307–364 MOORCROFT MSS.

By far the greater part of this collection of manuscripts relates to Moorcroft's travels during the period 1820 to 1825. William Moorcroft was then Superintendent of the Company's stud in Bengal. He had been granted permission to journey to Bukhārā, at his own expense, to obtain stallions for the Company's stud. His salary was paid for a portion of the time only, and although Government lent him the services of certain assistants and a sepoy guard, it appears that the whole cost of the expedition was borne by Moorcroft himself. Messrs. John Palmer and James Mackillop provided Moorcroft with goods for trading purposes.

Moorcroft planned to go to Bukhārā by way of Yarkand, but after reaching Leh had to abandon that route and go via Peshawar, Kābul and Bāmiyān. He reached Bukhārā early in 1825, and died on his return journey on 27th August 1825.

* Varāha Purāṇa. † Siddhānta-kuumudī by Bhaṭṭoija-Dikṣita. ‡ Yudhiṣṭhira-vijaya. § Nakula. ∥ Generally known as Meghadūta by Kālidāsa. Saneshum is for Samdeśa.

All this has been related in the following work:—

*Travels in the Himalayan provinces of Hindustan and the Panjāb; in Ladakh and Kashmir; in Peshawar, Kabul, Kunduz, and Bokhāra;* by Mr. William Moorcroft and Mr. George Trebeck, from 1819 to 1825. Prepared for the Press, from Original Journals and Correspondence, by Horace Hayman Wilson, M.A., F.R.S. . . . Two volumes. . . . London . . . 1841.*

This work is so intimately connected with the collection of Moorcroft MSS. that they cannot now be well described without constant reference to it. Wilson's work, indeed, gives a *summary* of all the events of Moorcroft's great journey up to the time of his arrival at Bokhāra in February 1825; but it gives no account of Moorcroft's return journey, beyond a passing reference to his death.

The best personal account of Moorcroft is that in the *D.N.B.*

Other publications relating to Moorcroft's travels are mentioned below.

Of the MSS. utilised for his work, Wilson writes,—

"In addition to such letters and reports as he (Moorcroft) had previously addressed to the secretaries of the government, or through them to different public bodies in India or in England, a considerable mass of journals and letters was forwarded from Captain Murray, with whom . . . they had been deposited. . . . They were handed over to the Asiatic Society of Calcutta . . . (and) subsequently forwarded to him (Wilson) through Captain Burnes,† and conveyed by that officer to England. Upon inspection it was found that the documents brought home consisted of a dozen volumes of journals kept with some regularity, eight volumes of letter-books intermixed with miscellaneous notes and journals, Mr. Trebeck’s field-books, and a variety of loose papers. The regular journals extended only to the arrival of the party at Lé, and the miscellaneous papers to the departure of the travellers from Kashmir. . . . On the death of the late Mr. Fraser, of Delhi,‡ however, it appeared that he had succeeded in recovering the missing documents, the journals, and notes of both travellers, up to the period of their departure from Bokhāra. These were obtained from his executors, and sent home in the course of last year.§ Besides a volume of Mr. Trebeck’s, they consisted of seven volumes of notes and journals thrown together without much regard to compression or arrangement, and of a variety of miscellaneous fragments." (Vol. I, pp. 1–liii.)

This account refers to—

(a) Letters and reports addressed by Moorcroft to Government, &c.

(b) MSS. received from Captain Murray, consisting of 12 volumes of journals and eight volumes of letter books, Trebeck’s field-books, &c.

(c) MSS. received from the executors of Mr. Fraser, consisting of eight volumes, including one of Trebeck’s.

* In the notes that follow, this work is referred to by the formula Wilson, Vol. —, p. —.

† In 1833. ‡ 22nd March 1835. § (?) 1836.
With reference to (a), presumably Wilson obtained some of these documents from the Bengal Government, &c., for there are now several such documents, endorsed by the recipients, in the collection. To (b) there is a reference in MS. 355, 137. Most of the items, but not all, are now in the collection. Trebeck's field-books, most of MS. 323 and a book described by Wilson in his note-book, as "Folio 1B," are now missing. About (c) there is a difficulty. Mr. W. Fraser was killed on 22nd March 1835, but Charles Trebeck made the following note on MS. 333: "This part of the Journal of my brother George Trebeck recd. by me from Mr Wm. Fraser of Delhi, the 12 Sept. 1834," and Charles Trebeck made a copy of "Routes obtained at Koondooz," MS. 335, in 1834. Again, Wilson neither utilises nor mentions the most interesting journal of all, "Return from Bokhara," MS. 325, that was recovered from Mr. Fraser. This volume contains the inscription "19 Jany 1829 Dehlee W. F." We must conclude that Fraser sent some MSS. to Charles Trebeck in 1834, and that some were obtained from his executors.

Some further account of Moorcroft's papers is given in—

"Geographical. XV (pp. 156–160). Memorandum regarding books and papers of the late Mr. Moorcroft. By Mr. [P. B.] Lord. Peshawar, 26th May 1838."

