PREFACE

Although I began work on this study of a Tibetan geography of Nepal several years ago, various unexpected events delayed its completion until now. I finished the transcription of the Tibetan text and its translation shortly before the 1959 Tibetan revolt. Following that revolt, the Rockefeller Foundation gave the University of Washington a grant, which provided funds to bring learned Tibetans to the University for a three-year research program. This grant offered unique opportunities to carry out special research; consequently this study of Nepalese religious geography was put aside.

While in India in 1960 to recruit the Tibetans for our research program, I had the opportunity to revisit Kathmandu, where I tried to locate Tibetan materials related to my study of Nepal's pilgrimage places. I was informed that two guide-books of the Kathmandu valley were printed in Tibetan; but I was unable to find copies during my brief stay. Fortunately, these two guide-books (see appendices A and B for these texts in transcription), together with one of the Bodh-nāth stūpa, were obtained later on and forwarded to me by my friend Pasang Sherpa, to whom I am extremely grateful, for without the aid of these guide-books, many passages in the original geography would have remained ambiguous.

After the termination of the special research program supported by the Rockefeller Foundation, I was once again able to resume my work on this Nepalese geography. During the summer of 1965, I was able to devote full time to this study and bring it to completion thanks to the financial assistance I received from the Far Eastern and Russian Institute of the University of Washington, for which I am deeply grateful.

It is with great pleasure that I make the following additional acknowledgements:

To Professors Luciano Petech (University of Rome), Thomas Ballinger (University of Oregon), Margaret Fisher and Leo Rose (University of California, Berkeley), and Bhuwanlal Joshi (University of California, Santa Cruz) for their kindness in reading an early draft of this manuscript and offering valuable suggestions.

To the members of the staff of the Istituto Italiano per il Medio ed Estremo Oriente, whose kind cooperation and affectionate assistance contributed greatly to the completion of this study.

And, finally, to my *guru*, Professor Giuseppe Tucci, who not only gave generously of his limited time and opened his private library to me, but who also through his affection and interest in my work is a constant source of encouragement to me.

INTRODUCTION

This study of a Tibetan religious geography of Nepal is based on the Nepalese section of the *'Dzam gling chen po'i rgyas bshad snod bcud kun gsal me long zhes bya ba* ("The mirror which illuminates all inanimate and animate things and explains fully the great world"), known in short as the *'Dzam-gling-rgyas-bshad*,¹ which was written by Bla-ma Btsan-po, also known as Smin-grol Nomun Khan.

Because of the nature and content of the Tibetan text, I have called it a *religious* geography. Geography, in the sense of an objective and scientific study of topography, flora and fauna did not develop in Tibet. Instead, Tibetan texts, which might be called geographies are, in fact, little more than guide-books to be used by pilgrims. These give succinct directions to sacred locations and descriptions of holy objects to be found there, along with reference to any important ecclesiastic associated with the place. A prime example of this type of Tibetan *religious* geography is the *Dbus-gtsang-gi gnas-rten rags-rim-gyi mtshan-byang mdor-bsdus dad-pa'i sa-bon zhes-bya-ba* by Mkhyen-brtse (1820-1892)². In reading this text on the holy places of central Tibet, the reader is struck by the complete lack of reference to topographical features, flora, or fauna, unless there is some connection with a sacred place, object, or person. In contrast to this type of *religious* geography, the world geography of Bla-ma Btsan-po is unique in that it incorporates both religious and topographical descriptions. When

¹ The transcription system used in this study is the one described in Turrell Wylie, "A Standard System of Tibetan Transcription", *Harvard Journal of Asiatic Studies*, 22 (December 1959), pp. 261-67.

² See Alfonsa Ferrari †, *mK'yen brtse's Guide to the Holy Places of Central Tibet*, (*Serie Orientale Roma XVI*), edited by Luciano Petech, (Rome 1958).

describing those countries where geographical texts are of the pilgrim's guide-book genre, Bla-ma Btsan-po's descriptions are limited to religious places, objects, and persons; but, when dealing with countries such as those in Europe and the western hemisphere, his descriptions include topography, flora and fauna. This is because he relied on western sources – Russian, Italian, and others – in which the descriptions are more in keeping with the scientific meaning of the term *geography* ³.

The author of the '*Dzam-gling-rgyas-bshad* was the erudite incarnation Bla-ma Btsan-po, known as Smin-grol sprul-sku 'Jam-dpal Chos-kyi bstan-'dzin 'phrin-las (1789–1838), whose monastery was the A-mdo Sgo-mang dgon-pa, which is also known as the Gser-khog dgon-pa. According to the colophon, he composed his geography in the Iron-Dragon year of the 14th cycle (A.D. 1820) ⁴ while living in Peking, China.

The copy of Bla-ma Btsan-po's work used in this study is an *dbu-med* manuscript of 146 folios which was obtained from the late Dr. Joseph F. Rock and now belongs to the University of Washington (Seattle). Two sections of this world geography have been recently published: the section on North and South America (folios 141–b to 144–b) ⁵ and the section on Tibet (folios 58–a to 81–a). The published text of this section ⁶ was collated with an *dbu-can* manuscript copy in the private library of Professor Giuseppe Tucci in Rome. Unfortunately, Professor Tucci's copy only covers the section on Tibet; therefore, no other copy was available to me for collation when transcribing the section on Nepal.

The Nepalese section comprises folios 3–b to 8–b of the University of Washington's *dbu-med* manuscript. Orthographic corrections have been made on the manuscript in red ink by some unknown person.

³ For further details on the various types of Tibetan geographical texts, see Turrell Wylie, "The Tibetan Tradition of Geography", *Bulletin of Tibetology*, Vol. II – No. 1 (Gangtok 1965), pp. 17–25.

⁴ Cf. '*Dzam-gling*, pp. xv, 109, 195.

⁵ Turrell Wylie, "Dating the Tibetan Geography '*Dzam-gling-rgyas-bshad* through its Description of the Western Hemisphere", *Central Asiatic Journal*, Vol. IV – Nr. 4 (The Hague 1959), pp. 300–11.

⁶ See '*Dzam-gling* in the list of abbreviations.

In each case, the correction in red is the desired reading; therefore, it is given in the main body of the transcribed text and the original – but incorrect – spelling is given at the bottom of the page, following the word: Origo. There are a few cases where the original text was demonstrably incorrect; yet, it was not rectified by that unknown proof-reader. In such cases, the correct spelling is given in the text and the incorrect one is noted at the bottom of the page, following the word: Error.

Several Sanskrit words are given in transliteration in the text and those with the diphthongs: औ and ऐ are transcribed as *au* and *ai*, respectively. Thus, such transcriptions as *bai* represents बै and is not a typographical error for *ba'i* बाई .

Interestingly enough, Bla–ma Btsan–po’s geographical description of Nepal is limited to places and things along the main roads from Skyid–grong and Nya–lam rdzong in Tibet to Kathmandu and to the Kathmandu valley itself as far south as Bhimphedi. This is probably due to the limited materials available to Bla–ma Btsan–po, who was living in Peking. Although he refers to both oral and textual sources, he only specifically names two: Thang–zing and Mnga’–ris grub–chen. Thang–zing refers to Hsüan–tsang, the Chinese pilgrim who traveled to India between the years 629 and 645 and whose account of his trip is titled *Hsi–yü–chi*. This work would have been available to Bla–ma Btsan–po either in Chinese or Tibetan (see footnote 82). From the way he cites Mnga’–ris grub–chen (cf. folio 5–a), it appears Bla–ma Btsan–po had a guide–book written by someone with that name. Neither of the two guide–books of the Kathmandu valley, *Bal–yul gnas–yig* and *Bal–yul mchod–rten ’Phags–pa shing–kun dang de’i gnas gzhan rnam–kyi dkar–chag*, refer to Mnga’–ris grub–chen. Moreover, Bla–ma Btsan–po includes information not found in these two guide–books; therefore, it is presumed that he had yet another guide–book written by Mnga’–ris grub–chen.

I have quoted extensively from the two guide–books on the Kathmandu valley mentioned above and since they may not be available to the general reader, I have included their texts in transcription (see Appendix A and B).

Two tables have been included at the end of this study in order to provide a convenient means of cross-identification between the Tibetan names found in '*Dzam-gling* with those occurring in non-Tibetan sources. Table A gives the Tibetan name first and then its non-Tibetan equivalent; Table B is just reverse listing.

Finally, a sketch map of the geographical area concerned is included at the end in order to show the approximate location of those places mentioned in the original Tibetan text.

TRANSLATION

(Folio 3–b) If one describes the roads which go to the country (of India) together with the great pilgrimage places of its various regions and the benedictory symbols (*rten*)¹ found there, (it goes without saying that) in general, there are many roads which go from various neighboring countries, such as China, to India. In the central province (Magadha), which is the middle of the five provinces of India, there are pilgrimage places such as Rdo-rje-gdan², where those among the thousand perfect leaders of excellent (karmic) inheritance who have come in the past and who are to come in the future, such as the Incomparable King of the Shākya (Śākyamuni), have already performed, and shall perform, inconceivable acts of existing bodily and demonstrating such deeds as the way one is born, becomes fully enlightened, turns the wheel of the (religious) law, and then passes from misery³. Those

¹ The literal meaning of *rten* is "support" and by extension, it means "something concrete that supports an abstract concept"; thus, it is a visible representation or a "symbol". Within the Tibetan Buddhist frame of reference, there are three symbols relating to the Buddha: *sku-rten* "symbol of the body", or "an image"; *gsung-rten* "symbol of speech", or "a book"; and *thugs-rten* "symbol of the mind". Since it is impossible to symbolize the mind per se, it is represented by the *mchod-rten* "symbol of oblation", or stūpa. A *mchod-rten* is an architectural structure, which serves as a shrine for relics or as a cenotaph. (For illustrations and an explanation of the *mchod-rten*, see Waddell, pp. 261–64). When the text refers to the *rten* or "symbols" to be found at a given location, it means the images, books, and *mchod-rten* (stūpa). The phrase "benedictory symbols" (*rten byin rlabs can*) means that the "symbols" possess the power to bestow blessings upon those who perform the prescribed acts of veneration to them.

² Rdo-rje-gdan is the Tibetan translation of Vajrāsana (modern day Bodhgayā), where Śākyamuni obtained enlightenment and became the Buddha. (For an indigenous Tibetan account of Vajrāsana, see Roerich, pp. 63–76).

³ The expression "demonstrating the way" (*tshul bstan*) is used to refer to deeds performed by Buddhas, bodhisattvas, and emanation-body lamas (*sprul-sku bla-ma*), who, because of their metaphysical nature, are not subject to the karmic law governing physical

who wish to visit those places, in the course of traveling from such (regions) as Dbus-Gtsang⁴, arrive first at the country of Nepal. After visiting the symbols there, if they go on to India, the distance is short and the road rather easy.

After traveling through our own Tibetan (districts) such as Gnya'-nang⁵ and Skyid-grong of Mang-yul⁶, and crossing many rivers and narrow ledges which make it difficult to travel southward, if one then goes on for about six or seven days, one arrives at the center of the country of Nepal. That country, which is great in wealth and filled with many people, is a mixture of rocky mountains, forests, and plains, where it is suitable to plant various kinds of grain. Heat and cold are minimized in both summer and winter, and except on few occasions, the harvests are usually good. Due to the abundance of wealth and religion (*chos*), it is no mean country.

In the middle region (*gling*), which is among the three regions in that country⁷, there are three large towns: one is known in the language

activity in saṃsāra, such as being born or dying. When ordinary creatures observe the deeds of such manifestations of Buddhahood, it is thought – but incorrectly – that they are performing physical activity governed by karma; whereas they are only “showing the way in which one performs such deeds” for didactic purposes.

