows, and almost all present to the eye the appearance of being filthy, dark, ill-ventilated, and, according to English notions, extremely uncomfortable, being, what they cannot fail to be, decidedly unhealthy, with little prospect of improvement. They are, however, arranged in tolerably straight, wide, and regular streets, which are usually crowded at all hours of the day with multitudes of passengers, carriage-bullocks, and cattle of various kinds. Most of the streets have bazars, for the sale of native goods and wares of every description. The flagstaff is placed on the summit of the rock, and there is an easy access to it by means

* Only 830, however, according to the engraved notice under the frontispiece in Heyne's work.
of a spacious flight of stone steps, which, about halfway up, passes through the site of an old magazine, accidentally blown up in 1772. On the rock is a pagoda, forming a very striking object, and regarded with deep reverence by the Brahmanists.

The fort contains the arsenal, commissariat, ordnance stores, medical stores, pay-office, garrison hospital, and jail. It has been observed, that from the crowded streets, numerous buildings, and the proximity of the rock, the temperature of the fort is generally higher than that of the immediate neighbourhood or cantonment. The jail erected in 1806 was in a confined situation near the eastern extremity of the fort, and has been replaced by one of recent erection, in which due provision has been made for the separation of the several classes of prisoners, as well as for ventilation, drainage, and cleanliness.

The natives of this town are famed for their skill in the manufacture of hardware, cutlery, and jewellery; their harness and saddlery are also excellent in workmanship and materials, and very moderate in price. Large quantities of cheroots are manufactured, from tobacco of superior quality, grown in this and the neighbouring districts.

The cantonment, in which the troops composing the garrison are quartered, is at the distance of from two to three miles south-west of the fort, on an extensive open plain, studded with masses of granite. It is very extensive, its various buildings and establishments being scattered over an area of not less than from six to seven miles in circuit. Many of the bungalows or lodges occupied by the civil and military officers are spacious and well constructed, and have large and well-stocked gardens. The troops there are generally one regiment of native cavalry, one company of European foot artillery, one regiment of her Majesty’s foot, and four regiments of native infantry, forming a force of between 4,000 and 5,000 men: the native infantry corps furnishes detachments to several British military stations. The cantonment is healthy, and has abundance of excellent water, from a considerable branch of the Cauvery, which flows through it. In a central part of the cantonment are public rooms, built and supported by voluntary subscription: they contain a reading-room and good library. In the south of the cantonment, and three miles from the fort,
is Saint John's Church, a handsome building, affording ample accommodation for the European inhabitants and troops. In the western part of the cantonment there is a small Romish chapel, at which a Portuguese priest officiates. In the fort is a large missionary chapel.

There are in the vicinity of the town some excellent gardens, producing vegetables in abundance, and mangoes, grapes, pine-apples, custard-apples, limes, oranges, water-melons, and various other fruits.

The mean annual temperature of Trichinopoly is about 85°, the maximum in the shade being 102°, the minimum 68°. The population, exclusive of the troops and other government establishments, is estimated at 80,000, of whom about a fifth are Mussulmans.

Trichinopoly figures rather conspicuously in the history of India during the early part of the eighteenth century. Its Hindoo rajah died without issue in the year 1732. Three wives survived him, two of whom dutifully submitted to conflagration; the remaining one preferred to live, and succeeded to the government. A party being raised to oppose her pretensions, she solicited the aid of the Mussulman nabob of Arcot, who sent a force to her assistance, commanded by his son, with whom was associated a man named Chunda Sahib, who occupies a distinguished place in the records of that period. The ranee was sufficiently well acquainted with the average character of the good faith of Indian princes, to entertain some misgivings as to the ulterior designs of those whose aid she had been compelled to invite; to allay them, Chunda Sahib took an oath on the Koran, as it was believed, that the foreign troops should be employed for no other purpose but the establishment of the ranee's authority; and that when that should be secured, they should be withdrawn. To avoid profanation of the holy volume of the Mahometans, it is usual to wrap it in a covering when used for the administration of an oath. When Chunda Sahib thus solemnly attested the pure intentions of himself and his master, the covering was such as was usually employed, but it enveloped only a brick, and the deponent did not feel his conscience bound by an engagement made on so vile a material: accordingly, the first use he made of his power was to subvert the authority of the ranee, and
TRICHINOPOLY.

subject her to imprisonment. This distinguished service seemed to entitle Chunda Sahib to the office of administering the government of the place which he had so honourably won, and he was without hesitation appointed thereto. But Chunda Sahib had enemies in the court of his master, which, like all other eastern courts, was a hotbed of intrigue. Failing in their endeavours to prejudice the nabob against one of his favourite servants, these persons had recourse to the Mahrattas, who, ever on the watch for opportunities to acquire either wealth or power, readily assented to do the work of those who envied Chunda Sahib's good fortune, but in reality, as on all other occasions, were bent only on performing their own. The result was the alienation of Trichinopoly from the rule of the nabob of Arcot, under which it had so recently been brought, the Mahrattas succeeding in reducing the fortress, and making its perjured conqueror prisoner. This event took place in 1741. The Mahrattas did not long retain possession of Trichinopoly; and throughout the wars urged between the English and French for supremacy in India, this place continued to be a frequent object of attack or intrigue. One of the latest and most memorable events connected with its history, is the march of Captain Calliaud to its relief, when besieged by the French in 1757. Captain Calliaud\textsuperscript{8} was before Madura, which he was preparing to attack, when he was informed of the danger of Trichinopoly, which had then sustained bombardment for several days, an assault being hourly expected to follow. He did not receive the news till three o'clock in the afternoon of the 21st May, and at six he was on his march, which movement was commenced without tents, baggage, or artillery. The men bore their own food; a few bullocks only were taken, and these were laden with ammunition. At six o'clock in the evening of the 25th, the relieving force was within twelve miles of Trichinopoly, having advanced thus far without annoyance; but the great difficulty,—that of entering the town, remained to be overcome. The march of Captain Calliaud was not unknown to the enemy, and troops had been so disposed as to command every line by which, under ordinary circumstances, the place could be approached from the direction of the expected relief. It was discovered, also, that some spies had mixed with the English troops, for the purpose of ascertaining the precise

\textsuperscript{8} Thornton, Hist. of British Empire in India, L. 363, et seq.
route which would be taken. This precaution, devised for his destruction, Captain Calliaud converted into the means of safety. The spies were suffered to exercise their office undisturbed and apparently unsuspected, until the commander had apparently fully made up his mind as to the route by which he would seek admission to the town, and having pursued it undeviatingly for about six miles, the spies dropped off to communicate the information of which they thought themselves possessed to their employers. Thus rid of these persons, Captain Calliaud, as soon as such a step could with safety be taken, changed his track for another, which, being naturally regarded as unlikely to be selected, had been left by the enemy altogether unguarded. This extraordinary route for the passage of troops lay across rice-fields under irrigation, which were thereby converted into one continuous morass. Every step had to be taken knee-deep in mud and water. The march occupied seven hours, although the distance was less than that number of miles: thus was occupied the night. By break of day firmer ground was obtained, and the labours of the troops were rewarded and cheered by the sight of the city and fort of Trichinopoly at no great distance. A part of the garrison was drawn out, accompanied by two field-pieces, to protect the reinforcement, if any attempt were made to intercept them; but the only duty to which they were called was to give welcome to their deliverers, who marched into the fort amidst universal shouting. Captain Calliaud's attention had been required at so many points during this extraordinary night march, that he had undergone more fatigue than any man among those whom he commanded, and he was in a state of perfect exhaustion. Notwithstanding this, however, he marched at the head of his troops when they entered the fort, though obliged, from weakness, to be supported on each side by a grenadier. The enemy continued anxiously to watch for the approach of the English party by the expected route, till a triumphant salute assured him of their being beyond the reach of his arms. The immediate consequence of this admirably-performed movement was the precipitate retirement of the French from before the place. Distance of Trichinopoly from Madura, N.E., 75 miles; Coimbatore, E., 120; Tanjore, W., 29; Bangalore, S.E., 165; Madras, S.W., 190. Lat. 10° 50', long. 78° 46'.
TRI.

TRICHOOR,\(^1\) in the territory of the native state of Cochin, under the political superintendence of the presidency of Madras, a town, the principal place of a talook\(^2\) or subdivision of the same name. Of the towns in the territory, it is next in importance to Cochin: the site is advantageous, being close to the eastern coast of the Backwater, an extensive estuary or shallow lake, by which it communicates with Chaugat and the city of Cochin; but by land the only route is that proceeding north-east to Palghat, and being a defile through jungles infested with wild elephants and other dangerous animals, and very unhealthy from November to March. Among the Brahmins it is much celebrated for its sanctity. The fortifications which formerly encompassed the town have been destroyed, and excellent barracks, with an hospital, stores, and magazine, have been built. The sepoys, of whom there are about 150, have dry, airy, and commodious dwellings; and the station is considered very healthy. There are here a native police-station, a court, and jail. Distance from the city of Cochin, N., 41 miles; Bangalore, S.W., 190. Lat. 10° 32', long. 76° 16'.

TRICOLUM.—A town in the British district of Malabar, presidency of Madras, 69 miles S.E. by S. of Cannanore. Lat. 11° 2', long. 75° 59'.

TRICOTA, a lofty mountain in the north of the Punjab, and on the south of the valley of Cashmere, has such an elevation as to be covered with snow the greater part of the year. North of it is a remarkable spring, from which the water gushes at very short and regular intervals, as if expelled by pulsations, and is received into a spacious reservoir. During December, January, and the beginning of February, the water is too warm for the hand to bear immersion in it, but at other times cold. According to Von Hügel, this is caused by the water produced by the melting of snow on the heights cooling that yielded by the fountain, which being heated by subterranean fire, has this naturally high temperature during the winter months, when the snows and ice-bound streams withhold their cold admixture. This natural wonder causes the place to be considered holy by the Hindoos, and consequently to be visited as a place of pilgrimage. Lat. 32° 58', long. 74° 37'.

Bartolomeo, Voyage to the East Indies (Translation), 128.
TRI:

TRILOKNATH.—A town within the dominions of Gholab E.I.O. Singh, the ruler of Cashmere, situate on the left bank of the Chandra river, and 140 miles S.E. from Sirinagur. Lat. 32° 43', long. 76° 43'.

TRIMALROYENPATAM.—A town in the French territory of Karical, situate within the British district of Tanjore, presidency of Madras, 47 miles E. by N. of Tanjore. Lat. 10° 53', long. 79° 53'.

TRIMBUK.—A town in the British district of Ahmednuggur, presidency of Bombay, 16 miles W. by S. of Nassik. Lat. 19° 58', long. 73° 32'.

TRIMUNGA LUM.—A town in the British district of Madura, presidency of Madras, 11 miles S.W. of Madura. Lat. 9° 50', long. 78° 3'.

TRINOMALEE, in the British district of South Arcot, presidency of Madras, a town at the base of a hill surmounted by a lofty pagoda, which commands all parts of it. Here, in the year 1787, a British force under Colonel Smith defeated an army far superior in numbers and artillery, commanded by Hyder Ali and Nizam Ali. It was besieged in the year 1791 by Tippoo Sultan, and obliged to surrender, in consequence of the cross fires from a neighbouring hill which commanded it. At present Trinomalee is a considerable and rather well-built place, having a numerous population, including a large proportion of Brahmins. Distance from Cuddalore, N.W., 58 miles; Madras, S.W., 103. Lat. 12° 14', long. 79° 7'.

TRI PATOOR.—A town in the British district of Madura, presidency of Madras, 36 miles E.N.E. of Madura. Lat. 10° 7', long. 78° 40'.

TRIPETTY.—A town in the British district of North Arcot, presidency of Madras, and the seat of one of the most celebrated Hindoo temples south of the Kistnah river, situate 51 miles N. by E. of Arcot. Lat. 13° 38', long. 79° 29'.

TRIPPATUR.—A town in the British district of Salem, presidency of Madras, 63 miles N.N.E. of Salem. Lat. 12° 29', long. 78° 36'.

TRIPUNAITORAI, in the raj or state of Cochin, a town about two miles N.E. of the Backwater, an extensive shallow

* Of the Trigometrical Survey; 1 the Tripontary of Hamilton, who states it to be the usual residence of the rajah of Cochin.
lake, the reservoir of numerous streams flowing from the Western Ghats. Bartolomeo states,\(^2\) in the year 1787, that it was the residence of the rajah of Cochin, and it probably continues to be so at present. Distance from Cochin, S.E., seven miles; Calicut, S.E., 105; Bangalore, S.W., 303. Lat. 9° 57', long. 76° 24'.

TRISUL GUNGA, a river, called in the upper part of its course the Bori Gunduk, rises in the Himalayas, in lat. 28° 57', long. 85° 48', and flowing in a south-westerly direction, forms a junction with the Gunduk in lat. 27° 31', long. 84° 5'.

TRITCHINDoor.—A town in the British district of Tinnevelly, presidency of Madras, 35 miles E.S.E. of Tinnevelly. Lat. 8° 30', long. 78° 10'.

TRITRAPUNDI.—A town in the British district of Tanjore, presidency of Madras, 40 miles E.S.E. of Tanjore. Lat. 10° 38', long. 79° 42'.

TRITTANY.—A town in the British district of North Arcot, presidency of Madras, 26 miles N.E. of Arcot. Lat. 19° 10', long. 79° 39'.

TRIVALUM.—A town in the British district of North Arcot, presidency of Madras, eight miles N.W. of Arcot. Lat. 12° 59', long. 79° 18'.

TRIVANANELLUR.—A town in the British district of South Arcot, presidency of Madras, 29 miles W.N.W. of Cuddalore. Lat. 11° 52', long. 79° 24'.

TRIVANDRUM,\(^1\) in the territory of Travancore, under the political superintendence of the presidency of Madras, a town situate\(^3\) a mile and a half N.E. of the shore of the Indian Ocean, and on the right bank of a small river or torrent flowing from the Western Ghats. The town is of considerable size, having its greatest length north and south. At the southern extremity is the fort, about half a mile square, without a ditch, with walls of mud cased with stone at some parts of the north and west faces. It is for the most part an ugly, ill-built pile; but the rajah's palace, within its precincts, is a large handsome edifice in the European style.\(^3\) At the north of the town are the barracks and the old cantonment, formerly occupied by a regiment of native infantry and a detachment of artillery, and at present the head-quarters of the Nair brigade. On an eminence outside the town, and 196 feet\(^4\) above the

---

\(^1\) E.I.C. Ms. Doc.

\(^2\) Bartolomeo, *Voyage to the East Indies*, 118.

level of the sea, the raja in the year 1837 built an observatory, seventy-eight feet in length from east to west, and thirty-eight in breadth; containing a transit instrument, a transit-clock, two mural circles, an altitude instrument, an azimuth instrument, and two powerful telescopes, one a refactor, the other a reflector; besides meteorological, magnetic, and pendulum apparatus. Elevation of the town above the sea 135 feet; distance from Cannanore, S.E., 255 miles; Madras, S.W., 395. Lat. 8° 28', long. 77° 2'.

TRIVATOOR.—A town in the British district of North Arcot, presidency of Madras, 22 miles S.E. of Arcot. Lat. 12° 39', long. 79° 36'.

TRIVELORE.—A town in the British district of Chingleput, presidency of Madras, 25 miles W. of Madras. Lat. 13° 8', long. 80°.

TRIVUR.—A town in the British district of Masulipatam, presidency of Madras, 76 miles N.N.W. of Masulipatam. Lat. 17° 8', long. 80° 40'.

TROMBAY.—A island, named after the town of that name, situate between the island of Bombay and the mainland of the British district of Tanannah: the town is nine miles N.E. of Bombay, and in lat. 19° 1', long. 73°.

TRUNULVAUSEL.—A town in the British district of Tanjore, presidency of Madras, 57 miles N.E. of E. of Tanjore. Lat. 11° 13', long. 79° 56'.

TSAGAING.—A town of Burmah, on the right bank of the Irawady river, and three miles N.N.W. from Ava. Tsagaing, or Chagain, was formerly the seat of imperial residence: it is situate "partly at the foot and partly on the side of a rugged hill, that is broken into separate eminences, and on the summit of each stands a spiral temple. These temples rising irregularly one above another to the top of the mountain, form a beautiful assemblage of objects, the effect of which is increased by their being carefully whitewashed and kept in repair." Lat. 21° 55', long. 96°.

TSALENG.—A town in the native state of Bhotan, 101 miles N.W. by W. from Durrung, and 72 miles N. from Goalpara. Lat. 27° 10', long. 90° 40'.

TSHOMORIRI.—See CHAMOBIREIL LAKE.

TSINGUH MYO.—A town of Burmah, situate on the left
bank of the Irawady river, and 49 miles N. from Ava. Lat. 22° 34', long. 96° 0'.

TSTALONTSKEIK.—A town of Burmah, situate on the left bank of the Khyendwen river, and 69 miles W.N.W. from Ava. Lat. 22° 14', long. 95° 4'.

TUAVEE, in the British district of Muzaffurnagur, lieutenant-governorship of the North-West Provinces, a village on the route from Kurnal to the town of Muzaffurnagur, and 39 miles S.E. of the former. It is an inconsiderable place, supplies are scarce, and the road in that part of the route is bad. Lat. 29° 28', long. 77° 35'.

TUBAH.—A town in the hill zemindarry of Jeypoor, in Orissa, 50 miles S. by E. from Jeypoor, and 89 miles N.W. by W. from Vizagapatam. Lat. 18° 20', long. 82° 33'.