Apparently this document was not available when Wilson wrote the Travels. . . . by Mr. William Moorcroft and Mr. George Trebeck . . . , which was published in 1841, but of which the dedication is dated 1837. Dr. Lord's memorandum is of considerable value. He gives a list of 57 of Moorcroft's books "recovered at Koondooz, Khooloom and Muzar." This list names 56 printed volumes and "several loose sheets of MS. accounts and an account book in manuscript." He also recovered a map "containing M'. Moorcroft's route traced, evidently with his own hand, and continued as far as Akcha within one stage of Andkhooee, where he is known to have fallen a victim. . . . On the back of the map is a MS. sketch of the route through Andkhooee to Meinmooa and back through Sreeepool to Bulkh. . . ." A slip of paper that Dr. Lord found bore, in Trebeck's writing,—

"Sept. 6th 1825. Arrived at Bulkh August 25th. Mr M. died August 27th."

The same paper contained the following memorandum:—

"Total on the things, 280 grs.
Oct. 15th. Taken by Meerza, 131 grs. or 4 Miskals.
" 16th. Taken by Dewan Beghee, 33 grs. or 1 Miskal,"

and Dr. Lord relates that Mirzâ Hamîd al-Dîn told him that about a month before Trebeck's death he had gone to him to purchase some pearls. Trebeck produced the pearls and said, "Take them for what you please. My heart is broken, what care I for price now." Dr. Lord adds: "I append a letter from Meerza Humeedoodleen. the principal
secretary to the Khan of Muzar, and a man who attended Mr. Trebeck in his last moments, saying that two printed and one MS. volume are in existence at Shehr Subz, and that he has sent a man for them. As I have since been obliged to leave the country ... I mention this fact as all worthy the attention of some future traveller."

In the first volume of The Journal of the Royal Geographical Society of London (1831, pp. 233–234) it is recorded that certain of Moorcroft's papers were obtained from the India House and that selections from these are to be published. "None of the papers as yet in the India House relate, indeed, to this latter portion of his journey; the latest despatch from him being dated Cashmere, October, 1823. . . ."

In a letter from Sir A. Burnes to C. Masson written at Kābul in 1838 we read, "It may interest you to see Moorcroft's remarks on Elphinstone, which are numerous." (See the description of the Masson MSS. in the appendix to this Catalogue.) Among the books recovered by Lord was "Elphinstone's Cabool with Map," and Burnes was referring to Moorcroft's annotations in this volume.

Moorcroft himself disposed of his MSS. as follows:—

About July 1823 he sent his papers to the care of Captain W. Murray (355, 137; Wilson I, 1.).

Towards the end of 1824 he left his MSS. "under the charge of a trustworthy individual at Tash Kūrghan" (MS. No. 323).

On 7th December 1824 Moorcroft writes: "If our lives or liberty be in ... danger I shall transfer my papers to a Peerzada, who is at this instant actually engaged in interceding on our behalf" (MS. 325, 300).

The sources of the present collection are therefore:—

(i) MSS. received from Captain Murray. No proper list of these exists, but, as near as can be ascertained, the MSS. are present Nos. 307–317 and 336–344. Two volumes, at least, are missing.

(ii) MSS. received from W. Fraser or from his Executors. There is no list, but Nos. 325 and 331 are certain, and possibly 318, 322 and 329.

(iii) MSS. received from the Record Department on 4th June 1924. These consist of Nos. 329–335. Five of them are transcripts made by Charles Trebeck in 1834.

(iv) It is certain that Charles Trebeck received some MSS. from W. Fraser in 1834; and it is possible that he received some direct from his brother George. The transcripts made by him and already referred to are Nos. 331–335.

(v) A set of 12 letters from Moorcroft to C. T. Metcalfe (No. 356) were extracted from some Metcalfe MSS. and made over to the Library on 3rd November 1906.

(vi) Certain original letters from Moorcroft to the Bengal Government, &c., were, it is supposed, obtained by Wilson from the Bengal Government and the Asiatic Society of Bengal.

* See page 889.
The following MSS. are now missing:—

“Folio L.B.,” described by Wilson (see MS. No. 364).
“Journal commencing with events that occurred at the end of Dec. 1824,” all but the first page (MS. No. 323).
George Trebeck’s “Field Books.”
“Several loose sheets of MS. accounts and an account book in manuscript” (Lord).

* An added and incorrect title,
† An added title,
In addition to the MSS. enumerated above the Moorcroft collection contains a number of oriental documents, which are not described below.

The collection consists of what may be roughly described as 28 volumes of journals;* 19 volumes of letters, memoranda on special matters, accounts, &c.; bundles of letters addressed to Moorcroft, and of letters issued by Moorcroft, and of miscellaneous notes; in all, 56 items. The first eight volumes of journals and the earlier volumes of letters may be described as orderly.

The greater part of the collection relates to Moorcroft's travels from 1819 to 1825. The journals commence on 4th February 1820 and end on 3rd August 1825. There are some letters of an earlier period, but these are disconnected items and give no coherent account of Moorcroft's earlier proceedings.

Altogether there are about 10,000 pages of manuscript, of which some 3,000 consist (at present) of loose papers; and the MSS. of the period prior to 1819 extend to about 300 pages. These earlier papers relate principally to stud matters, but there are one or two letters relating to Moorcroft's earlier expedition.

The contents of the MSS.

The manuscripts give an account of Moorcroft's journeys, of his multifarious investigations into commercial affairs, his relations with the ruling authorities, and any matter even remotely connected with such matters. The adventitious matter predominates and often

* Some of them hardly "volumes," and many of them containing "miscellaneous" matter also.

obscures the personal record. The following are some of the topics on which he wrote at length:

- Agriculture
- Agricultural implements
- Asafoetida
- Tibetan scripts
- Antiquities at Bamiyan
- Bees
- Bread corn
- Deodar wood
- Geology
- Gun making
- Ice and ice houses
- Irrigation and canals
- Jasper
- Liver rot
- Longma or sand grass
- Lucerne
- Painting in Kashmir
- Paper manufacture
- Prangos
- Rhubarb
- Russian intrigues
- Sati in Kashmir
- Shawl manufacture
- Sheep
- Sword making
- Timber
- Vine, the &c., &c.