⁴ Dbus-Gtsang refers collectively to the two provinces of central Tibet. Lhasa is the capital city of Dbus and Shigatse (Gzhis-ka-rtse) is the principal town of Gtsang.

⁵ The Gnya'-nang region comprises the upper reaches of the Bhotia Kosia river down to the border of Nepal. Elsewhere in 'Dzam-gling, Bla-ma Btsan-po refers to this area as Nya-lam nya-nang (p. 65). Gnya'-nang (= Nya-nang) is the name of the region and Nya-lam is the name of the *rdzong*, or administrative headquarters for the district officer (*Rdzong-dpon*). Nya-lam is marked on modern maps as Nilam or also Nyalam Dzong. It is known as Kuti to the Nepalese.

⁶ Skyid-grong is the name of a *rdzong* located about fifty miles north of Kathmandu. It appears on modern maps as Kirong or Kyerong. Mang-yul is the name of the region in which Skyid-grong is located.

⁷ Although Bla-ma Btsan-po refers to the “three regions” (*gling gsum*) of Nepal, he does not give any information about them: he only states that Kathmandu and the other villages listed are located in the middle *gling*. Since the section on Nepal's religious geography deals only with the Kathmandu valley and the narrow corridor running north from there to Skyid-grong and Gnya'-nang in Tibet and south to India via Bhimpedi, perhaps the division of “three regions” simply means the “eastern region”, the “middle”, and the “western”. On the other hand, it is possible that Bla-ma Btsan-po had reference to the “three kingdoms”, into which the Kathmandu valley was divided prior to the conquest and unification of the valley by Prithvi Narayan in 1769. In view of the fact that Bla-ma Btsan-po composed his geographical work in Peking, China, in 1820, even though

of India as Ka-tha-māṇḍu, that is to say *Shing-dkyil*⁸, and as Yam-bu to the Newars (Bal-po)⁹ and the Tibetans in general. It has about sixteen thousand households. The one called Pa-ṭan is also known as Ye-rang¹⁰. (Folio 4-a) Pa-ṭhi-gom (is also known as) Kho-khom¹¹. There are also many small villages, such as Sam-khu¹²,

he had to rely on out-dated Tibetan materials, he certainly must have known that the Gurkhas ruled Nepal during the Tibeto-Nepalese war in 1792. Moreover, *gling* is not used in other parts of the 'Dzam-gling to refer to "kingdoms" or "principalities"; therefore, I have translated this passage as the "three regions", stipulating that the identification remains uncertain.

⁸ Ka-tha-māṇḍu is Kathmandu, the capital city of Nepal. It was originally called Kāntipur, a name still found in use. Then, during the reign of Lakṣmī Narasiṃha Malla in the 15th century, a large, wooden hall was constructed in the city. The name of the hall, Kāṣṭha-maṇḍapa ("Wooden Temple") in Sanskrit, is called Kāṭmaṇḍu in the vernacular. It was taken over as the name of the city in time. Bla-ma Btsan-po defines Ka-tha-māṇḍu (= Kāṣṭha-maṇḍapa) as Shing-dkyil, or "Wooden Circle" instead of "Wooden Temple". Perhaps he misunderstood maṇḍapa as maṇḍala (Tibetan: dkyil-'khor), "circle". (For the history and derivations of the names of Kathmandu, see Lévi, I, pp. 52-54; Kirkpatrick, pp. 158-61).

⁹ It is interesting to note that throughout the section on Nepal, Bla-ma Btsan-po makes a distinction between the Newars, whom he calls Bal-po, and the other peoples there. Whenever this distinction was pertinent, I have translated Bal-po as "Newar"; when not, then as "Nepalese".

¹⁰ Pa-ṭan, known in Sanskrit as Lalita-pattana, and also called Lalitpur, is the Patan of modern maps just south of Kathmandu. Patan was the capital of one of the three kingdoms of the valley prior to the conquest of Prithvi Narayan. The Tibetan name, Ye-rang, is a rendering of the Newari name Yala, or Yalai. (On the history and variations of the names for Patan, see Lévi, I, pp. 60-62. On Patan's temples and environs, see Landon, pp. 216-20; Kirkpatrick, pp. 161-62).

¹¹ Pa-ṭhi-gom, known in Sanskrit as Bhaktapura, is the Bhatgaon of modern maps; a city located about seven miles east of Kathmandu on the confluence of the Hanumati and Kansavati rivers. (On the history of the names for Bhatgaon, see Lévi, I, pp. 65-66; Kirkpatrick, pp. 163-64). Bhatgaon was one of the three kingdoms of the valley during the Malla period. (On its temples and environs, see Landon, I, pp. 216-20). In view of Bla-ma Btsan-po's positive equation of Bhatgaon with Kho-khom (*pa ṭhi gom am kho khom*, folio 4-a), it is interesting to note Lévi's discussion on the identification of *Kho-bom*, which appears in the dictionaries of Sarat Chandra Das and H. A. Jäschke as the Tibetan name for Kathmandu. *Kho-bom* corresponds closely to the Newari name *Khopo* for Bhatgaon; whereas, the spelling *Kho-khom* used by Bla-ma Btsan-po corresponds to the *Ku-k'u-mu* (Lévi's *Kou-k'ou-mou*, *loc. cit.*) of Chinese materials. It seems that Lévi was correct when he wrote: "On est tenté de croire que les lexicographes ont par erreur substitué Katmandou à Bhatgaon" (*loc. cit.*, p. 65).

¹² Sam-khu is the village of Sankhu located about ten miles east-northeast of Kathmandu. Its importance derived from its being on the trade route between the Kathmandu valley and Tibet via Nyalam Dzong (= Kuti). (Cf. Lévi, II, pp. 381-82; Landon, II, p. 35).

Kirta-spu-ra ¹³, Tsi-ti-lam ¹⁴, Na-ya-ko-ṭa ¹⁵, Stha-na-ko-ṭa ¹⁶, De-ba-pa-ṭan ¹⁷, and Shi-ba-pu-ra ¹⁸. It is also said that there are eighty-four small communities there.

As for the symbols of the body, speech, and mind ¹⁹, and the special pilgrimage places located in that region: in the town of Yam-bu (Kathmandu), there are many benedictory symbols, such as the “two brothers” (called) Jo-bo Ja-ma-li and A-kam-bu-kam, which is called Ka-ru-dzu-dzu by the Newars: these (two) are among the “four brothers” ‘Phags-pa ²⁰. There too is the *Yum* brought from the realm

¹³ Kirta-spu-ra, the Kirtipur of modern maps, is located about two and one-half miles southwest of Kathmandu. According to tradition, the Emperor Aśoka is said to have built a stūpa on the hill of Kirtipur. In the late 18th century, the inhabitants of Kirtipur inflicted the first defeat on the forces of Prithvi Narayan; a victory for them that brought cruel retaliation once Prithvi Narayan conquered the valley. The noses and lips of all the male adults of Kirtipur were cut off. (Landon, I, p. 228; Lévi, I, pp. 66-67; Kirkpatrick, pp. 383-84).

¹⁴ Tsi-ti-lam is the Chitlong of modern maps, a village located about eleven air miles southwest of Kathmandu on the road between Thankot and Bhimphedi (Lévi, II, p. 314).

¹⁵ Na-ya-ko-ṭa, the Nayakot of modern maps, is a village located about seventeen air miles north-northwest of Kathmandu on the trade route between Kathmandu and Skyid-grong in Tibet. (For a brief description, see Landon, II, pp. 26-28).

¹⁶ Stha-na-ko-ṭa is the village of Thankot, which lies at the foot of the Chandragiri pass on the north side, some seven miles west of Kathmandu (Landon, I, pp. 180-81).

¹⁷ De-ba-pa-ṭan is Deopatan, a village about two miles east-northeast of Kathmandu. It is reportedly the oldest village in the valley (Lévi, I, p. 67), dating from the 3rd century B.C. (Landon, I, p. 184).

¹⁸ Bla-ma Btsan-po lists Shi-ba-pu-ra as a village in the Kathmandu valley; however, it seems he has mistaken the name of a mountain for that of a village. That mountain, called Sheopuri in Landon (I, p. 181) and Śivapuri in Lévi (I, p. 367), lies on the north rim of the valley.

¹⁹ See note 1.

²⁰ The statement that the images of Jo-bo Ja-ma-li and A-kam-bu-kam are located in Kathmandu is in need of rectification. The expression “four brothers ‘Phags-pa” (*‘phags-pa mched-bzhi*) refers to four famous statues of Avalokiteśvara. In the section on Tibet in his geography, Bla-ma Btsan-po states that the “brother” image called Jo-bo Dza-ma-li (the orthographic variation from Ja-ma-li is insignificant) is located at Khur-chags, i.e., Kojarnath on the banks of the Karnali river near Taklakot, and it is called Khur-chags Jo-bo (*‘Dzam-gling*, p. 62). Regarding this identification, it is interesting to note that George Roerich, in his translation of the *Deb-ther Sngon-po*, inserted the following information in parentheses: “... ‘Phags-pa Wa-ti (at sKyi-roñ; sKyi-roñ Jo-bo, one of the three sacred images of Tibet: Lha-sa’i Jo-bo, sKyi-roñ-gi Jo-bo, Kho-char Jo-bo)...” (BA, II, p. 528). Kho-char and Khur-chags are variant spellings of the same name. Unfortunately, Roerich gave no indication as to the source of his list. In contradiction to these

of the Nāgas by the master Klu-sgrub (Nāgārjuna)²¹, and an image of Sgrol-ma (Tārā), which is said to have been saved from destruction

statements by Bla-ma Btsan-po and Roerich, an erudite lama of the Sa-skyia sect, – to which the monastery at Khojarnath belongs – denies that the image there is one of the “four brothers”. Furthermore, this Sa-skyia lama supplied the following list: *Rang byon 'phags pa mched bzhi | skyid grong jo bo wa ti | lha sa'i lo keshwa ra | bal yul gyi dza ma li dang | dbu gang bzhi* | “The four brothers 'Phags-pa, which are self-originated, are Skyid-grong Jo-bo Wa-ti, Lokeśvara of Lha-sa, and Dza-ma-li and Dbu-gang of Nepal, these four”. (written communication from Sde-gzhung sprul-sku Kun-dga' nyi-ma, dated 4 October, 1965). It appears that there are two traditions concerning the location of the image Jo-bo Ja-ma-li. One tradition identifies it with the image Kho-char Jo-bo, located at the monastery in Kojarnath, which is classified as one of the famous “brother” images of Avalokiteśvara (*'Dzam-gling, loc. cit.*; Roerich, *loc. cit.*). The second tradition is that the Jo-bo Ja-ma-li image is in Kathmandu as stated by Bla-ma Btsan-po and the Sde-gzhung sprul-sku, which is corroborated by *Shing-kun* and *Bal-gnas*.

According to *Shing-kun*, “In Kathmandu, there is the well of sandalwood from which originated the four brothers Jo-bo, and there is the White 'Ja'-ma-li, and Bod Thang Mgon-po” (*yam bu na jo bo mched bzhi'i 'khrungs pa'i tsan dan gyi khron chu dang | 'ja' ma li dkar mo dang | bod thang mgon po yod* | folio 6-b).

According to *Bal-gnas*, “As for the White Jo-bo 'Dzam-gling (known in Newari as) Dzan-bhāl: this image of Avalokiteśvara, which originated in paradise and speaks, bestows benediction and is also called (in Nepali) Ma-chin-dha-ra-nā-tha (*jo bo 'dzam gling dkar mo | dzan bhāl | spyen ras gzigs sku 'di zhing las 'khrungs shing gsung byon byin rlabs can ma chin dha ra nā tha yang zhu* | folio 5-b).

The image Bod Thang Mgon-po mentioned in *Shing-kun* above is identified as the Mahā-kā-la image at Ṭong-ṭi-khel in *Bal-gnas* (folio 6-b), which is the Mahākāla image kept in a temple in Tundi Khel (Lévi, I, p. 319).

