## INTRODUCTION

Nineteenth Century saw the amassing of historical and archaeological evidences to reconstruct the history of the sub-continent. Numismatical studies initiated by great archaeologists and Indologists like Marsden, Sir A. Cunningham, V. Smith, Dr. Hoernle, Prof. Rapson and Sylvan Levi culminated in micro studies like the paper "The coinage of Nepal" of E.H. Walsh first published in JRAS in 1908. Instead of the comprehensive treatment of the coins of the museums or of the sub continent here is a book that treats the coins of the ancient kingdom of the Himalayan valley as an exclusive subject of study. He divides the coinage of Nepal into three groups: of the ancient Lichavis, the Newar Malla dynasties and the third the Gorkha dynasty since 1768. Each of the three groups has its own inspiration. Contrary to the popularly held opinion that the Lichavi coinage was inspired by the Kushana experiment as suggested by D.W. Mac Dowall, Walsh argues unequivocally that the inspiration is unmistakably Gupta. Similarly as to the puzzling question why the important kings of the Lichavi dynasty did not figure in their coins he gives the theory of the divine origin of the Kings. The Lichavi kings were considered the incarnations of Lord Pasupati. Hence the reason for the abundance of Pasupati coins. The fact that very little work has been done since E.H. Walsh brought out his paper on the coinage of Nepal shows its significance and justifies a reprint of a classic.

--The Publisher

## THE COINAGE OF NEPAL.

By E. H. WALSH.

**T**HE coins which are dealt with in the present paper fall under three divisions. *First*, the coins of the Early Licchavi Sūryavamsī dynasty, whose capital was at Mānagrha, the present Kāthmāndū, and those of the Thākuri dynasty who were ruling at the same time over the western portion of Nepal, with their palace at Kailāsa-kūṭabhavana, situated in another part of the same city.<sup>1</sup> *Second*, the coins of the three Newār Malla dynasties, who reigned contemporaneously over the three kingdoms of Bhātgāon, Kāthmāndū, and Pātan, or Lalitāpur. *Third*, the Gorkhā dynasty, founded on the conquest of Nepal by Pṛthvi Nārāyaṇa in 1768 A.D., and which continues to the present time.

Several of the coins now illustrated have appeared previously. The early coins, of the Sūryavamsī dynasty of Licchavi kings and of the Thākuri dynasties (Plate I), have been described by Professor Bendall,<sup>2</sup> and have been described and illustrated in Cunningham's "Coins of Ancient India,"<sup>3</sup> and by Mr. V. Smith and Dr. Hoernl

<sup>1</sup> Fleet: "Early Chronology of Nepal," in the *Indian Antiquary*, vol. xiv, p. 350; and "The Early Gupta Inscriptions," *Corpus Inscriptionum Indicarum*, vol. iii, appendix, p. 189.

<sup>2</sup> "On some Nepalese Coins in the Library of the German Oriental Society": *Zeitschrift der Deutschen Morgenländischen Gesellschaft*, 1882, vol. xxxvi, p. 651.

<sup>3</sup> Sir A. Cunningham: "Coins of Ancient India," 1891, pl. xiii.

in the Proceedings of the Asiatic Society of Bengal,<sup>1</sup> but apart from the fact that some further varieties are now figured, the coins of these earlier dynasties, which have been already figured, have been included in the present paper so as to bring together what has been written on the subject, and because the subsequent silver coinage of the Newār Malla dynasty, though differing from them entirely in character, shows its continuity by the adoption of many of their symbols.

Of the seventy Malla coins shown on Plates II to VI, eight are illustrated by Marsden<sup>2</sup> and seven in the recent "Catalogue of Coins in the Indian Museum, Calcutta,"<sup>3</sup> by Mr. Vincent Smith, but the remaining fifty-five are, as far as I know, now illustrated for the first time. In the case of the coins of the present Gorkhā dynasty, shown on Plate VII, five have been illustrated by Marsden, and one, amongst those given in the recent Catalogue of Coins in the India Museum. But the other seven, I believe, have not before been illustrated.

The coins shown, of the Sūryavaṃśī and Thākuri dynasties, are in the British Museum; as are also those of the present Gorkhā dynasty. The coins of the Malla dynasties are partly from my own collection and partly from those in the British Museum. The coins from the British Museum are in each case noted in the list. The square double mohar of Pratāpa Malla (Pl. II, Fig. 14) is in the collection of Dr. Hoernle, who has kindly allowed me to reproduce it.

I have to thank the authorities of the British Museum

<sup>1</sup> Proceedings Asiatic Society of Bengal for May, 1837.

<sup>3</sup> Vincent A. Smith, "Catalogue of Coins in the Indian Museum, Calcutta" (1906), vol. i, pl. xxviii; Marsden, op. cit., pl. i.

for allowing me to have casts from their coins of the thirteen early coins, figured on Plate I, as also of fourteen of the coins of the Newār Malla kings, which are shown on Plates II to VI as follows: Pl. II, Figs. 1 and 11; Pl. III, Fig. 3; Pl. IV, Figs. 1, 3, 4, 7, 8, 9, 10, 12, and 13; Pl. V, Fig. 7; Pl. VI, Fig. 9; and the thirteen coins of the present Gorkhā dynasty given on Plate VII; and to thank Dr. Hoernle for letting me have a cast of the square double mohar of Pratāpa Malla, in his collection (Pl. II, Fig. 14). The remaining fifty-one coins of the Newār Malla kings, forming Plates II to VI, are from my own collection.

As already noted, the coinage of Nepal falls under three main divisions. *First*, the early coins of the contemporaneous dynasty of Sūryavamśī Licchavi kings, whose capital was at Kailāśakūṭa,<sup>1</sup> and of Thākuri kings with an adjacent palace at Mānagrha; *second*, those of the Malla dynasty of Newār kings which commenced with the conquest of the country by Jayasthiti Malla in 1380 A.D., and whose coinage commenced in 1556 A.D. and continued until the Gorkhā conquest; and *third*, those of the Gorkhā dynasty founded by Pṛthvi Nārāyaṇa Śāha's conquest of the country in 1768 A.D., and which continues to the present-time. The second period of the Newār kings also falls into three subdivisions; namely, the kingdoms of Bhātgaon and Kāthmāṇḍū into which the kingdom was divided by Yaksha Malla on his death circ. 1460 A.D., and the kingdom of Pātan or Lalitāpur, which was divided from that of Kāthmāṇḍū during the reign of Śivadeva, at the beginning of the seventeenth century.

The present kingdom of Nepal dates only from the Gorkhā conquest of Pṛthvi Nārāyaṇa in 1768. The

<sup>1</sup> Fleet, "Early Chronology of Nepal": *Indian Antiquary*, vol. xiv, p. 390.

kingdom of Nepal, to which the earlier coins and those of the Newār Malla dynasties belong, was practically the small area comprised in the Nepal Valley and the mountains which surround it. The valley itself is comparatively level at an elevation of about 4,500 feet, the bed of a former lake, and its extent is about twenty miles from east to west, and fifteen from north to south, though both length and breadth vary considerably owing to the spurs running down from the mountains. Within this area too, and within a few miles of each other,<sup>1</sup> were Bhātgaon, Kāthmāṇḍū, and Pātan, the capitals of their respective Malla kingdoms, and also the earlier Licchavi capital of Mānagrha, and jointly the capital of the Thākuri kings with its palace of Kailāsakūṭa, which, as all their coins come from the immediate neighbourhood of Pātan and Kāthmāṇḍū, and their inscriptions are found in the immediate vicinity of Kāthmāṇḍū, probably occupied the same or an adjacent site.<sup>2</sup>

Nepal in this restricted sense formed part of the empire of Asoka, but had ceased to form part of that of Samudra Gupta in the fourth century A.D. About 640 A.D. it seemed to have been subject to Harsha Vardhana, as his era, which dated from 606–7 A.D., is found on inscriptions in the country at that time.<sup>3</sup> His suzerainty, however, lasted only a few years, and at the time of his death, in 648 A.D., Nepal was a dependency of Tibet, which it continued to be until 880 A.D., when the institution of the Newār Era shows that the Newār kingdom had then succeeded in throwing off the Tibetan suzerainty, and had become an independent kingdom.

<sup>1</sup> Pātan is only two miles south-east of Kāthmāṇḍū, and Bhātgaon nine miles to the east of it and eight miles from Pātan.

<sup>2</sup> Fleet, "The Early Gupta Inscriptions": *Corpus Inscriptionum Indicarum*, vol. iii, Appendix, p. 189.

<sup>3</sup> Fleet, "Inscriptions of the Early Gupta Kings and their Successors": *Corpus Inscriptionum Indicarum*, vol. iii, Appendix, p. 189.

The history of Nepal, as given in the native chronicles, commences with the creation of the world, but is chiefly concerned with gods and mythological personages, until the time of Ne Muni, from whom the country is said to derive its name. This sage, having come to Nepal from the south, persuaded the people that there would be no Kṣatria Rājas in the Kali Yuga, and installed as king one of the Goala settlers, who are said to have come into the country shortly before, with Kṛṣṇa.<sup>1</sup> There were eight kings of this first Gupta dynasty, when, as the last king, Yakṣa Gupta, had no issue, an Āhīr from the plains of Hindustan came and ruled over the country. This Āhīr dynasty continued for three generations, when the Kirāṭis came from east and conquered the country. There were twenty-nine kings of the Kirāṭi dynasty, when they were conquered by the Somavamsīs, who ruled the country for five generations. The last of the Somavamsī kings, having no children, "appointed as his successor one Bhūmivarman, a Kṣatria of the Solar race of Rājputra of the Gautama gotra, who had been one of the followers of Sakya Simha Buddha of Kapilavastu, and had remained in Nepal after his departure."<sup>2</sup> The Vamsāvali gives the names of thirty-one kings of the Sūryavamsī dynasty, the sixteenth of whom, Śiva Deva, is the first whose date can be fixed. His date has been fixed from his inscriptions at 685 A.D.; as also that of Amśu-varman, Śiva Deva's minister, who founded the contemporary dynasty of Thākuri kings. The subsequent kings of these dynasties, with their dates as fixed from inscriptions, are given by Dr. Fleet<sup>3</sup> as follows, the serial number being that which they occupy in the Vamsāvali:—

<sup>1</sup> Wright : "History of Nepal," p. 108.

<sup>2</sup> Wright, *op. cit.*, p. 114.

<sup>3</sup> Fleet : *Corpus Inscriptionum Indicarum*, vol. III, p. 178.

LICCHAVI SŪRYAVAMĪ DYNASTY.			THĀKURĪ DYNASTY.		
	A. D.			A. D.	
16	635	Śivadeva.	1	635	Aṃśuvarman.
17	654	Dhṛuvadeva.		654	Jiṃsu Gupta.
18		Vṛiṣhadeva.			Udayadeva.
19		Śānkaradeva.			Narendradeva
20		Dharmadeva.		725	Śivadeva II.
21	705	Mānadeva.	12	751	Jayadeva II.
22	733	Mahideva.			
23	754	Vasantasena.			

The fact that Aṃśu-varman was reigning between 640 A.D. and 650 A.D. is also proved by the narrative of the Chinese pilgrim Hiuen Tsang.

The succeeding names of the Licchavi dynasty are given in the *Vaṃśāvalī* as follows :—<sup>1</sup>

24. Udayadeva.
25. Mānadeva.
26. Guṇakāmadeva-varman.
27. Śivadeva-varman.
28. Narendradeva-varman.
29. Bhīmadeva.
30. Viṣṇudeva-varman.
31. Viṣvadeva-varman.

The names of the Thākuri dynasty as given in the *Vaṃśāvalī* differ altogether from those given above for that dynasty. Professor Sylvain Lévi, however, assigns an earlier date to the above Licchavi kings. He considers that there is not sufficient evidence to show that they were subject to Samudra Gupta, but that the word *pratyanta* ('frontier states'), amongst which Nepal is included, in the panegyric of Samudra Gupta has been misunderstood, and means, not a subject state, but an

<sup>1</sup> Wright: "History of Nepal," p. 313.

independent state forming the boundary of the empire. He therefore considers that the dates in their inscriptions are either in a Licchavi era of their own, which commenced in 118 A.D., or are in the Śāka era, and fixes the date of Mānadeva as between 497 and 524 A.D. on the former hypothesis, or between 464 and 491 A.D. on the latter, and considers that in his time the kingdom was not partitioned.<sup>1</sup>

At the time when the coinage of Nepal commences, there were, thus, reigning from a joint capital at Kāthmāndū a dynasty of Licchavi kings, who are styled in their inscriptions *Licchavikula* and in the native chronicles *Sūryavamśa*, who used the Gupta era, reigning over the eastern portion of the country, and of Thākuri kings, who used the Harsha era, reigning from a joint capital over the western portion.<sup>2</sup>

The coins of the first period have been described by Sir A. Cunningham in "Coins of Ancient India";<sup>3</sup> by Professor Bendall, who has described the specimens of these coins in the library of the German Oriental Society;<sup>4</sup> and by Mr. V. Smith and Dr. Hoernle, who have described specimens of these coins in the Proceedings of the Asiatic Society of Bengal.<sup>5</sup>

A coin of the same type as that shown on Pl. I, Fig. 5, is figured by Professor Rapson in his "Indian Coins,"<sup>6</sup> and a specimen of the type given in Pl. I, Fig. 10, is figured in "The New Catalogue of Coins in the Indian Museum, Calcutta" (pl. xxviii, fig. 1). For convenience of

reference I give below a Table showing the specimens of the early Nepal coins which have been previously described.<sup>1</sup>

These early coins are large copper pieces of varying weight, but with the exception of coins No. 1 (197 grains) and No. 6 (249 grains), they approximate to a standard of 1½ *panas*, or 180 grains, the weight of the *pana* being 144 grains.<sup>2</sup> As noted by Sir A. Cunningham

<sup>1</sup> Table for reference to early Nepal coins previously described :—

13	13 Similar, no legend.			
14	14			

<sup>2</sup> The Indian *pana*, 'handful,' derived from *pani*, 'the hand,' "was a handful of cowrie shells usually reckoned at 80. This term *pana* is still used in Bengal, where a *pana* of cowrie shells consists of 20 *gandas*, or '20 fours' of cowries. By repeated trials I have found that 80 cowries form a very fair average handful. But the *pana* was also a copper coin of 80 rati seeds in weight (144 grains) and 80 cowries in value" (Cunningham, C.A.I., p. 1).

and Professor Rapson,<sup>1</sup> they bear a resemblance to the second class of Yaudeya coins, which is probably due to a common origin from the coins of the Kuṣānas. Their symbols of the standing humped bull and the standing lion with its tail curled over its back are also found on the Rajañya coins of the second or first century B.C.<sup>2</sup> The standing bull and standing lion on two of those coins are exactly the same as on the Nepal coins. The conclusion that the Nepal coinage was derived from that of the Kuṣānas is borne out by the fact that Kuṣāna coins have been dug up in the neighbourhood of Kāthmānḍū, which would seem to show that these coins were either current in Nepal in early times, being brought by merchants, or were brought by pilgrims. I have two coins of Wema Kadphises (85-120 A.D.) and one of Kanishka (120-150 A.D.), which were dug up at Kāthmānḍū, which were sent me by Colonel Peare when resident in Nepal. The seated figure of a deity on a lotus-seat, and also the seated figure of a deity or king on a throne with one leg hanging down, were also probably copied from the Kuṣāna coinage. In some coins of Huvishka<sup>3</sup> the seated figure is so like that on Mānānka's coin (Pl. I, Fig. 1) as to at once suggest the connection. The seated figure of the deity or king with one leg hanging down, and the trident on long straight shaft with battle-axe to left, as on coins of Paśupati (Pl. I, Fig. 2), also have their prototypes in the Kuṣāna coins of Kadphises II<sup>4</sup> and of Huvishka, the humped bull standing by itself in coins of Kadphises I<sup>5</sup> and the elephant in coins of Huvishka, though with a rider on its back. The elaborate symbol of a trident on the reverse of the coin of Jīṣṇu Gupta, resembling the

<sup>1</sup> E. J. Rapson, *op. cit.*, p. 82.