It is estimated that Moorcroft's notes on these subjects amount to about three-fourths of the whole contents of the MSS. If his records of the political affairs of the various countries be added about four-fifths of the total are accounted for.

The record of the journeys is fairly complete, but it exhibits very little information about the long halts that appear to have been imposed upon Moorcroft by circumstances beyond his control; for example, two years at Leh, nearly a year at Kashmir, six months at Peshawar, three months at Kabul, five months at Bukhāra. During these long halts, however, a number of excursions was made, and these are recorded. The time-table given below (pp. 891-2) exhibits the main journey in outline and what may be the subsidiary excursions also.

The principal correspondents are C. T. Metcalfe (22), the Government of Bengal (31), Palmer & Co. (10), G. W. Traill (10), John Palmer (8), Sir D. Ochterlony (8), the Resident at Delhi (7), W. Fraser (5), J. G. Gerard (4), &c.
Moorcroft's journals and letters give no information about his private life or his family; but the letters of G. Saunders, "whose friendship is of no common cast" (344, 1), Madame de Ruvron and J. Gibb give some information about his family. A letter of 23rd October 1818 speaks of Moorcroft's child "and its mother" going to Pusa (355, 21). In 1820 the child Anne was in France with Mary Moorcroft (355, 83), on whose death she was sent to Mr. Saunders in London (355, 88); in 1821 Anne's brother Richard and their mother were in India (355, 88); in 1823 Richard and his mother were still at Pusa (355, 136). "He is a very fine boy. You ought to be proud of such a child," writes J. Gibb (355, 136). In 1822 Moorcroft directs J. Palmer, in case of his death, to send the boy to England (344, 1).

Mary Moorcroft, to whose care Anne was sent, died at Paris in 1820. She was the wife of William Moorcroft. She left "William Moorcroft of the E.I. Company's service" £50 to buy a ring, and the residue of her property to Mary Baroness de Ruvron (355, 83).

Moorcroft's executors were: John William Laing, Collector of Customs at Allahabad; John Jack Gibson, Surgeon to the King of Oudh; and George Saunders, J.P., of Oxford Street, London (344, 6, 7); and (?) William Henry Tippett and William Malcolm Fleming (347, 27).

Of Moorcroft's writings, Wilson (Vol. I, p. li) says: "The materials were therefore incomplete, and they were, as Moorcroft himself terms them in one of his letters, rudis indigestaque moles. 'My journal,' he says in another place, 'if exhibited to the public, will not appear in its present shape. If even digested by myself it will be cut down so as merely to represent facts and observations connected with my journey.' To say the truth, Mr Moorcroft's writings were so voluminous, so unmethodical, and so discursive. . . ."

Indeed, Moorcroft's digressiveness, particularly in his later journals, makes the task of analysing his writings exceedingly difficult; and this and his other faults as a writer rather tend to obscure his generous and enthusiastic nature, his courage and determination, and his many other excellent qualities.

On the other hand, Moorcroft is stated to be "a traveller of great accuracy in general" (J.R.G.S., XXI, 1851, p. 63).

The following publications may be noted:—

A Journey to Lake Mānasarovara in Undēs. [By H. H. Wilson.] Asiatic Researches, 1816, XII, 375–534. This is an account of Moorcroft's first journey across the Himalayas in 1811–12.

Antiquities of Indian Tibet. Part II. The Chronicles of Ladakh and Minor Chronicles. By A. H. Francke. . . Arch. Survey of India, New Imperial Series, Vol. L. Calcutta, 1826. The following interesting account of Moorcroft’s visit to Ladakh is given (p. 125): “At that time, having passed through Šuň-ti (Kulû) and Dkar-zva (Lahul), the Baja-Sahib (Moorcroft) and the Chota Sahib (Trebeck) came with great wealth to Sle (Leh). They gave all sorts of rich presents to the noblemen of La dvags and others. ‘We must see the king!’ they declared. It was said, ‘What evil may come from men (India ?), one cannot know!’; and, all having consulted, an audience was for several months refused. At last they saw the king. They presented a variety of things, chief among which were a penknife, scissors and a gun. They said, ‘We have come to see the way in which you yourself, your ministers, workers, and servants manage things, and your own wisdom; and, as there is some danger of this country being conquered by others, we might build a tower (fort) here, which in the end might prove useful to the king.’ The king and ministers, considering the case, said, “If they build a fort, no one knows what harm may come!” and did not allow them to build. Then they gave him (the king) a letter in a box and said, ‘May the king himself accept this; it may cure the king’s mind!’ After staying through both summer and winter they departed. These were the first European Sahibs who came.”

I give below an outline of Moorcroft’s itinerary. The dates are sometimes difficult to ascertain, for Moorcroft was rather haphazard in this matter, and occasionally records his own doubts. The staff of the expedition consisted of:—

William Moorcroft.
George Trebeck, general assistant.
George Guthrie, an apothecary, lent by Government.
William Laidlaw, a geologist; dismissed in January 1820.
Mir ‘Izzat Ullah Khân.*
Hâfiz Muhammad Fazl.*
Ghulâm Haidar Khân.*
Two pandits, as clerks.*
A sepoy guard; servants, coolies, * &c.

