THE MONASTERIES (BAHA AND BAHI) OF PATAN

A CONTRIBUTION TOWARDS THE CULTURAL TOPOGRAPHY OF A NEWAR TOWN

NIELS GUTSCHOW AND HEMRAJ SHAKYA

This contribution does not aim at providing an understanding of the historical growth process of Patan. The history of Patan is as obscure as that of any other Newar town. It is only now that we have started drawing conclusions from details of urban ritualism, implying that certain notions of space could be utilised as evidence which until now was of interest to an anthropologist only.

With processions as well as the underlying concept of the town plan of Patan - the four stupas (New. thudo) "guarding" the cardinal points of the compass have been dealt with recently. It might therefore suffice to recall that nothing is known about the age of the stupas - their outer appearance providing no hint whatsoever at dating them earlier than the 16th century. Analysing the map of Patan, however, we come to some conclusions concerning the growth pattern of the town. An early phase of development is characterised by a diagonal road still leading from Nugah in southeast to Tapahiti in northwest. The road follows the contour lines high above the banks of the Bagmati (see fig. 1). The same type of spatial organisation characterizes the latest phase of development: a diagonal road leads from Nakabahi to Patan Dhoka, providing a direct link to Kathmandu.

Following the early stage of development for which stands the diagonal road linking several small hamlets, we come across an oriented street-crossing. The elements of this street-crossing point towards Konti (north) with the Kumbheśvara/Sarveśvara and towards Thati (south) with Matsyendranath as well as Balkumari in the east and Puco in the west. It was the impact of this street-crossing which characterized further development and from which a grid-like street pattern emerged. It may be noted that the crossing deviates by 24 degrees exactly from the north. No explanation has been found so far for this deviation.

We assume that it is only during the third stage that the present day street-crossing, oriented towards the four stupas, came to dominate the basic pattern of the town. Although we are not in a position to locate the early palaces $(darb\bar{a}r)$ of Patan, we see a developing centre located in the southeastern sector right at the intersection of the street-crossing towards the end of the 16th century.

We are inclined to believe that the basic change in pattern, i.e. the significant shift from the first to the second street-crossing, one block to the east and south, occurred around the beginning of this millennium.

It is, however, the reign of Siddhi Narasimha (1618-1658, Nepal samvat 738-778) we would like to concentrate on with the following remarks. Under Siddhi Narasimha, Patan reached an early height of cultural development in comparison with Kathmandu and Bhaktapur. The king institutionalized a hierarchic order of the existing monasteries and the new ones built during his rule. A chronicle (vamsavali) tells us of an extension of Patan and of a translocation of an existing baha for the purpose of extending the palace.

Moreover, we have an account 6 mentioning a lot of temples in altogether 37 localities (Nep. tol) of Patan. All this leads us to assume that the basic pattern of Patan had already fully developed in the middle of the 17th century.

Let us now talk about the pattern of distribution of monasteries (maha-vihara) and branch monasteries (vihara) which so well determine the cultural, social as well as spatial pattern of Patan.

Today we can count altogether 156 monasteries. Of these, 148 are located in Patan proper and the remaining eight in villages (Capagaum No. 41, Baregaum No. 154, Cobhar No. 39 and No. 156, Pharpin No. 151, Bumgamatī No. 42, and Kirtipur No. 40 and No. 155 - the numbers referring to fig. 2) which belonged to the former domain of the Kingdom of Patan during the reign of the later Malla Kings (16th - 18th centuries). The two monasteries of the western suburb Puco are counted under Patan proper. It should be noted that it was Siddhi Narasimha's plan to extend Patan up to Puco. 7

Of the 156 monasteries, 18 are still counted as the main ones $(mah\bar{a}vi-h\bar{a}ra$ or $b\bar{a}h\bar{a}$; mapped in fig. 2 with full names) whereas 32 are secondary monasteries $(mah\bar{a}vih\bar{a}ra$ or $bah\bar{i}$; mapped in fig. 2 with circles around numbers). The remaining ones are branch monasteries $(vih\bar{a}ra$ or $kacab\bar{a}h\bar{a}$)

The main difference between the monasteries is centred on the right of initiation. The 18 main bahas have the right to initiate Vajracarya - the highest caste group among the Buddhist population, usually referred to as priests - as well as Sakya. The 32 bahis, however, have the sole right to initiate Sakya. The branch monasteries do not have any right of initiation.