The Ma-chin-dha-ra-nā-tha of *Bal-gnas* is the Nepali name of Matsyendra Nātha. The image referred to here is the white Matsyendra Nātha of Kathmandu (Lévi, II, p. 59). In none of the works consulted did the name Ja-ma-li (Bla-ma Btsan-po's orthography) or Dzan-bhāl (*Bal-gnas*, folio 5-b) occur; however, in a personal communication, Professor Bhuwanlal Joshi, a native of Kathmandu, informed me that the area of Kathmandu where the temple of the white Matsyendranath image is located is called *Jamal*. The image itself is known also by its Newari name of *Jammadeo* (written communication dated 2 November, 1965). This, then, is the Dzan-bhāl of *Bal-gnas*. Thus, the Jo-bo Ja-ma-li of Bla-ma Btsan-po's geography is the same image as the White, or Seto, Matsyendranāth, which is taken annually in a religious procession through the main streets of Kathmandu to Lagan. According to Lévi, this image is of Samantabhadra, whereas the one in Patan is of Padmapāṇi (Lévi, II, p. 59).

Now for the identification of the name *A kam bu kam*. Bla-ma Btsan-po states it is the name of *one* image in Kathmandu; but, he is incorrect on both counts. According to *Shing-kun*, “In Ye-rang (Patan), there are the two: Jo-bo A-khang and U-khang, which are mentioned in the *Maṇi bka'-'bum* (*ye rang na ma ṇi bka' 'bum na gsal ba'i jo bo a khang u khang gnyis dang* | folio 7-a). *Bal-gnas* gives the following additional information: “In

by the soldiers of Dza-ya Malla, King of the country Tsi-to-ro, and his brother ²². There is also a *mchod-rten* (stūpa) there said to contain

Ye-rang, are the A-khang and U-khang (known respectively as) Mīna Nātha and Macchīndra Nātha " (*ye rang a khang u khang | mi na nā tha | ma chīn dha ra nā tha | folio 7-a*).

There appears uncertainty on the part of the Tibetan authors as to the correct orthography for the names. Bla-ma Btsan-po spells them a *kam bu kam*, whereas *Shing-kun* and *Bal-gnas* both render them a *khang u khang*. The earliest available spelling is *bu kham*, which appears in the 13th century biography of Chag Lo-tsā-ba Chos-rje-dpal (1197-1264). When visiting Nepal, he described the image of Bu-kham as being "...a miraculous image of Avalokiteśvara made of sandal wood, of red colour, in the aspect of a five year old boy". (Roerich, p. 54). Chag Lo-tsā-ba described the annual religious festival in which the image of Bu-kham is taken on procession, bathed, and repainted red (Roerich, *loc. cit.*). Thus, Bu-kham (also spelled Bu-kam, U-khang, and Dbu-gang) is the Red, or Rato, Matsyendra-nāth image preserved in its temple in Patan.

The identification of A-kam (also spelled A-khang) thus is certain. It is the Mīna Nātha image also kept in Patan. Mīna is the Nepali name for "child". This image is known as Chaknadeo in Newari (Joshi communication). According to Lévi, "...dans les listes des maîtres du Haṭha-yoga, Matsyendra Nātha est remplacé par Mīna Nātha, qui en est un simple synonyme. Le bouddhisme népalais connaît aussi ce nom; mais il considère Mīna Nātha comme le cadet de Matsyendra Nātha". (Lévi, I, p. 355).

The annual car festival, known as the Procession of Matsyendra Nātha, is described in some detail by Landon (I, p. 43; photograph facing II, p. 224) and more so by Lévi (II p. 44 *et. seq.*, III, pp. 179-80). A sketch showing the cars - one for Matsyendra Nātha and one for Mīna Nātha - is found at the end of Lévi, volume I.

Bla-ma Btsan-po's original statement should be corrected to read: Jo-bo Ja-ma-li, known as the white Matsyendra Nātha, is in Kathmandu; and A-kam, known as Mīna Nātha, and Bu-kam, known as the red Matsyendra Nātha, are in Patan.

²¹ *Yum* ("Mother") refers to the Prajñāpāramitā, which Nāgārjuna is said to have obtained from the Nāgas. According to the *Shing-kun*, "The *Yum*, which was brought from the realm of the Nāgas by Nāgārjuna (consists of) sixteen volumes written in gold from the river of golden sands on paper of lapis lazuli. It is kept in Thang-bai-dhari of Kathmandu" (*klu sgrub kyis klu yul nas gdan drangs pa'i yum po ti bcu drug baiḍurya'i shog bu la 'dzambu chu bo'i gser las bris pa yam bu'i thang bai dhari na bzhugs || folios 4-a & 4-b*). According to *Bal-gnas*, the *yum* is in a temple in Tha-mel-bhal (folio 5-a), which appears to be the northwestern suburb of Kathmandu called Thamel (Lévi, I, p. 58) and Themale, or Thambahil (Landon, II, p. 28).

²² It appears that Bla-ma Btsan-po has compounded historical events with legends and folktales regarding the origin of this image of Tārā (*Sgrol-ma*). In his section on Tibet, he relates the story that the king of Tsi-tor (Chitor) and his brother fled their country, when it was attacked by the Turushka ruler named No-rom-ji, and they took an image of Sgrol-ma with them to Nepal ('*Dzam-gling*, pp. 62-63). Now in his section on Nepal, Bla-ma Btsan-po says it was brought to Nepal by Dza-ya Malla, King of Tsi-to-ro (Chitor), and his brother. There is a pious legend about two brothers named Jaya Malla and Phatta and their exploits in connection with Emperor Akbar's assault on Chitor (Landon, I, p. 219), and Bla-ma Btsan-po appears to have merged this legend with other events. The rulers in Nepal who trace their ancestry to the Rajputs of Chitor are the Gurkhas, who rose to

the turban of 'Phags-pa Shā-ri'i-bu²³. Furthermore, there are a great many temples and images of various Buddhist and non-Buddhist (deities), such as Mgon-po-gur²⁴, Phyang-bzhi-pa²⁵, Tshogs-bdag²⁶, and Ha-nu-mantha²⁷. (The above) is stated in the *dkar-chag*²⁸ and I

power when Dravya Sah, in 1559, invaded Nepal and usurped the throne of Gorkha (Lévi, I, p. 254). However, the ruler in Nepal said to have brought an image with him was Harisimha Deva, who took refuge in Nepal in 1324 and set up an image in Bhatgaon. That image is called Taleju; also spelled Tulasi, Tulajā, and Talagu (Lévi, I, pp. 228, 378-79). It appears Bla-ma Btsan-po identified this image as Sgrol-ma and said it was brought from Chitor; but Harisimha Deva came from Simraongarh, the capital of Tirhut.

²³ According to the *Shing-kun*, "In front of the palace, there is a stūpa made of gilt copper and the largest of several in Kathmandu. It contains the turban of Śāriputra and relics of the Buddha Kāśyapa" (*rgyal khang gi mdun na yam bu ya 'gal gyi che ba shā ri'i bu'i dbu thod dang | 'od srungs kyi ring bsrel bzhugs pa'i mchod rten gser zangs las grub pa yod || folio 5-b*). According to *Bal-gnas*, "The surplus earth and surplus stone stūpa (known as) Ka-ṭi-shim-bu: it is said that it was erected with the earth and stone left over from Swayambunāth. It is also said that it was brought into self-origination, through the magic power of a siddhā (*grub-thob*), from India. It is known as one containing the hair of Śāriputra's head" (*sa lhag rdo lhag mchod rten | ka ṭi shim bu | 'phags pa shing kun gyi sa lhag rdo lhag la bzhengs zer ba'ang 'dug | rgya gar nas grub thob gcig gi mthus rang byon du phebs pa'ang zer | shā ri bu'i dbu skra gzungs su bzhugs par grags || folio 5-a*). Ka-ṭi-shim-bu is the Kathisambu of Lévi (II, p. 334). This "surplus earth-and-stone stūpa" should not be confused with the one called Tsā-bhel-ko-tsa-yi-te, which is on the road between Kathmandu and Bodhnāth, and is said to have been erected from the left over materials of the Bodhnāth stūpa (cf. *Bal-gnas*, folio 8-b).

²⁴ Mgon-po-gur, also written Gur-gyi mgon-po, "Lord of the Tent", is a Tibetan Buddhist "defender of the faith" (*chos-skyong*). For details on the various forms of this deity, see ODT, pp. 49-52.

²⁵ Phyang-bzhi-pa, literally "The four-handed one", is not listed among the many deities in ODT; however, there is a tantric form of Avalokiteśvara known as Śadaḥṣarī, which has one head and four arms (Antoinette Gordon, *The Iconography of Tibetan Lamaism*, Tokyo 1959, p. 65. Cf. also ODT, p. 480). A form with four arms is also common for Viṣṇu and Śiva (See Daniélou, pp. 234-35 and 333; respectively).

²⁶ Tshogs-bdag (Sanskrit: Gaṇapati), literally "Lord of hosts", is an epithet of Gaṇesa, the son of Śiva. (For details on the forms and accounts of Gaṇapati, see Daniélou, pp. 443-52; cf. also ODT, p. 80).

²⁷ Bla-ma Btsan-po uses the form Ha-nu-mantha (cf. also 'Dzam-gling, pp. 59-60), which is usually only found in compounds, such as Hanumanteśvara. This refers to the monkey god, Hanumat (cf. Lévi, I, p. 330), commonly called Hanuman, who was the indefatigable ally of Rāma, in the epic Rāmāyaṇa. The old royal palace of Kathmandu was called Hanuman Dhoka; taking its name from the large image of Hanuman that guards the main gateway (Landon, I, p. 194).

²⁸ The term *dkar-chag* refers to an index to the various sites, temples, and images of religious importance in a given locality, which serves as a guide-book to pilgrims. (For a brief discussion on this and other types of similar books, see Turrell Wylie, "The Tibetan

have heard it personally from those acquainted (with the place) as well.

In the town of Ye-rang (Patan), there are many benedictory symbols, such as a replica of Rdo-rje-gdan²⁹, an elephant-shaped boulder said to have absorbed Tshogs-bdag (i.e., Gaṇeśa), and a rock said to have been thrown from the peak of Ri 'Bigs-byed by the Teacher (Śākyamuni)³⁰.

In Kho-khom (Bhatgaon), there is (an image of) Sgrol-ma (known as) "The-one-that-speaks"³¹, which is very great in conferring benediction; and there are many temples and symbols, which are known to both Buddhists and non-Buddhists in common as being great in conferring benediction, such as Tsa-ra-ṇa-pa-ta, called Bla-ma Dha-ta-tri³² by the Gau-sān³³.

Tradition of Geography" *Bulletin of Tibetology*, Vol. II - No. 1 (Gangtok, 1965), pp. 17-25). Although Bla-ma Btsan-po refers several times to the *dkar-chag*, he does not specify whether he had access to more than one *dkar-chag* or not. At times, his statements are very similar to those made in *Shing-kung*; however, he presents materials not found in *Shing-kun*, *Bal-gnas*, or the *Bya-rung kha-shor gyi lo-rgyus*; thus, he must have had yet another *dkar-chag* of the Kathmandu valley. On occasion, he refers to statements made by Mnga'-ris Grub-chen about certain things in Nepal, as if he had a *dkar-chag* written by Mnga'-ris Grub-chen. Since none of the three guide-books available to me were written by such an author, it is postulated that Bla-ma Btsan-po relied chiefly on a *dkar-chag* by Mnga'-ris Grub-chen.