The wages paid to these are recorded in MS. No. 352.

* The salaries paid were: Rs. 200, Rs. 50, Rs. 16, Rs. 12 each a month. The botanist died in 1820, his successor was sent back to India from Leh (page 3).

pp. 112-85: Note on the Elephantiasis. This is in another handwriting. Moorcroft adds (p. 85), "The preceding observations were drawn up and put into my hand by my regretted friend Mr Jas. Robinson lately deceased... almost the last time he put pen to paper... was to defend me from an attack in the public Papers in regard to an operation I had formerly performed and given up but which I had mentioned to him four years before it was laid before the Public as a new discovery by another Individual."

This section records Moorcroft's departure from Lahore on 15th May 1820, his arrival at Jindeala, and his return to Lahore on 30th May 1820.

The previous section ended with an unfinished sentence. This is not concluded in the present MS., which begins: "Lahour May 15th. The present ending is: "I suggested that in addition to money being given to Fuqueers, persons in distressed circumstances should be sought out and relieved." See Wilson, I, pp. 107-115.

Moorcroft returned to Leh on 16th November, leaving Trebeck to prosecute the object of the excursion. See Wilson, Vol. I, 422-433. Journey from Leh to Dras (12).

This journal covers the period 10th June 1822 to 4th July 1822, and is wholly concerned with the journey from Leh to Drās. It is summarised by Wilson in Vol. II, pp. 1-14 of his work.

The MS. begins, "June 10th [1822]. Left Leh. The sowing of Wheat & Barley finished at the end of May and the most forward plant has its blade little more than five inches in length. . . ." It ends, "If any other European attempts such a journey as this I would recommend him to endeavour to procure natives of the N.W. of Asia for his servants. . . . With the exception of a Khansama and Writer of Hindoostan the rest of the servants for a journey
into Central Asia should be Persians, Tributes or Tooraneees. The Persians are objectionable in Oosbak Toorkistan on account of their sect, the latter from their propensity to indulge in the abuse of intoxicating liquors and the last are unquestionably most useful.

"This morning I performed for the cataract on two persons, viz., a man and a woman. Three of the cataracts were soft or fluid and the fourth hard with a particularly strong capsule."

A summary, not a copy, of this journal is among Charles Trebeck's papers (MS. 331).

15. Resumption of Journal, September to beginning of October 1822.

Moorcroft is forced to abandon the Yarkand route and the party leaves Leh for Kashmir on 30th September 1822.* They arrive at Drās on 18th October, the last date mentioned in this section of the journal. The MS. begins, "The return of Abdul Lutef was announced from Nubra in the middle of this month, and the letters of the Chinese authorities to my address declared the failure of the Mission. A recital of certain particulars connected with this transaction and translates of the letters as transmitted to our Government renders details on this subject unnecessary. . . ."

It ends, "I objected to this arrangement . . . (but) gave way. It was therefore with no small surprise that I learnt the wish of the carriers to"

Moorcroft and his party leave Drās on 29th October and arrive at the capital of Kashmir on 4th November 1822.

The MS. begins, "to go upon the lower road first. . . . The reason stated was a fall of snow . . . (p. 7.) On the 28th the horses and party came up and we prepared to march on the 29th. . . ." It ends, "My friend could not reach me in less than a month as he was waiting at Leh for the arrival of some pearls. . . . It was therefore determined to represent these circumstances to Rungeet Singh. . . . I employed a large body of women and children to select the best Prangos seeds, an operation more expensive than their purchase."

See Wilson, Vol. II, pp. 92-104.

pp. 300-339: Letter to [Dr. Clarke Abel]. Koondooz, 7 Decem. 1824. H. H. Wilson quotes a few lines from this interesting letter (Preface, pp. xxvii and li). Moorcroft refers to the difficulties he has experienced in collecting information, to that "extraordinary and most interesting individual" Csoma de Körös. "Mr H. H. Wilson some years ago undertook the task of condensing certain portions of a former tour of mine... This Note, which in its then form included an absurdity, has subjected me on several occasions to the ridicule and lust of the Critic, whilst certain doubts of the Editor inserted in the shape of notes, have been adopted by a late abridger of the original abridgment and by whom I am made out to be mistaken as to points which are decidedly as stated by me. ... To Mr Wilson I was then little known, or rather not at all, but his character exempts him from all other save the most correct motives, and, in my view of things, I cannot more decidedly free that Gentleman from the most remote imputation than by taking the liberty of desiring that you would oblige me by causing to be submitted to his examination and judgment such matters as you may think fitting to be tendered to the Public in my absence. If I knew a more decided or more substantial acknowledgement of his talents or of my confidence in his friendship I would most willingly adopt it. ... "I dare not give my Journals to the Meer as he will have more difficulties to struggle with. ... But if our lives or liberty be in most imminent danger I shall transfer my papers to a Peerzada, who is, at this instant, actively engaged in interceding in our behalf. If they should, notwithstanding these precautions, be lost, it will I trust, be remembered, that a Servant of the Honorable Company and his Party were the first Europeans who identified the religion of the former inhabitants of Bameean and probably of Ghool-ghoola or the city of Noise with that of Tibet, and by whom one of the Altars of Alexander was recognised in the Tukhte Roostum or Throne of Roostum. ..."