TUDRI HARBOUR.—See CANARA.

TUDURU,¹ in the territory of Mysore, a village on the river Tunga,² 14 miles S.E. of Bednore. Lat. 13° 38', long. 75° 14'.

TUGRA.—A town in the British district of Backergunj, presidency of Bengal, 100 miles E. of Calcutta. Lat. 22° 30', long. 90°.

TUKHT-I-SULIMAN, or “Solomon’s Seat,” in Cashmere, a lofty hill,³ close to the city of Sirinagur or Cashmere, on the eastern side. The view from it is very noble, extending over the city, the contiguous lake or dal, and the whole of the valley of Cashmere, bounded on every side by mountains in most places crowned with perpetual snow. It is three-quarters of a mile long, rocky, bare of trees, but covered with grass where there are any patches of earth. Its rocks are of trap. On the summit is a massively-built Buddhist temple, having every mark of extreme antiquity: it is now converted into a mosque. Elevation above the sea 6,950 feet. Lat. 34° 4', long. 74° 59'.

TUKHWA, in the British district of Furruckabad, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to that of Futtehgur, and 88 miles S.E. of the latter. The road in this part of the route is generally bad, the country cultivated. Lat. 26° 58', long. 80° 3'.

¹ E.I.C. Ms. Doc. ² Journey from Madras, iii. 266. ³ Vigne, Kashmir, ii. 56.
TUL.

TULEHGAON.—A town in the British district of Poonah, presidency of Bombay, 22 miles N.E. by E. of Poonah. Lat. 18° 40', long. 74° 10'.

TULLAGAON.—A town in the native state of Hyderabad, or the Nizam's dominions, situate on the left bank of the Godavery river, and 126 miles N.W. by N. from Hyderabad. Lat. 18° 59', long. 77° 41'.

TULLAJA.—See TALLAJA.

TULLAGAON.—A town in the territory of Nagpoor, situate on the left bank of the Wurda river, and 61 miles W. from Nagpoor. Lat. 21° 8', long. 78° 12'.

TULL GHAT.—A pass in the mountains dividing the Tannah and Ahmednuggur districts, through which is a road leading from Bombay to Nassik, and continued thence to Agra. The pass is 65 miles N.E. by N. of the town of Bombay, and in lat. 19° 43', long. 73° 30'.

TULLODA.—A town in the British district of Candeish, presidency of Bombay, 76 miles N. by W. of Malligaum. Lat. 21° 36', long. 74° 14'.

TULLODEE.—A town in the territory of Nagpoor, situate on the left bank of the Wein Gunga river, and 110 miles S.S.E. from Nagpoor. Lat. 19° 41', long. 79° 48'.

TULLUCK,* in the territory of Mysore, a town, the principal place of the tallook or subdivision of the same name, near the north frontier, towards the British district of Bellary. In the year 1790 it was stormed and sacked by the Mahrattas. Distance from Chitteldroog, N.E., 26 miles. Lat. 14° 26', long. 76° 44'.

TULLUCKWARRA,† in Guzerat, or territory of the Guicowar, a town on the right bank of the river Nerbudda, which is navigable to the sea. The place is rudely fortified. Distance from Baroda, S.E., 30 miles; Broach, N.E., 40. Lat. 21° 58', long. 73° 32'.

TULSIPOOR,† in the kingdom of Oude, a town near the northern frontier, towards Nepal, on the route from Goruck-

* Talaker of Moor.†

† Town of Tului, a nymph beloved by Krishna, and by him metamorphosed into the plant tulsi or tulasi, Ocimum sanctum, or "sweet basil."
poor to Kumaon, 80 miles N.W. of the former, 115 N.E. of Lucknow. Lat. 27° 30', long. 82° 24'.

TULWANDEE, in the Reechna Dooab division of the Punjab, a town situated 13 miles from the left bank of the Chenaub, 45 miles N. of the town of Lahore. Lat. 32° 15', long. 74° 12'.

TUMACHABAD, in the British district of Benares, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Benares to Allahabad, 56 miles E. of the latter, 18 W. of the former. It has water from wells and a tank, and supplies are abundant. The road in this part of the route is excellent; the country level, wooded, and cultivated. Lat. 25° 16', long. 82° 45'.

TUMBARA, in the British district of Suharanpoor, a halting-place on the south-western declivity of the Sewalik range, and on the route from the town of Suharanpoor to that of Dehra, being 10 miles S.W. of the latter. It is merely a small expanse in the deep channel of the Mohun, a torrent, the course of which pursued upwards forms the road from the plain to the crest of the Sewalik ridge, bounding the Dehra Doon on the south. Jacquemont describes the vicinity as dreary in the extreme, and overrun with a long harsh grass, concealing numerous tigers and leopards, which infest the road, and render it highly dangerous to the traveller. Elevation above the sea 1,958 feet. Lat. 30° 13', long. 77° 59'.

TUMBONG KHA.—A town of Burmah, 47 miles E. from the left bank of the Irawady river, and 197 miles N.E. by N. from Ava. Lat. 24° 19', long. 97° 44'.

TUMBUDRA.—A river of the Mysore territory, formed by the junction of the rivers Toonga and Budra, in lat. 14°, long. 75° 43'. Thence it flows sinuously, but generally in a northern direction, for forty-five miles, to Headagatry, in lat. 14° 26', long. 75° 42', whence it turns to the north-east, and flows in that direction for fifteen miles, to Hurryhurr, in lat. 14° 30', long. 75° 52'. There it again takes a course generally north (but not without many sinuosities) for forty-five miles, to the confluence of the Wurda, which joins it on the left side, in lat. 14° 55', long. 75° 45'. From that confluence it turns north-east, and subsequently east, and then flows for 220 miles, to its fall into the Kistnah, on the right side, in lat.
TUM.

15° 58', long. 78° 19', having a total course of 325 miles. The length of the course of the Budra, the longest of the feeders of the Tumbudra, is ninety-five miles; so that the course of the continuous stream from the source of the Budra to the mouth of the Tumbudra is 420 miles. Ritter, quoting Cullen, states the confluence to be 952 feet above the sea. On the banks of the Tumbudra are teak-forests, the timber of which might, if rendered more buoyant by floats of bamboo, be sent down the Kistnah during the monsoon floods. The river "at all times contains water, but in the dry season, the channel being full of rocks, will not admit floats. In the rainy season it swells prodigiously, and is said to be in most places eight or ten feet higher than the top of the rocks. Its stream is there exceedingly rapid and muddy, and filled with large trees swept away by the flood, while in some places rocks come very near the surface." There is reason, however, to think that those great obstacles to navigation are only in the upper part of its course.

TUMLOOK,¹ in the British district of Midnapore, subject to the presidency of Bengal, a town on the right bank of the river Cossye, in this part of its course called the Roopnarayn. The site and vicinity are low, and protected by embankments, with a view to security from inundations, which, however, notwithstanding these precautions, sometimes occur, and cause much injury. Tumlook is the head-quarters of an agency for the manufacture of salt on government account. According to Wilford, it was originally called Tamralipta,² and was the capital of a realm of some note. There does not appear to be any direct route from Calcutta to this place, the absence of such accommodation being probably attributable to the nature of the intermediate country, which is marshy and cut up by watercourses. The direct distance is thirty-five miles; circuitously, by water, down the river Hoogly and up the Roopnarayn, or lower part of the Cossye, 48; travelling distance from Midnapore, E., 40 miles. Lat. 22° 18', long. 87° 59'.

TUMLOONG.—A town in the native state of Sikhim, situate on the left bank of the Teesta river, and 32 miles N.E. by N. from Darjeeling. Lat. 27° 24', long. 88° 37'.

TUMOO.—A town of Burmah, 19 miles W. from the right
TUN—TUP.

TUN—TUP.

bank of the Khyendwen river, and 191 miles N.W. by N. from Ava. Lat. 24° 8', long. 94° 29'.

TUNCARIA,\(^1\) in the British district of Broach, presidency of Bombay, a town on the northern side of the estuary of a small river falling into the Gulf of Cambay; distance from Baroda, S.W., 43 miles. The Guicowar has it in contemplation to connect his capital of Baroda by railway with this town.\(^2\) Lat. 21° 59', long. 72° 40'.

TUNDA, in the British district of Dumoh, territory of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Dumoh to Hoosungabad, 61 miles S.W. by W. of the former. Lat. 23° 24', long. 78° 40'.

TUNGABUDRA.—See TUMBUDRA.

TUNGEE, in the district of Peshawar, division of the Punjab, a town situated on the left bank of the Lundy river, 20 miles N. of the town of Peshawur. Lat. 34° 18', long. 71° 42'.

TUNGRUNG, in Bussahir, a pass in Koonawar, over a lofty ridge separating the valley of the Buspa from that of the Taglakhar. The difficult path over it is traversed principally by travellers on foot, driving goats and sheep, the only beasts of burthen in these rugged tracts, though yaks pasture on the level summit, overgrown with herbage. The rocks are of clay-slate, and so high is here the limit of perpetual snow, that Gerard writes, in the middle of July, “not a patch of snow lay within reach, or was visible near us;” yet the elevation is 13,789 feet above the sea. Lat. 31° 38', long. 78° 32'.

TUNGUDA.—A town in the British district of Guntoor, presidency of Madras, 49 miles N.W. by W. of Guntoor. Lat. 16° 40', long. 79° 54'.

TUNGUL.—A town in the native state of Sikhim, situate on the left bank of the Teesta river, and 60 miles N.N.E. from Darjeeling. Lat. 27° 52', long. 88° 37'.

TUPOOKRA,\(^1\) in the territory of Alwar, district of Tijara, under the political superintendence of the Governor-General's agent in Rajpootana, a town 44 miles S.W. of Delhi. At the close of the last century, when this region was overrun by the Mahrattas, Tupookra with its vicinity was, along with some other districts, granted by one of their chiefs to the adventurer

\(^1\) Lloyd and Gerard, Tours in Himalays, ii. 94.

\(^2\) Bombay Pol. Diso. 20 October, 1852.
George Thomas; and at the close of the war in 1803, was by the British government transferred to the Rao raja. Lat. 28° 7', long. 76° 54'.

TUPPUL, in the British district of Allygurh, lieutenant-governorship of the North-West Provinces, a town on the route from Allygurh to Rewaree, 31 miles W. by N. of the former. Lat. 28° 2', long. 77° 39'.

TUPURANUH, in the British district of Muzuffurnugur, lieutenant-governorship of the North-West Provinces, a village on the route from Kurnal to Meerut, and 24 miles S.E. of the former. The road in this part of the route is good, the country open and cultivated. Lat. 29° 29', long. 77° 19'.

TURANNA, in the territory of Indore, or possessions of Holcar's family, a town on the route from Goona to Oojnein, 1292 miles S.W. of the former, 22 N.E. of latter. It is situated on the east or right bank of the Chota Kalee Sindh river: it has a bazar, and supplies are abundant, and is the principal place of a pargannah containing 175 villages, and yielding an annual revenue of 50,000 rupees. Population about 10,000. Lat. 23° 18', long. 76° 3'.

TURAON.—See Trivanth.

TURIVAKARAY, in the territory of Mysore, a town, the principal place of a tallook or subdivision of the same name. Here is a fortress consisting of an outer and an inner fort, strongly defended by a ditch and mud wall: the town is uninclosed. There is here a very fine tank, built, according to tradition, with a treasure, the concealment of which was pointed out by the divinity Ganesa. Distance from Seringapatam, N.W., 54 miles. Lat. 13° 10', long. 77° 44'.

TURKANAMBI.—A town in the native state of Mysore, 46 miles S. by E. from Seringapatam, and 58 miles N. by W. from Coimbatoor. Lat. 11° 48', long. 76° 51'.

TURKOD.—A town in the British district of Dharwar, presidency of Bombay, 12 miles N.W. by N. of Dharwar. Lat. 15° 36', long. 74° 59'.

TURKOOAH.—A town in the British district of Midnapoor, presidency of Bengal, 34 miles S. of Midnapoor. Lat. 21° 56', long. 87° 26'.

* Tooravakaira of Trigonometrical Survey.
TURKOOLWA, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to the Sarun district, 84 miles E. by S. of the former. Lat. 26° 36', long. 83° 55'.

TURMA.—A town on the south-west frontier of Bengal, in the native state of Keunjur, 81 miles E. by N. from Sumbulpoor, and 90 miles N.W. by N. from Cuttack. Lat. 21° 35', long. 85° 16'.

TUROWLEE.—A town in the British district of Muttra, lieutenant-governorship of the North-West Provinces. Lat. 27° 40', long. 77° 39'.

TUPOONGY.—A town in the territory of Nagpoor, 160 miles E. by N. from Nagpoor, and 98 miles S.S.E. from Ramgurh. Lat. 21° 30', long. 81° 35'.

TURRAH, in Guzerat, or the territory of the Guicowar, a town near the right bank of the river Bunas, in a rugged, ill-cultivated country, thinly inhabited by Bheels, Coolies, and similar semi-barbarous tribes. Distance from Ahmedabad N.W. 85 miles. Lat. 23° 58', long. 71° 43'.

TURRANNA.—A town in the native state of Indore, or territory of Holkar's family, situate on the right bank of the Chota Kallee Siud river, and 44 miles N.E. from Indoar. Lat. 23° 17', long. 76° 4'.

TURROCH.—See Ootrach.

TURRYE.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 52 miles S.S.E. of Hyderabad. Lat. 24° 40', long. 68° 43'.

TURRY KAIRA.—A town in the native state of Mysore, 52 miles E. by S. from Bednore, and 107 miles N.W. by N. from Seringapatam. Lat. 13° 43', long. 75° 52'.

TURYA.—A town in the territory of Nagpoor, 160 miles E. by N. from Nagpoor, and 108 miles S.S.E. from Ramgurh. Lat. 21° 21', long. 81° 36'.

TURYA SOOJUN, in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Goruckpoor to the district of Sarun, 56 miles E. of the former. Lat. 26° 36', long. 84° 17'.

TUTICORIN,1* in the British district of Tinnevelly, pre-

1 E.I.C. Ms. Doc.  
2 Ind. Dir. l. 544.  
3 Madras Journ. of Lit. and Science, lv. 303 — Wight, Acc. of Harbour of Tuticoreen.

* Tutacorin of Horsburgh; † Tuticoreen of Wight.
TUT—TUZ.

Residency of Madras, and the only important port in the district, is situate on the north-west coast of the Gulf of Manar. It has a safe roadstead, with good anchorage, sheltered on the west, north, and south by the mainland of Tinnevelly, and on the east by a group of islets, extending about eight miles from north to south. The trade of this place was once considerable, the exports having formerly in one year amounted to 365,000L.; subsequently a decrease appears to have taken place, but latterly the increased briskness in the cotton trade has caused a great improvement. "No fewer than 3,000 bales of cotton have been in less than fifteen months shipped from it to England direct; 3,000 more, intended for the China market, were sent from it to Madras by coasters, to be finally shipped there; while 1,000 were sent by land from Tinnevelly, for transmission to England." The measures adopted for deepening the Paumbaum passage, through the reef between Ceylon and the mainland, have vastly increased the traffic of this port, by opening a direct passage for shipping between it and the Bay of Bengal, thus obviating the tedious and hazardous voyage round the island of Ceylon. Pearl-banks exist in the vicinity of the town, which the government have authorized to be examined. Distance from Tinnevelly, E., 33 miles; Madras, S.W., 325. Lat. 8° 48', long. 76° 12'.

TUTTABAR.—A town in the British district of Ramgur, presidency of Bengal, 56 miles W. by N. of Ramgur. Lat. 29° 51', long. 84° 40'.

TUTWAS.—A town in the Rajpoot state of Jodhpour or Marwar, 66 miles N. by E. from Jodhpour, and 54 miles S. from Beekancer. Lat. 27° 14', long. 73° 19'.

TUWARA.—A town in the native state of Gurhwal, situate on the right bank of the Bhageruttee river, and 53 miles N.E. from Dehra. Lat. 30° 51', long. 78° 41'.

TUZHIGUNG,1 in Bussahir, a village of Koonawar, at the northern base of the lofty Purgeul, hence sometimes called the Tuzhigung Mountain. Gerard describes the village as "perched, amidst ruins of a frightful bulk, at the height of 11,850 feet above the sea. The small space of soil which is not yet possessed by the rocks produces barley and buckwheat, inclosed by gooseberry fences; the inclined southern aspect, and the vast extent of arid surface on every side, reverberate a
surprising warmth, and favour an early harvest in the fields. We observed enormous masses of granite, their bases environed by ripe crops, and their tops shaded by drooping willows."

Lat. 31° 50', long. 78° 43'.

TWENGNGAGE.—A town of Burmah, situate on the left bank of the Irrawady river, and 83 miles N. from Ava. Lat. 23° 4', long. 96° 1'.