<sup>2</sup> "Catalogue of Coins in Indian Museum, Calcutta," 1806, vol. I, p. 179, pl. xxi, figs. 11 and 12.

<sup>3</sup> C.C.I.M.C., vol. i, p. 82, serial 47, and pl. xiii, fig. 5.

<sup>4</sup> *Ibid.*, p. 68, serial 3, and pl. xi, fig. 6.

<sup>5</sup> *Ibid.*, p. 67, serial 17, and pl. xi, fig. 4.

Florentine Giglia, appears to be a form of the "*nandipada tritula*," the two hoofs of the bull *Nandi* forming the pedestal at its base. A simple design, the parts of which are essentially the same though unelaborately formed, but in which the two hoofs clearly appear, occurs on a coin of Raja Kumuda Sena,<sup>1</sup> one of the early kings of Ayodhya (between 150 B.C. to 100 A.D.), with a standing bull on the reverse, similar to the bull on the Nepal coins. The seated figures also bear a close resemblance to those on the Gupta coins. The vase of flowers with streamers which figures on the coins of Paśupati (Pl. I, Figs. 12 and 13) occurs on copper coins of Chandra Gupta II (about 375-413 A.D.), where it bears the same shape as that of the ordinary brass *lota*, and the resemblance suggests that the Nepal coin was copied from that coin.

The names which appear on the coins are as follows:—

MĀNĀNKA. (Coin No. 1; Pl. I, Fig. 1.)

This name does not occur in the list of kings given in the *Vaṃśāvalī*. But it would appear to be the same as Mānadeva, whose date, as already noted, is given by Dr. Fleet as 705 A.D., and by Professor Lévi as either 497 A.D. or 464 A.D. Professor Bendall<sup>2</sup> thought that it was probably another name, or *viruda*, of Amśu-varman. But he based this opinion on the supposition that the legend on the obverse is *Śrī Bhagini*, and suggested that the explanation of the legend is to be found in inscription No. 7 of the series of inscriptions published in *The Indian Antiquary*, vol. ix, p. 171, in which King Amśu-varman proclaims that his sister (*Bhaginī*) Bhogadevī has dedicated a *linga* to the temple of Paśupati. The legend on the obverse, however, is clearly not *Bhaginī*, but *Bhoginī*, 'the enjoyable one,' which probably applies to the goddess

<sup>1</sup> C.C.I.M.C., vol. i, p. 150, serial 14, and pl. xix, fig. 15.

<sup>2</sup> *Zeitschrift der Deutschen Morgenländischen Gesellschaft*, vol. xxxvi, p. 651.

seated on the lotus, as Dr. Hoernle supposes.<sup>1</sup> Professor Sylvain Lévi<sup>2</sup> points out that the term *Bhogini* was used for the wives of kings other than the principal wife, the Mahisi, but thinks it unlikely that such a title would be used as the name of a person, or placed on a coin, and also considers that it is the name of the goddess. In any case there appears to be no sufficient reason to suppose it to be a coin of Amśu-varman's, or Mānānka to be his *biruda*. Dr. Hoernle reads Mānānka, 'the Māna-marked,' as a *biruda* of Mānadeva, 'the lord of Māna,' a name which in both cases was taken by him owing to his belonging to the family who ruled from the palace of Mānagrha. Professor Lévi,<sup>3</sup> on the other hand, takes the word to apply to the coin 'bearing the mark of Māna,' viz. Mānadeva.

**GUṆĀNKA.** (Coin No. 2 ; Pl. I, Figs. 2 and 3.)

(' Bearing the mark of Guṇa. ') This would appear to be a coin of Guṇakāmadeva, who, according to the Vamśāvali, was the twenty-sixth king of the Licchavi dynasty. Professor Lévi reads Guṇānka (similarly to Mānānka) as meaning money bearing the mark of Guṇa (-kāmadeva). The coins of this name bear a seated goddess on the obverse and an elephant on the reverse. The coin No. 2 is the only type of these Early Nepal coins which is not surrounded with the characteristic of dots, but has a plain convex band in place of it.

**VAIŚRAVANA.** (Coin No. 4 ; Pl. I, Fig. 4.)

This name does not occur in the list of kings given in the Vamśāvali. Cunningham suggests that as the name is a patronymic of Kuvera it might possibly be a coin of Kuvera Deva, the ninth king of the Sūryavamśi dynasty. But, as he observes, this would place the date of the coin

<sup>1</sup> P. A. S. B. for March, 1898.

<sup>2</sup> "Le Népal," vol. ii, p. 107.

<sup>3</sup> "Mānānka : (monnaie) à la marque de Māna : " Le Népal, vol. ii, p. 106.

too early, as it is of the same nature as the others, and the Gupta characters of the inscription are of the same date. It is probably, therefore, the name of a god, as in the case of the coins of Paśupata, and its date cannot be fixed. These coins bear a seated figure on the obverse and the divine cow "Kāmadehi" (or Kāmadhenu) on the reverse, as in the coins of Aṅśu-varman.

Kāmadhenu is connected with the legendary history of Nepal, as given in the *Vaiṣṅavī*, in the following manner:—Maheśvar appeared in the shape of a deer in a grove near Kāthmāṇḍū, and disclosed himself in the form of light which pervaded the seven firmaments above the earth and the seven firmaments below. On seeing this Brahmā went upwards to see how far the light extended, and Viṣṇu went downwards for the same purpose. Having returned from their journeys they met near a village on the hill south of Kāthmāṇḍū, and on comparing notes Viṣṇu said that he was not able to find the limit to which the light extended, whilst Brahmā declared that he had gone beyond it. Viṣṇu then called for witnesses, and Brahmā produced Kāmadhenu, who on being asked to declare the truth corroborated Brahmā's assertion with her mouth, whilst she shook her tail by way of denying it. Viṣṇu then, seeing what was the truth, uttered a curse on Brahmā, to the effect that his image should nowhere be worshipped, and on Kāmadhenu, that her mouth should be impure, but her tail sacred. Having done this, he remained in that place with the cow, but Brahmā disappeared.<sup>1</sup>

AṅŚU-VARMAN. (Coins Nos. 5-7; Pl. I, Figs. 5-7.)

This king, who was the founder of the *Ṭhākari* dynasty, reigned from 655 to 654 A.D. His coins bear on the obverse a winged lion with raised paw. The lion on his coins differs from that on Mānānka's coin in being winged, but

<sup>1</sup> Wright, p. 82.

there is an unwinged lion similar to Mānānka's on the obverse of one type of his coins (Fig. 7). On the obverse of another type of his coins (Fig. 5) is the divine cow "Kāmadehi," and on another (Fig. 6) is the title, Mahārājādhirājasya, round a central sun.

**JIṢṢU GUPTA.** (Coin No. 8; Pl. I, Fig. 8.)

This king was the son and successor of Arṣu-varman. His date is also fixed, by inscriptions, at 654 A.D., which is corroborated by the narrative of Hiuen Tsang. His coin bears a winged bull with raised paw on the obverse, but it differs from the lion on his father's coins in having the tail hanging down and not curled over the back. The reverse is an elaborately ornamental form of the trident.

**PAŚUPATI.** (Coins Nos 9-20; Pl. I, Figs. 9-13.)

There is nothing to fix the date of these coins. They are of six distinct types, four of which are shown on the Plate. On the obverses are a recumbent bull, a standing bull with crescent, a trident with an axe attached to its shaft; on the reverse of these coins are various forms of a sun with rays. There is also another type (Fig. 12) with a seated crowned figure, apparently a king, on the obverse, and a vase of flowers on the reverse, which resembles coins of the Guptas, and would appear to have been copied from them. There is also another type (coin No. 16; not illustrated) on the obverse of which is a recumbent bull, as in Pl. I. Fig. 9, and on the reverse the ornamental form of "*nandapada trisula*" found on the reverse of Jiṣṣu Gupta's coin (Fig. 8). This is interesting, for as it appears to be the only coin of Paśupati bearing that reverse whereas there are several examples of the other types, it suggests that the reverse of this coin, which is unusual for the Paśupati coins, was copied from that of Jiṣṣu Gupta, and thus shows that these coins are subsequent to his date.

The number of these early coins which have been found is not large. Cunningham<sup>1</sup> mentions that he obtained most of the coins which he describes from Colonel Warren, who collected them in Kashmir. According to his list there were about a hundred legible coins and thirty-seven that were unnamed. Cunningham himself also had twenty-three coins that came from Benares, and twenty which he obtained at Gaya by purchase in the Bazaar, or at Buddha Gaya in the small votive stūpaa. The Gaya coins were, as he says, no doubt found by workpeople at Buddha Gaya, and were no doubt votive offerings of pilgrims from Nepal. The coins described by Mr. V. Smith and Dr. Hoernle were from a collection of forty coins obtained at Kāthmāṇḍū by Dr. Gimlette, the Residency surgeon.<sup>2</sup> Dr. Hoernle has a collection of eleven of these coins which he collected at Kāthmāṇḍū, and I have seven from Kāthmāṇḍū. There are 106 of these coins in the British Museum, but some of them are from Cunningham's and Colonel Warren's collections, and are therefore included in the numbers already given. The number of specimens of each type of coin in the British Museum is given in the list of these coins.

Cunningham, writing in 1891, says: "The coins of Paśupati are by far the most numerous, as they form about half of the known specimens of the early Nepalese coinage. The coins of Amśuvarma form about one-fourth, and the remainder are nearly equally divided between Mānāṅka, Guṇāṅka, and Jiṣṇu Gupta."<sup>3</sup> To the latter should be added Vaiśravana.

<sup>1</sup> C. A. I., p. 114.

<sup>2</sup> Of these, a coin of Mānāṅka (Pl. I, Fig. 1) and the three coins of Amśu-varman (Pl. I, Figs. 5-7) were made over to the Asiatic Society of Bengal, and are now in the Indian Museum at Calcutta. There was only one specimen of Amśu-varman's coin (Pl. I, Fig. 6) amongst the lot. Three specimens of Mānāṅka and five of Amśu-varman, which were then retained by Mr. V. Smith, are now in the Bibliothèque Nationale, Paris (V. Smith, C. C. I. M. C., vol. i, p. 283).

<sup>3</sup> C. A. I., p. 115.

I have not ascertained the number of these coins in the Bodleian Collection, or those in the Cambridge Museum, or the Museum of the Bibliothèque Nationale at Paris.

### COINS OF THE MALLA DYNASTY OF NEWĀR KINGS.

The coinage of the Newār kings is of an entirely different character to the previous coins of Nepal already noticed. With the exception of one king of Kāthmāṇḍū, Jaya Prakāśa (1736 A.D.), who coined gold as well as silver, the coinage is entirely a silver coinage. It is based on a mohar of the weight of six māśās, a broad bean used in India as a weight. Cunningham notes that the māśā averages 14·6 grains,<sup>1</sup> and the weight of six māśās is therefore 87·6 grains. The mohars, with the exception of lighter coins of one or two kings, vary in weight between 80 and 90 grains, and the fractional coins based on them show a corresponding variation in proportion. Half mohars, quarter mohars, eighth mohars, and in the case of one king, Jaya Prakāśa, a sixteenth of a mohar and a do-dām, or thirty-second part of a mohar, were also coined. The value of the mohar was eight annas, and two of them were equivalent to the Mogul rupee.

Although there is one specimen of a double mohar, the square coin of Pratāpa Malla, shown on Pl. II, Fig. 14, the fact that there are no other coins of this value, and that the square form does not occur again, leads to the conclusion that this specimen must have been a medal, or a *niṣār*. Kirkpatrick distinctly says that the *sicca*, or double mohar, "has been known in this country only since the time of Pṛthvi Nārāyaṇ."<sup>2</sup>

The Vamśāvalī (Native Chronicle), translated in Wright's "History of Nepal," says that Ratna Malla (the first king of the separate kingdom of Kāthmāṇḍū), "having brought

<sup>1</sup> "Coins of Ancient India," p. 2.

<sup>2</sup> Kirkpatrick, *op. cit.*, p. 217.

copper from Tāmbā Khani, introduced pice (*paīsā*) into the currency instead of *sukichās*" (viz. quarter mohars, worth eight pice), but I have not heard of any copper coins of the Mallas, and the chronicle probably refers to the "dumpy pice," lumps of copper, which were used in Nepal, as, until recently, in India.<sup>1</sup>

The mohar was first coined by Mahendra Malla, King of Kāthmāndū, who reigned in 1566 A.D. In the *Varnāvali* it is recorded that: "He went to Dihli with a present of a swan and hawks for the Emperor, who, being much pleased therewith, granted him permission to strike coin in his own name, in weight six mashas. He struck this coin and called it Mohar, and made it current in every part of his country."<sup>2</sup>

Professor Lévi thinks that this story of Mahendra Malla's visit to the Emperor of Delhi is open to suspicion; as the reign of Mahendra Malla fell between 1550 and 1570 A.D., when the throne of Delhi was violently shaken. Humayun had been defeated by the Afghan Sher Khān in 1539, and had fled from the country. Sher Shah's successors were weakened by internal wars. Humayun returned and took Delhi in 1555, and died six months after. His son Akbar was a minor, and did not exercise personal rule until the close of 1560, and then passed seven years in putting down the seditions which broke out in all parts.<sup>3</sup>

But, however this may be, what made it possible for Mahendra Malla to strike a silver coinage was the fact that he made a treaty with Tibet, by which he supplied the coinage of that country, and obtained from Tibet the silver for the purpose. This privilege, besides supplying Nepal with the silver for its own coinage, continued to be the source of an extensive annual revenue to Nepal,

<sup>1</sup> Wright: "History of Nepal" (1877), p. 203.

<sup>2</sup> Ibid., p. 207.

<sup>3</sup> Lévi: "Le Népal," vol. ii, p. 246.

from the royalty it obtained on the coins that were supplied from it for currency in Tibet.