1825 Journal commencing with events that occurred at the end of December 1824.

This is a fragment of a journal, some of which is given by Wilson in Vol. II (p. 454) of his work. The missing portion of this journal possibly contained the account of Moorcroft's flight to Tâliqiân. It reads: "Deprived of my journal through the precaution of leaving for the use of Government my papers in general under the charge of a trustworthy individual at Tashk Koorghan at the time the lives of the whole of my party were in the most imminent danger and having no utensils for writing till some time in January (I believe about the middle) recollection must supply the place of notes taken when events occurred. . . . After having written to Mr. Guthrie† that I would wait for him at Balkh I was struck with a feeling of disappointment at my own conduct. . . . The Yesawal reported that Moolla Muhummud Umeen who had been a servant of the Hon. Mr Elphinstone . . . if M. B.‡ did not follow his advice and baffle my designs by putting our party to death as he. . . ."

The blanks were never filled in because the journal was not continued beyond 19th February 1825. Moorcroft arrived at Qarshi on 16th February 1825 and left for Bukhârâ on the 21st of the same month.

* See the next entry. Guthrie was attending a child of Murâd Bêg at Tâliqiân.
† Mr. Guthrie had been ordered to go to Tâliqiân to attend a sick grandchild of Murâd Bêg's.

324 cont. The MS. begins: "Karshee. In continuation. It was intimated that on the 3rd day after our arrival we should repair to Court for the purpose of paying our respects to the Prince. Feb. 19. We were summoned at an hour in the morning somewhat early and directed to bring our Soldiers with their arms . . . ." Moorcroft describes the interview and adds notes on the town of Karshee, on pomegranates, prices of provisions, sheep, poshteens, &c. See Wilson, Vol. II, pp. 502–508.

This volume contains a number of notes on special subjects, two letters, and a journal of Moorcroft's visit to Miankal, of the return from Bokhara commencing 22nd July 1825. The last date entered in this journal is 3rd August 1825.

On page 237 of the MS. is written "19th Jan'y. Delhee W.F." and on page 200 is written "16 Jan'y 1829 Dilhee." These dates indicate the period in which the volume was in Mr. Fraser's hands.

pp. 197–203: Gum of Hemp.

pp. 205–350: Return from Bokhara commencing July 22, 1825. These 145 pages nominally contain a journal, but about 60 pages are devoted to notes on particular topics. The journal proper is of considerable interest and is not even touched upon in Wilson's work. The period is, nominally, from 22nd July to 3rd August 1825; but an account of Moorcroft's journey to Miankal, to the camp of the Amir Haidar, which took place just before he left Bokhārā

Journal commencing with reference to Field Book No. 2.

George Trebeck.

Although Wilson appears to have used Trebeck’s Field Books, they are not now in the collection of Moorcroft MSS.

The present MS is Trebeck’s journal of his journey to Dankar in Spiti. The first date is 8th June 1822 and the last 30th August 1822. It is summarised in Wilson’s Vol. II, pp. 45–81.

The journal begins:

f. 1: “8th June 1822. Quitted Leh about 10 p.m. on a Journey to Peetee to facilitate the progress of Lieut P. Gerard or one of his brothers to that City. . . .”

f. 53: It ends, “All had more or less badly inflamed eyes & the skin of my face was burnt into blisters though the sun had always been so obscured that it was easy to look at him without any intervening shade. The distressing effects of a continued reflection are excessive in more than one relation.”

ff. 54–65: Copied from the cards by me, C. Trebeck, June 1833. These notes are copied from the cards that are now preserved in 328. The notes on these cards relate to the period 31st August to 7th September 1822, and to Trebeck’s return journey as far as “Giah.”

[George Trebeck's Journal, 6th May 1823 to 18th June 1824.]

This is headed: "This part of the Journal of my brother George Trebeck recd by me from Mr Wm Fraser of Delhi, the 12 Sept 1834—Chas. Trebeck, Calcutta." It is in Charles Trebeck's writing, and is further headed "Extracts." The extracts are very full, occupying 251 closely written pages, and the latter portion seems to give the full journal. The visit to the source of the "Behut" or Jhelum, and the journey from Kashmir to Kabul are recorded. All this is summarised by Wilson in Vol. II, pp. 239-375 of his book.

The extracts begin: "6 May 1823. In Kashmir one of the objects which most particularly attracts the attention is the River, its antiquity, its usefulness, and its beauty. It was therefore a sort of duty to visit its source before our
departure. Set off with Mr Moorcroft, Soorut Singh and Meer Izzut Oollah..."

p. 250: It ends: "June 18th [1824]. The whole of the survey of this day's journal must be from recollection in consequence of an accident quite unexpected. The march terminated at the walls of an old square Gurhee of Bootkhak within the sight of the city of Cabul. I had made some observations late in the evening, & instead of putting the cards... into a box as I frequently did I gave them to a servant wrapped up in a leather pocket-book along with my compass... my pistol... had been stolen along with my compass & notes... the robbers were not to be discovered... a few minutes later & I should have been called to see the watch relieved when had any one approached he might have met with a more disagreeable reception."

This appears to be an essay on food supply in relation to population. Agriculture and pastoral condition of Ladakh.

He expects to stop at Leh five or six months longer and requests that a change of guard may take place.

Already I have been absent from Calcutta nearly three years and have sold but little of that merchandise the friendship of yourself and Mackillop confided to my charge. I must remain at Leh probably for five months before I can receive the determinations of the authorities at Kashkar. The late and present mission to Yarkund and Kashkar have cost me above a thousand pounds. It might be desirable that I should go to Calcutta.