TWENTY-FOUR PERGUNNAHS.—A British district under the presidency of Bengal. Its name is derived from its formerly containing twenty-four divisions, called pargunnahs in the vernacular language. It is bounded on the north-east by the British district Barnet; on the east, south-east, and south by the Sunderbunds; on the south-west and west by the river Hoogly, separating it from the British districts of Hoogly and Hidcote. It lies between lat. 21° 55'—22° 48', long. 88° 6'—88° 43': it is sixty miles in length from north to south, and thirty-two in breadth: the area, according to official return, is 1,186 square miles. The whole country is throughout a plain, little elevated above the level of the sea, and traversed by numerous streams and watercourses. The river Hoogly, considered by the Brahmans as the revered Ganges of mythological celebrity, touches on the district at its north-west corner, at Pulta Ghat, and flowing southward ten miles, is the boundary between the British district Hoogly and this district, into which it passes at that distance, and taking a course tending to south-west for twenty miles through the district, flows by Calcutta. Passing out of the district at Bhujbhuji, it continues to flow southward for twenty-four miles, to the mouth of the Roopnarain, in lat. 22° 14', long. 88° 5', for that distance forming the boundary between this district and Hoogly. At the confluence of the Roopnarain, the Hoogly turns south-eastward, and for twenty-four miles forms the south-western boundary of the district, passing finally away from it in lat. 22°, long. 88° 12'. Throughout the whole course of seventy-eight miles for which the Hoogly is connected with this district, it is navigable for the largest ships as far as Calcutta. The Pali, a watercourse connecting the Salt Lake, in the environs of Calcutta, with the inlets of the Sunderbunds, extends about ten miles in a direction from west to east; and though rapid and deep, yet does not appear to be navigated. A considerable offset from the Hoogly, imme-
TWENTY-FOUR PERGUNNAHS.

diately south of the city of Calcutta, takes a direction south-east, and flowing through this district twenty-eight miles, to Budurtulla, passes the eastern frontier into the Sunderbunds, through which it winds, and subsequently, by very sinuous channels, opens a communication with the main stream of the Ganges, in the vicinity of Commercoolly. This navigation, though circuitous and tedious, being 177 miles longer than that directly upwards through the Hoogly, is very important, being at all times navigable for large craft, and affording a route by water to the North-Western Provinces, when the more direct channel can scarcely be navigated by small boats.

In this district there are three seasons, as in other parts of Bengal. The hot season commences in the early part of March, and during its continuance the temperature is very high, in some instances reaching 112° in the shade, and 140° in places exposed to the direct rays of the sun. The hot season is terminated early in June by the periodical rains brought by the south-west monsoon, and which continues to the middle of October. The annual rain-fall is considerable, amounting frequently to eighty inches. In November the weather becomes clear, settled, and comparatively cool, though the days are often rather warm. December, January, and the early part of February constitute the most agreeable and salubrious part of the year, though the weather in the close of the last month becomes variable, and sometimes rather unpleasant from warmth.

There is a considerable quantity of jungle in the eastern part of the district, harbouring tigers, tiger-cats, hyenas, wild swine, wild buffaloes, and deer: jackals are everywhere numerous. The domestic animals are chiefly small horned cattle, sheep, and goats. Horses are not numerous, and are probably for the most part imported. Bullocks are generally used by the natives both for draught and for bearing burthens.

The coconut-palm is cultivated to considerable extent, as well as the toddy-palm, from the fermented sap of which a spirit is obtained by distillation. Of other fruits, there are the mango, the jak (Artocarpus integrifolia), guava, tamarind, mulberry, custard-apple, and many others indigenous, besides a variety introduced from foreign countries.

The articles of commerce are native cotton cloths and coarse
TWENTY-FOUR PERGUNNAHS.

silk cloths, a small quantity of cotton, hemp, coir or rope made of cocoanut-fibre, cocoanuts, betel-nuts, teak and some other timber, ginger, turmeric, yams, sugar and molasses obtained by inspissating the sap of palms, honey, wax, oil of mustard-seed, rice, a small quantity of indigo, hides, salt-fish, sugar, and rum.

The present amount of population is taken to be 288,000,** which, compared with the area, gives an average of something less than 243 to the square mile. Of the inhabitants, the majority are Brahminists; but there is a considerable number of Mussulmans; and the number of Christians, both native and European, is, in proportion to the mass of the population, greater than in most parts of India, a result probably of the proximity to the chief seat of British power in the East. There are some Jews, Armenians, and Chinese. The district at present contains only eighteen pergunnahs, viz.—1. Magurah, 2. Muragache, 3. Calcutta, 4. Medanumullo, 5. Azimabad, 6. Buridatrati, 7. Balleeya, 8. Huttegaghar, 9. Kharee, 10. Kaspoor, 11. Pakchakuli, 12. Shakpore, 13. Shahnagar, 14. Ghur, 15. Dukinsagar, 16. Boroo, 17. Moida, 18. Muhammad Alipore.

Barrackpore, a cantonment of native troops, is situated within the district, as is also Dumdum, formerly the head artillery station for Bengal. Calcutta, though included locally within the limits of the district, is a separate and exclusive jurisdiction. Alipore, where the civil establishment is located, Kidderpore, as well as Barrackpore and Dumdum, are noticed under their respective names in the alphabetical arrangement.

The principal routes are—1. From Calcutta to Dacca, through Jessore; 2. from south to north, from Calcutta to Barrackpore; 3. from north to south, from Calcutta to Diamond Harbour; 4. from north-east to south-west, from Calcutta, through Bhujbhuji, to Midnapore; 5. from south-east to northwest, from Calcutta, across the Sulkea Ghaut, to Burdwan.

The district of the Twenty-four Pergunnahs was the earliest territorial possession of any considerable extent obtained by the East-India Company, to whom it was granted in the year 1757, by the Nabob Jaffier Ally Khan.

* Parliamentary Return, April, 1851.

* Exclusive of the population of Calcutta.
TYO—UDE.

TYOOR.—A town in the native state of Mysore, situate on the right bank of the Cauvery river, and 18 miles S.E. by S. from Seringapatam. Lat. 12° 13', long. 76° 53'.

U.

UBDOOLPOOR, in the British district of Ghazeepore, lieutenant-governorship of the North-West Provinces, a town with a population of 6,634 inhabitants, 20 miles N. from Ghazeepore. Lat. 25° 50', long. 83° 44'.

UBHOO, in the British district of Bhutteana, lieutenant-governorship of the North-West Provinces, a village near the north-western frontier. Lat. 30° 9', long. 74° 10'.

UCHARA.—See Oocheya.

UCHARA.—A town in the native state of Rewah or Baghelcund, 34 miles W. by S. from Rewah, and 44 miles S.E. by E. from Punnah. Lat. 24° 23', long. 80° 51'.

UCHNERA, in the British district of Agra, lieutenant-governorship of the North-West Provinces, a town on the route from the city of Agra to that of Bhurtpore, and 16 miles W. of the former. Lat. 27° 10', long. 77° 49'.

UCHRA.—See Achera.

UDEPOOR, in the territory of Scindia's family, a town situate at the base of a remarkable conical hill. It is the principal place of a pargannah comprising 100 villages, and yielding an annual revenue of 35,000 rupees, though it is considered capable of yielding 70,000 under proper management. There was formerly a fort on the hill, and its ruins, as well as those of very many others scattered around to a great extent, indicate that it was once a place of much greater importance than at present. Distant S. of Gwalior 160 miles. Lat. 23° 52', long. 78° 9'.

5 Additional Papers respecting Gwalior, presented to Parliament April, 1844, p. 93.
UDHUR, in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village on the route from Alwar, by Perozpoor, to Delhi, and 52 miles S.W. of the latter. Lat. 28° 6', long. 77° 5'.

UDIAMPER, in the territory of Cochin, under the political management of the presidency of Madras, a town celebrated as the place where, in A.D. 1599, Menezes, the Portuguese archbishop of Goa, compelled the Syrian Christians of St. Thomas ostensibly to conform to papacy, and judicially burned their ritual and doctrinal books. Bartolomeo observes, that it has become a very poor place, which, however, retains a church of the Syrian Christians. Distance from city of Cochin, N.E., 10 miles. Lat. 10° 2', long. 76° 29'.

UDUMPOOR, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Almora, and 38 miles N. of the former. The road in this part of the route is bad; the country is open and cultivated. Lat. 29° 47', long. 79° 25'.

UETHAM, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village on the route from Fort Almora to the Juwahir or Unta Dhura Pass, 43 miles N.E. of Almora. It is situate close to the river Surjoo, on the left bank of which is encamping-ground, and supplies are obtainable. Lat. 29° 57', long. 79° 57'.

UFZULGURH, in the British district of Bijnour, lieutenant-governorship of the North-West Provinces, a fort and town on the route from Pilleebheet to Nugeena, and 15 miles S.E. of the latter. Distance N.W. from Calcutta, via Moradabad, 938 miles. Lat. 29° 24', long. 78° 44'.

UGOOHULLY.—A town in the native state of Mysore, 81 miles W.N.W. from Seringapatam, and 58 miles E. by N. from Mangalore. Lat. 13° 3', long. 75° 44'.

UHEAN.—A town in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 20 miles S.E. by E. of Moulmein. Lat. 16° 20', long. 97° 57'.

UHEERA.—See HEURA.

UHROW, in the British district of Bareilly, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Bareilly to Almora, and 35 miles N. of the former. The road in this part of the route is bad; the
country open, level, and cultivated. Lat. 28° 46', long. 79° 23'.

UJEETPOOR,1 in the jaghore of Rampoor, in Rohileund, a village on the route from Bareilly to Moradabad, and 41² miles N.W. of the former. The road in this part of the route is good, and passes through a fertile and well-cultivated country. Lat. 28° 45', long. 79° 4'.

UJI,¹ in the British district of Goruckpoor, lieutenant-governorship of the North-West Provinces, a small town three miles N. of the left bank of the Gogra. It contains 100² houses, and consequently, allowing six persons to each, a population of 600. Distant W. of Goruckpoor cantonment 42 miles. Lat. 26° 44', long. 82° 37'.

UKBURPOOR, in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a town on the left bank of the Jumna, 24 miles E. of Calpee. Lat. 26° 4', long. 80° 10'.

UKBURPOOR, in the British district of Cawnpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Cawnpoor to Jalloun, 26 miles W.S.W. of the former. Lat. 26° 23', long. 80°.

UKHALIYA.—A town in the native state of Nepal, situate on the left bank of the San Coos river, and 116 miles E.S.E. from Kathmandoo. Lat. 27° 6', long. 87°.

UKHTA.—A town in the British district of Sarun, presidency of Bengal, 48 miles E. by S. of Bettiah. Lat. 26° 40', long. 85° 20'.

UKLEEMPOOR,¹ in the British district of Goorgaon, lieutenant-governorship of the North-West Provinces, a village on the southern shore of an extensive fresh-water jhil or lake.² Distance S.W. from Delhi 50 miles. Lat. 27° 58', long. 77° 2'.

UKPA, in Bussahir, a village in the district of Koonawar, on the right¹ bank of the Sutlej, along which the route proceeds, about a mile from the stream, over a rocky surface, and amidst pine-forests. Ukpa is at the elevation of 8,450² feet above the sea. Lat. 31° 35', long. 78° 26'.

ULAYI, in the British district of Budaon, the principal place in the pergunnah so called, is situate on the right bank of the Ganges. Lat. 27° 51', long. 79°.

ULLAEE, in the Rajpoot state of Jodhpoor, a village on Garden, Tables of Routes, 295.
ULL.

the route from Nagor to Beekaneer, and 14 miles N.W. of the
former. It contains eighty houses, supplied with water from
two tanks and three wells. Lat. 27° 20', long. 73° 40'.

ULLAGAUVERY.—A town in the British district of Tinnevelly, presidency of Madras, 34 miles N. of Tinnevelly.

Ullah Bund,1 on the southern frontier of Sinde, a ridge
of earth of slight elevation, thrown up by the earthquake of
1819, across the Phurraun or Poorana branch of the Indus.
The name signifies "the mound of God," and was given to it by
the natives, in allusion to the fact of its not having been made
by human efforts. It is thus described by Burnes:2 "The
Ullah Bund, which I now examined with attention, was, how-
ever, the most singular consequence of this great earthquake.
To the eye it did not appear more elevated in one place than
another, and could be traced both east and west as far as it
could reach. The natives assigned it a total length of fifty
miles. It must not, however, be supposed to be a narrow strip,
like an artificial dam, as it extends inland to Ramoaka Bazar,
perhaps to about a breadth of sixteen miles, and appeared to
be a great upheaving of nature. Its surface was covered with
saline soil, and I have already stated that it consisted of shells,
clay, and sand." In 1826, a great inundation of the Indus
poured such a stream over the desert, that it cut through the
Ullah Bund, forming a channel thirty-five yards wide and about
thirty feet deep, and immediately below that bank expanded
into a lake, covering a surface of 2,000 square miles. This
watery expanse3 received from Burnes the name of the Lake
of Sidree, being that of a small fort which it overwhelmed.
The place where the Ullah Bund was intersected by the
Phurraun is in lat. 24° 21', long. 69° 11'.

district of Furruckabad, lieutenant-governorship of the North-West Provinces, a town on the route from the cantonment of Aligurh to that of Futttehhurh, and 32 2 miles N.W. of the latter. It is surrounded by a mud wall, and has a bazar; water is plentiful from wells, and supplies are abundant: the town contains a population of 7,146 persons. The road in this part of the route is heavy, deep, and bad; the country level, cultivated in some parts, in others covered with bush-jungle. Lat. 27° 29', long. 79° 14'.

ULLEHPOOR.—A town in the British district of Bijnour, lieutenant-governorship of the North-West Provinces. Lat. 29° 19', long. 78° 43'.

ULLYNUGGURH.—A town in the British district of Madura, presidency of Madras, 44 miles W. by N. of Madura. Lat. 10° 3', long. 77° 33'.

ULTAFGUNJ, in the territory of Oude, a village on the route from Azimgurh to Fyzabad, 56 miles N.W. of the former, 30 S.E. of the latter, situate two miles S.W. of the right bank of the Deoha or Gogra. Lat. 26° 39', long. 82° 28'.

ULTEAH.—A town in the native state of Kolapoor, presidency of Bombay, 14 miles E.N.E. from Kolapoor, and 66 miles N. from Belgaum. Lat. 16° 47', long. 74° 30'.

ULUKDEO, in the British district of Bareilly, division of Pillibheet, lieutenant-governorship of the N.W. Provinces, a town on the route from the town of Pillibheet to Nugena, and 40 miles N.W. of the former. Lat. 28° 59', long. 79° 20'.

ULWAR.—See MACHER.

UMARA WUTTY.—A town in the British district of Guntoor, presidency of Madras, 20 miles N. of Guntoor. Lat. 16° 34', long. 80° 26'.

UMARPOOR, in the British district of Mynpooree, lieutenant-governorship of the North-West Provinces, a town lying on the route from the cantonment of Aligurh to that of Futttehhurh, and 47 miles S.E. of the former. It has a bazar, water is obtained from wells, and supplies may be had from the surrounding country, which has an undulating surface, with a sandy soil, partially cultivated. Lat. 27° 42', long. 78° 48'.

UMBALLAH.—A British district of Sirhind, under the presidency of Bengal, and within the Cis-Sutlej division of
UMB.

2 Parliamentary Return, April, 1851
3 Shakespeare, Mem on Statistics of N.W. Prov. 1846, p. 188.
5 Pricep, ut supra, 69.

4 Royle, Botany of Himalayas, xvi.
5 Garden, ut supra, 172.

territory: its centre is in lat. 30° 23', long. 76° 44': its area is stated at 293 square miles, and its population as amounting to 67,134; of whom more than two-thirds are represented to be Hindoos. It appears, however, that these returns apply only to the government lands strictly so called, and that the British police controls a tract estimated to comprise 2,175 square miles. Moreover, the population return is partial; and as the greater part of the district was unsurveyed and unsettled, the statistical information is necessarily meagre and imperfect. Umballa is one of those possessions which, previously held by a Sikh sirdar, has escheated to the East-India Company in default of rightful heirs. This district was seized by Runjeet Singh during one of his marauding expeditions to the left of the Sutlej; and that aggression occasioned in 1809 the movement of British troops, which resulted in the conclusion of a treaty with Runjeet Singh, by which he was required to withdraw his army from the left bank of the Sutlej, and to relinquish his recent conquests in Sirhind. The climate of Umballa is very hot: in 1838 the thermometer reached 112° in the shade, in June; and in January of the same year it at no time fell lower than 33°.

UMBALLA.—A town, the chief place of a British district within the tract of country called Sirhind, and under the presidency of Bengal. It lies on the route from Kurnoul to Loodiana, 55 miles N. of the former, 69 S.E. of the latter. It is a large walled town, situate in a level and highly-cultivated country, well supplied with water, and capable of furnishing abundant supplies. The houses are built of burnt brick, but the streets are in general so narrow as scarcely to admit the passage of an elephant. There is a fort at the north-east of the town, and under its walls the encamping-ground of the British troops. Height of the town above the sea 1,040 feet; distant from Calcutta, N.W., by Lucknow, Delhi, and Kurnoul, 1,020 miles. Lat. 30° 24', long. 76° 49'.

UMBARI, in the British district of Dehra Doon, a village on the route from Dehra to Kalsi, and 18 miles N.W. of the former place, situate close to the left bank of the Jumna. Lat. 30° 29', long. 77° 52'.

UMBUD.—A town in the native state of Hyderabad, or territory of the Nizam, 17 miles S. by W. from Jaulnah, and
UMB—UMR.

84 miles N.E. by E. from Ahmednuggur. Lat. 19° 37', long. 75° 54'.

UMBHUHTUH, in the British district of Subharunpoor, lieutenant-governorship of the North-West Provinces, a town on the route from Kurnaul to Subharunpoor, 16 miles W.S.W. of the latter. Lat. 29° 51', long. 77° 24'.