This privilege of supplying the currency of Tibet was at any rate subsequently shared by the kingdom of Bhātgāon, and, in fact, became the monopoly of that kingdom; for the coin of Bhūpatindra Malla of Bhātgāon (Pl. II, Fig. 3) was current in Tibet, and while the last coins of this early pattern, of Kāthmāṇḍū, are those of Pratāpa Malla, A.D. 1641, and of Pātan, those of Śri Nivāsa, A.D. 1661, they continued to be coined by Bhātgāon up to the end of the Malla dynasty. The earliest examples of the Malla coinage of the three kingdoms respectively are that of Lakṣminara Siṃha of Kāthmāṇḍū, undated (Pl. II, Fig. 9); next, that of his successor, Pratāpa Malla, of date 1641 A.D. (Pl. II, Fig. 10); of Jagatprakāśa of Bhātgāon, of date 1642 A.D. (Pl. II, Fig. 1); and of Siddhi Narasiṃha of Pātan, of date 1631 A.D. (Pl. V, Fig. 1). These coins are all of the same design. This shows that the kingdom of Bhātgāon in its coinage, and subsequently, on its formation, the kingdom of Pātan, adopted the design which was probably adopted from the first by Jaya Mahendra Malla for the Tibetan coinage, and at the same time for the coinage of Nepal itself. It will thus be seen that although the Nepal-Tibet coinage was commenced by Jaya Mahendra about the year 1556, there are no examples of his coinage nor of that of his successors, Sadāśiva Malla, Śiva Deva, or Hariharasiṃha, the earliest being that of Lakṣminara Siṃha and his contemporaries Jagatprakāśa of Bhātgāon and Siddhi Narasiṃha of Pātan. Even these are earlier than any coin that I have come across in Tibet, where the earliest coin I have found is that of Bhūpatindra Malla of Bhātgāon, of date 1696 (Pl. II, Fig. 3), and of that I have only found two specimens, and these were considered rarities.

Marsden notes that the Gorkhā king Pṛthvi Nārāyaṇa called in all the previous coinage of the Malla dynasties, so

that even in his own reign it was difficult to obtain any of the money of his predecessors, but this would not account for the disappearance of only the coins of the earlier kings, while specimens of the later ones remain, nor for their disappearance in Tibet. Although the quantity coined at first was probably small, it is still difficult to account for this entire disappearance of the earlier coinage.

In a paper on the coinage of Tibet, which I read before the Asiatic Society of Bengal,<sup>1</sup> I suggested that the characters around the margin of these coins, which no Newār or Tibetan understands or can account for, might be intended for an imitation of the characters on the seal of the Dalai Lama, which they to some extent resemble. The Dalai Lama's seal is the official symbol of the Tibetan Government, for whose circulation they were intended, and I thought that for this reason it was not unlikely that the seal might be represented on a coin intended for the currency of Tibet.

At the time of reading the present paper, however, Professor Rapson pointed out that, if looked at upside down, they bear a close resemblance to the Arabic characters on the coins of the Mahomedan kings of Bengal. I think there is no doubt that he is right, and the resemblance to certain coins of Ghiyās-ud-dīn Mahmūd Shāh, who was king of Bengal from 1526 to 1537 A.D., is so striking as to suggest that these particular coins were copied by Mahendra Malla for his mohar. I give below for comparison a copy of coins Nos. 147 and 149, in the Catalogue of the Coins of the Kings of Bengal in the British Museum, together with a copy of the coin of Lakṣminara Siṅha, the earliest of the coins of Kāthmāṅḍu, which is shown on Pl. II, Fig. 9:—

KINGS OF BENGAL.

XLIX. *Ghiyās-ul-dīn Mahmūd Shāh III.*

(Partial rule, A.H. 933-9 = A.D. 1526-32; A.H. 939-44 = A.D. 1532-37.)

No.	MINT AND DATE.	DESCRIPTION.
147	Nasratābād. 933	<p style="text-align: center;"><i>Silver.</i></p> <p>Obv. السلطان بن السلطان غياث الدنيا ○ والدين أبو المظفر محمود</p> <p>Rev. شاه السلطان بن حسين شاه السلطان ○ خلد الله ملكه وسلطانه ٩٣٣ نصرت آباد</p> <p style="text-align: center;">In each centre, small circle— شاهی بدر</p> <p style="text-align: right;">Plate vii. <i>R.</i> 146. <i>Wt.</i> 166.</p>
149	Muhammad- ābād. 934	<p>Same, but <i>شاه</i> transposed from beginning of rev. to end of obv.; inscription differently arranged, and mint and date <i>٩٣٣ محمد آباد</i>.</p> <p style="text-align: right;">Plate vii. <i>I.O.C.</i> <i>R.</i> 146.</p>

The resemblance of the Nepal coin to both the coins of Ghiyās-ud-dīn referred to is most striking, and especially to No. 149, from which the circle of dots round the margin of these coins would also seem to be copied. The territories of the Bengal kings were conterminous with Nepal, and their coins no doubt found their way into that country and were familiar there, which accounts for their being imitated by Mahendra Malla when he instituted his coinage.

The enclosure of the inscription within a square area, on these first Malla coins, was also probably copied from the coins of the Bengal kings, and occurs on the coins of Muhammad Shāh, Ghāzi<sup>1</sup> = A.D. 1552-1554, and Ghiyās-ud-dīn Bahādur Shāh,<sup>2</sup> 1554-1560.

The following is an extract from the paper which I read before the Asiatic Society of Bengal on the Coinage of Tibet (Memoirs A.S.B., vol. ii, No. 2, pp. 11-23):—

Kirkpatrick, in the account of his mission to the kingdom of Nepal in 1793, writes: "The silver eight-anna piece, now called Mohr and Adheeda, was formerly denominated Mehnder-Mulie,<sup>3</sup> after the Prince who first struck it, and by treaty established it in the neighbouring kingdom of Tibet; this prince would appear to have been one of the successors of Hur Sing Deo, and of the dynasty of Khatmunda, which city is said to have exclusively enjoyed for some time the privilege of supplying Tibet with coin, a privilege the more singular as it was from this very country that Nepal obtained her silver bullion. The origin of this practice is ordinarily referred to the superstitious reverence in which the valley of Nepal, and, more especially, the north-west parts of it (highly celebrated for their sanctity), has been wont to be held by the spiritual sovereigns of Tibet; but, whatever may have been the cause of it, there is not a doubt that the present Nepal Government made the departure of the Tibetans from ancient usage in this respect, the pretext for the war which it waged

<sup>1</sup> Catalogue of Indian Coins in the British Museum: "Kings of Bengal" 50, pl. vii, fig. 132.

<sup>2</sup> *Ibid.*, p. 38, pl. vii, fig. 133.

<sup>3</sup> Mahendra Malla, 1308 A.D.

about four years ago against the confederated Lamas; as evidently appears from a memorial transmitted to me from Nepal on this subject, an extract of which is given in Appendix No. II.

“The Mehnder-Mulie exhibited anciently a representation of Lehassa on one side, and, on the reverse, the name, titles, and emblems of the reigning sovereign of Khatmandu. Since the conquest of Nepal by Purthi Narain, no allusion to Lehassa has been preserved, the Mohr bearing on one side the following inscription: Sri Sri Sri Run Behauder Shah Dewa, and, on the other, Sri Sri Goorknāth Sri Bhowāni, with the year of the Soka and certain emblems allusive to the Hindu superstition, as the sun, moon, Trisool, of Mahadeo, etc.”<sup>1</sup>

With reference to this statement of Kirkpatrick's Professor Lévi<sup>2</sup> says that a coin figured in the *Missio Apostolica Thibetana*<sup>3</sup> simply bears on the obverse the effigy of the king, and on the reverse a horse standing towards the left and turning back his head. I have referred to this coin, which is figured on p. 202 of the *Missio Apostolica*. It is clearly a coin of the Yuch-ti, and is an imitation of the coins of the Indo-Scythians, and, allowing for its being a larger size and for elaborate drawing, is similar to a coin figured by Sir A. Cunningham on plate xiii of vol. ix of third series of the *Numismatic Chronicle*. As the *Missio Apostolica Thibetana* is not generally procurable, I give below a tracing of the coin referred to, together with Cunningham's coin which it resembles:—

<sup>1</sup> “An Account of the Kingdom of Nepal, being the substance of observations made during a mission to that country in the year 1783,” by Col. Kirkpatrick, London, William Miller, 1811, pp. 217, 218.

<sup>2</sup> Lévi: “Le Népal,” vol. ii, p. 247.

<sup>3</sup> “*Missio Apostolica Thibetana Seraphica*. Das is neue durch Päpstlichen Gewalt indem Grossen Thibetanische Reich. Von denem P.P. Capucineren aufgerichtete Mission und über Dolche von R. P. Francisco Horatio della Penna, etc.” München, 1740.

Thibetaner Münz

1.

2.

FIG. 1. Tracing of coin given on p. 202, *Misio Apostolica Thibetana*.

FIG. 2. Yush-ti coin, figured by Sir A. Cunningham.<sup>1</sup>

From the above, it is clear that the coin referred to is not the original Nepalese coinage for Tibet, and is not in fact a Tibetan coin at all. It appears at the foot of a plate of what purports to be an example of Tibetan writing ("Thibetaner Schrift"), but which is actually a Christian invocation and the Lord's Prayer, written in Hindi! This shows the value of the plate as regards the coin also, to which I do not find any reference in the text, and, as Orazio della Penna could not have made such a mistake as to show Hindi writing as an example of Tibetan, the whole plate has, I think, been edited into the book by the compilers, who evidently in Europe did not know what either the writing or the coin was, but thought them suitable material to illustrate an Oriental book.

The originally exclusive privilege of the Raja of Khātmandū to coin for Tibet, mentioned by Kirkpatrick, did not long continue,

<sup>1</sup> The coin is described as follows: "Pl. i, fig. 4, 0.5 in., Al., 2½ gr. Rude copy of silver drachma. Diademed head of king to l with mustaches. Native legend of five characters behind the head, as in No. 3. Rev.: Horse's head to l with Greek letter α. N.B.—These coins are very rare, but there are numbers of very rude copies in two different sizes."—*Namianatīr Chronicle*, ser. III, vol. ix (1880), pl. xiii, fig. 4.

but was also shared by the kingdom of Bhātgāon, by the time of Bhūpatindra Malla, whose coins were current in Tibet, where they are known as *angī drug-pa*, or 'number six,' from the last figure of their Newār date, 816; while those of Jaya Rānjita Malla, the last king of Bhātgāon, are still current.

The reason for the discontinuance of this coinage was, that it became so debased under the later kings of Bhatgāon that when the Gorkhas conquered the country they would not continue coining coins for Tibet if they had to exchange at *par* with the debased coins then in circulation, and the dispute over this question was made the pretext of the war between Nepal and Tibet in 1768. Kirkpatrick publishes an "extract from a Memorial of the Court of Khatmāndū, relative to the origin of the War with Tibet," which gives a full account of the dispute. I give below the portion which relates to the coinage:—

"In ancient times there subsisted a close union between the Rajahs of Nepaul and Bhoat (i.e. Tibet); when the pure Mehnder-mulli of the coinage of the former country was the current money of the latter. During the respective reigns, however, of Rajah Jy Purkaush Mull, the sovereign of Nepal, and of Rajah Runjeet Mull, the ruler of Bhatgong, the Mehnder-mulli became much debased, the consequence of which was that at the period Nepal passed into the possession of the Goorkha, Bhoat was full of this base coin. The Maharajah (i.e. Pirthi Korman) immediately put a stop to this improper practice, sending at the same time a friend'y deputation to Bhoat for the purpose of stating the mischievous consequences that would ensue were it persisted in, and of engaging the Lamas to revert to the ancient usage by giving circulation only to a pure currency.

"To this representation the rulers of Bhoat replied that the amount of base Mehnder-mulli then in their country was very considerable; that the suppression of it would consequently be attended with great loss to their people; and that, therefore, they could not agree to the introduction of the pure Mehnder-mulli proposed by the Maharajah, but must desire that the Goorkhas would continue to supply them with the adulterated coin.

"Nine or ten years elapsed in this negotiation between the two governments without their being able to fix on any plan of accommodation. At length the Goorkha envoy proposed that, as they could not stop the circulation of the base coin with which they had been supplied, they should, at least, establish a just rate of exchange between the base and pure coinage, to the end that

the merchants of either country might stand in their commercial transactions on the same footing as formerly. The Bhootias, however, would by no means consent to such a regulation; but, on the contrary, absolutely directed that the base and genuine money should be considered, in all negotiations of trade, as one and the same; the consequence of which was that for three or four years there was no sort of traffic carried on between the two countries. The circulation of the Nepaulian coin accordingly ceased (i.e. in Tibet). The Goorkha, nevertheless, continuing to retain his friendly disposition towards the Bhootias, endeavoured to prevail on them to depute some respectable person to the common boundary, there to meet and, in concert with deputies from Nepaul, devise some arrangement for the mutual benefit of the two states, as, without a speedy adjustment of the matter, it was evident that the trade of the two countries must be inevitably ruined. The Bhootias, however, were so far from listening to this reasonable proposal, that they, on the contrary, sent word vauntingly to the Goorkha that they had constructed a new road through the plain or valley of Tingri; that they were establishing a post on the common frontier; and that they had assembled an army of 125,000 men, and that, if the Goorkha wished for war, he was welcome to advance.”<sup>1</sup>

The profits made by the Nepal Government on the silver coinage for Tibet are said by Kirkpatrick to have been a lakh of rupees annually.<sup>2</sup> He adds: “It is to be observed that all silver brought into Nepaul from Tibet, in the way of commerce, must be carried to the mint at Khatmanda, no silver bullion being allowed to pass into Hindostan. In exchange for his bullion the merchant receives Nepaul rupees, the Government deriving a profit of twelve per cent. from the transaction, four per cent. being charged on account of coinage and eight arising from the alloy of the rupee.

“With respect to gold, it has usually been a monopoly in the hands of Government, who obliged the traders from Tibet to sell it at the mint, at the rate of eight rupees per tolah, whence the Ticksáli<sup>3</sup> retails it sometimes at the advanced price of fourteen rupees per tolah.”<sup>4</sup>

So, altogether, the Newar Government made a large profit out of their monopoly of the coinage for Tibet.

Since the Goorkha conquest, Nepal has not again coined for

<sup>1</sup> Op. cit., pp. 339-40.

<sup>2</sup> A Nepalese official.

<sup>3</sup> Op. cit., p. 211.

<sup>4</sup> Op. cit., pp. 211-12.

Tibet, though, since the conclusion of the war, the Nepalese-Gorkha mohars have passed freely current in Tibet along with the Tibetan currency and are called *chö-tang* or '*tang-ka* for cutting,' owing to those being the *tang-ka* that is generally subdivided.