About his daughter, who appears to be under Saunders' care. "Her second name is given in consequence of my having been adopted into the family of Sunsar Chand the reigning Raja of Kotoch." He explains this at length, gives details of his present life; explains the farming in Ladakh; describes the buildings in detail; describes enamel and tiles used in Lahore; asks Saunders (who appears to have been an architect) to have a model of an old English farmhouse chimney made and sent to him.

The task of carrying the Hortus Siccus devolved on a Persian. . . . I had not the means of being fastidious in the choice of servants, as few persons of this description could be induced to follow my fortunes. Of those who began the attempt several deserted, and the rest were held to their fidelity only through extraordinarily high wages. This book contained "an accurate list of the stock originally purchased by Mr. Moorcroft when starting for his journey . . . also a list of his private property. . . ."

The present volume gives lists of monthly wages paid, e.g. Mir 'Izzat Ulleh Khan, Rs. 200; Hafiz Muhammad Fazil, Rs. 50; Ghulam Haidar, Rs. 16; 2 Pandits, each Rs. 12; Sipahís, each Rs. 8½ and Havildar Rs. 14; total, Rs. 98; Dogs and Maters, Rs. 14. 8. 0; Horses, &c., Rs. 187. 7. 1; other personal servants, Rs. 89; &c.

The phrase “in case of our friend continuing alive to take charge of your daughter” seems to preclude the identification of “our friend” as the wife of Moorcroft. She was the wife of a William Moorcroft and our William Moorcroft speaks of her as “Mary.” Saunders seems to think M. de Rouvron’s behaviour rather curious. He asks Moorcroft for particulars to enable Anne to be christened. [Flscp. Holograph.]

83, ff. 10: From M. de Rouvron [Mary Baroness de Rouvron]. Versailles, 30 August 1820. [Two copies, one containing a lock of hair.] About the will of Mary Moorcroft, and about the child Anne. (the cholera) is still raging in Calcutta at times and has lately carried off Dr Assey who was at Java, and Colonel Archy Campbell both of them most excellent men. . . ." [4to. Holograph. Seal.]

94, ff. 2: From J. A. Hodgson.† Chowringhee, 10 June 1821. "We heard of you reaching Ludack and Dr Gerard at Sabathoo had set to work to anticipate your acct. of your Travels by one which in his way he drew up from what he had gathered from one of your discharged Coolies, in language which most likely he did not understand and delivered it to the World as usual thro' the Journal in Verbiage past all common Comprehension. Now I think in Justice to yourself you should tell your own story. . . . Col. Mackenzie is dead and I was appointed his successor on the 25th of last month . . . he left about 80,000£. . . ." [4to. 98, ff. 4: From J. G. Gerard. Soobathoo, 7 August 1821. “I hope I may be allowed to express the pleasure which I derived on learning from Capn Ross yesterday so favorable a result of your long and laborious exertions & the transpiring prospects of a consummation so valuable as an alliance with a country of such vast ... interest ... as Ludak & Yarkand. I arrogate to myself the liberty of sending you two letters in the Calcutta Journal expressive of my feelings in such enterprising & meritorious efforts. The 2d letter headed by the Editor of the Journal ‘Mr Moorcroft’s journey.’ I find I cannot dilate further since I write in the ambiguity of its proving an intrusion instead of a gratification. Ross went to Calcutta last September & returned in March. Donnelly at Delhee has killed a man ... & it is the opinion that nothing can save him. I was unsuccessful in my adventures last season in attempting to pass the Ludak frontier. Frazer’s work is out & at this place it is a faithful narrative of incident but bears a poverty of language unexpected from that family. Could your interest obtain me or my brother a passport to Leh? ...” [4to. Holograph.] See No. 78 above.

99, ff. 2: From Lieut. Pat. Gerard. Kot Goorh, 15 August 1821. He sends on some letters for Moorcroft. “The last three years I have been carrying on the shawl wool trade on account of Govt. ... Has sent the letters on, that for Mr. Metcalfe to his brother at Delhi; fears that Moorcroft’s application to Sir David Ochterlony for a guard and for money will not be successful; is sending some mercury, &c., “My leave did not admit of meeting you even had the roads been open. ...”

My nearest approach was Manes. . . . The result of that Tour was most disastrous. . . . I lost two of my attendants in the drifting Snow, narrowly escaped myself & lost all the details of the route, Instruments, clothes, &c. . . . This year I had hoped to visit Ludak, but my application for leave of absence was objected to & I was censured for the 'pertness and flippancy' of my letter. . . . Captn. Kennedy of the Artillery is also appointed Assistant to Ross. . . . Sir David goes to Klhow in the situation of Sir John Malcolm. Gardener from Nepal succeeds Sir David. . . ." [4to. Holograph.]

You might possibly have it in your power to obtain a Pass to proceed to Leh. . . An officer by name Capt. Mercer left Libran lately to pay you a Visit . . . He is decidedly a little cracked. . ." [4to. Holograph.]

111, ff. 2: From J. Palmer. Calcutta, 24 June 1822. "I have had no opportunity of conferring with Adam or Lord H. about you and cannot therefore say how your suggestion for a return pro tempore . . . may be received. . . Every document in this bundle is stamped "India Office Library, 3 Nov. 1906." The contents were extracted from some "Metcalfe MSS." belonging to the Record Department (Home Misc. 736). This differentiates this bundle from the others and justifies a separate record of its contents.

