Entrance to Cave 17 at Tun-huang in west China where the diary of Hye Ch'o was discovered in 1908 by Paul Pelliot.

- ◀ From India through Central Asia and across north China, great cave complexes were constructed to serve as religious centers. One of the most important of these caves are the several hundred which line the cliffs at an oasis spot at Tun-huang. Today, the desert constantly threatens to engulf the famous caves which are filled with treasures in the form of paintings and images that have survived through the centuries.

Stūpas still mark the Silk Road route taken by merchants and pilgrims on their way West, going toward Rome or India.

ACKNOWLEDGEMENTS

I wish to record my thanks to Dr. K. M. Varma of India, who has kindly sent me the Fuchs, German translation from Berlin when he was in Germany; also Dr. Walter Fuchs of Germany, Professor Koh Byong-ik of Korea and Professor J. Sram of Czechoslovakia for their encouragement and help in my translation of Hye Ch'o's *Memoirs*, and to my secretary, Mrs. Grace Gordon, who has kindly typed the manuscript of my translations, as well as other articles relevant to this project during the last six years.

JAN Yün-hua
Professor,
Department of Religion,
McMaster University,
Hamilton, Ontario, Canada.

We wish to acknowledge our debt to Mr. Yim Tse, Librarian of the Asian Studies Library, University of British Columbia, who has very generously and patiently spent countless hours going through readings which many have previously found difficult and uncertain. In addition, we would like to thank Dr. Jennifer Jay-Preston for her help in historical continuity in the translation. Without the help of these two, the editorial work would certainly not have been as accurate as it is. Needless to say, all remaining errors are the responsibility of the editors.

EDITORS' PREFACE

The travels of a little known eighth-century Korean monk would probably have escaped any notice had it not been for the discovery of a manuscript at Tun-huang in 1908 by Paul Pelliot. It is to that eminent scholar that must go the initial credit for this translation of Hye Ch'o's *Memoir of a Pilgrimage to the Five Regions of India*. It is surprising that, except for an obscure German translation by W. Fuchs, Hye Ch'o's *Memoir* should have remained so little known in this century after the discovery of the manuscript by Pelliot. Hye Ch'o's *Memoir* is a contemporary witness of eighth-century India, the type of personal account so lacking in ancient Indian history. The *Memoir* is an important addition to the Chinese Buddhist Pilgrims' writings on India, as exemplified by Fa-hsien and Hsüan-tsang. Hye-Ch'o is also perhaps unique in that he was of Korean origin Kim (Hui Ch'ao); his *Memoir* attests to the brotherhood felt amongst even the extremities of the Buddhist world of his time. The difficulties of travel in Asia in the eighth century were immense, as Hye Ch'o describes in his poetry. Yet, men like Hye Ch'o would endure these hardships in order to visit the holy sites of the Buddhist world. His *Memoir* is then in part a record of the unifying cultural force of Buddhism in Asia.

The editors of this translation learned that two scholars working independently had developed an interest in Hye Ch'o and were preparing English translations of his *Memoir*. We decided that the efforts of these two scholars should be combined so that a standard first English translation of this work could be published. The translation of Professor Han Sung Yang, formerly of Hanyang University, came to the notice of the editors through the good offices of Dr. Lewis Lancaster of the University of California at Berkeley. The editors also learned that Dr. Yün hua Jan of MacMaster University, who has published several articles on Hye Ch'o, had readied his translation of the *Memoir*. The editors were also aware that a Japanese translation of the *Memoir* had been recently published by Professor Sadakata Akira of Japan. The editors were able to draw on the hard labours of these scholars to produce what we believe is the most accurate and consistent rendering of a difficult manuscript into readable English.

The duties of the editors were twofold. Firstly, by comparison of the available translations many points of discrepancy were discovered.

Dr. Shotaro Iida, the general editor of this translation, undertook the linguistic analysis of the particular points of difficulty. The language of Hye Ch'o is in many places quite obscure. The editors have decided upon the most logically consistent, (common sense) translation of these difficult points. The extensive footnotes, prepared by Professor Yang and Dr. Iida, refer to these difficult points in the text. The second duty of the editors was to render Hye Ch'o's *Memoir* into English in a style both readable and appropriate to a historical narrative. This duty, along with the preparation of an introduction, was undertaken by Laurence Preston. The first translation of any ancient manuscript is always difficult, particularly so in the translation of ancient Chinese records of foreign lands. The editors sincerely hope that their year of labour, even for a text the length of this *Memoir*, will justify the many years work of the translators.

Perhaps the greatest story of intellectual and spiritual intercourse between two great world cultures was that of the introduction and development of Buddhism from India to China. Here were two mature cultures, separated by immense physical, linguistic and cultural factors, yet, starting from the early centuries of the Christian era, Buddhism left India, travelled the hazardous tracks of Central Asia and of the Southern oceans, and became established as an integral part of Chinese culture. Buddhism must certainly be the most important and profound doctrine ever to be accepted by the Chinese from outside their own culture. Buddhism must certainly also be the most important and lasting doctrine which India gave to Asia. In Asia, the history of Buddhism is the history of contact between cultures. Thus, when Buddhism was alive in India, Chinese culture was in direct contact with Indian culture.

While China adopted Buddhism, an Indian religion, it is true to say that China adapted and assimilated Buddhism. Buddhism responded to the culture it found itself in wherever it went in Asia. In China, the classical civilization, particularly Taoist philosophy, molded Buddhism into an integral part of Chinese civilization and history. After Buddhism declined in India after 1000 A. D., the basic storehouse of Indian Buddhist thought was exhausted. Chinese Buddhism then developed within itself, it in fact became Chinese.

However, while Buddhism was alive and developing in India, China was very conscious of Buddhism's Indian origins. India was the center of orthodoxy. India was the home of the most sacred Buddhist pilgrimage sites, it was the land where Buddha had lived and taught. The sacred books of Buddhism were written in Indian languages and had to

be translated into Chinese. The great masters and commentators of Buddhism lived and worked in India, where the most famous Buddhist institutions of learning were located. It is no wonder then, that there should arise the desire among Chinese Buddhists to go to India, to visit the sacred spots, to search for Buddhist books and to learn the Indian languages. Buddhism had entered China with merchants along the trade routes, the early translations of the canonical books had been difficult, done through many intermediaries. The introduction of Buddhism to China was not in the nature of an organized missionary activity, thus China received many confused parts of the whole religion. In addition, at this time Buddhism in India was undergoing many profound changes. For example, Mahayana doctrines were developing at the very time Buddhism first entered China. For these reasons, there was the desire to go to India to study the traditions, doctrines and disciplines of Buddhism at first hand so that China could have a systematic account of Buddha's teaching and its subsequent developments.

From the second to tenth centuries A.D. many Chinese Buddhist monks made the long journey to India. Most of these are unknown to us except perhaps for a brief notice. There were, however, some of these pilgrims who wrote accounts of their journey to India. Thus we are fortunate in having several accounts, spread over the centuries of the first millenium A. D., of Chinese Buddhist pilgrims' journeys to India. Each of these accounts possesses an intrinsic interest and value. There are elements in the various accounts which compliment each other and there are elements which each pilgrim develops individually. While recording what particularly interested them (for we must remember that the accounts were written by Buddhist pilgrims for an audience interested in a very foreign but sacred land), the accounts also give the modern reader much important historical and social information. Because the accounts were written by Buddhist pilgrims we are also given a valuable and incomparable insight into the contemporary state of the Buddhist religion, which was the intellectual and spiritual environment during the period of the most profound contact between the two great ancient Asian cultures, India and China.

The following are brief biographies of the pilgrims in which we are most interested.

Part I

Buddhist Pilgrims

Fa-hsien

The first Buddhist pilgrim who has left an account of his travels was the monk Fa-hsien. In his small work, Fa-hsien has recorded his travels to Central Asia, India and Ceylon. Fa-hsien was a native of Shan-si; he left home at three years of age to join the Buddhist Sangha. After his noviciate, Fa-hsien developed the desire to go to India to search for books of the *vinaya piṭaka*, the monastic rules of Buddhism. Fa-hsien was perhaps twenty-five years of age when, in 399 A. D., he departed for India. The record states that

Fa-hsien had been living in Ch'ang-an. Deploring the mutilated and imperfect state of the collection of the Books of Discipline [*Vinaya piṭaka*], in the second year of the period *Hwang-che*, being the *Ke-hae* year of the cycle (399 A. D.), he entered into an engagement with Hui-ching Tao-ching, Hui-ying and Hui-wei, that they should go to India and seek for the Disciplinary rules.¹

Fa-hsien undertook the dangerous journey through the deserts of Central Asia and across the Pamir and Hindu Kush mountains to reach India. Much courage and determination was required by the pilgrims to make this journey. Throughout his travels, Fa-hsien constantly displayed such courage. Fa-hsien records that in the deserts,

... there are many evil demons and hot winds. (Travellers) who encounter them perish all to a man. There is not a bird to be seen in the air above, nor an animal on the ground below. Though you look all round most earnestly to find where you can cross, you know not where to make your choice, the only mark and indication being the dry bones of the dead (left upon the sand).²

Fa-hsien travelled in northern India, visiting the holy Buddhist sites located in the valley of the Ganges river. Kapilavastu, the place of Buddha's birth; Bodhgayā, the site of Buddha's enlightenment; Sārnāth, where Buddha preached his first sermon; and Kuśingara, the place of Buddha's death and final liberation were among the sites Fa-hsien and the other pilgrims visited and described. In the accounts of the other pilgrims most parts of India and Central Asia were at one time visited and described. Fa-hsien however, after travelling through Central Asia and North West India, spent much of his time visiting and describing mid-India or Magadha, the homeland of the Buddha. Fa-hsien did not visit peninsular or South India. Fa-hsien left India by sea to return to China. He did however visit Ceylon on his return voyage. This is the only first-

hand account of that important Buddhist island from a Chinese Buddhist pilgrim. Fa-hsien returned to China in 414 A. D. after enduring many hardships at sea. At one point he encountered a severe storm, at another he was in danger of being marooned by the crew of the ship in which he was travelling. Fa-hsien's journey is summarized in the following way,

After Fa-hsien set out from Ch'ang-an it took him six years to reach Central India; stoppages there extended over (another) six years; and on his return it took him three years to reach Ch'ing-chou. The countries through which he passed were a few under thirty. From the sandy desert westward on to India, the beauty of the dignified demeanour of monkhood and of the transforming influence of the Law was beyond the power of language fully to describe; and reflecting how our masters had not heard any complete account of them, he therefore (went on) without regarding his own poor life or (the dangers to be encountered) on the sea upon his return, thus incurring hardships and difficulties in a double form. He was fortunate enough, through the dread power of the three Honoured Ones, to receive help and protection in his perils; and therefore he wrote out an account of his experiences, that worthy readers might share with him in what he heard and said.³

Sung Yün and Hui Sheng

Sung Yün and Hui-sheng were despatched in 518 A. D. as an embassy to the western countries by the Empress Dowager Ta-hao of the so-called Great Wei dynasty, a dynasty of invading peoples known as the T'o-pa. The pilgrims' object was to obtain Buddhist books, of which they returned with 170 volumes belonging to the Mahayana persuasion. Sung Yün was probably considered well suited to undertake such an expedition because he was a native of Tun-huang, located at the Chinese Central Asian frontier. Tun-huang was the Chinese terminus of the southern trade route through Central Asia. Perhaps for this reason Sung Yün travelled from China to India by the southern route via Khotan.

Sung Yün and Hui-sheng did not visit mid-India, they reached only Gandhāra at about the present day Peshawar. The pilgrims were well received when they reached Udyāna, around the present day Swāt valley. It is reported that,

The king of the country seeing Sung Yün (inquired respecting him, and) on their saying that the ambassadors of the Great Wei (dynasty) had come, he courteously received their letters of introduction. On understanding that the Empress Dowager was devotedly attached to the law of Buddha, he immediatly turned his face to the east, and, with closed hands and meditative heart, bowed his head; then, sending for a man who-could interpret the Wei language, he questioned Sung Yün and said, "Are my honourable visitors men from the region of sunrising?" Sung Yün answered and said, "Our country is bounded on the east by the great sea; from this the sun rises according to the divine will (the command of the Tathāgata).⁴

However, Sung Yün and Hui-sheng found their reception in Gandhāra less than warm, for when they met the king of Gandhāra,

Sung Yün repaired to the royal camp to deliver his credentials. The king was very rough to him, and failed to salute him. He sat whilst receiving the letters. Sung Yün perceived that these remote barbarians were unfit for exercising public duties, and that their arrogancy refused to be checked.⁵

Northwest India was in a state of political unrest during the period of Sung Yün's travels. It would appear that for this reason, as seen in the unfriendly actions of the king of Gandhāra, the pilgrims were unable to proceed further than the Indus river to the holy Buddhist pilgrimage sites. The object of their travels, to obtain Buddhist books, being achieved, the pilgrims returned to China in 521 A. D.

Hsüan-tsang

The most renowned of Chinese Buddhist Pilgrims was the Master of the Law Hsüan-tsang. Hsüan-tsang was born in Ho-nan in 603 A. D. In early life, Hsüan-tsang displayed obvious signs of intellectual and spiritual greatness. Even at an early age, Hui-li, Hsüan-tsang's biographer reports that,

... he, Hsüan-tsang, took to reading the sacred books [Chinese Classics], and was charmed with the writings of the ancient sages. A book without elegance and propriety he would not look at; he would have not intercourse with those who were opposed to the holy and wise...⁶

Hsüan-tsang left home at a very early age, entered the Buddhist monkhood at the age of thirteen while residing in the city of Lo-yang. Hui-li says that,

His second brother Chang-tsi had previously become a disciple of Buddha, and dwelt in the convent of Ching-tu at Lo-yang. Observing that the Master of the Law was deeply given to the study of religious doctrine, he therefore took him to his convent and taught him the method and practice of the sacred sooks (of Buddhism).⁷

Due to the political and social unrest caused by the fall of the Sui dynasty, Hsüan-tsang went to Hsing-tu in Szechuan, where he was ordained at the age of twenty. From here, Hsüan-tsang travelled throughout China in search of knowledge of the sacred books of the Buddhists. At length, he came to Ch'ang-an, then under the peaceful rule of the T'ang emperor T'ai-tsung. It was here, Hsüan-tsang developed the desire to visit India. Hui-li reports that,

The Master of the Law, having visited the celebrated Masters all round, devoured their words and examined their principles; and so he found that each followed implicitly the teaching of his own school; but on verifying their doctrine he saw that the holy books differed much, so that he knew not which to follow. He then resolved to travel to the Western world in order to ask about doubtful passages.⁸

Hsüan-tsang was conscious of the example of Fa-hsien before him. Like Fa-hsien, Hsüan-tsang was concerned about the incomplete and misinterpreted nature of the Buddhist scriptures that reached China. The introduction of Chang-yueh to Hsüan-tsang's record summarizes this idea common among the Chinese Buddhist Pilgrims when it says,

Now Buddha having been born in the Western region and his religion

having spread eastwards, the sounds of the words translated have been often mistaken, the phrases of the different regions have been misunderstood on account of the wrong sounds, and thus the sense has been lost. The words being wrong, the idea has been perverted.⁹

The work Hsüan-tsang has left us, the *Hsi-yü chi* is the longest and most detailed account of the countries of Central Asia and India we possess by a Chinese Buddhist Pilgrim. While Hsüan-tsang's purpose was to obtain Buddhist books and to receive instruction while in India, he did more, as the introduction to his records says,

...after he (Hsüan-tsang) had travelled afar in search of the law, in his moments of leisure he has preserved these records of the character of the lands (visited).¹⁰

Hsüan-tsang obtained and translated 657 Sanskrit Buddhist works as well as receiving the best instruction he could find throughout India. Much of this activity is detailed in the *Hsi-yü chi* companion volume, the biography of Hsüan-tsang by Hui-li. However, Hsüan-tsang in his records, as the Preface to the *Hsi-yü chi* by Chang-yueh states,

... thoroughly examined the different manners of distant countries, the diverse customs of separate people, the various products of the soil and the class divisions of the people, the regions where the royal calendar is received and where the sounds of moral instruction [of Buddhism] have come, he has composed in twelve books the *Ta-T'ang Hsi-yü chi* [the records of the Western regions during the Great T'ang dynasty].¹¹

Hsüan-tsang travelled from China in 629 A. D. through Central Asia by the northern trade route via Kucha, and reached Northern India, where he was the guest of the great Indian emperor at the city of Kanauj. He visited the sacred Buddhist sites in Magadha and spent much time studying at the great Nālanda monastery, then the center of Buddhist scholarship. The pilgrim then travelled to South and West India. He returned to China, again by way of Central Asia, though this time by the southern trade route via Khotan. Hsüan-tsang recorded the details of all the countries he visited. He also included information on countries he had heard reports of; for example, he was able to record some stories concerning Ceylon when he was in South India, though he had not visited the island. Hsüan-tsang returned to China in 645 A. D. He was accorded much esteem on his return, but refused all high civil appointments offered by the still-reigning emperor, Tai-Tsung. Hsüan-tsang retired to a monastery devoting his labours to translating Buddhist texts until his death in 664 A. D.

I-ching

While Hsüan-tsang was in India, there was born, near present day Peking, the next pilgrim to leave an account of his travels to India. I-ching was seven years old when he began a secular education.

His teacher died when he was twelve years old. When I-ching tells us that,

Laying aside my study of secular literature, I devoted myself to the Sacred (Buddhist) Canon. In my fourteenth year [648] I was admitted to the Order, and it was in my eighteenth year [652] that I formed the intention of travelling to India, which was not, however, realized till my thirty-seventh year. [671]^{1,2}

After his ordination in 654 A. D., I-ching spent five years in the study of the *Vinaya piṭaka*. The rules of discipline were to remain I-ching's main interest and they form the main topic of his records. The pilgrim spent several years studying the *Abhidharma* literature. He was aware of the travels of Fa-hsien and also of the immediate example of Hsüan-tsang, when he formed his desire to go to India. I-ching and Hsüan-tsang were, in fact, contemporaries. I-ching was staying at Ch'ang-an when Hsüan-tsang's funeral took place there in 664 A. D.

I-ching left China for India from Canton by the sea route, arriving in India in 673 A. D. After visiting the sacred Buddhist sites in Magadha, he resided for ten years (676–685) at the great Nālanda monastery, where he devoted himself to the study of the *Vinaya*. I-ching left India in 685 A. D. for the city of Bhoja, perhaps located on the island of Sumatra, which at this time was very much under the cultural influence of India. Here he devoted himself to the translation of Buddhist Sanskrit texts, particularly the *Vinaya* of the Mūlasarvāstivādin school. In 689 A. D., I-ching returned to China to obtain assistants for his translations. He then returned to Bhoja where he remained for five more years, returning to China in 695 A. D., during the reign of the well-known patron of Buddhism, the Empress Wu. He received much acclaim on his return, but like his predecessor Hsüan-tsang, I-ching devoted the remaining years of his life to the translation of Buddhist works. He died in 713 A. D. at the age of 79, during the reign of the Emperor Chung-tsung.

