By the request of Author, *read* at pp. 127, 128—

“ From Cachinal I started alone into the desert of Atacama, in the hope of reaching Huanaguero and Peine, where I supposed I should find the deposits of the Atacama Meteorite ; but I unfortunately lost my way, and was obliged to give it up. I fortunately found my way back to the spring of Cachinal, and overtook my late companions near the Aguada de Abajo. On the coast is a fishing cove, where there is a high isolated rock called the Pan de Azucar, with a ship passage between it and the land. By bad tracks I reached Agua Hedionda, where the water is rendered fetid by containing sulphur. Crossing the valley of Chafaral I came to the rocky point of Los Infieles, where there is a little pasture and water. At Las Animas, half a day's journey inland, are the rich copper mines of the same name. At Port Flamenco, 10 leagues E., are many rich silver and copper mines. Passing Salinas, Obispo, and Tortoralillo I came to the excellent port of La Caldera. I now pursued my journey across the pampa to the valley of Copiapo. For a long period this district has been famed for its gold, silver, and copper mines, and already operations have commenced in the formation of a railroad from the town of Copiapo to the sea. Journeying onward to Huasco I reached the city of La Serena or Coquimbo.”