The coin of Jaya Rañajita (Pl. II, Fig. 5) is known in Tibet as the *nag tang*, or 'black tang-ka.' There are a large number of these coins still in circulation, and many years of grease have made them black enough to deserve their name. A large number of these coins are also still current in Bhutan.

That the mohars of this first type were the design coined primarily for the Tibet coinage, and were consequently continued for that purpose, is supported by the fact that we find other coins of an entirely different device and character struck by the same kings, and even in the same year, reserved, no doubt, for the currency within Nepal. An example of this are the coins of Jaya Rañajita Malla of Bhātgāon (Nos. 5 and 6; Pl. II, Figs. 4 and 8); of Pratāpa Malla of Kāthmāṇḍū (Nos. 11 and 12; Pl. II, Figs. 10 and 12); and Śrinivāsa Malla of Pātan (Nos. 53 and 54; Pl. V, Figs. 3 and 4).

Besides the silver coinage there was until recently a copper currency of rough unstamped lumps of copper, called *dhebuā*, corresponding to the 'dumpy pice' that were formerly current in India. Four of these *dhebuās* make a *ganḍa*, and 25 *ganḍas* are equal to one rupee; so that  $12\frac{1}{2}$  *ganḍas* or 50 *dhebuās* were equal to the mohar. With the exception of Jaya Prakāśa Malla, none of the Newār kings coined silver coins of less denomination than the half mohar (called *sukā*, *sukī*, or *sikī*) and the quarter mohar (called *do-ānī*), and as  $6\frac{1}{2}$  *ganḍas* or 25 *dhebuās* were equal to the *sukā*, and 3 *ganḍas* or 12 *dhebuās* equal to the *do-ānī*, the copper currency was in accordance with the silver coinage. As regards Jaya Prakāśa Malla's coins of smaller value, they probably were never in general circulation.

The Gorkhās, however, who adopted the Newār system of silver coinage, carried out its subdivisions to lower denominations, and there are thus under the Gorkhās two systems of currency below the mohar—the old Newār system of ‘Pacis Gaṇḍa,’ to which the Gorkhās subsequently added a coin called ‘*dyāk*, equivalent to the Indian double pice; and the silver system of ‘Sohra Gaṇḍa.’ The two systems are given below.

*The Pacis Gaṇḍa System.*

1 mohar	= 2 sukā, sukī, or sikī.
1 sukā, etc.	= 2 do-ānī = $6\frac{1}{2}$ gaṇḍas of copper d̥hebuās or 25 d̥hebuās.
1 do-ānī	= 3 gaṇḍas of copper d̥hebuās or 12 d̥hebuās.
1 do-ānī	= 6 dyāks (double pice), a Gorkhā coin.
1 dyāk	= 2 d̥hebuās ( <i>Newār</i> ), c- 2 paisā (Gorkhā).
1 d̥hebuā	= 4 (copper) dāms.
1 (copper) dām or paisā dām	= 2 phokā dāms, or chūn dāms.

*The Sohra Gaṇḍa System.*

1 mohar	= 2 sukā, sukī, or sikī.
1 sukā, etc. ( $\frac{1}{2}$ mohar)	= 2 do-ānī.
1 do-ānī ( $\frac{1}{2}$ mohar)	= 2 ek-ānī.
1 ek-ānī ( $\frac{1}{2}$ mohar)	= 2 ādhā-ānī.
1 ādhā-ānī ( $\frac{1}{4}$ mohar)	= 1 paisā mohar (silver pice).
1 paisā mohar ( $\frac{1}{3}\frac{1}{2}$ mohar)	= 2 do-dām (the silver leaf), also called ādhā-paisā.

The value of the silver anna is nominally six copper pice, but the exchange value in practice seems to vary at certain places, as I have heard from Nepalis that it is equal to seven copper pice.

In the lists of Newār and of Gorkhā coins I have called the *sukā*, *do-ānī*, *ek-ānī*, etc., by their fractional part of the mohar.

To follow the coinage of the Malla dynasties it is necessary to give a brief sketch of the history of the three kingdoms of Bhātgaon, Kāthmāṇḍū (also known as

Kāntipur), and Pātan (also known as Lalitapur). In Table I, I have given contemporary lists of the kings of each of the three kingdoms. The names of the first seven kings of Bhātgāon and also the first eight kings of Kāthmāṇḍū, whose coins are not known, are taken from the *Vaṃśāvali*, and correspond with those given by Professor Bendall in Table II of his "Journey in Nepal"<sup>1</sup> and Table II of his "History of Nepal and surrounding Kingdoms."<sup>2</sup>

The subsequent names for the three kingdoms are fixed by their coins, in addition to the *Vaṃśāvali*. Those for Bhātgāon, viz., Jagatprakāśa, Jitamitra, Bhūpatindra, and Raṇajita Malla, are as given in Professor Bendall's tables, but I have made certain additions to the kings of Kāthmāṇḍū and Pātan which do not appear in those tables, and which I therefore give below.

#### *Kāthmāṇḍū.*

1. I have added the names of the thirteenth king Jaya Mahipendra and the fourteenth Jaya Pārthivendra, which do not occur in Professor Bendall's tables. The *Vaṃśāvali* states that Pratāpa Malla had four sons—Pārthivendra Malla, Nṛpendra Malla (also called Mahipatindra Malla), and Chakravartindra Malla. By the advice of a Swāmī he "left his throne for a time to be filled in turn by his four sons . . . Chakravartendra reigned only for one day, but the other three sons reigned for their three years."

The reigns of Chakravartindra and Nṛpendra are known, that of Pārthivendra is now shown by his coins (Pl. III, Figs. 2 and 3), and, as the statement of the *Vaṃśāvali* is thus correct as regards the other three

<sup>1</sup> "A Journey of Literary and Archaeological Research in Northern India," by Cecil Bendall, Cambridge, 1886.

<sup>2</sup> "History of Nepal and surrounding Kingdoms," by Cecil Bendall: J.A.S.B., vol. lxxii, pt. 1, p. 1.

sons, it may also be taken to be correct as regards the remaining one, Mahipendra Malla.

2. Professor Bendall shows Jyoti Prakāśa Malla, the twentieth king, in brackets, as not having reigned; and, referring to a coin bearing his name of date 1749 A.D., notes: "[coin struck apparently in a rebellion—see Wright, p. 224]." Jyoti Prakāśa's coin (No. 49; Pl. IV, Fig. 15), however, bears date 866 N.S., corresponding to 1746 A.D., which shows that coins were struck in his name both in 1746 and in 1749 A.D. Jyoti Prakāśa was the infant son of Jaya Prakāśa, aged 2½ years, whom the nobles, being discontented with Jaya Prakāśa, set up as king under the regency of his mother, Queen Dayāvati, and drove Jaya Prakāśa from the kingdom. The Varnsāvali says that he spent two and a half years in exile, when he received a miraculous sword from a devotee at Gujhesvari, which enabled him to return and regain his kingdom.<sup>1</sup> It is thus clear that Jyoti Prakāśa reigned under the regency of his mother for that period.

The Varnsāvali gives the name of his regent mother as Dayāvati. I do not, however, find any coin bearing this queen's name, as would be expected if she had been regent. But there is a coin of Janani, Jaya Laksmi Devi (No. 50; Pl. VI, Fig. 12), which bears date of the same year, which would seem to be the title of the queen regent.

#### *Pātan.*

3. Siddhi Narasimha is shown by Professor Bendall as the first king of the separate kingdom of Pātan. I have, however, shown the division as dating from Hariharasimha, as the Varnsāvali states that he "went to rule over Pātan in the lifetime of his father Śivasimha," and although, on succeeding his father subsequently, he ruled over the two kingdoms, Pātan as a separate kingdom had already been constituted, and was regarded as such. This is also shown

<sup>1</sup> Wright, p. 224.

by the fact that, although on his father's death Harinarasimha succeeded in ousting his elder brother Lakṣmi Narasimha from the kingdom of Kāthmāṇḍū, it was Lakṣmi Narasimha who succeeded to that kingdom as the son of Śivasimha, while Hariharasimha's son, Siddhi Narasimha, succeeded his father as ruler of the separate kingdom of Pātan.

4. I have added the name of Jaya Indra Mall, the fifth king. His name does not occur in the *Vamśāvalī* or in Professor Bendall's table, but the date on his coin (No. 61; Pl. V, Fig. 11) is 826 N.S., corresponding with 1706 A.D., which places him as the successor of Jaya Yoga Narendra.

5. The name of Jaya Loka Prakāśa does not occur from his coin, but is given in Bendall's table. The date on his coin (No. 62; not illustrated) is 827 N.S., corresponding to 1707 A.D., on which his name occurs together with that of Yogamatī Devī. He was no doubt a minor son of Yoga Narendra, and reigned under the regency of his mother Yogamatī; for there is an inscription which records that Yogamatī Devī dedicated a temple in memory of her deceased son Loka Prakāśa.<sup>1</sup>

6. I have added the name of Vira Narasimha, the seventh ruler. His name does not occur in the *Vamśāvalī* or in Wright's table. His coin (No. 63; Pl. V, Fig. 12) bears date 829 N.S., corresponding with 1709 A.D., and as his name also occurs jointly with that of Yogamatī Devī, he was also, no doubt, another minor son of Yoga Narendra, who succeeded on Loka Prakāśa's death, and for whom his mother ruled as regent.

7. I have shown the name of Jaya Vira Mahindra or Mahindra Simha Deva of Kāthmāṇḍū as the eighth ruler, as the *Vamśāvalī* states that he also ruled over Pātan, and he is consequently shown as the fifth ruler

<sup>1</sup> Inscription No. 22. *Indus Antiquary*, vol. ix, p. 192.

in Bendall's table. The statement of the *Vaṃśāvalī* as to *Vīra Mahindra's* reign over *Pātan*, however, appears to be very doubtful. The *Vaṃśāvalī* says: "After him (viz. *Yoganarendra*) *Mahipatindra* or *Mahindra Siṃha Malla* (*Rāja* of *Kāntipur*) became also *Rāja* of *Pātan* . . . . On the 11th of *Bhador Badi* N.S. 842 (A.D. 1722) *Mahindra Malla* died. *Jaya Yoga Prakāśa* succeeded him." <sup>1</sup> From the coins of the preceding three rulers, however, it is quite clear that *Vīra Mahindra* did not, as stated, succeed *Yoga Narendra*, and from the coins of *Hṛḍi Narasiṃha*, 1715 A.D., it is also quite certain that he did not reign till 1722 A.D. and that he was not succeeded by *Jaya Yoga Prakāśa*. The statement of the *Vaṃśāvalī* is, therefore, incorrect on every point, and so it is very doubtful whether *Vīra Mahindra* ever reigned over *Pātan* at all. If he did, it was between *Vīra Narasiṃha* and *Hṛḍi Narasiṃha*.

8. I have shown the name of *Hṛḍi Narasiṃha* as the ninth ruler. His name does not occur in the *Vaṃśāvalī* or in Bendall's table. His date, from his coins (Nos. 64 and 65; Pl. VI, Figs. 1 and 2), is 835 N.S., corresponding to 1715 A.D.

9. I have shown *Raṇajita Malla* of *Bhātgaon* as the thirteenth ruler. His name is not shown in Bendall's table. The *Vaṃśāvalī* says that *Rājya Prakāśa Malla* "was a pacific man and worshipped a number of *Saligrams*. The six *Pradhāns*, taking advantage of his simplicity, deprived him of his eyesight. He did not long survive this, and after his death the *Pradhān* of the *Dhālāchekācha* caste brought the *Raja* of *Bhātgaon*, *Raṇajita Malla*, and made him *Raja* of *Pātan* also. After a year's reign, however, the *Pradhāns* drove him away, when he had gone to bathe at *Sankhamula*." <sup>2</sup>

10. I have shown *Jaya Prakāśa* of *Kāthmāndū* as the fourteenth ruler. The *Vaṃśāvalī* says that after the

<sup>1</sup> Wright, p. 218.

<sup>2</sup> Wright, p. 230.

expulsion of Raṇajita "the Pradhāns made Jaya Prakāśa, the Raja of Kāntipur, Raja of Pātan also, and he ruled over both cities . . . Jaya Prakāśa ruled for one or two years; but the Pradhāns were afraid of him, and one day, when he went to Tekhu-dobhān to bathe, they expelled him. They then installed as Raja a grandson (daughter's son) of Visnu Malla, named Viśvajita Malla, who reigned for four years. The six Pradhāns were soon displeased with him, and, in order to get rid of him, they accused him of adultery with one of their wives, and killed him at the door of Taleju."<sup>1</sup>

Almost all the Malla coins, except those of the Tibet coinage, bear the sword (*khadga*), the emblem of sovereignty, which is generally combined with a garland. The other non-religious symbols are the mace and the lion. The remaining symbols are all religious. Of these, the one most generally found on the coins is the trident of Siva, and the others are the Aṣṭa Maṅgala<sup>2</sup> (the eight Buddhist signs of good luck); the shell, *sāṅkha*; the holy water vase, *kalāśa* or *kumbha*; the vase for offerings, with cover in form of a *stūpa*; the discus, *cakra*; and the double-drum, *damaru*, of form like an hour-glass, used in tantric worship.

With the exception of the trident, these symbols are all of them common to both the Hindu and Buddhist religions, though the interpretation given to them differs according to the religion.

The trident (*trishula*) appears on the reverse of the coins of the earliest type, in the small central circle, which, as already noted, was imitated from that in the coin of the

<sup>1</sup> Wright, pp. 250, 251.

<sup>2</sup> The Aṣṭa Maṅgala are (1) *Matṣya*, the two golden fish; (2) *Chatra*, the umbrella of sovereignty; (3) *Sāṅkha*, the hollowed conch shell for blowing as a trumpet; (4) *Svāstika*, a lucky diagram, also known as "Buddha's entrails"; (5) *Draju*, the banner of victory; (6) *Kalāśa*, vase of holy water; (7) *Padma*, the lotus; and (8) *Cakra*, the wheel of the law.

Bengal king Ghiyās-ud-dīn Maḥmūd. On these coins it always bears the same form, with two streamers attached to the shaft. All the mohars of Bhātgaon are of this pattern, except the mohar of Raṇajita Malla (Pl. I, Fig. 6), which he copied from that of Cakravartindra Malla of Kāthmāṇḍū. On the mohars of Kāthmāṇḍū, subsequent to those of the early type, the trident appears with plain shaft without streamers, though on one of the smaller coins, a quarter mohar of Rūpamatī Devī, the consort of Pratāpa Malla (Pl. II, Fig. 11), it follows the earlier form, and has small streamers. In two coins of Jaya Prakāśa Malla (Nos. 37 and 38; Pl. IV, Figs. 7 and 8) the trident has flowers springing from its shaft. In the kingdom of Pātan Buddhism was much stronger than at Bhātgaon and Kāthmāṇḍū, and consequently the Sivaite emblem of the trident does not appear on the coins of the early type, its place being taken in the coins of Siddhi Narasimha by the lion which forms the rebus of his name (Pl. V, Figs. 1 and 2), and in the coin of Śrīnivāsa by the legend which is continued on the reverse of the coin (Pl. V, Fig. 3). For the same reason the Sivaite emblem of the double-drum (*damaru*), which occurs on these coins of Bhātgaon and Kāthmāṇḍū, is omitted from the Pātan coins, its place being taken by the Buddhist emblem of the lotus flower. The trident does not also appear on the earlier coins of Yoga Narendra Malla. It first appears on his coin of 1700 A.D., a coin of an entirely different character to his previous ones, which bore only Buddhist symbols, and it then appears on the coins of all the subsequent kings, except those of Hrdi Narasimha Malla.