Apart from his translations, I-ching left two important works. The *Ch'iu-fa kao-seng chuan* is a series of brief biographies of Chinese Buddhist pilgrims that he met or heard of while he was in India. This

work is interesting in that it gives an impression of the numbers of pilgrims who went to India but have left no records of their own. His major work, the *Nan-hai chi-kuei nei-fa chuan* or *A Record of the Buddhist Religion Sent Home from the Southern Sea*, is quite unique among the records left by the Buddhist pilgrims. Perhaps because of the monumental *Hsi-yü chi* of Hsüan-tsang, I-ching did not attempt to describe the country of India. In any case, his travels were in themselves quite limited. He did, however, describe the Buddhist practices in India of what he considered to be the orthodox interpretation of the *Vinaya*. As he states,

. . . on account of some misinterpretations handed down, the disciplinary rules have suffered, and errors constantly repeated have become customs which are contrary to the original principles. Therefore, according to the noble teaching and the principal customs actually carried on in India, I have carefully written the the following articles which are forty in number and have divided them into four books.¹³

*Hye Ch'o(Hui Ch'ao)*¹⁴

Since the discovery of the fragmentary manuscript of Hye Ch'o's *Memoir of a Pilgrimage to the Five Regions of India*, by Paul Pelliot at Tun-huang in 1908,¹⁵ various attempts have been made to study Hye Ch'o's life and works.¹⁶ Scholars have already arrived at certain conclusions, yet many points remain to be recorded and discussed. With the foundation of earlier research, we are in a better position today to evaluate the life and works of this eminent Korean monk and pilgrim. As no biography of Hye Ch'o exists in the collections of monks in Chinese, we have first attempted a comprehensive account of life. Further, an assessment of some important points in Hye Ch'o's memoir has been presented with a view to emphasizing the importance of this memoir for students of the eighth century Asian history.

Hye Ch'o was a native of Hsin-lo, or the Kingdom of Silla, in the Korean peninsula. This is clearly indicated in his writings, and can be re-affirmed from other sources.¹⁷ Our sources do not record whether Hye Ch'o was born in Silla proper or in China. Our sources do not, likewise, record the date of his birth. If we are to judge from the apparent time of his death,¹⁸ a date around 700 A. D. would appear likely for his birth. Some scholars have suggested Hye Ch'o was born in 704 A. D. or 1364 of the Buddhist era.¹⁹ This date has been based on the assumption that he in fact met and became a disciple of Vajrabodhi (671-741 A. D.), a celebrated master of Tantric Buddhism.²⁰ Vajrabodhi arrived at Kuang-chou (Canton) in South China in 719 A. D., where it is supposed he met Hye Ch'o when the latter was a sixteen year-old youth. While this suggestion seems reasonable, Hye Ch'o was soon after to leave on his pilgrimage from South China and there is no original evidence to support this supposition.

Our sources do not give any details of Hye Ch'o's early life.²¹ While the extant manuscript of Hye Ch'o's *Memoir* is missing the first section relating to his journey from China, the place and time of the pilgrim's departure can be reconstructed. He left sometime shortly before 724. This date has been deduced as the date of the commencement of the extant manuscript at Kuśinagara, near Vārānasī, by calculating the number of days moving backwards from the date of December 727 A. D. that he gives for his arrival at An-hsi in Chinese territory.²² Hye Ch'o made his departure from South China and travelled by the southern

sea route to India, much as his predecessor I-ching had done. The initial part of Hye Ch'o's pilgrimage can be ascertained from quotations made by Hui-lin (737-820) from the full text of Hye Ch'o's *Memoir*. In these quotations there are certain geographical and anthropological names such as *Kao-mieh* (Khmer), *Po-ti*, *Lo-hsing-kuo* or the Island of Naked people (Nicobar) etc., which clearly indicate the pilgrim's route to India.²³

Hye Ch'o's travels in India commenced when he landed in the eastern part of the country, as is clearly seen in the quotations used by Hui-lin.²⁴ Hye-Ch'o records in his *Memoir* that he made pilgrimages to holy sites such as Sārnāth, Kuśinagara, Rājagṛha and Bodhgayā. He also visited cities such as Vārāṇasī and Kanauj. From North-central India, he went to the south, to the capital of what has been identified at the Chalukya kingdom.²⁵ Later he continued his travels and came to Western India, which has been identified as the Valabhī kingdom of the Kathiawar peninsula.²⁶ Hye Ch'o then travelled to North-west India, by way of the city of Jālandhara and visited the kingdoms lying on the banks of the Indus. He went further north to the Kaśmīr valley and its neighboring countries. After passing through the lands of Gandhāra, Kāpiśa and a number of Central Asian states, he finally arrived at An-hsi, the frontier city of the T'ang empire, which is identified by Hye Ch'o himself as Kucha. The manuscript records that he arrived at An-hsi in the eleventh moon of the fifteen year of the K'ai-yuan era, *i. e.* December 727.²⁷

After his return to China from India, Hye Ch'o probably resided at Ch'ang-an in the Ta chien-fu monastery and worked under Vajrabodhi. The source for Hye Ch'o's association with Vajrabodhi is from the preface to the *Mahāyāna-yogavajra-prakṛtisāgara-manjuśrī-sahasrabāhu-sahasrapatra-mahātantrarāja-sūtra*. This preface states that Hye Ch'o began the study of this *sūtra* on the 21st of January, 733 *i. e.* the seventh day of the 21st year of the K'ai-yuan era. The same source also records that after eight years of study, the translation of the *sūtra* was inaugurated by Vajrabodhi on January 6, 741. Hye ch'o was the assistant translator (*pei-shu*) or scribe.²⁸ Unfortunately, before the completion of the translation, the project was suspended on the death of Vajrabodhi, who passed away during the autumn of 741. Subsequently, under Vajrabodhi's last testament, the original Sanskrit manuscript of the *sūtra* was sent back to India on March 30, 742. The preface also states that following the death of Vajrabodhi, Hye Ch'o studied the later part of the

sūtra under the guidance of Amoghavajra (705–774 A. D.) during the months November/December 774. Afterwards, on May 23, 780, Hye Ch'o took the translation to the Wu-t'ai Mountain to be copied. The copying started June 11 of the same year at the Ch'ien-yuan P'u-t'i Monastery.

Hye Ch'o's association with Vajrabodhi is solely dependent on the preface to this *sūtra*, the translation into Chinese of which is attributed to Amoghavajra.²⁹ The authenticity of this translation and particularly of the preface, however, has become a matter of some controversy. While previously this work has been accepted by scholars and cataloguers as a genuine work of Amoghavajra, recent studies have challenged this unqualified acceptance.³⁰

According to some scholars, the *sūtra* and its preface are apocryphal. The questions raised and the evidence put forward by these scholars include:

1. Vajrabodhi died in the month September/October 741; thus how could he instruct his followers to return the original Sanskrit manuscript of the *sūtra* to India in the year 742?³¹
2. Amoghavajra passed away on July 28, 774.; thus, how could he teach the later part of the *sūtra* to Hye Ch'o in the month of November/December of the same years?³²
3. If the *sūtra* had been completed in 780, why was it not included in two contemporary works, *the Chen-yüan shih-chiao lu* (A Catalogue of Buddhist Literature compiled during the age of Chen-yüan) and *Yi-ch'ieh-ching yin-yi* (A Comprehensive Dictionary of Canons) compiled in the years 800 and 807, respectively.³³
4. Moreover, according to an early source, when Vajrabodhi went to China he lost all of his Sanskrit manuscripts, so how could he retain this *sutra* and transmit it to Hye Ch'o?³⁴
5. The writing and style of presentation of the *sūtra* appears very much influenced by exegetic techniques and its contents have a strong flavor of Pure Land Buddhism. As the work was first found in the collection of a monastery at the Wu-t'ai Mountain by the monk Heng-an in 938,³⁵ it is, therefore, perhaps a Chinese compilation done during the latter part of the T'ang period (*circa* 9th century). Some scholars have even quoted passages from this *sūtra* and compared them with parallel passages existing in the *Fan-wang-ching* and thus have concluded that it is nothing more than a commentary or annotation of the *Chin-kang-ting-ching Ta-yü-chia Hsin-ti fa-men yi-chüeh* by Amoghavajra.³⁶

While these points are worth consideration, the information given in the preface to the *sūtra* cannot be totally dismissed without further examination. Even scholars who have challenged the authenticity of the translation have had to accept the details of the life of Hye Ch'o supplied by the preface.³⁷ We would venture to suggest that the preface and *sūtra*, though they may be the words of a later compiler, might be based on an unfinished manuscript originally handed down from Hye Ch'o³⁸

With regard to the internal discrepancies over dating, it should be noted that in the preface two methods have been used to record dates. The first recorded dates together with the cyclical characters. For example, the preface states,

In the twenty-first year of the K'ai-yuan age, the cyclical order of the year was Kuei-yu.³⁹

In another place the preface again states,

In the twenty-eighth year of the K'ai-yuan age the cyclical order of the year was Keng-shen.⁴⁰

To record dates along with their cyclical characters was the traditional method used by Chinese historians. To calculate and identify the cyclical characters with the corresponding dates was not an easy task. Even some eminent Buddhist historians have made mistakes about the cyclical characters of medieval times.^{40a} At least in the two instances cited above, the dates are quite correct and identical with the related historical dates. This tends to prove that the two dates shown above were written during the life of Hye Ch'o or were at least based on a contemporary record of the events.

This method of recording dates, however, is found only in the first part of the preface. Thereafter, dates are recorded without reference to their cyclical characters. The important point is that the dates which have raised controversies among scholars all belong to this second part of the preface. The differences between these two historiographic methods used in the same preface are very significant. We conclude, that the dates recorded along with their cyclical characters are reliable, while the dates without their cyclical characters are later insertions. However, though the latter dates might be wrong, the events recorded cannot be entirely baseless.

If this suggestion is accepted, the internal discrepancies over dating would be solved. For the other problems of the preface noted, other explanations easily present themselves. For example, the preface itself

did not claim that the original text of the *sūtra* was brought to China by Vajrabodhi himself. It might as easily been brought by others.⁴¹ The *sūtra* was not referred to by the two contemporary cataloguers, since the work was only an unfinished manuscript and it was not kept in the capital Ch'ang-an, where the catalogue and dictionary were compiled. With regard to the style of the *sūtra* in Chinese, it might have followed the Sanskrit textual style, or perhaps the original Sanskrit text itself was an exegesis to the commentary as has been suggested. Moreover, the Bodhisattva Mañjuśrī is popular in Pure Land and Tantric Buddhism.⁴² Therefore, there is no problem about the text having a flavor of Pure Land Buddhism and being considered as a later compilation. As regards to the parallel passages which have been noted, this is a characteristic common to many *sūtras*. All these points tend to show that with regard to the information regarding the life of Hye Ch'o, the preface appears reliable. There are certain confusions, however, and the authorship of the preface remains in doubt.

Unlike his relations with Vajrabodhi, our knowledge of which is entirely dependent upon the preface of this *sūtra*, Hye Ch'o's connection with Amoghavajra is attested by independent primary source material. According to a memorial submitted to the Chinese throne by Hye Ch'o it is known that he was sent to the Chou-chih country and successfully prayed for rain near the Jade-maid pool. This took place in March 774.⁴³ In this memorial, Hye Ch'o called himself a member of the Royal Religious Establishment.⁴⁴

In his will dated 774 Amoghavajra himself states,

There are many disciples who learnt Dharma from my platform. Eight of them are well-trained in the five sections of canons. After losing some through death, only six are still living. They are Han-kuang of the Chin-ko monastery, Hye Ch'o of Silla. . . If the young scholars (in future) face any difficulty, you (six disciples) should explain the problems to them. Let not the light of Dharma go out.⁴⁵

Immediately after the death of Amoghavajra, Hye Ch'o and his colleagues sent a memorial to the throne. In that memorial, they gave thanks for royal sympathy bestowed by His Majesty during the funeral of their teacher. They also prayed to maintain the religious establishment founded by their late teacher.⁴⁶

It appears that Hye Ch'o stayed a few more years at Ch'ang-an. According to the preface, during the year 780, he went to the Wu-t'ai Mountain with the incomplete translation of the *sūtra*. He resided

at the Ch'ien yuan-p'u-t'i Monastery and there copied the text of the *sūtra* in Chinese.

One would like to know the reason for Hye Ch'o's departure to the Wu-t'ai Mountain. Presumably, he went there on a pilgrimage and for permanent retirement, as he was about eighty years old at the time. Amoghavajra had himself a very close association with the Wu-t'ai Mountain. It was at his initiative that the Chin-ko and Yu-hua monasteries were built and monks attached to these monasteries ordained. Certain other religious establishments were also erected under Amoghavajra's influence.⁴⁷ Among Amoghavajra's eminent disciples, Hiankuang resided in, and was possibly the abbot of, Chin-ko Monastery. Amoghavajra's other disciples, Hui-hsiao and Hui-lang were sent to the Wu-t'ai Mountain on different occasions in connection with Royal Religious Services.⁴⁸ According to a stone inscription of Amoghavajra written by Yen Cheng, dated 781, only the name of the monk Hui-lang is mentioned as the successor of Amoghavajra.⁴⁹ This indirectly proves that after 780. Hye Ch'o was no longer staying at Ch'ang-an. The death of Hye Ch'o, if not proved by his name not being mentioned in this inscription, must have, in any case, occurred soon after.

During his lifetime Hye Ch'o was associated with the introduction of Tantric Buddhism to China.⁵⁰ The beginnings of Tantra in China are associated with the Indian master Śubhakarasiṃha who arrived in China in 716, settled at Ch'ang-an and died in 735 at the age of ninety-nine. Hye Ch'o's association with Śubhakarasiṃha is not alluded to in our sources, but that Hye Ch'o at least knew of him seems likely. Hye Ch'o's association with the other two masters of Tantra in China, Vajrabodhi and Amoghavajra, has been previously detailed. Tantra in China was a phenomenon mainly confined to the eight and early ninth centuries. It is interesting to examine the the life of Hye Ch'o in relation to the period of florescence of Tantra in China. His life spans the period of the great Tantra masters in China, he appears to have worked closely with at least Vajrabodhi and Amoghavajra (and indirectly, Śubhakarasiṃha) at the centre of Tantra in China, Ch'ang-an. Hye Ch'o was an obscure monk, scarcely of any importance except for the *Memoir* he has left us. It is interesting to speculate that his voyage to India was inspired by Vajrabodhi and perhaps Śubhakarasiṃha in order to gain a better knowledge of Tantra, a form of Buddhism that was at this time beginning to become of some importance in India. Hye Ch'o does not himself allude to his association with the Tantra masters in China. Yet, his

biography is in many ways a history of the most important period of Tantra in China.

At present, the text of Hye Ch'o's *Memoir of a Pilgrimage to the Five Regions of India* (*Hui-ch'ao Wang-wu-t'ien-chu-kuo Chuan*) is available only in a fragmentary form. The fragment was recovered from Tun-huang by Paul Pelliot in 1908. The sections of the *Memoir* concerned with Hye Ch'o's outgoing journey and the conclusion of his travels are damaged. Even the extant text is in a condensed form.⁵¹ The content is not so detailed and precise as the memoirs written by Hsüan-tsang and I-ching. Though the calligraphy of the fragment is quite handsome, the text contains many strange characters which are only found in Tun-huang manuscripts and most of which are not even referred to in dictionaries.⁵² The structure of sentences is imperfect and it is very difficult to understand the text clearly.⁵³

Literally, Hye Ch'o's style of Chinese prose only attained an average standard. His phrasing and wording, as found in the extant text, are definitely not elegant or masterly. If one compares his writing with those of Hsüan-tsang and his disciples like K'uei-chi and Tao-hsüan,⁵⁴ or the pilgrim monk I-ching, there is a clear gap between their literary attainments. There are passages in his *Memoir* which are very vague.⁵⁵ Hye Ch'o's poetry, though better than his prose, is still far inferior to that of his Chinese brethren.⁵⁶

Hye Ch'o's knowledge of Indian and Central Asian languages was even poorer. Although he recorded in his *Memoir* the difference in languages between countries, he did not mention any specific names of Indian languages or their dialects. His lack of linguistic training was possibly the reason why proper names are omitted in his *Memoir*. This was perhaps also the reason why he did not become a prominent assistant to the two eminent translators Vajrabodhi and Amoghavajra. Even if we assume that the *sūtra* which we have discussed above was translated or partly translated by him, it is likely that the work was not finished during his lifetime.⁵⁷

In this connection, bibliographical evidence relating to the *Memoir* is significant. Yüan-chao, an eminent bibliographer and colleague of Hye Ch'o did not record the *Memoir* in his catalogue.⁵⁸ The possible reason for this omission is that Yüan-chao did not think the memoir achieved an acceptable literary standard. In the *Dictionary*, compiled by Hui-lin, however, the *Memoir* was carefully noted along with other records of travels by Fa-hsien, Hsüan-tsang, etc. As Hui-lin was a native of

Kashgar in Central Asia his appreciation of the *Memoir* was not colored by the conservative Han literary attitude of Yüan-chao. Hui-lin perhaps had a deeper understanding of the *Memoir's* historical value.

Despite the shortcomings of our extant manuscript, Hye-Ch'o's *Memoir* is definitely an important source for Indian and Central Asian history of the early eighth century A. D. The *Memoir* requires a detailed analysis in relation to known historical facts to properly assess that new information Hye Ch'o adds to our knowledge of what is an important, but obscure, period of Indian and Central Asian history. As with other Chinese Buddhist pilgrims, Hye Ch'o recorded facts together with legend. There are certain obvious historiographical weaknesses in the *Memoir*. Hye Ch'o, for example, records many different regions and kingdoms; however most of them receive only brief sketches. The principal cities or capitals of many kingdoms are not named. Hye Ch'o refers to the kings of various kingdoms, but often does not give personal names or titles.

The *Memoir* is, however, above all a contemporary record of historical events and social conditions in India and Central Asia. Such documents are always wanting in ancient Indian history and particularly for the period of the early eighth century. As an example of the historical importance of the *Memoir*, Hye Ch'o is a contemporary witness of the Arab invasions of Western India and Central Asia. He states that when he was in India, the (Tajjikas) or Arabs had overrun one-half of the countries of Western India. The Arabs early invasion of Sindh is well known from Muslim historical sources, but their invasion of the Valabhī kingdom of the Gujerat region of Western India is known only from Valabhī inscriptions. It is known that the Arabs' early progress was halted by 736. Hye Ch'o's *Memoir* is an important record of the progress of this early Muslim attempt to conquer India.⁵⁹ His account of the political situation and the progress of the Arab invasions into Central Asia is perhaps of even more interest. The *Memoir* records which countries of Central Asia in 727 were under the control of the Arabs, Turks, Tibetans, Chinese and which were independent. At this period, T'ang China and their Turkish allies were standing in direct confrontation with the Arab military progress into Central Asia. The situation which Hye Ch'o witnessed would not last long, for Chinese control of Central Asia waned after the significant battle of the Talas River in 751, where the Arabs joined with China's former allies, the Turks, to defeat the Korean-Chinese viceroy, Ko Sön-ji. Hye Ch'o's

memoir is perhaps the last non-Muslim contemporary account of Central Asia before its conquest by the Arabs and Muslim civilization. Central Asia had always been an important area of Buddhist culture, particularly important in the transmission of Buddhism to China. Shortly after Hye Ch'o's visit, Buddhism would disappear from Central Asia and the traditional land route for Buddhist ideas and pilgrims would be blocked by the new, rising cultural force in Asia.