The contents are all letters written by Moorcroft and addressed either to C. T. Metcalfe or to the Resident at the Court of Delhi. The letters are originals, that is, they are the letters actually received by Metcalfe. (Sir) C. T. Metcalfe was "Resident at Delhi" from 1811 to January 1819 and Sir David Ochterlony in 1822. All the letters are holographs unless otherwise indicated.

1823. No. 35. ... ” This is a copy, but it is an official copy that was used by the Government of Bengal, and was, possibly, obtained from Calcutta by Wilson. The paper is printed in the Journal of the Royal Geographical Society of London, 1830–31, p. 233 sqq. [Flecp.]

See also Wilson, Vol. I, 357 sqq., and 339, 5.

31, ff. 4: Commercial Treaty between the ruling authorities of Ladakh and W. Moorcroft. . . . 4 May 1821. This is signed and sealed by George Trebeck, William Moorcroft and ‘Izzat Ullah Khan. [Two copies, 4to.]

33, ff. 2: To the Resident at the Court of Delhi. Leh, 19 July 1821. Moorcroft asks him to forward Rs. 5,400 to “Moorlee Dhur.” The letter is endorsed, “This letter was returned by the Resident at Delhi through Moorlee Dhur.” [4to.]

The letter begins, “In compliance with the desire of the Rulers of Ladakh I have the honor of transmitting to you copies of three letters from the Emperor Aurungzeb to successive Rajas of this country. . . . I have the farther and much higher gratification of forwarding herewith a Memorial containing a tender of the allegiance of the present governing authorities of Ladakh to the Honorable Company. . . .” The letter goes on to give a sketch of the geography, history and resources of Ladakh, and its relationship with other countries.

The letter is the original one and was, possibly, obtained by Wilson from Calcutta. Wilson’s account refers to the dispatch of the letter and its unfavourable reception by the Government of Bengal (Vol. I, p. 421). In this account Moorcroft says, “I forwarded the memorial and tender to Calcutta. From motives which I am unable to appreciate, and unwilling to scrutinise, my conduct was wholly disapproved of, and I was severely censured for taking unauthorisedly a part in political arrangements . . . but the consequences were still worse, and the difficulties and dangers which subsequently beset my progress, were mainly owing to the harsh, peremptory and public manner in which discredit was affixed to my proceedings by the Resident of Delhi and the government of Bengal.”

(a) Latin translation. [Two copies.]
(b) Russian transcript.
(c) ? Persian translation.

* The five letters dated 17th September (Nos. 40 to 43A) appear to be in the handwriting of Csomà de Kôrös, who met Moorcroft on 16th July 1822. Moorcroft returned to Kashmir and Csomà remained at Leh with Trebeck. He joined Moorcroft on 26th November and remained with him until 22nd May 1823.
The Latin translation was made by Csoma de Kőrös. See Duka's *Life and Works of Csoma de Kőrös*, 1885, p. 28.

45, ff. 4: To George Swinton, Secretary to Government. 12 November 1822. On patterns and material of shawls.

47, ff. 2: To A. Ross, Agent to the Govr-General at Delhi. Kashmeer, 15 November 1822. Encloses a letter to W. Fraser about the payment of a bill.

48, ff. 4: To George Swinton, Secretary, &c. 17 December 1822. On the designs of Russia on Kashmir.

49, ff. 10: To the Secretary of the Asiatic Society. Kashmeer, 8 February 1823. Endorsed "1825 No. 51. W. Moorcroft, Esq . . . Recd. 2d November 1825. Tibetan Letters entd." This is therefore the original received by the Bengal Government. The letter begins, "I have the pleasure of transmitting alphabetical specimens of various kinds of letters employed in writing and printing the language of Tibet . . . ." Moorcroft goes on to give a dissertation on the grammar, apparently based upon the *Alphabetum Tibetanum* of Georgi (Rome, 1762), and he describes briefly the Kanyoor or Kaghyoor (Kah-gyur), &c. [Autograph.]

50, ff. 5: (a) To the Officer Commanding at Subathoo. Kashmeer, 24 March 1823. "The object of this address is to bespeak your good offices for Mr Alexander Csoma, or Sekunder Begh of Transylvania. . . . I have known this gentleman for five months most intimately, and can give the strongest testimony to his integrity, prudence, and devotedness to the cause of science. . . . Mr Csoma will endeavour to remain in Tibet until he shall have become the master of the language of that country. . . ." The whole letter is printed by Duka in his *Life and Works of Alexander Csoma de Kőrös*. . . . London 1885, pp. 34 and 35.

51: (b) To Messrs. Palmer & Co. 21 April 1823. Pay to the Commanding Officer at Subathoo Rs. 200 advanced by him to Mr. Alexander Csoma.

52: (c) Certificate given by Moorcroft to Csoma de Kőrös.

53: (d) To George Swinton, Secretary, Political Department, 24 March 1823. "Mr. Alexander Csoma of Kőrös in Transylvania . . . reached Leh under the hope of finding the road open to Yarkund . . . he introduced himself to me in July

last on the western frontier of Ladakh, returned with me to
Leh and afterwards accompanied my party to Kashmir. . . .
I suggested the obligation he would confer on the Literati of
Europe by devoting a certain portion of his time to obtain an
acquaintance with the language and literary treasures of
Tibet and of Tangoor. . . . Mr. Csoma in pursuance of this
design returns without a companion to Ladakh taking letters
from me . . . to the Minister and to other Officers of the Gov't
and also to the Superiors of certain Monasteries with whom
I am on terms of intimacy. . . . And I have recommended
Mr. Csoma especially to the particular attention and friendship
of Sange Punntzo the principal Lamma of Zangla in Zans-kar into
whose establishment I confidently expect he will be
received. . . . To enable Mr. Csoma to prosecute his studies
with advantage the following books would be useful.