The double-drum (*damaru*), which is also a Sivaite emblem, and which occurs on the coins of the early type of Bhātgaon and Kāthmāṇḍū as already mentioned, does not appear on those of Pātan.

The Aṣṭa Maṅgala, the eight Buddhist signs of good luck, do not appear on the coins of Bhātgaon which

adhered to the early type. In Kāthmāṇḍū they first appear on the coin of Bhūpatindra Malla (No. 20; Pl. III, Fig. 4), and, after that, are the standard device for the obverse of the mohar of every succeeding king (Pl. III, Figs. 5-12, and Pl. IV, Figs. 2-6 and 15), with the exception of one coin of Jaya Jagajjaya Malla (No. 31; Pl. IV, Fig. 1). They do not occur on any of the coins of Pātan, and although Yoga Prakāśa Malla copied the device of the circle surrounded by eight petals (No. 66; Pl. VI, Fig. 3), the petals contain the legend, as on the reverse of the Kāthmāṇḍū coins.

The vase of holy water (*kaluśā*) appears on the quarter mohar of Bhūpatindra Malla (Pl. II, Fig. 5), and on the half and quarter mohars of Raṇajita Malla of Bhātgāon (Pl. II, Figs. 6 and 7). Also on the mohar of Pārthivendra Malla of Kāthmāṇḍū (No. 17; Pl. III, Fig. 2), and of Śrinivāsa Malla of Pātan (No. 54; Pl. V, Fig. 4).

The vase of offerings, with cover in the form of a stūpa, appears on the quarter mohars of Jaya Mahindra Malla (No. 27; Pl. III, Fig. 10) and Jaya Jagajjaya Malla (No. 30; Pl. III, Fig. 13) of Kāthmāṇḍū, and on the mohars of Yoga Narendra Malla (Nos. 55-58; Pl. V, Figs. 5-8); of Jaya Indra Malla (No. 61; Pl. V, Fig. 11); Vira Narasimha Malla (No. 63; Pl. V, Fig. 12); and the quarter mohar of Jananī Laksmī Devī (No. 50; Pl. VI, Fig. 12) of Pātan.

The shell (*śāṅkha*) is a symbol peculiar to the coins of Kāthmāṇḍū. It only appears on one coin of Pātan, a mohar of Yoga Narendra Malla (No. 57; Pl. V, Fig. 7), and on one coin of Bhātgāon, the mohar of Raṇajita Malla (No. 6; Pl. II, Fig. 8), which is copied exactly from the mohar of Cakravartindra Malla of Kāthmāṇḍū (Pl. II, Fig. 13). M. Terrien de La Couperie, writing on the silver coinage of Tibet, says that the coins of the three Nepal kingdoms "were generally distinguished by a shell for Bhātgāon, a trisul (trident) for Pātan, and a sword

for Kāthmāṇḍū.”<sup>1</sup> This, however, is quite incorrect. The shell does not occur at all on the coins of Bhātgaon with the one special exception noted; the trident is conspicuous by its absence from the early type of coins of Pātan, and did not appear on the subsequent coins until much later than at Kāthmāṇḍū; and the sword, which was the Newār emblem of sovereignty, is common to all the three kingdoms, and, in fact, the earliest coins on which it appears are those of Pātan (Pl. V, Figs. 1, 2, and 3).

The discus of Viṣṇu (*cakra*) appears on the coin of Cakravartindra Malla of Kāthmāṇḍū (No. 15; Pl. II, Fig. 13), and may have been adopted partly as a rebus for his name. It appears together with the shell, an association which may be due to the fact that the *cakra* and the shell each supported on a pillar appear as symbols in front of the temple of Cangu Nārāyaṇa.<sup>2</sup> It similarly appears on the coin of Raṇajita Malla of Bhātgaon, which, as already mentioned, he copied from Cakravartindra's coin. The *cakra* also appears on a pedestal in a form similar to that which it bears surmounting the pillar in front of the temple of Cangu Nārāyaṇa, of which it is probably a representation on the quarter mohar of Janani Kumudini Devi of Kāthmāṇḍū (No. 39; Pl. IV, Fig. 9), and the mohars of Jaya Indra Malla and Vīra Navaśimha Malla (Nos. 61 and 63; Pl. V, Figs. 11 and 12).

The mace (*gada*) appears on the coin of Cakravartindra, and on its copy of Raṇajita Malla, and also on the half mohar of Raṇajita Malla (No. 7; Pl. II, Fig. 7), where its head has been developed into a flower in a very artistic manner. It also appears, in combination with the shell, on coins of Yoga Narendra Malla of Pātan (Nos. 56, 57, and 58; Pl. V, Figs. 6, 7, and 8).

Terrieu de La Couperie, "Silver Coinage of Tibet": Numismatic Chronicle, 3rd series, vol. i, p. 340.

<sup>2</sup> Professor Lévi gives an illustration of this temple: "Le Népal," vol. i, p. 231.

The equilateral triangle, known as *vāṇāstra*, which is a conventional representation of a drawn bow, appears on the reverse of the coin of Cakravartindra and its copy of Raṇajita Malla (Nos. 15 and 6; Pl. II, Figs. 13 and 8), and on Raṇajita Malla's half mohar (Pl. II, Fig. 7), and on the reverse of the mohars of Jaya Prakāśa Malla (Nos. 35 and 36; Pl. IV, Figs. 5 and 6). Equilateral triangles also appear on the coins of Śrinivāsa, Yoga Narendra, and Vira Narasiṃha of Pātan (Nos. 54, 56, and 63; Pl. V, Figs. 4, 6, and 12), but in this case they appear to be merely to form geometrical designs. The triangle (*trikoṇa*) is also the special symbol of the Newār goddess Gujheswari, which may account for its use on these coins.

The *Svastika*, Fly-foot Cross, appears only on the coins of Yoga Narendra Malla of Pātan (Nos. 55, 56, and 57; Pl. V, Figs. 5, 6, and 7). This design of the double *svastika* no doubt suggested to the Gorkhā conqueror Pṛthvi Nārāyaṇa Sāha the design for his mohar, which has remained the standard design of the Gorkhā coinage (Pl. VII, Fig. 1), and which was copied by his brother Dala Mardana Sāha when king of Pātan (No. 75; Pl. VI, Fig. 13).

The remaining symbol found on the Newār coins is the lion, which appears as a rebus for the name 'Siṃha' on the coins of Siddhi Narasiṃha (Nos. 51, 52; Pl. V, Figs. 1, 2) and Hrdi Narasiṃha of Pātan (Nos. 64, 65; Pl. VI, Figs. 1, 2). It is of the same design, facing left with the tail curled over its back, as the lion on the coins of Mānārika and Amśu-varman, from which it is no doubt copied.

Besides the use of religious symbols, the kings of Pātan inscribed the names of the national deities on their coins. Only two of the kings of Kāthmāndū, Jaya Vira Mahindra Malla and Jaya Prakāśa Malla, followed this practice, and no names of deities appear on the coins of Bhātgaon which adhered to the early type. The names of the following deities occur on the coins

of Pātan; and of Jaya Vira Mahindra Malla, and Jaya Prakāśa Malla of Kāthmāṇḍū.

The name of Lokanātha appears on the coins of Yoga Narendra Malla (Nos. 55, 56, 57, 58, and, together with the name of the goddess Taleju Māju on coin No. 60); of Jaya Indra Malla (No. 61); of Vira Narasimha Malla (No. 63); of Jaya Viṣṇu Malla (No. 67); of Rājya Prakāśa Malla (Nos. 69, 70, 71, 72); and of Viśvajita Malla (Nos. 73 and 74) of Pātan. It also appears on the coin of Jaya Vira Mahindra Malla of Kāthmāṇḍū (No. 24).

The name of the goddess Kaluṇāmaya, or Karuṇāmaya, appears on the coins of Queen Yogamati and Loka Prakāśa Malla (No. 62); of Hrdi Narasimha Malla (Nos. 64, 65); of Yoga Prakāśa Malla (No. 66); of Jaya Viṣṇu Malla (No. 68); and of Dala Mardana Sāha (No. 75) of Pātan, and on a coin of Jaya Vira Mahindra of Kāthmāṇḍū (No. 25).

The name of the goddess Taleju Māju appears, together with that of Lokanātha, on a coin of Yoga Narendra Malla of Pātan (No. 60), and together with that of the goddess Kumāri Māju on a coin of Jaya Prakāśa Malla of Kāthmāṇḍū (No. 36).

The name of the goddess Gujheswari appears on a quarter mohar of Jaya Prakāśa Malla of Kāthmāṇḍū (No. 45), and, together with that of Paśupati, on another quarter mohar of this king (No. 40). The latter coin is peculiar, as it only bears the name of these two deities without the name of the king or queen, and is the only example of this in the Newār coinage, although it occurred in the ancient coins of Paśupati.

A feature of the Newār coinage is the inclusion of the names of the queen consorts on the coins. Besides the names of the queens who were regents for their minor sons, as Janani Jaya Laksmi Devi (No. 50), regent for her son Jyoti Prakāśa Malla, and Yogamati Devi (No. 62), regent for her son Loka Prakāśa Malla, and again (No. 63)

for her son Vira Narasimha Malla, the names of the consorts of the reigning kings frequently appear on the coins. In the Kāthmāṇḍū coins the queens' names only appear on the quarter mohar (*do-ānī*). These are Rūpmati Devi, queen of Pratāpa Malla (No. 14); Rājya Lakṣmi Devi, queen of Pārthivendra Malla (No. 19); Mahindra Lakṣmi Devi, queen of Jaya Vira Mahindra (No. 27); and Kumudini Devi, queen of Jaya Jagajjaya Malla (No. 30). In the Pātan coins the queens' names occur on the mohars, as follows: Yoga Lakṣmi Devi and Narendra Lakṣmi Devi, together on the coin of Yoga Narendra Malla (No. 55); Narendra Lakṣmi Devi and Pratāpa Lakṣmi Devi, together on another of the coins of the same king (No. 56); also Yoga Lakṣmi Devi, singly on another coin (No. 57); and Bhāgavati Devi appears on the coin of Jaya Indra Malla (No. 61).

A characteristic of the coins of the Kāthmāṇḍū dynasty is the use of flowers as a decoration on the coins of several of the rulers. The first coin decorated with flowers is the mohar of Pratāpa Malla (No. 12) and his square double mohar (No. 13), the mohars of Cakravartindra Malla (No. 15), Jaya Nṛpendra Malla (No. 16), and Pārthivendra Malla (No. 18). After that the mohars assumed a more or less fixed type, but in these the device was itself based on a flower, being the petals of the lotus flower on the obverse and its leaves on the reverse. The Nepalese as a race are very fond of flowers, and even the poorest use them as personal adornment.

The Malla kings did not generally inscribe titles on their coins, but only their names. The following kings, however, inscribed titles on their coins: Jaya Śrinivāsa Malla of Pātan took the title "Nepāleśvara" (No. 54), which was also assumed by Jaya Bhūpāendra Malla (No. 20), and also by Jaya Jagajjaya Malla (No. 28) of Kāthmāṇḍū, as "Nepāleśvara Rājendra."

Bhūpāendra Malla also assumed the title of "Girindra Rāju Rājendra," Lord over the kings of the Hills (No. 21), and the title was also assumed as "Nepāleśvara Girindra" by Jaya Bhāskara (No. 22) and Jaya Vira Mahindra (No. 26). The title of "Kavindra," King of Poets, as already noticed, was assumed by Pratāpa Malla (No. 12) and by Bhūpāendra Malla (No. 21). The title of "Nepāla Chudāmaṇi," Jewel on the Crown of Nepal, was assumed by Yoga Narendra Malla of Pātan (No. 58) and "Nepāleśvara Chudāmaṇi" (No. 59), and Bhūpāendra Malla of Kāthmāṇḍū subsequently uses the title as "Chudāmaṇi Samrāt" (No. 21), the Jewel on the Crown of the Empire.

Yoga Narendra Malla of Pātan uses the title of "Saṅgitārṇava - Pāraga," skilled in music (No. 55), referring to his proficiency in that art.

The general characteristics of the Malla coinage have now been considered, but there are one or two coins which call for individual notice.

The design of the mohar of Cakravartindra, 1669 A.D. (No. 15; Pl. II, Fig. 13), has been already alluded to. The device of this coin is supposed by the Newārs to have been particularly unlucky, and to have caused Cakravartindra's death. The Vāṁśāvalī says: "The inscription on Cakravartindra's coin, devised by the Svāmi, consists of a triangular Bānūstra (bow and arrow), Pās (noose), Ankus (the iron hook for driving an elephant), Kamal (a lotus), Chāmar (a yak's tail), and Sambat 789. This device caused his death." To this Dr. Wright adds a footnote that "a bow and arrow are ominous of death, but nevertheless the water in which such a coin is dipped possesses the quality of causing a speedy delivery in child-bed. These coins, which are very rare, are still used for this purpose."<sup>1</sup> This is, as Dr. Wright remarks, the general belief with regard to this coin, and I was told of

<sup>1</sup> Wright's History, p. 220.

this virtue when I obtained my specimen of the coin. It is curious that, with such a belief as to the unluckiness of this coin, Ranajita Malla should have copied the device.

Jaya Pratāpa Malla imitated the Persian inscription on the coins of the Moghul Emperors with a floral decoration of the field. His coin which bears this device is dated 775 N.E. or 1755 A.D. (No. 12; Pl. II, Fig. 12).

The upper line of characters on the reverse appears to be intended for the commencement and last portion of "Shāh 'Alamgīr," from whose coins Pratāpa Malla would therefore appear to have copied them. This introduction of Persian characters, which the minters failed to correctly imitate, is characteristic of Pratāpa Malla, who prided himself on his extensive knowledge, and composed a prayer to Svayambhū, in which he introduced Persian and various other characters, and had inscribed on a stone at that temple. It was after composing this prayer that Pratāpa Malla assumed the title of "Kavindra," King of Poets, which appears on this coin. Pratāpa Malla's device of this coin was copied by Jaya Nṛpendra and Jaya Pārthivendra (Pl. III, Figs. 1 and 3), and two lines of meaningless imitation Persian characters appear on the reverse of mohars of Jaya Bhāskara, Vira Mahindra, Jaya Jagujjaya Mallas of Kāthmāṇḍū, and were also adopted by Jaya Viṣṇu and Rājya Prakāśa Mallas of Pātan on the obverse of their coins (Nos. 67 and 69).