Importance of the Pilgrims' Records

It is perhaps paradoxical that one of the main areas of importance of these records for the modern reader is also the cause of the weakness of the records in other areas. Whatever information the records may or may not contain, they were written for and by Buddhists. Thus, the records are of extreme interest for the student of ancient Indian Buddhist thought and history. All the records contain much interesting and useful historical, political, social and archaeological data in lesser or greater degree, but this must be said to be, in the main, incidental. I-ching, for example, gives little information about the India of his time, beyond the formal activities of Buddhism. Hsüan-tsang, however, relates much information, but his purpose was also primarily concerned with Buddhism; he was giving a tour of Buddhist countries. Although I have previously mentioned the wealth of political information Hye Ch'ò gives, he primarily dwells on Buddhist countries. In this connection Thomas Watters has criticized Hsüan-tsang correctly from the viewpoint of the modern historian when he says that,

His (Hsüan-tsang's) faith was simple and almost unquestioning, and he had an aptitude for belief which has been called credulity. But his was not that credulity which lightly believes the impossible and accepts any statement merely because it is on record and suits the convictions or prejudices of the individual. Hsüan-tsang always wanted to have his own personal testimony, the witness of his own senses or at least his personal experience. It is true his faith helped his unbelief, and it was too easy to convince him where a Buddhist miracle was concerned. . . . But partly because our pilgrim was thus too ready to believe, though partly also for other reasons, he did not make the best use of his opportunities. He was not a good observer, a careful investigator, or a satisfactory recorder, and consequently he left very much untold which he would have done well to.⁶⁰

This criticism of Hsüan-tsang can well be applied to all the pilgrims' records. But Watters also pointedly reminds us that,

We must remember, however, that Hsüan-tsang in his travels cared little for other things and wanted to know only Buddha and Buddhism. His perfect faith in these, his devotion to them and his enthusiasm for them were remarkable to his contemporaries, but to us they are still more extraordinary.⁶¹

For the student of ancient Indian Buddhist thought and history the records give an unparalleled account of Buddhist India through the first millennium A. D. I-ching, for example, gives a detailed interpretation of the divisions of Buddhist sects along with their general geographical locations. Hsüan-tsang is also careful to give a detailed geographical account of these sects including the numbers of monks and monasteries at the locations he visited. He also records whether the monks belonged to the Hinayana or Mahayana persuasions. Hsüan-tsang indicates whether the king was friendly or unfriendly towards Buddhism, and the state of health of Buddhism in a particular kingdom.

With reference to the Buddhist scholastic tradition, both I-ching and Hsüan-tsang give useful information. I-ching mentions the great historical masters such as Asaṅga, Vasubandhu, Aśvaghōṣa and Nāgārjuna. He also mentions near contemporaries such as Dharmapāla, as well as logicians, grammarians and his contemporary teachers. Because we know I-ching's dates, we can from his information deduce the approximate dates of the great Buddhist masters, information which is unavailable from Indian sources. I-ching also contributed to our knowledge of Nāgārjuna. He translated what is said to be a private letter to a Sātavāhana king of Western India who dates to *circa* 100 A. D. Both Hsüan-tsang and Hye Ch'o also record traditions concerning Nāgārjuna. From Hsüan-tsang, particularly in the companion volume, the *Life of Hsüan Tsang* by Hui-li, we can obtain a clear picture of the university monastery of Nālanda and of Hsüan-tsang's teacher, the Yogācāra master, Dharmapāla.

The pilgrims also give an excellent impression of popular Buddhist worship and belief. I-ching relates the orthodox tradition of worship and ritual as he understood it. Fa-hsien records actual ceremonies. Hsüan-tsang records the stories and traditions of Buddhism that circulated throughout India. The very credulity of faith which Watters criticizes helps to create the atmosphere in which Buddhism existed at the time. Most importantly, these records are personal narratives of a religion in which the writers deeply believed, a type of record unavailable in the Indian tradition.

If the pilgrims' records are not in all cases perfect historical records, comparable to the Chinese dynastic annals, they are none the less invaluable for the study of ancient Indian history. If India had had a great historical tradition of its own, these records would be, at the most, supplemental source material. However, historical writing was never

well developed in India. Thus, classical European and Chinese sources, and such disciplines as epigraphy and numismatics become the main sources of ancient Indian history. Without the personal narratives of the Buddhist pilgrims, our knowledge of ancient Indian history would lack both precise data and personal feeling. The three main areas in which the modern historian is particularly interested are political, social and archaeological. The pilgrims often recorded details of the political developments of an area through which they passed. Sometimes, as in the case of Hye Ch'o these details are explicit as to contemporary political developments. The previously mentioned Arab invasion of India indicated by Hye Ch'o is a good example of the concrete political data which can be obtained from the records. In other cases, exact political details are often incidental to a pilgrim's account. However, with cross reference to other sources and by comparing the accounts of the pilgrims, a connected political picture of an area can be obtained. The area of Northwest India and Central Asia, for example, was visited by all the pilgrims except I-ching. Northwest India and Central Asia have always been an area of much political and cultural intercourse. Fa-hsien visited this area at the time the Kushan empire was in disintegration, just anterior to the rise of the Guptas and the influence they exerted over this area. Fa-hsien gives little exact political data; however, he does recite legends of Kaniska he heard while in Gandhāra. Kaniska had been the last great king to rule over this area before Fa-hsien's arrival. The pilgrim Sung Yün, whose travels were confined to Northwest India, describes an extremely interesting period of its political history. Sung Yün arrived in a period of political confusion. Nomadic peoples known as the White Huns, or Ephthalites, had invaded this area. These invasions had a deleterious effect on the state of Buddhism and were the cause of Sung Yün not being able to proceed to India proper. In fact, the main interest of the modern historian in Sung Yün's account is his description of this period of invasions, an obscure period of Indian history. It can be deduced, for example, that the king of Gandhāra whom Sung Yün met was named Mihirakula. At this time, he was occupied with a war with Kaśmīr, and it is probably for this reason that Sung Yün was unable to proceed past Gandhāra. Hsüan-tsang travelled through Northwest India and Central Asia when it was under the control of the Western Turks. He had to obtain a guarantee of safe conduct from the king of the Turks to be able to pass through this area. In Hsüan-tsang's time the great empire of Harsa was also exerting its influence here. Hsüan-tsang

Hsüan-tsang travelled through Northwest India and Central Asia when it was under the control of the Western Turks. He had to obtain a guarantee of safe conduct from the king of the Turks to be able to pass through this area. In Hsüan-tsang's time the great empire of Harsa was also exerting its influence here. Hsüan-tsang

was, in fact, a good friend of the Emperor and the personal account of Harṣa given in Hsüan-tsang's biography is unique in the study of ancient Indian political history. Finally, Hye Ch'o visited the extreme North-west India and Central Asia in a period when a new political and cultural force had arisen, that of the Arabs. Thus taken together, the pilgrims' account can build a composite chronological record of an area. The wealth of political data, both direct and indirect, is invaluable for the historian.

For the modern social historian, the accounts of the pilgrims are of particular interest. All the pilgrims, except I-ching, recorded details of the contemporary Indian society which they saw. As travellers from a foreign land, it is natural that the pilgrims would record strange social customs and traditions. Hsüan-tsang, in particular, was careful to record certain social details of the countries he visited. Invariably, he records the physical details of a country, its size, climate and the crops then grown. He also gives an appraisal of the demeanor of the people. Then, because he was a Buddhist pilgrim, Hsüan-tsang records the religious inclinations of the society he visited. He was, of course, particularly interested in the social position of Buddhism. Hye Ch'o also records social details. His records are perhaps superior to Hsüan-tsang's in this respect, because he records what particularly interests him in a country rather than recording the details in a formulaic style as does Hsüan-tsang. Hye Ch'o also notes the products and agriculture of a country, and peculiarities of dress and appearance of the inhabitants of the countries he visits, as well as of course, the social position of Buddhism. He however, adds other valuable details, such as describing the method of petition to a Central Asian king. Precise and valuable social data with particular reference to Buddhism can be obtained from the pilgrims' records. For example, Hsüan-tsang records the fact that Nālanda was bought for the Buddhist order by merchants for ten *koṭis*. Hsüan-tsang's biography records that Nālanda was supported from the revenues of one-hundred villages. Again, such precise social information is unavailable from contemporary literary sources in the Indian tradition.

For the modern archaeologist and art historian, the records, particularly that of Hsüan-tsang, are an invaluable source. They record the locations of important Buddhist monuments throughout India. In the case of Hsüan-tsang, he details the exact local geographical locations of buildings and monuments he saw. For the archaeologist, this greatly

helps the process of identification of sites he excavates. Hsüan-tsang, in fact, can be said to be a guide to the monuments of Buddhist India of his day. His work compares to that of Pausanias, who wrote an ancient guide to the antiquities of Greece. At such sites as Bodhgayā, Rājgir and Nālanda, Hsüan-tsang gives the modern reader a tour of the monuments he saw. General Alexander Cunningham, the great nineteenth-century Indologist was able to locate such important sites as Nālanda and Vaiśāli by merely following the directions given by Hsüan-tsang. When these sites were later excavated some attempt could be made to identify the buildings found only because of the information supplied by Hsüan-tsang.

Reasons for Retranslation of These Records

Fifty years ago, the great historian of ancient India, Vincent Smith, said of Fa-hsien's records,

The final translation of Fa-hsien's *Travels*, equipped with an up-to-date commentary adequately fulfilling the requirements of both Chinese and Indian scholarship, has not yet appeared; and the production of such a work by a single writer is almost impossible.⁶²

This comment, which can be equally applied to all the pilgrims' records, is certainly even more true today. The translations which exist today are the products of nineteenth-century scholarship, as can be seen from the attached bibliography. While these translations were adequate or good for their time, major advances have since been made in both Chinese and Indian scholarship. In one case, that of Hye Ch'o, an English translation and commentary has never been published. Because of the importance of these for Indian history and culture, now is the time for a major retranslation project to be undertaken.

The first area in which many advances have been made in scholarship is linguistic. The records themselves are, of course, written in Chinese. Translation of ancient Chinese manuscript has advanced in both the understanding of meanings and in style.

While the records were written in Chinese, they deal with India, thus a thorough knowledge of Indian languages is essential. The pilgrims undertook to make Indian proper names, places and Buddhist technical terminology understandable to their Chinese audience. Thus, one of the main tasks of the modern translator is the reconstruction of such proper names and places back into their original Indian form. This branch of scholarship, which is consistent with the cross-cultural nature of the records, was little understood when the records were first translated. The pilgrims themselves recognized the difficulty of construing Indian words into Chinese. I-ching devotes a chapter to Sanskrit grammar and poetics. The work which has been done in this century in Chinese translations of Buddhist works, can now be utilized to arrive at an accurate translation of the often used proper names, places and Buddhist technical terms.

The advances made in the history and archaeology of ancient India have made it possible to fully utilize the advances that have been made in linguistics. It is now possible to identify the sites and personages

mentioned by the pilgrims with greater accuracy than was before possible. As mentioned above, General Cunningham used Hsüan-tsang to discover and identify important archaeological sites. These sites have since been excavated. The modern scholar is able to use the data from these excavations to make a more precise translation of the pilgrims' records. In major sites such as Sārnāth, Bodhgayā, Nālanda and Rājgir, described by many pilgrims, we can use the records to identify the precise location and function of individual buildings and monuments. This type of archaeological evidence was not available to the early translators of these records.

Details of ancient Indian history have become much more clear since the records were first translated. Through the discoveries made in numerous archaeological sites, the advances made in the fields of epigraphy, numismatics and textual criticism, much more of what pilgrims mention can be understood in relation to the newly-developed historical framework of ancient India. Historians have carefully studied the relevant historical information contained in the records since they have become well known. The modern translator thus has a superior grasp of ancient Indian history and is better able to translate and comment upon historical references. It is to be hoped that new translations will cause other scholars to elucidate further new historical information from the records. In the case of Hye Ch'o a new translation is of particular value for historians who do not read Chinese or have access to the little known German translation.

Many scholars of ancient India, as could be expected from their subject matter, do not have the ability to read Chinese. Because of the importance of these records to many branches of ancient Indian scholarship, an accurate series of translations is now essential. A series of translations which is standard in transliteration, rendered in a modern reading style, and which incorporates the latest advances in scholarship is much needed. A new series of translations is needed to commemorate one of the greatest stories of contact between two great cultures in the name of religion. The importance and uniqueness of this contact to a modern audience can best be seen by an incident Fa-hsien records;

When Fa-hsien and Tao-ching first arrived at the Jetavana monastery, and thought how the World-honoured one had formerly resided there for twenty-five years, painful reflections arose in their minds. Born in a border-land, along with their like-minded friends, they had travelled through so many kingdoms; some of those friends had

returned (to their own land), and some had (died), proving the impermanence and uncertainty of life; and to-day they saw the place where Buddha had lived now unoccupied by him. They were melancholy through their pain of heart, and the crowd of monks came out, and asked them from what kingdom they were come. 'We are come,' they replied, 'from the land of Han.' 'Strange,' said the monks with a sigh, 'that men of a border country should be able to come here in search of our Law!' Then they said to one another, 'During all the time that we, preceptors and monks, have succeeded to one another, we have never seen men of Han, followers of our system, arrive here.'⁶³

Thus began this unique period of contact between the Indian and Chinese cultures.

- 16 Full bibliographical details prior to 1938 can be found in the initial translation of Hye Ch'o by W. Fuchs, "Huei-ch'ao's Pigerreise durch Nord-west-Indian und Zentral-Asien um 726," *Sonderausgabe ausden Sitzungsberichten der Preubischen Akademie der Wissenschaften Phil.-hist. Klasse XXX* (1938). See attached bibliography.
- 17 In one of his poems, Hye Ch'o wrote: "My country is in the north horizon." This indicated the general direction of his homeland. In the text of the last will and testament of Amoghavajra, Hye Ch'o was clearly mentioned as Hye Ch'o of Hsin-lo. - 20 For problems of Hye Ch'o's relation with Vajrabodhi, cf. p.15 ff.
- 21 Han Sung yang relates the account of the childhood of a monk from

Korea called Hye T'ong found in the *Milgyo Puljōn* (*Ch'ongji Pōpchang*). The account is interesting in that it appears Hye T'ong's life was in many ways parallel to Hye ch'o's. It is said that,

In his childhood one day he was playing on the Tongge river and happened to catch a wild sow. Killing the wild sow and skinning it, he left the bones in the back garden. Next morning when he went to see the bones again, these bones had disappeared. However, because there was a trace of blood, he followed it, then he reached the den of the wild sow. When he entered there, he saw the same wild sow hugging five small young. At this time he was very much moved at this scene of the wild sow being alive, and because of this strange phenomenon, he got an inspiration to become a Buddhist monk. After this incident, in order to study Buddhism more deeply he went to T'ang China, where he met his Indian teacher Śubhakarasiṃha
discussion of For Śubhakarasiṃha, cf. p. (LP)

26 Cf. Yün-hua, Jan, "West India According to Hui-ch'ao's Record," *Indian Historical Quarterly*, vol. 39, nos. 1&2, 1963, pp. 27-37. (LP)

27 Cf. Fuchs, *op. cit.*, p. 427.

28 Usually, the term *pei-shu* has been translated as "copyist" or "scribe", one who records Sanskrit dictations made by the chief translator. But in many cases, the main duty of translating actually fell to the *pei-shu*, especially when the chief translator's knowledge of Chinese was not strong.

29 Original text of this preface and the translation exists in T. XX, 724-775c. (No. 1177a & Nanjio No. 1044).

30 Cf. Mochizuki Shinkō, *Bukkyō Daijiten* (*An Encyclopedia of Buddhism*), Kyoto, 1931-36, p. 2386b. and Kanbayashi Ryjyo's contribution to *Bussho Kaisetsu Daijiten* (*A Bibliographical Dictionary of Buddhist Books*), ed. Ono Genmyo, Tokyo, 1936, vol. VII, p. 354b-357b.

31 Cf. Chou Yi-liang, "Tantricism in China," *H. J. A. S.* VIII (1945), p. 282, note 56.

32 *Ibid.* p. 299ff.

33 T. 2157, vol, LV, fascicles xv-xvi and T. 2128, vol. LIV, 926.

34 Cf. Nai-yin's *Liang-pu-ta-fa Hsiang-ch'eng-shih-tzu fu-fa Chi* (*A Record on the Succession-line of the Mastership of the Two Sects*), T. LI, 784c.

35 I. e., the second year of the Sheng-yuan age of the South T'ang Kingdom; see T. LV, 1084b.

36 Cf. Mochizuki Shinkō, *Bukkyō Kyōten Seiritsu Shi Ron (Historical Studies on the formation of Buddhist canons)*, Kyoto, 1946, p. 519–31.

37 Cf. note no. 19.

38 Besides the evidence cited below, there must be certain reasons for the preface to allege the name of Hye Ch'ō as a *pei-shu*, otherwise why from amongst the many eminent monks of the sect, should the author of the preface choose this Korean monk as the *pei-shu*?

39 T. XX, 724, preface line 1.

40 *Ibid.* line 6.

40a For example, Ch'en Yin-k'ō has remarked that to identify the cyclical characters, the title of reign, and the actual date is a very difficult task. Even an eminent historian like Tao-hsüan made similar mistakes. Cf. *Nan-yüeh-ta-shih Li-shih-yüan-wen pa (Notes on the Autobiography of Hui-ssü) Bulletin of the Institute of History and Philosophy, Academia Sinica*, vol. III (1932), p. 300ff.

41 After Vajrabodhi's arrival in China, there were other persons who went to China from India. For instance, Hye Ch'ō himself came back to China in 727. Mitra, a monk from North India, went to China in 729.

42 Cf. *Mikkyō Daijiten*, p. 2167–69. For Amoghavajra's translations of canons concerning Mañjuśrī cf. *Shōwa hōbō sōmokuoku*, vol. I, p. 683b, 684a-c. About Amoghavajra's effort for the establishment of Mañjuśrī worship see note 47 below.

43 The original text of this memorial is in T. LII, 843b & 855a.

44 Hye Ch'ō addressed himself as a Śramana of *Nei-tao-ch'ang*, or Royal Religious Establishment, in the memorial written by him.

45 The original text is in T. LII, 844a & b.

46 In the original text of this memorial, as well as in the text of Amoghavajra's last will and testament, Hye Ch'ō was ranked second among the names of the the disciples of Amoghavajra. *Ibid.* 845b.

47 On the names and dates of temples of Mañjuśrī constructed by Amoghavajra, see *Ibid.* 834a–835c, 837a, 840c, 841c . . .

48 *Ibid.* 858b–859b.

47 *Ibid.* 860b line 20.

50 Cf. K. Ch'en *Buddhism in China*. (Princeton, 1964), pp. 325–337; Chou Yi-liang, *op. cit.*; J. Takakusu, *The Essentials of Buddhist Philosophy* (Honolulu, 1947), pp. 144–147. (LP)

51 Lo Chen-yu has rightly pointed out that according to Hui-lin's *Dictionary*, the division of Hye Ch'ō's *Memoir* was in three fascicles. But the fragment that was recovered from Tun-huang is without any division of fascicle. Moreover, there are a few quotations which are preserved in Hui-lin's *Dictionary* but not in the fragment. This proves that the fragment is a condensed

version of the *Memoir*. Cf. *Hsüeh-t'ang chiao-k'an ch'un-shu hsü-lu* (*Introductory notes to the books published by Lo Chen-yu, Peking, 1909*), fasc. II, pp. 35-36.

52 Cf. Lo's textual reading and W. Fuchs' translation of the *Memoir*. About the strange and variant writing of Chinese characters as found in the Tun-huang Mss., see Chiang Hung-li, *Tun-huang pien-wen tzu-yi t'ung shih* (*Word and Phrases in "Pien-wen" recovered from Tun-huang*), Peking, 2nd and Enlarged ed., 1961.

53 There are quite a good number of such examples in the text of the *Memoir*; see Ch'ien Tao-sun's edition, p. 3b, 11a, 25a, 27b . . .