The striking information the chronicle provides is the order of hierarchy and precedence, which was kept nearly unchanged until now. Only 12 of the 18 bahas of today existed when Siddhi Narasimha set the rules for the election of the heads (nayks) of the baha and the order of precedence. Among these, Yacchubaha (No. 130), Subaha (No. 138), Cukabaha (No. 36), Ukubaha (No. 2) and Gujibaha (No. 17) had a head who presided over the chiefs of these five bahas. It should be noted that all these bahas are located in the southeast of the town.

The newly established bahas were named as Ombaha (No. 124), Jyobaha (No. 127) and Dhumbaha (No. 110), all located in the northeastern sector of the town. Of those bahas in the villages Cobaha (No. 39) in Cobhar and Kyapubaha (No. 40) in Kirtipur were counted among the 18 main bahas. The chronicle thus counts 17 bahas as the leading ones. Sibaha (No. 74) was established only after the rules were set by Siddhi Narasimha. It was thus left to the succeeding kings to provide the right of initiation to Sibaha.

Yet the order of the 15 bahas is still observed in the performance of certain rituals. Picture 5 shows 150 "ajus" (eldermen) being offered the "five offerings" (pancadan) by a certain Siddhiraj Sakya of Nagbaha in the courtyard of Akibaha on the occasion of a family event. Each of the 15 bahas sends 10 ajus to take part in that ritual. Thus we see that although the right of initiation was given to two bahas outside the town as well as to the one that was later established, certain activities were confined to those 15 bahas which existed during the reign of Siddhi Narasimha.

Among the most spectacular spatial manipulations we have to consider the translocation of the Habbaha from the present side of the palace towards the quarter of Gabaha. Even now a special ritual reminds us of that manipulation thus providing an idea of how precarious the transformation of a given ritual infrastucture must have been. Legend has it that the Habbaha was founded at the site of a rivulet. When fire was seen above that rivulet it was taken as an auspicious sign to build a monastery. Fire and water are symbols of worlds above and below earth, thus defining a sacred place of communication between this world and

that of the gods.9

Even now, during the month of Gunla - the holy month of the Buddhists, corresponding to August of the Gregorian calendar - a massive square-shaped copper vessel, embellished with a Buddha image, is placed right in front of the main entrance of mulcok, the most important place within the palace. This vessel seems to aim at reconciling history. Space had been transformed - yet preceding conditions seem to convey certain qualities of space. In a way we have to believe that a given spatial order is ritually unchangeable. Therefore, if any change, i.e. any manipulation changing a religious environment, takes place, a ritual is needed for reconciliation with the gods or powers concerned.

Of the former 148 monasteries only a few are now in good state and very few still function as a monastery, the most active of them being Kvā-bāhā (No. 104). Some bāhās are hardly traceable like Kontibāhā (No. 106) and Kanibāhā (No. 149). Some bāhās have preserved only the Buddha shrine (Kinubāhā, No. 43; Jyāṭhābāhā, No. 14) whereas others - like Ubāhāgathica (No. 2), Ukubāhāla (No. 1), Būbāhā (No. 60), Gābāhā (No. 59) or Kvābāhā (No. 104) - still play an active role in the ritual life of Patan. Some bāhās have been converted into predominantly Hindu shrines, leaving no trace of the former monastery, e.g. Sīkabahī (No. 153), the place of which is now occupied by the piṭha of Cāmuṇḍā, one of the eight mother goddesses (Aṣṭamātṛkā) of Patan.

NOTES

This paper is part of an extensive survey of the Newar towns of the Kathmandu valley, which was made possible by a grant of the GERMAN RE-SEARCH COUNCIL. The former monasteries of Patan were traced in March 1974. This paper aims at nothing more than providing dates. A historical view of the topography of Patan is still missing. The transscription of the list was made with the help of Mr. Thakurlal Manandhar and Dr. Michael Witzel. Thanks to their encouragement the manuscript was finished in december 1977.

FIGURES AND PLATES

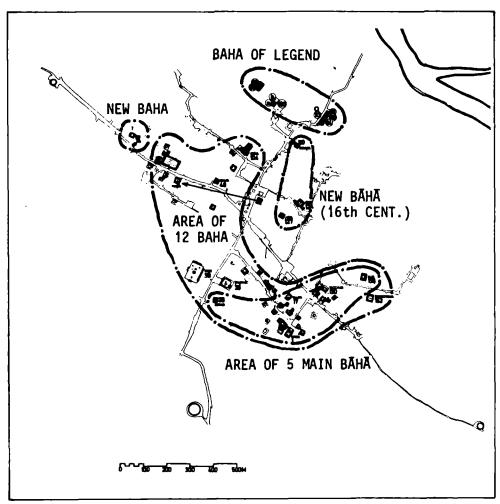

PATAN

Built up area in 1970. A street cross (18 degrees difference from the right angle) , defined by 4 stupas underlies the town-plan. The square (Thyakabaha 4 by 4 m) or rectangular (Būbāhā 60 by 34 m) coutyards of the monasteries fit very well into the grid-like pattern of the streets.