²⁹ This replica, known as *Sangs-rgyas stong sku* ("One thousand images of Buddha") in *Shing-kun* (folio 7-1), is called the Mahabuddha temple by Landon and Mahābodhi or Mahābuddha by Lévi (I, p. 194, with a photograph facing). Legend attributes this temple to one Abhaya Raja, who stayed at the Maha Bodhi temple in Bodhgayā (*Rdo-rje-gdan*), and on his return to Nepal, he built a replica of it in Patan (Landon, I, p. 214).

³⁰ The *Ri 'Bigs-byed* refers to the Vindhyā mountain range that runs generally east and west in present day Madhya Pradesh province of India. Although Bla-ma Btsan-po says it was a "rock" (*rdo*) thrown by the Teacher, *Shing-kun* states: "It was a rock-arrow (*rdo mda'*) thrown from the peak of the Vindhyā mountains by the Bhagavat, Śāriputra, and Maudgalyāyana" (*bcom ldan 'das dang shā ri'i bu mo'u 'gal gyi bu rnams kyis ri 'bigs byed kyi rtse nas rdo mda' rgyab pa...* || folio 6-b). *Bal-gnas* refers to it only as "The Buddha stone-arrow" (*sangs-rgyas mdo-mda'*, folio 5-b).

³¹ This image, called Bol-ne Tā-ra, reputedly prophesied that Rje-btsun Mi-la-ras-pa be invited as the King of Bhatgaon (*Kho-khom*) (*Bal-gnas*, folio 10-a).

³² This is the temple called Dattatraya by Landon (I, p. 38) and Dattātreyā by Lévi, who says it was erected by Yakṣa Malla, who died ca. 1480 (Lévi, II, p. 238) (On Dattātreyā, see Daniélou, pp. 280-81).

³³ According to Lévi, "Les religieux errants (Gosāins) qui colportaient les marchandises entre l'Hindoustan et le Tibet..." (Lévi, I, p. 174); however, the original sense of gosain,

At a place about one league (*rgyang-grags*)³⁴ to the northwest of the town of Kathmandu is the huge *mchod-rten* (stūpa) known as Sambho-ga, or as 'Phags-pa Shing-kun³⁵. Various kinds of fruit trees grow on parts of the hill below the *bum-pa*³⁶ (of the *mchod-rten*). (Folio 4-b) (Recessed) into the *bum-pa*, which is very high, are images of the five (Buddhas of meditation), with 'Od-dpag-med as the principal one³⁷. The spire of thirteen disks reaches more than seventy fathoms ('dom)³⁸.

This *mchod-rten* is widely known as the *mchod-rten* Go-ma-sa-la-gandha mentioned in the *Glang-ru lung-btsan-gyi mdo*³⁹ and (also)

or Goswami, was less mundane, for in the sects that worship Kṛṣṇa, the guru is frequently called Gosain. (Eliot, II, pp. 184-85).

³⁴ *Rgyang-grags*, literally "distance of hearing", is the Tibetan equivalent of Sanskrit *krośa*, or *kos*; which is the Indian league. It varies from one and one-half to three miles.

³⁵ 'Phags-pa Shing-kun, literally "The sublime, all-trees", is the Tibetan name for the huge stūpa called Swayambhūnāth, located on top of a low hill about one and one-half miles west of Kathmandu. *Shing-kun* gives the following account of the Tibetan name: "Nāgārjuna cut off his hair and scattered it around, offering up a prayer, saying: 'Let all kinds of trees grow at this sublime stūpa!' and so, all kinds of trees grew densely; thus, it later became known as 'The sublime, all-trees' ('Phags-pa Shing-kun)" (... *klu sgrub kyis dbu skra bcad nas gtor te khyad par 'phags pa'i mchod rten 'di la shing sna kun skye bar shog cig ces smon lam btab pas shing sna kun tshang bar skyes pas phyis 'phags pa shing kun du grags* | folio 4-a). For a description with photographs of Swayambhūnāth, see Landon (I, pp. 197-202), Lévi (I, p. 173; II, p. 3 *et. seq.*), and Snellgrove (pp. 95-98, and plate 13).

³⁶ The *bum-pa* is the hemispheric shaped base of the stūpa. On the architectural design and explanation of a *mchod-rten*, or stūpa, see Waddell (pp. 261-64) and Snellgrove ("The cult of the stūpa", pp. 37-40).

³⁷ 'Od-dpag-med, literally "Measure-less light", is the Buddha Amitābha, who dwells in the western paradise of Bde-ba-can (Sukhāvati). On the names, identifications, and attributes of the five Buddhas, see Waddell (pp. 349-52) and Snellgrove (p. 64 *et. seq.*). On each of the four cardinal points of the compass, a niche is recessed into the hemispheric base of the stūpa. An image of Akṣobhya occupies the niche on the east, Ratnasambhava on the south, Amitābha on the west, and Amoghasiddhi on the north. A niche, slightly smaller than the others, for Vairocana, the Buddha of the center, is placed just to the side of the niche for Akṣobhya on the east.

³⁸ Bla-ma Btsan-po was obviously misinformed as to the height of the spire of circular disks surmounting the stūpa. He says it was seventy 'dom, or fathoms, but that would make it 420 feet high; whereas the actual height is about 120 feet. Elsewhere, Bla-ma Btsan-po gives a hyperbolic measurement for the height of Bodhnāth (see footnote 42).

³⁹ *Glang-ru lung-bstan-gyi mdo* is the Gośṛṅga-vyākaraṇa-sūtra, literally: "The sūtra of the prophecy of Ox-horn", which the Buddha reputedly delivered in the country of Li-yul, or Khotan, in Chinese Turkestan. For a discussion on this text, with a translation

as the *mchod-rten* for the remains of the Buddha 'Od-srung⁴⁰. However, it is difficult to believe these stories, because the Go-ma-sa-la-gandha is in Li-yul (= Khotan) and the remains of 'Od-srung are in India; nevertheless, this *mchod-rten* is still truly great in conferring benediction.

To the northeast of the town of Kathmandu is the *mchod-rten* Bya-rung kha-shor, or Bo-dha⁴¹ as it is known throughout India and Nepal. It is said that each side of that *mchod-rten* is a 'dom (the distance between the finger tips of the outstretched arms) of the deity Tshang-pa (Brahmā); however, I have heard that each side is (only) about one hundred human 'dom in height⁴².

The history of this (*mchod-rten*) is given in a "discovered text" (*gter-chos*) of the Rnying-ma-pa⁴³. Formerly, a poultry herdsman asked a king for land to erect a *mchod-rten*. After the king granted

of it, see F. W. Thomas, *Tibetan Literary Texts and Documents Concerning Chinese Turkestan*, Part I (London, 1935), pp. 3-38.

⁴⁰ 'Od-srung is the Buddha Kāśyapa, who is number six in the list of the seven successive Buddhas, lived in the period of time immediately preceding that of the Buddha Śākyamuni. (Cf. Waddell, pp. 345-46).

⁴¹ This is the stūpa of Bodhnāth located about four miles northeast of Kathmandu on the trade route that goes to Tibet via Sankhu and Nyalam Dzong. For details and photographs of this stūpa, see Snellgrove (pp. 98-100, and plate 14-a), Landon (I, pp. 202-04), and Levi (I, p. 151; II, p. 6 *et. seq.*). This is the "temple of Bouddhama in Kasacheit" of Hamilton (pp. 209, 211).

⁴² Again Bla-ma Btsan-po must have been misinformed about the height of the Bodhnāth stūpa. He says it is about 100 'dom, or fathoms, which would make it some 600 feet high. If Bla-ma Btsan-po had only written descriptions of Bodhnāth available to him, he may have misread *brgya* (one hundred) for *brgyad* (eight), which would be closer to the actual height of the stūpa; however he says "Thus, I have heard" (*ces thos*) and there should have been no confusion between the pronunciation of *brgya* and *brgyad*. In view of his excessive figure for the height of this stūpa and the one at Swayambhūnāth, they should be considered as pious hyperbolisms.

⁴³ A "discovered text" (*gter chos*) refers to a *gter-ma*, a "treasure", which is a text purportedly concealed by a great teacher, such as Padmasambhava, and "discovered" later on. See TPS (p. 109 *et. seq.*) and Waddell (pp. 56-58). Rnying-ma-pa, "The Old Ones", refers to those Tibetan Buddhists who adhere to the teachings of Padmasambhava and are considered unreformed by the other major sects in Tibet (see Helmut Hoffmann, *The Religions of Tibet* (New York, 1961), pp. 50-65). The *gter-ma* referred to by Bla-ma Btsan-po is the *Pad-ma'i bka'-thang* which is reputedly a text "discovered" by O-rgyan Gling-pa in the 14th century. (For a rendering of this text, see Ch. Toussaint, *Le Dict de Padma*, Paris 1933). The account of the founding of Bodhnāth is found in the *Pad-ma'i bka'-thang* on folio 187-a *et. seq.*

the land, the ministers protested; but the king would not listen, and so (the *mchod-rten*) was named Kha-shor (“Indiscreet-mouth”). Before the *mchod-rten* was completed, the mother poultry herdsman died and the remainder was then erected by her three sons. Because of an auspicious prayer offered by them after it was finished, (the sons) obtained rebirth as the three: *Mkhan*, *Slob*, and *Chos* ⁴⁴. Many stories are told, such as how a bullock they possessed was reborn, because of an imprecatory prayer, as *Glang-dar* ⁴⁵.

This (*mchod-rten*) is also described as being one of the *mchod-rten* erected at each of the eight different cemeteries (*dur-khrod*) of the eight Ma-mo of the retinue of 'Jigs-byed at the time formerly when 'Jigs-byed Nag-po ⁴⁶ and his retinue were defeated by 'Khor-lo sdom-pa ⁴⁷. Even though it is assumed that the Indians and the Śrīṣṭha

⁴⁴ These three – *mkhan*, *slob*, *chos* – refers to: (1) *Mkhan-po Śāntirakṣita*, (2) *Slob-dpon Padmasambhava*, and (3) *Chos-rgyal Khri-srong-lde'u-btsan*. It is noted that *Blama Btsan-po* speaks of only three sons in his brief account of the founding of Bodhnāth. This agrees with the number given in the *Deb-ther Sngon-po* (BA, I, pp. 38-39) and the *Padma dkar-po'i Chos-'byung* (folio 99-a), where the three referred to are Śāntirakṣita, Khri-srong-lde'u-btsan, and the minister *Sba Khri-gzher*, who met Śāntirakṣita in Nepal. However, in the full account of this story, the poultry herdsman had four sons, who through the power of prayer were reborn as Śāntirakṣita, Padmasambhava, Khri-srong-lde'u-btsan, and *Sba Khri-gzher*, respectively. (See Toussaint, *Le Dict de Padma*, pp. 238-9). There is a xylograph in forty folios available at Bodhnāth, titled *Mchod-rten chen-po Bya-rung-kha-shor-gyi lo-rgyus thos-pas grol-ba bzugs-so*. It contains the following subjects: (folios 1-b/9-a) account of the founding of the *mchod-rten*, (9-a/17-a) the prayers offered and their fulfillment, (17-a/26-a) the benefits obtained from offerings, (26-a/32-b) consequences should the *mchod-rten* decline, (32-b/38-b) restoration and its benefits, and (38-b/40-a) colophon. A brief summation of the founding of the stūpa based on this xylograph is found in Snellgrove (pp. 98-99).

⁴⁵ *Glang-dar-ma*, also known as 'U-dum-btsan, ascended the Tibetan throne ca. 838 following the assassination of his brother, *Ral-pa-can*. *Glang-dar-ma* began a persecution of Buddhism which resulted in his being assassinated in 842 by a Buddhist monk named *Lha-lung Dpal-gyi rdo-rje*. The death of *Glang-dar-ma* led to schisms in the royal lineage and disintegration of the Tibetan empire.