UMILEA, or UNULEA, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Cawnpore to that of Futtehgurh, and 14 miles N.W. of the former. The road in this part of the route is good in the dry season. Lat. 26° 36', long. 80° 16'.

UMLAH.—A town of Malwa, in the native state of Bhopal, 33 miles W.S.W. from Bhopal, and 73 miles E.N.E. from Indoor. Lat. 23° 7', long. 76° 54'.

UMLYALLA, in Guzerat, or the territory of the Guicowar, a town situate on a small river tributary to the river Sabhumtee; distance from Ahmedabad, N.E., 34 miles. Lat. 23° 11', long. 73° 4'.

UMMERAPORA.—A town of Burmah, situate on the left bank of the Irawady river, and nine miles N.E. from Ava. Lat. 21° 57', long. 96° 7'.

UMMURKUNTUK.—See AMBAKANTAK.

UMRAPOR.—A town in the native state of Hyderabad, or territory of the Nizam, situate on the left bank of the Payre Gunga river, and 90 miles S.W. from Ellichpoor. Lat. 20° 23', long. 76° 30'.

UMREYLEE.—See AMREELI.

UMROHIII, in the British district of Moradabad, lieutenant-governorship of the North-West Provinces, a town on the route from the town of Moradabad to that of Mozuffurnuggur, and twenty miles N.W. of the former place. It is of considerable size, having a population of 72,677 inhabitants, and is situate in an open country, partially cultivated. Supplies and water are abundant. The road in this part of the route is sandy, heavy, and difficult for wheeled carriages. Distance N.W. from Calcutta 908 miles. Lat. 28° 54', long. 78° 33'.

* Hamilton states that it has “a neat mosque and extensive garden, and surrounded by large plantations of sugar and cotton.”

2 Statistics of N.W. Prov. 79.
UMB—UNC.

UMBROUDA,¹ in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a village on the route from Calpee to Etawa, and seven miles² N. of the former. The road in this part of the route is rather good, and the country cultivated, though in some places cut up by ravines. Lat. 26° 12', long. 79° 51'.

UMUR SAGUR, in the Rajpoot state of Jesulmer, a village on the route from Boree, in Sindh, to the town of Jesulmer, and two miles N.W. of the latter. It contains about twenty shops, and water is obtainable from tanks. Lat. 26° 55', long. 70° 57'.

UMURGURH.—A town in the native state of Narbah, Cis-Sutlej territory, 40 miles W. from Ambala, and 34 miles S.S.E. from Loodianah. Lat. 30° 29', long. 76° 9'.

UMURKHERA.—See Anwulkerha.

UNA, in the Julinder Dooab division of the Punjab, a town situated eight miles from the right bank of the Sutlej, 46 miles E.N.E. of the town of Julinder. Lat. 31° 28', long. 76° 19'.

UNAO,¹ in the territory of Oude, a small town on the route from Cawnpore to Lucknow, 10 miles² N.E. of the former, 43 S.W. of the latter. It has a bazar, and is well provided with water. The road in this part of the route is generally heavy, and bad for wheeled carriages. Lat. 26° 33', long. 80° 33'.

UNCHAGANW, in the British district of Pillibheet, lieutenant-governorship of the North-West Provinces, a village on the route by Nanakmath to Buderpoor, from the town of Pillibheet, 35 miles N.W. of the latter; situate one and a half miles west of the right bank of the river Goula. Lat. 28° 58', long. 79° 36'.

UNCHAPAHAR, in the Rajpoot territory of Shekawuttee, a lofty hill five miles S.E. of the town of Seekar. The whole surface of the hill is covered with jungle, chiefly of cactus, except the summit, which is a platform or small table-land, about a mile in length and a hundred yards in breadth. Distance S.W. from Delhi 140 miles, N.W. from Jeypoor 55. Lat. 27° 82', long. 75° 20'.

UNCHGANO,¹ in the district of Aledmaw, kingdom of Oude, a village three miles S.W. of the right bank of the Tons (North-eastern), 14 S. of Fyzabad. A commandant of police is stationed here in a small fort garrisoned by a hundred
men with matchlocks. Butter estimates* the population at 400, all Hindoos. Lat. 26° 38', long. 82° 9'.

UNDERA, in the British district of Muzzafarnagur, lieutenant-governorship of the North-West Provinces, a village on the route from Kurnal to Meerut, and nine miles S.E. of the former. The road in this part of the route is indifferent, the country open and rather well cultivated. Lat. 29° 38', long. 77° 9'.

UNDEESOOL.—A town in the British district of Ahmednuggur, presidency of Bombay, 53 miles E. of Nassik. Lat. 20°, long. 74° 36'.

UNGHHA.—A town in the British district of Behar, presidency of Bengal, 41 miles N.W. of Sherghotty. Lat. 25°, long. 84° 26'.

UNGOOL.—See ANGOOL.

UNGOtha,1 in the British district of Agra, lieutenant-governorship of the North-West Provinces, a village on the route from the city of Agra to that of Bhurtpore, and 11² miles W. of the former. It is well provided with water, and supplies may be procured from the neighbouring villages. The road in this part of the route is rather good. Lat. 27° 10', long. 77° 57'.

UNJENGAUM.—A town in one of the recently sequestrated districts of the native state of Hyderabad, or dominions of the Nizam, situate 14 miles W.S.W. of Ellichpoor. Lat. 21° 6', long. 77° 21'.

UNJUNVEL.—A town in the British district of Butnageriah, presidency of Bombay, 39 miles N. of Butnageriah. Lat. 17° 31', long. 78° 15'.

UNKARJEE MAHARAJ,1 or MUNDATTA, in territory of Gwalior, or possessions of Scindia's family, a small town2 with bazar, on the south side of an island in the river Nerbudda. The island is a hill of moderate height, and was formerly fortified, but it is now overrun with jungle, and has the remains only of gateways and pagodas sacred to Siva, and hence much visited by devotees. Three-quarters of a mile eastward of the island is a ghat or ford, practicable in January and February, but at all times difficult, in consequence of the violence of the river and the numerous large stones in its bed. Four miles east of the town is the sacrifice-rock called Bhirkullab, whence

11 Malcolm, Index to Map of Malwa, 281.
devotees were wont to cast themselves headlong, offering their lives in sacrifice to Siva. Lat. 22° 12', long. 76° 15'.

UNKOLA.1—The principal place of the subdivision of the same name, in the British district of North Canara, presidency of Madras, a town two miles from the coast of the Arabian Sea, or North Indian Ocean. It has a ruinous fort 2 and a bazar, but few inhabitants, as in this part of the country the population does not settle in numbers in any spot, but is dispersed in hamlets and farms. The subdivision of Unkola is rough and hilly eastwards, where it comprises the western declivity of the Ghats; but westward, or along the seashore, though in some places rough, it has many small fertile plains and valleys, well watered by streams flowing down from the Ghats. Of these streams, the most considerable are the Cauly Nuddy, flowing into Carwar Bay; the Gungawdulli river, dividing the southern portion of the district from the northern; and the Toodry or Merji 3 river, disemboguing into the Indian Ocean at the south frontier of the district, and near its mouth expanding into a salt-water estuary, 4 about a mile in width, and navigable for large boats. Distant from Mangalore, N., 130 miles; Bombay, S., 310. Lat. 14° 40', long. 74° 22'.

UNNOOSOORA.—A town in the British district of Pooree, presidency of Bengal, 42 miles S.S.E. of Cuttack. Lat. 19° 56', long. 86° 11'.

UNOULA,1 in the British district of Goruckpore, the principal place of the pergunnah of the same name, a small town on the route from the town of Azimgurh to that of Goruckpore, 48² miles N. of the former, 13 S. of the latter. The road in this part of the route is much cut up, the country level, much overrun with forest and jungle. It is situated near the river Ami, the channel of which is in that part thirty or forty yards wide, and even in the dry season filled from side to side with a deep, though nearly stagnant, body of water: the road from Azimgurh to Goruckpore crosses it by a bridge. According to Buchanan, 4 "Gnaula (Unoula or Onaula), where the officers of police reside, contains about 140 huts, not one of which is tiled, nor has two stories. Even the mud castle of the high-born chief consists of thatched huts, surrounded by a ditch and hedge. The town of Gnaula is so surrounded by bamboos and..."
UNO—UNT.

trees as to be with difficulty accessible." Distant N. of Benares 90 miles. Lat. 26° 32', long. 83° 21'.

UNOWAH,¹ in the British district of Allahabad, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Allahabad to Futtehpoor, and 33² miles N.W. of the former. The road in this part of the route is heavy, the country well cultivated. Lat. 25° 37', long. 81° 29'.

UNRAWATTY RIVER, a tributary of the Taptee, rises in lat. 21° 26', long. 75° 39', and flowing for thirty-three miles westerly, through a portion of Holkar's territory, and south-westerly for thirty miles, through the British district of Candeish, falls into the Taptee river, in lat. 21° 20', long. 74° 55'.

UNTA DHURA,¹ on the northern frontier of the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a pass on the northern frontier towards Hiundes, or South-western Tibet. It lies over a ridge, which is to the north of the main chain of the Himalaya, and though inferior as to its summits than the greater range, has such continuity of elevation as to render it necessary to ascend considerably in proceeding towards Hiundes from the deep gorges of Kumaon. The crest forms the water-line dividing the streams flowing southwards into the basin of the Ganges from those taking a northerly direction towards the Sutlej, as the Louka, a small river rising on the northern declivity of the pass, has a due northerly² course, and the Gunka,³ rising on the southerly declivity, proceeds southwards to the Goree, by which its water is conveyed to the Kalee, and ultimately to the Ganges. The view towards Thibet is little striking; the actual elevation is, however, very great, Weller's observations by the boiling-water point causing it to come out at 18,540 feet above the level of the sea; but he considers this to be probably a good deal in excess; and Manson estimates⁴ it at 17,500. In the end of May, Weller found a dreadfully cold wind blowing, and was informed that it becomes awful at the end of the rains, sometimes sweeping down the precipices numbers of the laden sheep and goats, which are the beasts of burthen usually employed in the trade between Kumaon and Hiundes. Even in the end of May, in 1841, Batten⁵ found the pass closed by

⁴ Id. 1849, No. 192, p. 1172 — Manson, Visit to the Unia Dhura Pass.
⁵ Id. 1849, No. 192, p. 1172 — Manson, Visit to the Oonta Dhoora Pass (note).
heavy snow, and encountered imminent danger in attempting it; Webb also found it completely closed with snow in the beginning of summer. It is sometimes called the Juwahir Pass, as the route lying over it passes up the Juwahir valley by the courses of the rivers Gooree and Gunka. According to Garden, there is "encamping-ground on the bank of a stream at the northern base of the Himalayas range: a few stunted bushes to be found for firewood; no supplies. The Thibet frontier is distant four miles north, marked by a low wall." He adds, that snow lies on the pass eleven months in the year. Distant N. from Fort Almorah 156 miles. Lat. 30° 35', long. 80° 17'.

UNTOOR.—A town in the native state of Hyderabad, or territory of the Nizam, 38 miles N. from Dowlutabad, and 50 miles E. from Malligum. Lat. 29° 29', long. 75° 16'.

UPKOT, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a village on the route by the course of the Surjoo from Almorah fort to the Unta Dhura Pass. It is situate on the right bank of the Surjoo, 42 miles N.E. of Almorah. Lat. 29° 57', long. 79° 54'.

UPNI and KILANSIR, in the Rajpoot state of Beekaneer, two contiguous villages on the route from Rutungur to the town of Beekaneer, and 45 miles E. of the latter. They contain 170 houses, supplied with water from two wells 120 feet deep. The road in this part of the route is sandy, as is the adjacent country in general, though exhibiting a little cultivation and a few trees. Lat. 27° 54', long. 74° 5'.

UPPAEL,1 in the British district of Ghazeepore, lieutenant-governorship of the North-West Provinces, a town with a population of 5,946 inhabitants, 37 miles N.E. of Ghazeepore. Lat. 25° 49', long. 84° 10'.

UPSUNG, in Bussahir, a stream of the district of Koonawar, takes its rise in lat. 31° 46', long. 78° 43', on the western declivity of a lofty mountain running in a direction from north to south, and forming the boundary between the British and Chinese empires; and after a very rapid course of about five miles, generally in a northerly direction, falls into the Sutlej, on the left side. Gerard describes the ravine down which it flows as peculiarly wild and rugged:—"Before is the abyss of the Oupsung; the rocks are grouped together, and menace the
URD—URR.

traveller with horror, and he expects to be annihilated at every step. The deep indentations, formed by rushing torrents, must be followed into their darkest windings; and it is in such situations, when the footsteps are tardy and insecure, that the frail outline of the cliffs presses on the imagination." The bed of the Upsung where crossed by Gerard, about a mile above the confluence with the Sutlej, was found to have an elevation of 10,989 feet above the sea.

URDAPoor.—A town in the native state of Hyderabad, or territory of the Nizam, eight miles from the left bank of the Godavery river, and 151 miles N.W. by N. from Hyderabad. Lat. 19° 17', long. 77° 27'.

URDUN.—A town in the peninsula of Kattywar, province of Guzerat, 47 miles S. by E. from Rajkote, and 63 miles N. from Diu Fort and Island. Lat. 21° 39', long. 70° 56'.

UREREAL.—A town in the British district of Purneah, presidency of Bengal, 22 miles N. by E. of Purneah. Lat. 26° 4', long. 87° 38'.

URIDACHELLEM.—A town in the British district of South Arcot, presidency of Madras, 31 miles W.S.W. of Cuddalore. Lat. 11° 32', long. 79° 23'.

URJUNPUR,1 in the British district of Mynpooree, lieutenant-governorship of the North-West Provinces, a village on the route from the cantonment of Aligurh to that of Futtehgurh, and 51 miles S.E. of the former. The road in this part of the route is bad; the country is level, partly cultivated, and partly overspread with jungle. Lat. 27° 41', long. 78° 52'.

URKI.—A fort of the hill state of Bhagul, situate amidst the steep and lofty ridges on the eastern frontier. It was garrisoned by the Goorkha army during the war between that power and the British, who acquired possession of it by the capitulation which preceded the treaty of 1815. Lat. 31° 9', long. 77° 2'.

URMULLA.—A town in the British district of Balesaree, presidency of Bengal, eight miles W. of Balesaree. Lat. 21° 30', long. 86° 52'.

URNIA.—A town in the native state of Indore, or territory of Holcar, 47 miles N. from Indoor, and 93 miles S.E. by S. from Neemuch. Lat. 23° 21', long. 75° 44'.

URROUL,1 in the British district of Cawnpore, lieutenant-
URR.

URRUKTA, in the hill state of Joobul, a mountain forming part of the great range connecting Wartu peak with that of Chur. It is covered at the top with deep and lofty forests of pines, oaks, and sycamores, with which are intermixed birches, hollies, and yews. The formation of the rock is micaslate, mixed with veins of quartz. The route from Chepal to Deohra passes by a good mountain-road over the crest of the mountain, between two summits, each about 11,000 feet. The highest point of the route has the elevation of 9,729 feet above the sea. The pass is styled that of Puthur Nulla in the trigonometrical survey. Lat. 31° 3', long. 77° 44'.

URRUNDE, or RIND, a small river of the Doab, rises in the British district of Mynpoorie, about 35 miles N.W. of the town of that name, and in lat. 17° 27', long. 75° 34'. Its headwaters are on the south-west or Jumna side of the crest or slightly-elevated tract which marks the interior of the Doab, nearly equidistant from the Ganges and Jumna. The course is tortuous, but generally in a south-easterly direction, to its discharge into the Jumna on the left side, in lat. 25° 54', long. 80° 37', after a total length of about 245 miles. It is fordable where crossed by the route from Etawah to Futtehgurh, seventy-five miles from its source, measured along the river banks. Where crossed by the route from Calpee to Futtehgurh, 135 miles from its source, its channel is forty yards wide, with steep banks, and in the dry season the stream is not more than knee-deep.

URBUR, in the native state of Travancore, a town near the coast of the Northern Indian Ocean, among the numerous salt-water lakes and islets in that part of the country. Distance

---

1 Fraser styles it a "great mountain;" Jacquemont, on the contrary, "petit massif de montagnes." This last observes that the natives were unacquainted with the name "Urrukta."
from Cochin, S.E., nine miles; Trivandrum, N., 122; Madras, S.W., 440. Lat. 9° 52', long. 76° 22'.

URSEEMAREE.—A town in the territory of Nagpoor, 56 miles N.E. by E. from Ruttunpoor, and 118 miles N.W. from Sumbulpoor. Lat. 22° 48', long. 82° 48'.

URUBA, in the Rajpoot state of Jodhpoor, a village on the route from Balotra to the city of Jodhpoor, and 30 miles N.E. of the former. The road in this part of the route is good, and lies through a level country, rather fertile and cultivated. Lat. 26° 3', long. 72° 45'.

URWUL,1 in the British district of Behar, presidency of Bengal, a small town on the right bank of the river Sone. Though an insignificant place, it has an indigo-factory,2 and good paper is manufactured here. It is the principal place of a thana or police-division, well cultivated in general, and producing largely opium and grain, though a few parts have been impoverished by sand blown from the wide bed of the Sone. The thana contains 313 villages, and a population of 50,554 persons, of whom the Brahminists are three to one to the Mussulmans. The town contains 196 houses, and a population of 1,000. Distant S.W. from Patna 41 miles, E. from Benares 103. Lat. 25° 11', long. 84° 42'.