54 Hsüan-tsang and Pien-chi's *Hsi-yü chi*, I-ching's records and Tao-hsüan's historical works are all written in a very high standard of Chinese prose. Their styles, phrasing, etc. are all elegant and beautiful, their works are definitely far superior to those of the *Memoir* by Hye Ch'o.

55 cf. Yün-hua, Jan, "Hui-ch'ao's record on Kashmir," *Kashmir Research Biannual*, II (1961), pp. 115-124.

56 For instance the poems of Han-shan, see Wu Ch'i-yu, "A Study of Han-shan," *T'oung-pao* XLV (1957), p. 411.

57 Even the preface stated that Hye Ch'o studied the *sūtra* under Vajrabodhi for eight years, but was still unable to finish the work.

Part II

Translation of *Memoir of a Pilgrimage to the
Five Regions of India*

1. Vaiśālī (?)

[... they do not honor the Three] Jewels ...¹ They go barefoot and naked. The non-believers do not wear clothes ...² They eat at any time because they do not observe *uposatha*. The land is completely flat. . . They have [no] slaves.³ The crime of selling people is not different from that of murder . . .

2. Kuśinagara

After a month's journey, I arrived at the country of Kuśinagara.⁴ This is where the Buddha entered *nirvana*. The city is desolate and no people live there. The *stūpa* was built at the site where the Buddha entered *nirvāṇa*.⁵ There is a *dhyāna* master⁶ who keeps the place clean. Every year on the eighth day of the eighth month,⁷ monks, nuns, clergy and laymen hold a great assembly of worship there. [On this occasion], numerous banners which were seen by all people would appear in the sky. On the same day, many people would resolve their minds [for the religion].

West of the *stūpa* is the Airāvātī river.⁸ The river flows two thousand *li* southwards before it enters the Ganges.⁹ The *stūpa* is isolated on all sides; no people go there. The forests are very deserted. Those on pilgrimage are [often] wounded by rhinoceros and tigers.¹⁰

Thirty *li* southeast from the *stūpa* is a monastery named Bandhana.¹¹ There are more than thirty villages [allocated to this monastery, three or four of which]¹² constantly make offerings to the *dhyāna* masters to enable them to maintain religious services at the *stūpa* . . .

3. Vārānasi

[After . . .] days I arrived at the country of Vārānasi.¹³ This country is also desolate. There is no king . . .

. . . the band of five [headed by Kauṇḍinya].¹⁴ I saw a clay statue on the *stūpa*.¹⁵

On top [of the pillar] there is a [statue of] a lion. The pillar is extremely beautiful.¹⁶ [Its circumference measures that of] five people¹⁷ with joined arms. The lines carved on it are delicate. The pillar was made at the time the *stūpa* [was constructed]. The monastery is named the Dhar-

macakra Sanghārāma . . .¹⁸

The non-believers wear no clothes. They smear ashes on their bodies¹⁹ and worship Mahādeva.²⁰ In this monastery there are gilt bronze images [of the Buddha] and the five hundred [Pratyeka Buddhas].²¹ These images were made by Śīlāditya,²² a former king of Magadha.²³ He also made a gilt [*dharma* wheel], which is over thirty paces in diameter.²⁴ The city is built on the northern bank of the Ganges.

This Deer Park, along with Kuśinagara, Rajagṛha and Mahābodhi are the four great holy *stūpas*.²⁵ All these are situated in the territory of the Magadha kingdom. Both Mahāyāna and Hīnayāna are practised in this country.

. . .²⁶ I arrived at the Mahābodhi monastery. I was very happy as my long cherished wish had been fulfilled. I expressed my humble wishes in a five-word poem:

Untroubled by the distance to Mahābodhi
 Unafraid that the Deer Park is far,
 Only the dangerous path worried me.
 Not caring how the evil wind blows.
 To visit the eight *stūpas*²⁷ is truly not easy.²⁸
 All places²⁹ were burnt.³⁰
 How then could one's desire be fulfilled?³¹
 With my eyes I saw it this very day.

4. Central India and the Customs of the Five Regions of India

From the country of Vārānasi [I walked west for a] month and arrived at the city where the central-Indian king resides. The place is called Kānyakubja.³² The territory of the central-Indian king is very broad and the inhabitants are many.³³ The king possesses nine hundred elephants while other great chiefs possess two to three hundred each. The king himself often leads troops into battle and frequently fights with the other four regions of India. The central-Indian king is always victorious.³⁴ According to the conventions of the countries, when one knows that it possesses a smaller number of elephants and soldiers, it immediately begs for peace and pays tribute annually. They do not fight on the battlefield and kill each other.

The dress, language, customs, and laws of the five regions of India are similar. Only the language of the village folk in south India is different.³⁵ The class of officials is not different from that of central India.

The national laws of the five regions of India prescribe no cangue,

beatings or prison. Those who are guilty are fined in accordance with the degree of the offence committed. There is no capital punishment.³⁶ From the king down to the common people one sees no pleasure hunting with falcons or dogs or such similar activities. Although there are many bandits on the roads, they let their victims go alive³⁷ after taking away their things. If the victim holds his things too dear, then he will at once suffer for it.³⁸

The land is very warm. All plants are always green. There is no frost or snow. The foods include rice, baked wheat flour,³⁹ butter, milk and curds.⁴⁰ Soy is not available but salt is. Everybody eats food cooked in earthenware pots. They do not have iron cauldrons or similar things.

Apart from paying one *picul* of grain out of every five to the king annually, the people have no other labor service or taxes. The king sends his own men to transport [the grain]; it is not the duty of the landowners. Most people of the land are poor; few are rich. Those from the royal family, official households, and the rich wear a pair of cotton cloths. Ordinary people wear one piece while the poor wear only half a piece. Women do the same.

Whenever the king sits in audience, chiefs and commoners all come and sit around him. Everyone argues for his own cause. Charges and countercharges are many and it becomes very confusing and noisy. The king listens but does not become angry. Deliberating, he passes judgement saying, 'you are right' or 'you are wrong'. The commoners and others take the word of the king as final and complain no further.

The king and the chiefs sincerely honor and worship the Three Jewels. If they meet a monk-master, they sit on the ground, unwilling to sit on couches. The king and chiefs take their couches with them wherever they go or stay. They rest on them wherever they are and never use the couches of others. Monasteries and royal houses are all three-storeyed buildings. The ground floors are used as storage rooms while the upper floors are for dwelling. The [houses of the] great chiefs are the same. These houses are all even roofed, made of bricks and wood. Other houses are straw huts similar to the gabled Chinese house.⁴¹ They are also one-storeyed.

The products of the land are only cotton cloth, elephants, horses, and other things. The land itself does not produce gold and silver, which are imported from foreign countries. Domestic animals such as camels, mules, asses, and pigs are not kept. Most cows are white. Among ten thousand head there is rarely one which is red or black. Both sheep and

horses are few. Only the king has two to three hundred sheep and sixty to seventy horses. The great chiefs and the common people do not keep these domestic animals. They are only interested in rearing cattle, as they obtain milk, curds, and butter from them. The people of the land are good natured. They do not like killing. In the markets one does not see any butchering or meat selling.

5. The Four Great *Stūpas* of Central India

Both Māhāyana and Hīnayāna are practised in central India. In the territory of central India there are four great *stūpas*. Three are situated north of the Ganges. One is located at the Anāthapiṇḍika⁴² park in Śrāvastī.⁴³ There are monasteries and monks there. The second one is at the Amarāpalī⁴⁴ park in Vaiśālī. The *stūpa* still exists but the monastery is deserted and ruined and without monks. The third one is situated in Kapilavastu⁴⁵, the city where the Buddha was born. The Aśoka tree is still there but the city is already ruined. There is a *stūpa* but no monks or inhabitants. The city is situated at the northernmost part [of the country].⁴⁶ The forests are mostly deserted and there are many bandits on the roads. It is very difficult for those on pilgrimage to go safely.

The fourth [great *stūpa*] is the *stūpa* with the three-laned jeweled staircase⁴⁷ situated at a distance of seven days' journey west of the city where the central-Indian king resides. It lies between two streams of the Ganges. This is the place where the Buddha descended from the *Trāyastriṃśa*⁴⁸ heaven to *Jambudvīpa*⁴⁹ by magically creating a three-laned jeweled staircase. The left lane is golden, the right one is silver, and the middle one is glazed with *vaiḍūrya*. The Buddha came down the middle lane, Brahma⁵⁰ from the left lane, Śākra⁵¹ from the right lane, both attending the Buddha. At this very spot a *stūpa* was constructed. At present, there are monasteries and monks.⁵²

6. South India

From central India, walking south for more than three months, I arrived at the place⁵³ where the south Indian king⁵⁴ resides. The king has eight hundred elephants. His territory is very broad: the south extends to the Southern sea, the east to the Eastern sea, the west to the Western sea, and the north adjoins the borders of central, west and east India. The dress, food, and customs are similar to those of central India. Only the languages are slightly different. The land is hotter than central India. The products of this land are cotton cloth, elephants, water buffalo, and

yellow cattle. Also, there are fewer sheep. They do not have camels, mules and asses. They have rice fields but no sorghum or millet. As for things such as floss and thin silks, they are not available in the five regions of India.

The king, the chiefs⁵⁵, and the common people highly revere the Three Jewels. There are many monasteries and monks. Both Mahāyāna and Hīnayāna are practised. In the mountains there is a large monastery which was constructed⁵⁶ by *Yakṣas*⁵⁷ under order from the *Bodhisattva* Nāgārjuna⁵⁸ and not built by human beings. Moreover, the pillars were cut from [rocks of the] mountain and built in three storys. The monastery is over three hundred paces in circumference. During the days when Nāgārjuna was alive, the monastery had three thousand monks. Only fifteen *piculs* of rice⁵⁹ were given daily to them for maintenance, but the rice was never exhausted. [The excess rice] would be returned immediately, but afterwards there would be no reduction [in the supply]. But at present the monastery is ruined and there are no monks. Seven hundred years after Nāgārjuna this place began to decay.

When I was on the way to south India, I composed a poem in the five-word style:

On a moonlit night I looked towards the homeward path,⁶⁰
 Floating clouds return by the wind.
 I wish this letter to go with this opportunity,
 The wind blows too fast; the clouds neither listen or return.
 My country is in the northern horizon,
 Other lands lie at the western extremity.
 No wild geese⁶¹ in the hot south⁶²,
 Who will take my words to the homeland?⁶³

7. West India

From south India I walked North for two months and arrived at the city where the king⁶⁴ of west India resides. The west Indian king also possesses five to six hundred elephants.⁶⁵ The products of this land are cotton cloth, silver, elephants, horses, sheep, and cows. Barley, wheat, and various kinds of beans are produced in large quantities [but the production of] rice and corn is much less. Food is mainly bread, wheat preparations, curds, butter, and ghee. In the markets, silver money and cotton cloth are used.

The king, the chiefs, and the common people highly revere and believe in the Three Jewels. There are many monasteries and monks.

Both Mahāyāna and Hīnayāna are practised.

The land is very broad. To the west it reaches the Western sea. The people of this country are good at singing. [In this] the other four regions of India cannot be compared with this country. Here there is no cangue, beating, prison, capital punishment, and similar affairs. At present half the country has been invaded by the Arabs⁶⁶ and is already ravaged. According to the law of the five regions of India, those who travel do not carry food. They can beg for food wherever they go. When the king and the chiefs travel, they take food with them so as not to bother the people.

8. North India (Jālandhara)

For over three months I travelled north from west India and arrived at the country of north India, which is called Jālandhara.⁶⁷ The king of this country has three hundred elephants. He resides in a city built on the hillside. From the hills the place gradually stretches northwards. As a country it is very narrow. The army and cavalry are small. It is often annexed by the central Indian king and Kaśmīr.⁶⁸ This is the reason [the king] resides on the hillside.

The customs, dress, and language are not different from those of central India. The land is slightly cooler than central India and the other regions. There is also no frost or snow, but there is a cold wind. The products of this land are elephants.⁶⁹ cotton cloth, rice, and wheat. Mules and asses are few. The king possesses a hundred horses, while each chief has three to five, and the common people have none. The western part of the country is a plain and the eastern part is close to the snowy mountains. There are many monasteries and monks in this country. Both Mahāyāna and Hīnayāna are practised.

9. Suvarṇagotra

A small kingdom is to the east, a month's journey through the snowy mountains. It is called Suvarṇagotra. and is under the control of the Tibetans.⁷⁰ The dress is similar to that of north India, but the language is different. The land is extremely cold.

10. Takka

From Jālandhara I walked west and after a month arrived at the country called Takka.⁷¹ The language is slightly different, but the dress, customs, products of the land, climate, and temperature are similar to

north India. There are also many many monasteries and monks. Both Mahāyāna and Hīnayāna are practised. The king, chiefs, and common people greatly revere the Three Jewels.

11. Sindhukula

From Takka I walked towards the west for another month and arrived at the country of Sindhukula.⁷² The dress, customs, climate, and temperature are similar to north India, although the language is slightly different. This country has many camels from which the people obtain milk and butter for food. The king and the people greatly revere the Three Jewels. There are many monasteries and monks. Sanghabhadra⁷³, the Reverend Master of the *Śāstras* and author of the *Nyāyānusāra-śāstra*⁷⁴ was a native of this country. Both Mahāyāna and Hīnayāna are practised in this country. At present it is being invaded by the Arabs and half of its territory has been lost. From this land to the five regions of India [people] rarely drink much. I have traveled across the five regions, but have not seen any drunken brawls. Those who drink do so only for the sake of energy and strength⁷⁵, but nothing more. I did not see any people who excessively enjoyed dance, drama, and feasting.

12. Tamasavana

Further from north India⁷⁶ there is a monastery called Tamasavana.⁷⁷ During the days when the Buddha was still alive he came and preached the *dharma* there. He enlightened large numbers of human and divine beings. There is a *stūpa* on the bank of a stream east of the monastery where the hair and nails⁷⁸ of the Buddha are preserved. At present, there are over three hundred monks. The monastery also has the relic tooth, bone, and other things of a great Pratyeka Buddha.⁷⁹ There are seven or eight other monasteries. Each of these has five to six hundred monks. The monasteries are well-managed.⁸⁰ They are highly respected by the king and common people.

13. Nagaradhana

There is another monastery called Nagaradhana situated in the mountains. There was a Chinese monk who died in this monastery. The senior monks⁸¹ of the monastery said that the Chinese monk had come from central India and was brilliant and well-versed in the sacred teachings of the *Tripitaka*. He was about to return to his homeland, but suddenly fell ill and immediately died. Upon hearing the story, I grieved

deeply. Thus, I wrote a poem in four rhymes to commemorate the monk who is now dead. The poem is in the five-word style:

The lamp at your home village has no owner,
 The jewel tree fell in another country.
 Where does the spirit go?
 The precious countenance⁸² has turned into ashes.
 Pondering this my sorrow is deep.
 I grieve that your wish was not fulfilled.
 Who knows the road to his native land?
 Nothing to be seen but white clouds returning.

14. Kaśmīr

From there [Sindhukula] I walked north for fifteen days, entered a mountainous place, and reached the country of Kaśmīr.⁸³ Kaśmīr is counted as part of north India. It is a rather big country. The king possesses three hundred elephants and resides in the mountains. The roads are dangerous and bad. It has not been invaded by any foreign country. The population of this country is quite flourishing. The poor are many and the rich are few. The dress of the king, chiefs, and rich men is not different from that of central India. The common people cover⁸⁴ their ugly bodies with woolen blankets.

The products of this land are copper, iron, cotton cloth, woolen blankets, cows, and sheep. There are elephants, a few horses⁸⁵, rice, grapes,⁸⁶ and other things. The land is extremely cold, which is different from the countries mentioned before. There is frost in autumn and snow in winter. In summer there is plenty of rainfall.⁸⁷ The plants are always green and the leaves thick. In winter the grasses wither.⁸⁸

The valley is narrow and small. From south to north it takes a journey of five days. From east to west, it takes one day to complete the journey. These are the boundaries of the valley. The rest [of the country] is dense mountains. The roofs of the houses are covered by rows of planks. Straw and tiles are not used. The king, chiefs, and the common people greatly revere the Three Jewels. There is a dragon pool. The dragon king⁸⁹ gives daily offerings to one thousand *arhat* monks.⁹⁰ Although no one has witnessed these holy monks taking food, after the offerings, cakes and rice have been seen coming up from below the water. From this it is known [that they receive food]. To this day these offerings have not ceased. The king and chiefs ride on elephants when they go out. Minor officials ride on horses while the common people all go on foot. There are numerous monasteries and monks in the country. Both

Mahāyāna and Hīnayāna are practised.

Following the practice of the five regions of India, from the king, the queen, consorts, and princes⁹¹, down to the chiefs and their wives, all separately build monasteries in accordance with their respective capabilities. They say when each person has his own meritorious virtues, why should joint effort be necessary? Such being the case, other princes follow that [practice].

Whenever a monastery is built, a village and its inhabitants are immediately donated as an offering to the Three Jewels. Building a monastery without making any donation of a village and its folk is not done. It being the practice of this foreign country, the king and his wives⁹² have separate villages with their inhabitants. The princes and chiefs also have their villages and their inhabitants which they donate independently without consulting the king.⁹³ This also applies in the case of building monasteries. When necessary to build, they do so, and the king is not asked. The king dares not stand in the way because he is afraid that it would taint him with bad deeds.⁹⁴

As for the rich commoners, though having no villages to donate, they also try their best to build monasteries and manage them by themselves. Whenever they obtain things, they offer them to the Three Jewels. As in the five regions of India, human beings are not sold. Since there are no slaves, it is necessary to donate villages and their inhabitants [to the monasteries].

15. Greater Bolor

From Kaśmīr I crossed the mountains and travelled northeast for fifteen days. The countries here are Greater Bolor⁹⁵, Yang-t'ung⁹⁶, and Sha-po-tz'u.⁹⁷ These three countries are all under Tibetan authority. The dress, language, and customs of the people are all different. People wear furs, cotton shirts, boots, and trousers. The land is narrow and the mountains and streams are extremely dangerous. There are also monasteries and monks. People respect and believe in the Three Jewels. Eastwards from here is Tibet [where] there are no monasteries or houses [and where] Buddhism is not known. Because the people [of Greater Bolor, Yang-t'ung and Sha-po-tz'u] are Hu people⁹⁸, they believe [in Buddhism].

16. Tibet

To the east lies Tibet. It is situated among glaciers, snowy moun-

tains and valleys. People dwell in tents made of felt. Here there are no cities, suburbs or houses. The residential quarters are similar to those of the Turks.⁹⁹ Their dwellings shift with the course of water and grass. Though the king stays in a fixed place, there is no city. He resides and carries on with his work in felt tents. The products of this land include sheep, horses, yaks, and woolens.¹⁰⁰ The dress [of the people] is made of woolens and furs. The dress of the women is the same. The land is extremely cold, unlike the other countries. Usually the food of families is parched grain; rice and pastry are rare.¹⁰¹ The king and the common people all do not know Buddhism. There are no monasteries or houses.¹⁰² The people hollow¹⁰³ out the ground and thus make earthen beds to sleep on. There are no couches and mats. The people are very dark; there are no fair ones.¹⁰⁴ The language is different from other countries. The inhabitants here are fond of eating lice, as they wear woolens which have many lice and nits. Whenever they catch one, they immediately put it into their mouths. They would never throw it away.