Jaya Bhūpālendra (1682 A.D.) also assumed the title of Kavindra (No. 21). He originated the device of eight lotus petals surrounding a central circle, with the *asta-maṅgala* within the petals for the obverse, and a similar arrangement of eight leaves for the reverse, which remained the standard device for the coins of the subsequent rulers.

His design, as modified by his successor Jaya Bhāskara Malla (No. 22; Pl. III, Fig. 5), was copied by the Government

of Tibet for their coinage when Tibet gave up obtaining their coinage from Nepal, and with the substitution of a floral design the central circle on the obverse, and a wheel within the central circle on the reverse, in the "*Guh-dun tsunku*," which has continued to be the standard coinage of Tibet up to the present time.

The latest monars of Jaya Viṣṇu Malla of Pātan (No. 67), and all those of his successor Rājya Prakāśa Malla (Nos. 69 to 72), bear on the reverse the name of Vira Yoga Narendra Malla. The reason of this would appear to be because Yoga Narendra Malla, who from grief at the death of his son and heir relinquished the kingdom and went away as an ascetic, was supposed to be still living, and the government of the country to be carried on by his successors on his behalf. The *Vaṃśāvali* says: "He told the minister that as long as the face of his statue remained bright and untarnished, and the bird on its head had not flown away, he would know that the Rājā was alive, and should cherish and respect his memory. For this reason a mattress is still every night laid in a room in the front of the Darbar, and the window is left open."<sup>1</sup> To this Dr. Wright adds a footnote that this is still done, as the face of the statue remains bright.

Rājya Prakāśa Malla,<sup>2</sup> Jaya Viṣṇu Malla's successor, also, for the same reason, inscribed the name of Vira Yoga Narendra Malla on all his coins (Nos. 69 to 72). In coins Nos. 69, 70, and 71 the reverse is the same as Jaya Viṣṇu's coin No. 67, but in coin No. 72 the device is different, which shows that the insertion of Yoga Narendra Malla's name was not merely due to a continuance of the reverse of Jaya Viṣṇu's coin.

<sup>1</sup> Wright, p. 242.

<sup>2</sup> Rājya Prakāśa Malla was the younger brother of Jaya Prakāśa Malla of Kāṭhmandū, by whom he was expelled from the country, as the sapsya wanted to make him king instead of Jaya Prakāśa. As Jaya Viṣṇu Malla had no son he appointed Rājya Prakāśa as his successor, which was accepted by the people (Wright, p. 240).

## THE GORKHĀ COINAGE.

The following is a brief sketch of the history of the Gorkhā dynasty. All references to Gorkhā coins which follow are to the serial number in the list of Gorkhā coins, which form a separate series to those of the Newār coins which have been already considered.

The Gorkhās claim to be descended from the Rajputa of Chitor, whose dynasty commences from Rātrāja Bhattāraka, about the year 80 A.D. According to their history, after the taking of Chitor by Ala-uddin in 1289 A.D., one part of the survivors went and settled at Udaipur, and another, under Manmatha Rana, settled at Ujjain. Manmatha Rana's younger son Mica Khān,<sup>1</sup> however, with his followers, migrated to the Himalayas and settled at Noakot,<sup>2</sup> where they made themselves masters of the neighbouring territories.

In 1559 A.D. they again divided. Dravya Sāha, a younger son, obtained the sovereignty of the town and territory of Gorkhā, forty miles west of Kāthmāndū, from which the Gorkhās have taken their name. Intent on pushing their conquests eastward, Dambara Sāha (1633-1642 A.D.) invaded the territories of Pratāpa Malla, but was repulsed. Nara Bhūpāla Sāha (1716-1742 A.D.), the father of Pṛthvi Nārāyaṇa, taking advantage of the internal dissensions between the Nepalese kingdoms, again invaded Nepal, but was stopped by the Thākurs of Noakot<sup>3</sup> and forced to retreat.

On his father's death, Pṛthvi Nārāyaṇa came to the throne at the age of 12, and at once proceeded to

<sup>1</sup> He is the 38th Raja in the Genealogy (Wright's "History of Nepal," p. 270).

<sup>2</sup> Not the Noakot near Kāthmāndū, but another far to the west.

<sup>3</sup> Viz. Noakot in Nepal (Wright, 107).

attack Noakot,<sup>1</sup> which belonged to the kingdom of Kāthmāṇḍū. He was, however, repulsed by Jaya Prakāśa and forced to retire, but succeeded in his second attack eight years later (1750 or 1751).<sup>2</sup> At this time he also went to reside with Raṇajita Malla at Bhātgaon, where he became a close friend of Raṇajita's son and heir Vira Narasimha Malla, and where he continued to reside for several years. He there stirred up the seven illegitimate sons of Raṇajita Malla, with the promise that he would obtain the kingdom for them, to conspire against Vira Narasimha, whom they eventually contrived to poison; the *Vaiśāvalī*, euphemistically, records that "he died suddenly." Raṇajita Malla called in Pṛthvi Nārāyaṇa to assist him in his quarrel with Jaya Prakāśa of Kāthmāṇḍū. Pṛthvi Nārāyaṇa seized the opportunity to attack Kirtipur, a town on an eminence about three miles south-west of Kāthmāṇḍū, which was subject to the kingdom of Pātan, and which, from its position, was considered impregnable. The king of Pātan did not attempt to defend it, but Jaya Prakāśa went to its assistance and defeated Pṛthvi Nārāyaṇa, who was forced to retire. The people of Kirtipur then asked Jaya Prakāśa to become their king, and the nobles (Thāris) assembled to make the town over to him. He, however, insulted them and had one of their number imprisoned, in revenge for which they handed over several places in the kingdom of Kāthmāṇḍū to Pṛthvi Nārāyaṇa, who also again laid siege for several months to Kirtipur, but was obliged eventually to give it up. He then attacked the king of Lavoji, a neighbouring state, and after several battles concluded an agreement with him and returned towards Kirtipur.<sup>3</sup> The three Nepalese kingdoms then attempted to combine against their common danger and

<sup>1</sup> Noakot in Nepal.

<sup>2</sup> Wright, pp. 224, 225.

<sup>3</sup> Lévi, "Le Népal," vol. ii, p. 271.

attacked Pṛthvi Nārāyaṇa, but after a protracted siege Kirtipur was given up to Pṛthvi Nārāyaṇa by the noble whom Jaya Prakāśa had insulted and imprisoned. Pṛthvi Nārāyaṇa then invested Pātan, but the advance of the British troops under Captain Kinlock into the Terai (1767) caused him to withdraw. On Captain Kinlock's expedition having to retire, on account of malaria and difficulty of communications, he laid siege to Kāthmāndū, which he finally entered with scarcely any opposition on the 29th September, 1768, during the festival of the Indrajaatra; when most of the inhabitants were feasting or drunk, Jaya Prakāśa sat in the temple of Taleju watching the fighting. At last, seeing that all was lost, he spread gunpowder on the steps of the temple and fled to Lalitapur, and taking the king Teja Narasimha with him, took refuge at Bhātgaon.<sup>1</sup> This gave Pṛthvi Nārāyaṇa both Kāthmāndū and Pātan, and he then turned his attention to the town of Bhātgaon, which he succeeded in entering through the treachery of the illegitimate sons of Ranajita Malla, whom he had won over, as already mentioned. Ranajita was allowed to go to Benares, where he ended his days, Jaya Prakāśa was taken, at his own request, to Paśupati, where he died from the results of a wound he had received in the taking of Bhātgaon, and Teja Narasimha was imprisoned at Lakṣmipur until his death, and thus the three Malla kingdoms came to an end in 1768 A.D.

Pṛthvi Nārāyaṇa was succeeded by his son Pratāpa Simha Sāha, who reigned for three years, 1775-8 A.D.<sup>2</sup> He was succeeded by his son Raṇa Bahādur Sāha, who was an infant, and whose mother, Rājendra Lakṣmi Devī, governed as Regent. From the death of Pratāpa Simha

<sup>1</sup> Wright, p. 232.

<sup>2</sup> The brief sketch of the history of the Gorkhā dynasty which follows is taken from Professor Lévi's "Népal," which is fuller and more complete than that given in Wright's History.

Sāha, the Gorkhā dynasty has been a succession of minor kings and regencies. The king has been merely a nominal ruler, the real government and power being in the hands of the Prime Minister. In 1795 Rāṇa Bahādur Sāha, having attained majority, decided to reign himself, and arrested and imprisoned his uncle the minister. He had been married to Lalitā Tripurā Sundarī, a daughter of the Rāja of Gulmī, a neighbouring hill state. He, however, neglected her, and married a slave-girl, who appears from coin No. 35 to have assumed the title of Rāja Rājesvarī Devī. The name of Lalitā Tripurā Sundarī does not appear on the coins of this reign, though it appears on coins of his successor Rājendra Vikrama, together with that of Rājendra Lakṣmī. He also married Rājendra Lakṣmī Devī, the daughter of a Brahman, by whom he had a son, Girvāṇa Yuddha Vikrama Sāha. Being a Kṣatriya he could not marry a Brahman, and this and other acts of impiety so aroused the people against him that he was obliged to resign the throne, and his infant son Girvāṇa Yuddha Vikrama Sāha was appointed in 1800 A.D. with his mother Rājendra Lakṣmī Devī as Regent, and Damodar Paṇḍe as Minister: as the senior queen Lalitā Tripurā Sundarī resolved to accompany her husband into exile. Rājendra Lakṣmī's name occurs on the coins both during the reign of her husband, as consort (No. 21) and as Regent for her son (No. 34).

In 1802 Tripurā Sundarī, tired of the ill-treatment of her husband, returned to Nepal, and was welcomed by the people, on which Rāṇa Bahādur Sāha also returned, and assumed the government again in his son's name, until he was assassinated in 1807. Girvāṇa Yuddha died in 1816.

His minor son Rājendra Vikrama Sāha succeeded him under the regency of his grandmother Rājendra Lakṣmī Devī. Her name as Regent during this reign occurs, together with that of Tripurā Sundarī Devī, on coins

No. 64 and 65, and by itself as "Regent" on coin No. 69. In 1832 the old queen Tripurā Sundarī died.

Rājendra Vikrama had two wives, the first related to the Pāṇḍes and the second to the Thāpās, the two rival factions in the state, who devoted their influence to assisting their respective parties. In 1846 Rājendra Vikrama and his queen were expelled, and his minor son Surendra Vikrama Sāha was appointed as Regent with Jang Bahadur as his Minister. Rājendra Vikrama subsequently returned to Nepal and was imprisoned, where he died in 1847, and Surendra Vikrama then succeeded to the throne under a regency. In 1881 Surendra Vikrama died, after a purely nominal reign of 34 years, and was succeeded by his grandson, a child of six years, Prthvī Vira Vikrama Sāha, who is the present King.

Prthvī Nārāyaṇa, on his conquest of the country, adopted the Newār system of coinage based on the standard of a silver mohar, and with the same fractional parts. The design of his mohar (No. 1; Pl. VII, Fig. 1), which has continued to be the standard design ever since, was also taken from the Newār coins, the design of the obverse, a square divided by a *svastika* having probably been suggested by the coins of Yoga Narendra Malla of Pātan (Pl. V; Figs. 5, 6, and 7) combined with the small central circle containing a trident with streamers on the current coins of Raṇajita Malla (Pl. II, Fig. 5) with which Prthvī Nārāyaṇa was familiar, owing to his long residence with Raṇajita Malla at Bhātgaon. The reverse is also a copy of the obverse of a coin of Yoga Prakāśa Malla of Pātan (Pl. VI, Fig. 3), and is similar to several of the later coins of both Kāthmāṇḍū and Pātan; even the two horizontal lines in the central circle being reproduced from the meaningless imitated Persian characters on those coins.

In the half mohars (*sukā*) and quarter mohars (*suki*), too, the designs of the Newār coins were followed, and the

same symbols, the sword and wreath as the emblem of sovereignty, the trident, the offering vase in form of *stūpa* (Pl. VII, Fig. 3), and the *cakra* on pedestal (Pl. VII, Fig. 8), were adopted. The lion, as a rebus for the name "Siṃha," was also used by Pratāpa Siṃha Sāha (No. 17; Pl. VII, Fig. 5, and others of his coins). The Malla coins from which the different Gorkhā coins were taken are noted in the List of Gorkhā Coins. The Gorkhā coins also bear the symbols of the Sun and Moon; as the Gorkhās claim to be descended from both the Solar and Lunar races.

In the gold coinage, however, the Gorkhā kings introduced coins of new denomination and of new designs, some examples of which are illustrated (Pl. VII, Figs. 4, 7, and 9). The copper coinage of Surendra Vikrama Sāha (Pl. VII, Fig. 11), and of Prthvī Vira Vikrama Sāha (Pl. VII, Figs. 12 and 13) are new, with their devices, and in the latter a new symbol is introduced in the *Pādukā* (footprints of Viṣṇu) and the crossed *Kukhrīs*, the national Gorkhā weapon.

The names of deities also appear on the coins, though here the name of Gorkhānātha, the patron deity of the Gorkhās, is the one that is borne on all the mohars. But the name of Lokanātha also appears on some mohars of Prthvī Nārāyaṇa (No. 3) and that of Guhyesvari on that of Pratāpa Siṃha Sāha, the name being spelt on the Gorkhā coins with *hy* instead of *jh* as on the Newār coins (No. 12). In the latter mohars, however, the only names that appear are those of Gorakhānātha and Bhavānī.

The Newār era was, however, abandoned. The coins of the Gorkhā kings are dated in the Sāka era, and the copper coins of Prthvī Vira Vikrama Sāha in the Saṃvat era.

The Gorkhā kings all bear the title of Sāha Deva. The title of Sāha (Sāhā) is said to have been conferred by the Emperor of Māhārāṣṭra on the King of the Gorkhās.

king of the Gorkhā dynasty, for some service that he rendered to the emperor, and has been borne by all his successors.<sup>1</sup>

The different denominations of the Gorkhā silver coinage have already been considered. The gold coinage, however, comprises some further denominations. With the exception of Baklā, which is equivalent to two mohars, and of the gold mohar, which is known as 'Patlā' (thin coin) or 'Mājhwālā' (middle coin), these gold coins, are not in general circulation. The smaller denominations are only minted on special occasions and for special purposes. For the names by which they are known, I am indebted to His Excellency Maharaja Sir Chandra Shamsheer Jang Rana Bahadur, G.C.S.I., the Prime Minister of Nepal, who has kindly given me the information.