PĀŢAN

Of the 156 listed monasteries of the former domain of PEtan 146 are situated in Patan proper, 2 in the western suburb of Püco (nep. Pulcok) and 8 in willages west and south of the town.

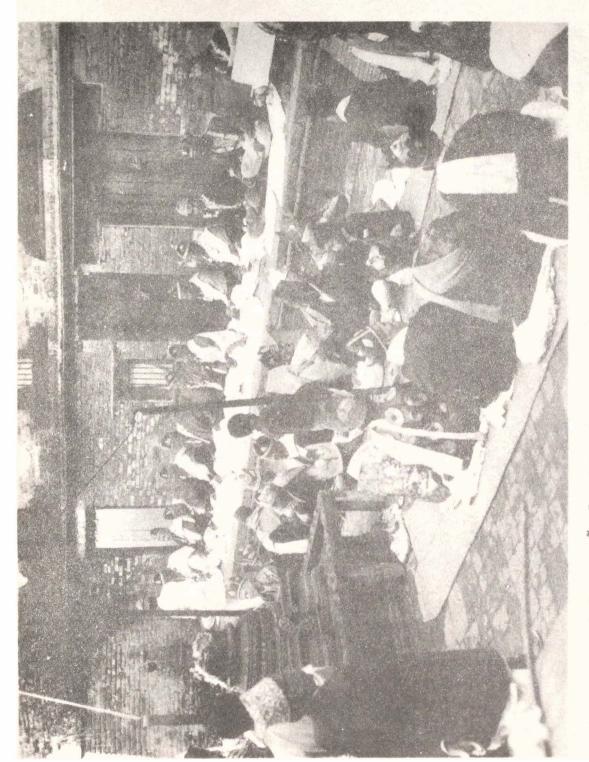

3

PĀŢAN

Not much is known about the historical topography of Pāṭan. During the reign of Siddhi Narasiaha however 12 existing and 4 newly founded monasteries (mahāvihāra) were cited. A transfer was done (Haḥbāhā) to enable the king to enlarge his palace.

4. Patan: Air view of Ikhalakhu, the main square of one of the 24 quarters (Nep. tol, New. tva) of Patan at the intersection of two streets parallel to the street-crossing which underlies the town-plan. Around the square with its Bhairava, Gaṇeś and Jagannath temple as well

Patan : pancadan (giving five offerings) is performed in the court-March 1974. on 26th of Akibaha (No. 84 on the map)

LIST OF THE MONASTERIES

List of the 156 bahas of Patan and the domain of Patan. The 18 main bahas are italicized in full length, whereas the 32 bahis are only partially italicized (mahavihara). The other 106 babas are so-called kacabahas or branch monasteries (vihara).

Two of the 18 main bahas and six of the 32 bahis are located outside Patan proper within neighbouring villages.

SANSKRIT-NAME

NEWARI-NAME

1.	Omkulišri Rudravarņamahāvihāra	Ukubāhāla
2.	Khandacukavihara	Ubahagathica
3.	Purnacandravihara	Dunebaha
4.	Jayativarnavihara .	Jatibaha
5.	Omkulimahavihara	Ubahabahi
6.	Bodhimandapavihara	Mahabauddha
7.	Dhanavajravihara	Ghanandabaha
8.	Hiraņyalābhavihāra	Bhajudhanabaha
9.	Ratnalabhavihara	Bhimarajabaha
10.	Rupavarņavihāra	Nagubaha
11.	Ikṣavihāra	Ichembaha
12.	Dhanavirasimhavihara	Dhanabaha
13.	Vasuvarņavihāra	Basubaha
14.	Padmavarņavihāra	Jyathabaha
15.	Dinavarnavihara .	Hiţiphusabaha
16.	Amrtavarņavihāra	Takabaha
17.	Vaişņavarņamahāvihāra	Gujibaha
18.	Bhaskaravarņavihāra	Siddhibaha
19.	Sthavirapatramahavihara	Thapābah ī
20.	Samant&bhadravihara	Palubaha