17. Lesser Bolor

From Kaśmīr I travelled further northwest for seven days, crossed the mountains, and arrived at the country of Lesser Bolor,¹⁰⁵ which is under Chinese rule. The dress, customs, food, and language are similar to those of Greater Bolor. The people wear cotton shirts¹⁰⁶ and boots, cut their beards and hair, and bind their heads with a piece of cotton cloth. Women keep their hair. The poor are many and the rich are few. The valleys are narrow and cultivable lands are limited. The mountains are withered and sterile¹⁰⁷, with no trees or grass. Greater Bolor was originally the place where the king of Lesser Bolor resided. It was because the Tibetans have come that he fled and shifted his residence to Lesser Bolor. The chiefs and common people remained and did not come [with the king].

18. Gandhāra

From Kaśmīr I travelled further northwest. After one month's journey across the mountains I arrived at the country of Gandhāra.¹⁰⁸ The king and military personnel are all Turks. The natives are Hu people; there are also Brahmins. The country was formerly under the influence of the king of Kāpiśa.¹⁰⁹ A-yeh, the Turkish prince, took a defeated cavalry and allied himself to the king of Kāpiśa. Later, when the Turkish force was strong, the prince assassinated the king of Kāpiśa

and declared himself king. Thereafter, the territory from this country to the north¹¹⁰ was all ruled by the Turkish king, who also resided in this country.¹¹¹

The mountains are withered with no grass or trees. The dress, customs, language, and climate are all different [from other countries]. The dress includes furs, cotton shirts¹¹², boots, and trousers. The land is suitable for barley and wheat. There is no sorghum, millet, or rice. People mostly eat parched grain and pastry. Except for Kaśmīr, Greater and Lesser Bolor, and Yang-t'ung, the rest of the countries from Gandhāra to the five regions of India, and further to the Malay archipelago¹¹³, all do not produce grapes¹¹⁴, but only sugarcane.¹¹⁵

The Turkish king possesses five elephants and countless sheep and horses. Camels, mules, and asses are plentiful. [Because] China [fights] against the Hu¹¹⁶ people one cannot go east without detour.¹¹⁷ Towards the south the road is dangerous and difficult, and there are many bandits. From here to the north, evil occupations are many.¹¹⁸ There are many butcheries in the towns' shops.

Though the king is of Turkish origin, he greatly believes and respects the Three Jewels. The king, the royal consort, the prince, and the chiefs build monasteries separately and worship the Three Jewels. The king institutes the great feast of the *Wu-che* assembly twice a year. Whatever he personally likes and uses-his wife, elephants, and horses-he donates [to the Saṅgha]. The king asks only that the monks fix the price of his wife and elephants, so that he can redeem them. As for the rest, the camels, horses, gold and silver, clothes, and furniture, are all sold by the monks. The amount is shared by the monks for their expenditures. These are the differences between this king and the other Turkish kings of the north. His sons and daughters act similarly, separately building monasteries, offering feasts, and giving donations.

The city¹¹⁹ is built on the northern bank of the great Indus river. Three days' travel from this city to the west, there is a great monastery which was the residential monastery of *Bodhisattvas* Vasubandhu¹²⁰ and Asaṅga. The monastery is called Kaniṣka.¹²¹ There is a great *stūpa* which constantly glows. The monastery and the *stūpa* were built by the former king Kaniṣka, so the monastery was named after him.

Southeast . . . *li* from this city is the place where the Former Buddha saved the dove for King Śibi. At present there are monasteries and monks. The place where the Former Buddha offered his head and eyes to the five *Yakṣas*¹²² is also situated in this country. The places are all in the

mountains southeast of the city. Each of these places has monasteries and monks, which are presently being supported. Both Mahāyāna and Hinayāna are practised here.

19. Udyāna

From Gandhāra, going directly north, I entered the mountains, travelled for three days and arrived at the country of Udyāna, which its people call Uḍḍiyāna.¹²³ The king of this country greatly reveres the Three Jewels. Most of his villages and their inhabitants have been donated for the support of the monasteries. Only a few villages remain his own and even food and clothing from them are donated to the monasteries. He daily offers feasts [to the Saṅgha]. There are many monasteries and monks. There are slightly more monks than laymen. The dress, food, and customs here are similar to Gandhāra, though the languages are different. The land has many camels, mules, sheep, cotton clothing, and similar things. The climate is very cold.

20. Chitral

From Udyāna, after fifteen days journey travelling further north-east, I arrived at the country of Chitral which its people call Sha-mo-chieh-lo-che.¹²⁴ The king [of this country] also reveres and believes in the Three Jewels. There are many monasteries and monks. The dress and language are similar to those of Udyāna. The people wear cotton shirts and trousers. There are also sheep and horses.

21. Lampāka

Further to the west from Gandhāra, I entered the mountains, and after seven days journey arrived at the country of Lampāka.¹²⁵ The country has no king, but has a great chief. The country is also subject to Gandhāra. The dress and language are similar to those of Gandhāra. There are also monasteries and monks here. The Three Jewels are revered and believed. Mahāyāna Buddhism is practised.

22. Kapiśa

From Lampāka, I again entered the mountains. After eight days journey I arrived at the country of Kapiśa. This country is also under the authority of the king of Gandhāra. During the summer the king comes to Kapiśa and resides here because of the cool temperature. During the winter he goes to Gandhāra and resides at that warm place¹²⁶

because there is no snow and it is warm and not cold. In the winter the snows accumulate in Kāpiśa. This is the reason for the cold.

The natives of the country are Hu people; the king and the cavalry are Turks. The dress, language, and food of this place are mostly similar to Tokhāristan¹²⁷, though there are small differences. Whether man or woman, all wear cotton shirts, trousers, and boots. There is no distinction of dress between men and women. The men cut their beards and hair, but the women keep their hair. The products of this land include camels, mules, sheep, horses, asses, cotton cloth, grapes, barley, wheat, and saffron.

The people of this country greatly revere the Three Jewels. There are many monasteries and monks. The common people compete¹²⁸ in constructing monasteries and supporting the Three Jewels. In the big city there is a monastery called Sha-hsi-ssu.¹²⁹ At present, the curly hair¹³⁰ and the relic bones¹³¹ of the Buddha are to be seen in the monastery. The king, the officials, and the common people daily worship these relics. Hīnayāna Buddhism is practised in this country. The land is situated in the mountains. On the mountains there is no vegetation. [It looks] as if the land had been burned by fire.

23. Zābulistān

From Kāpiśa I travelled further west and after seven days arrived at the country of Zābulistān¹³² which its people call She-hu-lo-sa-t'a-na.¹³³ The native are Hu people; the king and cavalry are Turks. The king, a nephew of the king of Kāpiśa, himself controls his tribe and the cavalry stationed in this country. It is not subject to other countries, not even his own uncle. Though the king and the chiefs are Turks, they highly revere the Three Jewels. There are many monasteries and monks. Mahāyāna Buddhism is practised. There is a great Turkish chief called Sha-tuo-kan, who once a year lays out his gold and silver, which is much more than the king possesses. The dress, customs, and products of this land are similar to those of Kāpiśa, but the languages are different.

24. Bāmiyān

From Zābulistān I travelled further north and after seven days arrived at the country of Bāmiyān.¹³⁴ The king here is a Hu, and is independent of other countries. His cavalry is strong and numerous, and other countries dare not invade this land. The clothing consists of cotton shirts,

furs, felt shirts and such. The products of this country include sheep, horses, and cotton. There are plenty of grapes. The land has snow and is extremely cold. The dwellings are mostly on the mountainside. The kings, the chiefs, and the common people highly revere the Three Jewels. There are many monasteries and monks. Both Mahāyāna and Hīnayāna are practised. The inhabitants of this country and those of Zābulistān cut their beards and hair. The dress is similar to that of Kāpiśa. Nevertheless, there are also many differences. The local dialects are different from those of other countries.

25. Tokhāristān

From Bāmiyān I travelled further north and after twenty days arrived at the country of Tokhāristān. The capital city is called Pactra.¹³⁵ At present, the place is guarded and oppressed by Arab forces. The original king was compelled to leave the capital¹³⁶, and he resided at Badakshan¹³⁷, which is one month's journey from the capital towards the east. It is also under the authority of the Arabs.

The language [of this country] is different from that of other countries. Though it is similar to the language of Kāpiśa, for the most part it is different. The dress is mostly made of fur, cotton, and similar things. From the king and chiefs down to the common people, all use fur as the outer garment. The land has many camels, mules, sheep and grapes. As far as food is concerned, the people are only fond of pastry. The land is cold. There is fog and snow during the winter. The king, the chiefs, and the common people respect the Three Jewels. There are many monasteries and monks. Hīnayāna Buddhism is practised. They eat meat¹³⁸, onions, and leeks. They do not profess any other religions. All men cut their beards and hair, but women keep their hair. The land is mountainous.

26. Persia

From Tokhāristān I travelled further west and after one month arrived at the country of Persia. Formerly, the king of this country ruled over the Arabs.¹³⁹ One Arab, the camel keeper¹⁴⁰ of the Persian king rebelled, assassinated the king, and declared himself the ruler. This is the reason why the country is now annexed by the Arabs.

The dress [of this country] is a wide cotton shirt. [The people] cut their beards and hair. They eat pastry and meat. Even if there is rice, they would grind it, make it into pastry, and then eat it. The products

of the land are camels, mules, sheep, horses, big asses, cotton cloth, and precious articles. The language is different from that of other countries.

The natives of this land are naturally skilful in trade.¹⁴¹ They frequently sail to the western sea and enter the southern sea, and take precious things from the country of Ceylon. Thus, they claim that this land [Persia] produces all precious things by itself. They also take gold from the Malay archipelago, sail to Chinese territory, and proceed straight to Canton to buy silk gauze, silk wadding, and similar things. The land produces fine cotton. The inhabitants like to slaughter animals. They serve Heaven and have no knowledge of Buddhism.

27. Arabs

From the country of Persia,¹⁴² I travelled further north and after ten days arrived at the country of the Arabs. The king of this country does not stay¹⁴³ on his own land. At present, he resides in Lesser Fu-lin¹⁴⁴ because he has conquered it. Moreover, that place is an island-like, strong fortress¹⁴⁵, which is the reason the king resides there.¹⁴⁶

The products of this country are camels, mules, sheep, horses, cotton, woolen carpets, and precious things. The dress is a wide shirt made of fine cotton. Another piece of cotton added over the shirt is the outer garment. The king and the common people wear the same kind of clothing without distinction. Women also wear wide shirts.

Men cut their hair, but keep their beards. Women keep their hair.¹⁴⁷ When they eat food, there is no distinction between noble and commoner. They take food together from the same plate with their hands, and also use spoons and skewers.¹⁴⁸ They very much dislike taking ready-made things. They say that to eat the meat that is slaughtered by one's own hands brings boundless fortune. The inhabitants of this country are fond of slaughtering. They serve Heaven, and have no knowledge of Buddhism. In the law of the country, there is no convention of prostration.

29. Greater Fu-lin

Northwest of Lesser Fu-lin, along the sea shore, is the country of Greater Fu-lin.¹⁴⁹ The king has a very strong and large army. He is not subject to any other country. The Arabs made a few attacks, which did not succeed. The Turks also tried an invasion, which was also unsuccessful. The land has many precious things. Camels, mules, sheep, horses

and such are very abundant. The dress is similar to that of Persia and the Arabs. The language is distinct from others.

29. Six Countries of Central Asia

From the country of the Arabs to the east, all the countries belong to the Hu people. These are the countries of Bokhara, Kaputana, Kish, Shih-lo, Maimarg, and Samarkand.¹⁵⁰ Though each of these countries has its own king, they are all under the authority of the Arabs. These countries are small, their armies are very limited, and they are unable to protect themselves. The products of these lands include camels, mules, sheep, horses, and cotton. The dress is cotton shirts, trousers, and furs. The languages are different from those of other countries.

Moreover, all these six countries serve the Fire Religion. They have no knowledge of Buddhism. Only in Samarkand is there one monastery and monk, who does not know how to revere [the Three Jewels]. In these countries of the Hu people, both the beard and hair are cut. People like to wear white caps made of cotton. One extremely bad custom is incestuous marriages, [which allows] one to take his own mother or sisters as his wives. The Persians also take their mothers as their wives. In the country of Tokhāristān and those of Kāpiśa, Bāmiyān, and Zābulistān, two, three, five, or even ten brothers are jointly married to one wife. They are not allowed to marry separately as they are afraid that separate marriages would ruin their livelihood.

30. Ferghana

To the east of Samarkand is the country of Ferghana¹⁵¹ where they have two kings. The great Fu-yu river¹⁵² flows to the west from the center of the country. The king to the south of the river is subject to the Arabs. The king to the north of the river is subject to the Turks. The products of the land include camels, mules, sheep, horses, and cotton cloth. The dress is made of fur and cotton. The food is mainly pastry and parched wheat. The language is different from that of other countries. The inhabitants have no knowledge of Buddhism. There are no monasteries, monks or nuns.

31. Khuttal

East of Ferghana there is a country called Khuttal. The king is of Turkish origin. Half of the local inhabitants are Hu people, and the other half are Turks. The products of this land include camels, mules,

sheep, horses, cows, asses, grapes, cotton cloth, and woolen rugs. The dress is made of cotton and fur. The language is one-third Tokharian, one-third Turkish, and one-third local dialect. The kings, the chiefs, and the common people respect and believe the Three Jewels. Hinayāna Buddhism is practised. This country is under the control of the Arabs. Although other countries call it a country, its size is only comparable with a great prefecture in China. The men of this country cut their beards and hair. The women keep their hair.¹⁵³

32. Turks

From the country of the Hu people up to the northern sea in the north, the western sea in the west, and China¹⁵⁴ in the east, is the territory inhabited by the Turks. The Turks have no knowledge of Buddhism. There are no monasteries or monks. The dress is fur and woolen shirts. Insects are used for food.¹⁵⁵ There are no cities or houses. Felt tents are used for houses, which people carry with them wherever they go. The movement of the Turks follows the course of water and grass. The men cut their beards and hair. The women keep their hair.¹⁵⁶ The language is different from that of other countries. The people of this land are fond of killing. They do not distinguish between good and bad. The land has many camels, mules, sheep, horses and such.

33. Wakhān

From Tokhāristān I walked east for seven days and arrived at the city where the Wakhān king resides.¹⁵⁷ When I was at Tokhāristān, I met the Chinese Ambassador to foreign lands. I wrote a five-word poem in four rhymes, to express my feelings:

You complain that the way to the Western Barbarians is distant.
I lament for the long way east:
Barren roads on huge snowy ranges,
Dangerous torrents and bandits at every turn,
Flying birds are alarmed by the precipitous cliffs,
People are in danger walking on slanting bridges.¹⁵⁸
I, who have never wept in my life,
Now shed a thousand tears.

[Another poem on the] snowy day at Tokhāristān in the five word style:

Cold snow becomes ice,
Cold winds crack the earth,
Great oceans of snow, frozen and extending far,

Rivers and streams erode the sides of the cliffs,¹⁵⁹
 Even the Dragon Gate waterfall becomes frozen.¹⁶⁰
 Wells seem to be covered by coiling snakes,
 With fire I climb up the steps and sing.¹⁶¹
 How can I cross the Pamirs?

The king of Wakhān has a small and weak cavalry and can not protect himself. At present he is under the authority of the Arabs. He pays annually three thousand rolls of silk to the Arabs. He is stationed in a valley which is narrow, and most people are poor. The dress is fur and woolen shirts. The king wears silk gauze and cotton cloth. Only pastry and parched wheat are used for food. The land is much colder than other countries. The language is different. The sheep and cows of this country are very small. There are also horses and mules. The monasteries and monks are there. Hīnayāna Buddhism is practised. The king, the chiefs, and the common people all serve Buddha and do not belong to other religions. This is the reason why other religions are not in this land. The men cut their beards and hair. The women keep their hair. The people live on the mountains where there are no trees¹⁶², water, or grass.

34. Nine Shih-ni Countries

In the northern mountains of Wakhān there are nine Shih-ni¹⁶³ countries. Each of these nine kings commands his troops¹⁶⁴, and they are stationed [in one place]. One of them is subject to the king of Wakhān. The rest are independent and not subject to any other country. Recently there were two K'u kings who submitted to China, and messengers are continuously sent¹⁶⁵ to An-hsi. Only the king and chiefs wear cotton and furs; the rest of the common people wear fur and woolen shirts. The land is extremely cold, [people] make their homes on the snowy mountains. This is different from other countries. Here there are sheep, horses, cows, and donkeys. The language is different from that of other countries. The king often sends two to three hundred men to the valley of Ta-po-mi¹⁶⁶ to plunder the Hu traders as well as the messengers. Even if they took silk, they would pile it in storage rooms, and let it rot as they do not know how to make clothing. In these Shih-ni countries, Buddhism is not practised.

35. Ts'ung Ling

From Wakhān I travelled for another fifteen days towards the east, across the Po-mi valley and arrived at the garrison town of Ts'ung Ling.¹⁶⁷ The town is under Chinese control and Chinese troops are on

guard here. Formerly, this was the territory of King P'ei-hsing¹⁶⁸, but that king rebelled against China, fled and submitted to the Tibetans. There are no inhabitants in this country at present. The foreigners call this place K'o-fan-t'an,¹⁶⁹ the Chinese name is Ts'ung Ling.

36. Kashgar

From Ts'ung Ling I travelled¹⁷⁰ another month and arrived at Kashgar.¹⁷¹ The foreigners call this place Kashgiri.¹⁷² The place is also guarded by Chinese troops.¹⁷³ There are monasteries and monks. Hīnayāna Buddhism is practised. People eat meat, onions, leeks, and such.¹⁷⁴ The local inhabitants wear cotton clothes.

37. Kucha

From Kashgar I travelled further east for one month and arrived at the country of Kucha.¹⁷⁵ This is the headquarters of the great protectorate of An-hsi,¹⁷⁶ the place where Chinese troops are gathered. In Kucha there are many monasteries and monks. Hīnayāna Buddhism is practised. The foods are meat, onions, leeks, and such. The Chinese monks practise Mahāyāna Buddhism.

38. Khotan

Two thousand *li* from An-hsi is the country of Khotan.¹⁷⁷ There are also many Chinese troops stationed here. There are many monasteries and monks. Mahāyāna Buddhism is practised. No monks eat meat.

From here eastward is all the territory of the Great T'ang empire. This is known to all. One can understand [the Situation] without further explanation.

39. Monasteries of An-hsi

I arrived at An-hsi during the first ten day period of the eleventh moon of the fifteenth year of the *K'ai-yüan* era.¹⁷⁸ At that time, the military governor was his excellency Chao.¹⁷⁹

There are two monasteries presided over by Chinese monks.¹⁸⁰ They practise Mahāyāna Buddhism and eat no meat. The abbot of the Ta-yün monastery is Hsiu-hsing, who is well versed in discourse and speech. Previously, he was a monk of the Ts'i-pao-t'an Monastery in the capital. The Duty Distributor¹⁸¹ called Yi-ch'ao understands the *Vinaya Piṭaka* very well.¹⁸² Previously he was a monk of the Chuang-yen Monastery in the capital. The Chief Chair¹⁸³ of the Ta-yün Monastery¹⁸⁴ called

Ming-yün, who had a high moral character, originally came from the capital. These monks are good chiefs.¹⁸⁵ They possess religious determination and perform religious worship with joy.

The abbot of the Lung-hsing Monastery¹⁸⁶ is called Fa-hai. Though he is a Chinese born in An-hsi, his scholarship and manners are not different from those of China.

There is a Chinese monastery called Lung-hsing-ssu in Khotan. A Chinese monk called . . . is the abbot of the monastery, and he is a good abbot. This monk is a native of Chi-chou in Ho-peï.

There is also a Chinese monastery called the Ta-yün-ssu in Kashgar. A Chinese monk resides over the monastery, who is a native of Min-chou.