⁴⁶ 'Jigs-byed Nag-po (*Kāla Bhairava*), “The black fearful-one”, is an aspect of Śiva (*Daniélou*, p. 301). For a description of the various Ma-mo deities, see ODT, pp. 269-73. The account and function of the eight “cemeteries” is mentioned briefly in TPS (pp. 542, 615-note 237).

⁴⁷ 'Khor-lo sdom-pa, *Cakrasamvara*, is a tantric aspect, which became the *yi-dam* of the *Bka'-rgyud-pa* sect. *Tsong-kha-pa* (1357-1419), reformer and founder of the *Dge-*

of Nepal⁴⁸ have a basis for giving some accounts different from those related above; still, not far from this *mchod-rten* is a cemetery lake (*dur-khrod-kyi mtsho*) called *Nā-ga-ta-lā-pa*⁴⁹, on whose shore is a cemetery tree (*dur-khrod-kyi shing*). At a place very near that *mchod-rten*, there is also a cemetery fire (*dur-khrod-kyi me*), called *Agmā-tha*⁵⁰, which from former times up to the present has never died out. (Folio 5-a) Also, from time to time, assemblies of *Mkha'-'gro-ma* (*Ḍākinī*) have been seen in the vicinity of that *mchod-rten* by most of the people there. In view of these various reasons, it is quite proper to refer to it as a "cemetery" *mchod-rten*.

Many relics (*ring-bsrel*) have been obtained on various auspicious occasions from both this *mchod-rten* and the *mchod-rten 'Phags-pa Shing-kun* (*Swayambhūnāth*) by visitors possessing faith. Nowadays, there are many (relics around) said to be the remains of the Buddha 'Od-srung and most of them come from there.

It is said in a *Dkar-chag* ("Guide-book") that at a place about half-a-day's journey north of the town of Kathmandu is the great

lugs-pa sect, also studied the cycle of *Cakrasamvara* according to the Indian *Lui-pa* (*Hoffmann*, *op. cit.*, pp. 142-163).

⁴⁸ *Shriṣṭha*, commonly spelled *Shrestha*, is a caste of Newars. According to *Hamilton*, there are both Buddhists and Śivaites among the *Shresthas*. He wrote (ca. 1819) that "The highest rank of *Shriṣṭhas* are called *Sira*, and are mostly traders. A lower class, called *Sual*, act as porters; and a still lower, called *Bagul*, cultivate the ground". (*Hamilton*, p. 33). It is interesting to note that *Bla-ma Btsan-po*, who wrote his geography of Nepal about the same time that *Hamilton* wrote his book, considered the *Shresthas* to be non-Buddhists, as implied by his statement that they and the Indians have other explanations than the Buddhist do for calling *Bodhnāth* a "cemetery" *stūpa*. *Lévi*, on the other hand, writing ca. 1905, appears to agree with *Bla-ma Btsan-po* that the *Shresthas* were non-Buddhist, because he classifies them as being one of the "castes *ṣāstriyas*" (*Lévi*, I, p. 239).

⁴⁹ The eight cemeteries are marked by a *stūpa*, a tree, a serpent, a lake, and a mountain (cf. *TPS*, p. 542); therefore, *Bla-ma Btsan-po* mentions the tree (*dur-khrod-kyi shing*), the serpent (*nā-ga ta-lā-pa*), which is the name of the lake (*dur-khrod-kyi mtsho*), and the *stūpa*, of course, is *Bya-rung kha-shor*.

⁵⁰ *Agmā-tha* appears to be a mistake for *Agnimat*, meaning: "having a sacrificial fire". No reference to this fire or its name has been found in the sources used; however, a communication from *Dr. Bhuwanlal Joshi*, a native of Kathmandu, suggests that this "cemetery fire" (*dur-khrod-kyi me*) may refer to an eternal fire kept burning at *Vajrayogini* (cf. footnote 61), called the *Bskal-pa'i me* (*Bal-gnas*, 9-b).

mountain known as Ri-bo 'Bigs-byed⁵¹, on whose top is the actual throne of Rgyal-ba Shākya Thub-pa (Jina Śākyamuni); not far from which is a *mchod-rten* for the remains of the father and mother of Shākya Thub-pa; however (such statements) are difficult to believe. Nevertheless, in such (texts) as the '*Dul-ba Lung* (Vinaya-āgama), it states that on the occasion of being defeated by the army of 'Phags skyes-po (Virūḍhaka), some Shākya, who were kinsmen of Kun-dga'-bo⁵², came to Nepal; therefore, it is thought that they erected that (*mchod-rten*) on behalf of the father and mother of Bcom-ldan-'das (Bhagavat, i.e., Śākyamuni).

It is said that there are many marvelous places in that neighborhood, such as a mountain said to be Bya-rgod phung-po'i ri⁵³, a place where a thousand Buddhas of the auspicious age (bhadra-kalpa) are said to have first conceived the thought (to obtain enlightenment), and the place where the mother poultry herdsman, who founded Bya-rung kha-shor (Bodhnāth), is said to have obtained enlightenment. Even though it is difficult to accept these statements as made by Mnga'-ris Grub-chen⁵⁴, these places may still be considered ones that confer benediction.

East of Kathmandu, and between it and the town of Bhatgaon, is a village called De-ba pa-ṭan (Deopatan). There is located a lingam (mtshan-ma), which is known among the twenty-four locations as the

⁵¹ The 'Bigs-byed, or Vindhya mountains, are in India (cf. footnote 30); however, there is the tradition that a mountain north of Kathmandu is called by the same name. Bla-ma Btsan-po places it half-a-day's journey north of Kathmandu and *Shing-kun* puts it northwest of Swayambhūnāth (folio 5-b).

⁵² Kun-dga'-bo (Ānanda) was a cousin of Śākyamuni. They both had the *gotra* name of Gautama (Eliot, I, p. 133) and were closely related within the broader lineage of the Śākyas.

⁵³ Bya-rgod phung-po'i ri (Gridhrakūṭa), "Vulture Peak", is the name of a mountain near Rājagṛha, made famous because of its association with Śākyamuni. Although Bla-ma Btsan-po, *Shing-kun* (folio 6-a), and *Bal-gnas* (folio 2-a) refer to a mountain of the same name in the Kathmandu valley, none of the western sources used mentions it. The man who carved the printing blocks of the *Bal-gnas* was from the monastery of Bya-rgod phung-po'i-ri (cf. *Bal-gnas* colophon, folio 11-a). *Bal-gnas* states that if one comes from India, one arrives first at the monastery of Bya-rgod phung-po'i ri (2-a) and *Shing-kun* places it southwest of Kathmandu (6-a). (On the Gṛdhrakūṭa in India, see Roerich, pp. 87-89).

⁵⁴ See footnote 28.

northern spoke of the wheel of the body (and called) Gri-ha-de-ba-da (Grhadevatā), (Folio 5-b) or, as it is called by the generally known name Nai-pa-la in the *Kyai Rdo-rje'i rgyud* ⁵⁵. It is given as a symbol of veneration of Lha Chen-po (Mahādeva, i.e., Śiva) for the protection of the region of the country of the Newars. (Called) Pa-su-pa-ti-shwa-ra ⁵⁶, it is known to the Tibetans as Gu-lang.

Near there is a symbol of U-ma ⁵⁷ called Kurje-shwa-ri ⁵⁸, and I have heard that there is also a spring there (whose water) tastes and smells like *chang* (Tibetan barley beer).

At a place a little more than one day to the east of Kho-khom (Bhatgaon), there is what is known as the *mchod-rten* for the bones (which remained) when De-bzhin-gshegs-pa Shākya Thub-pa (Ta-thāgata Śākyamuni) made an offering of his body to a (starving) tigress at a time when he was on the learning path in former times. As for that *mchod-rten*, it is not the one which contains the bones of the one who gave his body to the tigress as actually related in such (texts) as the *Gser-'od dam-pa'i mdo* ⁵⁹. However, those who personally achieved

⁵⁵ *Kyai Rdo-rje'i rgyud* refers to the Śri-Hevajra-Mahātantrarājā. This text has been edited and published with a translation and notes. See David L. Snellgrove, *The Hevajra Tantra, A Critical Study*, 2 Vols., (Oxford University Press, 1959).

⁵⁶ Pa-su-pa-ti-shwa-ra (Paśupatiśvara) refers to the *lingam* of Śiva preserved in the temple of Paśupatināth, located on the banks of the Bagmati river about two miles northeast of Kathmandu. A general view of Paśupati is given in Lévi (I, p. 210) and a photo of the temple with the statue of Nandi, the bull (I, p. 359). It is called Pashpati by Landon, who gives a brief description (I, pp. 223-25). Also see Snellgrove, pp. 113-14, and plate 19-b; Kirkpatrick, pp. 188-189.

⁵⁷ U-ma (Umā) is the active, female consort (śakti) of Śiva. Śiva's śakti is known variously as Parvatī, Kālī, or Durgā (cf. Snellgrove, pp. 81-82). The symbol (*rten*) of Umā is a *yoni*; just as a *lingam* is the symbol of Śiva.

⁵⁸ Kurje-shwa-ri is the name of a shrine located about one-quarter of a mile east of Paśupati, across the Bagmati river. It is spelled Guhyeshwari in Landon (I, p. 194) and Guhyeçvari in Lévi, who translates it as "Notre-Dame-du-Secret" (Lévi, I, p. 376 *et seq.*) Bla-ma Btsan-po says a spring there has water that tastes like Tibetan beer (*chang*). It is interesting, therefore, to note the Tibetan name for this place: it is *Phag-mo mngal-chu*, literally "Water of the womb of (Vajra) Vārāhī" (cf. *Bal-gnas*, folio 8-b).

⁵⁹ *Gser-'od-dam-pa'i mdo* is the *Suvarṇaprabhāsottama-sūtra*. It has been edited by Johannes Nobel. See his *Suvarṇaprabhasottama Sutra, Das Goldglanz Sutra*, Erster Band (Leiden, 1944). The story of the Buddha sacrificing his body to feed a starving tigress is told in Nobel, Chapter XVIII, "Stag Moi Leu", pp. 154-74. The Tibetan name of the *mchod-rten* is Stag-mo lus-sbyin ("Giving the body to the tigress") and it is located on

the stage of Buddhahood after embracing the vehicle, which is the basis of enlightenment (*byang-sems*), must have left behind innumerable bodies and limbs during the times (that they) were on the learning path; therefore, the description given by Mnga'ris Grub-chen may still be acceptable.

As for those narratives about the inconceivable difficult deeds performed by our Teacher (Śākyamuni) during the time that he was on the teaching path in former times, which are related in many sūtras (*mdo-sde*) with only an implicit meaning intended – they have been changed into nothing but “deeds of the god of wishes” by some people ⁶⁰.

I have heard that, close to the road going to Nepal from Gnya'nang (in Tibet), there is a village (called) Sam-badzra-dzwa-ki-ni ⁶¹, known as Sam-khu-nā-ra-ni to the non-Buddhists, in which there is a statue of Rje-btsun Rdo-rje rnal-'byor-ma ⁶² that is very great in conferring benediction. Also, there are such things in that vicinity as a grotto of the eighty-four Grub-thob ⁶³ and images.

Namobuddha mountain (*Bal-gnas*, folio 10-b), which is east of Bhatgaon and near the village of Panāvati (Lévi, I, p. 391; Landon, I, pp. 229-30).

⁶⁰ Bla-ma Btsan-po says euphemistically that some people, misled by their own desires and confused by ignorance, consider as real events those deeds related solely for didactic purposes.

⁶¹ Bla-ma Btsan-po states Sam-badzra-dzwa-ki-ni is the name of a village; but, in fact, it is an image of Vajrayoginī, which is housed in a temple sharing the name. It is called Bajrajogini in Nepal (Lévi, II, p. 49). It is spelled Bajra Gogini in Landon (II, p. 200), where Gogini appears to be a typographical error for Jogini. (For further details on Vajrayoginī, see footnote 62). Sam-khu-nā-ra-ni was not found in the works consulted; but since it is the non-Buddhist name for this image, it may be a corrupt rendering of Samkhu Nārāyaṇī, meaning the “Durgā of Sankhu”. The name is spelled Bhujjur-joogni in Kirkpatrick, p. 189.