Mr. H. H. Wilson would I doubt not oblige me by procuring
the above-mentioned books as early as possible and my Agents
Messrs. Palmer & Co. will defray the expense. . . ."†

A postscript, in Latin, declares Csoma's intention to carry
out the scheme, and is signed Alexander Csoma de Körös.‡

In another postscript§ Moorcroft offers to advance Rs. 500
"to any individual who may be selected by Dr's Carey &
Marshman as a proper person" to join Csoma to study the
language of Tibet.

Another copy of this letter will be found in 349, 4
(pp. 25–29). Wilson gives (Vol. I, p. 338) a somewhat
prefunctory account of Moorcroft's relations with Csoma.

54, pp. 68: To [ ] Kashmeer, 20 May 1823. The
first 56 pages are numbered and of the remainder two are
numbered 69 and 70. The letter begins, "Your letter of
the date of May last year has just reached me . . . in 1819
I transmitted to you . . . through the address of Mr. H. Nisbet
an exposition of the grounds on which the present expedition
was undertaken, and in 1820–21 an account of the success
of the enterprise. . . ." Moorcroft gives an account of his
journey, discusses trade, &c. [Incomplete.]

* See A. H. Francke's Antiquities of Indian Tibet, Part II, p. 162.
Duka gives Yan-lha, which Francke suggests may be Bzān-la, in
Zāns-dkar.
† In a letter of 21st August 1829, Csoma, in refusing the offer by
the Asiatic Society of a stipend and books, writes: "In 1823, in
April . . . being destitute of books, Mr. Moorcroft, on my behalf,
had requested you to send me certain necessary works. I have never
received any. I was neglected for six years." Duka, p. 103.
‡ Csoma writes: "I promised by my handwriting in the same
letter, which I beg to refer to, that I would stand faithful to my
engagements, to study and to be diligent in my researches." Duka, p. 31.

Miscellaneous scraps and fragments.

This a rough note book, containing partial analyses of some of Moorcroft’s and Trebeck’s MSS., rough sketch maps of routes, and odd notes. It does not deal with the first eight journals, neither does it touch upon the later journals.
A very small fraction of the present loose papers are mentioned. The volume described as "Folio LB." by Wilson is not now in the collection. The omission from the note book of the first eight parts of Moorcroft's journal is easily accounted for, since they are quite orderly and were probably dealt with before the note book was started.

The MSS. listed and partially analysed by Wilson are:

Moorcroft's Journals of July and August 1825, G. R. Kaye's transcriptions.

These two loose-leaf notebooks contain transcripts made partly by, and partly for, the late Mr. G. R. Kaye, as mentioned in the note to p. 905, from MSS. Eur. D. 254, catalogued under 325 above, and in view of the difficulty of reading the original will be of great use to anyone working on it. Their contents are as follows.

823 823. This transcript covers Moorcroft's last journey from July 22nd to August 3rd 1825. At the beginning is a sketch 1602.
map, showing the route from Bokhara, followed by a note by Kaye; "the journal is almost unreadable as it stands in the MS., for it is embedded in a mass of other records. . . . The whole of the journal proper is given below, but it is still defective, as, occasionally, Moorcroft's handwriting is quite defective, and his meaning is often obscure." The portions transcribed are from pp. 310–311, 276a (also in 824), 250, 205–206, 208, 211–213, 217, 219–221, 224–227, 236–237, 311–320, 338–350, of the MS.

This transcript covers Moorcroft's journey to Meenankal, somewhere about July 8th to 20th 1825, and corresponds to pp. 238–256 and 271–276b of the MS.

Arabic Grammar in Greek.

It has not been found possible to obtain any information about the date, provenance or authorship of this MS. On the front cover are two brief inscriptions in ink, (i) above, illegible, possibly a monogram or an Arabic word, (ii) below, either "N. G [?]" or "N. 6." The paper of which the notebook is made up is of good quality foolscap, but the watermark has been so cut up and hidden in binding that it cannot be deciphered with certainty, except that no remains of a date are anywhere discernible. A note at the beginning runs "Purchased of Allen & Co. 2d July 1850," and at the end is the number "2800." The contents consist of an Arabic grammar in Greek, with some Persian paradigms and some Turkish equivalents of phrases; some of it is more vocabulary than grammar. The Arabic writing on the flyleaf opposite p. 1 merely gives the Arabic names of certain grammatical terms.

No. 10. Arabic Grammar, by T. M. Dickinson.

The Library contains a number of translations from the Arabic by T. M. Dickinson, which are omitted from the present catalogue. This number contains an Arabic grammar, whose date cannot be even approximately determined, the rough paper on which it is written being without watermark, and MSS. Eur. D. 337, which has some information on the subject in some letters bound in at the beginning, not being available to the cataloguer; all the Dickinson MSS. seem to have come into the possession of the Library with the Eastwick MSS. The work is apparently incomplete; the first 16 pages are blank, and the grammar begins without introductory remarks by treating of the verb. This part goes down to p. 85, and p. 89 begins a new section treating of the construction of words in Arabic and of their classification according to the peculiarities of the letters of which they are composed, and this subject continues to the end of the MS.