40. Wu Chih

From An-hsi I travelled further east for . . . and arrived at the country of Wu-chih.¹⁸⁷ The place is also guarded by Chinese troops. There is a king, and the inhabitants are Hu people. There are many monasteries and monks. Hinayāna Buddhism is practised.

There are four towns in the An-hsi region¹⁸⁸, namely An-hsi [Kucha], Khotan, Kashgar, and Wu-chih. . . they follow Chinese customs. Around their heads they wear [turbans] . . .

Notes To The Translation*

1. The MS. begins with this fragmentary account of a group of non-Buddhists. The three treasures are the Buddha, the Dharma, and the Saṅgha.

2. The character 表, though faint, can be nothing else. (*Haneda Anniversary*, Vol. I, p. 627, note I.) Cf. Tokyo MS, 1a, line 1.

3. "They have [no] slaves" [無]有奴婢 (Fuchs). See the following sentence and MS, 4b, line 10, 無有奴婢. The absence of slavery in India impressed the Greek explorers who came with Alexander the Great—Strabo, *Geography* XV i 34, C 701 and 54, C 710; Arrian, *Indica* x 8–9. But Jan Yün-hua avers, "In the 8th century A. D. there were slaves in India." [Ed.] In agreement with Sadakata, we decided to translate, ".... They have [no] slaves."

4. Kuśinagara 拘尸那國.

5. The place is called 'Māthā-kuār (Dead Prince) today by the locals.

6. 禪師 is a higher priest or monk, not a common monk.

7. The eighth of the Indian Eighth Month would be the fifteenth of the Far Eastern Seventh Month, according to Dr. So Kyong-bo of Dong-A University, Pusan, Korea. The fifteenth of the Seventh Month used to be celebrated in Korea as U-ran-bun-hoe; see Choe Sang-su, *Annual Customs of Korea*, Seoul, 1960, p. 75 f. 八月八日 refers to the month of Kārttika in the Indian Calenders. It is a Sarvāstivāda tradition.

8. Airāvati—"The Ajitavati 阿持多代底 of Hsüan-tsang, (Beal II, 32, footnote 89); according to him the *Stūpa* (tower) stood then westward of the river: probably this can be explained by a change in the course of the Ajitavati." Cf. Fuchs, p. 431, note 6.

9. *Haneda Anniversary*, Vol. I, p. 627, note 2: "恒 in Fuchs is wrong." But in light of the fact that MS, 1a, line 7 has the same as Fuchs, it seems that the latter is correct after all.

10. "tigers" so Fuchs translator 大虫. [Ed.] Sadakata translates as 'ōgata no mushi or 'large insects.'

11. 娑般檀寺 [Ed.] According to Fujita, this is Makuta-Bandhana which appears in the *Māhaparinibbāna-sutta*.

12. "On the road ... sites"—reading in MS, only 1a, line 8, the faintly visible 有(卅餘之) 村庄三五所 not deciphered by Fuchs.

13. For 彼 read 波 (Fuchs). This is modern Benares.

14. The first five converts were Ajñāta-Kauṇḍinya 阿若憍陳如, Assaji 阿說示, Māhanāma 摩訶男, Bhaddiya 婆提, and Vappa 婆濕波. According to Dr. Zenryū Tsukamoto, director of the Kyoto Museum, Kyoto, Japan,

*This section is mainly the work of Prof. Yang except for the editorial notes indicated by [Ed.].

in a letter to H. S. Yang dated July 16, 1961, statues of these five are now preserved in the Calcutta Museum. *Indological Journal* (hereafter *IJ*), Vol. IV, Pt ii, Sept., 1968, p. 267: "The statues were perhaps erected after Hsüan-tsang's departure from India. Since archeological excavations have not unearthed these modelled statues, they might have perished or have been taken elsewhere." Cf. *Haneda Anniversary*, Vol. I, p. 627, note 4: "輸 in Fuchs is wrong." But Fuchs, p. 432, note 4: 彼五俱輸 corresponds to 拘隣等五人 Nothing like 輸 in Fuchs can be seen." Fuchs, p. 458: 輸.

15. 素 (em. Fuchs; 索 MS.) 形像 · 素 = 埭 = 塑 (Fuchs). *Haneda Anniversary*, Vol. I, p. 627, note 5: "It is 素." MS, Ia, line 11 has the same as Fuchs.

16. "beautiful" 麗 em. Fuchs; 麗 (= 麗 "rough, bulky") MS.

17. *IJ* p. 267: "... According to Hui-ch'ao, the pillar is an armful to five persons (sic). But at the time of the archeological excavations, F. O. Oettel found the column measured above 27 1/2' in height and it tapered from 2' 4" diameter at the bottom to 1' 10" diameter at the top.... At time of the excavations, the column was found a short distance to the west of the main shrine."

18. *IJ*, p. 268, and 269: ".... According to Hsüan-tsang, the monastery at Sarnath could be named as Mṛgadava Sanghārama. This name has been translated by S. Beal as the Sanghārama of Lu-ye ('Stag desert'); hence Li Yung-hsi rendered the name as the Deer Park Monastery."

19. *IJ*, p. 269: "This statement of 'wear no cloth and smear ashes on their bodies' are identical with Hsüan-tsang's record. In the travels of Fahsien, though it was stated that there are now two monasteries in the deer forest, both with resident priests, the name of the monastery is not mentioned. In the archeological reports, the monastery has been described as the main shrine or Mūlagandhakuti. Now in the memoir of Hui-ch'ao, it is clearly recorded that the monastery was called Ta-mo-kan-ko-lo-seng, which leaves no doubt of its being a transliteration from the original Sanskrit name Dharmacakra-sanghārama. Though Fujita Toyohachi has in his commentry of the *Memoir* agreed that the monastery should be named as Dharmacakra-sanghārama, he has a long discussion which aims to identify the name with Dhamekha-stūpa."

20. *Haneda Anniversary*, Vol. I, p. 627, note 7: "事於大天 should be continued 此寺中." But Fuchs has 事於大天下缺. MS. Ia, line 14 is not so clear but it seemed to be right. According to *Bulkyo sajun*, p. 163, 大天 is Mahādeva. In B. C. 4 he was in India. Conspiring with his mother, he killed his father. an Arhat 羅漢. After that, he understood Buddhist doctrines; pretending to be a Buddhist, he did not believe in Buddha. *IJ* p. 269: ".... Hui-ch'ao's reference to Śiva worship at the place corroborates the statement of Hsüan-tsang, the only difference being about the location of this worship. Hsüan-tsang says that at Vārāṇasī he found a hundred or so

Deva temples with about 10,000 sectaries. They honor principally Mahesvara. In the memoir of Hui-ch'ao, the worship is mentioned in the course of the account concerning both Varāṇasī proper and Sarnath."

21. Cf. *Bulkyo sajun*, p. 178 and *Bukkyo daijiten*, Vol. 5, p. 4727. The 獨覺像 in Fuchs, p. 432, note 9 is based on an emendation by Takakusu, *YHD*, p. 5. *IJ*, pp. 269–270: "This is perhaps a reaffirmation of Hsüan-tsang's reference. In the shrine hall there was a life size bronze image of Buddha in the attitude of turning the wheel of law."

22. Fuchs, p. 432, note 10: "D. I. Harṣavardhana, 608–647; er war Kanyuakubia, hatte sich aber ganz Mittel-Indien mit Magada unterwerfen... Fuchs, p. 432 and 458 changes 尸羅票底 to 尸羅粟底, but the manuscript is not clear. *IJ*, p. 270," The mention of Buddhist statues and a gift wheel made by King Śīlāditya is very significant. Though Hsüan-tsang informs us about Harṣa's devotion to Buddhism and his patronage to Buddhists and though we are also told that Harṣa had erected thousands of *topes* on the bank of the Ganges and Buddhist monasteries at the sacred places of the Buddhists there has been no indication about his making statues. On this point the information contained in the Memoir has enriched our knowledge on the great ruler of Kanuij. Since Hsüan-tsang was a personal friend of Harṣa, he would not have missed recording the fact if the latter had been making the statues of Buddha at Sarnath.... In the *Memoir*, Hui-ch'ao addressed Harṣa as a former king of Magadha. This tallies with the official records of the History of T'ang dynasty."

23. This is an old kingdom of Middle India. This country had the deepest relation with Buddhism. The first book of Buddhist doctrine was made in this country. Cf. *Bulkyo sajun*. p. 195.

24. Fuchs, p. 432, note II, and p. 458 has 輻圍正寸卅餘步 but *Haneda Anniversary*, Vol. I, p. 627, note 8: "輻圍正寸卅餘步 is wrong; and it would be 輻圍等寸卅餘步" However, 輻圍正寸卅餘步 in Tokyo MS agrees with Fuchs. *IJ*, p. 266: "... thirty and odd spaces in diameter."

25. 四大靈塔：佛生處，成道處，初轉法輪處，人涅槃處。

26. □□得達摩訶菩提寺。

27. These are the eight holy places where Gautama preached while travelling. The four above-mentioned holy places are said to give blessings to the human world; the other four spiritual places to give blessings from heaven. This is why eight towers were established. See *Bukkyo daijiten*, Vol. 5, p. 4220. Cf. Fuchs, p. 433, note 8: "An den acht in Buddhas leben wichtigen Statten erbaut; vgl. Oda, p. 1410 s. v. t."

28. *Haneda Anniversary*, Vol. I, p. 627, note 9: "In the original document there is 難誠見, but it should be read as 誠難見." In Tokyo MS, Ib, line 7 (MS, p. 164) has the same as 難誠見. However, the right order should be 誠難見.

29. *Haneda Anniversary*, Vol. I, p. 627, note 10: “參著經 should be 參差經. There is 參差 in 慧林一切經音義中の音義 as evidence.” In Tokyo MS, Ib, line 參著經 can be faintly seen. *IJ*, p. 266 translated 參著經 as ‘marks of kalpa’.

30. *IJ*, p. 272: “In the archeological report Cunningham states: “It will have been observed that every excavation made near Sarnath has revealed traces of fire, I myself found charred timber and half-burnt grain. The same things were also found by Major Kittoe. So vividly was the impression of a great final catastrophe by fire fixed in Major Kittoe’s mind by the discoveries made during his excavations that he thus summed up his conclusions to me in a few words: ‘All has been sacked and burnt, priests, temples, idols, all together. In some places, bones, iron, timber, idols, etc. are all fused into huge heaps; and this has happened more than once.’ According to some scholars, the place might have been burnt down by the Huns when they invaded northern India during the 5th and 6th century of the Christian era, while Belgar and others are of the opinion that the Buddhist monuments might have suffered from the fury of the Moslem conquerors.”

31. Fuchs, p. 433 translated “Wie kann da mein Wunschgelübde erfüllt wer?” A literal translation would be: “How could a person’s desire be fulfilled?”

32. Kānyakubja (Pāli, Kaṇṇakujja). Cf. Mizutani, pp. 161–162. footnote 1 and 2.

33. Tokyo MS, Ib, line 8 has 百姓繁閑. But *Haneda Anniversary*, Vol. I, p. 627, note II has “鬧 is right.” However, Fuchs, p. 434, note 1 has the same as 鬧.

34. *Journal of Indian History* (hereafter *JIH*), Vol. XLV, Part I, No. 133, April 1967, p. 167: “Although no name of this central (Middle) Indian king is given by the Sillian king, since the time of his visit was about 723–724 A. D., the powerful ruler whom he described should have been no other than Yaśovarman, a historical person, who could not achieve the great glory of World Conquest.... Yaśovarman, sending his minister Bhadanta Po-ta-hsin to the Chinese Emperor, Hsüan-tsang of the T’ang dynasty, prayed for diplomatic recognition.”

35. In Tokyo MS, Ib, line 11, 唯南天村草百姓語有(?)差別. Fuchs, p. 458 interprets as 有. *Oriens Extremus*, December, 1968, p. 177: “The Sanscrit language, although already used in official circles, had not yet penetrated into the root of South Indian society. Many of the local languages of the Chalukyan kingdom linguistically belonged to the Dravidian group.”

36. Tokyo MS, Ib, line 13 has 形戮. *Haneda Anniversary*, Vol. I, p. 628, note 12: “形 should be corrected as 刑.” Likewise, Fuchs, p. 459.

37(傷 ‘hurt’, em. Fuchs; 殤 ‘die away’, MS (Ib. 14).

38. Fuchs, p. 434, note 8 has 懷物 to 情物. *Haneda Anniversary*, Vol.

I, p. 628, note 12: "In the original manuscript there is 佞, but it should be 怯." I follow Fuchs because 情 makes better sense; 怯 means 'fear'. 情 is more intelligible than 佞.

39. Fuchs, p. 434: "Brotkuchen und gedampfte Teigwaren." that is, 'rice-cake' and 'roasted rice or barley ground into flour. Cf. Fuchs, p. 434, note 10. Actually in Korean 餅麩 is "Ttuk" 떡 and "Misit karu 미숫가루, Roasted rice or barley is ground into a powder for 麩. Cf. *Hanhan desajun*, p. 128.

40. Fuchs, p. 434: "乳酪蘇 means Schmelzbutter, Milch und Sahne."

41. [Ed.] Fuchs, p. 436, note 2 corrects 似於漢屋雨下作也 to 似於漢屋雨下作也, In Tokyo MS. 2a, line 10 has the same as 似於漢屋雨下作也. It is because 似於漢屋雨下作也 does not make sense. It still, however, does not make good sense to say, "... similar to the Chinese house built at the time of rains." In agreement with Sadakata, we read 雨 as 兩. Thus, our translation "... similar to the Chinese house (i. e., gabled)."

42. Anāthapiṇḍika 給孤園 was a mile away from Śrāvastī. This was the place where the Buddha Gautama preached. See Fuchs, p. 436 and *Bulkyo sajun*, p. 107.

43. Śrāvastī 舍衛國 was a town in Kosala country in Middle India. When Buddha was alive, the kings Pasesādi and Virudhaka lived here and a famous Jetavana-vihara also existed. This location was known as Stemaht in today's Conda after discovering the relic. See p. 37, *Bulkyo sajun* 불교사전.

44. Fuchs, p. 460 has 毘耶離城 but in Tokyo MS, 2b, line 1 the characters 毗耶離城 can be seen. Cf. *Bulkyo sajun*, p. 34: Vaiśālī was in Middle India on the Ganges river. When Gautama was alive, he used to visit here.

45. Fuchs, p. 460 has 迦毘耶羅國 but Tokyo MS, 2b, line 2 has 迦毗耶羅國. Kapilavastu is in the area of Tarai in Nepal. This was the place where Gautama was born. See *Pyojun Kukue sajun* 標準國語辭典, p. 10

46. north (北) em. Fuchs, 比 (sic) MS. (2b 3).

47. *Sandō no Hōkai*, cf. Mochizuki *Bukkyo Daijiten* vol. L, p. 1627. Three lanes of jewels, gold, silver and agate, were magically created by the god Indra of the *Tusita* Heaven in order to 'pave' the way for the Buddha who was returning from the *Tusita* Heaven to the world after preaching to his mother, Queen Māyā. This is represented on the Bhārūt and Sanchi *torāna* (gate-way) reliefs. [Ed.]

48. *Trayastrimśa* is the second of the six heavens. See *Bukkyō daijiten*, Vol. 4, pp. 3920–21 and *Bulkyo sajun*, p. 170.

49. Jambudvīpa 閻浮提 is the continent to the south of Mount Sumeru on which our world is located. See *Bulkyo sajun*, p. 589.

50. Brahma is the supreme god of the Hindus. The word Brahman, is used for the highest principle of the universe.

51. The king of *Trayastrimśa* 帝釋 controls 4000 kings and 32 heavens

and protects the people who want to become Buddhists. See *Bulkyo sajun*, p. 788. According to Junjiro K. Takakukusu “Śakra 帝釋 in India is treated as a God but Śakra in Persia is treated as a devil.” See *Bukkyō no shinzui* 佛教の眞髓 (Dai ichi shōbō, Tokyo, 1937), pp. 16–17.

52. Fuchs, p. 460 has 有寺有僧 but Tokyo MS, p. 4, line 7 (MS, plate 2 b 7) has 有寺僧有. I follow Fuchs because 有寺有僧. is the right order.

53. In the Tokyo MS, 2b, line 7, 至南天竺國王所住 can be clearly seen, But Fuchs added “住”.

54. Presumably, this is Vatapi, that is Badami, capital of the Western Chalukyas. At the time of Hye Ch’o’s visit to ‘South India’, this was the preeminent dynasty of the region. However, there is still very little that would prevent us interpreting Hye Ch’o to be referring to the Eastern Chalukyas of Vengi in the Andhra delta region. Perhaps the the solution of the problem hinges on the identity of the three-storeyed monastery mentioned in this section. If, as is suggested in note 56, this monastery was in lower Andhra, then the Eastern Chalukyas are *perhaps* indicated. On the other hand, if the three-storeyed monastery can be identified with the ‘Don Thal’ and/or ‘Tin Thal’ of Ellora (both three-storeyed rock-cut monasteries excavated at least a century before our pilgrim’s visit), then this may give a better claim to the identification of the Western Chalukyas. In essence, the problem is unsolvable given the brevity of Hye Ch’o’s statements. [Ed.]

55. MS. 2b, line 11, 王及首領百姓等. Sadakata suggests a reading of 領首 here. Either way, one can get the meaning of chiefs .

56. [Ed.] According to both Fa Hsien and Hsüan-tsang, there was a cave temple called Bhramarā (跋邏末羅 which means 黑蜂). Bhramarā or ‘Black bee is a name of Durgā, Pāravatī. The cave temple actually exists today in the mountain of Undavilli near Bezwada. As noted by Sadakata, the hill is still called ‘black hill’ (Telegu Malla-Malai) by the locals.

57. MS, 2b, line 13 has 便夜叉. Fuchs, p. 460 changes 便夜叉 to 使夜叉. We follow Fuchs because 便 means good or convenient. 便 does not make sense here. 使 means “let” or “make”. So 使 makes better sense.

58. [Ed.] Regarding this costly endeavour of building a cave temple complex, that Nāgārjuna’s plea was not to Yakṣa, but instead to a certain Sātavāhana king in his *Suḥṛlleka*.

59. Fuchs, p. 437 “15 piku (etwa 1800) pfc).” 15 *picul* is about 2000 lbs.

60. Fuchs, p. 438 nach China,” but we think 鄉 is the area of Kyungjoo, the capital of Silla. Hye Ch’o might have been born in this area.

61. Fuchs, p. 438 interpretes 日南 as Annam or Vietnam. However, according to the Korean sinologist U-sung Yi,” 日南 is a hot place in China, not Annam. Korea and Japan are called as 日東. (oral communication). Jan Yün-hua does not agree. Could 日南 mean “south of the (summer) sun”,

i. e. south of the Tropic of Cancer?

62. "geese" 雁 em. Fuchs; "hawks" 鷹 MS. In South India hawks are plentiful but geese do not exist. Since Hye Ch'o's complaint is that the bird he wants is lacking, "geese" would be more likely. A scribe could easily mistake 雁 or 雁 and then substitute the equivalent character 鷹 to display his learning. *Haneda Anniversary*, Vol. I, p. 628, note 15: "鷹 can be seen, but if it is a hawk, it is difficult to understand the meaning of the poetry. Therefore, 'geese' in Fuchs would be better."

63. Fuchs, p. 438 interpretes 林 "grove" but it should be translated as 'my home. Perhaps 林 is an abbreviation of 鷄林. *Samkuk-saki* translated with notes by Dr. Byung Do Yi, p. 271, (Vol. 2, October, 1957) "熊川州 was abbreviated as 熊州 and 武珍州 was abbreviated as 武州."