⁶² Vajrayoginī, the most illustrious of the yoginī deities in Nepal, is worshipped by Buddhists and Śivaites alike (Lévi, I, pp. 380, 388). For a description of this female deity, see W. Y. Evans-Wentz, *Tibetan Yoga and Secret Doctrines*, (Oxford University Press, 1958), pp. 173-175. A color painting of her is found facing page 155.

⁶³ The place of the eighty-four siddhas is identified as Ma-ṅi-tsu-ṭā-sthan in *Bal-gnas* (folio 9-b), which is Maṅicūḍa, or Manichur; a mountain near Sankhu (Lévi, I, p. 329). On the eighty-four siddhas, see A. Grünwedel, “Die Geschichten der Vierundachtzig Zauberer (Mahāsiddhas)”, *Baessler-Archiv*, Band V, Heft 4/5, (Leipzig, 1916).

Not far from the village of N. ya-ko-ṭa ⁶⁴, which is near the road that goes to Nepal after passing through Skyid-grong (of Tibet), there is a pilgrimage place in a mountain hermitage called Gau-sān-sthān ⁶⁵. There, in a pool like a lake, is an image self-originated from stone in the form of a human. (Folio 6-a) Its light-blue colored (neck) is covered by a saffron scarf and it appears to be lying in the supine position with nine cobra heads. Even though it is well known all over India that Indian heretics consider it to be Dbang-phyug (= Śiva) ⁶⁶ and revere it greatly, there are many Buddhists in India and Nepal who do not believe in that image. Moreover, among the Tibetans, who call it Klu gan-rkyal (“Supine nāga”) or Klu gdol-pa ⁶⁷, there are many indeed who do not believe in it at all.

The non-Buddhists tell this story about that (image). “In former times, the gods (lha) and demi-gods (lha-ma-yin), desiring ambrosia, churned the ocean and, in succession, the sun, the moon, Dpal-mo (Kamalā), Rta-mgrin-ring (Hayagrīva), and others came forth. After that, a poisonous creature with nine heads appeared. When they churned (the ocean) further, a full bottle of poison came forth. Fearing injury to the gods if it should fall into the hands of the demi-gods, Dbang-phyug (Śiva) took the bottle of poison and swallowed it. Due

⁶⁴ The unusual orthography *n. ya* ལྷ instead of *na-ya* ལྷ'ལ' occurs twice in the writing of the name Na-ya-ko-ṭa without any apparent reason. In both cases they refer to Nayakot, also spelled Nawakot (see note 15).

⁶⁵ Gosainthan is the name of a high mountain to the northeast of Nayakot (Hamilton, p. 194). There is a lake there known by the name of Gosain Kund, which is the source of the Trisul Gandak river. Below the surface of that lake can be seen a tawny-colored rock, oval in shape, which is identified as Mahadeo, or Śiva (Landon, II, pp. 37-38).

⁶⁶ The description of the image given by Bla-ma Btsan-po fits the one at Bāla-Nīlakaṅṭha, or Bāla-jī (for photograph, see Giuseppe Tucci, *Tra Giungle e Pagode*, Rome, 1953, facing page 4); but, it does not describe the image at Gosain Kund, which is oval shaped and of natural origin (Lévi, I, p. 365). Bla-ma Btsan-po says the image is of Dbang-phyug (Īśvara), which is an epithet of Śiva; as is Mahādeva (Eliot, I, p. 48). The image at Gosain Kund is acknowledged as that of Śiva; however, those at Budhā-Nīlakaṅṭha and Bāla-Nīlakaṅṭha are said to be of Viṣṇu. (See footnotes 76 and 77 for additional details).

⁶⁷ There are various orders of *klu*, or nāgas, and one of them is known as the *klu gdol pa'i rigs* (“the outcast nāga group”). The reason why the Tibetans call this image the “outcast nāga” may be related to the color *blue*. Nīlakaṅṭha means “blue throat” and is an epithet of Śiva, whose throat turned blue when he drank the poison which came from the churned ocean. Blue is also the color of the outcast nāgas (ODT, p. 290).

to the power of the poison, the color of his neck turned blue and his body became inflamed. Unable to endure it, (Śiva) plunged into a cold river in a mass of snow mountains. His reclining figure was then set up at that place by the gods”.

As regards this story, the image is considered to be a natural object of ordinary appearance and (besides) it is actually an image of 'Phags-pa Thugs-rje chen-po⁶⁸. If someone should ask what is the reason for this (last statement); it is because the custom of erecting (images) of Dbang-phyug (Śiva) is not widespread even though there are many heretics who believe in him. Moreover, Thugs-rje chen-po (Avalokiteśvara) possesses many of the characteristics of Phyugs-bdag⁶⁹ and Phyug-bdag (= Śiva) himself is said to be an emanation of 'Phags-pa (Avalokiteśvara) in such (texts) as the *Za-ma-thog-bkod-pa'i mdo*⁷⁰.

Again, if someone should ask why it is known to non-Buddhists as an image of Dbang-phyug; it is because this image existed in 'Dzam-bu-gling (Jambudvīpa) in former times when the Buddha had not yet appeared in the world and, since no one in the world at that time was known as being greater in power than Dbang-phyug, (the image) became known as such to non-Buddhists. In consideration of all this, that (image) should not be identified as a non-Buddhist god. (Folio 6-b).

Furthermore, there are other (images) like that at Bha-dra-nā-tha⁷¹, located on the border between Tibet and the rocky mountain

⁶⁸ 'Phags-pa Thugs-rje chen-po (Ārya Mahākāruṇika) is an epithet of the bodhisattva Avalokiteśvara, who is known to the Tibetans as Sphyan-ras-gzigs.

⁶⁹ Phyugs-bdag, literally “lord of cattle” (Paśupati) is another epithet of Śiva (Daniélou, p. 334).

⁷⁰ This is the Kāraṇḍa-vyūha sūtra, which praises Avalokita as the presiding deity of the universe. A versified edition, called Guṇa-kāraṇḍa-vyūha, gives an account of how Avalokita produced the material world and the gods of Hinduism from his body. Śiva is said to have been produced from Avalokita's forehead (Eliot, II, p. 57). The prose version is said to be the first work translated into the then newly devised Tibetan script by Thon-mi Sambhoṭa. Buddhist tradition in Tibet says this text fell from heaven during the reign of Lha-tho-tho-ri gnyan-btsan (*Padma dkar-po'i chos-'byung*, folio 97-b; *Deb-ther Dmar-po*, Gangtok edition 1961, folio 16-a).

⁷¹ Bha-dra-nā-tha is the Badrinath of modern maps located in the Alaknanda river valley northwest of Nanda Devi.

region of Shi-la-na-gar ⁷², Kai-tār-nā-tha of Wa-ra-nā-si ⁷³, and Ti-la-ka-nā-tha in the region of Mnga'-ris ⁷⁴. Near the village called Bal-po rdzong ⁷⁵, there is one called Pu-ṭa-nī-la-kaṅṭha ⁷⁶, which generally resembles those above. There is also one near the *mchod-rten* 'Phags-pa Shing-kun (Swayambhūnāth) called Bha-lak-nī-la-kaṅṭha ⁷⁷, which generally resembles the other two.

As for the story of these two (Pu-ṭa-nī-la-kaṅṭha and Bha-lak-nī-la-kaṅṭha): "In former times, a king of Nepal, who was quite blinded by sin, went to visit (the image of 'Phags-pa (Avalokiteśvara) at Gau-sān-sthān; but he saw nothing whatsoever. Returning, he asked his

⁷² Shi-la-na-gar appears to be the village of Srinagar downstream from Badrinath on the Alaknanda river. This village is in the Garhwal area; it is not the Srinagar of Kashmir.

⁷³ Bla-ma Btsan-po was misinformed when he speaks of Kai-tār-nā-tha of Wa-ra-nā-si. The place in question is Kedāranātha, or Kedernath, in Garhwal (Landon, II, p. 174). Kedāranātha is another name for Śiva.

⁷⁴ Ti-la-ka-nā-tha is the Triloknath in the Chenab river gorge (cf. Snellgrove, p. 191). Mnga'-ris refers to western Tibet in general.

⁷⁵ Bal-po rdzong is a pure Tibetan name meaning "fort of Nepal". There is no village in the immediate area with the name Bal-po rdzong and one is tempted to equate Bal-po rdzong with Nayakot, which is also spelled Nawakot; i.e., Bal-po = Naya, or Nawa; and rdzong = kot.

⁷⁶ Pu-ṭa-nī-la-kaṅṭha is Budhā-Nilakaṅṭha, "the old Blue-throat". It is the Budha Nilkanth of Lévi (II, p. 394) and the Buda-Nilkantha of Landon (I, p. 45). It is also called Barā-Nilkanth, "the great Blue-throat" (Levi, I, p. 68), which is the Bara Nilkantha of Hamilton (p. 194). The village itself is marked as Nilkant on the map at the end of Hamilton. It lies on the route from Nayakot to Skyid-grong, via the Trisul Gangdak river. The name Budhā, or "old", Nilakaṅṭha is in contrast to the Bāla, or "new", Nilakaṅṭha (see footnote 77). According to Lévi, the name Nilakaṅṭha was given to the image by the king Haridatta. The name, which refers exclusively to Śiva, was inappropriate for the image since it originally is one of Jala-çayana, or Nārāyaṇa, a form of Viṣṇu.

⁷⁷ Bha-lak-nī-la-kaṅṭha is the Bāla Nilakaṅṭha, the "new Blue-throat". In the 17th century, the king Pratāpa Malla had a replica of the image at Budhā-Nilakaṅṭha made at a locale about one and one-half miles north of Swayambhūnāth. This one is commonly known as Balaju, or Balaji (cf. Landon, I, pp. 227-28; Levi, I, p. 368). It is smaller in size than the one at Nilkanth (= Budhā-Nilakaṅṭha) and is called the "new" to distinguish it from the original image. Bla-ma Btsan-po refers to all three images – one each at Gosain Kund, Nilkanth, and Balaju – as being Dbang-phyug (Īśvara); i.e., Śiva. Of course, Nilakaṅṭha ("Blue Throat") is an epithet reserved for Śiva; however, the images at Budha-Nilakanth and Bala-Nilakanth are of the Śeṣa-Nārāyaṇa aspect of Viṣṇu (Lévi, I, pp. 366-68). This is the identification given as well in *Bal-gnas*, which reads; *klu gan rkyal | nā rā yan sthan | bu rā nil kan ta |* (folio 4-b).

ministers the reason why and he heard the ministers relate the story of that image. Even though he went there several times, he still did not see it; so the king commanded his ministers, saying: ‘Summon artisans and order them to reproduce in some other location an image similar to the one at Gau-sān-sthān!’ The ministers then had the image (Pu-ṭa-nī-lā-kaṅṭha) erected at a place near N. ya-ko-ṭa. When the king went to visit this one several times, he still saw nothing whatsoever; so (the image) Bha-lak-nī-lā-kaṅṭha was erected very close to Kathmandu. When the king went to visit this one, he saw the image for the very first time”. Thus have I personally heard from some itinerant monks ⁷⁸.

These three (images) are called by such (names) as Klu gan-rkyal (“Supine Nāga”) and Klu gdol-pa (“Outcast Nāga”) by the Tibetans, who give various reasons for these. The name of that image is called Nī-lā-kaṅṭha by the Indians; but this is not easy for the Nepalese tongue and it is corrupted and pronounced something like Li-lā-kan-cha. Due to the fact that the Tibetans understood Li-lā as *Klu* and kan-cha as *gan-rkyal*, they had no other recourse than to speak of it like that.