USABAD,1 in the British district of Agra, a village on the route from the city of Agra to Mynpooree, and 29 miles2 E. of the former. The road in this part of the route is good; the country cultivated, and studded with small villages. Lat. 27° 8', long. 78° 30'.

USEGAH,1 or ASEEGHA, in the British district of Ghazeepoor, lieutenant-governorship of the North-West Provinces, a town with a population of 7,807 inhabitants,2 10 miles N.E. of Ghazeepoor. Lat. 25° 58', long. 84° 13'.

USHUN, a small river of Keonthal, rises a few miles east of Simla, at the southern base of the mountain of Mahhasu, in lat. 31° 6', long. 77° 18', and holding a course first in a south-westerly, and then in a south-easterly direction, falls into the Girree, in lat. 30° 54', long. 77° 17', after having run a distance of about twenty-five miles.

USIL, in Gurhwal, a village on the right bank of the Supin, here a powerful and amazingly rapid torrent. It was a secondary station in the great trigonometrical survey of the...
USL—UTU.

Himalaya. Elevation above the sea 8,936 feet. Lat. 31° 7', long. 78° 25'.

USLANA, in the British district of Dumoh, territory of Saugor and Nerbudda, lieutenant-governorship of the North-West Provinces, a town on the route from Dumoh to Tehree, 13 miles N.W. of the former. Lat. 28° 57', long. 79° 22'.

USNI, in the British district of Futehpoor, lieutenant-governorship of the North-West Provinces, a town on the right bank of the Ganges, nearly opposite Dalmau, and 15 miles N.E. of the town of Futehpoor. Lat. 26° 3', long. 81° 6'.

USUDPOOR, in the British district of Buddaon, lieutenant-governorship of the North-West Provinces, a town on the route from Boolundshubur to Buddaon, 42 miles W. by N. of the latter. Lat. 28° 11', long. 78° 32'.

USURI, in the territory of Mysore, a town on the south-east bank of an extensive tank; distance N.W. from Bangalore 52 miles. Lat. 18° 35', long. 77° 30'.

USYA MUT.—A town in the native state of Sawuntwarree, 29 miles N.W. from Sawuntwarree, and 59 miles S.S.E. from Rutnageriah. Lat. 16° 14', long. 73° 46'.

UTGHOR, in the British district of Banda, lieutenant-governorship of the North-West Provinces, a village on the route from the town of Banda to Gwalior, 11 miles W. of the former. Water is plentiful from wells, and supplies obtainable from the neighbourhood. Lat. 25° 30', long. 80° 18'.

UTREE.—A town in the British district of Behar, presidency of Bengal, 28 miles S.W. of Behar. Lat. 24° 55', long. 85° 20'.

UTTARI, in the jaghire of Bulubghur, lieutenant-governorship of the North-West Provinces, a village situate near the right bank of the Jumna. Distance S.E. from Delhi 28 miles. Lat. 28° 18', long. 77° 29'.

UTTUR.—A town in the British district of Coimbatoor, presidency of Madras, 64 miles N.N.E. of Coimbatoor. Lat. 11° 51', long. 77° 20'.

UTURHUT, in the British district of Banda, lieutenant-governorship of the North-West Provinces, a village on the route by Chila Tara ghat, from Cawnpore to the town of Banda, 13 miles N. of the latter. Lat. 25° 40', long. 80° 31'.
VAD—VAL.

V.

VADARNEAM.—A town in the British district of Tanjore, presidency of Madras, 56 miles S.E. by E. of Tanjore. Lat. 10° 24', long. 79° 54'.

VADASUNDOOR.—A town in the British district of Madura, presidency of Madras, 44 miles N. by W. of Madura. Lat. 10° 32', long. 78° 2'.

VAIMBAUR.—A town in the British district of Tinnevelly, presidency of Madras, 63 miles E.N.E. of Tinnevelly. Lat. 9° 6', long. 78° 25'.

VAIPU,* in the territory of Cochin, under the political superintendence of the Madras presidency, a town at the southern extremity of a long narrow island, bounded south-west by the Arabian Sea, and on all other sides by the Backwater, as the British denominate the extensive shallow lake or estuary formed by the streams flowing westward from the Western Ghats. Distance from the city of Cochin, E., two miles; Cannanore, S.E., 145; Bangalore, S.W., 225. Lat. 9° 58', long. 76° 18'.

VAIPUR.—A river in the British district of Tinnevelly, presidency of Madras, rises near the western frontier, on the eastern declivity of the Eastern Ghats, and in about 1° lat. 9° 25', long. 77° 20'. Taking an easterly, and in some places south-easterly, course of about eighty miles, it falls into the Gulf of Manar, in lat. 9°, long. 78° 20'.

VAIRAWULL.—A town in the peninsula of Kattywar, province of Guzerat, situate on the seacoast, 40 miles W. by N. from Diu Island, and 102 miles S. by W. from Rajkote. Lat. 20° 55', long. 70° 21'.

VALAL.—A town in the native state of Hyderabad, or territory of the Nizam, situate on the left bank of the Tandoor river, and 59 miles W. by S. from Hyderabad. Lat. 17° 11', long. 77° 40'.

* Of Trigonometrical Survey; 1 Veypin of Bartolomeo; 2 Vipeen of Wilks.
VALAM.—A town in the British district of Tanjore, presidency of Madras, six miles W.S.W. of Tanjore. Lat. 10° 45', long. 79° 7'.

VALAMPUTTU.—A town in the British district of Salem, presidency of Madras, 32 miles E. by N. of Salem. Lat. 11° 47', long. 78° 41'.

VALENGOODY.—A town in the British district of Madura, presidency of Madras, 40 miles N.E. by E. of Madura. Lat. 10° 13', long. 78° 40'.

VALLARAPULLAI,1 in the territory of Cochin, under the political superintendence of the presidency of Madras, a town in a small portion of territory isolated amidst the dominions of the rajah of Travancore.2 Distance from the city of Cochin, N.E., 18 miles. Lat. 10° 18', long. 76° 28'.

VALOOCURRAY.—A town in the native state of Cochin, 14 miles S. from Trichoor, and 26 miles N. from Cochin. Lat. 10° 20', long. 78° 18'.

VALOOR.—A town in the British district of Salem, presidency of Madras, 18 miles E.N.E. of Salem. Lat. 11° 44', long. 78° 29'.

VALOOR.—A town in the native state of Hyderabad, or territory of the Nizam, situate on the left bank of the Doodna river, and 127 miles E. by N. from Ahmednuggur. Lat. 19° 29', long. 76° 39'.

VAMILAPOORA.—An ancient town of Kattywar, in the province of Guzerat, the ruins of which still exist.1 It is situate on the river Karree, not far from the town of Wulotch, a considerable portion of which is built of materials brought from the ruins of Vamilapoora. The site of the ancient town is about lat. 21° 50', long. 71° 53'.

VAMULCONDA.—A town in the native state of Hyderabad; or territory of the Nizam, 44 miles E. from Hyderabad, and 116 miles N.W. from Guntoor. Lat. 17° 23', long. 79° 11'.

VANDIVASH.—A town in the British district of North Arcot, presidency of Madras, 34 miles S.E. by S. of Arcot. Lat. 12° 30', long. 79° 40'.

VANIAMBADDY.—A town in the British district of Salem, presidency of Madras, 78 miles N.N.E. of Salem. Lat. 12° 41', long. 78° 40'.

1 Bombay Public Disp. 23 May, 1851.
VAN—VED.

VARDHA CHATRA.—A town in the native state of E.I.C. Ms. Doc. Nepal, situate on the left bank of the San Coos river, and 124 miles E.S.E. from Khatmandoo. Lat. 26° 57', long. 87° 4'.

Vaulrampaoor.—A town in the native state of Travancore, 44 miles N.W. by W. from Cape Comorin, and seven miles S.E. from Trivandrum. Lat. 8° 26', long. 77° 6'.

VAZIRGANJ,¹ in the territory of Oude, a ruined town on the route, by Nanamau Ghat or ferry, from Futteghur to Lucknow, seven miles S.W. of the latter. According to Lord Valentia,² who visited it in 1803, "Viziergunge consists only of the two gateways, and about three houses in the centre between them. It seems as if it had been built as an ornamental approach to Lucknow, a large avenue extending thither from it." Tennant,³ however, attributes its want of population to a frightful instance of despotic vengeance. "The cause of its destruction is said to have been the refusal of the cutwal [municipal magistrate] to deliver up some thieves who had molested passengers going through it. On being threatened with the nawab’s vengeance, it, unluckily for the town, happened that some persons were again robbed there that same day. On the next, three battalions were ordered to ransack the town and destroy the inhabitants; an order which they obeyed with such fatal exactness, that not a single hut nor inhabitant was left within the walls. The distance between the two gates is more than a mile, and that constituted the length of the principal street. The rows of trees on each side are still standing, having escaped the flames by which the houses were destroyed." Lat. 26° 46', long. 80° 53'.

VEBOO.—A town in the British district of Amherst, one E.I.C. Ms. Doc. of the Tenasserim provinces, presidency of Bengal, 41 miles E. of Moulmein. Lat. 16° 33', long. 98° 19'.

VEDAVATI.—A name sometimes given to the river Hugry, which see.
VEEJOVA.—A town in the Rajpoot state of Godwar, 63 miles S.S.E. from Jodhpour, and 110 miles S.W. from Nussorabad. Lat. 25° 26', long. 73° 26'.

VEERAGANOOR, in the British district of Salem, presidency of Madras, 33 miles E. by S. of Salem. Lat. 11° 29', long. 79° 50'.

VEERAJENDERPETTA,1 in the British province of Coorg, presidency of Madras, a town situate on a small feeder of the Cauvery. It is the largest town in the district, and is principally inhabited by native Christians. In the year 1834, a British column under command of Colonel Foulis, proceeding from Cannanore eastward, after a succession² of some days' hard fighting in the defiles of the Western Ghats, penetrated to this town, and forming a junction with the eastern column under Colonel Lindsay, who, proceeding from Mysore, had occupied Merkara, the capital, effectually subdued the country. Elevation above the sea 3,399 feet;³ distance from Merkara, S., 16 miles; Mangalore, S.E., 80; Bangalore, S.W., 130. Lat. 12° 13', long. 75° 52'.

VEERAPULLY.—A town in the British district of Cuddapah, presidency of Madras, 23 miles S. of Cuddapah. Lat. 14° 9', long. 78° 55'.

VEERAVASANUM.—A town in the British district of Rajahmundry, presidency of Madras, 35 miles S. by W. of Rajahmundry. Lat. 16° 31', long. 81° 41'.

VEERAWOW.—A town in the British district of Hyderabad, province of Scinde, presidency of Bombay, 153 miles E.S.E. of Hyderabad. Lat. 24° 30', long. 70° 41'.

VEERUMGAUM,¹ in the British district of Ahmedabad, presidency of Bombay, a town near the south-eastern angle of the Runn, or Great Salt Marsh.² It is now a thriving place, though but recently revived from a state of great poverty and decay: population 17,000; distance from the city of Ahmedabad 35 miles W. Lat. 23° 7', long. 72°.

VEESAWUDUR.—A town in the peninsula of Kattywar, province of Guzerat, situate 74 miles S. from Rajkote, and 40 miles N.N.W. from Diu Island and Fort. Lat. 21° 15', long. 70° 43'.

VEESHALGURH.—See VISHALGURH.

VELAPORR,—A town in the British district of Sattara,
VEL.

presidency of Bombay, 70 miles E. by N. of Sattara. Lat. 17° 47', long. 75° 8'.

VELLACOIL.—A town in the British district of Coimbatoo, presidency of Madras, 50 miles E. of Coimbatoo. Lat. 10° 57', long. 77° 45'.

VELLARY KYEN.—A town in the British district of Malabar, presidency of Madras, 124 miles S.E. of Cannanore. Lat. 10° 30', long. 76° 38'.

VELLAUR.—A river of the Madras presidency, rising in lat. 10° 28', long. 78° 21', and, taking an easterly direction through Madura, Poodocottah, and Tanjore, falls into the sea, in lat. 10° 6', long. 79° 17'.

VELLAUR.—A river of the Madras presidency, rising at the base of the Eastern Ghauts, within the British district of South Arcot, and, taking an easterly direction, falls into the sea just below the town of Porto Novo, in lat. 11° 29', long. 79° 50'. The river is small at its mouth, and admits only coasting craft. The waters of the Vellaur are economized for the purpose of irrigation, by means of a dam or annicut thrown across the river.¹

VELLORE,¹ in the British district of Arcot, north division, presidency of Madras, a town, with strong fort, on the south or right side of the river Palar. The fort is extensive, with ramparts built of very large stones,² and having bastions and round towers at short distances. Between the bastions is a covered way, with embattled wall, and small projecting square towers, which have a striking and pleasing appearance. A deep and wide ditch, cut in the solid rock, surrounds the whole fort, and is filled with good clear water³ of considerable depth. Within the compass of the ramparts are barracks, hospitals, magazines, and some other buildings, occupied from time to time by state prisoners. East of the fort are some rocky hills, which so completely command it, that a six-pounder could throw a shot over it. The town, situate between the hills and the fort, is rather clean and airy, and has an extensive and well-supplied bazar. The heat at Vellore is very great, as is thought from the radiation from the rocky hills in the neighbourhood; yet the station is considered one of the healthiest in the Carnatic, and regiments arriving from unhealthy quarters in debilitated states have recovered here very quickly. The most remarkable public

¹ Madras Revenue Disp. 21 Aug. 1849.
² E.I.C. Ms. Doc.
³ Lord Valentia, Travels, i. 300.
building at Vellore is a splendid pagoda,² apparently dedicated to Krishna, whose adventures with the gopis or milkmaids are represented in a series of spirited and elaborate sculptures. On the inside of the gateway are numerous figures of Rama, the renowned king of Ayodha or Oude, with Hanuman, the martial monkey leader, and his numerous troop of monkey-shaped warriors. There are also numerous sculptures representing Nandi, the bull-shaped attendant of Siva. The erection of a church⁶ within the fort was sanctioned by the British government in 1846.

Upon the fall of Seringapatam, the fortress of Vellore had been chosen for the future residence of the sons of Tipoo. The selection was injudicious, as the neighbourhood swarmed with the adherents of the deposed family. On the morning of the 10th July, 1806, the native troops rose against the European part of the garrison, consisting of two companies of the 69th regiment. The attack was totally unexpected; but upon the arrival from the cantonment of Arcot of Colonel Gillespie, with a party of the 19th dragoons, the mutineers were quickly overcome, and order re-established in the fortress. The number of Europeans massacred by the insurgents amounted to 113. Among them were Colonel Fancourt and thirteen other officers. Three hundred and fifty of the mutineers fell in the attack, and about five hundred were made prisoners. Two of the sons of Tipoo were stated to be implicated in the revolt, and the family of that chieftain were forthwith removed to Bengal. Vellore is distant from Madura, N., 220 miles; Tanjore, N., 147; Bangalore, E., 104; Arcot, W., 18; Cuddalore, N.W., 94; Madras, W., 79. Lat. 12° 55', long. 79° 11'.

VELUNGOOR.—A town in the native state of Travancore, 114 miles N.N.W. from Trivandrum, and 14 miles E.N.E. from Cochin. Lat. 10° 3', long. 76° 29'.

VENCATIGEBBY.—A town in the British district of North Arcot, presidency of Madras, 59 miles W. by N. of Arcot. Lat. 13°, long. 78° 32'.

VENCATIGEBBY.—A town in the British district of North Arcot, presidency of Madras, 72 miles N. by E. of Arcot. Lat. 13° 55', long. 79° 34'.

VENCATIGHERRY DROOG.—A town in the British
VEN—VER,
district of North Arcot, presidency of Madras, 75 miles N. by E. of Arcot. Lat. 13° 57', long. 79° 31'.

VENKATREDDYPOULIAM.—A town in the British district of Cuddapah, presidency of Madras, 113 miles N. by E. of Cuddapah. Lat. 16° 3', long. 79° 17'.

VENKITAGHERRY.—A town in the British district of North Arcot, presidency of Madras, 36 miles N.W. by W. of Arcot. Lat. 13° 11', long. 78° 58'.

VENTIPUR, or WANTIPUR, in Cashmere, a village containing ruins, considered by some to be those of the original capital of the valley. It is situate near the right bank of the Jhelum, on the route from Sirinagur to Islamabad, and 16 miles S.E. of the former town. According to the chronicles of Cashmere, it was founded about A.D. 876, by Avanti Verma, king of the valley, who, after his own name, called it Avantipur. Here are the ruins of two great buildings, resembling in plan and character those described in the notice on Matan. The greater ruin is called Vencadati Devi, the less, Ventimadati. They are in a state of extreme dilapidation, yet, according to the detailed account of Moorcroft, are still striking monuments of early architecture. Ventipur is in lat. 33° 54', long. 75° 9'.

VEPERY.—A suburb of the city of Madras.—See MADRA.

VERABUDR DROOG.—A town in the British district of Kurnool, presidency of Madras, 30 miles N.E. by E. of Kurnool. Lat. 16° 3', long. 78° 30'.

VERALLIMALLI.—A town in the British district of Madura, presidency of Madras, 58 miles N.E. by N. of Madura. Lat. 10° 38', long. 78° 37'.