64. Fuchs, p. 438, note 3: "Bemals Dahir, der im Jahre 712 von den Arabern durch Muhanned ibn Kasim verichtet; seine drei Sohne versuchten, die Herrschaft wieder herzustellen, wurden jedoch auch im Jahre 725, also gerade zur Zeit der Reise von Huei-ch'ao, verhichtet; cf. Smith, p. 369."

65. MS. 3a, line 7 has 此西天王亦五六百頭象. which Fuchs corrects to 此西天王有亦五六百頭象. We follow Fuchs here.

66. Fuchs, p. 438: Arabia

67. Fuchs, p. 439, note 2: "Vgl. Beal I, 175-77; YHD, 14 liest falsch 閣." cf. p. 430 of Fuchs. Jālandhara.

68. Fuchs, p. 461 and p. 430: Kashmir.

69. Fuchs, p. 461 corrects 所有出象 to 所出有象. *Haneda Anniversary*, Vol. I, p. 628, note 17: "所有出 is incorrect. 所出有 is right." MS, 3b, line 5 has 所有出象.

70. Fuchs, p. 439, note 5: "YHD liest falsch 土番國." MS, 3b, line 7 has 土蕃.

71. MS, 3b, line 8 has 社吒國. Fuchs, p. 439, note 6: "社吒國 lies 吒社, das 石祭迦 chih-chia von Hsüan-tsang (Beal I, 16) und das Tashar (Takin, Tafan) der Araber im Heutigen Panjab." *Haneda Anniversary*, Vol. I, p. 628, note 18: "社吒 is reversed for 吒社."

72. Fuchs, p. 440, note 1: "Nach der Beschreibung vielleicht Bajputana. Da Hsüan-tsang (Beal II, 269-270) in dieser Gegend das Reich Gurjjara 瞿折羅 nennt, ist 古羅 wohl dafür dialektisch."

73. *Bulkyo sajun*, p. 812: "saṅghabhadra 衆賢論師 was from northern Kashmir; he wrote the *Nyāyānusārasāstra* 順正理論 and argued with 天親菩薩."

74. See Oda *Bukkyō jiten*, p. 32 (194) and *Bulkyo sajun*, p. 497 and p. 552.

75. MS, 3b, line 14 has 得色得力. Fuchs, p. 440, note 4: "MS und T. T. lesen 得色; YHD 17, falsch 得氣 得色得力 means 'become lively and eager for action.'

76. Fuchs, p. 440, note: "Im MS muss hier die Zeitangabe ausgefallen

sein.”

77. Fuchs, p. 440, note 6: “Hsüan-tsang (Beal I, 173) umschreibt as 答林蘇代所 sudwestlich von Jālandhara.”

78. Fuchs, P. 461 changes 卽佛所剃頭及剪爪 to (而) 卽佛所剃頭剪爪. Fuchs, p. 440, note 7: “MS hat 口佛所剃頭, T. T. gibt fur 口; 而; YHD lasst 所 aus und gibt ver 佛 auch 而, offenbar aber unrichtig im MS nicht deutlich Zu erkennen.” However, 而 in the Ms. 4a, line 3, can be seen.

79. 大辟支 means “a person who realizes Buddhahood by himself, without learning Buddhist doctrine This is the same as 獨覺像.” See *BS*, p. 286

80. Fuchs, p. 440, note 9: “大好住持 vgl, unten, p. 457, Anm 3 and Oda, 1227.” [Ed.], 大好住持 can also be rendered as, “thing are great and good for boarding and lodging.” Sadakata translates, “ōini jin-seikatsu o aikōshiteiru or “greatly enjoying the temple life”.

81. Bhadanta 大德 originally meant Buddha; it also refers to the Buddhist doctrine. Sometimes priests who have great virtues and wisdom are called Bhadanta.

82. MS, 4a, line 8 one spare has 玉兒. Fuchs, p. 462 and 441, note 2 changes 兒 to 貌. 兒 means a child, but 貌 means a figure or body. Therefore, we follow Fuchs. According to Jan Yün-hua, “The person which Hui ch’ao referred to was a Chinese monk (Han-seng), who died before Hye Ch’o’s arrival at Nagaradhana. Hye Ch’o did not meet the monk, but heard of the misfortune from other members of the monastery.” Cf. Fuchs, p. 462; Fujita 27a.

83. *Oriens Extremus*, p. 176: “At this time the missions that arrived at the T’ang court in 720 and 733 A. D., respectively, were for the Chinese recognition of the newly enthroned kings of Kashmir. The King of Kashmir, in 713 A. D., when the Korean general Ko Hsien Chih was alive, applied to the Chinese Emperor for aid against the Arabs.

84. MS, 4a, line 11 has 枝. Fuchs, p. 462 changes 枝 to 支二苦. 枝 means ‘branch of a tree, but 支 means “carry or hold.” We follow Fuchs.

85. MS, 4a, line 12 has 少馬. Fuchs, p. 462 changes 少馬 to 小馬. Because 少馬 means a few horses, according to the context 少馬 does not make sense. So it must be a small horse following Fuchs’ correction.

86. Fuchs, p. 462 translates 蒲桃 as grape. Today Koreans call the grape “p’odo” using the early pronunciation of 蒲桃 葡萄. This would be 吏讀文字.

87. MS, 4a, line 13 has 霜雨. Fuchs, p. 462 changes 霜雨 to 霖雨. 霜 means ‘frost’, and frost does fall in autumn, not in summer. 霖 is right. Cf. Fuchs, p. 441, note 7. So does Fujita.

88. MS, 4a, line 13 has 彫. Fuchs, however, in p. 462 changes 彫 to 稠. 彫 means “Draw or trim,” but 稠 means “thick.” 稠 is right.

89. *Bulkyo sajun*, p. 640: “龍王 lives in the sea, controls rain and water,

and protects Buddhists." Sometimes it means the people who control water.

90. MS, 4b, line 2 has "千一羅漢僧," but Fuchs, p. 442, note 1 corrects this to "一千羅漢僧." The order of 一千羅漢僧 is right. Cf. Fuchs, p. 442: *Nāgarāja eintausend Lohan und Mönchen.*"

91. *Haneda Anniversary*, Vol. I, p. 628, note 20: "至國王王妃王子 is correct." However, Fuchs, p. 462: "至國 Fälschlich verdoppelt 王王妃王子." MS, 4b, line 5 has the same as Haneda: 至國" 王王妃王子. Fuchs, p. 462 changes 及妃姤 to 及妃后. MS, 4b, line 8 has the same as 及妃姤. Because 妃姤 does not make sense, 妃后 means king's wife and it makes sense.

93. MS, 4b, line 8 has 布施自由不王也 Fuchs, p. 462 changes 布施自由不王也 to 布施自由不問王也 In view of the context, Fuchs is correct.

94. MS, 4b, line 9 has 怕拈罪. Fuchs, p. 462 changes 怕佔罪 to 怕佔罪. 拈 means "take" but 佔 means "nears." In view of the context, 佔 would be better.

95. Fuchs, p. 463 changes 大勃律國 to 大勃律國. Fuchs, p. 443, note I: "Lies 大勃律國 as auch in Tang-shu; vgl. Chavannes, Dec., 1491, das 鉢盧勒 des Sung yung (Chav. Song Yun, 406, Beal I, p. XCXII) und des Hsüan-tsang (Beal II, 289-90), heute Baltistan."

96. Fuchs, p. 443, note 2: "T. T. liest 楊; MS undeutlich, doch aber, wie weiter unten, 楊; das ist das 羊同 des T'ang-shu (大 und 小羊同國). Lage unsicher; das letztere lag wohl in der Gegend des heutigen Gyantse (Shigatse) in Sud-Tibet, Vgl. auch Bushell, *The early History of Tibet*, JRSA Oct., 1880. p. 527, Anm. 9."

97. Fuchs, p. 443, note 3: "Lies 婆, im 一切經音義 durch 婆羅慈 umschrieben, was dem tib. h'bras spungs entspricht. Vgl. Levi, *Le Nepal* I, 1905, p. 186, und YHD, p. 21."

98. *Haneda Anniversary*, Vol. I., pp. 697-698: 胡 may be 无 or 女真族 or 契丹. Fuchs, p. 443, note 5: "D. h. aus Tokharistan und benachbarten Ländern stammende Völker, Vgl. Chavannes, *Rel. Émin.*, p. 13)."

99. *Dai hyakka jiten*, (Tokyo, 1933), pp. 197-198: "突厥 started from the Altai mountains. In the 6th Century A. D. T'uküh was in present Russian territory near the Dar-ya river."

100. MS, 5a, line 4 has the character of 毯 which is faintly seen. Fuchs, p. 463 changes 毯褐之類 to 毯褐之類. 毯 must be 毯.

101. Fuchs, p. 443 translates 餅飯 as "Teigwaren und gekochte Reis." but in Korean it means a rice or wheat cake called (ttök) and boiled rice or boiled barley which is called "pap."

102. Fuchs, p. 443, note 7: "Nach der Tibet-Beschreibung im T'ang-shu, 256-57, spielte aber der Buddhismus damals schon eine Rolle; vgl. Bushell, "Early History of Tibet", JRAS 1880, p. 442. [Nach der chinesischen Überlieferung wurde der Buddhismus in Tibet durch die chinesischen Prin-

zessin Wen-tsch'eng eingeführt, die im Jahre 641 mit König Srong-btsan sgam-po verheiratet wurde. Auch seine andere Gemahlin, eine nepalesische Prinzessin, dürfte daran nicht unbeteiligt gewesen sein. Franke.]

103. MS, 5a, line 5 has the character 抗. Fuchs, however, (p. 463) changes 抗而臥 to 坑而臥. 抗 means "oppose" or "challenge," but 坑 means "dig." In view of the context, 坑 is correct.

104. MS, 5a, line 6 has 白者全布. Fuchs, p. 463, note 5 changes 白者全布 to 白者全希. 白者全布 means "Whites are all cloth" but 白者全希 means "All whites are rare." According to the context, 白者全希 is correct.

105. Fuchs, p. 444, note 5: "D. i. der Distrikt von Gilgit, mit der Hauptstadt Yashin; vgl. Chavannes, T'P. 1904, p. 43' und Song Yun, p. 406."

106. Fuchs, p. 44, note 6: "疊氈衫衫 see p.85 shan ist hier und im folgenden immer durch Oberkleidung wiedergegeben. Es bedeute eine kurze, einfache Art von Tunica; auch die Übersetzung Hemd ist möglich."

107. MS, 5a, line 10 has 惟衫. Fuchs, p. 463 changes 惟燭 to 惟杭. 惟 means "think" But 燬 means "burn," and 杭 means "tree," In view of the context, 燬杭 is correct. Cf. Fuchs, p. 444, note 7.

108. Ghandhāra 建馱羅 is located in north-western India. Gandhāra sculpture is realistic, with the face and hair Western in style; the area was Buddhist under Kaniska after Alexander the Great's conquest. Cf. Fuchs, p. 444, note 9.

109. Fuchs, p. 444: "Kaniška (罽賓 nordest-Afghanistan)"

110. Fuchs, p. 463: "Die vier folgenden Zeichen gehören pleonastisch hinter."

111. MS, 5b, line 3 has 並住中. Fuchs, p. 463 changes 並住中 to 並住山中. We follow Fuchs because 並住中 means "all live in the middle," but 並住山 means "all live in the middle of the mountains." Therefore, in view of the context, 並住中 does not make sense.

112. MS, 5b, lines 2-3 have 皮毳氈. Fuchs, p. 463, note 11 changes 皮毳氈 to 皮毳二裘氈 We follow Fuchs because 毳 is not to be found

113. See *Tsui-hsing Han-yang wu-yung ta-tu-tieu*, (Nov., 1964), pp. 317-318.

114. Fuchs, p. 464 changes 總無蒲□□□ to 總無蒲桃唯有. Even in MS, 5b, line 4 and 5 three characters are missing after 總無蒲. We agree with Fuchs annotation in view of the context.

115. [Ed.] Although MS, 5b, line 6 has 曰, this is read as a part of the character 甘, which is followed by the character 蔗. Thus, 甘蔗 or sugarcane. Fuchs does the same (p. 464).

116. MS, 5b, line 5 has 甚漢多地 but Fuchs, p. 464 changes this 甚漢多地 to 甚多漢地 But we change it and add 漢地與胡.

117. Fuchs, p. 445, note 6: "MS beschädigt es feblen 3 Zeichen." Cf. MS, 5b, line 6 lacks five characters, too. For these five characters missing we

supplied 戰而不歸東.

118. bad occupations 惡業 em. Otani and Takakasu; 西業 MS. See Fuchs, p. 445 n. 7.

119. Fuchs, p. 466, note 1: "Vgl. Beal 1, 109. Da hier dan im folgenden erwähnte Kaniṣka-Kloster als westlich drei Tagereisen weit von der Hauptstadt entfernt angegeben ist, und da es andererseits nach Hsüan-tsang (Beal 1, 109) vom Kaniṣka-Kloster 50 li nordöstlich bis zur Stadt Puskalawati waren, muss hier als Hauptstadt diese letzte gemeint sein und nicht Puruspura (Peshawar)."

120. Vasubaudhu 天親菩薩 was born in Peshawar c. A. D. 400 Asaṅga 无着菩薩 was the younger brother of Vasubandhu.

121. *Bulkyo sajun*, p. 7: "Kaniṣka was of the 月氏, race and established Gandhāra."

122. 捨頭捨眼餒王夜叉 refers to the *Jataka* in which Gautama, before becoming a Buddha, was tested by Śākra 帝釋 and Brahma 波羅門 to see whether he would become a Buddha or not. Gautama was the king of Śibi 尸毘; Śākra became a pigeon. When the pigeon flew to the king of Śibi while being chased by an eagle, the king, without killing the pigeon, let it fly away. Cf. *Bulkyo sajun*, p. 372: "In order to practice the benevolence of a Bodhisttava, he offered his body to be killed."

123. Udyāna 烏仗那 is an area whose location has been ascribed to much of northern India. See *Bulkyo sajun*, p. 618.

126. Fuchs, p. 447, note I: "Das 拘緯 von Wu-k'ong, p. 348¹, in der Gegend von Tchitral und Mastuji; Chavannes, Notes Add., p. 43², 74²."

125. Fuchs, p. 447, note 3: "Gleich dem 濫波國 von Hsüan-tsang (Beal I, 90) und dem 藍婆國 des Wu-k'ong, 3482); das heutige Lamghan. T. T. Liest 波 statt 彼; MS undeutlich."

126. MS, 6a, line 10 has 趁暖而住, which Fuchs, p. 465 corrects to 趁暖而住. 趁 means "run" but 趁 means "follow." The latter makes more sense, meaning "following the warmth, (they) live."

127. Shiratori Kokichi, *Dozai koshoshiron* 東西交渉史論. Tokyo Imperial University, Shigakukai 史學界. Fuzambo, Tokyo, p. 7: "Tocharistan is the Turkish race and ancestors of the T'ukuh." Cf. *Dai hyakka jiten*, Vol. 10, pp. 60-61: "Tocharistan is a dead language in Central Asia. The dialect is Kucha."

128. [Ed.] MS. 6b, line 1 has 百姓家各絲造寺. The character 絲 poses a problem here. Fuchs takes this as 慈 (p. 465); *Haneda Anniversary* vol. I, p. 628, note 27: "Is it 竝?" 竝 (i. e., 並) means 'side by side'. Fujita says, "絲恐競之略". By following Fujita, we translate, "in competition". As Sadakata notes, 百姓家 or 'the common folk', can be construed as not being the subject of the sentence, but is instead an object of the sentence due to a possible mistake by the copyist of the manuscript.

129. [Ed.] Fuchs, p. 405 corrects 名沙糸寺 to 名沙糸寺. Fuchs, p. 448, note 3: “Dies ist eigentlich der Name der dortigen Dynastie (vgl. Ou-K’ong, 381). MS. T. T. und YHD lesen ungenau 糸 fur 系. “If we follow Sadakata’s note, however, there is a possibility of 沙糸 as a transliteration of *sāhi*, which is an epithet of the Turkish (突厥) kings.

130. [Ed.] MS. 6b, line 2 has 寺中具佛 but Fuchs, p. 465 added 有 as 寺中有具佛. We however, take this as, “... of the Buddha”.

131. 舍利 is Buddha’s relics (Gautama’s relics) or holy person’s relics. See *Bulkyo sajun*, p. 359.

132. Ms. 6b, lines 4–5 have 西行至七日謝颺國 but Fuchs, p. 465, line II, center has 西行七日至謝颺國. We follow Fuchs because 西行七日至謝颺國 in Fuchs is the right order.

133. Fuchs, p. 448, note 5: “Vgl. Doc. 160–161; Eransahr, p. 247 ff. Zur Transkription von Hsieh-yu vgl. Pelliot, T’P. XXVI, 1928, p. 186.” Cf. *Sekai dai hyakka jiten*, Vol. 12, pp. 168–169.

134. *Teihon sekai rekishi jizu* 定本世界歷史地圖, (Tokyo: Yoshikawa Kobunkan Co.), pp. 38–39: “犯引國 is in Afghanistan.” Cf. Fuchs, p. 448, note 9.

135. Fuchs, p. 449, note I: “D. i. das 縛底野 des T’ang-shu (Doc., p. 162) und das 薄提 des Wei-shu Eransahr, p. 214–216; Doc., p. 1554).”

136. MS, 6b, line 13 has 其王被其王被逼, but Fuchs, p. 466 corrected 其王被其王被逼 to 其王被逼. Fuchs, p. 466, note 2: “Versehentlich verdoppelt.” In addition, Fuchs, p. 449, note 2: “Im Jahre 667 waren die Araber in Khorasan und Tokharistan eingefallen: der geflohene könig ist offenbar A-shih-na Wu-shih-po 阿史那烏濕波 (Doc., p. 157) aus der Mitte des 7. Jahrhunderts.”

137. Fuchs, p. 449, note 3: “MS hat richtig 特, YHD falsch 持; gleich dem 勃特山 des 册府元龜 (Doc., 201) und dem 拔特山 des T’ang-shu (Doc., 69) Badakhschan. Die Entfernung von Balkh nach Badakhschan ist hier Übertrieben; nach Abulfeda betrug sie nur 13 Tagesreisen.”

138. MS. 7a, line 5 has 食內. Fuchs, p. 466 corrected 食內 to 食肉. I follow Fuchs. Because 內 means “inside,” In view of the context it does not make sense. In addition, 悲 is to be corrected to 菲. 悲 can not be found but 菲 can be the name of a vegetable. Fuchs, p. 449, note 5 explained “MS hat 內及葱菲 lies 肉及葱菲; die 2 letzten Zeichen sind im YHD nicht richtig erkannt.”

139. MS. 7a, line 5 has 大々寔々. *Haneda Anniversary*, Vol. I, p. 628, note 28 has the same as 大々寔々. Fuchs divided this 大寔 and 大寔. In view of the context, Fuchs is correct.

140. MS. 7a, line 5 has 放馳戶 but Fuchs, p. 466 corrected 放馳戶 to 放駝戶. Because 馳 means “run,” 放馳戶 does not make sense in view of the context. 駝 means “camel.” So 放駝戶 means “camel herders.” Therefore,

Fuchs is correct.