I have heard it said that between the two *mchod-rten* (Swayambhūnāth and Bodhnāth) and in their neighborhoods there are images of many deities who have already passed from the world and of those who have yet to pass, such as the Teacher Shākya Thub-pa (Śākyamuni), ’Phags-pa Lo-ki-shwa-ra (Ārya Lokeśvara), Rje-btsun Sgrol-ma (Tārā), Mgon-po-gur (see footnote 24), Rgyal-chen rnam-sras (Vaiśravaṇa), Lha-chen Dbang-phyug (Maheśvara), Tshogs-kyi bdag-po (Gaṇapati), (Folio 7-a) and the Rgyal-po sku-lnga ⁷⁹.

⁷⁸ The story given by Bla-ma Btsan-po regarding the reason why the king of Nepal cannot visit the image at Gosain Kund and Budhā-Nilakaṅṭha differs from the traditional account, which says that after Pratāpa Malla had the image at Balaju made, “Le Vieux Nilakaṅṭha lui apparut alors en songe et l’avertit que si jamais un roi du Népal venait le visiter, ce roi mourrait fatalement d’une mort prompte. Depuis lors, c’est le Nouveau Nilakaṅṭha, Bālājī, qui reçoit aux jours prescrits la visite des rois (Lévi, I, p. 368). (Cf. also Landon, I, pp. 45, 227).

⁷⁹ Rgyal-po sku-lnga, “The five bodies, kings”, refers to Pe-har and his chief attendants. They are: Brgya-byin in the center, Mon-bu pu-tra in the east, Shing-bya-can

At a place near Na-ya-ko-ṭa, there is an image of Bcom-ldan-'das Mkha'-lding dbang-po, called Ga-ru-ḍa Na-rā-nā⁸⁰, which is great in conferring benediction. It is said that turbid water exudes from this (image) from time to time and if a piece of rag is used to wipe it up and then tied about the neck, all of the nāga-diseases (*klu-nad*)⁸¹ can be overcome.

In the neighborhood is a spring in which burns a glimmering flame just like a lamp. Some people say it is a sign of the Khyung (Garuḍa) and some say it is Dbang-phyug (Śiva). There are no details about this other than the statement by Thang-zing that fire flames up from whatever object is thrown into that water⁸².

In a village called Rdō-lā-kha⁸³, which is east of Bhatgaon and close to the road that goes to Nepal after passing through Gnya'-nang (in Tibet), there is an image known as Rgyal-chen 'jigs-sde, or as Mon-pu-pu-tra⁸⁴. There is also a *lha-pa*⁸⁵ there in whom that god resides.

in the south, Dgra-lha skyes-gcig-bu in the west, and Pe-har in the north. (A lengthy discussion and description of the five "kings" is found in ODT, p. 107 *et. seq.*).

⁸⁰ Bla-ma Btsan-po gives the Tibetan equivalent of this image thus: Bcom-ldan-'das (Bhagavat) for Na-rā-nā (Nārāyaṇa), an epithet of Viṣṇu; and Mkha'-lding dbang-po ("One with the power to soar in the sky", or the eagle) for Ga-ru-ḍa (Garuḍa), the eagle, which serves as a mount to Viṣṇu (Lévi, I, pp. 366-67). (Also see Daniélou, pp. 245-47).

⁸¹ Chief among the diseases caused by the nāgas is leprosy. They are also credited with causing abscesses, consumption, ulcers, itch, sores and the swelling of limbs (ODT, p. 291).

⁸² Thang-zing refers to Hsüan-tsang, the Chinese Buddhist pilgrim who traveled to India in the 7th century. An account of his travels was compiled under the title of *Hsi yü chi* ("Record of the Western Countries"). (A résumé of this work was written in Tibetan by Mgon-po skyabs, author of the *Rgya-nag chos-'byung*, under the title *Chen-po Thang-gur dus-kyi rgya-gar zhing-gi bkod-pa'i dkar-chag*). In the section on Nepal (Chinese: Ni-po-lo) it says: "Southeast of the capital city, there is a small pond. If one touches fire to it, the water gives forth flame. Moreover, whatever objects are thrown into it, they also change and become afire" (*Daitō saiiki ki no kenkyū*, Vol. I, Tokyo/Kyoto, 1942, p. 572). (Also see Lévi, I, p. 155). The Chinese name for the locale of this pond is given by Wang Hsüan-ts'e as A-ki-po-li (Lévi, I, p. 158), for Ankhe Pokhri, which Landon identifies with Ankhe Daha near Harisiddhi on the road to Godavari (Landon, I, pp. 228-29).

⁸³ Rdō-lā-kha is Dolakhā, also spelled Dolkha, outside the valley about 24 miles east of Kathmandu.

⁸⁴ Mon-pu-pu-tra is the "king of the body" among the "five kings" (see footnote 79) and he occupies the eastern quarter (ODT, p. 109).

⁸⁵ Lha-pa, literally "god-one", is a term applied to a medium, who becomes possessed

There are many images of that god throughout Nepal and the one located at this place is known as being very terrifying (in appearance).

On the border between Nepal and Gnya'-nang (in Tibet) is the hermitage of Rje-btsun Mi-la⁸⁶, and at a place near that are found prints of his own hands and feet.

At a place near the village of Tsam-khu⁸⁷ is the hermitage of Pha-dam-pa⁸⁸, where prints of his own body, hands, and feet are found.

Southwest of the village of Patan and not far from Sthān-ko-ṭa (Thankot), there is a very terrifying image of Ma-gcig 'Dod-khams bdag-mo, called Dakṣi-na kā-li⁸⁹. Also there is the hermitage of the great teacher Padma-kā-ra, which is called Yang-le-shod, and two lakes, where dwell the white and black Nāgas (klu dkar nag)⁹⁰. There are many other marvelous places and symbols there. All this is stated in the *Dkar-chag* ("Guide Book") and I have also heard it in the words of those who have visited there.

by a god (*lha*) and thus becomes an oracle. This and other related matters are discussed in some detail in the chapter on Tibetan oracles in ODT (p. 409 *et. seq.*).

⁸⁶ Rje-btsun Mi-la-ras-pa (1040-1123), the beloved hermit-poet and *guru* of the later Bka'-rgyud-pa sect, was born in the general region of Gnya'-nang. For the story of his life according to his biography, see Evans-Wentz, *Tibet's Great Yogi Milarepa* (Oxford University Press, 1951). The hermitage referred to in the text may be the "Stomach-cave" (*Grod-phug*), one of Mi-la-ras-pa's favorite retreats.

⁸⁷ The spelling Tsam-khu indicates an original Nepalese name beginning with the consonant *c*; thus, the name should be Cam-khu. It may well be the Caṅgu temple north of Bhatgaon, which is famous for its image of Caṅgu Nārāyaṇa (Lévi, I, 366 *et. seq.*) or also Changoo-nerain (Kirkpatrick, p. 189); however, lacking any additional details from Bla-ma Btsan-po about Tsam-khu, its identification with Caṅgu should remain tentative.

⁸⁸ Pha-dam-pa was the Indian *guru* who introduced the Zhi-byed teachings into Tibet in the 11th century. He died at Ding-ri in 1117. For an account of his life, teachings, and disciples, see BA (p. 867 *et seq.*).

⁸⁹ Dakṣiṇa-Kālī, the Kālī of the South, is the patroness of the village of Pharping (Landon, II, pp. 4-5). She is one of the four major forms of Kālī in Nepal (Lévi, I, p. 379).

⁹⁰ Bla-ma Btsan-po associates the teacher Padma-kā-ra with Yang-le-shod; however, *Bal-gnas* says: "Yang-le-shod (or) Seg Nā-rā-yan-sthan, is the great place on the Pharping road where the Second Buddha, Mahāguru (= Padmasambhava) subdued gods and demons" (*yang le shod | seg nā rā yan sthan | phar ping gi lam na | sangs rgyas gnyis pa mahā gu ru lha srin ma būd btul ba'i gnas chen | folios 7-a & 7-b*). The *Seg Nā-rā-yan-sthan* of *Bal-gnas* refers to the temple of Śeṣa Nārāyaṇa in Pharping, which is called *Sikh Narayan* by the people there (Lévi, II, p. 400).

Southward from there are the very high mountains called Tsandra-ki-ri⁹¹. Ascending those, one comes to the large, ruined village called Tsi-ti-lam⁹². Heretics (mu-stegs-pa) say that this was the place where (the following story took place): “ In former times, shortly after the decline of the Bskal-pa rdzogs-ldan (period)⁹³, (Folio 7-b) the demi-god (lha-ma-yin) called He-ma-pa-ti, or Ri-dbang, was a king in that village. When making invocations and offerings to many gods, he did not invoke Dbang-phyug chen-po (Maheśvara; i.e., Śiva). Ri-dbang had a daughter named Ri-skyes-ma, who said to Ri-dbang many times, ‘ Father, among the gods, the one called Lha drag-po (“ The Fierce God ”) is very great in power; therefore, it is inauspicious if you do not invoke him ’. She told (her father) many things, such as how she herself would become the spouse of that god. Demi-god Ri-dbang did not like Lha drag-po; but, because he could not make his daughter change her mind, he appointed a messenger and sent him to invoke and make offering to Dbang-phyug. However, the latter (Śiva) knew that it was an unwilling invocation, so he transformed himself into an old brāhman with a very ugly body. He smeared his naked body with the ashes of human bones and loosed his hair. Holding in his hands a three-pointed trident (kha-ṭam) marked with three things: a human skull, a small drum, and an old dried human head; and a rosary of human heads threaded on human entrails, he mounted a bullock. Assuming the appearance of a madman, he came; (but) Ri-dbang was extremely displeased and said: ‘ You took too long to come! ’ (Ri-dbang) then assigned him to the last rank of the gods. Lha drag-po became furious. Without saying a word, he flashed his third eye, which bulged with jealousy. When he looked with his evil eye, the offering

⁹¹ These are the Chandragiri mountains which form the south boundary of the Kathmandu valley. The main peak just southeast of Chisapani Garhi is 8297 feet in elevation. For an account of the name of these mountains, see Hamilton (p. 204).

⁹² Tsi-ti-lam is the Chitlong of modern maps. Bla-ma Btsan-po must have been misinformed when he wrote that it was a village in ruins (*grong-khyer gog-po*). Neither Lévi (II, pp. 314-15) nor Hamilton (p. 204), who visited there personally, mentioned any “ ruins ”. In fact, Hamilton commented that it was “ well built ” (*loc. cit.*).

⁹³ Bskal-pa rdzogs-ldan is the first of the four Buddhist ages. It is characterized as “ Having perfection ” (*rdzogs-ldan*): in Sanskrit, Satyayuga.

temple, together with the remains of the offerings and many of Ri-dbang's retinue, were destroyed by fire. Ri-dbang himself began to burn. Frightened, he offered his daughter Ri-skyes-ma to Lha drag-po and beseeched him to put out the fire. Lha drag-po was then satisfied and extinguished the fire. Then, leading the goddess (lha-mo) Ri-skyes, he went away".

Regardless of whether this story is true or not, I have heard it said that even nowadays a serious epidemic fever called 'au-la⁹⁴ breaks out repeatedly among the people of that area.

If one goes about a day's journey southward from that old village, after crossing a narrow ledge-path called E-ka-damṣḍa⁹⁵, one arrives at some small communities called Tā-ma-khān⁹⁶. (Folio 8-a) If one then goes a little to the south of there, one arrives at the great mountain called Bhi-ma-phe-ta in the language of India and called Ci-sa-pa-ni by the Nepalese⁹⁷. Although it is not very high (compared with other mountains) in Nepal, it is very high for India. A Nepalese guard is stationed on the top of that mountain, and up to there (the land) belongs to Nepal⁹⁸.