VERAPOLI, in the territory of Cochin, under the political superintendence of the presidency of Madras, a town on a small island in the extensive shallow lake or estuary called by the British the Backwater. Here is the residence of the pope's vicar-apostolic for Malabar, who superintends sixty-four churches, exclusive of forty-five governed by the archbishop of Cranganore or Kotunglur, and exclusive of the large dioceses of the bishops of Cochin and Quilon, whose churches extend to Cape Comorin, and are visible from the sea. Verapoli is built by Ven, the last Hindoo sovereign of Cashmere.
seven miles N.E. of the city of Cochin, 220 S.W. of Bangalore. Lat. 10° 5', long. 76° 20'.

VERNAG, in Cashmere, in the south-eastern extremity of the valley, is celebrated for a magnificent spring, which rises with a great volume of water, in a basin about 120 yards in circumference, built by the order of the Mogul emperor Jehangir, and forms one of the feeders of the Jhelum. Lat. 33° 29', long. 75° 15'.

VEYLOOR.—A town in Hyderabad, or territory of the Nizam, 81 miles N. by E. from Hyderabad, and 140 miles N.N.E. from Kurnool. Lat. 17° 47', long. 78° 37'.

VEYUL.—The name given to the Jhelum in the upper part of its course.—See JHELUM.
VIN.

which being ceded by the Peishwa by the treaty of Poona, in 1817, were by the British government granted to the nawaub of Bhopal as a reward for his zeal and fidelity. Vinchor is distant direct from Bombay, N.E., 120 miles. Lat. 20° 8', long. 74° 12'.

VINDHYA MOUNTAINS.—A chain of mountains crossing the peninsula of India from east to west, forming the northern boundary of the valley of the Nerbudda; and "uniting the northern extremities of the two great lateral ranges (the Eastern and Western Ghauts), forms as it were the base of the triangle which supports the table-land of Southern India." They extend from Guzerat on the west to the basin of the Ganges on the east, and are comprised between the twenty-second and twenty-fifth degrees of latitude. The geological formations are the granitic and sandstone, overlaid by trap-rock. Under the Moguls, the country north of the Vindhya range was called Hindostan, and that lying to the south the Deccan.

VINGORLA, in the collectorate of Rutnagherry, presidency of Bombay, a petty town and fort, situate at the mouth of a small river of the same name. Abreast of it, and about two miles from the mainland, are the Vingorla rocks, some of which are about twenty feet above high-water mark, white, and remarkable when the sun shines; while others are even with the water, and very dangerous for shipping. "The little bay of Vingorla is completely sheltered from every point of the compass, the south alone excepted. When it blows fresh from that quarter (a rare occurrence, and always of short duration), the little traders make a fair wind of it, and run to Malwan (eighteen miles north), where they remain until the wind changes." There is a road from Vingorla to the interior, proceeding to Belgaum, and thence diverging, one branch leading to Kullogee and Bogulcote, the other to Dharwar, Hooble, and thence to Sircy, in the Madras territory; but for some distance from Vingorla it is but of an indifferent description. The evil, however, has attracted the attention of both the local and the home authorities, and there is the fullest reason for believing, that as soon as circumstances permit it will be remedied. Vingorla has been conjectured to contain about 5,000 inhabitants: it has a tolerably good bazar, and an increasing number of merchants.

4 Forbes, Oriental Memoirs, i. 185.
5 E.I.C. Ms. Doc. 1845, part ii. 159.
Vingorla was a retreat for the numerous sanguinary pirates who infested this coast, until, in 1812, it was ceded by the chief of Sawuntwarree to the East-India Company. Vingorla is 215 miles S. of the town of Bombay in a direct line; the travelling distance is about 280 miles. Lat. 15° 50', long. 73° 41'.

VINGUR.—A town in the British district of Hydrabad, province of Scinde, 102 miles S.E. of Hydrabad. Lat. 24° 20', long. 69° 35'.

VINJAN.—A town in the native state of Cutch, situate 46 miles W. by S. from Bhooj. Lat. 23° 9', long. 69° 2'.

VINJORAE, or BINJORAI, in the Rajpoot state of Jessulmer, a town on the route from Balmer, in Joudpore, to the town of Jessulmer, and 80 miles S.E. of the latter. Lat. 28° 30', long. 71° 10'.

VINUKONDA,1 in the British district of Guntoor, presidency of Madras, a fort on an eminence of rock composed of quartz and mica. "On this hill are two tanks, which afford an excellent supply of water all the year round." It has been supposed to be an extinct volcano; but Heyne observes, that in no part of it can the slightest traces of lava be observed. Distance from the town of Guntoor, S.W., 52 miles; Madras, N., 205. Lat. 16° 4', long. 79° 48'.

VIRAGHOTTAM.—A town in the British district of Vizagapatam, presidency of Madras, 72 miles N.N.E. of Vizagapatam. Lat. 18° 41', long. 83° 40'.

VIRDUPUTTY.—A town in the British district of Tinnevelly, presidency of Madras, 62 miles N.N.E. of Tinnevelly. Lat. 9° 36', long. 78° 1'.

VIRGNAJUNG, in the British district of Kumaon, lieutenant-governorship of the North-West Provinces, a town on the route from Almora to Tibet. Lat. 30° 10', long. 80° 46'.

VIRSUNDA, in the Peshawur division of the Punjab, a town situate 16 miles from the right bank of the Indus. Lat. 33° 17', long. 71° 30'.

VISHALGHUR.1—A jaghires or feudal dependency of Kola-pore: the centre is in lat. 16° 52', long. 73° 50', situate in the Ghauts; the country is jungly and rugged. The inhabitants are more hardy and warlike than their neighbours of the plains, and have not unfrequently shown that they participate in the
disposition for plundering, which marks the occupants of
similar tracts in the vicinity. The revenue of Vishalghur is
1,23,000 rupees; the military force numbers about 170 men.
The military service due from the jaghiredar to the government
of Colapore has been commuted for a money payment.

VISHNOO.—A mountain-torrent rising in the Himalayas, in
lat. 31° 4', long. 79° 28'. It flows in a southerly direction for
a distance of forty-three miles, to its junction with the Doulee
at Vishnooprag, in lat. 30° 33', long. 79° 38'; whence the united
stream is named the Alukunda.

VISHNOOPRAG, in the British district of Gurhwal, a
town on the route from Sireenuggur to Tibet, 54 miles E.N.E.
of the former. Lat. 30° 34', long. 79° 39'.

VIZAGAPATAM.—A British district named from its prin-
cipal place, and forming part of the territory subject to the
presidency of Madras. It is bounded on the west, north-west,
and north by the British territory of Orissa; on the north-
east by the British district of Guntoor; on the south-east by the
Bay of Bengal; and on the south-west by the British district
of Rajamandry: it lies between lat. 17° 15'—19° 3', long.
82° 24'—84°, and, according to official return, has an estimated
area of 7,650 square miles. The seacoast, which throughout
has a direction north-east, is comprised within that large extent
of shore generally denominated the Orissa Coast. It is
remarkably contrasted with the Coromandel coast, farther
south, which is with slight exception low and sandy, the coast
of this district being bold, steep, and marked by a ridge of
rocky hills, which extends along it. The climate on the coast
is hot, moist, and relaxing, and more inland, equally sultry,
but drier: the land winds, however, so oppressive in many
parts of the Carnatic, are here not felt, being intercepted by
the vicinity of the hills. Iron is the only metal mentioned to
be found in the district: kankar, or calcareous tufa, is abundant,
and in many places the soil is largely impregnated with salt-
petre. No information has been made public respecting the
zoology or botany of the district. The manufacturing industry
is scanty, being confined principally to coarse cottons and a few
less-important branches, carried on at the town of Vizagapatam.
The principal crops are rice, maize, millet, oil-seeds, pulse of
various kinds, sugarcane, indigo, and cotton. The Pallakonda
talook, a considerable portion of this district, has been leased by the government for a term of years to the European firm of Arbuthnot and Co.  

The population has been returned officially at 1,254,272, an amount which, compared with the area, indicates a relative density of 165 to the square mile. Vizagapatam occupies a portion of the territory known as the Five Circars, the possession of which was fiercely contested about the middle of the last century by the French and English. They were obtained by the former in 1768, and retained by them until 1769, when they were transferred by Clive to the East-India Company, to whom they were confirmed in 1765 by the emperor of Delhi. The former prevalence and recent suppression of human sacrifices in this and the contiguous district of Ganjam, will be found noticed in the article Goomsoor. Certain portions of this district have, in consequence of their disturbed state, been excepted from the operation of the general regulations, and placed under special supervision.

The military stations—Vizagapatam and Vizianagram—are described under their respective names in the alphabetical arrangement.

The most important route of the district is that from north-east to south-west, from Calcutta, through Chicacole and Vizagapatam, to Madras. The cross-roads have recently been put into thorough repair.

VIZAGAPATAM.—The principal place of the British district of the same name, presidency of Madras, a seaport on the Orissa coast, or western shore of the Bay of Bengal. It is situate in the centre of a spit of land projecting from the mainland into the estuary of the Vengapattam river. The bar at the entrance of the river is passable by vessels of from 150 to 200 tons burthen, having eight or ten feet of water at spring tides. South of the estuary, the Dolphin's Nose, a remarkable and bold rocky hill, rises abruptly from the sea, and about 1,500 feet above its level. In the south-west monsoon, ships anchor south of the Dolphin's Nose; in the north-east monsoon, a safe anchorage is found one and a half or one mile and three-quarters from land, where there is a bottom of sand and mud, with eight fathoms water. The fort, which is situate nearly in the extremity, or south-western part of the spit of
land, is now dilapidated, its defences having been allowed to fall to decay, and the rampart on the eastern side partly undermined by the sea. Within its precinct are the barracks for the European invalid soldiers, the arsenal, the officers' quarters, and various public buildings, comprising those for the accommodation of the civil establishment. The pettah or native town immediately adjoins the fort on its north and west sides: it contains many good streets, and numerous well-built houses, but is much crowded, from the space on which it stands being shut in by a range of sandhills intervening between it and the sea, and by the extensive swamp already mentioned on the land side. The climate is considered unfavourable to the constitutions of Europeans, who often find it expedient to remove, for the renovation of their health, to localities more elevated and remote from the coast. Distance from Hyderabad, E., 320 miles; Madras, N.E., 880; Masulipatam, N.E., 180; Calcutta, S.W., 470. Lat. 17° 41', long. 88° 21'.

VIZAYROYE.—A town in the British district of Masulipatam, presidency of Madras, 49 miles N. of Masulipatam. Lat. 16° 50', long. 81° 3'.

VIZIADROOG.—See GEERA.

VIZIANAGRAM, in the British district of Vizagapatam, presidency of Madras, a military cantonment, situate on ground sloping gently to the north. It contains twenty-six officers' houses, barracks, hospital, and other suitable offices. Here is a fort, the residence of the zemindar of Vizianagram, separated from the village by a large tank. The present zemindar is a young man, and the estate being large and burdened with debt, it has been deemed necessary to appoint a special agent to undertake its administration for a limited time. The inhabitants of the village are chiefly weavers and agriculturists. The surrounding country has a deep fertile and alluvial soil, highly cultivated, and very productive; in consequence, provisions are abundant and good. The roads about the station are well laid down, and kept in good repair by private contribution. The climate is very salubrious from September to March, and many Europeans at that time repair thither to recruit their health, which may have suffered from the relaxing effect of the air on the coast. In April the weather becomes warm, and towards
the middle of the month the thermometer sometimes rises as high as 100° throughout the whole night and day, and seldom falls below 96°. Towards the end of May, rain falls and cools the air; and early in June, after considerable atmospheric changes, the south-west monsoon sets in, causing general coolness, though the nights are occasionally warm. A good deal of rain falls in September and October, and towards the end of the latter month, cold northerly winds commence. The weather during the rest of the year is cold to a degree which some find disagreeable. Distance from Hyderabad, E., 329 miles; Bellary, N.E., 478; Bangalore, N.E., 528; Masulipatam, N.E., 200; Vizagapatam, N.E., 30; Madras, N.E., 400; Calcutta, S.E., 438. Lat. 18° 7', long. 83° 28'. E.I.C. Ms. Doc.

VOLCONDAH.—A town in the British district of Trichinopoly, presidency of Madras, 38 miles N.N.E. of Trichinopoly. Lat. 11° 20', long. 78° 59'.

E.I.C. Ms. Doc.

VOODAGOONY.—A town in the native state of Mysore, 164 miles N.W. from Seringapatam, and 56 miles E. from Honahwar. Lat. 14° 20', long. 75° 19'.

E.I.C. Ms. Doc.

VUDDACACURRAY.—A town in the native state of Travancore, presidency of Madras, 84 miles N.W. by N. from Trivandrum, and 82 miles S.S.E. from Cochin. Lat. 8° 52', long. 76° 43'.

E.I.C. Ms. Doc.

VULLARAPULLAI,¹ in the territory of Cochin, under the political superintendence of the presidency of Madras, a town in a small portion of territory isolated² amidst the dominions of the rajah of Travancore. Distance from the city of Cochin, N.E., 18 miles. Lat. 10° 18', long. 76° 28'.

E.I.C. Ms. Doc.

VULLUPULUM.—A town in the British district of South Arcot, presidency of Madras, 13 miles S.W. of Cuddalore. Lat. 11° 35', long. 79° 40'.

E.I.C. Ms. Doc.

VURRAGHERRY HILLS.—A range of mountains of Southern India, situate between lat. 10° 10'—10° 44', and long. 76° 21'—77° 52'.

E.I.C. Ms. Doc.

VUZEERPOOR,¹ in the British district of Mynpooree, lieutenant-governorship of the North-West Provinces, a village on the route from Allygurh cantonment to that of Futtetgurh, and 42 miles² S.E. of the former. The road in this part of the route is very heavy, and bad for wheeled carriages; the
country is undulating, the soil sandy, and scantily cultivated. Lat. 27° 45', long. 78° 45'.

VYGAH, a river of the British district of Madura, presidency of Madras, rises in lat. 10° 17', long. 77° 37', and flowing south-east 130 miles, falls into the sea, in lat. 9° 20', long. 79° 4'.

VYTURNA, a river of the British district of Tannah, presidency of Bombay, rises in lat. 19° 44', long. 73° 31', and flowing circuitously, but generally in a south-westerly direction, for seventy miles, falls into the sea, in lat. 19° 36', long. 72° 55'.

W.

WADONA.—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Koom river. Lat. 20° 3', long. 78° 45'.

WAEE.—A town in the British province of Sattara, presidency of Bombay, 20 miles N. by W. of Sattara. Lat. 17° 56', long. 73° 59'.

WAEE.—A town in the British district of Ahmednuggur, presidency of Bombay, 62 miles N.W. by N. of Ahmednuggur. Lat. 19° 50', long. 74° 12'.

WAGEIRA.—A town in the native state of Peint, province of Guzerat, 16 miles S. from Peint, and 18 miles W. by N. from Nassik. Lat. 20° 4', long. 73° 31'.

WAGOOLEE.—A town in the British district of Poonah, presidency of Bombay, 10 miles N.E. by E. of Poonah. Lat. 18° 35', long. 74°.

WAGOTUN.—A town in the British district of Rutnageriah, presidency of Bombay, 36 miles S. by E. of Rutnageriah. Lat. 16° 30', long. 73° 30'.

WAGRU.—A town in the British district of Amherst, one of the Tenasserim provinces, 34 miles S. by E. of Moulmein. Lat. 16°, long. 97° 50'.
WAHN I BUCHUR, in the Sinde Sagur Doab division of the Punjab, a town situated 24 miles from the left bank of the Indus. Lat. 32° 28', long. 71° 48'.

WAHJAHBAD, in the British district of Chingelput, presidency of Madras, a town with military cantonment 500 yards N. of the north or left side of the river Palar. Distance from Madras, S.W., 38 miles. Lat. 12° 48', long. 79° 58'.

WALLABHIPUR.—See VAMILAPOOR.

WALLAJANUGGER.—A town in the British district of North Arcot, presidency of Madras, 16 miles E. of Vellore. Lat. 13° 56', long. 79° 25'.

WALLANCHOONG.—A town in the native state of Nepal, situate on the left bank of the Tamur river. Lat. 27° 44', long. 87° 31'.

WALLE.—A town in the Rajput state of Godwar, 74 miles S. by E. from Jodhpour. Lat. 25° 15', long. 73° 21'.

WALWA.—A town in the native state of Kolapoor, presidency of Bombay, 49 miles N.W. by N. from Belgaum. Lat. 16° 29', long. 74° 13'.

WAMBOOR.—A town in the British district of Ahmednuggur, presidency of Bombay, 14 miles N. of Ahmednuggur. Lat. 19° 19', long. 74° 45'.

WANCANEER.—A town in the province of Guzerat, situate on the left bank of the Mhye river, and 20 miles N. by W. from Baroda. Lat. 22° 31', long. 78° 10'.

WANDIPPOUR.—A town in the native state of Bhotan, situate on the left bank of the Bagnee river. Lat. 27° 25', long. 89° 49'.

WANGA BAZAR.—A town in the British district of Hyderabad, province of Scinde, 74 miles S.E. of Hyderabad. Lat. 24° 39', long. 69° 19'.

WANGEE.—A town in the British province of Sattara, presidency of Bombay, 42 miles S.E. by S. of Sattara. Lat. 17° 12', long. 74° 28'.

WANGTOO, in Koonawur, a district of Bussahir, is a village on the left side of the Sutluj, here ninety-two feet wide, and confined between banks of solid granite. Lat. 31° 32', long. 78° 3'.