The gold coinage is nominally based on the standard of the tola (= 180 grains), the mohar being held to be the equivalent of half a tola. In the coins of the previous Gorkhā kings which I have weighed, however, the actual weights are less than that standard, as will be seen from the weights given in Table IV of Gorkhā coins. But I have not weighed any coins of the present reign. Their value generally fluctuates with the market price of gold. The different denominations are as follows:—

Duitole Asarfi, made of 2 tolas of gold = 360	grs., actual weight 356 grs. ; coin No. 10.
Baklā " " 1 " " = 180	" " " 170 grs. ; coin No. 46.
Patlā or	
Mājhwālā " ½ " " = 90	" " " "
Sukā Asarfi " ¼ " " = 45	" " " 41 or 42 gr. ; coins Nos. 25 and 47.
Sukī " " ⅓ " " = 22.5	" " " 21 grs. ; coin No. 22.
Ānī " " ⅓ " " = 11.75	" " " 11 grs. ; coin No. 27.
Ādhānī " " ⅓ " " = 5.9	" " " "
Pāi " " ⅓ " " = 2.95	" " " "
Dām " " ⅓ " " = .7	" " " "
Phokā Dām " ⅓ " " = .35	" " " .3 to .35 gr. ; coin No. 77.

<sup>1</sup> Wright's History, p. 276.

A list of the different coins of the Gorkhā dynasty is given. It is complete up to coin No. 33, for the coins of the British Museum, and after that, I believe, contains most of the succeeding coins, though, owing to my leaving England, I had not the time to go through the remaining coins in the British Museum in detail; and the subsequent list is therefore compiled from the coins in my own collection, supplemented by those in the British Museum of which I had kept note, including those described by Marsden and also, in the case of coins Nos. 43 and 90, from the catalogue of coins in the India Museum, Calcutta. There may be other queens' coins, and also coins of other denominations than those contained in the list. But the present list will give a comprehensive idea of the Gorkhā coinage until the catalogue of these coins in the British Museum is published.

## LISTS OF COINS.

### THE LICCHAVI AND THĀKURĪ DYNASTIES.

#### MĀNĀŅKA OR MĀNADEVA.

No.	METAL. WEIGHT. SIZE.	OBVERSE.	REVERSE.
1	Æ 197 1·0	Lion walking towards left, with a flower in front of it. Over, in a straight line, legend <i>Śrī Mānānka</i> . (Pl. I, Fig. 1.)	Goddess seated on a lotus, with the right hand raised and the fingers spread out. The left hand rests on the hips. Legend, <i>Śrī Bhogini</i> .

The above coin, given in the British Museum, is Cunningham's coin figured in "Coins of Ancient India," pl. xiii, fig. 1.

The British Museum has twelve specimens of this type of coin and its varieties, which vary in size from .95 to

1.05 and in weight. They vary considerably in workmanship, in the size of the seated figure, which in one specimen occupies the greater part of the obverse and in another not more than one-third of the diameter, in the details of the design, and in the workmanship, some being so much more barbarous that they would appear to be subsequent imitations of the original coinage. Cunningham's specimen is much the most perfect.

Cunningham and Bendall give the "deity seated on lotus throne" as the obverse of this coin, and the lion as the reverse. I do not think this is correct. The lion is, I think, the obverse, as it occurs on the obverse of Amśu-varman's coins, Pl. I, Figs. 5 and 6 (in which latter coin the obverse and reverse have, by mistake, been transposed on the plate), and on Jisnu Gupta's coin, Pl. I, Fig. 8, in each of which there is no doubt, from the inscription, that the lion is the obverse. Cunningham describes the figure as "lion walking to left towards lotus plant with flower and bird." I think neither of the objects is a bird. The upper one is a flower consisting of six petals round a centre, and the lower one appears to be a lotus leaf. Bendall (coins Nos. 2, 3, 4, 5) describes the figure as "lion pawing a vine-branch," and mentions that Professor P. Gardner had called his attention to the Græco-Indian coin of Agathokles bearing a panther pawing a vine-leaf (Num. Chron. for 1868, vol. viii, pl. x). I do not think, however, that the object on the present coin is intended for a vine-branch. The upper object, if it were intended for a bunch of grapes, would be hanging down. Also grapes are not grown in Nepal, whereas flowers appear on many of these early Nepalese coins. I think there is no doubt that the object in front of the lion is intended for a lotus on a stem, from which a leaf also grows.

The figure of the deity seated on a lotus on the reverse bears so striking a resemblance to a similar figure on some

of the coins of Huvishka as to suggest that it was copied from them. As already noted, Professor Bendall read the legend on the reverse of a coin of this type as *Śrī Bhagini*. It is, however, distinctly *Śrī Bhogini* on this and the other specimens in the British Museum.

No.	METAL. WEIGHT. SIZ.	OBVERSE.	REVERSE.
<b>GUNĀNKA OR GUNA DEVA.</b>			
2	Æ 185 ·95	Deity seated on a lotus, right hand held up. Legend below the figure. <i>Śrī Gunānka</i> .	Elephant facing to right. (Pl. I, Fig. 2.)
3	Æ 130 ·87	Seated figure of king wearing crown; both hands are raised and holding a flower. Legend above the figure, <i>Śrī Gunānka</i> .	Elephant to right, surrounded by margin of dots. (Pl. I, Fig. 3.)

The British Museum has twelve specimens of coin No. 2, which vary as greatly as those of Mānānka, and two of the variety shown in coin No. 3. In some the reverse is surrounded by a margin of dots, and in one specimen there is a scalloped line within the dots, enclosing each dot in a scallop, and in others a plain circle within the dots. The seated figure also varies considerably. In some specimens the figure occupies the lower part of the coin and sits on a throne, not on a flower, and is crowned, and appears to be a king rather than a deity.

#### VAIŚRAVAṆA.

4	Æ 172 1·0	Seated figure, with right arm raised, holding a flower, left arm resting on thigh, a flower-pot to the left. The figure is crowned, and would appear to be a king. Legend, <i>Vaiśravaṇa</i> .	Cow facing to left, with calf underneath. Legend, <i>Kānadehi</i> . (Pl. I, Fig. 4.) This sacred cow ( <i>Kāmadhenu</i> ) sprang from the churning of the ocean, and possessed the power of granting wishes.
---	-----------------	--	--

The British Museum has three specimens of this type. They vary very little.

No.	METAL. WEIGHT. SIZE.	OBVERSE.	REVERSE.
AṂŚU-VARMAN (THĀKUMĪ DYNASTY).			
5	Æ 170 1·0	Winged lion facing left, with foot raised. Legend above, <i>Śryaṁśu Varma</i> .	Cow facing left, with calf underneath. Legend, <i>Kāmadehi</i> . (Pl. I, Fig. 5.)

The British Museum has ten specimens of this type. They vary very little

6	Æ 228·5 1·0	In the centre the sun surrounded by rays. Legend running round, <i>Mahārājādhirājasya</i> .	Winged lion facing left, with foot raised. Legend, <i>Śryaṁśoh</i> . (Pl. I, Fig. 6.)
---	-------------------	---	---

The British Museum has three specimens of this coin. They do not vary in design.

7	Æ 155 ·95	Winged lion to left, with foot raised. Legend above, <i>Śryaṁśu Varma</i> .	Lion to left, with foot raised. Crescent over the lion. (Pl. I, Fig. 7.)
---	-----------------	---	--

The British Museum has five specimens of this coin.

#### JISṂU GUPTA.

8	Æ 174·5 ·95	Winged bull to left, with forefoot raised. Legend above, <i>Śrī Jiṁnu Guptasya</i> .	Ornamental symbol. (Pl. I, Fig. 8.)
---	-------------------	--	-------------------------------------

There is only one specimen of this coin in the British Museum.

The figure on the obverse of this coin is described by Cunningham as a winged lion, similar to the winged lions on the preceding coins. I think, however, that it is a winged bull. The shape of the head is quite different from that of the lions. The legs are thinner, and distinctly end in hoofs and not in paws. The shape of the quarters is square like those of a bull, while those of the lions are all round. The tail also is the tail of a bull and not of a lion.

No.	METAL. WEIGHT. SIZE.	OBVERSE.	REVERSE.
-----	----------------------------	----------	----------

## PASUPATI.

9	Æ 105 ·85	Recumbent bull to left. Legend above, <i>Paśupati</i> .	Sun in the centre, surrounded by rays. (Pl. I, Fig. 9.)
---	-----------------	--	---

The British Museum has five specimens of this coin. They vary in the size of the sun and the shape of the rays round it, but otherwise are similar.

10	Æ 119 ·95	Similar to obverse of the preceding coin.	Symbol similar to that on obverse of coin No. 8 (Pl. I, Fig. 8), but smaller and not in high relief.
----	-----------------	---	--

There is only one specimen of this coin in the British Museum, which is Cunningham's coin No. 9.

11	Æ 97·5 ·90	Humped bull, standing to right, with crescent above.	Sun, with rays in centre. Round it legend <i>Paśupati</i> . (Pl. I, Fig. 10.)
----	------------------	--	---

There are nine specimens of this type in the British Museum.

12	Æ 49 ·75	Similar to the preceding coin, but of half the weight and value.	Similar to the preceding.
----	----------------	--	---------------------------

There are ten specimens of this coin in the British Museum, ranging from 43 to 48 grains in weight according to their condition, and from 75 to 80 of an inch in size. They are all much worn.

13	Æ 174 ·85	Humped bull, standing to left, with crescent above.	Similar to reverse of the preceding coin, but with a crescent with a dot inside it between each character of the legend <i>Paśupati</i> .
14	Æ 152 ·95	Humped bull, standing to left. Over it legend in one line, <i>Paśupati</i> .	Large sun in centre, surrounded by rays, similar to reverse of coin No. 9. (See Pl. I, Fig. 9 above.)

There are two specimens of this coin in the British Museum.

No.	METAL. WEIGHT. SIZE.	OBVERSE.	REVERSE.
15	Æ 153 ·9	Trident, with an axe attached to the shaft of it on the left, and some ornament hanging from it on the right. Legend, <i>Paśupati</i> .	Sun surrounded by rays. Round it legend <i>Paśupati</i> . (Pl. I, Fig. 11.)
There are two specimens in the British Museum.			
16	Æ — ·85	Trident, but with no axe or ornament attached to the shaft. Legend as in the preceding.	Sun surrounded by curved rays of the following form No legend.
There is one specimen only in the British Museum.			
17	Æ — 1·0	Design similar to obverse of coin No. 11 (Fig. 10). Legend, <i>Paśu</i> and two dots in the place of the other two characters.	Design similar to obverse of coin No. 11 (Fig. 10). Legend, <i>Pati</i> and two dots occupying the place of the other two characters.
There is one specimen in the British Museum.			
18	Æ 116 ·90	Seated figure of king on a high-backed throne, wearing a crown, right hand raised, left hand bent and resting on thigh, flower to left springing from below foot, vase of flowers to right.	Vase of flowers, with legend <i>Paśupati</i> in one line.
19	Æ 146 ·85	Seated figure of a king wearing a crown, with his right hand resting on the knee and left arm bent resting on the hips.	Similar to the reverse of the preceding coin. (Pl. I, Fig. 12.)
20	Æ 116 ·9	Seated figure of a king wearing a crown, with right hand raised and fingers extended, left hand extended resting on knee and holding a flower.	Vase of flowers with an ornamental scroll or a flowering branch on each side of it. Legend in two lines, <i>Paśupati</i> . (Pl. I, Fig. 13.)

## THE MALLA DYNASTY.

## Kingdom of Bhātgāon.

No.	METAL. WEIGHT. SRR.	DATE. A.D.	OBSERVE.	REVERSE.
<b>JAGATPRAKĀSA MALLA.</b>				
1	R 85 1·05	1632	Three-lined legend in scalloped square. <i>Śrī Śrī Jagatprakāsa Malla</i> ; above the square, figure of hand-drum ( <i>ḍamaru</i> ), and below, date 752 n.s.; on either side imitation of Arabic characters upside down.	<i>Trisula</i> (trident) with ornamental scroll attached within central circle; above it sword with wreath; around, imitation of Arabic characters upside down. British Museum. (Pl. II, Fig. 1.)
<b>JAYA JITAMITRA MALLA.</b>				
2	R 90 1·1	1663	Three-lined legend in scalloped square, <i>Śrī Śrī Jaya Jitamitra Malla</i> ; outside the square, imitation Arabic characters upside down as in the preceding; date below, 783 n.s.	Similar to preceding. (Pl. II, Fig. 2)
<b>JAYA BHŪPATINDRA MALLA.</b>				
3	R 80 1·02	1696	Three-lined legend in scalloped square, <i>Śrī Śrī Jaya Bhūpatindra Malla Deva</i> . Around. characters similar to preceding. Date, 816 n.s.	Similar to preceding. (Pl. II, Fig. 3.)
4	(pierced coin) R 21 ·7	1696	(Quarter mohar.) Dagger and wreath within two intersecting squares; above, two crescents and stars; legend, <i>Śrī Śrī Jaya Bhāpa-</i>	Vase of holy water, <i>kalāśa</i> , with streamers. The ornament on the top of the vase is obliterated by the piercing of the coin; above, two crescents and stars; legend, <i>tindra Malladeva</i> ; date below, 816 n.s. (Pl. II, Fig. 5.)

No.	METAL. WEIGHT. SIZE.	DATE. A.D.	OBVERSE.	REVERSE.
-----	----------------------------	---------------	----------	----------

## JAYA RAÑAJITA MALLA.

5	R 83.6 1.1	1722	Similar to No. 1. Three-lined legend, <i>Śrī Śrī Jaya Rañajita Malla Deva</i> ; below, date 842 n.s.	Similar to No. 1. (Pl. II, Fig. 4.)
6	R 84 1.05	1722	In central circle, shell, lotus, and <i>cakra</i> ; on margin to r. a bow, to l. five arrows; floral ornaments round; legend, <i>Śrī Śrī Jaya Rañajita</i> .	In centre a triangular <i>bhadrāstra</i> (conventional bow and arrow); within it a ( <i>pāśa</i> ) noose and ( <i>ankuśa</i> ) elephant goad; around it, to r. a <i>chāmara</i> (yak's tail fly-whisk), to l. a lotus; flower ornaments. Legend, <i>Jita Malla Deva</i> . Date below, 842 n.s. (Pl. II, Fig. 8.) <i>Note.</i> — This coin is a copy of Jaya Cakravartīndra's coin No. 15.
7	R 41.5 .92	1722	(Half mohar.) Continuous-lined figure forming five triangles on the sides of a pentagon; in pentagon, sword and wreath, two suns and legend <i>Śrī Śrī</i> ; in triangles, <i>Jaya Rañajita</i> ; in spaces round, <i>-ta Malla Deva</i> .	In <i>bhadrāstra</i> triangle vase of holy water, <i>kalāśa</i> , with streamers and two crescents and dots. Round, date <i>Vaisākha 15 Samvat. 842.</i> (Pl. II, Fig. 7.) <i>Note.</i> — The obverse and reverse of this coin are transposed on the Plate.
8	R (pierced coin) 21 .67	1722	(Quarter mohar.) Similar to No. 4. Quarter mohar of Bḥupatīndra. Legend, <i>Śrī Śrī Jaya Rañajita</i> .	Similar to No. 4. Legend, <i>Jita Malla Deva</i> ; date, 842 n.s. (Pl. II, Fig. 6.)