⁹⁴ Commonly pronounced *aul*, 'au-la is the name of a strong form of malaria. It is rendered as *olla* in Lévi (I, pp. 121, 128).

⁹⁵ E-ka-damsḍa is the Ekdunta of Kirkpatrick (p. 61), who described the path as being no wider than two feet and leading along the east face of Ekdunta hill, with a precipice of a hundred feet down to the Markhoo-Kola river (Kirkpatrick, pp. 63-64).

⁹⁶ Tā-ma-khān is the Tamra Khani of Landon (p. 203), the Tamba Khani of Landon (I, pp. 176-77), and the Tāmbā Khāni of Lévi (II, p. 244). It is well-known as being the location of considerable deposits of copper. According to Kirkpatrick (p. 62), Tambeh-kan is also called Kowli-kan.

⁹⁷ Bhi-ma-phe-ta is the village called Bhimphedi on modern maps. For descriptions, see Landon (I, pp. 177-78), Lévi (II, pp. 312-12), and Hamilton (pp. 199-200). Cisapani, the name of the mountains and the pass, is said to derive from a spring near the pass, which gives *cold water*, i.e., "chisapani" (Hamilton, p. 201). Lévi, who spells it Sisapani, says the pass of Sisagarhi was 6500 feet in elevation (Lévi, II, 314).

⁹⁸ Bla-ma Btsan-po refers to the fort of Cisapani, also spelled Chisapani, which is marked Chisapani Garhi on modern maps. For details on the fort, see Hamilton (pp. 201-2), Lévi (II, p. 313) and Kirkpatrick (pp. 53 ff.). Bla-ma Btsan-po states that the fort of Chisapani marked the southern limit of Nepalese territory; however, the boundary was about forty air miles farther south. The distance by foot from the East India Company's boundary near the Bera river to Chisapani, via Bichhakor and Hethaura, was about sixty miles (Hamilton, pp. 195-201).

There are many groups of people among those of Nepal besides the true Newars (Bal-po), such as those who are of Indian and Tibetan lineage and those who belong to Klo-pa⁹⁹ and Mon-pa¹⁰⁰ groups. Among those people, the Newars are Buddhists (nang-pa) in general and Mahāyānists (theg-pa chen-po) in particular. Many among the latter are devoted to *Rnal-'byor bla-med*¹⁰¹. Furthermore, most of the people of such groups (rigs) as the Go-bāl¹⁰², Banṭa¹⁰³, U-tā si¹⁰⁴, and Dza-ya-si¹⁰⁵, have adopted the Ḍākinī-tantras (*Mkha'-'gro-ma'i rgyud*) with Rje-btsun Rdo-rje rnal-'byor-ma as the main one¹⁰⁶. Consequently, many yogis have appeared there in former times who achieved realization, such as Pham-mthing-pa and his brother¹⁰⁷, and Bal-po Padma-badzra¹⁰⁸. Even nowadays, it is assumed that there

⁹⁹ In the Tibet section of his geography, Bla-ma Btsan-po says that the Abor hills region of northeastern Assam is the land of the Klo-pa (*'Dzam-gling*, p. 98).

¹⁰⁰ Mon-pa, as used here by Bla-ma Btsan-po, is a generic term for Indo-Mongoloid ethnic groups as distinguished from the Bhotias (Tibetans) and the Indo-Aryans. In the Tibet section, the area of northern Assam just east of Bhutan is designated as the land of the Mon-pa (*'Dzam-gling*, p. 119).

¹⁰¹ Rnal-'byor bla-med (Anuttarayoga) is the highest of the four classes of yoga. It involves the teachings of "psycho-physical reintegration of personality through sexual symbolism" (Snellgrove, p. 202 *et. seq.*).

¹⁰² Go-bāl is the Gubal (also spelled Gubhar-ju, Gubāhāl, and Guru-bhāju,) the highest of the Buddhist class called the Bandyas (Banras), or bonzes (Lévi, I, p. 240).

¹⁰³ Banṭa refers to the Bandyas (cf. preceding footnote).

¹⁰⁴ U-tā-si is the Udas caste, which is divided into seven sections. The Uda, the highest of the seven sections, were merchants who controlled trade with Tibet and Bhutan (Lévi, I, p. 241).

¹⁰⁵ Dza-ya-si appears to refer to the Jaisi, or Josi, whom Lévi lists as one of the vaiśya castes (Lévi, I, p. 239).

¹⁰⁶ The Ḍākinī-tantra refers to those based upon sets of yoginīs. These tantras, reputedly revealed by the ḍākinīs, relate to the sexual symbolism employed in the anuttarayoga tantras (cf. Snellgrove, pp. 203-4). On Rdo-rje rnal-'byor-ma (Vajrayoginī) see footnotes 61 and 62.

¹⁰⁷ Pham-mthing-pa, a Nepalese also called A-nges-pa chen-po, had three brothers: Dharmamati, Dus-'khor-pa, and Thang-chung-pa. Pham-mthing-pa's remains are said to be preserved at Lo-chia-t'un near Lan-chou in Kan-su (BA, pp. 227, 380 *et. seq.*). According to *Bal-gnas*, the Pham-mthing Rdo-rje rnal-'byor-ma is the same as the Phar-ping Vajrayoginī and it is similar to a symbol of the tutelary deity of the siddha Pham-mthing-pa (folio 7-b).

¹⁰⁸ Bal-po Padma-badzra may be the Padmavajra listed as one of the lineage of the Guhyasamāja-tantra (BA, pp. 362-63), the tantra in which Pham-mthing-pa was particularly learned (BA, p. 227).

are one or two who practice the secret teachings and who have achieved realization.

The Gorṣa¹⁰⁹, and others of Indian lineage, are nothing but non-Buddhists who accept such great deities as Dbang-phyug (Śiva) as their refuge.

Also, in that country there are those known as Dzo-ki (= Yogi), who accept the Tantras (*gsang-sngags*) according to their sounds (i.e., they take them literally). They adorn their bodies with the five signs (*phyag-rgya lnga*)¹¹⁰ and they carry a drum, a skull, and a trident (*kha-ṭam-ga*) in their hands. These belong to an heretical group. Thus have I heard.

Even though there are heretics, such as the Kun-tu-rgyu¹¹¹ and Tshangs-spyod-pa¹¹², and Gorṣa (Gurkhas); as well as many who have accepted initiation, such as the two communities of yogins – Buddhist and non-Buddhist – still, except for one or two people who are of that country itself, it is said that most of them are ones who came from India.

The Mon-pa, such as the Ghu-rin¹¹³, and most of those related to Tibetans by lineage, such as the Thag-pa¹¹⁴, who belong to that

¹⁰⁹ Gorṣa refers to the Gorkhas, or Gurkhas, whose name derives from that of their village, Gorkha, some sixty miles west-northwest of Kathmandu. Under the leadership of their ruler Prithvi Narayan, the Gurkhas conquered the Kathmandu valley in 1769. For a brief summary of that conquest, see Landon (I, pp. 50–67) or Tucci, *Tra Giungle e Pagode* (pp. 11–12). Bla-ma Btsan-po states the Gurkhas are of Indian lineage, which they are (see footnote 22), since they trace their ancestry to the Rajputs of Chitor.

¹¹⁰ The five signs (*phyag-rgya* = *mudrā*) are a crown, ear-rings, necklace, bracelets, and a girdle (Snellgrove, *The Hevajra Tantra*, I, pp. 11, 58). These five are symbols of Akṣobhya, Amitābha, Ratneśa, Vairocana, and Amogha, respectively, in the *Hevajra* (cf. Snellgrove, *op. cit.*, p. 64).

¹¹¹ Kun-tu-rgyu (*āgāmuka*), literally “going everywhere”, refers to itinerant monks, who have no fixed residence, but wander *ad libitum*.

¹¹² Tshangs-spyod-pa, literally means “one who behaves in a pure manner”; thus a holy man.

¹¹³ The Ghu-rin are the Gurungs, one of the Mon-pa, or Indo-Mongoloid groups, in Nepal. According to Landon, the Gurungs are divided into four major classes: Ghali, Gotani, Lama, and Lamachine (Landon, II, pp. 242–44).

¹¹⁴ Thag-pa refers to the Thakalis, who live in the Muktinath district of western Nepal. Their language is a related Tibetan dialect (Tucci, *Tra Giungle e Pagode*, pp. 59, 66–67).

country (of Nepal) itself, are inclined to Bon ¹¹⁵ (Folio 8-b) and to those Tantras translated in the early (period) ¹¹⁶. There are some, however, who follow the doctrines of the Bka' ¹¹⁷, Dge ¹¹⁸, and other (sects).

Also, there is a Mon-pa group called Mā-kra ¹¹⁹ and a Kla-klo group called Kha-si ¹²⁰ in that country, who are neither Buddhists nor non-Buddhists (i.e., Hindus). They are just like the Kha-khra Klo-pa ¹²¹.

Due to the influence of the country and associations (where Buddhism and Hinduism exist side by side), it is assumed that there are one or two there who believe in both Buddhist and non-Buddhist (teachings).

¹¹⁵ Bon is the Tibetan name for the pre-Buddhist shamanistic religion in Tibet. It is characterized by the worship of spirits of the sky, the earth, and the underworld, many of which have been adopted into the Tibetan Buddhist pantheon (see Helmut Hoffmann, *The Religions of Tibet*, New York 1961, pp. 13-27 and 84-110).

¹¹⁶ The early period refers to those tantras which were translated into Tibetan prior to the persecution of Buddhism in the 9th century. Many of these tantras, although practiced by the Rnying-ma-pa, are rejected as unorthodox by the other sects in Tibet.

¹¹⁷ This refers to the Bka'-rgyud-pa sect, founded formally by Dwags-lha Sgam-po-pa (1079-1153), which perpetuates the teachings of Ti-lo-pa and Na-ro-pa, as brought to Tibet by Mar-pa of Lho-brag (1012-1097). (For details on the development of the Bka'-rgyud-pa, see Hoffmann, *The Religions of Tibet*, pp. 140-57).

¹¹⁸ Dge refers to the Dge-lugs-pa sect, commonly referred to as the Yellow Hat sect. It was founded by the great reformer Tsong-kha-pa (1357-1419) and eventually rose to political supremacy under the rule of the Dalai Lamas. (See Hoffmann, *op. cit.*, pp. 160-82).

¹¹⁹ Mā-kra refers to the Magars, who like the Gurungs, are called Mon-pa by Bla-ma Btsan-po. Landon says the Magars are divided into six chief tribes: Ale, Pun, Rana, Burathoki, Gharti, and Thapa (Landon, II, pp. 243-44). Lévi says the Magars entered into Nepalese history in the 14th century and that their origin is clearly Tibetan (Lévi, I, pp. 276-78).

¹²⁰ Kha-si refers to the Khas, a group which claims descent from Indian people. Their language Khaskura is related to Hindi (Landon, II, pp. 241-42). For details on their origin and role in Nepalese history, see Lévi (I, pp. 26-67, 276 *et. seq.*) Bla-ma Btsan-po classifies the Khas as a Kla-klo group. Kla-klo (Sanskrit: mleccha or yavana) i.e., "one of indistinct speech". Elsewhere in his geography, the lama uses the term *kla-klo* when referring to Moslems (cf. 'Dzam-gling, pp. 67, 125 - footnote 93). Since the Khas were said to be Hindus, it appears Bla-ma Btsan-po was misinformed as to their religious or ethnic origins.

¹²¹ The Kha-khra Klo-pa are mentioned by the Bla-ma Btsan-po as living in the general region of the holy mountain Rtsa-ri ('Dzam-gling, pp. 95, 178 - footnote 583). Bla-ma Btsan-po implies that they are devoid of any religious teachings whatsoever.