141. MS. 7a, line 8 has 愛興易. Fuchs, p. 466 corrects 愛興易 to 愛交易. In view of the context, 愛交易 makes sense.

142. After the Arab conquest the greater part of Persia was divided into four provinces: Khuzistan and Fars, attached to Basra; Media or Persian Iraq, attached to Kufa; Khursan; and Seistan. Relations between the Arab administration and the federal classes seem to have been generally good and a contingent of Iranian troops assisted Arabs in the conquests in Transoxiana (705–715) and repelling the later counter-attacks of the Central Asian Turks. There is abundant evidence that the Arabs intermarried extensively with the Iranian population. Abu Muslim took advantage of the tribal feuds by which the Arabs in Khurasan were divided; and adding his weight to a general rising of the Yemenite faction, he drove the Cmayyad governor out in 750, See *Encyclopedia Britannica*, Volume 17, p. 569.

143. MS. 7a, line 11 has 住不 but Fuchs, p. 466 has “不住.” We follow Fuchs because 不住 is the correct order.

144. Fuchs, p. 450, note 8: “Mit Klein Fu–lin muss hier das Oströjsche Syrien gemeint sein (Schaeder, p. 64). Die Bemerkung: und halt sich dort auf bezieht sich auf die Vertegung der arabischen Hauptstadt von Mekka nach Damaskus. Mit dem Ausdruck; in die Berge hineingehend ist offenbar der Taurus gemeint.” *Encyclopedia Britanmica*, Volume 21, p.718:” Damascus was the capital of an Arab empire which extended by 715 from Spain and Morocco to Turkestan and Sind and held the mastery of the Mediterranean. With the wealth drawn from the dependent provinces the caliphs Abd ul–malik and Walid I endowed Jerusalem and Damascus with magnificent monuments. The first serious set back was the failure of the third and final Arab assault on Constantinople in 719.”

145. MS, 7a, line 13 has 彼々國々. Fuchs, p. 466 divides 彼國 and 彼國. In view of the context, Fuchs' correction is right.

146. Fuchs, p 466 corrects 極窄 to 極窄. MS. 7a, line 12 has 極窄. 窄 means ‘very tight’ or ‘cage’. 窄 means ‘very narrow’. So Fuchs' correction is right.

147. Fuchs, p. 466 has 女人在髮 but MS, 7b, line 1 has 人女在髮 Because 女人在髮 is the correct order, follow Fuchs.

148. [Ed.] MS, 7b, line 2 has 手把亦匙筋 But Fuchs, p. 466 corrects 手把亦匙筋 to 手把亦匙箸. 筋 means “sinew.” Sadakata notes, “筋 is a popular character (俗字) of 箸 i. e. chopsticks. We feel, however, ‘skewers’ would be more appropriate than chopsticks in that part of the world.”

149. Fuchs, p. 451, note 2: “D. i. has Oströmisohe Reich mit Byzans.” This is the Eastern Roman Empire. According to Hye Ch'o's record, clothing of Eastern Romans Arabs, and Persians seemed to be similar. See *20,000 Years of Fashion*, p. 345, and *History of Costume*, p. 119.

150. According to *Indosi and Chuoaziasi* 印度史中央亞細亞史 (*Indian and Central Asian History*) pp. 22, 74, 78, 95, and 65, An 安國 is Bukhari, Ts'ao 曹國 is Kaputana, Shih 史國 is Kashana, Shi-lo 石磧國 is Shash which is today's Tashkent, Mi 米國 is Maimarg, and K'an 康國 is Samarkand. However, *Haneda Anniversary*, Vol. I, p. 401: "康國 is today's Tashkurgen." Cf. Fuchs, p. 451, note 4.

151. According to *Indosi and Chuoaziasi* p. 95 and 129, West-Tu-kuh exerted pressure on Ferghana. Also, in order to accomplish its complete conquest they attacked Kashgar and disturbed the border of T'ang (China). According to *National Geographic Magazine*, December, 1959, Atlas Plate 44, Ferghana is located between Tadzhik S. S. R. and Kirgiz S. S. R. Fuchs, p. 452, note 4: YHD liest ungenau 舵, T. T. richtig 那(二舵)."

152. Fuchs, p. 467 corrects 緡又大河 to 緡又大河. This is in Russian territory today. Fuchs, p. 452, note 5: "So im Text. Lies 又; dies bezeichnet eigentlich den Amu Darya; hier muss aber der Dir Darya gemeint sein; vgl. Shiratori, p. 137."

153. MS, 1 8a, line 9 has 男女剪髮. Fuchs, p. 467 corrects 男女剪髮 to 男人剪髮. Since later 女人在髮 appears, 男人 is correct.

153. Fuchs, p. 467, note 3: "己北 pleonastisch." Fuchs, p. 463, note 3: "MS liest hier pleonastisch: 至漢國己北." In view of the context, Fuchs' correction is right. This area would be from the Caspian sea to the Aral sea, or from the Aral sea to Balkhash.

155. [Ed.] MS, 8a, line 10 the character 穴 can faintly be seen. Fuchs, p. 453, note 4: "Dies Zeichen ist im MS undertlich verbessert; T. T. und YHD lesen 虫, Würmer, Hadani schlägt in seiner Einleitung 穴, eine alte Form für 肉, vor," Cf. *Haneda Anniversary*, Vol. I, p. 629, note 32: "穴 in Fuchs may be 虫. In other words it is 肉食." In agreement with Sadakata, however, we take it as 'insects (?)'.

156. MS, 8a, line 11. has 女人在頭. Fuchs, p. 468 corrects 女人在頭 to 女人在頭髮. Because 女人在頭 does not make sense and in view of the context, 女人在頭髮 makes sense.

157. Fuchs, p. 453, note 6: "Vgl. Doc., p. 164; Song Yun, p. 401." *Teihon sekai rekishi*, p. 38-39: "Wakkan is in Persia."

158. [Ed.] MS, 8b, line 1 has 偏樑難 but Fuchs, p. 468 has 難偏樑. In addition, Fuchs, p. 454, note I: "MS liest 樑, nicht 難, wie die Textausgaben vorschlagen. 難 ist im MS klein nachgetragen und versehentlich hinter 樑 gesetzt anstatt hinter, 去." Either way, We take the meaning to be," "People are in danger walking on slanting bridges."

159. Fuchs, p. 468 has 江河浚崖巒, but MS. 8b, line 3, has 江河凌山至巒.

160. [Ed.] Fuchs, p. 454 translates 龍門 as 'flowing course', but this should be read as 'the Dragon Gate water fall (in China)'.

161. MS, 8b, line 3 has 火上脰. Fuchs, p. 468 corrects 火上脰歌 to 火上陔

or 骸 or 垓. Fuchs, p. 454, note 4: "MS liest 上骸歌. Kai oder 骸 ist wohl 垓 oder 垓. Vielleicht ist 骸歌 hier, parallelzum nächsten Vers, als Gebirgsname (unidentifiziert) aufzufassen."

162. [Ed.] MS, 8b, line 8 has 樹水. Fuchs, p. 468 corrects 樹水 to 樹木. Also Fuchs, p. 454, note 6: "MS liest 樹水, offenbar falsch für 木." 樹木 means "tree water." 樹水 means "woods or trees." We, however, take this to mean 'tree' and 'water'.

163. Shignan or Shughnān in Badakhshanskaya, U. S. S. R. today, It is North west of Gilgit, Kashmir: 尸棄尼 in Hsüan-tsang's *Records*. Cf. Mizutani, *Daitō-Saiikkiki*, p. 381.

164–165. Since Hsüan-tsang did not actually go to Shignan, Hye Ch'o's descriptions are very valuable here.

166. 大播密川

167. 揭盤陀國 in Hsüan-tsang's *Records*. Tashkurghan (75° 10' E., 37° 45' N.) of today. Cf. Mizutani, *ibid.* p. 384.

168. According to Fujita, King P'ei-hsing's ancestral home was Kashgar. Cf. 唐書. 疏勒傳「王姓斐氏」 or 「喝盤陀其王本疏人世相承爲之」

169. *Kharbanda (Iran. *Yarpand or 'mountain way'). Cf. Mizutani, *ibid.* p. 384.

170. Hsüan-tsang took same route on his way back to China.

171. 佉沙 in Hsüan-tsang's *Records*.

172. As for the etymology of Kashgar, there are two: Iran. *Kāsh* 'jewel' and *ghar* 'city', or Wakhān. *ghar* or 'mountains'. Cf. Mizutani, *ibid.* p. 389.

173. 守捉

174. MS. 9a, lines 8–9. 食肉及葱韭等也.

175. *Haneda Anniversary*, Vol. I, p. 507: 龜茲干闐 were Aryans and used the Kucha 龜茲 and Khotan 干闐 languages for everyday speech. According to *Kudangsue Sue-ik-jun* 舊唐書西域傳 (p. 116) and *Indosi and Chuoaziasi* 印度史中央亞細亞 (p. 20, 21, and 42) 30,000 Chinese troops were stationed in Kucha. The site of the General Protectorate of An-hsi 安西都護府 was placed here. In Kucha the Tokhāristān language was used among the people of Tarim basin at Kucha and Karashr, which are a part of Sin-kiang 新疆 (in China); this language is Indo-European.

176. The site of the General Protectorate of An-hsi maintained control of all nations of the Tarim basin, monitored nations to the west of Tashkurgen, and managed the control or traffic and trade. This 安西都護府 was established in 640 A. D. after destroying 高昌國. In 648 A. D. the site of the General Protectorate of An-hsi conquered Kucha and moved here. Soon after, when the 太宗 emperor died, there was a rebellion at west Tu-kuh (阿史那賀魯).

177. Khotan 闐干, along with Kucha and Kashgar, directly belonged

to the site of the General Protectorate of An-hsi. See *Indosi and Chuoaziasi* 印度史中央亞細亞史, p. 114, 115. According to *Indosi and Chuoaziasi*, Chinese officials were appointed, held court trials, and ran the civil administration. The Khotanese language is an Indo-European language.

178. Fuchs, p. 456 added "D. i. Zwischen dem 18 and 27 Dezember 727."

179. According to Dr. Yi Byung Do, 節度大使 is an army commander and governor. Fuchs, p. 456, note 4: "Zum Titel vgl. T'P. XXV, 1928, p. 286 seq. Mit Chao ist Chao I-cheng 頤貞 gemeint, der zweite Generalprotektor von An-hsi, vgl. Doc. 364, s. v.; das 一切經音義, Kap. 100, Ende schreibt 頤 für 頤. Chao war nicht, wie Huei-ch'ao berichtet, erster Generalprotektor; dies war damals Yen Wang-huei 延王迴"

180. Fuchs, p. 456, note 5: "有兩所漢僧住持. Zu 住持 vgl. p. 457, Anm 3."

181. 都維那; Fuchs, p. 456: Karmadana. According to 佛學大辭典, p. 2512 it means, "a chief official who administers temple works."

182. *Bulkyo sajun*, p. 694: "This is one of the three divisions of holy scriptures."

183. 上座 means "student priest." While in the temple, he sometimes does errands. Regarding this, Yi U-Sung said the above.

184. *Indosi and Chuoaziasi* 印度史中央亞細亞, p. 117: "At the time of 則天武后 Ta-yün temples were established in states such as Kachgar (Kashgar) and An-hsi."

185. Fuchs, p. 457, note 3: "大好住持; 住持 ist hier in originaler, verhalter Bedeutung genommen (Oda, p. 1227, 3: Ruhig in der Welt leben und an Buddhas Lehre festhalten); sonst bedeutet es auch: Oberpriester oder Gemeinde Eigentum; vgl. dazu Chavannes-Pelliot, *Traite-Manicheen*, J. As. 1912, p. 555¹, und Chavannes, T' P. 1904, p. 370⁸; hier p. 440, Anml 9."

186. The existence of 龍興寺 can be seen in 高昌 and 北庭(庭州). See p. 117 of *Indosi and Chuoaziasi* 印度史中央亞細亞史

187. Fuchs, p. 457, note 7: "MS unklar; wohl so zu lesen und nicht 烏, wie T. T. liest; vgl. Pelliot, T' P. XXXII, 1936, pp. 275-276."

188. According to *Indosi and Chuoaziasi*, p. 115 and *Tōyōgaku hō* 東洋學報, p. 103-6, Under the control of the site of the General Protectorate of An-hsi there were Kucha, Khotan, Kashgar, etc. where five characters are missing I added 安西都護府. In view of the context, this 安西都護府 is correct. According to *Indosi and Chuoaziasi* 印度史中央亞細亞史, p. 90, 安西都護府 depended on traffic-passing taxes from merchandizing Hu for the expense of ruling the four garrisons.

Part III

Manuscript and Edition

A Reproduction of the Manuscripts and Its Critical Edition*

The originals of the photographs of the manuscripts are in Paul Pelliot and Toyohachi Fujita, *Tonkō-isho Ei-in-hon Dai-issū* (The Photographic Reproductions of Tun-huang Manuscripts 燉煌遺書, 影印本第一集), 1926, Shanghai, Tōakōkyūkai (東亜攷究会). The manuscripts were the acquisition of Paul Pelliot straight from a Tun-huang cave (Cf. BEFEO, 1908, pp.511-512). This discovery prompted the following works by a number of international scholars.

Walter Fuchs, "Huei-ch'ao's Pilgerreise durch Nordwest-Indien und Zentral Asien um 726." *Sitzungsberichte der Preussische Akademie der Wissenschaften Philologische-Historische Klasse*, Dezember, 1938.

In the following editorial work, the different readings are noted on the basis of the works listed above. (Iida)

黃赤足裸前外道也者

廷食即契亦不齊也地皆平

方奴婢將賣人罪与殺人罪亦經

百王相尸部國仙入徑發其城其原走住也仙入徑發其城買塔乃

禪師在彼掃灑每年八月十日停左道俗乾彼大送供養於其室中

性現不切其數眾人因見皆自心非一此塔西乃一河伊羅鉢

水南流二千里外方入恒河彼塔四絕無人住也極荒林木住彼禮拜者

屛中大魚巧植也此塔東南望乃一寺名甚壯觀寺乃十乘

考供養長彼禪師衣食令在塔所供養

曰此彼罪在斯因大國亦盡無五為

彼五俱輪見素形像在於塔中

上乃師子彼幢極極五人合抱文里如

揚時并造此幢寺名達摩所葛羅

外道亦着衣服身上塗灰事於大天此寺中乃一金銅像五百

七摩揭陀國舊乃一王名尸羅業底造此像也兼造一金銅

蘭達羅由王內三百頭為依山作城而住送舊已北漸入山為國
 棟如兵馬不多常放中天及迦葉彌羅國屬人所吞所以依山而住
 依衣著言音與中天不殊土地清冷打中天等也然亦有霜雪但少風
 亦土地所出為麩布棉麥駝駝少以其王內馬百頭首領三五頭百
 姓並之西是平水東近雪山國內是寺是僧大小乘俱行又二月相過雪
 山東乃小國名羅跋那具恒羅屬土著國可管衣著於北天亦似音
 音乃別土地極寒也又從此國蘭達羅國西行經一月至一社此國亦
 音精即大分亦似衣著人風土地所出為氣寒極與北天亦似音著
 奈乘俱行王及首領百姓等大教信三寶 又從此國西行一月至新頭城
 國衣著風俗節日氣寒暖與北天相似言音稍別此國極是駱駝國人乘
 駝與也王及百姓等大教三寶是寺是僧即造順正理論家實論師
 是此國人也此國大小乘俱行見今大寶經半國極也即從此國乃至五
 天不多飲酒極惡五天不見人醉人打打之者疑以飲者得色得力

- 1 蘭達羅國。王有三百頭象。依山作城而住。從茲已北。漸有山。爲國
 2 狹小兵馬不多。常被中天及迦葉彌羅國屢之所吞。所以依山而住。人
 3 風衣著言音。与中天不殊。土地稍冷於中天等也。亦無霜雪。但有風
 4 冷。土地所有出家氈布稻麥驢騾少有。其王有馬百疋。首領三五疋。百
 5 姓並無。西是平川。東近雪山。國內足寺足僧。大小乘俱行。(9 蘇跋那具怛羅) 又一月程過雪
 6 山。東有一小國。名蘇跋那具怛羅。屬土蕃國所管。衣著□北天相似。言
 7 音卽別。土地極寒也。(10 社吒國) 又從此闍蘭達羅國西行。經一月。至一社吒國。言
 8 音稍別。大分相似。衣著人風。土地所出。節氣寒暖。与北天相似。亦足寺足僧。
 9 大小乘俱行。王及首領百姓等。大敬三寶。(11 新頭故羅國) 又從此吒國西行一月。至新頭故羅
 10 國。衣著風俗。節氣寒暖。与北天相似。言音稍別。此國極足駱駝。國人取乳
 11 酪喫也。王及百姓等。大敬三寶。足寺足僧。卽造順正理論。衆賢論師。
 12 是此國人也。此國大小乘俱行。見今大窳侵半國損也。卽從此國乃至五
 13 天。不多飲酒。遍歷五天。不見有醉人相打之者。縱有飲者。得色得力

寺處是在此國中在城東南山裏谷寺僧見令供養此國大乘律行
 又從此建馱羅國正北入山三日程至烏長國彼白云帶地引飛空大慈三寶百姓村莊多
 不施寺家供養少不自留以供養衣食設齋供養亦自是常三寺三僧種多
 相俗人也專行大乘法也衣著飲食之風與建馱羅國相似言音不同土地是駝駝
 羊馬羴布之類氣味甚冷 又從烏長國東北入山十五日程至拘衛國
 自呼云奢摩羅國國比至亦敬信三寶寺僧衣著令音與烏長
 國相似著氈衫袴等此乃羊馬等也 又從此建馱羅國西行入山七日程至
 國此國至王人首領亦屬建馱羅國所管衣著言音與建馱羅國相似
 亦有寺僧敬信三寶行大乘法 又從此覽波國西行入山三日程至
 賓國此國亦是建馱羅王所管地至夏在對宿遠涼而垂各住建馱羅極曠
 住彼即云雪曠而不寒其對賓國冬天積雪甚冷也此國土人皆剃髮
 突厥衣著言音飲食與大軍國大同小異其間男之與女並皆著氈衫
 袴及靴男女衣服皆用羊毛織就女人臥在土地上駝駝羊馬驢牛

13 12 11 10 9 8 7 6 5 4 3 2 1

等處。並在此國中。在此城東南山裏。各有寺有僧。見今供養。此國大小乘俱行。
 (19 烏長國)又從此建馱羅國。正北入山三日程。至烏長國。彼自云壽地引紀。此王大教三寶。百姓村庄。多
 分施入寺家供養。少分自留。以供養衣食。設齋供養每日是常。足寺足僧。稍多
 於俗人也。專行大乘法也。衣著飲食人風。與建馱羅國相似。言音不同。土地足駝驢
 羊馬氈布之類。節氣甚冷。(20 拘衛國)又從烏長國。東北入山十五日程。至拘衛國。彼
 自呼云奢摩揭羅闍國。此王亦敬信三寶。有寺有僧。衣著言音。與烏長國
 相似。著氈衫袴等。亦有羊馬等也。(21 寶波國)又從此建馱羅國。西行入山七日。至寶波
 國。此國無王。有大首領。亦屬建馱羅國所管。衣著言音。與建馱羅國相似
 亦有寺有僧。敬信三寶。行大乘法。(22 闍賓國)又從此寶波國而行入山。經於八日程。至
 闍賓國。此國亦是建馱羅王所管。此王夏在闍賓。逐涼而坐。冬往建馱羅。趁暖而
 住。彼即無雪。暖而不寒。其闍賓國冬天積雪。爲此冷也。此國土人是胡。王及兵馬
 突厥。衣著言音食飲。與吐火羅國。大同少異無問男之與女。並皆著氈布衫
 袴及靴。男女衣服無有差別。男人並剪鬚髮。女人髮在。土地出駝驢羊馬驢牛