No.	MENTAL. WEIGHT. SIZE.	DATE. A.D.	OBVERSE.	REVERSE.
9	R (-) ·56	No date.	(Quarter.) Sword with- out wreath; two cres- cents and stars. Legend in three lines, <i>Sri Sri Jaya Rana</i> .	Legend in three lines, (1) <i>Jha</i> , (2) <i>Malla De</i> , (3) <i>ra</i> . No date. British Museum. (Not figured.)

### Kingdom of Kāthmāndū.

#### LAKSMINARA SIMHA.

10	R 70·5 1·05	No date.	Similar to reverse of No. 1, but with legend <i>Sri</i> in place of sword and wreath. No date. (Pl. II, Fig. 9.)	In square a shell and two-lined legend, <i>Sri Lakṣmi Nara Sim</i> . Characters round the square similar to the obverse of No. 1. <i>Note.</i> — The obverse and reverse of this coin are transposed on the Plate for con- tinuity with coins Nos. 1, 2, 3, and 4.
----	-------------------	-------------	--	--

#### PRATĀPA MALLA.

11	R 77 1·03	1641	Similar to the preceding coin of Lakṣminara Simha. Legend, <i>Sri Pratāpa Malla</i> . Date, 761 n.s.	Similar to the pre- ceding coin of Lakṣmi- nara Simha. (Pl. II, Fig. 10.) <i>Note.</i> — The obverse and re- verse are transposed on the Plate, as in the preceding coin.
12	R 87 1·02	1656	Imitation Persian charac- ters in two lines, in- tended for ' <i>Sau Ilahi</i> '; in centro, trident; the ground covered with flowers. Legend, <i>Sri Sri Kaviendra Jaya</i> .	Imitation Persian cha- racters in two lines, <i>Jahangir Shah</i> ; ground covered with flowers. Legend, <i>Pratāpa Malla</i> . Date, 776 n.s. (Pl. II, Fig. 12.)

No.	METAL. W.    ST. oz.    gr.	DATE. A.D.	OBSERVE.	REVERSE.
13	R 171 1·05	1661	(Double mohar.) A square coin; in ornamental square surrounded by floral margin. Trident with legend, <i>Sri 2. Raja Rajendra Jays.</i>	In ornamental square surrounded by floral margin; sword and legend, <i>Pratapa Malla Deva</i> . Date, 781 n.s. (Pl. II, Fig. 14.) This coin, which is unique, belongs to Dr. Hoernle. It is perhaps a <i>nisār</i> .
<b>RUPAMATI DEVI.</b>				
14	R 21·5 ·72	1649	(Quarter mohar.) Trident; two crescents and stars. Legend, <i>Sri Rupamati</i> .	Imitation Persian characters in two lines on floral ground; two crescents and stars. Legend, <i>Devī</i> . Date, 769 n.s. British Museum. (Pl. II, Fig. 11.)
<b>JAYA CAKRAVARTINDRA MALLA.</b>				
15	R 82 1·02	1669	In central circle, sun, lotus, and <i>cakra</i> ; on margin, to r. a bow, to l. five arrows; floral ornaments round. Legend, <i>Sri. 2 Jaya Cakra Va.</i>	In triangular <i>bāndra</i> (conventional bow and arrow) a noose and elephant gourd; around it, to r. <i>chāmara</i> (yak's tail fly-whisk), to l. lotus; and, on floral ground, legend <i>rtindra Malla</i> . Date, 789 n.s. (Pl. II, Fig. 13.)
<b>JAYA NRPENDRA MALLA.</b>				
16	R 80 1·0	1675	Imitation Persian characters in two lines; in centre, trident; above, sun; flowered field. Legend, <i>Sri Sri Jaya Nrpendra</i> .	Imitation Persian characters in two lines; in centre, sword and wreath; above, crescent; flowered field. Legend, <i>Malla Deva</i> . Date, 795 n.s. (Pl. III, Fig. 1.)

No.	METAL. WEIGHT. SIZE.	DATE. A.D.	OBVERSE.	REVERSE.
<b>JAYA PĀRTHIVENDRA MALLA.</b> (QUEEN RĀJYA LAKṢMĪ DEVI.)				
17	R 87 1-05	1682	Two intersecting squares. In central octagon, legend <i>Śrī Śrī Jaya Pārthivendra Malla Deva</i> . In the triangles round, legend <i>Ma-hā-rā-ja-Ne-pā-le-ndra</i> . In circle, trident, crescent, and sun, and legend <i>Śrī Hara Siddhi</i> ; in petals, <i>Śrī Śrī Jaya Viśvajita Malla Deva</i> . Date, 878 <small>n.s.</small>	Circle surrounded by eight lotus petals. In circle, sword and wreath on pedestal, and legend <i>Śrī Śrī Śrī Lokanātha</i> ; in petals, <i>Śrī 2. Yuga Narendra Malla</i> . (Pl. VI, Fig. 10.)
74	.R 21 70	1752	(Quarter mohar.) Circle surrounded by six petals, in circle. Legend, (in circle) <i>Śrī</i> , (in petals) <i>Viśvajita Malla Deva</i> . Date (in circle), 872 <small>n.s.</small>	Circle surrounded by six petals. In circle, sword and wreath, two crescents and dots, and two lotus buds; in petals, legend <i>Śrī Śrī Lokanātha</i> . (Pl. VI, Fig. 11.)
<b>DALA MARDANA SĀHA.</b>				
75	.R 85 1·12	1678	Small circle in centre; round it a square divided by a svāstika; in circle, trident and two dots; outside the square, above, crescent and sun, to l. flowers, to r. shell and mace. In square, legend <i>Śrī Śrī Dala Mardana Sāha Deva</i> . Below, date 888 <small>n.s.</small>	Circle surrounded by eight petals. In circle, sword and wreath on pedestal, crescent and sun, and two flowers; in petals, legend <i>Śrī Śrī Śrī Karundmaya</i> (Pl. VI, Fig. 13.)

## LIST OF GHORKĀ COINS.

No.	METAL. WEIGHT. Sree	DATE. A.D.	OBVERSE.	REVERSE.
<b>PRTHVĪ NĀRĀYANA SĀHA.</b>				
(After seizure of territory at Noakoṭ.)				
1	R 86.5 1.15	1754	(Mohar.) Square, with openings in the middle of the sides, and with small circle in the centre, and divided into four compartments by the four arms of a <i>SVASTIKA</i> . In central circle, a trident. Around the square; above, sun, moon, and star; to l., <i>chakra</i> (discus) and lotus; to r., shell and mace. In square, legend <i>ŚRĪ ŚRĪ PRTHVĪ NĀRĀYANA SĀHA DEVA</i> . Below, date 1676 (Śāku era = 1754 A.D.).	Similar to the reverse of the Malla coins of Jaya Bhāskara (No. 22; Pl. III, Fig. 5), Vīra Mahendra (No. 26; Pl. III, Fig. 9), Jaya Jagajjaya (No. 28; Pl. III, Fig. 11), kings of Kāṭhmāṇḍū; and the obverse of coin of Yoga Prakāśa of Pūtan (No. 66; Pl. VI, Fig. 3). Circle surrounded by eight petals. In circle, two straight lines, which represent the imitation Persian characters on the above noted Malla coins, sword and wreath. Legend, in circle, <i>ŚRĪ ŚRĪ BHĀVĀNĪ</i> ; in petals, <i>ŚRĪ ŚRĪ ŚRĪ GORAKHĀNĀTHĀ</i> . (Pl. VII, Fig. 1.) <i>Note.</i> —From the date this coin was struck by <i>PRTHVĪ NĀRĀYANA</i> after his first seizure of Nepal territories at Noakoṭ, and before he conquered the country and took the capitals in 1786 A.D.
2	R 83 1.10	1769	(As King of Nepal.) (Mohar.) Similar to the preceding. Date, 1695 S.	Similar to the preceding.

No.	METAL. WEIGHT. SIZE.	DATE. A.D.	OBVERSE.	REVERSE.
3	R 85 (-)	1773	(Mohar.) Similar to the preceding. Date, 1695 Ś.	Similar to the preceding. But legend in circle, ŚRI ŚRI LOKANĀTHA; in petals, ŚRI ŚRI GORAKHĀNĀTHA. (Marsden, MCVXXV.)
4	R 41.5 .77	1771	(Half mohar, or suka.) Imitation Persian characters in two lines. In centre, trident; legend, ŚRI 3 PṚTHVĪ NĀRĀYAṆA.	Imitation Persian characters in two lines. In centre, sword and wreath, sun and moon. Legend, SĀHA DEVA. Date, 1693 Ś. (Pl. VII, Fig. 2.) <i>Note.</i> —The design and symbols of this coin are similar to the mohar of JAYA NĀPĒNDRA MĀLLA (No. 16; Pl. III, Fig. 1); and with the exception of the symbol on the reverse, to the quarter mohar of JAYA DHĀSKARA MĀLLA (No. 23; Pl. III, Fig. 6).
5	R 171 (-)	1771	(Double mohar.) Similar to the mohar No. 1. Date, 1693 Ś.	Similar to the mohar No. 1 (Marsden, MCVXXI). <i>Note.</i> —This is the first example of a double mohar.
<i>Gold Coinage.</i>				
6	N 85 (-)	1768	(Gold mohar or patlā.) Similar to the silver mohar No. 1. Date, 1690 Ś.	Similar to the silver mohar No. 1 (Marsden, MCVXXVII).
7	N 41.5 (-)	—	(Gold half mohar or sonko sukū.) Similar to the silver half mohar No. 3.	Similar to the silver half mohar No. 3 (Marsden, MCVXXVIII).

No.	METAL. WEIGHT. SIZE.	DATE. A.D.	OBVERSE.	REVERSE.
8	N 10 (-)	No date.	(Gold eighth of mohar or son-ko-ānī.) Similar to the preceding. No date.	Similar to preceding (Marsden, MCCCXIX).
9	N 3 (-)		(Gold dām = 1/16 mohar.)	(Marsden, MCCCX.)
10	N 356 1.25	1771	(Duitole asarft.) Large gold piece. Similar to mohar No. 1. Date, 1693 Ś.	Circle surrounded by eight-pointed star. Around, ornamental design between each point of the star. In circle, sword and dagger. Legend, in circle, ŚRI Ś, BHAVĀNI; in points of star, ŚRI ŚRI ŚRI GORAKHANĀTHA. (Pl. VII, Fig. 4.)

## (QUEEN NARINDRA LAKŚMI DEVI.)

11	N 22.2 .63	1771	(Gold sukā.) Offering vase with cover in form of <i>stūpa</i> , surmounted by umbrella. Legend, ŚRI ŚRI NARINDRA LAKŚMI DEVI.	Imitation Persian characters in two lines. In centre, trident; above, sun and moon. Legend, ŚRI ŚRI BHAVĀNI. Date, 1693 Ś. Marsden, MCCCXIII. (Pl. VII, Fig. 3.)
----	------------------	------	---	--

## PRATĀPA SIMHA SĀHA (1774-1777 A.D.).

12	83 1.15	1774	Device as on mohar of Pṛthvi Nārāyaṇa Sāha, No. 1. Legend, ŚRI ŚRI ŚRI PRATĀPA SIMHA SĀHA DEVA. Date, 1696 Ś.	Device as on No. 1. Legend, in circle, ŚRI ŚRI GUHYESVARI; in petals, ŚRI ŚRI ŚRI GORAKHANĀTHA, as on No. 1.
13	AR 42 1.60	1775	(Sukā.) Device as on No. 4, but with crouching lion to L. below. Legend, ŚRI 2. PRATĀPA (lion =) Simha.	Device as on No. 4, but with umbrella above. Legend, SĀHA DEVA. Date, 1697 Ś. This coin is similar to No. 17. (See Pl. VII, Fig. 5.)

No.	METAL. WEIGHT. SIZE.	DATE. A.D.	OVERSE.	REVERSE.
14	R 10.6 .53	No date.	(Sukī.) None. (Anī.) Sword, without wreath. Legend, <i>ŚRI</i> <i>PRATĀPA</i>	Lion to l., with paw raised and tail curled over the back, and flower buds in front. Legend, <i>SAHA</i> . Mara- den, <i>MCKXVIII</i> . (Pl. VII, Fig. 6.)
15	R 5.5 .35	No date.	(Adhānī.) Sword, and legend, <i>ŚRI PRATĀPA</i> .	Nothing stamped on reverse. Design simi- lar to Malla coin No. 43, of <i>JAYA PRAKĀSA</i> <i>MALLA</i> . (Pl. IV, Fig. 14.)
<i>Gold Coinage</i>				
16	N		(Gold mohar or patlā.) Exactly similar to silver mohar No. 12.	Exactly similar to No- 12.
17	N 41.5 .77	1775	(Gold sukā.) Exactly similar to silver sukā No. 13.	Exactly similar to silver sukā No. 13. Date, 1697 Ś. Maraden, <i>MCKXVI</i> . (Pl. VII, Fig. 5.)
18	N 11.0	No date.	(Gold sukī.) None. (Gold ānī) Exactly similar to silver ānī No. 14.	Exactly similar to silver ānī No. 14. Maraden, <i>MCKXVIII</i> .
19	N 5.5 (-)	No date.	(Gold adhānī.) Same as silver sixteenth of mohar.	Same as silver six- teenth.
20	N 356 1.25	1776	(Duitole asarfi.) Device as on No. 10. Legend, <i>ŚRI NĀRĀYĀNA</i>	Similar to the duitole asarfi of Pṛthvi Nārā- yaṇa, No. 10.

No.	METAL. WEIGHT. SIZE.	DATE. A.D.	OBVERSE.	REVERSE.
<b>RĀJENDRA LAKSMĪ DEVĪ (as Queen Consort).</b>				
21	R 21·5 68	1776	(Sukī.) Vase for offerings with cover in form of <i>stūpa</i> . Sun and moon. Legend, <i>śrī śrī RĀJENDRALAKSMĪDEVĪ</i> .	Device as on No. 10 of Narindra Laksmī Devī. Date, 1698 Ś.
<i>Gold Coinage.</i>				
22	A 21·0 68	1775	(Gold sukī.) Similar to the preceding.	Similar to the preceding. Date, 1697 Ś. Marsden, MCXL
<b>RĀNA BAHĀDUR SĀHA (1776-1799 A.D.).</b>				
23	R 84 1·12	1783	(Mohar.) Device as on No. 1. Legend, <i>śrī śrī RĀNA BAHĀDUR SĀHA DEVA</i> . Date, 1705 Ś.	Similar to No. 1.
24	R 169 97	—	(Double mohar.) Similar to the preceding. (Date not noted.)	Similar to the preceding (a small thick one).
25	R 41 86	1790	(Sukā.) Device as on No. 4. Legend, <i>śrī śrī RĀNA BAHĀDUR</i> .	Device as on No. 4. Legend, <i>SĀHA DEVA</i> . Date, 1712 Ś.