WANGUR, in Koonawur, a district of Bussahir, is a large torrent, formed by the junction of two others flowing from the
eastern declivity of the Damuk Chu. It falls into the Sutlej on the right side, in lat. 81° 33', long. 78° 10'.

Wanjee.—A town in the British district of Sholapoor, presidency of Bombay, 63 miles N.W. by W. of Sholapoor. Lat. 18° 13', long 75° 11'.

Wardawan.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate on the left bank of the Wurdewun river. Lat. 33° 51', long. 75° 42'.

Wari, or Soondur Warree.—The principal place of the small state of Sawunt Warree. It was probably at no time a place of any great strength, and when invested, in 1819, by the British forces, was easily reduced. Distance from Bombay, S., 220 miles. Lat. 15° 54', long. 73° 54'.

Wari.—A river of Scinde, rises in lat. 24° 10', long. 68° 3', and flowing south for twenty-five miles, falls into the sea, in lat. 23° 51', long. 67° 56'.

Warna.—See Wurna.

Warragaum.—A town in one of the recently sequestered districts of the native state of Hyderabad. Lat. 20° 32', long. 76° 52'.

Warrakunchairy.—A town in the British district of Malabar, presidency of Madras, 65 miles S.E. of Calicut. Lat. 10° 37', long. 76° 32'.

Warsa.—A town in the British district of Candeish, presidency of Bombay, 47 miles N.W. by W. of Malligaum. Lat. 20° 54', long. 73° 54'.

Warungul,1 in Hyderabad, or the territory of the Nizam, a town, the ancient capital of Telingana, of which little now remains to denote its former grandeur, save the four gateways of the Temple of Siva, which still continue in a state of tolerable preservation.2 Distance from the city of Hyderabad, N.E., 86 miles. Lat. 17° 58', long. 79° 40'.

Warye.—A petty protected state in the north-western quarter of the province of Guzerat, traversed by the river Bunnass. The population, consisting chiefly of Jutts, is estimated at 20,000. The town of Warye is in lat. 28° 47', long. 71° 29'.

2 Sutherland, Political Relations, 145.
WAS—WAZ.

WASEEOTA.—A town in the British province of Sattara, presidency of Bombay, 20 miles W. of Sattara. Lat. 17° 40', long. 78° 47'.

WASHISHTEE, a river of the Butnagherry collectorate of Bombay, rises in lat. 17° 50', long. 78° 36', and falls into the sea at lat. 17° 33', long. 78° 16'.

WASTARA.—A town in the native state of Mysore, 88 miles N.W. by W. from Seringsapatam, and 66 miles E.N.E. from Mangalore. Lat. 13° 16', long. 75° 46'.

WATAR.—A town in the British province of Sattara, presidency Bombay, 31 miles N.E. of Sattara. Lat. 17° 56', long. 74° 27'.

WATULOB.—A town in the British district of Surat, presidency of Bombay, 31 miles E. by S. of Surat. Lat. 21°, long. 73° 20'.

WAUNCANEER,1 in the peninsula of Kattywar, province of Guzerat, a town in the district of Jhallawar, situate on the Bidee or Mutchoo river. Distance from Bombay, N.W., 275 miles. Lat. 22° 36', long. 70° 59'.

WAUNDIA.—A town in the native state of Cutch, 58 miles E. from Bhooj, and 66 miles N. by W. from Rajkote. Lat. 23° 14', long. 70° 39'.

WAZEBABAD, a town in the Punjab, is situate about three miles from the left or eastern bank of the Chenaub, here half a mile broad. The country immediately about it is exceedingly fertile, and the view of the Himalaya probably the most extensive and magnificent anywhere. It is one of the handsomest towns in India; General Avitabile, a European officer in the service of Runjeet Singh, having caused it to be rebuilt in the European style, with wide streets, and a handsome and commodious bazar. Runjeet Singh made here a pleasure-ground, and palace of singular construction, and covered outside with rude full-length figures of the ten Gurus, or spiritual leaders of the Sikhs, painted in fresco. Lat. 32° 27', long. 74° 10'.

WAZIRGANJ, in the territory of Oude, a town on the route from Goruckpoor cantonment to that of Sekrora, 84 miles W. of the former, 28 S.E. of the latter. Lat. 26° 58', long. 82° 5'.

WAZIR GARH, in Gurbhwal, a village on the right bank of the Jumna. Its site is striking and picturesque, being on a
slope over the river, and in view of the snowy peaks of the ranges running southward from Jamnotri. Elevation above the sea 5,813 feet. Lat. 80° 54', long. 78° 23'.

WEAMUNGALUM.—A town in the British district of Malabar, presidency of Madras, 16 miles N.N.W. from Calicut. Lat. 11° 28', long. 75° 42'.

WEER,1 in the territory of Bhurtpore, a town on the route from Agra to Ajmeer, by Jeypore, 55 miles2 S.W. of the former. In A.D. 1826, after the capture of Bhurtpore by Lord Combermere, Weer was, without resistance, surrendered3 to the British. Distant N.W. of Calcutta, vid Allahabad,4 900 miles. Lat. 27°, long. 77° 14'.

WEINBOKE.—A town in the British district of Amherst, one of the Tenasserim provinces, presidency of Bengal, 48 miles S.E. by E. of Amherst. Lat. 15° 44', long. 98° 17'.

WEINGO, a river of Amherst, one of the Tenasserim provinces, rises in lat. 15° 20', long. 98° 26', and, flowing northerly for sixty-five miles, falls into the Attaran river, in lat. 16° 8', long. 98° 9'.

WEIN GUNGA.1.—A river of the Saugor and Nerbudda territory, rising in lat. 22° 25', long. 79° 8'. Its source is among the Mahadeo Mountains, at an elevation of 1,850 feet2 above the sea. Taking a direction easterly for a distance of eighty miles, and subsequently southerly for thirty-four, to lat. 22° 1', long. 80° 11', it at that point becomes the boundary between the Saugor and Nerbudda territory and that of Nagpore; and still flowing in a southerly direction for the further distance of twenty-five miles, continues to be so to lat. 21° 47', long. 80° 16'. At that point it enters the Nagpore territory, and shortly after turning south-west for eighty miles, it receives, near Ambora, in lat. 21° 5', long. 79° 39', and at the distance of 219 miles from its source, the river Kanhan, which joins it on the right side. One hundred and twenty miles further down the stream, or more to the south, it receives, on the same side, the Wurda, in lat. 19° 38', long. 79° 51'. Continuing to flow circuitously, but generally southwards, for 100 miles farther, during which it is sometimes called the Pranheeta, it falls into the river Godavery, on its north or left side, in lat. 18° 52', long. 79° 55'; its total length of course being about 489 miles.
WEL—WER.

WELAUP.—A town in the British district of Amherst, one of the Tenasserim provinces, 22 miles S.E. of Amherst. Lat. 15° 49', long. 97° 51'.

WELLESLEY PROVINCE is a dependency of Prince of Wales Island, and comprises a narrow strip of land on the western coast of the Malayan peninsula, immediately opposite the island. It is thirty-five miles in length and four in width, with an area of 140 square miles.

"Province Wellesley," says Newbold,1 "presents a gently undulating superficial, sloping gradually to the sea, with a few narrow strips of sandy soil, well adapted for the cultivation of the cocoanut, from which protrude a few hills of granite." The general appearance of the province in 1822 is thus described by Finlayson, who visited it about that period:—"The country here, to the distance of seven or eight miles from the sea, is low, flat, and swampy, covered for the most part with almost impenetrable jungle, the secure haunts of tigers, leopards, rhinoceroses, and occasionally of elephants; its vast swamps being unfavourable to the latter."2 Such was the condition of Province Wellesley when transferred to the British.—For some years it appears to have been allowed to remain in much the same state: lately, however, cultivation has been making rapid strides; and in 1836, according to Captain Low,3 the extent of land under cultivation was about 120 square miles, being six-sevenths of the whole province. The staple production is rice, which is cultivated to a great extent, the low swampy lands of the province being well suited for its culture. Sugar is also extensively cultivated in the central and southern portions of Province Wellesley. Several species of indigo exist, but it is not of the first quality; and its manufacture is so crude as to render it only fit for home consumption. The sandy soil, which frequently occurs in the province, is generally appropriated to the cocoanut, which thrives here exceedingly well. Province Wellesley was ceded to the British for a pecuniary consideration by the king of Queda, in 1802.4 The population is returned at 51,509.5

WENRA.—A town in the British district of Amherst, one of the Tenasserim provinces, 36 miles E. of Amherst. Lat. 16° 1', long. 98° 11'.

WER.—A town in the British district of Boolundahubur,
WER—WON.

lieutenant-governorship of the North-West Provinces, 36 miles S.E. of Delhi. Lat. 26° 21', long. 77° 46'.

WERAH, in the British district of Agra, a village on the route from Agra to Muttra, and 27 miles N.W. of former. Lat. 27° 23', long. 77° 48'.

WERANG, in Bussahir, a pass in the district of Koonawar, over a range separating the valley of the Pejur from that of the Sutluj. Elevation above the sea 13,000 feet. Lat. 31° 38', long. 78° 23'.

WESSEEBPOOR, in the Baree Doob division of the Punjab, a town situated 10 miles from the right bank of the Sutlej. Lat. 30° 34', long. 73° 43'.

WHAETTOO, in Bussahir, a peak of considerable elevation in the lower or more southern part of the Himalaya. It was the most westerly of the stations employed in the great trigonometrical survey of the Himalaya by Hodgson and Herbert. They found it wooded to the very summit, which is surmounted by a ruined fortification, formerly occupied by the Gorkhas. Elevation above the sea 10,673 feet.5 Lat. 31° 14', long. 77° 34'.

WODIARPOLLIIUM.—A town in the British district of Trichinopoly, presidency of Madras, 48 miles N.E. by E. of Trichinopoly. Lat. 11° 11', long. 79° 21'.

WODNAPOOR.—A town in the native state of Oude, 62 miles N. by W. from Lucknow. Lat. 27° 45', long. 80° 51'.

WOJERABAD.—A town in Hyderabad, or territory of the Nizam, situate on the left bank of the Kistnah, and 92 miles S.E. by E. from Hyderabad. Lat. 16° 42', long. 79° 43'.

WOMOLUR.—A town in the British district of Salem, presidency of Madras, 11 miles W.N.W. of Salem. Lat. 11° 44', long. 78° 5'.

WON, or WUNN, in the territory of Indore, or possessions of Holkar's family, a decayed town situate in the fertile tract of Nimaur,2 in a slight hollow amidst low hills. In the present ruined town are everywhere to be seen fragments of images and other elaborate sculptures, neglected and prostrate, or built into walls and fences, to serve the purposes of the present poverty-stricken inhabitants. Throughout a great extent of country around, vestiges of temples are of frequent occurrence. Won formerly contained a population of above 10,000.

1 E.I.C. Ms. Doc. Garden, Tables, of Routes, 14.

5 Id. ut supra, 19.
persons: it is at present a collection of ruins, about three furlongs in length and one in breadth, with only seventy inhabited houses.\(^5\) Distant N.E. from Bombay 270 miles, S.W. of British cantonment Mow 51, S.W. of Indor 61. Lat. 21° 51', long. 75° 31'.

WOODUNTA RIVER rises in Orissa, and flowing easterly, falls into the Tell river, in lat. 20° 11', long. 83° 12'.

WOONY,\(^1\) in Hyderabad, or territory of the Nizam, a town on the right bank of the river Godavery, on the route from the city of Nagpoor to that of Hyderabad, 81 miles S. of the former, 185 N. of latter.\(^2\) Lat. 20°, long. 79° 3'.

WOREGAUM.—A town in Hyderabad, or territory of the Nizam, 73 miles E.S.E. from Ahmednuggur. Lat. 18° 49', long. 75° 50'.

WOW.—A petty native district on the north-western frontier of Guzerat. It extends from north to south about thirty miles, and from east to west fifteen, and is traversed by the route from Palee to the Dholera and Mundavie ports. The population, consisting principally of Chooan Rajpoota, amounts to about 10,000; the revenues average only about 5,000 rupees per annum, the district being much divided amongst different kinsmen of the chiefs: the disbursements are about equal to the revenue. Wow pays no tribute to any government. The chief entertains about twenty horse and foot for his personal guard, trusting entirely to the British government for protection from foreign invasions. Lat. of town 24° 22', long. 71° 30'.

WOZUR.—A town in the British district of Ahmednuggur, presidency of Bombay, 10 miles N.B. by E. of Nassik. Lat. 20° 4', long. 73° 54'.

WUDDAKURRY,\(^1\) in the British district of Malabar, presidency of Madras. It is rather a considerable place,\(^2\) and well built, on the north side of one of those backwaters or extensive shallow estuaries receiving the waters of several streams descending from the Western Ghauts. The population consists of Moplah Mussulmans. Distance from Cananore, S.E., 22 miles; from Callicut, N.W., 28. Lat. 11° 36', long. 75° 37'.

WUDDAMURRY.—A town in Hyderabad, or territory of
the Nizam, 23 miles N.E. by N. from Hyderabad. Lat. 17° 37',
long. 78° 44'.

of Bellary, presidency of Madras, 36 miles E. by S. of Bellary.
Lat. 15° 1', long. 77° 28'.

WUDO0.—A town in the British district of Bellary, E.I.C. Ms. Doc.
presidency of Madras, 18 miles W. by N. of Bellary. Lat.
15° 10', long. 76° 42'.

WUDWAN,1 in the peninsula of Kattywar, province of E.I.C. Ms. Doc.
Guzerat, a town in the district of Jhalawar, situate on a small
river, which, a few miles farther eastward, is lost in the Runn or
Salt-marsh dividing the peninsula of Guzerat from the main-
land. It is the principal place of a subdivision2 of the same name,
containing thirty towns and villages, and a population of 32,220.
The tallook is kept in a state of high cultivation, producing
the finest cotton3 in Kattywar: it consequently yields a con-
siderable revenue in proportion to its area; and in 1828, the
rajah was reported to draw from it an annual revenue of
1,00,000 rupees; of which he pays to the British government an
annual tribute of 27,831 rupees. Distance from Ahmedabad,
S.W., 68 miles; Baroda, N.W., 105. Lat. 22° 40', long.
71° 39'.

WUEEKCHONG.—A town of Eastern India, in the E.I.C. Ms. Doc.
native state of Muneepoor, situate on the left bank of the
Mythia Khyoung river, and 29 miles S. from Muneepoor.
Lat. 24° 23', long. 94°.

WUGGUN.—A town in the British district of Shikarpoor, E.I.C. Ms. Doc.,
province of Scinde, 21 miles W.S.W. of Shikarpoor. Lat.
27° 54', long. 68° 20'.

WUHOAH, in the Daman division of the Punjab, a town E.I.C. Ms. Doc.,
situated 44 miles W. from the right bank of the Indus, 108
miles N.W. by W. of the town of Mooltan. Lat. 30° 58',
long. 70° 2'.

WULEEPOOR, in Sirhind, a village situate on the left bank E.I.C. Ms. Doc.
of the Sutlej, at the spot where it is joined by the navigable
nulla or watercourse flowing by Loodianah. It contains from
thirty to forty mud-built houses. Distant N.W. from Calcutta
1,107 miles. Lat. 30° 56', long. 75° 42'.

WUL—WUR.

South Arcot, presidency of Madras, 31 miles W. of Cuddalore. Lat. 11° 42', long. 79° 21'.

WULLEH.—A town in the province of Guzerat, situate 71 miles E.S.E. from Rajkote. Lat. 21° 50', long. 71° 50'.

WULTAIR.—A town in the British district of Vizagapatam, presidency of Madras, three and a half miles N.E. of Vizagapatam. Lat. 17° 44', long. 83° 24'.

WULUR, in Cashmere, is the largest lake in the valley, and may be regarded as a dilatation of the river Jhelum. It is, according to Hügel, twenty-one miles long from west to east, and nine wide from north to south. In the lake is a small island, which contains the extensive ruins of a Buddhist temple of great antiquity, destroyed by the fanatic Mahometans. The lake is subject to violent squalls. The centre is in lat. 34° 20', long. 74° 45'.

WUNN.—A town in the British district of Ahmednuggur, presidency of Bombay, 25 miles N. by E. of Nassik. Lat. 20° 20', long. 78° 52'.

WUNVARLY.—A town in Hyderabad, or territory of the Nizam, 87 miles S. from Ellichpoor. Lat. 19° 58', long. 77° 30'.

WURDA.—A river rising in the Saugor and Nerbudda territory, near the town of Mooltaee, and about lat. 21° 44', long. 78° 25'. Taking a southerly course for a few miles, it leaves the district, and becomes the common boundary of the territory of Nagpore and of the dominions of the Nizam, or territory of Hyderabad, to its fall into the Wein Gunga, on its right side, in lat. 19° 37', long. 79° 51'. The total length of course of the Wurda is about 250 miles, and it flows throughout generally from north-west to south-east. At about 160 miles from its source, and in lat. 19° 57', long. 79° 15', it, on the right side, receives the Payne Gunga, a stream little inferior to itself in magnitude. It has many fine pools in the hottest weather, but is generally fordable at all seasons, except at the height of the rains, when it is so full as to be navigable for moderate-sized boats 100 miles above its mouth.

WURNA, a river of Bombay, rises on the eastern declivity of the Western Ghats, in lat. 17° 18', long. 73° 46', and flowing south-east for eighty miles, during which course it divides the territory of Sattara from the native state of Kolapoor, falls into the Kistnah river, in lat. 16° 50', long. 74° 36'.
WUR—WYN.

WURNEIR.—A town in the British district of Ahmednuggur, presidency of Bombay, 24 miles N.E. by N. of Nassik. Lat. 20° 16', long. 74°.

WURR.—A town in the native state of Cutch, 28 miles N. from Bhoj, and 63 miles E. by S. from Luckput. Lat. 23° 87', long. 69° 48'.

WURRODAH.—A town in one of the recently sequestrated districts of Hyderabad, 64 miles W. by S. of Ellichpoor. Lat. 21° 2', long. 76° 46'.

WURWANE, in the peninsula of Kattywar, province of Guzerat, a town in the subdivision of the Mucho Canta. Here is a ferry across the gulf to the opposite shore of Cutch. Distance from Ahmedabad, W., 120 miles. Lat. 28° 4', long. 70° 44'.

WUSRAVEE.—A native Bheel state in Guzerat, under the protection of the British government. It is bounded on the north by that of Raj Peepla; on the east by the British territory of Khandeish; on the south by the territory of the Daung rajahs; and on the west by the Gulf of Cambay and the British districts of Surat and Broach. It extends from lat. 20° 55' to 21° 33', and from long. 72° 46' to 73° 51'; is sixty miles in length from east to west, and forty-one in breadth: its area is 450 square miles, with a population of 33,300.1 Wusરavee, the chief town, is in lat. 21° 25', long. 73° 12'.

WUTATUR.—A town in the British district of Trichinopoly, presidency of Madras, 20 miles N.N.E. of Trichinopoly. Lat. 11° 5', long. 78° 54'.

WUZER.—A town in the British district of Ahmednuggur, presidency of Bombay, 53 miles N.W. by W. of Ahmednuggur. Lat. 19° 30', long. 74° 4'.

1 E.I.C. Ms. Doc. 2 Papers relating to Slavery in the East Indies: ordered by the House of Comm. to be printed, April, 1841, p. 87.

Statutes of Native States, 52.
by forest and jungle, it is less difficult in a military point of view than Coorg, farther north; and hence the Mysorean invaders of Malabar have usually taken their route through it. Though at the head of an insignificant population, the chief or petty rajah gave much trouble to the British government after the cession of the country by Tippoo Sultan at the pacification of 1792; but for some years there does not appear to have been any serious disturbance in that quarter, a military force being stationed for its control at Manantoddy.

WYRAGUR, in the territory of Nagpoor, near the left bank of the river Waingunga. Diamonds were formerly found in its vicinity, in yellow earth, forming small hills; but the mines have not latterly been worked, as the number and value of the gems obtained were not found to afford a remunerating return. Traces of the former workings are, however, observable in several places. It is a place of some trade, and contains about 800 houses, and a population of 2,000. Distance from the city of Nagpore, S.E., 80 miles. Lat. 20° 27', long. 80° 10'.

YAILAGHERRY.—A town in the British district of Salem, presidency of Madras, 73 miles N.N.E. of Salem. Lat. 12° 37', long. 78° 39'.

YAINUR, in the British district of South Canara, presidency of Madras, a small town, containing eight temples of votaries of the Jain persuasion, one of the Brahminical. Here "is an immense colossal image of one of the gods worshipped by the Jains. It is formed of one solid piece of granite, and stands in the open air." Distance from Mangalore, N.E., 22 miles; from Madras, W., 350. Lat. 13° 2', long. 75° 18'.

YAJGO.—A town of Burmah, 16 miles W. from the right bank of the Khyendwen river, and 150 miles N.W. from Ava. Lat. 23° 23', long. 94° 26'.

YAKOOTGUNJ, in the British district of Furruckabad,
lieutenant-governorship of the North-West Provinces, a village situate in lat. 27° 19', long. 79° 40'.

YAKOOTPOOR, in the British district of Allygurh, lieutenant-governorship of the North-West Provinces, a village situate in lat. 27° 52', long. 78° 11'.

YALLOONG.—A river of Nepal, rising in lat. 27° 35', long. 88° 5', on the southern face of Kangchang, a peak of the Himalayas. It flows in a south-westerly direction for forty miles, and in lat. 27° 21', long. 87° 31', falls into the Tambur river. The town of the same name is in lat. 27° 32', long. 87° 56'.

YAMBEESSEE.—A town in the British district of Hydrabad, province of Scinde, 68 miles N. by E. of Hydrabad. Lat. 26° 20', long. 68° 43'.

YAMETHEN.—A town of Burmah, situate 124 miles S. from Ava. Lat. 20° 5', long. 95° 53'.

YANAON, or YANAN.1—A French settlement within the limits of the British district of Rajahmundry, presidency of Madras, situate near the bifurcation of the Godavery and the river of Coringa, and about nine miles above the embouchure of the former. The mouth of the Godavery is obstructed by sandbanks, which preclude the entrance of ships, but the Coringa river has a deep channel, which admits of vessels of 200 tons burthen proceeding as high as Yanaon. The French territory dependent on the factory stretches along the banks of the two rivers for the distance of six miles, and contains an area of 8,147 acres, which, in 1836, were classified as under:—

<table>

<td>Total</td>
</tr>
</tbody>
</table>

The population in 1840 consisted of 6,881 inhabitants.2 The town of Yanaon is in lat. 16° 44', long. 82° 16'.

YANDABOO.—A town of Burmah, on the left bank of the Jrawady river, 63 miles W. by S. from Ava. Here, on the 26th February, 1826, was concluded the treaty with the Burmese, in which it was provided that the coast of Tenas-

---

serim, together with Arracan and its dependencies, should be retained by the British, and that the king of Ava should renounce all claims upon Assam and the adjoining states of Cachar, Jynteeea, and Muneepore. Lat. 21° 38', long. 95° 4'.

YANG.—A town of Eastern India, in the native state of Muneepoor, 99 miles S.E. from Nowgong. Lat. 25° 31', long. 94°.

YANGMA.—A river of Nepal, tributary to the Tambur, with which it forms a junction in lat. 27° 39', long. 87° 32'.

YARDWAR.—A town in the British district of Belgaum, presidency of Bombay, 52 miles N.E. by E. of Belgaum. Lat. 16° 13', long. 75° 15'.

YAROO, in the Daman division of the Punjab, a town situated 25 miles from the right bank of the Indus. Lat. 30° 10', long. 70° 30'.

YARWUFADAR.—See Sort.

YATLAKEE.—A town in the British district of Bellary, presidency of Madras, 69 miles E. by S. of Bellary. Lat. 15° 2', long. 77° 58'.

YAVENESUREN.—A town in the British district of Madura, presidency of Madras, 42 miles S.E. of Madura. Lat. 9° 31', long. 78° 38'.

YAYGEE.—A town in the British province of Pegu, situate on the right bank of one of the arms of the Irawady river. Lat. 17° 14', long. 95° 14'.

YE.—The province of Ye is the smallest in extent of the Tenasserim provinces. It is bounded on the north by Amherst; on the south by Tavoy; on the west by the Bay of Bengal; and on the east by the Siamese range of mountains. It is a mountainous district, and, with the exception of a few places which are appropriated to the cultivation of rice, it is overspread with thick forests, brushwood, or jungle. Besides a profusion of excellent timber, the province yields no production of any value; and the district is of less note than any other on the coast. The Ye is the only river in the province, and its mouth is so unprotected, and at the same time obstructed, as to render it unsafe for ships of much burthen. The town of Ye, which is the capital, is situate on its banks, and about six miles from its mouth. Lat. 15° 15', long. 98° 4'.

YEAVAN GHEOUN.—A town of Burmah, situate on the
YED—YEL.

left bank of the Irrawdy river, 122 miles S.W. from Ava. Lat. 20° 31', long. 94° 43'.

YEDDAPAUDY.—A town in the British district of Salem, presidency of Madras, 24 miles W. by S. of Salem. Lat. 11° 33', long. 77° 53'.

YEDDAPULLEY.—See ITAPALLI.

YEDDIACOTTAH.—A town in the British district of Madura, presidency of Madras, 50 miles N.N.W. of Madura. Lat. 10° 35', long. 77° 52'.

YEDTORRA.—A town in the native state of Mysore, situate on the Cauvery, 22 miles W. by N. from Seringapatam. Lat. 12° 29', long. 76° 26'.

YEHYAPOOR.—A town in the British district of Sarun, presidency of Bengal, 41 miles S.W. of Bettiah. Lat. 26° 22', long. 84° 7'.

YEKALI.—A town in Hyderabad, or territory of the Nizam, 63 miles W.N.W. from Hyderabad. Lat. 17° 40', long. 77° 40'.

YEKTHOON.—A town in Hyderabad, or territory of the Nizam, 18 miles W.S.W. from Jaulnah. Lat. 19° 44', long. 75° 41'.

YELBOORGA.—A town in one of the recently sequestrated districts of Hyderabad, 69 miles W.N.W. of Bellary. Lat. 15° 38', long. 76° 4'.

YELDOORTY.—A town in the British district of Kurnool, presidency of Madras, 21 miles S.S.W. of Kurnool. Lat. 15° 32', long. 77° 59'.

YELJAL.—A town in Hyderabad, or territory of the Nizam, 40 miles S. by W. from Hyderabad. Lat. 16° 49', long. 78° 24'.

YELLAGODE.—A town in the British district of Kurnool, presidency of Madras, 36 miles E. by S. of Kurnool. Lat. 15° 44', long. 78° 38'.

YELLANOOR.—A town in the British district of Bellary, presidency of Madras, 86 miles E.S.E. of Bellary. Lat. 14° 40', long. 78° 8'.

YELLAPOOR,1 in the British district of North Canara, presidency of Madras, a small town,2 distant from Madras, N.W., 400 miles. Lat. 14° 58', long. 74° 46'.

YELLUANDER.—A town in the native state of Mysore,
YEL—YOO.

36 miles S.E. from Seringapatam, and 72 miles N. from Coimbatore. Lat. 12° 8', long. 77° 4'.

YELWALL.—A town in the native state of Mysore, nine miles S.W. from Seringapatam. Lat. 12° 20', long. 76° 40'.

YEMHATTI.—A town in the British district of Coimbatore, presidency of Madras, 92 miles N.E. by N. of Coimbatore. Lat. 12° 10', long. 77° 40'.

YEMWUNTOUNG.—A town of Burmah, situate 100 miles N.W. from Ava. Lat. 23°, long. 96° 9'.

YENGBIINE.—A river of the Tenasserim provinces, falling into the Thaluayn Myeet river, in lat. 17° 22', long. 97° 48'.

YENNAN RIVER, an offset of the Irawady, falling into the Sittang river in lat. 19° 54', long. 96° 6'.

YENNICAL GOUTA.—A town in the native state of Mysore, 111 miles N. from Seringapatam. Lat. 14° 1', long. 76° 52'.

YEOWAH.—A town of Burmah, situate on the right bank of the Irawady river, 108 miles S.W. from Ava. Lat. 20° 56', long. 94° 40'.

YERNAGOODEM.—A town in the British district of Masulipatam, presidency of Madras, 63 miles N.N.E. of Masulipatam. Lat. 17°, long. 81° 38'.

YERRUMAOOR.—A town in the British district of Malabar, presidency of Madras, 68 miles S.E. by E. of Calicut. Lat. 10° 40', long. 76° 38'.

YESWANTGURH.—See Rairee.

YEWUR.—A town in the native territory of the Daung rajahs, 52 miles S.E. by E. from Surat. Lat. 20° 40', long. 73° 30'.

YEY MULLAY, or MOUNT DELLY, in the British district of Malabar, presidency of Madras, 18 miles N.W. of Cannanore. Lat. 12° 2', long. 75° 15'.

YINKOLU.—A town in the British district of Guntoor, presidency of Madras, 36 miles S.S.W. of Guntoor. Lat. 15° 50', long. 80° 15'.

YIRODU.—A town in the British district of Coimbatore, presidency of Madras, 56 miles E.N.E. of Coimbatore. Lat. 11° 20', long. 77° 46'.

YOOLA, in Koonawar, a district of Bussahir, is a considerable stream rising on the eastern declivity of the Damuk.
YOOMOUNTAINS.—A long range of mountains stretching from lat. 16° to lat. 22° 20', in a direction N.N.E., and forming a natural barrier between Arracan and Ava, and thence stretching southerly, through the British province of Pegue, to Cape Negrais. It is a continuation of the great mountain-chain commencing at the south of Assam, in lat. 26° 30', and extending southwards, running parallel with the river Irawaddi. This range has received, and been known under, various designations, but the one above mentioned is that generally adopted. The mountains vary in height, according to Crawford, from 200 to 8,000 feet. The loftiest point is the Blue Mountain, in lat. 22° 37', long. 93° 11'. From this peak, proceeding southward, the mountains gradually decrease in height.

There are several rivers which water the province of Arracan, flowing from these mountains, but none are large, and they derive their importance only from the towns situate on their banks. The chief are the Arracan or Kuladyne river, the Talak, Aeng, and Sandoway rivers.

YOOSOO (so called from a village of the same name at its southern base).—A pass in Bussahir, over the range of the Himalaya forming the southern boundary of Koonawar. Elevation of the pass above the sea 15,877 feet. Lat. 31° 24', long. 78° 9'.

YOUNGAI.—A town in the British district of Tavoy, one of the Tenasserim provinces, 114 miles S.S.E. of Amherst. Lat. 14° 30', long. 98° 18'.

YOUNZERAY.—A town in the British province of Pegu, situate on the Irawady river, 18 miles S. by W. from Prome. Lat. 18° 31', long. 95°.
ZAFFARGHUR.—A town in the territory of the Nizam, 72 miles E. N. E. from Hyderabad. Lat. 17° 46', long. 79° 31'.

ZAFURABAD, in the British district of Jounpoor, a town situate on the right bank of the river Goomtee, six miles S.E. of Jounpoor cantonment. It is mentioned by Ferishta as early as 1595. Lat. 25° 42', long. 82° 47'.

ZAHOOBAD, in the British district of Ghazeepoor, lieutenant-governorship of Agra, a town, the principal place of the pergunnah of the same name, is 14 miles N.E. of Ghazeepoor cantonment. Lat. 25° 41', long. 88° 48'.

ZANSKAR, in Ladakh, or Middle Tibet, an elevated region lying between the Indus on the north, and the Chenaub on the south. It is about eighty miles long from south-east to north-west, sixty wide from south-west to north-east, and lies between lat. 33°—34° 30', long. 76° 20'—77° 40'.

ZEBUEBEEN.—A town of Burmah, situate on the Irrawady river, 121 miles S.W. from Ava. Lat. 20° 41', long. 94° 34'.

ZEBU. See Nusrathpoor.

ZEBUPOORE.—A town in the territory of Holkar, 103 miles N.N.E. from Indoor, and 100 miles E.S.E. from Neemuch. Lat. 24° 3', long. 76° 26'.

ZILLAHPUR, in the British district of Cawnpore, a village on the route from Allahabad to Etawa, and 57 miles S.E. of the latter. Lat. 26° 16', long. 79° 46'.

ZIMNIE RIVER.—See Attaran.

ZOIYA.—A town in the British district of Amherst, one of the Tenasserim provinces, 54 miles E. by N. of Moulmein. Lat. 16° 33', long. 98° 30'.

ZONGBEI.—A town in the native state of Sikhim, 36 miles N. by W. from Darjeeling, and 182 miles E. from Khatmandoo. Lat. 27° 31', long. 88° 11'.

ZOORHUR GHAUT, in the British territory of Saugar and Nerbudda, lieutenant-governorship of the North-West Pro-
vines, a town on the route from Hooosingabad to Nagpoor, 31 miles S.E. of the former. Lat. 22° 26', long. 78° 6'.

ZOPHALING.—A town of Assam, in the British district of E.I.C. Ms. Doc. Suddiya, presidency of Bengal, 48 miles E. by N. of Suddiya. Lat. 27° 58', long. 96° 29'.

ZORAWURGUNJE.—A town in the British district of E.I.C. Ms. Doc. Bulloah, presidency of Bengal, 46 miles E. by S. of Bulloah. Lat. 22° 49', long. 91° 39'.

ZUMMAWALA, in the Sinde Sagur Dooab division of the E.I.C. Ms. Doc. Punjab, a town situated nine miles from the left bank of the Indus, 80 miles S. of the town of Peshawar. Lat. 32° 52', long. 71° 48'.

ZURKEYL.—A town in the British district of Shikarpoor, E.I.C. Ms. Doc. province of Scinde, 10 miles N. of Shikarpoor. Lat. 28° 9', long. 68° 40'.

ZUTO.—A town of Burmah, nine miles W. from the E.I.C. Ms. Doc. Irawaddy, and 145 miles S.W. from Ava. Lat. 20° 15', long. 94° 84'.

ZUZ NAR.—A town within the dominions of Gholab Singh, the ruler of Cashmere, situate 34 miles S.W. by S. from Sirinagur, and 81 miles N. from Sealkote. Lat. 33° 38', long. 74° 43'.

ZYNPORE, in the British district of Cawnpore, lieutenant-governorship of the North-West Provinces, a small town on the route, by Nanamow Ghat, from the cantonment of Etawah to Lucknow, in Oude, and 53 miles E. of Etawah. Water is good here, but rather scarce, and supplies must be collected from Tuttea and the neighbouring villages. The road in this part of the route is good, the country fertile and well cultivated. Lat. 26° 53', long. 79° 56'.

THE END.
